Summer Undergraduate Research Experience in Neuroscience
Sponsored by the National Institute of Neurological Disease & Stroke

Application deadline: Friday, March 4, 2016

Research
Experience research first hand in the laboratory of a Delaware neuroscientist. Work collaboratively on projects related to biology, psychology, computer science, rehabilitation science, or engineering.

Neuroscience
Researchers in Delaware are studying the mechanisms of Alzheimer’s disease, fetal alcohol syndrome, anxiety & PTSD, neuromuscular disease, epilepsy and the basic biology of learning and memory, neural development, and consequences of early life trauma.

Program Details
For undergraduate science majors at Delaware State University, Delaware Technical & Community College, and Wesley College. Must be a US citizen or permanent resident and have completed 25 credits of college classes.
$4,000 stipend
May 31 – August 11, 2016
