BEHAVIORAL SKILLS AND COMPETENCIES

- Accountability in the Workforce
- Problem Solving
- Action Oriented/Attention to Detail
- Emotional Intelligence at Work
- Decision Quality

GENERAL INFORMATION:

- Students may receive a full tuition refund if requested in writing to ace@desu.edu within 7 business days of the start date of course. The \$35.00 registration fee is not refundable.
- Externships - all students participating in ACE courses will receive an opportunity to participate in an externship. This is not a requirement for completion of the course, but recommended and discussed with the student.
- Price Changes - prices in the course guide are subject to change and will be confirmed upon enrollment.

COMPUTER SECURITY TECHNICIAN (COMPTIA SECURITY+ AND NETWORK+) CERTIFICATION PROGRAM

The Computer Security Technician program is designed to prepare students to function as computer professionals in multiple technical, business and healthcare settings. SEC+ technicians serve many technical support and IT operation roles with job titles such as Systems Administrator, Security Administrator, Junior IT/Auditor, Penetration Tester, Security Consultant as well as Network Field Technician, Help Desk Technician and Network Support Specialist.

This program prepares students to support the IT infrastructure through installing and configuring systems to secure applications, networks, and devices as well as perform threat analysis and respond with appropriate mitigation techniques. It prepares students to learn to manage, maintain, troubleshoot, install operate and configure basic network infrastructure.

Students who complete this program will be prepared to sit for the CompTIA Security +Certification (Exam SY0-501) and CompTIA Network+ Certification (Exam N10-007).

STUDENT REQUIREMENTS: Students must have a high school diploma or GED and have successfully completed CompTIA's A+ training or have 24 month's experience of networking support or IT Administration.

LOCATION: DSU Supported Online Learning | **COST:** \$3999.00 | **BEGINNING:** Flexible Registration

This Comprehensive course is supported by Learner Support, including technical and mentor, includes optional externship, National Certification exam fee, and scheduling exam.

COMPUTER SUPPORT SPECIALIST (COMPTIA A+ AND NETWORK+) CERTIFICATION PROGRAM

The Computer Support Specialist program is designed to prepare students to function as computer professionals in multiple technical, business, and healthcare settings. Computer technicians serve many technical support and IT operation roles with job titles such as Support Specialist, Field Service Technician, Desktop Support Analyst, and Help Desk Tier 2 Support. Net+ technicians

The purpose of this program is to prepare students to support computer users by configuring, troubleshooting, managing wired and wireless networks and problem-solve computer issues, and connect users to the data they need to do their job regardless of the devices being used. This program will support the IT infrastructure through installing and configuring systems to secure applications, networks and devices as well as perform threat analysis and respond with appropriate mitigation techniques.

Students who complete this comprehensive course will be prepared to sit for the CompTIA's A+ Certification Exams Core 1(Exam 220-1001) and Core 2 (Exam 220-1002) as well as CompTIA's Network + Exam (Exam N10-007).

STUDENT REQUIREMENTS: Students must have a high school diploma or GED

LOCATION: DSU Supported Online Learning | **COST:** \$3,999.00 | **BEGINNING:** Flexible Registration

This Comprehensive course is supported by Learner Support, including technical and mentor, includes optional externship, National Certification exam fee, and scheduling exam.

ADOBE DESIGN SUITE CERTIFICATION PROGRAM

Gain the skills and hands-on experience necessary for visual design using Adobe Photoshop, graphic design using Adobe Illustrator, and print and digital media publication using Adobe InDesign. With this program, Learners will discover the endless creative possibilities and design tools in these essential Adobe applications. Whether in graphic design, visual media or other related field, the need for learners who can use these applications regularly to accomplish creative and business tasks is endless. Applications for marketing, web design and development, print media and other digital arts are as boundless as they are exciting.

This program takes Learners through the ins and outs of these 3 essential Adobe applications to ensure a professional level of proficiency in all 3 applications. Learners will gain the skills and expertise necessary to navigate each application, perform simple and complex functions, automate various items and understand how to put these tools to use for themselves, colleagues or clients.

Students who complete this comprehensive course will be prepared to sit for the

- Adobe Certified Professional in Visual Design using Adobe Photoshop
- Adobe Certified Professional in Graphic Design and Illustration using Adobe Illustrator
- Adobe Certified Professional in Print & Digital Media Publication using Adobe InDesign

STUDENT REQUIREMENTS: Students must have a high school diploma or GED

LOCATION: DSU Supported Online Learning | **COST:** \$3,999.00 | **BEGINNING:** Flexible Registration

This Comprehensive course is supported by Learner Support, including technical and mentor, includes optional externship, National Certification exam fee, and scheduling exam.

FRONT-END WEB DESIGN & DEVELOPMENT PROGRAM

Gain hands-on expertise in ICT Web Design Essentials certification exam with ICT Web Design Essentials course. This program starts with the fundamentals of designing websites and provides the knowledge to demonstrate web page design principles, plan the design and development of an effective website, create web pages using basic HTML code and authoring tools, use collaborative web technologies in a web development or research project, and prepare web pages for publication.

This program introduces learners to various technologies available to enhance a user's web experience; and design and color principles for web pages. Learners will gain expertise in applying CSS and the latest versions; designing web pages to industry standards, considering copyright and ethical issues when creating web pages, and more. Learners will demonstrate skills in HTML forms, validating HTML codes, using CSS and more!

Students who complete this comprehensive course will be prepared to sit for the

- CIW: Site Development Associate (1D0-61B)
- CIW: Advanced HTML5 and CSS3 Specialist (ID)-620)

STUDENT REQUIREMENTS: Students must have a high school diploma or GED

LOCATION: DSU Supported Online Learning | **COST:** \$3,999.00 | **BEGINNING:** Flexible Registration

This Comprehensive course is supported by Learner Support, including technical and mentor, includes optional externship, National Certification exam fee, and scheduling exam.

CLOUD DATABASE ADMINISTRATOR FOR MICROSOFT AZURE CERTIFICATION PROGRAM

This program provides an in-depth understanding of networking, storage, compute, application support and development in cloud environments with a specific focus on Microsoft Azure. In this course, Learners will discover the ins and outs of cloud concepts, Azure services, Azure workloads, security and privacy in Azure, as well as Azure pricing and support. Core solutions and management tools on Azure, general security and network security features, identity, governance, privacy, and compliance features, and Azure cost management and Service Level Agreements are further explored.

Learners will explore common tasks and concepts that an administrator needs to understand to deploy and manage infrastructure in Microsoft Azure. The Administrator functions for cloud database structures include managing Azure AD objects (users, groups, and devices), Azure AD join and self-service password reset. It also covers role-based access control, tagging, subscription level policies, and resource organization using resource groups, subscription, and management groups.

Finally, Learners will gain an understanding of the skills and knowledge required for implementing and monitoring an Azure infrastructure, managing security solutions, implementing solutions for apps, implementing and managing data platforms. Learners will understand Azure capability in networking, virtualization, identity, security, business continuity, disaster recovery, data platform and budgeting.

Students who complete this program will be prepared to sit for the following National Certifications:

- Microsoft Azure Certified
- Microsoft Azure Administrator
- Microsoft Certified: Azure Solutions Architect Expert

STUDENT REQUIREMENTS: Students must have a high school diploma or GED

LOCATION: DSU Supported Online Learning | **COST:** \$3,999.00 | **BEGINNING:** Flexible Registration

This Comprehensive course is supported by Learner Support, including technical and mentor, includes optional externship, National Certification exam fee, and scheduling exam.

AWS SysOps ADMINISTRATOR ASSOCIATE CERTIFICATION PROGRAM

This comprehensive program starts with foundational instruction on Amazon Web Services (AWS) you'll learn using online, cloud-based labs. This program covers architecture systems and skills to solve technical problems using the latest cloud computing technologies. Learners will identify key AWS storage options, Amazon EBS, Amazon S3 bucket creation, and sample code and libraries along with computing and networking services using Amazon EBS and EC2 instances.

The AWS Certified SysOps Administrator Associate certification validates a candidate's skills required to provision, operate, and maintain systems running on AWS. With this certification, a candidate can identify and gather requirements to create a solution built and operated on AWS, and provide AWS operations, deployment guidance, and recommend best practices throughout the lifecycle of a project. No programming knowledge or prior AWS experience is required to take the exam.

Students who complete this program will be prepared to sit for the Amazon Web Services (AWS) Certified SysOps Administrator - Associate

Student Requirements: Students must have a high school diploma or GED

LOCATION: DSU Supported Online Learning | **COST:** \$3,999.00 |

BEGINNING: Flexible Registration

This Comprehensive course is supported by Learner Support, including technical and mentor, includes optional externship, National Certification exam fee, and scheduling exam.

AGILE CERTIFIED PRACTITIONER CERTIFICATION PROGRAM

Ideally suited for those involved with a development project, Agile skills ensure professionals have the tools to improve project & performance through earlier visibility. Best suited to those looking to improve their project management expertise through scrum master certification, Scrum is a horizontal framework, all departments and levels can benefit from it and all will need training on these ideas in order to successfully transition a company. While the most popular market is in the software industry, there are other industries that benefit greatly from this methodology: manufacturing, research and development, service industries like healthcare and education, and even promoting.

The Agile Certified Practitioner Program offers a comprehensive study of materials that will help learners to fully understand the concepts of Agile and Scrum. This course begins with an introduction to the core philosophy of Agile and the basic structure of an Agile project, as well as best practices for integrating Agile methods into Waterfall environments, and the principles of Scrum, one of several specialized Agile methods. With examples from Fortune 1000 companies and other common practice tips, the course will apply to those in the IT business, manufacturing, construction, healthcare, education, and even to stay-at-home moms.

Students who complete this comprehensive course and meet Project Management Institute (PMI) eligibility requirements would be prepared to sit for the PMI-Agile Certified Practitioner (PMI-ACP®) Exam

STUDENT REQUIREMENTS: Students must have a high school diploma or GED

LOCATION: DSU Supported Online Learning | **COST:** \$3,999.00 |

BEGINNING: Flexible Registration

This Comprehensive course is supported by Learner Support, including technical and mentor, includes optional externship, National Certification exam fee, and scheduling exam.

CERTIFIED ETHICAL HACKER CERTIFICATION PROGRAM

With the onset and proliferation of technical security breaches across the country, major corporations, organizations, small businesses and even individuals are at risk of data breaches and exploitation by bad actors. The need for technicians with the skills to systematically penetrate organizations’ systems in order to expose any potential risk is greater than ever.

In this program, learners will gain the skills necessary to systematically inspect an organization’s network and system infrastructures to locate vulnerabilities that malicious hackers could exploit. Upon assessing the system’s security to determine if unauthorized access is possible, learners will develop skills to close those security breaches. This comprehensive program covers the CEH v10 exam objectives through online didactic instruction and labs that thoroughly teach the principles of ethical hacking.

STUDENT REQUIREMENTS: Students must have a high school diploma or GED

LOCATION: DSU Supported Online Learning | **COST:** \$3,999.00 | **BEGINNING:** Flexible Registration

This Comprehensive course is supported by Learner Support, including technical and mentor, includes optional externship, National Certification exam fee, and scheduling exam.
