vii. Wei Xu (Topic: Bile acid-binding capacity of lobster shell-derived chitin, chitosan and chitooligosaccharides). Dalhousie University, Truro, Canada & Verschuren Center for Sustainability in Energy and the Environment, Cape Breton University, Sydney, Canada - Completed/Graduated - Nov 2017

viii. Benjamin Bougouneau, Student Research Assistant - August 2017 - to present

ix. Linton Bailey, CIBER Scholar Summer 2017 - Completed

x. Mary Besong, CIBER Scholar Summer 2017 - Completed

b) Graduate Student Advising:

i. Jallah C. Smith: January 2018 - to present

ii. Wycliffe O. Wanyang: August 2017 - Dec. 2017

iii. Peace C. Asuzu: August 2017 - to present

c) Graduate Student Committee:

i. Raphael L. Eyum (Topic: Development of a rapid method to distinguish between total number of viable and dead *Pseudomonas* species in pure culture by Ethidium bromide monoazide-PCR) Thesis Supervisory Committee Member - Completed/Graduated - April 2018

ii. Esam Almuhaideb (Thesis: Isolation and differentiation of *Vibrio* species in oyster and seawater from Delaware bay and molecular characterization of *Vibrio parahaemolyticus*), Thesis Supervisory Committee Member - Completed/Graduated - April 2018

iv. Yazmine Thomas (Topic: Lead, arsenic, and cadmium contamination in commercially available brands of coconut milk), Non-thesis Supervisory Committee Member - Completed/Graduated - July 2017

v. Immaculate T. Arrey (Thesis: Enzyme-assisted aqueous extraction of njangsa (Ricinidendron heudelotti) seed oil), Thesis Supervisory Committee Member & de facto advisor - Completed/Graduated - April 2018

vi. Michael D. Hughes (Thesis: GC-MS characterization of sulfur species in lightweight fractions of biodiesel distillate), Thesis Supervisory Committee Member - Completed/Graduated - April 2017

d) Search Committees

i. Search Committee Member - Faculty Position for Textiles and Apparel Studies. Summer, 2017.

EMPLOYEE (faculty, professional/classified staff)

PROFILE AND ACCOMPLishments

May 2017 - April 2018

Name: __ Jihye Lim __________________________________________

Rank/Title: Assistant Professor __________________________________

Year Hired : 2017 __ Years of Service: __ year_____________________

_____Tenured _X_ Non-Tenured on tenure track ____ Not tenure-track ____ N/A

12. Courses taught with enrolment

a. Fall 2017

HMEC 210 Introduction to Textiles (New Prep) (7).

HMEC 415 Consumer Behavior in Fashion (New Prep) (9).

b. Spring 2018

HMEC 103 Apparel Construction (New Prep) (9).

HMEC 202 Historic Costume & Design (New Prep) (8).

HMEC 470 Textiles and Apparel Global Economy (New Prep) (13).

13. Participation in professional meetings, seminars, etc. Include date.

a. PDW 2017 Professional Development workshop; Transformation with Purpose, Delaware State University, Dover, November 2017.

b. 47th Delaware Agricultural Industry meeting, Delaware Council of Farm Organizations, Dover, January 2018.

c. 2nd Conference on Preparing Wining Grants, Delaware State University and USDA, Dover, May 2018.

14. Research and publications. List the names of students involved.

15. Proposals submitted but not yet funded. Include funding agency.

a. Design of Textile Composite Highly Performing for Management of Sludge Wastewater. PI, 2018 CBG grants, USDA-NIFA.

16. Funded grants/funding source/amount/time period: None.

17. Outreach Programs/Activities and dates:

· 2018 Ad Hoc Reviewer, Fashion and Textiles.

· 2015 - Present Ad Hoc Reviewer, Textile Research Journal.

18. Innovative teaching strategies and/or student services strategies initiated:

Incorporated the following activities in Textiles and Apparel design program courses:

a. Field trip to the high performing textiles and apparel global company, Invista.

b. 2018 AATCC Student Competition for Product Development.

c. 2018 AATCC Student Competition for Merchandising.

d. Review of peer-reviewed journal paper and market report related textile and apparel fields.

19. Assessment related activities:
· New preparation of courses following:

HMEC 209, HMEC 210, HMEC 415, HMEC 103, HMEC 202, HMEC 320, HMEC 470.

· New preparations include the development of:

i. Syllabus.

ii. Lecture notes.

iii. Small group long term project related textile product development and merchandising.

iv. Small group discussion and presentation.

v. Rubric to assess students’ performance in writing, presentation, and sewing practices.

vi. Industrial network through field trip.

20. Advanced study or other professional development:

- Interdisciplinary research development, integrating textile science and technology into sludge wastewater management.

- Collaborative research development with the University of Delaware.

21. Special honors and awards received: None.

22. Other significant accomplishments:

- Undergraduate Advising for Junior (7)

EMPLOYEE (faculty, professional/classified staff)

PROFILE AND ACCOMPLISHMENTS

Unit(s) Initiatives accomplished in this cycle

VI. UNIT INITIATIVES

A. List and describe any new programs and/or initiatives.

The Accreditation Council for Education of Nutrition and Dietetics has approved the implementation of a Coordinated Program in Dietetics at DSU

B. List and describe any significant modifications in the past 12 months to pre-existing programs or curricula.

Program Review
Curriculum and Course Revisions / Modifications:

- The Food and Nutritional Sciences program has been modified to have concentrations listed below:
  - Coordinated Program in Dietetics
  - Nutritional Science
  - Food Science
  - Pre-Medicine
  - Pre-Allied Health Sciences
  - Pre-Physician Assistant

By studying nutritional sciences at Delaware State University students can fulfill their premed or pre-physician's assistant or pre-accelerated nursing school requirements while studying how nutrition enhances health and quality of life through promotion of wellness, disease prevention or delay and/or medical nutrition therapy. There is in increasing recognition of the effect of nutrition and diet on health and longevity in the health care community. **Rationale:** Medical Schools and Allied Health programs across the United States School have recognized that practical nutrition education must be incorporated into their curricula to address the startling increase in **chronic diseases and the obesity epidemic** in the Western world

- The Textiles and Apparel Studies program has been modified to have concentrations listed below:
  - Fashion Merchandising
  - Fashion Design
The Textile and Apparel Studies (TAS) program was designed to provide students with knowledge and skills in textiles, fashion design, merchandising and product development, and business. Rationale: Over the years, students left the program because of lack of opportunity to choose specific field of interest such as Fashion Merchandising, Fashion Design or Textiles. To improve retention, we decided to develop concentrations in Fashion Merchandising and Fashion Design within the program.

**Concentration: Fashion Design**

The Fashion Design program prepares students for the world of fashion design and its related industries. Students focus on the design and construction of garments, design’s expression and how it moves and fits the body. The curriculum stimulates creative expression in all aspects of Fashion Design, including fashion sketching, creative design, computer applications, draping, and pattern drafting. Graduates often have employment opportunities in many different facets of the industry relating to design, styling, forecasting, marketing, manufacturing, and merchandising. Fashion designers communicate ideas by fashion sketching, fashion illustration, and through the creation of three-dimensional finished garments that may appear on the runways or in retail stores.

**Concentration: Fashion Merchandising**

It is an interdisciplinary program that requires knowledge of both fashion and business, and knowledge in apparel and business to give students an understanding of the design, manufacture, buying, selling and distribution of goods with knowledge about the target consumer. The curriculum is designed to help students understand how to conduct business across the entire breadth of the textiles and apparel industry. Students will understand the ways apparels are created, marketed, sold, and bought. Fashion and apparel merchandising is the promotion and sale of clothing and accessories, especially those articles of wear that are the prevailing trend. There are several job opportunities in the fashion and apparel merchandising field.

**Established collaboration to enhance research**

**External Collaboration to support Food Microbiology Research**

- Vibrio & fish project: Collaboration with USDA-ARS, DSU Aquaculture facility.
- Salmonella/Campy project: Collaboration with USDA-ERRC, UMES.
- Natural products & AMR project: Collaboration with UMD College Park.
- Genomics project: Collaboration with DBI.

**External Collaboration to support Food Chemistry Research**

- Biobased and Other Animal Coproducts Research Unit, USDA-ARS, ERRC
- 600 East Mermaid Lane, Wyndmoor, PA 19038
- Nutrient Digestibility: School of Nutrition Sciences, Faculty of Health Sciences, University of Ottawa, 25 University Private, Ottawa, ON K1N 6N5 Canada
Bio-products research, Verschuren Centre for Sustainability in Energy & Environment, Cape Breton University, 1250 Grand Lake Road, Sydney, B1P 6L2, Nova Scotia, Canada

(i) List Professional Development Efforts and/or Activities organized by the unit. List Professional Development Activities not organized by the unit but attended by or pursued by unit member(s), list names of members involved.

- Partnered with USDA-NIFA and organized a successful Grant Writing Conference in Dover on May 10-11, 2018 that attracted more than 100 participants

Service Learning & Experiential Learning

- Continue to provide experiential learning opportunities to Food and Nutritional Sciences students through collaboration with DSU’s cooperative extension, the Food Bank of Delaware, the WIC program in Delaware, the School Lunch Program, Area Agencies for Aging, hospitals and long-term care facilities.
- Continue to provide internship opportunities to students interested in food science and biotechnology through collaboration with food industries such as Perdue Farms and USDA-ARS in Wyndmoor, PA.
- Continue to provide experiential learning opportunities for Textiles and Apparel students through collaboration with retail stores.

Recruitment Efforts

Organize a two-week summer research apprenticeship program for high school students (grade 10-12) to provide experiential learning in the Food Chemistry and Food Microbiology laboratories:

- CARS-CIBER Summer Intern Program for undergraduate.
- DSU Summer Biotechnology Camp for high school student

(ii) List all community, public, and business outreach programs, activities and events occurring during the reporting year. Asterisk any that involved individuals from other DSU Units. Where appropriate, indicate the number of persons served by the outreach effort.

(iii) Enter any other comments that you feel are important to the continued improvement of the Unit
Student Leadership Opportunities

Encourage and support participation in student club (Food & nutrition club; Fashion club) activities and other student activities on campus

Unit(s) Honors/Awards and Achievements

VII. HONORS/AWARDS/ACHIEVEMENT OF STUDENTS

A. Report any special honors and/or awards for the year. Academic departments are to include key statistics, such as number of degrees awarded, average time-to-degree, graduation rate, retention rate (year-to-year and to graduation) as compared to university totals.

- Ten (10) students graduated with a baccalaureate degree the during May 12, 2018 commencement (3 earned a degree in Food and Nutritional Sciences, and 7 earned a degree in Textiles & Apparel Studies)
- Three students graduated with a Master of Science degree in Food Science and Biotechnology

B. Major Achievements of Students (not included above) as compared to university totals. Please provide information as available. Institutional Research Office may be contacted for needed information.

i Honors Received by Majors

Food and Nutritional Science: Abigail Webster (’12/17) received the Outstanding Dietetic Student of the Year Award of the Delaware Academy of Nutrition and Dietetics

Textiles and Apparel Studies:

ii Activities of Student Groups (including civic and social activities)

Seventeen TAS students participated in a field trip to Paris, France

iii Job Placement and/or Accomplishments of Seniors

Most FNS graduates are employed within their field or continue their studies in graduate work.

The 5 Textiles and Apparel Studies graduates have received offers for potential jobs in their field of studies.
iv Job Placement and/or Accomplishments of Graduate Degree Recipients

- Sixty (60) percent of Food and Nutritional Science graduates are employed within their field and forty percent (40%) are pursuing a certificate program and graduate/professional school
- Seventy percent of Textiles and Apparel Studies graduates have received offers for potential jobs in their field of studies and thirty percent are planning to pursue graduate school.

Job Placement and/or Accomplishments of Graduate Degree Recipients

- Seventy percent (70%) of our graduates have received offers for potential jobs in their field of studies and thirty percent (30%) are pursuing a PhD in a closely related field

Follow-up of Graduates (All Degree Levels; 2014 and before)

In the past, many FNS undergraduates transferred from the nursing major into FNS and therefore plan to pursue an accelerated nursing degree after graduation. However, with changing requirements in Math and Science for FNS majors, more nursing students are moving into fields within their College while some other are pursuing minors in Nutrition.

Number and Percentage of Honors Graduates

a. Number and Percentage of Graduates Enrolled in full-time higher-level education within one year of graduation

- Two graduate students from the Food Microbiology lab were accepted into PhD Food Science Program with full the scholarship.
- One nutrition graduate was accepted into the Master of Science in Nutrition and Wellness program at Benedictine University and another at Eastern Illinois University.

b. Number and Percentage of Graduates employed in the major field within one year of graduation

i. 70% of graduates in food and nutritional sciences are working in their field

ii. 75% of graduates in textiles & apparel studies are working in their field, while about 5% are pursuing graduate studies
ii. 90% of graduates in the food and Biotechnology program are working in their field, while 10% are pursuing graduate school.

c. Number and Percentage of Graduates in Delaware 5 years after graduation

About 5% of graduates are working in Delaware.

d. Employer satisfaction

In the process of collecting and analyzing data

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

VIII. UNIT GOALS, OBJECTIVES, AND MEASURES FOR 2017-2018

List Unit's Short Range Goals for the coming academic year, 2017-2018. This section will become section IV and/or V for next year's report.

Five-Year Goals for the Department

Short Term Goals (1-2 yrs)

- Improve recruitment efforts
  - Effectively use student groups and clubs as an important recruitment tool
  - Establish faculty-high school teacher relationship within the state
  - Expose our programs to other departments to attract undecided majors to Human Ecology programs
  - Continue to initiate, develop and establish articulation agreement with community colleges

- Attract external funds to the department
  - Promote grantmanship among faculty members
  - Promote inter-departmental collaboration on projects with common interest
  - Promote faculty and staff development

- Increase retention and graduation rate
  - Offer financial assistance to needy students
  - Establish collaboration with industries/companies, state & federal agencies to create opportunities for internship & employment for our students
IX. LONG RANGE GOALS

Long Term Goals (5-10 yrs)

- Develop a Nutrition Assessment/Simulation Lab
- Develop and implement a multidisciplinary Certificate/graduate program in Diabetes-Renal Disease Education and management
- Develop research facility for conducting basic research in nutrigenomics and phytochemistry
- Upgrade teaching equipment
- Increase pool of Faculty and support staff

IV. UNIT GOALS AND OBJECTIVES
learning in all programs reach their career goals attended by faculty and staff; funds available for professional development; Annual faculty/staff evaluations; student course evaluations. Number of students involve in scholarly work and creative activities. Number of honored students.

Objective 1.2: Number of students enrolled in 20017-2018 year; % change from previous years, and graduation rate

Objective 1.3: Process in place to limited for these opportunities; where possible, grant funds have been used; faculty and staff evaluations and student course evaluation have revealed strengths and weaknesses in teaching

Objective 1.2: Student enrollment increased from 45 in Spring-2016 to 55 in Spring 2018 resulting to a 17.8 % increase in enrollment.

Objective 1.3: Coordinated Program in Dietetics achieved accreditation in Fall 2016 by ACEND

Objective 1.2: Continue to grow the programs with enhanced recruiting; ensure CARS recruiter understands special needs of the Human Ecology Department

Objective 1.3: Maintain accreditation by fulfilling on-going reports as requested by ACEND; stay abreast of changes in accreditation standards; explore accreditation/certification of TAS program

Objective 1.4: Continue to seek approval for these two programs; explore articulation agreement with community colleges: Dietetics Technician Registered.
maintain and seek accreditation(s) and certificates where applicable

**Objective 1.4:** Number of master and doctoral programs initiated by department

**Goal #2:**

**Objective 2.1:** To increase faculty participation and provide research opportunities for students to participate

... To maintain, support and encourage a dynamic research program that will foster and increase faculty and student participation ...

**Objective 2.2:** To increase grant applications and research contracts.

**Objective 2.4:** To

...
enhance interdisciplinary research and encourage collaborative research.

**Objective 2.5:** To provide increased professional development and academic enrichment support for faculty of grant applications submitted; number that were awarded to faculty and staff in department

**Objective 2.4:** Number of faculty and staff participating in collaborative projects; number of opportunities for faculty and staff to interact with faculty at other institutions

**Objective 2.5:** Faculty and staff have attended one or more professional development opportunities in 2017-2018; funds are limited for these opportunities; where possible, grant funds have been used

**Objective 2.5:** Faculty and staff have developed inter-institutional and international collaboration.

**Objective 2.5:** More funds necessary for professional development; a full-time research appointment in TAS and one in Nutrition would greatly enhance visibility and collaborative opportunities for Department

**Objective 2.5:** Number of professional development seminars & workshops attended by faculty and staff; funds
Goal #3:

Objective 3.3: To improve and strengthen outreach efforts to underserved populations in the state

Objective 3.3: Number of academic projects that have a research and/or outreach component to them; number of opportunities to provide research-based information both to the students and to the people of Delaware

Objective 3.3: Human Ecology facilities are being used by DSU and other outreach programs to provide instruction to underserved youth and adults; Human Ecology students are gaining experience in the community by providing research-based information to underserved youth and adults

Objective 3.3: More funds are necessary to provide more students with the necessary skills and materials to reach out to the people of Delaware

V. STUDENT LEARNING GOALS AND OBJECTIVES (all Academic Departments, Programs when applicable).

<table>

<tr>
<td>Goal</td>
<td>a. Competent</td>
<td>a. Students</td>
<td>a. More opportunity to</td>
</tr>
</tbody>
</table>
#1: Ensure high quality student instruction and services

**Objective 1.1:**
Provide students with knowledge and skills needed for entry level jobs

- b. effective communicators
- c. ethical, collaborative and productive citizens
- d. independent learners

**Objective 1.2:**
Promote the development of strong communication and interpersonal skills

**Objective 1.6:**
Provide relevant field experience parallel to classroom work to enhance professional development

Opportunities to express opinions on a variety of topics.

Socratic method of teaching requires students to answer questions frequently.

Presentation of a case study, including use of Power Point. Scores on faculty-developed rubrics for final oral presentation and final report in a capstone course.

b. Some students ask more questions than others; most improve on case studies over time.

c. Case study work encourages critical thinking.

d. Course material introduced by way of using a case study rather than just assigning one at the end of the chapter discussion; Include more active learning by having the students take more responsibility for the material they have to know.

b. Students encouraged to ask questions; must complete case studies in which they have to develop nutrition care plans for each individual and display varying ability; some never answer questions unless directly asked; varying levels of facility with Power Point presentations in class.

b. Encourage more class participation; more opportunities to analyze pertinent research papers outside of class.

c. More relevant guest speakers to enhance subject matter knowledge.

b. Use Power Point presentations in most courses.

b. Encourage more opportunities to analyze pertinent research papers outside of class.
defend their choices; also have to analyze at least one research paper and answer questions about the paper

c. case studies often involve people of different cultures or religions; students are encouraged to express sensitivity in dealing with differences;

d. work on case studies helps students integrate knowledge from text into practical learning; work is typed on computer; some submit via email; many aspects of course are
on Blackboard
and some
require
searching the
web; use of
Power Point
required for
presentation of
case studies.

Bibliography of Scholarly Products published in 2017-2018 by unit members.
Colleges should just list the number of publication listed by the departments.
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1:ITLG 1 - Fundamental understanding of information services as IT professionals
Graduates will have a fundamental understanding of the foundational underpinnings of information services as Information Technology professionals.

SLO 1: Apply knowledge of computing and mathematics
An ability to apply knowledge of computing and mathematics appropriate to the discipline.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Attainment levels on program level outcomes
Attainment levels on program level outcomes.
Source of Evidence: Academic direct measure of learning - other

Connected Documents
- 2018 Course Assessment Matrix
- 2018 Course Assessments

Target:
All assessed courses shall achieve an attainment level of 3 or better in this program level outcome.

Findings (2017-2018) - Target: Met
100 percent (11 out of 11) of the courses achieved an attainment level of 3 or better for this program level outcome.

Findings (2016-2017) - Target: Met
100 percent of the courses achieved an attainment level of 3 or better for this program level outcome.
SLO 2: Analyze a problem, and identify and define the computing requirements

An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution.

Relevant Associations:

DSU Learning Goal Associations:
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Target:**

All assessed courses shall achieve an attainment level of 3 or better in this program level outcome.
Findings (2017-2018) - Target: Partially Met
67 percent (2 out of 3) of the courses achieved an attainment level of 3 or better for this program level outcome.

Findings (2016-2017) - Target: Met
100 percent of the courses achieved an attainment level of 3 or better for this program level outcome.

M 2: Workshops and seminar attendance.
Workshops and seminar attendance.

Target:
Average attendance at workshops and seminars should be 50 percent or better for the academic year.

Findings (2017-2018) - Target: Partially Met
Average attendance at all events organized by the Department is 45%.

Findings (2016-2017) - Target: Not Reported This Cycle
This measure was not assessed due to loss of departmental administrative and faculty capacity.

SLO 9: Use current techniques, skills, and tools necessary for computing practice
An ability to use current techniques, skills, and tools necessary for computing practice.

 Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

100 percent of the courses achieved an attainment level of 3 or better for this program level outcome.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Include projects on privacy, security, and intellectual property
Request faculty include projects on privacy, security, and intellectual property in future course work.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Responsible Person/Group: Faculty

Include privacy, intellectual property, and social computing issues in courses
Require faculty to include privacy, intellectual property, and social computing issues in courses where relevant.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Responsible Person/Group: Faculty

Address requirements, design, and implementation of moderately complex problems
Address requirements, design, and implementation of moderately complex problems earlier in the curriculum. Students, currently, must work on small programming projects starting from design to implementation; however, a more systematic way of progressively working toward more complex problems is needed. This could be accomplished through laboratory work and both midterm and final projects in the first four computing courses sequence.
Established in Cycle: 2010-2011  
Implementation Status: Finished  
Priority: High  
Implementation Description: Faculty teaching the first four computing courses sequence will need to coordinate to design progressively more complex problems.  
Responsible Person/Group: faculty

**Expose students to different environments**  
Faculty will need to expose students to various programming and technical environments with minimum input from instructor and tutor. Students must learn to learn on their own and develop a self-confidence in their ability to complete tasks.

Established in Cycle: 2010-2011  
Implementation Status: Finished  
Priority: High  
Implementation Description: course specific and described in course assessment forms.  
Responsible Person/Group: faculty member

**Extracredit applied to any CS/IT course for which the student is enrolled**  
Extracredit can be applied to any CS/IT course for which the student is enrolled if they attend a workshop to the satisfaction of workshop organizer or presenter.

Established in Cycle: 2010-2011  
Implementation Status: Planned  
Priority: High  
Implementation Description: Student attends workshop and participates. Presenter provides documented evidence that the student completed workshop with satisfaction. Student submits evidence along with form to main office.  
Projected Completion Date: 12/08/2011  
Responsible Person/Group: student, workshop presenter, chair  
Additional Resources Requested: None.

**Implement Recommendation**

Since only one course did not attain a level of 3 or greater, it is recommended that the faculty member in that course implement the suggested improvement plan presented in the course assessment form.

Established in Cycle: 2010-2011  
Implementation Status: Finished  
Priority: High
Increase projects in courses that failed to achieve attainment level
The courses that did not achieve attainment levels were primarily theoretical courses. These courses did not seem to engage students in projects that help build a culture of continuous professional development.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High
Implementation Description: recommendation presented in course assessment form.
Responsible Person/Group: faculty member

Provide students with more practice in writing, reading journal articles in the field, and presenting technical work.
Provide students with more practice in writing, reading journal articles in the field, and presenting technical work.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: Faculty will work on a plan to provide across-the-curriculum technical communication projects with detailed feedback.
Responsible Person/Group: Faculty
Mission / Purpose

Mission

The mission of the office of Institutional Research is to provide relevant institutional reporting and analysis of all aspects of the University to support decision-making, planning, assessment, and review of institutional performance. (Adopted 2009)

Institutional Research serves as the official reporting entity for the University to both internal and external audiences. The office is responsible for preparing official university statistics and completing mandated reporting to government agencies and accrediting bodies. The Institutional Research team provides reporting services to the University community such as analyzing trends, conducting peer comparisons, providing data for program review, compiling data for grant proposals, and completing ad hoc data requests.

Institutional Research maintains data repositories to support reporting and information needs of the University. IR also provides consultation in identifying ways to capture data within the University information system (Banner) to meet information needs. The office authors annual publications such as the DSU Fact Book and Annual Retention Study

Goals without Outcome/Objective Relationships Specified

G 4: Provide evaluation and analysis services for University programs.
Use the University information system and databases to provide evaluation and analysis services for programs in the form of studies and reports. Examine the impact of programs on various student and institutional outcomes.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Provide data and information to internal constituents.
Generate and disseminate data and information in a usable format while providing appropriate research and analytical support to assist university policymakers in the institution's quest for continuous quality improvement.
O/O 1: Provide Data support
Provide data for departments and programs conducting periodic program reviews in 2009-2010

Related Measures:

M 2: Provide data support
Provided university data for constituents
Provided data for departments and programs that conducted periodic program reviews in 2009-2010

Source of Evidence: Administrative measure - other

Target:
Provide data for departments and programs for recurring and ad-hoc information needs
Provide data for departments and programs scheduled to conduct periodic program reviews in 2009-2010

Findings (2010-2011) - Target: Met
IR accomplished the following:

- Published the University Fact Book (online)
- Published New Student Retention/Graduation Rates Tables;
- Provided data for five departments and programs that conducted program reviews in 2010-2011 (Airway Science; College of Business; Education; Physics and Pre-Engineering; and Psychology.
- Completed planning design for a data warehouse to supply data for analytical reporting needs

Findings (2009-2010) - Target: Met
IR accomplished the following:

- Published the University Fact Book (online)
- Published the New Student Persistence Update and Retention/Graduation Rates Tables\ 
- Provided data for six departments and programs that conducted program reviews in 2009-2010 (Academic Services for Student Athletes; Adult and Continuing Education; Art; Chemistry; Law Studies; and Sociology and Criminal Justice).
- Developed a Guide to Program Review Data to assist individuals in understanding the internal data provided for program review. The guide is published on the IR web
page and also includes sample reports. IR also gave an overview of program review data at a workshop coordinated by the DSU Assessment Office.

- Developed an online Data Request Form for internal requests for information.

**IR Web Page**

**G 2: Provide data and information to external constituents.**
Coordinate and complete appropriate reports and surveys requested by state and federal agencies, accrediting counsels, and external marketing sources.

**O/O 2: Provided External Reporting and Data Support**
Provide consistent data and information to external constituents.

**Related Measures:**

**M 1: Provide external reporting support**
Provide reporting and analysis for external requests and mandates

Source of Evidence: Administrative measure - other

**Target:**
Provide consistent and timely information to external constituents.

- **Findings (2010-2011) - Target: Met**
Satisfied reporting mandates to IPEDS, MSCHE, NCAA, NCATE and adhered to deadlines.

**G 3: Provide comprehensive data support for enrollment management efforts**
Provide comprehensive data support (research, analysis, and reporting) to the Enrollment Management Council to support efforts to increase enrollment and retention.

**O/O 3: Support of Enrollment Management**
Conduct research, analysis, and reporting in support of enrollment management efforts to increase enrollment and retention.

**Related Measures:**

**M 3: Enrollment Management Support**
Provided comprehensive support of enrollment management efforts

Source of Evidence: Administrative measure - other

**Target:**
Provide comprehensive research, analysis, and reporting to support enrollment management efforts

**Findings (2010-2011) - Target: Met**
The Institutional Research and Team (IR&A) team:
• Served as project manager for and coordinated data transmissions to feed proprietary data analysis tools to support enrollment management, scholarship leveraging, and predictive modeling
• Provided regular reporting and analysis to the Enrollment Management Council
• Conducted research of declined or denied applicants using the Student Tracker Service of the National Student Clearinghouse
• Monitored and updated automated scholarship offer system in the Banner information system
• Developed a reporting grid with weekly point in time comparisons for merit scholarship offers
• Collaborated with Institutional Advancement to secure funding for a major scholarship program to enhance retention and graduation rates
• Developed enrollment projections, awarding scenarios, and reporting metrics for the Inspire scholarship program

**Findings (2009-2010) - Target: Met**

The Institutional Research (IR) team:

• Led the development of extensive data sets to implement a proprietary data analysis tool to support enrollment management and scholarship leveraging.
• Provided regular reporting and analysis to the Enrollment Management Council membership.
• Conducted research of declined or denied applicants using the Student Tracker Service of the National Student Clearinghouse to inform the enrollment team.
• Collaborated with enrollment efforts to automate and load scholarship leveraging data in the Banner information system.

**Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**O/O 4: Conduct studies**
Conduct studies as needed to examine issues at the University in support of policy review and decision support.

**O/O 5: Predictive modeling**
Provide data and maintain a proprietary predictive modeling service to support enrollment management efforts.

**O/O 6: Develop online survey capacity**
Implement an online survey system to collect data from stakeholders.

**O/O 7: Satisfy external reporting mandates**
Satisfy all external reporting mandates.

**O/O 8: Complete high stakes reporting**
Complete all high stakes reporting requirements that are beneficial to the institution. Respond to external surveys from governmental, educational, and ranking organizations.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Increase automation for program review data**
Increase automation of the data provided to departments to conduct program review. This will allow the IR&A office to be more efficient, and allow the team to focus on other analytical requests.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Projected Completion Date:** 06/28/2012  
**Responsible Person/Group:** IR&A Team  
**Additional Resources Requested:** Dedicated workhours from IR&A team to accomplish tasks.
Mission / Purpose

The mission of Integrated Academic Support Services (Supplemental Instruction, Tutorial Center, Quantitative Reasoning Center, Writing Studio) is to provide students with a holistic approach to tutorial and SI sessions rather than a "quick fix - just give me the answer" session. Our tutors and Supplemental Instruction (SI) Leaders assist students with the development of their writing, quantitative reasoning, and content-based learning as well as empower students with confidence to become independent and active learners. Our tutors and Supplemental Instruction (SI) Leaders attend training and professional development workshops giving them tools to facilitate one-on-one or small groups utilizing multiple learning strategies and to apply study and note-taking skills in sessions.

Goals without Outcome/Objective Relationships Specified

G 1:IASS Program Strategic Goal #1
To implement social media to market Integrated Academic Support Services to improve utilization of services

G 2:IASS Program Strategic Goal #2
Provide all tutors and Supplemental Instruction leaders with on-going professional development workshops on tutoring best practices.

G 3:IASS Student Learning Goal #1
Students will articulate their understanding of tutor's feedback on written work.

G 4:IASS Student Learning Goal #2
Students will identify the next steps in their content mastery.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 3:IASS Student Learning Outcome #1
90% of students' responses on evaluation will agree that they understand the tutor's feedback on written work.

**Related Measures:**

**M 3:IASS Student Learning Measure #1**

Every student will complete an evaluation form after each session. Results will be analyzed at the end of each semester by reviewing responses to direct assessment questions.

Source of Evidence: Service Quality

**Target:**
90% of students' responses on evaluation will agree that they understand the tutor's feedback on written work.

**Findings (2017-2018) - Target: Met**
The target (97%) was met as a result of students' responses on the evaluations completed at the end of each session for the QRC, Tutorial Center, and Writing Studio. Students in SI completed evaluation at end of semester.

**SLO 4:IASS Student Learning Outcome #2**

80% of tutors' and SI leaders' responses on evaluation form will register a 4 or 5 on a Likert Scale.

**Related Measures:**

**M 4:IASS Student Learning Measure #2**

Every tutor and SI leader will complete an evaluation form after each session. Results will be analyzed at the end of each semester by reviewing responses to direct assessment questions.

Source of Evidence: Service Quality

**Target:**
80% of tutors' and SI leaders' responses on evaluation form will register a 4 or 5 on a Likert Scale.

**Findings (2017-2018) - Target: Met**
The target (92%) was met. Students responded strongly agree or agree to the direct assessment question of being prepared to apply what was learned in the tutorial session.

**Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**O/O 1:IASS Strategic Program Outcome #1**

1) Number of contacts to SI and tutorial sessions to increase by 2% by the end of 2017-2018 academic year.
Related Measures:

M 1:IASS Program Measures #1
Total number of contacts to SI and Tutorial sessions will be tallied at end of each semester by collection of attendance sheets and AppointmentPlus data.

Source of Evidence: Service Quality

Target:
1) Number of contacts to SI and tutorial sessions to increase by 2% by the end of 2017-2018 academic year.

Findings (2017-2018 ) - Target: Met
1) There was a 23.4% increase in total contacts for the QRC, Writing Studio, and Tutorial Center combined compared to 2016 - 2017 academic year.

O/O 2:IASS Strategic Program Outcome #2
2) 70% of tutors working the full 2017-2018 academic year will qualify for Level I certified from a national organization, CRLA.

Related Measures:

M 2:IASS Program Measure #2
A number of professional development workshops will be held during each semester for which attendance will be tallied using sign-in sheet. Workshop evaluations will be administered using an on-line survey.

Source of Evidence: Service Quality

Target:
70% of tutors working the full 2017-2018 academic year will qualify for Level I certified from a national organization, CRLA.

Findings (2017-2018 ) - Target: Partially Met
The status is on-going as it is dependent upon the CRLA certification process.

Note: IASS staff are members of the College Reading & Learning Association (CRLA) and attend conferences.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.
IASS Strategic Program #2 Action Plan
Established in Cycle: 2017-2018

Continue the progress of the application for CRLA certification.

Have IASS professional staff join professional organizations...

Details of Action Plans for This Cycle (by Established cycle, then alpha)

IASS Strategic Program #2 Action Plan

Continue the progress of the application for CRLA certification.

Have IASS professional staff join professional organizations and attend conferences.

Invite faculty members to facilitate a professional development workshop for tutors and SI.

Established in Cycle: 2017-2018
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: IASS Program Measure #2 | Outcome/Objective: IASS Strategic Program Outcome #2

Projected Completion Date: 05/24/2019
Responsible Person/Group: Anna Cortese
Additional Resources Requested: Continued funds to attend professional development

Annual Report Section Responses

Executive Summary (1-2 pages)

Executive Summary

Integrated Academic Support Services (IASS) is comprised of the Quantitative Reasoning Center (QRC), Supplemental Instruction (SI), Tutorial Center, and Writing Studio. The Quantitative Reasoning Center (QRC) and the Writing Studio assist students with math courses and in writing, respectively. SI targets historically difficult courses; courses with a high rate of D, F, W grades. The Tutorial Center provides tutoring for all other courses. Anna Cortese is the IASS Director and directly oversees the QRC, SI, and TC. Shanita Leanier is the Writing Studio Assistant Director.

The mission of Integrated Academic Support Services is to provide students with a holistic approach to tutorial and SI sessions rather than a "quick fix - just give me the answer" session. Our tutors and Supplemental Instruction (SI) Leaders assist students with the development of their writing, quantitative reasoning, and content-based
learning as well as empower students with confidence to become independent and active learners. Our tutors and Supplemental Instruction (SI) Leaders attend training and professional development workshops giving them tools to facilitate one-on-one or small groups utilizing multiple learning strategies and to apply study and note-taking skills in sessions.

All students, not only those that are struggling in the course, are encouraged to attend sessions so as to foster a learning environment for which students can discuss the course content with more confidence. The services provided by IASS at DSU are free to all students and facilitated by peer tutors. The QRC, Writing Studio, and Tutorial Centers are open during the academic year on Monday - Thursday at 9:00 am - 8:00 pm and on Friday at 9:00 am - 5:00 pm. As of summer 2017, the QRC and Writing Studio are open for students enrolled in Summer Sessions I and II. SI leaders are assigned to courses during the academic year with SI sessions determined by the SI leaders and students. During the summer, SI leaders are assigned to courses (math, English, history) for students who are enrolled in the 5-week Summer Bridge program. In order to provide academic support to all students, IASS collaborated with the HHMI grant to market Tutor.com, an online tutorial service offering tutorial sessions in math and science courses, and writing across the curriculum. Information about Tutor.com was included in emails IASS sent to students when announcing the academic support services provided on campus. The Tutor.com information was also sent to the Online Student Services Coordinator to share with students enrolled in DSU's online program.

IASS, including academic programs, had a total of 6015 contacts. Of those contacts, approximately 26% of the unique contacts utilized two or more of our academic support services. The Quantitative Reasoning Center had a total of 1082 contacts. The Writing Studio had a total of 1988 contacts. The Tutorial Center had a total of 653 contacts. Supplemental Instruction had a total of 2172 contacts. IASS sponsored seminars and workshops had 120 total contacts.

Quantitative Reasoning Center (QRC)

The Quantitative Reasoning Center (QRC) staffed 6 tutors; 5 whose majors are predominately in STEM and one who is a Mass Communications major. The tutors are qualified to assist students in math courses from developmental math to Calculus I. There are occasions when QRC tutors help students with higher-level math because they have taken the course.

The QRC had a total of 1082 contacts in the 2017 - 2018 academic year; a 19.8% increase from the previous academic year. Of the total contacts, 10% utilized the QRC for tutorials in both fall and spring semesters. The largest number of contacts, that is 57%, came to the QRC for College Algebra.

Supplemental Instruction (SI)

Supplemental Instruction (SI) is a peer-facilitated academic assistance program that was originally developed by Dr. Deanna Martin in 1973 at the University of Missouri-Kansas City, with the overall goal of identifying and supporting the most challenging courses for students.

SI is a non-remedial approach to learning since the program targets high-risk courses rather than high-risk students. The SI leader's role is to attend class sessions and to organize at least two study group sessions per week outside of class. During class
sessions, SI leaders exemplify a model student - arrive on time, take notes, and complete assigned materials. In study group sessions, SI Leaders facilitate the students in collaborative learning activities to review difficult concepts from class, to develop study strategies, and to foster working with peers in a study-group environment.

Ten courses for fall 2017 and seven courses for spring 2018 were assigned SI leaders. Each course had one or more sections for which one SI leader provided the SI sessions; except Anatomy & Physiology which had an SI leader for each section. Twenty-one SI leaders were assigned to forty sections; five SI leaders worked for both fall and spring semesters.

Research states that the final course grades for students who attend SI are significantly higher than those who do not attend SI sessions. (Stone & Jacobs, 2008) The results of the comparison of the rate of A, B, C grades to the rate of D, F, W grades for SI-supported sections show that students who attended SI sessions earned a higher rate of A, B, C grades than their peers who did not attend SI sessions for seven out of the ten courses in fall 2017 and six out of seven courses in spring 2017. In fall 2017, one course had 100% of the students who attended SI (Macroeconomics) earn A, B, C grades and in spring 2017, two courses had 100% of the students who attended SI (Critical Thinking, Political Science) earn A, B, C grades.

**Tutorial Center**

Several factors determined the decision to provide tutors for certain courses. At the beginning of each semester, chairpersons are contacted to be participants in the decision; they along with their faculty would be in a better position to know the courses for which students would need a tutor and to recommend qualified tutors. For both semesters, very little communication from chairpersons regarding their students' needs were shared so as to provide the academic support. To ensure the Tutorial Center did have academic support to help our students, tutors were hired based on what information from previous semesters and on requests made by students coming to seek tutorial help. When possible, tutors were hired so that they were able to tutor more than one specific course. This was twofold; it was cost-efficient and tutors would be able to contribute more to the tutorial session if they know the foundations needed to succeed in the course being tutored.

The Tutorial Center had a total of 653 contacts in the 2017 - 2018 academic year; a 182% increase from the previous academic year. Of the total 242 unique contacts, 8% utilized the Tutorial Center for tutorials in both fall and spring semesters. The subjects for which a tutor was available and utilized were the sciences (Biology, Chemistry, Physics), psychology (100 - 400 level), business (Micro/Macroeconomics, Business Law, Microcomputer Applications, Accounting), languages (French, Spanish), history (100-200 level), and music theory. In addition, a study-skills tutor was hired in spring 2018 to help students develop and implement note-taking skills, study and test-taking skills, and time management.

**Writing Studio**

The mission of the University College Writing Studio (UCWS) is to help students strengthen their skills in writing for any course across the curriculum through the provision of individual and small group writing consultations. UCWS provides academic support in Writing to Delaware State University's (DSU) undergraduate and graduate populations. Current DSU students can receive free walk-in writing consultations or they can schedule an appointment to receive assistance. In addition to tutorials, the UCWS conducts Writing workshops and classroom visits at the request of instructors.
The UCWS recruits, hires, and trains faculty vetted undergraduate peer educators, also known as Writing Consultants, to provide tutelage and mentorship during Writing consultations. The UCWS staffed fourteen writing consultants during the 2017-2018 academic year. Three of the writing consultants are Language Ambassadors who work collaboratively with the ELL program of the Department of English and Languages. Writing Consultants are of varying majors and minors which makes it possible to offer support in writing across the curriculum.

During the 2017-2018 academic year, UCWS conducted 1988 writing tutorials. Of that, 1782 students were unique contacts. One hundred ninety-three students received between two and four writing consultations; thirteen students received at least five writing consultations. An additional 420 student contacts were made in the facility for the sole use of its computer lab. UCWS sponsored writing workshops that featured 66 students in attendance, and it conducted five classroom visits at the written requests of faculty.

**Academic Programming**

The QRC, Tutorial Center, and Writing Studio offered Socratic Seminars and workshops covering a wide range of topics and offered to all DSU students in the 2017-2018 academic year. The seminars and workshops were facilitated by faculty (Mathematical Sciences, Chemistry, English & Foreign Languages, and Public & Allied Health), professional staff, and peer educators. The workshops and seminars had a total of 120 contacts of which 13% of them attended more than one seminar or workshop.

**Unit(s) Profile**

**Professional Staff:**

- Anna Cortese, Integrated Academic Support Services Director

- Shanita Leanier-Powell, Writing Studio Assistant Director.

**Paraprofessional Staff:**

- 21 Supplemental Instruction leaders

- 6 Quantitative Reasoning Center tutors

- 11 Tutorial Center tutors
**Unit(s) Initiatives accomplished in this cycle**

**Closing the Assessment Loop**

For the 2017 - 2018 academic year, Integrated Academic Support Services sought to implement and carry out the Program Strategic Outcome and Student Learning Outcome to support Goal 2: Student Success - recruit, develop, retain, graduate and place outstanding students. The two objectives for Program Strategic Outcomes were 1) to implement social media to market Integrated Academic Support Services to improve utilization of services and 2) to provide all tutors and Supplemental Instruction leaders with ongoing professional development workshops on tutoring best practices. The two objectives for Student Learning Outcomes were 1) students will articulate their understanding of tutor’s feedback on written work and 2) Students will identify the next steps in their content mastery. The table below shares the status of our goals. The results of our assessment shows that IASS can continue to improve utilization of our Centers with ongoing outreach to students and faculty. For example, the Writing Studio surveys ask for programming recommendations and other comments. Writing workshops for the following academic year are created based upon the feedback of students and instructors. At the conclusion of each writing workshop, the evaluations are shared with Writing workshop presenters. The assistant director of the Writing Studio takes the feedback into consideration when extending invitations for workshop facilitation.

Mission / Purpose

The Integrated Studies major is an interdisciplinary liberal arts degree designed to produce well-rounded, broadly educated, globally informed students armed with all the intellectual skills such as inquiry and analysis, critical thinking, excellent writing and the ability to comprehend in multifaceted arenas. It is an interdisciplinary program of study which allows students to develop an individualized curriculum of study through a broad-based education in the liberal arts and sciences. (2010)

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1:BA in liberal arts through integrating two focus areas
provide an effective mechanism for students with the requisite number of credits to acquire a degree;

☐ capture a percentage of the 1000 or more graduates from Delaware Technical & Community (DTCC), 75 % of who enroll at competitor schools for further study.

☐ attract non-traditional students who have earned college-level credits and are looking to further their education;

☐ offer a bachelor completion program (either online and onsite) for those students who have opted out of a program of study for three or more years.

SLO 2:Relate theory to practice
Relate theory to practice.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1:engage in and apply interdisciplinary enquiry and research
☐ Identify and locate multiple modes of enquiry which take cognizance of interdisciplinary and cross disciplinary collaborations;

☐ Relate theory to practice;

☐ Exhibit capabilities in making connections between and among multiple phenomena in their milieu;
Demonstrate the ability to articulate the interconnectedness of different dimensions of the human condition.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**add new courses**
Create new courses focussing on research methods

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Create and get University approval for at least one more research oriented course
- **Projected Completion Date:** 05/01/2014
- **Responsible Person/Group:** Dr. Osei; Ms. Phyllis Collins; Dean Marshall Stevenson
- **Additional Resources Requested:** Budget/funds
Mission / Purpose

This program is designed for students interested in research careers in mathematics in the military, industry or government. It also prepares individuals to teach and/or do research at college. The Ph.D. program in Interdisciplinary Applied Mathematics and Mathematical Physics is flexible enough to accommodate students with diversified backgrounds. Each student develops a course of study in Applied Mathematics concentration or Mathematical Physics concentration whichever is most relevant to his/her professional and career objectives.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning Goals

All Mathematics (Ph.D.) majors registered in mathematical science courses will demonstrate expertise in a selected area of mathematics.

List of PhD courses offered 2013-2014:

Fall 2013:

MTSC 821
MTSC 861
MTSC 867
MTSC 871
MTSC 883
MTSC 890

Spring 2014:

MTSC 822
MTSC 854
SLO 1: Ph.D SLO-1 Expert Proof Writing
Students will become experts at creating advanced and fully detailed proofs in a specialized area.

Relevant Associations:

DSU Learning Goal Associations:
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Related Measures:

M 1: Ph.D SLO-1
Students' scores on cumulative common final project/exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. We are not looking at how each individual student is meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

Source of Evidence: Comprehensive/end-of-program subject matter exam

Connected Document
- Weave MTSC PhD program 2015-2016-1-6

Target:
A weighted score of at least 80% for each course indicates that students successfully demonstrated SLO1.
Findings (2016-2017) - Target: Met
Students successfully (85%; n=3) demonstrate that they understand the concepts of numerical analysis and are able to construct proofs in the area of complex analysis

Connected Document
• Spring 2017 - Ph.D

Findings (2015-2016) - Target: Met
Fall 2015:
We offered four phd level courses in Fall 2015 semester.
Three courses have data submitted to measure these SLOs. MTSC 852: 3 students. MTSC 861: 2 students. MTSC 883: 3 students. MTSC 853: NO DATA.

Averaged score is 88% for three phd courses and each course has more than 80% score. Based on the score, students have demonstrated that they are able to create advanced and detailed proofs in their phd level mathematics courses.

Spring 2016:
We offered four phd level courses in Spring 2016 semester. Three courses have data submitted to measure these SLOs. MTSC 863: 2 students. MTSC 885: 1 student. MTSC 887: 1 student. MTSC 845: NO DATA.

Averaged score is 91% for three phd courses and each course has more than 88% score. Based on the score, students have demonstrated that they are able to create advanced and detailed proofs in their phd level mathematics courses.

Connected Document
• 2015-2016 Ph.D SLO Chart

Findings (2013-2014) - Target: Met
Based on the data we received so far, all courses met the goal of at least 70%.

- Spring 2014-MTSC 890- SLO
- Fall 2013 MTSC 821 CLO
- Fall 2013 MTSC 871 CLO
Findings (2012-2013) - Target: Met

All courses/classes met the goal of at least 80%.
MTSC 822: 100%
MTSC 845: 88%
MTSC 853: 100%
MTSC 885: 100%
MTSC 889: 90%

Findings (2011-2012) - Target: Not Met

MTSC 821 continued to be a challenge to the students. The other three courses/classes met or exceeded the goal. This means that in these classes, students were able to develop a research plan and incorporate into their research. At least 80% success rate was achieved.

Connected Document

SLO 3:Ph.D SLO-3 Professional Presentations

Students will be able to present a mathematics paper to mathematically informed audience (i.e., professional mathematician).

Relevant Associations:

DSU Learning Goal Associations:
6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.

Related Measures:

Weave MTSC PhD program 2015-2016-1-6

Target:
Students should demonstrate ability to confidently present mathematical articles/papers to mathematically informed audience.

Findings (2016-2017) - Target: Met

Two graduate students successfully defended their PhD dissertations
this semester. Both demonstrated their ability to give talks to a professional audience.

**Connected Document**
- Spring 2017 - Ph.D

**Findings (2015-2016) - Target: Met**

**Fall 2015:**
We offered four Ph.D level courses in Fall 2015 semester. Two courses have data submitted to measure these SLOs. MTSC 861: 2 students. MTSC 883: 3 students. MTSC 852: SLOs not measured in this course. MTSC 853: NO DATA.

Averaged score is 86% for two Ph.D courses and each course has more than 80% score. Based on the score, students have demonstrated that they are able to present mathematics to audience.

**Spring 2016:**
We offered four Ph.D level courses in Spring 2016 semester. No course has data submitted to measure these SLOs.

**Connected Document**
- 2015-2016 Ph.D SLO Chart

**Findings (2013-2014) - Target: Met**

Based on the data we received so far, all courses met the goal of at least 70%.

Mission / Purpose

As the central office responsible for coordinating Delaware State University's international activities, the Office of International Affairs has the mission of integrating a global perspective into the University's teaching, research, and service programs. It encourages and supports the infusion of an international framework into the curriculum and works to find and create opportunities for students' exposure to international experience. It works to facilitate research on globally significant issues by University faculty and to bring researchers from other nations to the campus. The Office recruits international students through joint programs by working with foreign institutions. The Office also helps to bring the benefits of this international perspective to the community, the state, and the nation, thus helping, in the words of the University's vision statement "prepares our graduates to become the first choice of employers in a global market and invigorates the economy and the culture of Delaware and the Mid-Atlantic Region".

Goals without Outcome/Objective Relationships Specified

G 1: Internationalization

Goal #1: Make internationalization a part of OIA's vision, mission, and strategic plan

Objective 1.1: Integrate international perspective into all curricular and co-curricular programs

Objective 1.2: Maximize partnerships (MOU's, etc.) with institutions in other nations

G 2: Faculty and student Involvement
Goal #2: Promote direct involvement in international activities by both faculty and students

Objective 2.1: Promote, encourage and value internationally engaged faculty and staff

Objective 2.2: Design, fund and implement study abroad programs for students

G 3: Collaborations in Teaching and Research

Goal #3: Engage in mutually beneficial research of global significance

Objective 3.1: Integrate international perspectives into appropriate teaching and research programs

Objective 3.2: Seek collaborative projects with partnering institutions

G 4: International Experience

Goal #4: Promote career-enhancing, international experiences.

Objective 4.1: Provide discipline-specific international experiences

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 1: Globalization

1. Internationalization (Draft / In Progress)  See text from all cycles
2. Faculty and student Involvement (Draft / In Progress)  See text from all cycles
4: International Experience (Draft / In Progress)

**Related Measures:**

**M 1: More foreign students**
We will have about 100 foreign students come to Delaware state University.

Source of Evidence: Client satisfaction survey (student, faculty)

**O/O 2: Faculty and student Involvement**
Chinese Students performance.

**O/O 3: Collaborations in Teaching and Research**
We got 3 million for 5 years grants.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Fall 2011**
We will have about 100 foreign students enroll in Delaware State University.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High

**Fall 2011 (More Foreign Students)**
Recruit more foreign students (100)

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Increase the number of foreign students**
We have brought more than foreign 50 students.

- **Established in Cycle:** 2010-2011
Implementation Status: Planned
Priority: High

Let the World know Delaware State University
We want the world know Delaware State University.

Established in Cycle: 2010-2011

Priority: High
Implementation Description: Bring More Foreign Students to Delaware State University

Research and Brought more students to DSU
We got grants and brought more than 50 foreign students.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Annual Report Section Responses

Executive Summary (1-2 pages)

Unit(s) Initiatives for 2017-2018

The joint undergraduate accounting program with Ningbo University of Technology (started in fall 2011), and the physics program with Changchun University of Science and Technology in China attracted a total of 200 students in 2017 via the annual Chinese college entry examination in the past six years. During 2017-2018, there were a total of 760 students in the DSU programs in China. The Disney program attracted 63 students from Korea and France. We assisted and organized 88 DSU students to study abroad in 2017-2018. We organized on campus several international culture programs including the annual Chinese New Year Program and the annual International Education Week.

DSU signed 5 new agreements with universities from Africa and China. OIA worked with faculty members on planning and organizing 19 students to study in Poland and China with the financial support from a NSF grant and a Grant from State of Delaware. DSU attracted 85 international students to attend DSU US Culture Enrichment Program. We are preparing to start a 2+2 program with a university in China with which we expect to recruit more than 150 degree searching students each year. In Fall 2018, 25 students from the Changchun University of Science and Technology and Delaware State University Physics program will come to DSU for their 4th year as planned.
English Language Institute started in the fall semester of 2017.

Unit(s) Initiatives accomplished in this cycle

DSU on Campus International Culture Programs:

We have held/participated in the following programs and activities for Fall 2017/Spring 2018:

International Student Orientation - Each international student enrolled at DSU attends an international students’ orientation in August, January, and sometimes May. This orientation helps students adjust to a new academic system, a new culture, and a new community. During the orientation, international students are provided with information relating directly to their DSU experiences however; in addition to this, they are provided with information regarding their adaptation to the United States and the situations they will encounter as a non-immigrant in a foreign country.

- Chinese New Year Celebration - The Chinese Student Association displayed performances, traditional dances and a variety cultural events, it was the perfect opportunity to experience Chinese culture at its best! This year, we involved CR School district and a few private elementary schools in the Chinese New Year celebration activities. CR School District also sent students to perform at the Chinese New Year Gala. The activities attracted more than 1000 audiences from DSU and the local community.

- Educational Excursions - Each semester we take the international students to Rehoboth Beach/Shopping Outlets, Fifer Orchards, Washington, DC and New York for fun as well as cultural experiences.

- Annual International Education Week - is a joint initiative of the U.S. Department of State and the U.S. Department of Education, and is part of an effort to promote programs that prepare Americans for a global environment and attract future leaders from abroad to study and exchange experiences in the United States. Some of this
year's activities included: International Students Dinner/Awards, Benefits of Studying Abroad, Tai Chi Lessons, Salsa Lessons, International Lunch at the Village Café, Chinese Exhibition, Fashion Show, Story telling at the Lab School, Get Global Event, etc.

- Welcome Days - International Students participated in their second Welcome Days, Fall 2017, they introduced themselves in their language and were well received by our DSU American students. This is an opportunity for all students to see how diversified our campus actually is!

**Joint International Programs:**

There are more than 750 students in the current three Joint Education Programs (Accounting with Ningbo University of Technology and Physics with Changchun University of Science in China.

The joint undergraduate accounting program with Ningbo University of Technology (started in fall 2011), and the joint undergraduate physics program with Changchun University of Science and Technology (started in fall 2015) attracted a total of 760 students via annual Chinese college entry examination. We are working with Changchun University of Technology to establish a 4+0 undergraduate mathematics program.

**American Culture Programs:**

Delaware State University USA Culture Enrichment Program is designed to attract international students in an effort to foster internationalization and collaboration with other institutions of higher education around the world. Students accepted into the program will study at Delaware State University (DSU) for one or two semesters which will allow them to enhance their English skills, and enrich their cultural and social experiences through cross-cultural programs and activities. The program operates under the office of the Provost and Vice President for Academic Affairs. With the approval of DSU, students in the program will select from a variety of courses including: English as a Second Language courses, general education courses, and courses in their major. All of these courses are contingent upon students taking the proper prerequisites. After completion of the courses, the credit hours earned will be transferred to the students' home institutions.

Delaware State University USA Culture Enrichment Program is designed to achieve the following:

- Improve the written and oral English proficiency of the participants
- Provide an array of cultural activities for students
- Provide the educational courses for students to learn about culture in the U.S.A.
- Develop leadership skills of students by combining cultural experiences and knowledge acquired in the United States with those of their home countries
- Familiarize students with DSU undergraduate and graduate programs so that they can potentially return to DSU for further studies

In Fall 2017 and Spring 2018, the program attracted 85 students from China and Korea.

**Disney Program**

Delaware State University in conjunction with Disney offers an Exchange program with its international partner institutions. The program will allow selected students from partner universities to go to Walt Disney World in Florida while enrolled in academic coursework provided by Delaware State University. The students will be participants in a semester (or a year) long exchange program that includes an academic training experience in the Disney Theme Parks and Resorts International College Program.

The Disney program managed by College of Business attracted 63 students from Korea and France in Fall 2017 and Spring 2018.

**English Language Institute (ELI)**

ELI started in Fall 2017. We expect to grow the enrollment in 2019.
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Career Paths

Prepare students to pursue selected movement and exercise science career paths.

SLO 1: Structural and Functional Anatomy (a)
The student will demonstrate knowledge of structural and functional anatomy, kinesiology and exercise physiology.

Relevant Associations:

DSU Learning Goal Associations:

**M 5:Positive Placement**

Positive placement is defined as program graduates who are employed full or part time in a related field; and/or continuing education; and/or serving in the military. Percentage of positive placement is calculated by adding the number of graduates who have obtained employment within one year of graduation and the number of graduates who have pursued continuing education. The sum will be divided by the total number of program graduates.

Source of Evidence: Job placement data, esp. for career/tech areas
Target:  
A minimum standard of 80% positive placement will be followed

**Findings (2016-2017) - Target: Not Met**  
69% of the 2015-2016 graduates were placed in a job or graduate program. Target not met; however, the outcome has improved significantly, as positive placement was 52% for the 14-15 academic year.

**Findings (2015-2016) - Target: Not Met**  
52% of the 2014-2015 graduates were placed in a job or graduate program.

**Findings (2013-2014) - Target: Not Met**  
Based on statistics from Fall 2012-Spring 2013, 48% of Movement Science graduates are currently employed full-time in a work-related field or continuing education and/or serving in the military: · 40% are employed full-time in a work-related field · 40% are continuing education · 20% are serving in the military.

**Findings (2012-2013) - Target: Partially Met**  
70% of Movement Science graduates are currently employed full-time in a work-related field or continuing education and/or serving in the military:  
· 30% are employed full-time in a work-related field  
· 20% are continuing education  
· 20% are serving in the military

*Please note: results are only based on data from the Winter 2012 commencement, therefore statistics will be lower compared to previous cycles*

**Findings (2011-2012) - Target: Met**  
80% of Movement Science graduates are currently employed full or part time in a work related field or continuing education and/or serving in the military. In further detail, 50% are employed fulltime in a work related field, 12.5% are employed parttime in a work related field, 25% are continuing education, and 12.5% are serving in the military.

**Findings (2010-2011) - Target: Met**  
100% of Movement Science graduates are currently employed full or part time in a work related field or continuing education.

52% of the 2014-2015 graduates were placed in a job or graduate program.

Findings (2013-2014) - Target: Not Met
Based on statistics from Fall 2012-Spring 2013, 48% of Movement Science graduates are currently employed full-time in a work-related field or continuing education and/or serving in the military: · 40% are employed full-time in a work-related field · 40% are continuing education · 20% are serving in the military.

Findings (2012-2013) - Target: Partially Met
70% of Movement Science graduates are currently employed full-time in a work-related field or continuing education and/or serving in the military:
   · 30% are employed full-time in a work-related field
   · 20% are continuing education
   · 20% are serving in the military

*Please note: results are only based on data from the Winter 2012 commencement, therefore statistics will be lower compared to previous cycles*

Findings (2011-2012) - Target: Met
80% of Movement Science graduates are currently employed full or part time in a work related field or continuing education and/or serving in the military. In further detail, 50% are employed fulltime in a work related field, 12.5% are employed parttime in a work related field, 25% are continuing education, and 12.5% are serving in the military.

Findings (2010-2011) - Target: Met
100% of Movement Science graduates are currently employed full or part time in a work related field or continuing education.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Senior Capstone
The program plans to continue assessing A-t-C outcomes for the 2011-2012 cycle, with a focus on the Senior capstone rubric since it covers a broad spectrum of student aptitude.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Continue Implementation of KSA Rubric
The target of achieving 80% proficient or better in all five student learning objectives were not met. The KSA Rubric was developed early in the Spring semester and implemented only for the assigned courses that the program offered in the Spring 2012. Perhaps, the results were not a true reflection of student competency in four out of five areas since Fall courses were not taken into account. Movement Science courses that cover material pertinent to each KSA was selected for evaluation. Each KSA is assessed based on course evaluations (assignments, labs, exams, etc.) that are relevant to that specific KSA competency. Students received the highest results in student learning objective 5 which is assigned to only one course, although still did not meet the minimum target. The reason for that may be that the assigned course linked to the objective (Research Experience in Movement Science), is one of the newer electives in the updated curriculum, and only had a total of 2 students this Spring. The program intends to promote greater enrollment of the course this coming Fall 2012. Moving forward with the KSA Rubric, the program plans to utilize both fall and spring semesters in order to provide more accurate results.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Data Collection
Data for this measure will be collected shortly after graduation (2012 summer term) in order to give students ample time to sit for the exam. The program will maintain contacts with students who were enrolled in the workshops and collect pass/fail results directly from ACSM and NSCA. This data will then be reported along with the next
WEAVE on-line cycle.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Planned  
**Priority:** High

---

**Increase Course Enrollment**

Research Experience in Movement Science is a unique elective course that students can enroll in each semester, fulfilling 1 to 6 credits. Credits are determined on the depth of work and time dedicated into student research. The program intends to promote enrollment for this course in order to provide students with a background in every aspect of research. This includes practical experience with laboratory equipment, protocols for data collection, data analysis, IRB procedures, professional conduct, abstracts and more. Findings met the target and resulted in a higher GPA in comparison to other measures due to a low number to students enrolled this past year. A total of 4 students enrolled - one receiving an A grade, two incompletions, and one withdrawing from the course. More students are expected to take the course in the Fall 2012 semester, allowing this measure to be more reflective of it's findings in the future.

**Established in Cycle:** 2011-2012  
**Implementation Status:** In-Progress  
**Priority:** Medium

---

**Continue Maintaining Contact**

During the 2013-2014 cycle, calculation of findings were obtained based on word-of-mouth and phone calls. Contact information was obtained from the Fall 2013 and Spring 2014 graduates this year, and contact initiation through online surveys will begin for the next cycle. Alumni website access are currently being considered.

**Established in Cycle:** 2012-2013  
**Implementation Status:** On-Hold  
**Priority:** High

---

**Relationships (Measure | Outcome/Objective):**
Incorporate Additional Assignments/Experiences
After reviewing results for all components of the Senior Capstone rubric, students are falling below the minimum percentage. The program needs to re-evaluate avenues to incorporate more classroom experiences, assignments and field experiences that provide opportunities for improvement in these areas of deficiency. Some suggestions are to restructure Research Methods, require math statistics, and redesign research methods to focus on methods. Critical Thinking should be a required general education course. The courses should add more applied learning experiences in traditional lecture classrooms, with students demonstrating oral communications and presentation skills. College Algebra and Trigonometry and writing across the movement science curriculum would be extremely beneficial.

Mission / Purpose

The purpose of the Law Studies Program is to prepare students for a career in the legal profession, whether it be as an attorney, paralegal, judge, or other position related to the field of law.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Develop Major
To develop a law studies major

O/O 1: Research Majors
Research other majors

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University

Related Measures:

M 1: Focus Group
Survey current students in the minor for interest in a law studies as a major

Source of Evidence: Focus groups

M 2: Derive information from Transfer Students
Check major of transfer students

Source of Evidence: Transfer acceptance rates, esp. for 2-yr college

M 3: Presentation
Make presentations to selected groups as way to recruit majors. Among the targeted groups are: political science, sociology/criminal justice, and undecideds.

Source of Evidence: Presentation, either individual or group

G 2: Offer Law Studies Courses Regularly
Ensure that all present courses are taught regularly
O/O 2: Verify Listings of Courses

Verify that law studies courses are listed regularly

Related Measures:

M 4: Check curriculum offerings
Check offerings in majors where law studies courses are offered

Source of Evidence: Curriculum/syllabus analysis of course to program

G 3: Increase Average Score on LSAT
Work to augment the average score on the Law School Admission Test, which is used by most law schools as a primary admissions criteria

O/O 3: Aim for minimum of 160 on LSAT
Work to increase LSAT score to 160, up from present 150 average

Related Measures:

M 5: Derive information from LSAC Reports
Consistently review LSAT scores for students. This information is furnished by the Law School Admission Council

Source of Evidence: Certification or licensure exam, national or state

M 6: Use Office of Testing for Pre-Post Tests
Offer practice exams for LSAT through DSU Office of Testing. Permit student to take test at two different junctures

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

M 7: Continue offering LSAT Preparation Course

Although not part of the minor, there is presently an LSAT Preparation Course which is part of the Law Studies Program. The specific purpose of this course is to assist students in studying and preparing for the LSAT. Student scores on the actual LSAT should be measured against whether they enrolled in and completed the preparation course.
Source of Evidence: Standardized test of subject matter knowledge

G 4: Increase Internships for Law Studies Students
Provide an array of internship opportunities for students in the Law Studies Program

O/O 4: Furnish means of Acquiring Internships
Furnish outlets for internship opportunities for students in the Law Studies Program

Related Measures:

M 8: Conduct interest surveys with Attorneys and Judges
Survey attorneys and judges to see what level of need is present

Source of Evidence: Employer survey, incl. perceptions of the program

M 9: Utilize Data from Current Internships
Utilize post-internship information to continue openings with offices who currently employ DSU students

Source of Evidence: Field work, internship, or teaching evaluation

M 10: Examine Placement Data
Share placement data regarding internships with the Office of Career Planning and Placement

Source of Evidence: Job placement data, esp. for career/tech areas

G 5: Establish Honor Society for DSU Law Studies Program
Create or acquire chapter membership in a law-oriented honor society

O/O 5: Investigate Existence of Law-Based Honor Society
Research whether there are any sanctioned, national honor societies for students with a law studies major or minor

Related Measures:

M 11: Check with American Bar Association
Research possible law-oriented honor society with this national group

Source of Evidence: Honors and awards outside the institution

M 12: Derive Information from Student Evaluations
Employ open-ended comments on student evaluations to determine interest in a DSU-based law honor society

Source of Evidence: Student course evaluations on learning gains made
M 13: Analyze Existing Data
Research present GPAs of students to compare to minimum requirements for an honor society

Source of Evidence: Existing data

G 6: Add Additional Optional Law Courses
Before a major is created, it would be of benefit to the Law Studies Program to increase the number of courses which offer either the content of law or the skills needed to study law

O/O 6: Create a Specific Course in Law Writing
Establish a course in legal writing

Related Measures:

M 14: Initiate and Continue Discussions
There has been some discussion already about adding a legal writing course. This should continue

Source of Evidence: Discussions / Coffee Talk

O/O 7: Bring Media Law Class into Law Studies
Without increasing the requirements for the 21-credit minor in law studies, make students aware of the existence of the Media Law course
Mission / Purpose

In support of the institution's mission, it is the mission of the University Library to provide university library materials and services to meet and supplement the academic needs of the community, to develop well-rounded and responsible citizens, and to encourage patrons to discover their creative capacities. For this reason, print materials E-books, and online databases on subjects related to academic disciplines/departments in support of teaching, learning, and research, are essential through university library collection development and management to provide desired services and ensure access to information, teaching and research resources.

Goals without Outcome/Objective Relationships Specified

G 3: Support Information Literacy

Provide continual assessment for Information Literacy Skills, research techniques and library services.

G 4: Desimminate Library Information

Ensure faculty, staff, and students are informed through all available media of new services, developments, new technologies and resources of the library.

G 5: Maintain Library Facilities

Maintain library facilities so they are updated and have state-of-the-art spaces for student study and collaboration, student computer labs and other campus related activities.

G 6: Continue To Add Materials And Increase The Awareness Of The University Archives
Meet the traditional, non-traditional and distant learners needs of all patrons in a timely and organized manner. Additionally, provide updated and relevant resources including access to Inter-library Loan.

**G 7: Participate in Community Outreach Projects**

Participate in outreach projects with the university and local community to foster cooperative activities.

**Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**G 1: Improve User Access to Information**

Technology has and will continue to rapidly transform the way we work and the systems we must utilized with the emerging trends for libraries. Therefore, the library will ensure quality services through library resources and materials. In addition to providing instruments to survey and evaluate the resources, services, technology, workflow issues, departmental initiatives, professional development, and other pertinent access for improvement.

**O/O 1: Evaluate Library Usage and Satisfaction with Services through User Surveys**

Evaluate Library usage and satisfaction with services through user surveys in an effort to help with retention and improve student success rates.

**Relevant Associations:**

**Strategic Plan Associations:**

Delaware State University

1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

3.2 Increase, strengthen, and sustain the support systems and infrastructure to assist faculty, staff and students in all aspects of their research endeavors.

**Related Measures:**

**M 1: Student Satisfaction Survey**

Survey of student satisfaction with services, resources available in the Library will be administered. The Reference and Public Service team to administer the survey with random sampling.

Source of Evidence: Client satisfaction survey (student, faculty)
**Target:**
Success will be defined as means that are equal to or exceed satisfaction levels as obtained in previous student surveys. Overall rating is 85%.

**Findings (2015-2016) - Target: Not Reported This Cycle**
Survey was not administered in 2015-2016 due to other priorities.

**Findings (2012-2013) - Target: Not Reported This Cycle**
Not reported this cycle. Findings will be uploaded in 2014.

**O/O 3: Evaluate selected collections through examination of materials**
Evaluate selected collections through examination of materials. Recommend new titles for purchase as well as titles for de-selection or "weeding." These efforts will be helpful for enhancing academic programs. Additionally, the Library must provide access to the most appropriate materials to support classroom assignments and projects and to meet the research need of student and faculty.

**Relevant Associations:**

**Strategic Plan Associations:**
Delaware State University
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement
3.2 Increase, strengthen, and sustain the support systems and infrastructure to assist faculty, staff and students in all aspects of their research endeavors.

**Related Measures:**

**M 3: Programs/departments collections review.**
When contacted by an academic department or program, the Library's Liaison librarian gathers necessary data and sends a report to the unit and/or faculty member(s) requesting assistance within the stated parameters. Liaison Librarian reviews collection on an on-going basis.

Source of Evidence: Document Analysis

**Target:**
Complete program reviews and the analysis of collection development of various department/program upon request.

**Findings (2015-2016) - Target: Not Reported This Cycle**
No departments contacted the library for collections review.

**Findings (2012-2013) - Target: Met**
Program Review for Social Work, Agriculture, Natural Sciences, & Related Sciences, and Hospitality and Tourism were completed 2012-2013. Several databases were added as well as de-selected for academic year 2012-2013. Additions: Project Muse, Proquest Research Library, Proquest Aquatic Sciences and Fisheries Abstracts, and The Encyclopedia of Global Hum Migration. Discontinued: Wilson Omnifile (statistics were low for usage; monies were spend on other databases).
O/O 6: Meet or exceed the national averages of a selected group of peer institutions on “total staff per 1000 FTE students.

Our plan is to demonstrate Library and University commitment of support for services in comparison to identified peer institutions and national averages.

Related Measures:

M 6: Staffing numbers
Staffing levels are based per 1000 Full Time Enrollment (FTE) students.

Source of Evidence: Professional standards

Target:
Staffing levels will be at the national average level or above.

Findings (2012-2013) - Target: Not Met
Staffing level is below national average at Delaware State University. The ratio per staff and student should be eight to every 1000 FTE students.

G 2: Provide User Services

To evaluate and improve our approach to our customer service operations, and to benefit all library patrons to include staff development, policies and procedures, employment of additional staff, existing and new programming, compliance standards and issues (ACRL), and departmental initiatives.

O/O 2: Provide access to electronic resources

Provide access to electronic resources. The Library staff will work to recommend the best course of action to take on link checking software options, streamlining of database pages, cross-unit workflow issues concerning adding and deselecting electronic resources, and the possibility of adding an e-book online and downloading services.

Relevant Associations:

Strategic Plan Associations:
Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
3.2 Increase, strengthen, and sustain the support systems and infrastructure to assist faculty, staff and students in all aspects of their research endeavors.

Related Measures:

M 2: Discussions/implementation of strategies
Ongoing strategies are accomplished during semesters.

Source of Evidence: Discussions / Coffee Talk

**Target:**
At least one new recommendation will be implemented each academic year providing funding is available.

**Findings (2016-2017) - Target: Met**
Implementation of LibGuide A-to-Z Database 2.0 and Serials Solutions Electronic Journal Portal 2.0 (Title III funded) was accomplished. Benefit was having seamless access so students could conduct a search within a search (deep search).

**Findings (2015-2016) - Target: Partially Met**
Technology developed workflow, processes and timeline to implement LibGuides 2.0, LibChat and the Horizon Library Management System new Online Catalog/Information Portal.

**Findings (2012-2013) - Target: Not Reported This Cycle**
Not reported this cycle.

---

**Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**SLO 11: Assess information literacy skills.**
Assess student learning outcomes of Information Literacy skills in Information Literacy instruction sessions and reference services.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 11: Information literacy quiz.**
In FY 13-14, the Library will use the assessment instrument developed in FY 2013-14 in research and information literacy sessions with lower-level courses. The assessment instrument will be a brief quiz given following the class that will ask several objective questions based on learning objectives common to all research and information literacy sessions, and a subjective section asking class members to write down the two most significant points covered in the class. The data gleaned from this assessment will help the Library understand student knowledge of information literacy skills discussed in research and information literacy sessions.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target:**
Eighty percent of students will score 80% or more on the quiz.
Findings (2016-2017) - Target: Met

The number of classes taught was 74 in the academic school year 2016 through 2017. The number of classes for 2016 was 39, and 2017 was 35. The number of librarians involved in teaching library information literacy classes was 6, including 4 Reference librarians, 2 Technical Services librarian. The number of students reached in those classes was 1698, with 967 in 2016 and 731 in 2017. The number of Professors/Instructors participated in the instruction program was 30. The number of Knowledge Check Survey administered to students in those classes for the library's student learning outcome was 281. The total number of students that failed was 36, and passed was 245. The percent passed was 87%, and percent failed 13%.

Findings (2015-2016) - Target: Met
—The number of classes taught for the academic school year 2015 through 2016 was 81. The number of classes for 2015 was 42, and 2016 was 39.
—The number of librarians involved in teaching library information literacy classes was 5, including 4 Reference librarians, 1 Technical Services librarian.
—The number of students reached in those classes was 1,729, with 939 in 2015 and 790 in 2016.
—The number of Professors/Instructors participated in the instruction program was 36
—The number of Knowledge Check Survey that was administered to students in those classes for the library's student learning outcome was 315. The total number of students that failed was 62, and passed was 253. The percent passed was 80%.

Connected Document
• Reference Department Annual Report 2016

Findings (2012-2013) - Target: Met
Eighty percent of students are receiving an 80% score or better on the general quiz and the gaming quiz.

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 7: Support professional development for staff.
Support professional development for librarians and or staff to improve overall staff performance, research, information literacy and expertise.

Related Measures:

M 7: Staff development opportunities
Support for librarians to participate in professional development activities each year. Additionally, provide when necessary training, professional meeting, and webinar opportunities for staff development.
Source of Evidence: Administrative measure - other

**Target:**
Each staff member will participate in at least one professional development activity.

**O/O 8: Enhance existing services and plan for new services.**
Work with Library staff for creation and review of Library policies and procedures. Each Library department and unit will continue to revise, update processes and service procedures. Department Supervisors will complete revisions to and submit for approval all Library policies and procedures to the Professional Librarians Council beginning each academic year.

**Related Measures:**

**M 8: Policies/procedures reviewed and/or updated**
Review of and updates made to programs, services, and policies and procedures.

Source of Evidence: Document Analysis

**Target:**
Keep Library policies in line with University policies while ensuring accepted best practices in academic libraries beginning each academic year.

**Findings** (2012-2013) - Target: Met
An established Policy and Procedure Committee reviewed, revised, and updated all policies and procedures. Policies and procedures were updated for Interlibrary Loan-implementation of new software Iliad.

**O/O 10: Determine the best course of action for the University Archival collection.**
Determine the best course of action for the University Archival collection, to add materials and increase the awareness of the university archives.

**Related Measures:**

**M 10: University Archival Collection updates**
Materials are solicited and processed from the campus/community that are of historical value and meets our policies.

Source of Evidence: Activity volume

**Target:**
Meet research needs of the University and the Community.

**Findings** (2016-2017) - Target: Met
From June 2016-May 2017, the archives served a total of 38 researchers. The majority of patrons accessed the archives by visiting in-person, however interactions were also conducted by phone and email. Outreach: The archives made significant advances toward generating community interest for university history and attaining a greater prominence. In August
a permanent, outdoor exhibit was installed which included signs in front of Loockerman Hall, the former DuPont School, Science Center North, and the Library. The signs provide a narrative history and include photographs from the archival collections. In fall 2016 the construction of a new archives suite was completed and the archives installed its first-ever exhibit in a new gallery space. The display was in honor of the 125th anniversary and was comprised of informative wall panels as well as artefactual treasures from the collections. The new gallery allows students who have more casual interests in the history of DSU to learn in a less intimidating environment than the traditional white-glove archive. Additional outreach initiatives included Rejoice Scherry’s service on the 125th anniversary committee which led to the contribution of archival photographs in marketing projects. Secondly, Lastly, Ms. Scherry played a pivotal role in initiating an Oral History program in which filmed interviews were conducted with some of the oldest alumni in order to capture and preserve their memories of the State College for Colored Students. Work on this project led to better relationships with the alumni and a foundation for future donor networking. Outreach activities helped to increase awareness of DSU’s still young archives department, and strongly supported the university core values of Community and Outreach.

**Findings (2015-2016) - Target: Met**
From June 2015-May 2016, the archives served 46 total researchers. The majority of patrons visited the archives in-person, but interactions were also conducted via phone and email.

**Outreach:** In conjunction with the Institute of Museum and Library Services grant project which runs from October 2013 - September 2016, the archives began a blog in December 2013. A stipulation of the grant is that a minimum of 2 posts per month must be published. Without fail, the archives has met this requirement and often exceeded it.

**Digitization:** To support its mission of making collections are widely accessible as possible, the archives digitizes material and posts it online to the Delaware Heritage Collection (http://cdm16397.contentdm.oclc.org/cdm/landingpage/collection/p16397coll10). The goal of the archive is to publish 5 items per month to the Delaware Heritage Collection, and the goal was met.

**Findings (2012-2013) - Target: Not Met**
Not Met. Request information in the University’s publication "ECHO", eNews, etc.

**O/O 12: Disseminate Library communications.**
Disseminate through, brochures, e-news, mass e-mail, library's webpage and campus newsletter. Ensure the University community is informed about new services, developments, and resources in the Library.

**Related Measures:**

**M 12: Information dissemination tools**
William C. Jason Library Electronic Digital collection and exhibits, library webpage, brochures, blogs, facebook and e-news.

Source of Evidence: Administrative measure - other
O/O 13: Investigate the use of portable dividers to create additional instruction spaces.

Investigate the use of portable dividers to create additional instruction and collaboration spaces within the Library to provide additional flexibility to support research, co-curricular activities, residential campus life, and student recruitment and retention efforts. The flexibility of using the portable dividers should allow the Library to accommodate special events with minimal disruption to students using other parts of the Library.

**Related Measures:**

M 13: Feasibility/purchase of portable dividers
Feasibility of purchasing, installing and using portable dividers within the Library.

Source of Evidence: Administrative measure - other

**Target:**
If recommended, implementation will be accomplished as early as fall 2014.

**Findings (2012-2013) - Target: Not Reported This Cycle**
No report this cycle.

O/O 14: Build smart rooms, individual study rooms and a cafe.

Build smart group study rooms and convert at least one individual study room into a smart room, as well as installation of a café. The smart rooms and café will better serve our students with collaborative study efforts.

**Related Measures:**

M 14: Facility proposals
Proposals compiled include floor plans, equipment needs, technical support and budget requirements.

Source of Evidence: Climate / Environment

**Target:**
By the end of the 2014 Fall Semester, all necessary requests will be submitted with implementation recommended for spring 2015.

**Findings (2012-2013) - Target: Partially Met**
Established committee to investigate this effort. Committee has looked at furniture, acquired quotes for paging system, smart boards, printers, scanners, etc.

O/O 15: Add, process, and make available various resources.

New Titles/databases are added on Library’s website when items are processed. New inter-library loan (ILLiad) webpage is ready for patron's use.

**Related Measures:**

M 5: Recommendations from Collection Development Committee
Recommendations from the Collection Development Committee (Subject Liaisons recommendations for schools and colleges).
Source of Evidence: Administrative measure - other

**Target:**
At least half of the recommendations from Collection Development Committee will be purchased.

**M 15: New Materials**
New materials are added to the collections as documented by "New Titles" on Library's website. Additionally, timely processing of interlibrary loan (ILL) request will ensure materials not owned are provided. Assessment and review of ILL requests is included in the collection development process to ensure needed materials are acquired.

Source of Evidence: Activity volume

**Target:**
Process and organized materials in a timely manner for availability to faculty, staff, students.

**Findings (2015-2016) - Target: Met**
During the 2015-2016 cycle we increased the Afro-American collection by purchasing 195 Afro-American titles. Our overall goal for purchasing titles from Oct 2010 to Sep 2015 was to go from 4000 titles to 5000 titles.

**Findings (2012-2013) - Target: Partially Met**
Usage of library materials has increased. For acquisition of new titles/databases, see Library's Webpage.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Analyze the survey further.**
Analyze the survey further.

**Established in Cycle:** 2011-2012
**Implementation Status:** Finished
**Priority:** Low

**Projected Completion Date:** 04/30/2014
**Responsible Person/Group:** Mr. Jean Charlot
**Additional Resources Requested:** Purchase new software.
**Budget Amount Requested:** $0.00 (no request)

**Administer survey in March 2017**
Administer survey in March 2017

**Established in Cycle:** 2015-2016
**Implementation Status:** Planned
**Priority:** High
**Implementation Description:** Complete by July 2017
EXECUTIVE SUMMARY

June 30, 2018

The library is the center of intellectual inquiry and shares with the University the aspiration to be a vibrant and dynamic learning environment. The Library goal is to ensure that its collections are research driven, accessible, current, and diverse. The Library will continue to acquire and maintain adequate information resources, offer effective instruction on the retrieval and use of materials in all formats, and continue to provide state-of-the-art technology for users. The library also aspires to assist the University in its commitments to the broader community, by developing innovative approaches to supporting life-long learning. The Library embraces change, diversity, professional growth, and the opportunity to serve all patrons.

In support of the Institution's mission, it is the mission of the Delaware State University William C. Jason Library to provide materials and services to meet and supplement the academic needs of the university community on and off campus, to develop well-rounded and responsible citizens, and to encourage patrons to discover their creative capacities. For this reason, print materials, electronic books, electronic journals, subject specific and multidisciplinary databases that support academic disciplines and colleges are essential through Library collection development and management to ensure information is accessible to the traditional and nontraditional student in support of teaching, learning and research.

Specifically, with the collaborative involvement and support of Reference and Public Services, Library Technology, Technical Services Division and University Archives the Library provides 86 hours of service to our students and faculty in person and virtually. Remote access to the library's electronic collections is also available 24/7. Librarians collaborate with faculty to ensure academic relationships are established to provide input and participation when selecting resources for collection development.

Further, strategically enhanced external support is equally desired to ensure access to both traditional and electronic resources that support the undergraduate and graduate teaching, learning and research needs. This support is needed through recurring and non-recurring funding sources, including, government agencies, corporate and private donors, and consortia / resource-sharing relationships specific to university libraries, including those already established with LYRASIS and OCLC Online Computer Library Center.

In support of the Delaware State University's research mission, it is the desire of the University Library to become a model research library through enhanced services, collections, staffing, facilities, and technology / virtual environment enhancement initiatives. The University Library holdings, total over 400,000 volumes. Relative to electronic products, (based upon an institution's student FTE); there is a primary need and requirement for access to current literature on the graduate and doctoral level in
Our overarching goal is to significantly expand and enhance library collection access to traditional and electronic research-level materials for the Library to meet the research, teaching, and instruction needs of the faculty and students, on both undergraduate and graduate levels, with particular emphasis on graduate-level needs and services. This goal also includes the distant learner and online patrons.

Collection analyses are on-going by University Library faculty/subject liaisons for the various colleges to determine collection adequacy, effectiveness, and accountability of undergraduate and graduate programs. In examining the collections for the various disciplines offered here at Delaware State University, peer evaluations, as well as benchmark evaluations are made to determine how far from the mean, if any, is our collection. Recommendations have since been made to aid in bringing the collections current, on all levels (i.e., bachelors, masters, and doctoral) and in all formats (i.e., in particular scholarly/core titles for books, electronic products (i.e., electronic subscriptions and electronic databases), print subscriptions, digitized materials and other initiatives relative to collection development and research.

With an increasing student enrollment, and an expectation that enrollment will grow, the library staff should grow consistent with the programs and goals of the University as outlined in the Standards for Libraries in Higher Education, 2011 edition. These Standards focus on qualitative measures. However, according to the Standards for College Libraries, 1995 edition, which focus to a large degree on quantitative measures, an academic library should have one librarian for each 500 students, or fraction thereof (FTE 10,000). And, for each 100,000 volumes, or fraction thereof, in the collection, there should be one librarian; for each 5,000 volumes, or fraction thereof, added and/or withdrawn per year, there should also be one librarian. At all times, the personnel in the Library must be sufficient in quantity to meet the diverse teaching and research needs of faculty and students.

The collection development program of the Library should be adhered to in terms of acquiring current resources, in print and electronic format, as noted by library liaisons and departmental and college accrediting agencies. The University Library completed a new Collection Development Policy in May.

**Unit(s) Profile**

**William C. Jason Library 2017-2018**

**Department:** Reference Department

**Narrative:** The Reference department librarians are liaisons assigned to Delaware State University’s respective colleges. They are committed to building the library’s collections and providing access to the scholarly information and services that support research, teaching, creative thinking, and new technologies.

During the 2017-2018 academic year, the reference department completed 1,186 one-on-one interactions at the reference desk and taught 100 classes attended by 2,254 students.
Goal I: Support faculty teaching outside the classroom through the library’s information literacy skills.

Objectives:

· Collaborate with teaching faculty in teaching research skills.

· Subject guides are developed as needed to teach the requested classes.

· Subject guides are updated and developed as needed to teach the requested classes and meet the requirements of the academic disciplines.

Measures:

The success of library classroom instruction is measured through the administration of a 10-question quiz. The subject of the quiz is the content presented within a 50-minute session library literacy session which introduces general library practices and basic researching skills. Scores inform librarians as to how well the students retained and understood the information.

Goal II: To provide on-campus and remote access to scholarly resources and core titles in print and electronic formats.

Proposed goal: To be inclusive of both on-campus and online students when selecting and purchasing resources for the library’s collections, both physical and digital.

Objectives

· Selecting books, databases and Ebooks in accordance to the William C. Jason Library’s collection development policy.

· The faculty members’ input is sought by the liaisons with regard to the selection and weeding of the respective department’s collection.

· Marketing new resources to the faculty and campus community telephone calls.

PROPOSED Measures for suggested goal II: When purchasing resources for subject matter that supports both physical and digital classrooms, the number of resources purchased will be parsed equally between print books and Ebooks.

· Goal III: To provide excellent public service

Objectives

· Provide in-person and remote services to our users through email, online chat, the telephone and one-on-one help at the reference desk.

· Assist students with printing and document preparation at the scanning station.

· Troubleshoot computer application problems and coordinate with the university’s Information Technology department.
**PROPOSED Measure:** "Excellence" will be judged by the administration of a year-end survey in April 2019. The survey will ask library patrons to evaluate public services, to achieve excellence.

**ORIGINAL Measures:** The success of library classroom instruction is measured through the administration of a 10-question quiz. The subject of the quiz is the content presented in the 50-minute information literacy session. Scores inform librarians as to how well the students retained and understood the information.

The library's physical and digital collections are evaluated. Faculty members are engaged in the selection and weeding processes to promote the health of the collections.

Students receive immediate assistance at the reference desk for research questions and instruction in how to use the scanner. Librarians respond to users questions online and in person in a timely manner.

Student papers will include a greater number of scholarly materials, correct citations of resources.

**Department: Tech Services Department**

**Narrative:** The Technical Services department is responsible for the acquisition of resources and ensures discoverability of quality, scholarly library resources. The department's areas of service are acquisitions, cataloging, circulation, inventory and stacks maintenance, serials, U.S. federal documents, and digitization.

For the 2017-2018 academic year, the William C. Jason library hosted 571,366 patrons, circulated 10,689 items and cataloged 13,715 items.

**Goal I:** Acquire library the materials and services, as directed by reference librarians and liaisons, needed to support scholarly research, teaching, and learning

**Proposed Measures:** Within the confines of the library's budget, the Technical Services department will purchase 100% of the items selected by reference librarians and liaisons.

**Goal II:** To make all newly acquired library resources discoverable within the library's catalog in as timely a manner as possible.

**Proposed Measures:** 100% of the resources acquired by the library will be included within the library's catalog and made available for checkout within [insert time/days].

**Goal III:** Circulation Reserves / Inventory and Stacks Maintenance (CRISM) is responsible for the care and maintenance of the stacks, clearing the floors, check out, check in and renew materials from the general, education, and reserve collections, pay fines/fees, get change, pick up and return of Interlibrary Loan materials. Staff also searches for items not found on shelves and ensure current library patron data is correct, guaranteeing login access to electronic materials, online renewal of library materials and that books are properly checked in and out of the library.
Goal IV: Update the library catalog information for all serial titles and ensure accuracy within OCLC Connexion.

**Proposed Measure:** Successful cataloging of multiple titles.

Goal V: Build a repository of digital content that is of intellectual value to the university community.

**Department:** Archives

**Narrative:** The Delaware State University Archives was formally established in 2012. Since then it has served as the repository for all records of enduring historic value created by former and current University Presidents, students, faculty, and administrative departments. The mission of the archives is to promote the knowledge and understanding of the University's historic origins, aims, programs, and goals.

In 2017-2018 the archives fulfilled 72 patron research requests received from the campus community and general public, which was a 54% increase from the prior year. Additionally, a total of 64.75 linear feet of records was organized and made publically available.

Goal I: Publish a minimum of two blog posts per month.

Goal II: Process a minimum of 50 linear feet of the backlogged archival collections for the purpose of making historic Delaware State University records publically available.

**Measures/Outcomes:** Successfully post two blog post every month. Successfully process 50 linear feet of archival materials.
Department: Technology

Narrative: The Technology department assists in the selection of new library technologies, and works to maintain the library’s existing technologies. The department additionally provides training to the librarians for the use of multimedia technology and hardware such as the Smart Boards, and software platforms such as Springshare CampusGuides or the Horizon Library Management System. Lastly, the Technology department is responsible for processing Interlibrary Loan requests for both borrowing and lending articles and books.

Goal I: Manage and develop a growing range of information technology based systems and services for the University libraries.

Goal II: Maintaining the Delaware State University Library website in coordination with the University Webmaster.

Measures: With regard to books, 99% of the requests submitted by the DSU community to borrow items will be filled, and 98% of the requests received from partnering institutions for lending will be filled. With regard to articles, 79% of requests to borrow will be fulfilled, and 100% of requests to loan items will be fulfilled.
Department: Federal Government Documents

Government Documents

Goal VI: Ensure University is in compliance with FDLP. Provide access to Federal Documents easily and in as timely a manner as possible.

Narrative: The William C. Jason library functions as one of the two Federal Depository Libraries located within Kent County and is the one depository library that is open to the public.

Goals: To catalog more documents in the 2018-2019 academic year than in the 2017-2018 academic year.

Measures: Newly cataloged depository materials will be discoverable through the library's online catalog and through WorldCat.

Unit(s) Initiatives accomplished in this cycle

William C. Jason Library 2017-2018

Department: Reference Department

Narrative: The Reference department librarians are liaisons assigned to Delaware State University's respective colleges. They are committed to building the library's collections and providing access to the scholarly information and services that support research, teaching, creative thinking, and new technologies.

During the 2017-2018 academic year, the reference department completed 1,186 one-on-one interactions at the reference desk and taught 100 classes attended by 2,254 students.

Goal I: Support faculty teaching outside the classroom through the library's information literacy skills.

Objectives:

- Collaborate with teaching faculty in teaching research skills.
- Subject guides are developed as needed to teach the requested classes.
- Subject guides are updated and developed as needed to teach the requested classes and meet the requirements of the academic disciplines.

**Unit(s) Honors/Awards and Achievements**

The Library Archives participated in the production of a documentary film entitled *A Legacy of Opportunity* which was shown to a select group on the Delaware State University campus. The 52-minute film tells the story of the educational institution that started in 1891 with 12 students meeting in an old plantation house to the vibrant global university it is today with undergraduate enrollments of nearly 4,000 students and graduate programs for more than 300 students.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

If the student has received gainful employment or a promotion during their graduate enrollment at DSU, please indicate this information in the space provided. If the student is matriculating into another graduate or professional program, please indicate the program, institution and enrollment term. If your activity required a field supervisor (rather than a faculty advisor), please note this in the comment section.

N/A
Mission / Purpose

Our mission is to provide a student-centered learning environment to develop successful business professionals with a global perspective. We emphasize academic excellence through innovation and integrity in teaching, professional development, research, and outreach. The Department of Business Administration shares the same mission as the College of Business.

The mission of the Department of Business Administration is congruent with the mission of Delaware State University. The mission includes providing meaningful and relevant education that emphasizes both the liberal and professional aspects of higher education. It prepares students for lifelong learning, emphasizes innovation and technology in teaching and learning, maintains continuous improvement of students, faculty, staff and programs, and promotes student professional development. It also maintains an appreciation of globalization in teaching and learning. By doing this, it includes the liberal art components and professional aspects of specified education of the parent institution, with the focus on Management education.

The mission and objectives for the College of Business were developed by stakeholders as a part of the strategic planning process during the period 2001-2003. The stakeholder group included the dean, chairs, the entire faculty, student representatives, alumni representatives and members of the Executive Advisory Committee. The Mission was revised, reviewed, and endorsed by the stakeholders to be the current one in 2008. A more recent revision has been made by replacing ‘applied and teaching research’ with just ‘research’ to broaden the scope of research for our faculty.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning Goals
These student learning goals are used to measure assurance of learning following the AACSB standards.

SLO 1: Written and Oral Communication
Student Learning Goals:

Goal #1. Our students will demonstrate effective writing and oral communication skills.
The oral communications rubric developed by the University General Education Committee was used to assess oral and written communications in the Organizational Behavior course in Fall 2012. Oral and written communications will be re-evaluated in fall 2017 to determine whether students improved in the areas that were unsatisfactory.

**Relevant Associations:**

**Standard Associations:**

AACSB 2016 Standards for Business Accreditation

8 CURRICULA MANAGEMENT AND ASSURANCE OF LEARNING: The school uses well-documented, systematic processes for determining and revising degree program learning goals; designing, delivering, and improving degree program curricula to achieve learning goals; and demonstrating that degree program learning goals have been met.

9 CURRICULUM CONTENT: Curriculum content is appropriate to general expectations for the degree program type and learning goals.

**DSU Learning Goal Associations:**

1 UG Student Learning Goal: Competent Communicators

**Related Measures:**

**M 1: Oral Communication Measure**

**SLO1. Our students will demonstrate effective writing and oral communication skills.**

Oral communication learning goals were last assessed fall 2014. These learning goals will be assessed again Spring 2018.

Source of Evidence: Presentation, either individual or group

**Target:**

Students will achieve 70% or higher on all items of the rubric.

**Findings (2016-2017) - Target: Not Reported This Cycle**

Not measured in this cycle. Will be measured in Spring 2018.

**Findings (2015-2016) - Target: Not Reported This Cycle**

Not reported in this cycle

**M 2: Written Communication Measure**
Written Communication Rubric

Written communication was last assessed in fall 2014 and will be assessed again in the Business Communication fall 2017--through written projects given by the instructor throughout the semester.

Target:
The expectation for student performance is that 70% of the students will perform at satisfactory (or equivalent) or better.

Findings (2016-2017) - Target: Not Reported This Cycle

SLO 4: Global, Cultural, and Diversity

Relevant Associations:

DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Strategic Plan Associations:
College of Business
1 Develop programs(undergraduate and graduate) and processes to enhance student learning, professional development and success.

Related Measures:

M 5: Global, Cultural, and Diversity Measure

Source of Evidence: Evaluations

Assessment Tool: Global, Cultural, and Diversity

Assessment Tool
The Global, Cultural and Diversity Rubric developed by the college AOL committee,
and is used to evaluate student performance. This was administered in the International Management course in fall 2015. In the two courses, students discuss cases involving global corporations and do a country analysis project.

Target:
The expectation for student performance is that 70% of the students will perform at satisfactory (or equivalent) or better.

Findings (2016-2017) - Target: Not Reported This Cycle
This SLO was not measured in this academic year 2016-2017. Will be assessed again in Spring 2018.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 2: Legal and Ethical Awareness

Our students will demonstrate effective understanding of legal and ethical issues in the practice of business.

The Ethical Decision Making rubric developed by the College AOL Committee was used to assess ethical decision making in the Human Resources Management course. This goal was re-evaluated in Fall 2015 to determine whether students improved in the areas that were unsatisfactory, and will be re-evaluated Fall 2017

Relevant Associations:

DSU Learning Goal Associations:
  3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:

M 3: Legal and Ethical Awareness Measure

SLO2. Our students will demonstrate critical thinking skills and effectively collect, analyze and interpret quantitative and qualitative data.

This learning goal is assessed in the operations management course. The instructor used regular assignments, exercises and cases to assess this learning goal.
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
The expectation for student performance is that 70% of the students will perform at satisfactory (or equivalent) or better.

**Findings (2016-2017) - Target: Not Reported This Cycle**
Not measured in this academic year 2016-2017. Will be measured Fall 2017 and Spring 2018.

**SLO 3: Data Gathering, Problem Solving, and Critical Thinking**

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 4: Data gathering, Problem Solving & Critical Thinking Measure**

SLO3. Our students will demonstrate critical thinking skills and effectively collect, analyze and interpret quantitative and qualitative data.
The Data Gathering, Problem Solving and Critical Thinking rubric developed by the College's AOL Committee was used to evaluate student performance. This assessment tool was administered in the Operations Management course. The results were as follows:

Students Identification of relevant quantitative & Qualitative Information 100%
Student applies the appropriate concept/technique 100%
Student solves problem correctly  63%
Student interprets results and draws appropriate conclusion 100%

Next assessment due fall 2017

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
The expectation for student performance is that 70% of the students will perform at satisfactory (or equivalent) or better.

**Findings (2016-2017) - Target: Not Reported This Cycle**
Not measured in this academic year 2016-2017. Will be measured Fall 2017 and Spring 2018.

**SLO 5: Information Technology**
**Related Measures:**

**M 6: Information Technology Measure**

The Information Technology Rubric developed by the AOL committee was used to assess information technology. This measure will occur on the AOL established cycle. Last assessment was fall 2016, next assessment is due fall 2018.

Source of Evidence: Evaluations

**Target:**
The expectation for student performance is that 70% of the students will perform at satisfactory (or equivalent) or better.

**Findings (2016-2017) - Target: Not Reported This Cycle**
Was not measured in this academic year 2016-2017. Will be measured in Spring 2018 again.

**SLO 6: Leadership and Team Building**
Our Students will demonstrate effective leadership and team building capabilities.

Goal #6. Leadership and Team Building was last measured in spring 2015.

**Related Measures:**

**M 7: Leadership and Team Building Measure**

**SLO7. Our students will demonstrate leadership capabilities and teamwork skills.**
Student Learning Outcome #7 was scheduled to be measured in spring 2015. This assessment will be conducted every 2 1/2 years in Organizational Behavior (OB) class.

Source of Evidence: Discussions / Coffee Talk

**Target:**
The expectation for student performance is that 70% of the students will perform at satisfactory (or equivalent) or better.

**Findings (2016-2017) - Target: Not Reported This Cycle**
Was not measured in this academic year 2016-2017 and will be measured in Spring 2018.

**SLO 7: General Knowledge of Business Concepts, Theories, and Techniques**

Our students will demonstrate a general knowledge of business concepts, theories, and techniques.
The senior assessment exam (ETS test) was used to evaluate general business knowledge of students. This test is administered in the Strategic Management course. For the first accreditation visit, the test was offered in spring since 2005. Starting in 2009, the test is administered each semester. The total number of students in the Department of Business Administration who took the Senior Assessment Test was 17 in fall 2016 and 46 in spring 2017.

**Relevant Associations:**

**Standard Associations:**
- AACSB 2016 Standards for Business Accreditation
  8 CURRICULA MANAGEMENT AND ASSURANCE OF LEARNING: The school uses well-documented, systematic processes for determining and revising degree program learning goals; designing, delivering, and improving degree program curricula to achieve learning goals; and demonstrating that degree program learning goals have been met.

**Strategic Plan Associations:**
- College of Business
  8 Improve the process of program review to ensure compliance with requirements for certification and accreditation.

**Related Measures:**

**M 8: Senior Assessment Test**

Source of Evidence: Standardized test of subject matter knowledge

**Assessment Tool: Senior Assessment Examination** To assess general knowledge of business concepts, theories, and techniques.

SLO7. Our students will demonstrate a general knowledge of business concepts, theories, and techniques.

**ETS Major Field Test: Business**

Students take the ETS test in the Strategic Management, the undergraduate capstone
course in both the fall and spring terms.

Legal, political and ethical issues in the practice of business.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Implement Assessment for Learning Goals for the Academic Year 2011-2012
Responsible Person/Group: Dr. Constant D. Beugre
Additional Resources Requested: None.

Improving math efficiency of students
We are continuing to encourage students to develop their math skills prior to matriculating at DSU COB. Currently we encourage the students to do ALEKS which has learning modules to reinforce concepts.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: Medium

Additional Resources Requested: none

Legal/Ethical Action Plan
While there were improvements in identifying ethical issues, the other three objectives were not met. The committee identified specific courses and recommended an ethics component that would be required. The following courses were selected: Principles of Management, Introduction to Business, MIS, Principles of Marketing, Organizational Behavior, HRM and Strategic Management.

Established in Cycle: 2015-2016
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Documenting the ethical and legal components in classes.  
**Projected Completion Date:** 10/01/2017  
**Responsible Person/Group:** Management department faculty  
**Additional Resources Requested:** None

**Students perform below the national average on the ETS--we have undertaken a number of activities to improve student performance**

The ETS test was administered to all seniors in the capstone course Strategic Management. For each of the subject areas, DSU students performed below the national average. Given that the university sets the admission standards, the College of Business needs to work with students that are admitted to our program. The college has been very proactive in encouraging student to prepare prior to arriving on campus, providing tutoring and supplemental instruction and changing how instruction is provided. Changes that have been made will be discussed in each subject area. The fluctuation in the ETS score reflect the trends in the national ETS scores; that is when national averages went up (down), DSU ETS scores went up (down).

**Accounting**

The accounting program started to use supplemental instruction in fall 2013. Faculty are assigned a student that attends class once a week and holds a review session on that week subject for the students. They also hold tutoring hours. In fall 2015, the department hired additional tutors to provide more tutoring hours and have designated two rooms as tutoring rooms. Given the trend in accounting is in an improving direction, the committee recommends that we continue with the use of tutors and supplementary instruction.

**Economics**

Supplementary instructors and tutors have also been added in the economics. However, the number of tutors is not as large as in accounting. Economics also has had visiting professors and adjuncts covering the classes. The committee recommends increasing the number of
tutors, hiring a faculty member and requiring a standard syllabus be followed for all introductory courses.

**Finance**

All Introductory Finance courses have a supplementary instructor. The trend in the Finance ETS scores has been a steady increase. The committee recommends continuing to use supplementary instructors.

**Law and Ethics**

The law classes showed improvement for two years with a dip in the past years results. In spring 2016, a regularly scheduled tutor has been made available for students. As of fall 2015, text books have been placed on reserve in the library for students who can't afford or choose not to purchase the book. Students are permitted to use past editions of the text and the instructor provides hand-outs regarding text examples to keep everyone up to date. Power Point slides for every chapter have been placed on Blackboard at the beginning of the semester containing the full outline of all in-class lectures. The ethics portion of the class consists of a single chapter early in the course which is referred to repeatedly throughout the semester. Business Ethics course is being taught by COB faculty and it is recommended that it become a required business course to bolster student's ethics understanding.

**Information Systems**

An increase in the ETS results from 2011-2013 may be due to hiring a full time instructor for Microcomputer applications. This resulted in a “Scholarly Academic” status faculty member teaching basics in the area. Prior to this, adjuncts were used to teach the course. Given the ETS results, no intervention is recommended at this time.

**Marketing**
We have noticed that a number of students have been transferring credit for principles of marketing from other institutions. As a result, we plan to restrict students from transferring Principles of Marketing from non-AACSB accredited institutions.

Established in Cycle: 2015-2016  
Implementation Status: Planned  
Priority: High
Mission / Purpose

The Department of Mass Communication's mission, which is based on the broad mission of the university, is to develop and enhance understanding of communication processes and their effects on individuals, organizations, culture, and society. The department meets its mission through discovery, interactive and experiential learning, and engagement focused on content creation, distribution, new technology and interpretation of messages through multiple media channels and platforms. Faculty create and share knowledge about the media within historical, economic, global, technological, and cultural environments.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Foundation and current state of digital media

Students will understand the foundation, principles, theoretical frameworks and current state of digital media*. (NOTE: *Throughout this document Digital Media is broad term that will be used to cover the areas of concentration; TV, Radio and Film, Convergence Journalism, and Public Relations and Advertising).

SLO 1: Conceptual/theoretical Knowledge

Students will articulate mastery of this objective and be able to articulate the relationship between their understanding of the communication process and theories and practices. The core courses relevant to this objective are: Introduction to Mass Communications, Public Opinion and Propaganda, Media Law and Ethics, Public Relations Principles and Practices, Principles and Practices of Advertising and Media Management.

In these courses, students will be required to analyze case studies, become familiar with theories, understand new ideas and research and trends that are emerging in the industry and be familiar with industry pioneers.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 1: senior Capstone rubric**
Successful completion of the Mass Communication capstone product (research paper, product and oral presentation) as evaluated by an expert in the field. Students will be evaluated based on the capstone rubric.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
All students will achieve satisfactory or above rating on the senior capstone rubric.

**Findings (2015-2016) - Target: Partially Met**
Fall 2015

- 90% of the students achieved a rating of Satisfactory or above
- 5% unsatisfactory
- 5% excluded from assessment

Spring 2016:

- 98% of the students achieved a rating of Satisfactory or above
- 2% of the student's projects did not include this component

Target was nearly met in fall 2015 and met in spring 2016

**Connected Document**
- Capstone Data (ADCS) conceptual-theoretical knowledge (fall 2015 - spring 2016)

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Cross-disciplinary mastery**
*Established in Cycle: 2011-2012*
Students will be assessed on their ability to utilize skills from the three sub-disciplines including but not limited to writing...

**M 2: Student Success in Foundation Courses (grades)**
The foundation courses (Intro to Mass Communications, Intro to Media Technology, Communications Writing, Public Relations Writing) prepare first and second year students for the writing components of the Senior Capstone project. Students must pass these courses with a C or better to advance to the upper-level concentration courses. Means of assessing learning in these courses include quizzes, test and curriculum-related written assignments.

Source of Evidence: Academic indirect indicator of learning - other

**Target:** 85% of students will pass foundation courses with a 70% or better grades.

**M 5: Research Competency**

The Department has two core courses designed to introduce students to the academic research process in mass communications. The Media Research Techniques course (MCOM 334) provides students with a broad introduction to the methodological foundations and tools to study mass communications. A secondary purpose is to engage students in the process of scientific discovery that will lead them to the completion of a successful Senior Capstone project. The Media Research Techniques course also focuses on the fundamentals of quantitative and qualitative social science data collection. Students must earn "C" or better in Media Research Techniques to advance to the Senior Capstone course. The Senior Capstone course (MCOM 460) is a research and product-based course designed to assess students ability to think critical about issues impacting mass media (specifically TV, Radio & Film, Convergence Journalism and Public Relations and Advertising). In the capstone course, the student must complete an APA format research paper with introduction, literature review, data analysis and discussion of findings and conclusion) and then undertake field work on the subject. Students present both the research paper and product to a three-person committee comprised of professors from the three discipline.

Source of Evidence: Student course evaluations on learning gains made

**M 6: Student Performance Measures-Comprehensive**

1. Passing Media Research Techniques and Writing a satisfactory Senior Project in the next semester demonstrates mastery of research skills (#3), ability to write clearly (#4), concept knowledge (5) and technical knowledge (6). The project involves conceptualizing a research problem, conducting literature review and original research, making a product from MCom to go with the paper, and presenting the package.

2. A test of writing skills on Blackboard tests students in the freshmen year. The same cohort is tested four years later to prove student learning.

Source of Evidence: Capstone course assignments measuring mastery

**Target:** Conceptual theoretical knowledge is measured by success on the senior project. Target would be for at least 10% to be excellent, 60% good and no more than 30% of students rated below good (C or D) in the project.

**Findings (2011-2012) - Target: Not Reported This Cycle**

If the target is not met, plans would be to add more research or theory courses to prepare students for the senior capstone.
**SLO 6: Research Competency**

Students will engage in higher-level thinking skills including application of communication principles and theory, synthesis of peer reviewed scholarly research and by making appropriate quantitative and/or qualitative assessment of data. Students will display diagnostic and problem-solving skills in completing the research paper, an audio/visual project and an oral presentation. All of the core courses in the three concentrations (PR and Advertising, Convergence Journalism, and TV, Radio and Film) are the foundation for which the Capstone experience is built upon.

**Relevant Associations:**

**DSU Learning Goal Associations:**

1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 1: senior Capstone rubric**

Successful completion of the Mass Communication capstone product (research paper, product and oral presentation) as evaluated by an expert in the field. Students will be evaluated based on the capstone rubric.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**

All students will achieve satisfactory or above rating on the senior capstone rubric.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Cross-disciplinary mastery**

*Established in Cycle: 2011-2012*

Students will be assessed on their ability to utilize skills from the three sub-disciplines including but not limited to writing...

**G 2: Message delivery across platforms**

Students will be able to write and design messages that are clear, accurate, thorough and fair; across various platforms include print, broadcast (TV and radio) and digital/online.
**SLO 2: Concise and Clear Writing Across Platforms**

Students will write publishable news stories, creating summaries of related readings and scholarly journal articles, be able to write across digital platforms (print, broadcast and digital mediums), producing publishable new content for TV and Radio broadcast on the student-run closed-circuit TV and radio stations, and composing research papers with evidence-based reasoning.

The core courses relevant to this objective are: Communications Writing, Public Relations Writing, Advertising Writing, Media Research Techniques, Senior Capstone, PR and the NET, Public Relations Management and Campaigns, Technical and Scientific Writing, Magazine Writing and Online Journalism.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 1: senior Capstone rubric**
Successful completion of the Mass Communication capstone product (research paper, product and oral presentation) as evaluated by an expert in the field. Students will be evaluated based on the capstone rubric.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
All students will achieve **proficient** or above rating on the senior capstone rubric.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Creation of grading rubric for qualitative writing exam on Blackboard**
_Established in Cycle:_ 2011-2012
The rubric should allow for coding reliability on Blackboard that allows for relative ease in grading the exams.
Cross-disciplinary mastery

*Established in Cycle: 2011-2012*

Students will be assessed on their ability to utilize skills from the three sub-disciplines including but not limited to writing...

M 2: Student Success in Foundation Courses (grades)

The foundation courses (Intro to Mass Communications, Intro to Media Technology, Communications Writing, Public Relations Writing) prepare first and second year students for the writing components of the Senior Capstone project. Students must pass these courses with a C or better to advance to the upper-level concentration courses. Means of assessing learning in these courses include quizzes, test and curriculum-related written assignments.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**

85% of students will pass foundation courses with a 70% or better grades.

M 3: Pre/Post Writing Assessment

An assessment adapted from Indiana, Howard, and Dilliard Universities has been designed specifically to test their mastery of skills they will need to be successful in the Mass Communications departments. This test assesses their English language mastery and rudimentary reporting and writing skills. The test is deployed as a cohort exam and students are given a similar test on prior to graduation to determine level of improvement. Test scores are measured cohort-to-cohort with the consideration of movement in and out of the department, through transfers or attrition. The proficiency level of a typical freshman class versus a graduating class in the same cohort can be correlated and levels of improvement can be made in the curriculum.

Source of Evidence: Benchmarking

**Target:**

All students will pass both sections of the assessment with a 70% proficiency. Success rates will be compared with previous cohort scores.

**Findings (2015-2016) - Target: Not Met**

NOTE: ADD DATA FROM BLACKBOARD, DISCUSS LOW # AND ACTION PLAN --> HOW TO INCREASE SUBMISSIONS/COMPLETION

**Findings (2011-2012) - Target: Partially Met**

Need to create a system of marking written essay maintained on Blackboard. Statistical measures in tact but we need a qualitative marking system.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**M 5: Research Competency**

The Department has two core courses designed to introduce students to the academic research process in mass communications. The Media Research Techniques course (MCOM 334) provides students with a broad introduction to the methodological foundations and tools to study mass communications. A secondary purpose is to engage students in the process of scientific discovery that will lead them to the completion of a successful Senior Capstone project. The Media Research Techniques course also focuses on the fundamentals of quantitative and qualitative social science data collection. Students must earn "C" or better in Media Research Techniques to advance to the Senior Capstone course. The Senior Capstone course (MCOM 460) is a research and product-based course designed to assess students ability to think critical about issues impacting mass media (specifically TV, Radio & Film, Convergence Journalism and Public Relations and Advertising). In the capstone course, the student must complete an APA format research paper with introduction, literature review, data analysis and discussion of findings and conclusion) and then undertake field work on the subject. Students present both the research paper and product to a three-person committee comprised of professors from the three discipline.

Source of Evidence: Student course evaluations on learning gains made

**Target:**

90% of students will complete writing intensive courses with 70% or above.

**M 6: Student Performance Measures—Comprehensive**

1. Passing Media Research Techniques and Writing a satisfactory Senior Project in the next semester demonstrates mastery of research skills (#3), ability to write clearly (#4), concept knowledge (5) and technical knowledge (6). The project involves conceptualizing a research problem, conducting literature review and original research, making a product from MCom to go with the paper, and presenting the package.

2. A test of writing skills on Blackboard tests students in the freshmen year. The same cohort is tested four years later to prove student learning.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**

A pilot benchmarking project has shown about only 60% of freshmen
having satisfactory writing skills. The goal would be for the senior class to have 90% graduating with satisfactory skills. The improvement in student learning could then be attributed to the program.

**Related Action Plans (by Established cycle, then alpha):**

At the end of every semester, students are empaneled by a 3-person jury. The results are kept for accreditation visit and also evaluated through ACDS.

Findings (2011-2012) - Target: Partially Met
Data on computer and information literacy connected to senior capstone and media research stored through ACDS.

M 6: Student Performance Measures-Comprehensive
1. Passing Media Research Techniques and Writing a satisfactory Senior Project in the next semester demonstrates mastery of research skills (#3), ability to write clearly (#4), concept knowledge (5) and technical knowledge (6). The project involves conceptualizing a research problem, conducting literature review and original research, making a product from MCom to go with the paper, and presenting the package.
2. A test of writing skills on Blackboard tests students in the freshmen year. The same cohort is tested four years later to prove student learning.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
Target -- students are rated in Writing Skills, Critical Thinking, Quantitative Assessment in senior project panels. Target would be for 10% to be excellent 70% good and 20% of students below that level.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Cross-disciplinary mastery**
*Established in Cycle: 2011-2012*
Students will be assessed on their ability to utilize skills from the three sub-disciplines including but not limited to writing...

**Curriculum Committee will consider implementing digital components in to all courses**
*Established in Cycle: 2011-2012*

The faculty is worked to incorporate a digital component into all courses. Additionally, the newspaper is now online and the ...

**SLO 6: Research Competency**
Students will engage in higher-level thinking skills including application of communication principles and theory, synthesis of peer reviewed scholarly research and by making appropriate quantitative and/or qualitative assessment of data. Students will display diagnostic and problem-solving skills in completing the research paper, an audio/visual project and an oral presentation. All of the core courses in the three concentrations (PR and Advertising, Convergence Journalism, and TV, Radio and Film) are the foundation for which the Capstone experience is built upon.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 1: senior Capstone rubric**
Successful completion of the Mass Communication capstone product (research paper, product and oral presentation) as evaluated by an expert in the field. Students will be evaluated based on the capstone rubric.
Source of Evidence: Capstone course assignments measuring mastery

**Target:**
All students will achieve satisfactory or above rating on the senior capstone rubric.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Cross-disciplinary mastery**
*Established in Cycle: 2011-2012*
Students will be assessed on their ability to utilize skills from the three sub-disciplines including but not limited to writing...

**G 3: Development of ethical and critical thinking skills**
Students will have an understanding of the ethical considerations and critical thinking skills necessary to create content across various platforms.

**SLO 2: Concise and Clear Writing Across Platforms**
Students will write publishable news stories, creating summaries of related readings and scholarly journal articles, be able to write across digital platforms (print, broadcast and digital mediums), producing publishable new content for TV and Radio broadcast on the student-run closed-circuit TV and radio stations, and composing research papers with evidence-based reasoning.

The core courses relevant to this objective are: Communications Writing, Public Relations Writing, Advertising Writing, Media Research Techniques, Senior Capstone, PR and the NET, Public Relations Management and Campaigns, Technical and Scientific Writing, Magazine Writing and Online Journalism.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 1: Senior Capstone rubric**
Successful completion of the Mass Communication capstone product (research paper, product and oral presentation) as evaluated by an expert in the field. Students will be evaluated based on the capstone rubric.

Source of Evidence: Capstone course assignments measuring mastery
**Target:**
All students will achieve proficient or above rating on the senior capstone rubric.

**M 2: Student Success in Foundation Courses (grades)**
The foundation courses (Intro to Mass Communications, Intro to Media Technology, Communications Writing, Public Relations Writing) prepare first and second year students for the writing components of the Senior Capstone project. Students must pass these courses with a C or better to advance to the upper-level concentration courses. Means of assessing learning in these courses include quizzes, test and curriculum-related written assignments.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
85% of students will pass foundation courses with a 70% or better grades.

**M 3: Pre/Post Writing Assessment**
An assessment adapted from Indiana, Howard, and Dillard Universities has been designed specifically to test their mastery of skills they will need to be successful in the Mass Communications departments. This test assesses their English language mastery and rudimentary reporting and writing skills. The test is deployed as a cohort exam and students are given a similar test on prior to graduation to determine level of improvement. Test scores are measured cohort-to-cohort with the consideration of movement in and out of the department, through transfers or attrition. The proficiency level of a typical freshman class versus a graduating class in the same cohort can be correlated and levels of improvement can be made in the curriculum.
Source of Evidence: Benchmarking

**Target:**
All students will pass both sections of the assessment with a 70% proficiency.
Success rates will be compared with previous cohort scores.

**Findings (2015-2016) - Target: Not Met**
NOTE: ADD DATA FROM BLACKBOARD, DISCUSS LOW # AND ACTION PLAN --> HOW TO INCREASE SUBMISSIONS/COMPLETION

**Findings (2011-2012) - Target: Partially Met**
Need to create a system of marking written essay maintained on Blackboard. Statistical measures in tact but we need a qualitative marking system.

*Established in Cycle: 2011-2012*
The rubric should allow for coding reliability on Blackboard that allows for relative ease in grading the exams.

**M 5:Research Competency**
The Department has two core courses designed to introduce students to the academic research process in mass communications. The Media Research Techniques course (MCOM 334) provides students with a broad introduction to the methodological foundations and tools to study mass communications. A secondary purpose is to engage students in the process of scientific discovery that will lead them to the completion of a successful Senior Capstone project. The Media Research Techniques course also focuses on the fundamentals of quantitative and qualitative social science data collection. Students must earn "C" or better in Media Research Techniques to advance to the Senior Capstone course. The Senior Capstone course (MCOM 460) is a research and product-based course designed to assess students ability to think critical about issues impacting mass media (specifically TV, Radio & Film, Convergence Journalism and Public Relations and Advertising). In the capstone course, the student must complete an APA format research paper with introduction, literature review, data analysis and discussion of findings and conclusion) and then undertake field work on the subject. Students present both the research paper and product to a three-person committee comprised of professors from the three discipline.
Source of Evidence: Student course evaluations on learning gains made

**Target:**
90% of students will complete writing intensive courses with 70% or above.

**M 6: Student Performance Measures - Comprehensive**
1. Passing Media Research Techniques and Writing a satisfactory Senior Project in the next semester demonstrates mastery of research skills (#3), ability to write clearly (#4), concept knowledge (5) and technical knowledge (6). The project involves conceptualizing a research problem, conducting literature review and original research, making a product from MCom to go with the paper, and presenting the package.

2. A test of writing skills on Blackboard tests students in the freshmen year. The same cohort is tested four years later to prove student learning.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
A pilot benchmarking project has shown about only 60% of freshmen having satisfactory writing skills. The goal would be for the senior class to have 90% graduating with satisfactory skills. The improvement in student learning could then be attributed to the program.

**Related Action Plans (by Established cycle, then alpha):**

**SLO 4: Cross-Cultural/Global Understanding of Media**
Students will collaborate with peers on assignments on projects and articulate cultural differences in communication styles and demonstrate the ability to communicate effectively with people from diverse backgrounds. The core courses relevant to this objective are: PR Management and Campaigns, Online Journalism, Media Law and Ethics, Senior Capstone, TV production III, Sound III and American Cinema and Society.

**Relevant Associations:**

**DSU Learning Goal Associations:**
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 4: Synthesis of Core and Concentration Curriculum**
The Employers' evaluations should identify students having technology difficulties, since they will be used to test skills in the workplace. Senior capstone presentations employ lastest technology.

Source of Evidence: Evaluations

**Target:**
In capstone, goal is to have 90% of students in top two categories as accessed through ACDS system. To do that, a student would have to write well across platforms because they have a research paper (printed) and audio-video product (scripted).

**G 4: Increase global awareness**
Students will have an understanding of the global and cultural impact of digital media.

**SLO 4: Cross-Cultural/Global Understanding of Media**
Students will collaborate with peers on assignments on projects and articulate cultural differences in communication styles and demonstrate the ability to communicate effectively with people from diverse backgrounds. The core courses relevant to this objective are: PR Management and Campaigns, Online Journalism, Media Law and Ethics, Senior Capstone, TV production III, Sound III and American Cinema and Society.

**Relevant Associations:**
DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:

G 5: Experiential learning and hands-on experience
Students will demonstrate their ability to select and use current media technology as well as the limitations and implications from multiple perspectives by working experientially in class, with campus partners and through external and international internship opportunities.

SLO 3: Demonstration of Technical Knowledge

Students will effectively utilize presentation and editing software, production equipment (including but not limited to still and video cameras, ipads and ipods, audio equipment), apps, social media platforms and other forms of electronic communication used by industry professionals.

The core courses relevant to this objective are: TV I, II, III, Sound I, II, III, PR Management and Campaigns, Senior Capstone, Online Journalism, Independent Study (Hornet Newspaper, Digital Sports Media Relations and Live Sports and Event Video Production) and Internship.

Relevant Associations:

DSU Learning Goal Associations:

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Collect base-line data from all writing courses

Complete comparative analysis of pass/fail rates of the introductory level writing-intensive courses and implement pre/post writing tests in these courses (PR Writing,
Communications Writing, Reporting and Writing)

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: senior Capstone rubric | Outcome/Objective: Concise and Clear Writing Across Platforms
Measure: Student Performance Measures-Comprehensive | Outcome/Objective: Concise and Clear Writing Across Platforms

Implementation Description: Results will be measured by reviewing the pass/fail rate of students in the course as well as analyzing the data from the pre/post writing test in the respective courses
Projected Completion Date: 05/30/2016
Responsible Person/Group: Edwards, Taylor, Perrine

Test new freshman cohort each fall in Communications Writing for benchmarking
Freshman will be tested to assess writing needs and current understanding of the mechanics of writing in Mass Communications. The plan is to collect data at the freshman level that can be compared to similar tests in their senior year.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Pre/Post Writing Assessment | Outcome/Objective: Concise and Clear Writing Across Platforms
Measure: Student Performance Measures-Comprehensive | Outcome/Objective: Concise and Clear Writing Across Platforms

Implementation Description: The pre test will be administered in all sections of Communications Writing course during the second week of the semester.
Projected Completion Date: 05/30/2016
Responsible Person/Group: Instructors who teach Communications Writing
Additional Resources Requested: Test will be administered via Blackboard

Creation of grading rubric for qualitative writing exam on Blackboard
The rubric should allow for coding reliability on Blackboard that allows for relative ease in grading the exams.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Pre/Post Writing Assessment | Outcome/Objective: Concise and Clear Writing Across Platforms
Measure: senior Capstone rubric | Outcome/Objective: Concise and Clear Writing Across Platforms
Measure: Student Performance Measures-Comprehensive | Outcome/Objective: Concise and Clear Writing Across Platforms

Implementation Description: rubric will be uploaded to Blackboard along with the assessment
Projected Completion Date: 03/30/2016
Responsible Person/Group: all faculty

Cross-disciplinary mastery
Students will be assessed on their ability to utilize skills from the three sub-disciplines including but not limited to writing, video and sound editing, web design, event coordination/planning. This will be done annually.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: senior Capstone rubric | Outcome/Objective: Conceptual/theoretical Knowledge | Concise and Clear Writing Across Platforms | Demonstration of Technical Knowledge | Research Competency
Measure: Student Performance Measures-Comprehensive | Outcome/Objective: Concise and Clear Writing Across Platforms | Demonstration of Technical Knowledge | Experiential Learning
Measure: Synthesis of Core and Concentration Curriculum | Outcome/Objective: Demonstration of Technical Knowledge

Implementation Description: Monitoring closely senior project reviews to test for advanced technical and conceptual skills.
Projected Completion Date: 12/01/2016
Responsible Person/Group: All faculty teaching capstone

Curriculum Committee will consider implementing digital components in to all courses

The faculty is worked to incorporate a digital component into all courses. Additionally, the newspaper is now online and the course will be redesigned to reflect the active production of a regular digital production.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: senior Capstone rubric | Outcome/Objective: Demonstration of Technical Knowledge
  Measure: Student Performance Measures-Comprehensive | Outcome/Objective: Demonstration of Technical Knowledge | Experiential Learning
  Measure: Synthesis of Core and Concentration Curriculum | Outcome/Objective: Demonstration of Technical Knowledge

Implementation Description: Instructors will use new technology, apps, or other digital platforms/tools in instructional design and students will be required to use technology, apps, or other digital platforms/tools to complete assignments.
Projected Completion Date: 05/01/2017
Responsible Person/Group: Chair and the Curriculum Committee
Mission / Purpose

MISSION: The mission of the Department of Mass Communication, which is based on the broad mission of the university, is to (i) develop and enhance understanding of communication processes and their effects on individuals, organizations, culture, and society (ii) engage students in interactive and experiential learning, (iii) provide students with the foundation, theory, and principles relative to the design and delivery of effective communication content, (iv) provide students with a mastery of content creation, distribution, and delivery of messages through multiple media channels and platforms, (v) instill an ethical foundation necessary for the delivery of news and information and (vi) prepare students for a professional environment that requires them to deliver media content within historical, economic, technological, global, and cultural contexts.

PURPOSE: The purpose of the Department of Mass Communications is to produce and graduate ethical and technologically proficient communication professionals who are capable of making a positive impact on their environment and on society.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Hire diverse faculty with a balance of academic and professional credentials

Hire faculty to ensure that the credentials of the department's faculty represent a balance of professional and scholarly experience and expertise that are kept current through faculty development opportunities, relationships with professional and scholarly associations, and appropriate supplementation of part-time and visiting faculty who are currently working within their respective disciplines.

O/O 1: Create a talent-pool

The faculty will continue to develop courses so that students get more hands-on experience and have more opportunities to demonstrate their professional and technical skills in the field. Quality check for excellence will be in the form of juried senior capstone in which students present well-developed research and a product (digital, print, marketing/PR initiative, etc) that represents a full understanding of the student's concentration.
Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors

Related Measures:

M 2: Management Skills
Includes self-management in Senior Capstone, student-run publications or stations, and Internship, which involve working independently, supervising peers or working with peers.

Source of Evidence: Evaluations

M 3: Senior Capstone
Assesses combined abilities in all areas, from technical to self-management to creative in an intense project senior year.

Source of Evidence: Service Quality

M 4: Internship
Placements in senior or junior year allows students to utilize skills learned in the classroom environment and replicate these skills in the internship environment with the hopes of these placements leading to permanent job placement.

Source of Evidence: Evaluations

G 2: Expand outreach through program development and partnerships
Expand outreach and connected course offerings to high school and community college students, build industry partnerships and extend service-learning to the community and the profession.

O/O 2: Developing external partnerships
Faculty will continue to build strong external partnerships in which students can be placed in agencies to further develop their talent. Focus will be on partnering with organizations that have an impact at the local, national and global levels.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region

Develop and infuse cross-cultural/multi cultural subject matter into all course materials

### G 3: Engage in research and scholarship

Encourage faculty to contribute to the humanities by way of collaborative research, creative projects which increase the digital thumbprint, and involve students and colleagues in work that would support internal/external grant funding

### O/O 3: Global Commitment

Faculty will continue to build a culture of global awareness through internationally focused teaching and learning activities and by cultivating collaborative relationships with international programs, higher education institutions and global communities.

**Relevant Associations:**

**DSU Learning Goal Associations:**

- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Strategic Plan Associations:**

**College of Arts, Humanities, & Social Sciences**

- 1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
- 6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
- 8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

**Related Measures:**

**M 1: Global Awareness**

The number of students in Study Abroad and the global education rubric with globalization content used for evaluating senior thesis

Source of Evidence: Climate / Environment

**Target:**

- # of students participating in Study Abroad programs

Will use Global Issues rubric -- 70% students will be in top two categories
M 3: Senior Capstone
Assesses combined abilities in all areas, from technical to self-management to creative in an intense project senior year.

Source of Evidence: Service Quality

O/O 5: Broader Understanding of Media Management
Faculty will provide students with media management skills through WDSU TV/Channel 14, WDSU The Hive, and through the acquisition of the mobile production unit. Courses associated with media management include MCOM 440 Media Management and MCOM 217 Intro to Media Technology.

Relevant Associations:
DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status

Related Measures:
M 2: Management Skills
Includes self-management in Senior Capstone, student-run publications or stations, and Internship, which involve working independently, supervising peers or working with peers.

Source of Evidence: Evaluations

M 3: Senior Capstone
Assesses combined abilities in all areas, from technical to self-management to creative in an intense project senior year.

Source of Evidence: Service Quality

M 4: Internship
Placements in senior or junior year allows students to utilize skills learned in the classroom environment and replicate these skills in the internship environment with the hopes of these placements leading to permanent job placement.

Source of Evidence: Evaluations
G 4: Align curriculum with industry practices

Review and update curricula to reflect industry standards and the market demand for new employees.

O/O 4: Convergence

Students will graduate having a full understand of the converged digital environment. 2016-17 Curriculum changes reflect this commitment.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status

Related Measures:

M 2: Management Skills
Includes self-management in Senior Capstone, student-run publications or stations, and Internship, which involve working independently, supervising peers or working with peers.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Student Success - alumni**
Collect data reflecting job placement/graduate pursuits by alumni
Established in Cycle: 2016-2017
Implementation Status: In-Progress
Priority: High
Implementation Description: Excel database has been maintained since 2015. Data is input into the system during the senior audit cycles each semester as a means of collecting the most current data. Alumni are contacted in the summer to update their information or submit initial data.
Responsible Person/Group: faculty/administrative secretary

Student Success - undergraduate
Faculty will track student success by collecting the following data:

1. Internship placement and success.
2. Student awards.
3. Student conference participation.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High
Implementation Description: Internship placement and success (a post internship survey has been developed and will be deployed as a part of course completion). Student awards. Student conference participation (including internal and external).
Responsible Person/Group: Faculty/Administrative Secretary
Detailed Assessment Report
As of: 9/27/2018 12:26 PM EST
2017-2018 Master of Public Administration (MPA)
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The MPA program is designed to provide students with a rigorous program of study preparing policy analysts, public administrators, and public managers with critical decision making skills. Success in the field of public administration, public policy and management is based on developing analytical skills to diagnose problems, synthesize information, and choose among various competing policy options in the course of managing in a dynamic and ever-changing environment.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Program Goals

The program of study prepares students for a variety of career options in a variety of governmental settings (state, federal, and local government administrative and management positions), as well as not-for-profit, private, and non-governmental organizations. A sample of the type of positions that this program prepares students for is shown below:

Specific positions include roles as budget and policy analysts, program managers, city and county administrators, human resource professionals, and a variety of leadership and management positions in health care, education, non-profit, and non-governmental organizations.

SLO 2: Demonstrate leadership and management skills
Students will demonstrate leadership and management skills that drive operational efficiency.

Relevant Associations:

DSU Learning Goal Associations:
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans
SLO 1: Program Outcomes

1. Students will identify, analyze, evaluate and implement research-based public administration practices.

2. Students will demonstrate leadership and management skills that drive operational efficiency.

3. Students will apply principles of finance and budgeting to public and non-profit operations.

4. Students will analyze public policy formulation, interactions, implications, and avenues of impact.

5. Students will formulate and implement new or expanded government/non-profit services and programs using techniques for more effective administration.

Relevant Associations:

Strategic Plan Associations:

**College of Arts, Humanities, & Social Sciences**
1. Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
2. Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
3. To implement effective assessment criteria in each of the content areas within the College of Arts, Humanities and Social Science
4. Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
5. Increase Enrollment through active recruitment efforts by admissions and faculty

**Delaware State University**
1. Ensure all students are provided high-quality programs that are recognized nationally and internationally
2. Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and lifelong learners as measured by well-defined rubrics
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
1.5 Recruit and retain outstanding and engaged faculty
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community
6.1 Enhance the University’s revenues by three percent annually for the next five years.
6.2 Achieve excellence in administrative operational effectiveness and efficiency.
6.3 Continue to support, use, and enhance comprehensive assessment processes throughout all divisions in order to inform decision making
6.6 Create a culture of accountability, high performance and service excellence.

Related Measures:

**M 1: Graduate Project**

Program assessment occur with the graduate project.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**

Graduate Projects are assessed using a rubric. The target is the acceptable level or above.

**Findings (2015-2016) - Target: Met**

So far the program has one graduate. After reflecting on the assessment we will modify the program to allow for earlier determination of the graduate project and assigned faculty will begin prepping the candidate for the graduate project earlier in the program. The student struggled with the amount of time that was available. Materials will also be made available earlier on Blackboard so the student can access at their leisure.
Detailed Assessment Report
As of: 9/27/2018 12:26 PM EST
2017-2018 Mathematical Sciences Department
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The mission of the Department of mathematical Sciences is to provide the people of Delaware and others admitted to the university with opportunities to develop advanced levels of quantitative literacy, skills in mathematical analysis, and advanced skills in the teaching and learning of mathematics.

The purpose of the Mathematical Sciences Department is to provide for the people of Delaware and others who are admitted to the University with opportunities to develop advanced levels of mathematics/quantitative literacy, skills in the use of mathematical analysis and mathematical modeling, and to correspondingly develop advanced skills in the teaching and learning of mathematics. The department of Mathematical Sciences also seeks to make positive contributions to the local community, the state, and the larger community through research in pure, applied mathematics and mathematics education. The Department's mission statement complements the university mission statement by
focusing on meaningful, and relevant education that contributes to both the liberal and professional aspects of higher education.

**Goals without Outcome/Objective Relationships Specified**

**G 1: Students Learning Goals**

All Delaware State University students registered in mathematical science courses will develop proficiency in mathematics. This learning goal is for majors outside of the Department of Mathematical Sciences. Students need to take mathematics courses to satisfy general education requirements. Learning goals for department majors are located under the respective majors.

**G 2: Student Support**

Augment student support systems in the computer lab.

**G 3: Faculty Support**

Strengthen and support research, teaching, and service participation.

**G 4: Program Enhancement**

1. Develop new courses,
2. Revise existing courses,
3. Increase departmental majors for each degree,
4. Increase student participation in scholarly activities, and
5. Strengthen programs (i.e., program revisions, accreditation, etc.).

**Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**SLO 1: Non-math majors will learn and apply mathematical concepts**

All students (particularly non-math majors) will learn, understand, compute, reason about, apply, and engage in mathematics, resulting in at least 70% success on the comprehensive common final examination.

MTSC 075 - Introduction to Algebra
MTSC 101 - Survey Math I
MTSC 102 - Survey Math II
MTSC 105 - Math for Teacher I
MTSC 106 - Math for Teachers II
MTSC 121 - College Algebra
MTSC 122 - Trigonometry
MTSC 125 - Finite Math
MTSC 205 - Math for Teachers III
MTSC 225 - Business Calculus
**Relevant Associations:**
Non-Mathematics majors: Provide general education to help all students understand the role that mathematics plays in today's world.

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
College of Mathematics, Natural Sciences, & Technology
1.3 Improve courses and curricula to maximize student learning, using proven research-based pedagogy and incorporating inquiry-based active-learning strategies.
6.1 Utilize results of assessment with specific measurable targets to guide and drive continuous improvement of programs and processes, to understand trends, and to inform decisions.
6.1 Develop, implement, and utilize objective and credible processes to (a) assess student learning outcomes; (b) review and improve the quality and performance of programs, departments, and the College; (c) monitor progress on the goals in this strategic plan; and (d) report the results.

**Related Measures:**

**M 1:Common Final Exams**

Students performance on individual questions on the common final exam will be evaluated to determine whether or not students are meeting the Course Learning Objectives (CLO).

(Our goals of achieving 70% of SLOs will be vigorously pursued. It is ambitious but with constant improvement in teaching and learning we are likely to meet those goals.)

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target:**
An average pass rate of at least 70% on each final exam question indicates that students are meeting the indicated SLO.

**Findings (2016-2017) - Target: Not Met**
All charts and reports are located in the links below.
Findings (2015-2016) - Target: Not Reported This Cycle
Collection of accurate final exam data proves difficult. Nothing to report.

Findings (2014-2015) - Target: Not Reported This Cycle
Nothing to report.

Findings (2013-2014) - Target: Partially Met
Final Exam Data for 2013-2014.

Findings (2012-2013) - Target: Partially Met

Spring 2013 Final Exam MTSC 075 Introduction to Algebra

Introduction to Algebra (MTSC 075) is a course designed to prepare students to move comfortably to College Algebra, Survey of Mathematics, or Mathematics for Primary and Middle Grade Teachers. Topics include properties of real numbers, equations and inequalities, polynomials, and factoring rational expressions.

In 2013 spring, 330 students were enrolled. From 330 students 244 took
the final. The graph in the next page shows the CLO results. A 70% success rate means that the CLO was met. From the data collected only CLO’s 3 and 8 were successful that is students on average are able to perform simple calculations without need of a calculator and are able to translate a quantitative statement into an algebraic one. CLO’s 1,2,4,5,6,7,9,10 were not met and all of them were below 50%. For CLO designation can be found in the MTSC 075 syllabus. This is concerning as students are for the most part were unsuccessful in doing algebraic operations such as factoring and solving linear equations.

**Spring 2013 Final Exam MTSC 101 CLO Summary**

Survey of Math I (MTSC 101) is a course which surveys several different branches of mathematics including Sets, Logic, Systems of Numeration, Number Theory and Algebra. For many students, this course will be the last mathematics course they take.

There were 224 students registered in 9 math classes in the Spring 2013 semester and 191 students took the final exam and 117 students passed the course. From the graph of "Success rate for each CLO", we can see that the average percent for CLO 3, 5, 6, 7, 13 and 16 were not good. This means that the students did badly in set applications, determining if two statements are logically equivalent, converting decimal numbers into different bases, solving systems of equations and interpreting mathematical models.

**Spring 2013 Final Exam MTSC 102 CLO Summary**

Survey of Math II (MTSC 102) is a course which surveys several different branches of mathematics including The Metric System, Geometry, Mathematical Systems, Consumer Mathematics, Probability and Statistics. For many students, this course will be the last mathematics course they take.

There were 81 students registered in 5 math classes in the Spring 2013 semester and 69 students took the final exam and 66 students passed the course. From the graph of "Success rate for each CLO", we can see that the average percent for CLO 3, 5, 7, 8 and 12 were not good. This means that the students did badly in computing simple and compound interest, determining angle measures and identifying different types of angles, converting between different metric units, determining perimeters and areas of polygons and circles and working with normal distributed populations.

**MTSC 105 - Spring 2013 Summary**

Twenty nine (29) students took the Math for Teachers 1 final exam. Students demonstrated proficiency and were successful in the following areas: 1) identify and using mental strategies, invented strategies, and algorithms (93.10%); 2) identifying or writing addition/subtraction story problems,(72.41%); 3) decoding numeration systems (79.31%); 4) representing multiplication/division problems with part-whole diagrams (93.10%); 5) modeling addition/subtraction and multiplication/division story problems (86.201%, 75.29%); 6) representing addition/subtraction problems with part-whole diagrams (79.31%, 72.41%); 7) identifying or
writing multiplication/division story problems, and modeling (83.53%); 8) assessing the mathematical correctness of children's mathematical problem solving (84.14%); 9) extending the meanings of the four arithmetic operations to negative numbers (76.55%); and 10) represent the same quantity with different based place valued numeration systems (74.48%). This accounts for 50% of the final exam. For all other questions, students demonstrated a lack of proficiency.

MTSC 106 - Fall 2012

Fourteen (14) students took the Math for Teachers 2 final exam. Students demonstrated proficiency and were successful in the following areas: 1) the meaning of rational numbers (100%); 2) identifying the conditions under which the quotient will be greater than 1, less than 1, or equal to 1 (80%); 3) knowledge of the role of the basic measuring unit (BMU) in representing rational numbers and the part-whole interpretation of fractions (98.33%, 95%, 78.33%); 4) creating or evaluating equivalent fractions (91.67%, 76.67%); 5) ordering fractions and explaining how and why the common numerator strategy, common denominator strategy, benchmarking strategy, the distance to/from strategy works and which strategies are most appropriate (efficient) for a given problem (76.67%, 81.11%); and 6) identifying addition/subtraction, or multiplication/division story problems and number sentences (85.33%). These questions accounted for 55% of the final exam. All other questions, students demonstrated a lack of proficiency.

MTSC 110- Spring 2013 Summary and Action Plan

College Algebra A (MTSC 110) is the first part of a two part sequence that lays the foundation for the study of mathematics and its applications. Students that enter MTSC 110 should possess a foundation in the real number system and its properties (especially fractions, decimals, and percents.

In 2013 spring, 33 students took the final and 22 (67%) passed. According to the attached CLO summaries, only CLO 1, 4, 5 and 6 were tested and none of them were met in the final exam and their averages were below 50%. Poor performance in CLO may be due to the lack of hand-on experience that students have during the course of study.

MTSC 111- Spring 2013 Summary and Action Plan

College Algebra B (MTSC 111) is the second part of a two part sequence that lays the foundation for the study of mathematics and its applications. Students that enter MTSC 111 are those who passed MTSC 110 with a C or better. In 2013 spring, 59 students took the final and 40 (68%) passed. According to the attached CLO summaries, only CLO 2, 4-10 and 14 were tested and none of them were met in the final exam and averages were below 50%. Poor performance in CLO may be due to the lack of hand-on experience that students have during the course of study.

MTSC 121 - Spring 2013 Summary and Action Plan

College Algebra (MTSC 121) is a course designed to expose students to polynomials, factoring, rational expressions, complex numbers, rational
exponents, radicals, solutions of equations, linear and quadratic inequalities, functions and graphs, exponential and logarithmic functions, and synthetic division.

In 2013 spring, 301 students took the final and 251 (83%) passed. According to the attached CLO summaries, only CLO 2, 4-10 and 14 were tested and none of them were met in the final exam and averages were below 50% even though the averages were higher compared to those of MTSC 111. Poor performance in CLO may be due to the lack of hand-on experience that students have during the course of study.

MTSC 122 2013 Spring Summary and Action Plan

Trigonometry (MTSC 122) is a course designed to prepare students for calculus. Topics include exponential and logarithmic functions, trigonometric functions and graphs, trigonometric identities, trigonometric equations, inverse trigonometric functions, laws of sine and cosine and applications. In 2013 spring, 100 students took MTSC 122 course and 94 students took the final exam. There are 90 students who passed the course. From the graph of “Success rate for each CLO”, we can see that the average percent for CLO 5, 6, and 7 is not good. This means that the students did badly in solving equations involving inverse trigonometric functions, identifying key features of graphs of trigonometric functions and deriving trigonometric identities and solve trigonometric functions. To improve these area, the students need to do homework and do more practice. Spring 2013-Math 125 Analysis: The Students did well on the SLO's overall. Their scorrs on the CLO's are a bit mor erradic. This may be a reflaction of their inability to apply the SLO's consistantly, or it may be a reflection of their level of understanding of the CLO's. Action Plan. Many students struggle in finite mathemactics because they have weak foundation from college algebra. Results of the pre-test that are administered to students in 125 will be shared with the 121 coordinator. The hope is that these weaknesses can be addressed in 121 and result in better perfomance in 125.

MTSC 125 2013 Spring Summary and Action Plan

Analysis: The Students did well on the SLO's overall. Their scores on the CLO's are a bit more erratic. This may be a reflection of their in ability to apply the SLO's consistently, or it may be a reflection of their level of understanding of the CLO's

MTSC 205 - 2012-2013 Academic Year

Thirty three (33) student took the Math for Teachers 3 final exam (19 Fall, 14 Spring). Students consistently demonstrate proficiency and were successful in the following areas: 1) Develop and justify conjectures about the areas of a simple, closed figures that have the same perimeter, and the perimeters of a simple, closed figures that have the same area (82.45%, 89.29%); 2) Demonstrate competencies in explaining, identifying, and representing translation transformation (94.74%, 100%), and dilation transformation with scale factors (96.84%, 97.14%); 3) Demonstrate knowledge of the properties of 3D solids (polyhedra), including patterns in
the number of faces, vertices, and edges, and represent them as 2D nets (81.58%, 76.79%); and 4) Demonstrate knowledge of cube models of buildings given 2D representations of the buildings, such as the base plan or set of building plans, and constructing multiple buildings from a given set of building plans (74.56%, 71.43%).

Students demonstrated a lack of proficiency in F2012, and improved by demonstrating proficiency in Spring 2013 in the following areas: 1) Demonstrating competencies with Venn Diagrams, sums of interior angles, and the relationship of faces, vertices, and edges for polygons (66.22%, 69.64%); 2) Demonstrate competencies in developing conjectures about the number of line symmetries and/or degrees of rotational symmetry in polygons (35.52%, 76.79%); 3) Demonstrate knowledge of recursive and function relationship and connect verbal, symbolic, numerical, and graphical representations for a particular situation; and knowledge of rate of change and connect verbal, symbolic, numerical, and graphical representations for a particular situation (52.19%, 69.64%).

All other areas students consistently demonstrated lack proficiency.

**MTSC 225 - 2012-2013 Academic Year:**

One hundred and one (101) students took the Business Calculus final exam (Fall 43, Spring 58). Students consistently demonstrate proficiency and were successful in solving instantaneous rate of change problems (Fall 2012 - 84.13%, 73.43%; Spring 2013 - 76.67%, 73.21%) and calculating derivative (Fall 2012 - 85.41%, 70.57%; Spring 2013 - 78.75%, 80.95%). Students consistently lack proficiency in finding derivatives of functions using the limit definition of a derivative (Fall 2012 - 56.73%, 55.07%; Spring 2013 - 68.33%, 54.46%), integration (Fall 2012 - 57.05%, 35.07%; Spring 35.37%, 61.52%), and graphing functions (Fall 2012 - 61.54%, 16.67%; Spring 2013 - 21.94%; 50.59%). In all other areas, proficiency appears to depend on the instructor or the semester the material was taught.

**MTSC 253 2013 Spring Summary and Action Plan**

Calculus III (MTSC 253) is the third of a three-course sequence in calculus—a mathematical tool for analyzing changes in physical quantities. It includes vectors and parametric equations, solid analytic geometry and the calculus of several variables. Because calculus is applied in so many fields it is important that the students develop a sense of the wide range of applications of calculus. The problems and projects assigned in this course provide students with the opportunity to experience mathematics as an interdisciplinary activity. In 2013 spring, 11 students took MTSC 253 course and 11 students took the final exam. There are 11 students who passed the course. From the graph of "Success rate for each CLO", we can see that the average percent for CLO 2, 6, 7, 8 and 12 is not good. This means that the students did badly in finding the absolute maximum and minimum for two variables functions, and solving the problem with double and triple integrals. The part reason is that most of them are slow to solving the questions and can't remember all materials in final exam.

Findings (2011-2012) - Target: Not Met

On a majority of test questions, the average pass rate is below 70%, indicating that students are not successfully meeting the corresponding CLOs.

SLO 2:Maintain or increase mathematics lab usage for tutoring
Maintain or increase the number of students from various disciplines that use the lab for tutoring and coursework completion.

Relevant Associations:

DSU Learning Goal Associations:
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Mathematics, Natural Sciences, & Technology
1.2 Develop and implement support and enrichment strategies that enable all interested students, even those who enter the University with weak preparation, to succeed as majors in the College and reach their career goals.

Related Measures:

M 3:Mathematics Tutors
The number of Mathematics Laboratory tutors that are Math; Math ED and Math & Computer Sciences Major with a 3.5 GPA or higher and are responsible students.
Source of Evidence: Activity volume

**Target:**
Increase (by 10%) or maintain the number of eligible Mathematics Tutors from the previous year.

**Findings (2016-2017) - Target: Met**
During 2016-2017, we hired 6 math tutors total to cover MTSC 075 through MTSC 252 Calc II. Tutors are hired/rehired each year.

**Findings (2015-2016) - Target: Met**
During 2015-2016, we hired 6 math tutors to cover MTSC 075 through MTSC 252 Calc II.

**Findings (2014-2015) - Target: Met**
During 2014-2015, we hired 6 math tutors to cover MTSC 075 through MTSC 252 Calc II.

**Findings (2013-2014) - Target: Met**
During 2013-2014, we hired 6 math tutors to cover MTSC 075 through MTSC 252 Calc II.

**Findings (2012-2013) - Target: Met**
During 2012 - 2013 academic year, Seven (6 in Fall, 7 in Spring) responsible undergraduate and graduate math student-tutors were employed. All Mathematics Laboratory tutors must be Math; Math ED and Math & Computer Sciences Majors with at least a 3.5 GPA. This is a 16.6% increase from the 2011-2012 academic year.

**SLO 6: Seek and maintain NCATE Accreditation**
Seek accreditation of Masters in Mathematics Education program. Maintain Secondary Mathematics Education Bachelors program accreditation.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
College of Mathematics, Natural Sciences, & Technology
1.3 Improve courses and curricula to maximize student learning, using proven research-based pedagogy and incorporating inquiry-based active-learning strategies.
1.8 Maintain accreditations and seek nationally recognized accreditations or certifications wherever they would be advantageous.
4.2 Renovate, upgrade and expand laboratory space and infrastructure to support and enable high quality instruction and forefront research.
4.6 Contribute interesting, engaging, and fun out-of-class enrichment activities featuring mathematics, science, engineering, and technology to enhance the living-learning environment on campus and involve student science clubs.

6.1 Utilize results of assessment with specific measurable targets to guide and drive continuous improvement of programs and processes, to understand trends, and to inform decisions.

6.1 Develop, implement, and utilize objective and credible processes to (a) assess student learning outcomes; (b) review and improve the quality and performance of programs, departments, and the College; (c) monitor progress on the goals in this strategic plan; and (d) report the results.

Related Measures:

**M 6: CAEP Accreditation NCTM SPA Report**
Submit CAEP Accreditation NCTM SPA Report for BS Mathematics Education program.

Source of Evidence: External report

**Target:**
Receive National Accreditation.

**Findings (2016-2017) - Target: Met**
NCTM SPA report submitted and is under review.

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

**O/O 3: Hire New Faculty**

To minimize the long term use of adjuncts, increase faculty strength and expertise by hiring more productive full time faculty members.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Mathematics, Natural Sciences, & Technology
5.2 Recruit and develop faculty to be effective and inspiring teachers and mentors, highly productive researchers, and sought-after colleagues and collaborators while contributing to their departments, the College, the University, the state, and their professional disciplines.

**Related Measures:**

**M 5: New Hires**
Conduct a search for two new tenure track Assistant Professors. Candidates must
demonstrate strong potential for teaching, research and service.

Source of Evidence: Benchmarking

**Target:**
Hire two new Tenure Track Assistant Professors.

**Findings (2016-2017) - Target: Not Met**
We advertised for 3 new positions - 1 Statistician, 1 Math Educator, and 1 Applied Mathematician. We were unable to find a suitable candidate for the remaining positions, but were able to hire two Visiting Assistant Professor for a 1-year temporary contract. Dr. Yanan Xu is holding the Statistician position, and Dr. Matthew Bobrowsky is holding the Math Educator position.

**Findings (2015-2016) - Target: Partially Met**
During 2015-2016 academic year, we advertised for 1 Lecturer, 1 Statistician, 1 Applied Math, and 1 Math Ed position. We hired 1 Lecturer - Dr. Sharon Smith. We were unable to find a suitable candidate for the remaining positions.

**Findings (2014-2015) - Target: Met**
Advertised for 1 Assistant Professor in Pure Mathematics. Dr. Onur Yavuz was hired to fill the position.

**Findings (2013-2014) - Target: Not Reported This Cycle**
Nothing to report.

**Findings (2012-2013) - Target: Met**
The following faculty members are new hires...
Yi Ling (Lecture Professor), with August 2012 start date. Matthew Tanzy (Assistant Professor - Tenure Track), with August 2013 start date. Sokratis Makrogiannis (Assistant Professor - Tenure Track), with August 2013 start date.

**Findings (2011-2012) - Target: Met**
The following faculty members began employment August 2011. Pablo Suarez (Assistant Professor), Delayne Johnson (Assistant Professor in Mathematics Education), Abhinandan Chowdhury (Visiting Assistant Professor), and Don. Udita Katugampola (Visiting Assistant Professor).

O/O 4: Increase enrollment of Undergraduate Majors
To increase the enrollment of Mathematics, Mathematics Education, and Mathematics with Computer Science majors seeking Bachelor's degrees. Retain majors for graduation.

Relevant Associations:

Strategic Plan Associations:
College of Mathematics, Natural Sciences, & Technology
1.4 Strengthen advising for all majors in the College (and pre-health professionals, regardless of their academic majors) to optimize preparation for their desired post-graduate career paths.
3.3 Continue and increase partnerships and alliances with businesses and efforts to assist and attract underserved populations in the state.
7.1 Increase the percentage of freshmen declared majors in the College who enroll as sophomores to a total of 90% in four years by focusing on retaining declared majors and by attracting undeclared majors.
7.2 Ensure the number of transfers into the College equals or exceeds the number transfers out of the College each year.
7.3 Recruit and track transfer students with strong science/mathematics backgrounds, especially Associates degree recipients from Delaware Technical and Community College.
7.4 Increase DSU's visibility and appeal among high school students with strong preparation in mathematics and science.

O/O 5: Increase enrollment of Graduate Majors
Increase enrollment in M.S. program in Mathematics, M.S. Program in Mathematics Education, and Ph.D. program in Applied Mathematics. Retain majors for graduation.

Relevant Associations:

Strategic Plan Associations:
College of Mathematics, Natural Sciences, & Technology
1.4 Strengthen advising for all majors in the College (and pre-health professionals, regardless of their academic majors) to optimize preparation for their desired post-graduate career paths.
1.10 Improve the marketing and communication of our degree programs, including an attractive and informative web page.
3.3 Continue and increase partnerships and alliances with businesses and efforts to assist and attract underserved populations in the state.
7.5 Ensure adequate financial support and on-campus, major-related employment (research, tutoring, etc) is available for every student with financial need in the College.
7.6 Provide paid graduate assistantships, tuition waivers, and benefits to full-time graduate students in all programs in the College.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Laboratory
More students need to be encouraged to take advantage of the resources and support systems that have been provided, particularly the Mathematics Laboratory.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Implementation Description: Lab activities are becoming a culture of learning for those who would otherwise not like mathematics.
Responsible Person/Group: The Lab Supervisor and student tutors.
Additional Resources Requested: Consistent implementation of Lab fees to sustain the functioning of the Mathematics Laboratory in terms of equipment and updates provide indispensable resources.

Increase Faculty Members
Hire more full time faculty, create long term teaching positions to minimize the use of adjuncts.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Projected Completion Date: 08/31/2011

New faculty search
The search will continue for one Mathematics Education Assistant Professor, and one (non-visiting) Assistant Professor in Applied or Pure Mathematics and one lecturer.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

CLO Targets
Instructors must be informed of students' performance on CLOs to improve instruction in those areas. Instructors should aim for new targets of at least a 10% increase on students' performance for CLOs.

Established in Cycle: 2011-2012
Implementation Status: Planned
New search
The search will continue for one Mathematics Education Assistant Professor, and additional Assistant Professors in Applied or Pure Mathematics.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: New Hires | Outcome/Objective: Hire New Faculty

Revise Target
Course instructors need to review the CLOs that students are not successful with, and revise the lesson to help students understand the material. Future targets will address at least a 10% increase on future final exam questions for the indicated CLO.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Common Final Exams | Outcome/Objective: Non-math majors will learn and apply mathematical concepts

Responsible Person/Group: Course coordinator

Study Groups
Encourage majors to form study groups to develop their mathematics skill, form good professional and study behaviors, and improve their overall GPA. Advisors and peers should recommend eligible students for tutoring positions in the lab.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Responsible Person/Group: Advisor
Course Modifications

Suggesting course redesign to help students demonstrate quantitative reasoning skills. This includes devising different opportunities or teaching practices for students to interpret, calculate, and apply mathematics. Course redesign should be piloted and modified over a 2 year period for each course.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Responsible Person/Group: UCC, Course Coordinators, Instructors

Maintain student participation in professional development and research

The department will continue to provide funding for students to attend professional development activities, which are chaperoned by faculty. Faculty need to increase undergraduate participate in research activities. The undergraduate curriculum committee and the Student committee should brainstorm ways to increase participation and share with faculty at the Fall departmental meeting.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High
Implementation Description: Brainstorming meeting with both UCC and Student Committee.
Responsible Person/Group: Department Faculty
Additional Resources Requested: Funding for conference travel, release time to do research with students.

Next Search

The search will continue for one Mathematics Education Assistant Professor, and additional Assistant Professors in Applied or Pure Mathematics.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: New Hires | Outcome/Objective: Hire New Faculty
**Track and maintain accreditation status**
Continue to collect rubric data and report findings for NCATE reports to maintain accreditation status.

Established in Cycle: 2012-2013  
Implementation Status: Planned  
Priority: High  
Responsible Person/Group: NCATE Liaisons - Nicola Edwards-Omolewa & Delayne Johnson

**Track Graduate Majors**
Get an accurate list of new and existing majors to be housed by the department.

Established in Cycle: 2012-2013  
Implementation Status: Planned  
Priority: High  
Implementation Description: Advisee listing should include name, D100#, start date, projected date of graduation, year of graduation, post graduation employment, and advisor's name.  
Responsible Person/Group: Advisors submit to secretary.

**Tracking Majors**
Get an accurate list of new and existing majors to be housed by the department.

Established in Cycle: 2012-2013  
Implementation Status: Planned  
Priority: High  
Implementation Description: Advisee listing should include name, D100#, start date, projected date of graduation, year of graduation, post graduation employment, and advisor’s name.  
Responsible Person/Group: Advisors submit list of advisees to secretary.

**Tutor Training**
Students may be reluctant to use the computer lab if they feel the tutors are not prepared to teach the content, if they perceive that the tutors are rude or disrespectful, or if the tutors are too busy working with other students. The action plan would be to provide training for tutors in the area of communication, and improved mathematics content knowledge. Maintain lead tutor that can train other tutors with teaching mathematics. Hire more tutors (graduate students preferably) to meet the demand for tutoring.

In the future, we can track student performance in mathematics classes after receiving tutoring in the lab to determine tutoring effectiveness and lab usefulness.
Established in Cycle: 2012-2013  
Implementation Status: Planned  
Priority: High  
Implementation Description: Implement during Fall 2013  
Responsible Person/Group: Min Gibson

Tutoring & Lesson Revision.
First, recommendation is that students work more closely with tutors and attend more office hours. It is imperative that students practice math outside of the classroom by doing their HW and or consulting the instructors. The help is readily provided and for the most part students do not seem to take advantage of it. Second, recommendation is to emphasize areas of weak mathematical understanding during class time. This includes determining alternative ways to teach the material to help students better understand the topic.

Established in Cycle: 2012-2013  
Implementation Status: Planned  
Priority: High  
Relationships (Measure | Outcome/Objective):  
Measure: Common Final Exams | Outcome/Objective: Non-math majors will learn and apply mathematical concepts  
Implementation Description: Implementation begins Fall 2013  
Responsible Person/Group: Course Coordinators/Instructors  
Additional Resources Requested: Consistently schedule frequent/regular meeting times to make course adjustments.

Improve Coordinate Course Final Exam Data Collection
Course Coordinators need to improve describing measure, targets, findings and action plans. Findings should describe the overall average for each CLO, the assessment question, where students were successful and unsuccessful.

Established in Cycle: 2015-2016  
Implementation Status: Planned  
Priority: High  
Responsible Person/Group: Course Coordinators

Annual Report Section Responses

Executive Summary (1-2 pages)

DEPARTMENT OF MATHEMATICAL SCIENCES
2017 - 2018 DEPARTMENTAL ANNUAL REPORT

EXECUTIVE SUMMARY

The Department of Mathematical Sciences offers the following five degrees: BS in Mathematics, BS in Mathematics with Data Analytics, BS in Mathematics Education, MS in Mathematics (Pure and Applied Math), and PhD in Interdisciplinary Applied Math and Mathematical Physics (joint program with Department of Physics and Engineering).

The department had 14 full-time faculty members at the start of the academic year. This included 9 tenured/tenure-track faculty members, 3 Lecturers, and 2 Visiting Assistant Professors (1 with a non-renewable 1-year contract). In additions there were 6 adjunct instructors and 2 doctoral students teaching throughout the 2017-2018 academic year.

A search was conducted for 4 full-time faculty members in the areas of Statistics, Mathematics Education, Applied Mathematics, and Pure Mathematics. Six on-campus interviews were conducted after Skype interviews were complete. Candidates were selected and accepted for the Mathematics Education, Applied Mathematics, and Pure Mathematics positions. No new faculty members were hired for the Statistics position due accepting position at other institutions, being underqualified, or demonstrating unacceptable teaching practice for our population of underprepared students.

Teaching: The total number of courses offered was 139 (72 Fall 2017; 67 Spring 2018). This is a reduction compared to last year of 163 courses. This is largely due in part to switching MTSC 075 Introduction to Algebra to an online only course with capacity of 60 students per course. In addition, all course offerings were reduced to improve efficiency, increase/meet faculty workload capacity, and meet the needs of the students. Graduate courses offerings are now on a 2-year cycle, instead of a 1-year cycle. Additional, summer course offerings were also reduced.

Courses offered in Fall 2017 included 116 undergraduate courses, 3 master's courses, 2 doctoral courses, and 6 doctoral thesis/sustaining courses. Course offered in Spring 2018 included 55 undergraduate courses (50 face-to-face; 5 online), 3 master's courses, 1 master's thesis courses, 2 doctoral courses, and 6 doctoral thesis/sustaining courses.

The Mathematics Teacher Institute (MTI) was implemented for the second time in Summer 2017. This 4-day mathematics professional development opportunity focused on best teaching practices, equity, and problem-based learning (PBL) for mathematics and science instructors. Faculty collaborated to create interdisciplinary PBL activities for College Algebra and Trigonometry courses.

There were no changes to the department curriculum that required Faculty Senate or Board of Trustee approval.

Dr. Delayne Johnson and the Undergraduate Curriculum Committee (UCC) were charged by Dr. DeLauder and the Administrative Council with creating a pilot college credit remedial course to be implemented in Summer 2018 and Fall 2018. They submitted 3 recommendation. Currently, no feedback or status has been provided.

The UCC explored the use of calculators in the general education courses. They also modified and the department approved the CLOs for MTSC 122 Trigonometry, MTSC 251 Calculus I, MTSC 252 Calculus II, and MTSC 253 Calculus III.

The Graduate Committee (GC) accepted 6 new graduate students to the master's and
PhD programs. Of the students accepted last year, 4 completed 1 year of course work, and 1 deferred enrollment until Fall 2018. The GC also updated the Program Learning Goals, the SLOs and syllabi for the PhD program.

All department syllabi are updated and uploaded to the department Blackboard page.

Finally, the Administrative Committee created the Chair-Peer and Peer-Peer Teaching Evaluation in Fall 2017, and were implemented in Spring 2018. Then, these documents were modified in Spring 2018 to more accurately measure the Teaching, Service, and Research criteria. In Spring 2018, the Adjunct/TA, and Online Teaching Evaluations were created. A Self-Review document accompanies the Online Teaching Evaluation. All of the documents received department approval and were uploaded to the department Blackboard page.

Finally, Dr. Tanzy sponsored a weekly Friday Mathematics Problem Solving group with participation from 5 undergraduate students.

Research and Scholarly Activities: Faculty attended various local, regional, national, and international conferences. Faculty conducted research with graduate students. Faculty presented at 14 Professional Meetings and Seminars, published 5 (out of 9) research articles and book chapters, and obtained 4 (out of 7) grants. Graduate students participated in 6 poster/presentation sessions at local and regional conferences. Two PhD students co-authored 2 publications. One MS student was accepted to 2 summer internship opportunities (NASA and Air Force Research Laboratory)

Service: Dr. Nicola Edwards served on the DDOE P-20 subcommittee for Mathematics.

Drs. Delayne Johnson, and Nicola Edwards modified and resubmitted the March 2018 CAEP SPA report for the BS Mathematics Education program accreditation. The report that was submitted in 2017 received "Further development required". Reviewers stated that "The program includes a strong series of early field experiences culminating in an extended student teaching semester. Coursework appears strong.", but we did not meet the 80% Met requirement for SPA Standards. Rubrics were revised to address the short fall in the March 2018 submission. The submission did not include data, therefore, the highest rating that can be received is "Nationally recognized with conditions".

Faculty served on various national, regional, local, university, college, and department committees.

Departmental Students and Graduates: There are 21 undergraduate students (13 Mathematics and 8 Mathematics Education) and 18 graduate students (3 MS students and 15 PhD students). Six students graduated with a BS degree (3 Mathematics and 3 Mathematics Education), one student graduated with an MS in Applied Math, and three students graduated with a PhD from Summer 2017 - Spring 2018.
1. Teaching Faculty:
   a. Full-time Tenured: 5
      i. Edwards, Nicola (Associate Professor, chairperson)
      ii. Liu, Jinjie (Associate Professor)
      iii. Lott, Dawn (Professor)
      iv. Shahin, Mazen (Professor)
      v. Shi, Xiquan (Professor)
   b. Full-time Tenure Track, Not Tenured: 4
      i. Johnson, Delayne (Associate Professor)
      ii. Makrogiannis, Sokratis (Associate Professor)
      iii. Tanzy, Matthew (Assistant Professor)
      iv. Yavuz, Onur (Assistant Professor)
   c. Visiting Full-time, Not Tenure Track: 2
      i. Bobrowsky, Matthew (one year non-renewable)
      ii. Xu, Yana
   d. Lecturers:3
      i. Carr, Ellen
      ii. Girgis, Laila
      iii. Smith, Sharon
   e. Adjuncts:6
      i. Assiongbong, Kankoe
      ii. Bediako, Phanuel
      iii. Juracka, Amal
      iv. Pendleton, Vickie
      v. Steenhagen, Polly
      vi. Wei, Wei
   f. Teaching Assistants: 2 teaching
i. Alcantara, Jose
ii. Zhou, Rong

2. Staff:
   a. Administrative Secretary: 1
      i. Darlene F. Turner
   b. Computer Lab Technician: 1
      i. Min Gibson
   c. Graduate TA (non-teaching/Lab tutors)
      i. Emiola, Iyanuoluwa (Miracle)
      ii. Nour, Mutasim
      iii. Salih, Mohamed
   d. Undergraduate Lab Tutors: 6
      i. Bannavti, Moala
      ii. Morrell, Dominic
      iii. Robeson, Samantha
      iv. Sanchez, Michael, IV
      v. Turner, Travis

3. Undergraduate Students
   a. Mathematics Majors: 13 total
      i. 4 Freshmen,
      ii. 0 Sophomores,
      iii. 2 Juniors,
      iv. 7 Seniors (2 graduated)
   b. Mathematics Education Majors: 8 total
      i. 0 Freshmen,
      ii. 2 Sophomores,
      iii. 1 Juniors,
      iv. 5 Seniors (3 graduated)
4. Graduate Students

a. Master's Level: 3 total (1 graduated)

b. PhD Level: 15 total (3 graduated)

5. Labs:

a. Equipment:

i. ETV 128 - 1 Smartboard (upgraded), 1 HP printer, and 40 computers (18 of them have Windows 10 and Office 16, 22 of them have Windows 7 and Office 16).

ii. ETV 131 - 8 computers with Windows 10 and Office 16.

iii. ETV 134 - 1 Laptop, 1 Smartboard (upgraded), 1 document camera, various hand-on mathematical tools.

b. Mathematics Software:

i. ETV 128 & ETV 131 a total 48 computers have following math software:

ii. Matlab 2016

iii. Winedit 9

iv. Maple 2015

v. Mathematica 2017

vi. Sketch Pad 4.07

Unit(s) Initiatives accomplished in this cycle

DEPARTMENT OF MATHEMATICAL SCIENCES

2017 - 2018 DEPARTMENTAL ANNUAL REPORT

Unit Initiatives

1. The first initiative was the creation mathematics specific Teaching Observation forms for Chair to Peer, Peer to Peer, Adjunct/TA, and Online instructors.

The Chair to Peer and Peer to Peer evaluation were created by the MTSC Administration Committee (Mazen Shahin, Matthew Tanzy, and Nicola Edwards). Evaluations aligned Teaching, Service, Research, and Collegiality criteria as described by the CBA. Faculty are awarded a point for meeting the criteria, and zero points for not meeting the criteria. The Teaching criteria includes Instructional Strategies, Blackboard, Assessments, Group Work, Classroom Management, and Responsibilities. Total points would categorize faculty into one of 4 categories: [0-25%) = Standard Not Met (Unacceptable); [25% - 50%) = Developing Toward Standard (Basic); [50% - 75%) =
Meets Standard (Proficient); and [75% - 100%] = Exceeds Standard (Distinguished). These Observation forms were approved by the department in Fall 2017 and were implemented in Spring 2018.

Based on evaluation result, the Chair to Peer, and Peer to Peer Observation forms were modified to more accurately categorize faculty performance. In particular, the categories were updated to more accurately classify those faculty that exceed the teaching expectations: [0% - 40%) = Standard Not Met (Unacceptable); [40% - 70%) = Developing Toward Standard (Basic); [70% - 85%) = Meets Standard (Proficient); and [85% - 100%]. The Service criteria were updated to include items that appeared on the Pre-observation form, but were not measured on the Observation form. Additional teaching components were included in the Instructional Strategies section. These updates were approved by the department at the end of Spring 2018 and will be implemented in Fall 2018.

A new Adjunct/TA Teaching Observation form was created and approved by the department in Spring 2018. This form utilized components from the Chair to Peer evaluation that were specifically relevant to Adjuncts and TAs. Thus, these forms do not include the service and research criteria.

Finally, a new Online Teaching Observation form and Self-Review form was created to assess those instructors that only teach online courses for the department. These forms were adapted from "A Faculty Evaluation Model for Online Instructors: Mentoring and Evaluation in the Online Classroom" Online Journal of Distance Learning Administration, Volume VIII, Number III, Fall 2005. These forms were necessary as MTSC 075 Introduction to Algebra, and MTSC 121 College Algebra have online course sections. This form has not been utilized to date and it is expected that they will need to be modified to better measure our version of online courses with a large population of 60 students per course. It may not be feasible for an online instructor to successfully complete all of the components on the evaluation in an effective manner.

2. The second initiative was to create a new departmental assessment timeline to aid faculty in more efficient and relevant reporting. The timeline was created by the MTSC Administration Committee and approved by the department in Fall 2017 and implemented in Fall 2017. In previous years we reported on all courses offered each semester. To reduce the amount of reports, we streamlined the reporting expectations by separating all department courses into 4 sections. For courses in each section, an assessment report would be created. Faculty would then pick 10 CLOs to report on. Directions that were established are as follows:

**Assessment timeline.** Assessment reports (formally known as Weaveonline reports) will be collected each semester according to the schedule below.

a. Final Exam Spreadsheet must be created for ALL courses each semester.

b. Begins Fall 2017 as Year 1: Semester 1 (The reporting cycle repeats).

xxxC = Coordinated Course
<table>
<thead>
<tr>
<th>Year: Semester</th>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y1: S1 (Fall 2017 + 2n)</td>
<td>075C, 105C, 110C, 122C, 205C, 213M, 341M, 403M, 411M</td>
</tr>
<tr>
<td>Y2: S1 (Fall 2018 + 2n)</td>
<td>107C, 121C, 205C, 241CM, 253M, 351M, 403M, 451M, 461M</td>
</tr>
</tbody>
</table>

c. MTSC 498 is a capstone course and will be measured using the General Education AtC rubric only.
d. Courses that do not appear on the list above are to be measured each time the course is offered. This includes both undergraduate and graduate courses.
e. All SLOs must be assessed for Major Courses. Assess at least those CLOs that provide clear connections to SLOs. At least 10 CLOs should be measured for Coordinated Courses. You may continue to measure the same CLOs in future assessment rounds if the performance has not met the Target range.

3. The third initiative was to hire 4 full-time tenure-track faculty members to fill the vacant departmental faculty lines. The positions were Mathematics Education, Statistician, Applied Mathematician, and Pure Mathematician. Six on-campus interviews were conducted after Skype interviews were complete. Candidates were selected and accepted for the Mathematics Education, Applied Mathematics, and Pure Mathematics positions. No new faculty members were hired for the Statistics position due accepting position at other institutions, being underqualified, or demonstrating unacceptable teaching practice for our population of underprepared students.

4. The fourth initiative was to resubmit the CAEP NCTM/SPA Accreditation report for the BS Mathematics Education program. Drs. Delayne Johnson, and Nicola Edwards modified and resubmitted the March 2018 CAEP SPA report for the BS Mathematics Education program accreditation. The report that was submitted in 2017 received "Further development required". Reviewers stated that "The program includes a strong series of early field
experiences culminating in an extended student teaching semester. Coursework appears strong.", but we did not meet the 80% Met requirement for SPA Standards. Rubrics were revised to address the short fall in the March 2018 submission. The submission did not include data, therefore, the highest rating that can be received is "Nationally recognized with conditions". Results will be available in August 2018.

5. The fifth initiative was to update course CLOs for undergraduate and graduate courses. The purpose was to clearly define the course content and to make it easier to align the final exams with the CLOs. The Undergraduate Curriculum Committee (UCC) updated CLOs for MTSC 122 Trigonometry, MTSC 251 Calculus I, MTSC 252 Calculus II, and MTSC 253 Calculus III. The Graduate Committee (GC) updated CLOs for MTSC 500 Foundations, MTSC 562 Real Analysis, MTSC 571 Complex Analysis, MTSC 651 PDE, MTSC 661 Numerical Analysis, MTSC 821 Scientific Computation; MTSC 852 Pattern Recognition, MTSC 897 Numerical Analysis, MTSC 871 Complex Analysis, and MTSC 887 Image Processing.

6. The sixth initiative was to modify the Program Learning Objectives for the PhD program.

New PLGs

I. Students will be able to create advanced and fully detailed proofs in a specialized area.

II. Students will be able to assess and synthesize mathematics research literature to solve problems (in coursework) or develop a research plan and incorporate it into their research.

III. Students will be able to present a mathematics paper to a mathematically informed audience (i.e., professional mathematicians).

IV. Students will make an original contribution to the discipline by writing a publishable quality research document.

V. Students will be able to analyze advanced mathematical problems through the use analytical and computational techniques.

Old PLGs

I. Students will become experts at creating advanced and fully detailed proofs in a specialized area.

II. Students will be able to assess and synthesize mathematics research literature to develop a research plan and incorporate into their research.

III. Students will be able to present a mathematics paper to mathematically informed audience (i.e., professional mathematician).

IV. Students will make an original contribution to the discipline by writing a publishable quality research document.

7. The seventh initiative was to continue faculty training for assessment reporting. Dr. Sharon Smith conducted the Blackboard training for gradebooks, and setting up groups in Fall 2017. Dr. Nicola Edwards conducted Final Exam Proctoring Training in Fall 2017 and Spring 2018.
8. The eighth initiative was to replace and upgrade the Smartboards in the Math Computer Lab ETV 128, and the Mathematics Education Lab ETV 134. The new smartboards no longer need a projector. The previous smartboard's projectors malfunctioned causing ink to appear dotted and the lens was delicate and easily scratched.

9. The ninth initiative was to refurbish Grossley Hall 105 and 106 to make them into classrooms suitable for an active learning mathematics environment. These classroom have poor air quality, windows that allow wasp and bees to enter the room, broken student desk, and inadequate board space. Quotes are still in the process of being obtained to replace the HVAC in the two rooms. However, the time delay in obtaining those quotes has severely delayed the remodeling of the classrooms. The remodel is funded by Title III and by the NSF Targeted Infusion Grant - Cyber Infused Mathematics Initiative. The funds will install TVs, computers, and desk in the room once the HVAC has been installed.

10. The tenth initiative was to hire a department administrative secretary. We hired a brand new DSU employee who started working in Spring 2018. The new secretary spent the semester in training.

11. The eleventh initiative was to retain the department as a single unit in the STEM College (CAST - College of Agriculture, Science, and Technology). The university restructuring plan developed a new initiative where the Department of Mathematical Sciences would remain in the STEM College, but a new entity would be established to address the General Education mathematics courses. No details have been established to date. Faculty will potential have dual appointments, the chair will be housed with the department in the STEM college, and a new Program Directory positions may be established for the new Mathematics Literacy component in the General Education College (CHESS - College of Humanities, Education, and Social Sciences).

Unit(s) Honors/Awards and Achievements

DEPARTMENT OF MATHEMATICAL SCIENCES

2017 - 2018 DEPARTMENTAL ANNUAL REPORT

Honors/Awards and Achievements

Grants: During 2017-2018, faculty members submitted 3 grants, which were not funded or pending funding. They also have 6 grants (3 new).

New Grants:

Liu, Jijie (Co-PI), NSF, Mathematical Analysis and Numerical Modeling of Optical Solitons in Nonlinear Materials and Metamaterials (pending)

Shahin, Mazen (co-PI, Project Direct), Fall 2018 - Spring 2020. The Bridge to the Doctorate (BTD) Cohort XVI to start on the Fall 2018 at DSU. $1,070,000. A $32,000 stipend per year for 12 students, plus free tuition (in-state fees), medical insurance and travel funds.

Shahin, Mazen (PI), 2018 International Science and Technology Academy for Research Scholars (I-STARS). This program will allow 10 STEM undergraduate students to conduct research at the UTP University of Science and Technology in Bydgoszcz, Poland in the period. May 19, 2018 - June 19, 2018. The grant is $26,500 and funding agency is the National Science Foundation (NSF) through Philadelphia Alliance for
Minority Participation (Philadelphia AMP).

Shahin, Mazen (co-PI, and Project Director), We obtained the fund for Year 4 (7/1/2017 - 6/30/2018) of Phase V (2014 - 2019) of Greater Philadelphia Region Louis Stokes Alliance for Minority Participation (Philadelphia AMP).

Existing Grants:

Edwards, N. (PI). NSF Noyce Grant years 2012-2017, $1,200,000, with 1 year no cost extension.

Johnson, D. (PI). DSU, Center of Teaching and Learning Mini Grant. Use of Video Analysis in Mathematics for Teachers courses, $1000.

Shahin, Mazen (PI), 2017 International Science and Technology Academy for Research Scholars (I-STARS). This program allowed 10 STEM undergraduate students to conduct research at the UTP University of Science and Technology in Bydgoszcz, Poland in the period May 20, 2017 - June 20, 2017. The grant was $26,500 and the funding agency was the National Science Foundation (NSF) through Philadelphia Alliance for Minority Participation (Philadelphia AMP).

Wilson, C. (PI), Johnson, D (CoPI), Kalavacharla, V. (CoPI), Parroti, K. (CoPI), Poe, M. (CoPI). Transforming Education through Active Learning, National Science Foundation (NSF) Historically Black Colleges and Universities Undergraduate Program (HBCU-UP) Implementation Project. (Funded $1,800,000; 2017-2022).

Awards:

Dr. Jinjie Liu was awarded the CMNST Research Excellence award (May 2018)

Mohamed Salih was awarded the CMNST Teaching Assistant Excellence award (May 2018)

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

DEPARTMENT OF MATHEMATICAL SCIENCES

2017 - 2018 DEPARTMENTAL ANNUAL REPORT

Strategic Goals

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

The following strategic goals and student learning outcome will be assessed next year.
1. Writing clear action plans, implementing action plans, and reporting action plan findings. Data for this goal will be collected at the undergraduate course level weaveonline reports.

2. Create Math and Proof rubrics for graduate-level courses that align with the MS and PhD SLOs. Data for this goal will be collected upon departmental approval of the rubrics during Fall 2018 and will be implemented for graduate courses during Spring 2019. Data will be reported in the course level weaveonline reports.

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report. See Attachment

Closed the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.

- List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?
- Have these changes been implemented? If not, when will they be implemented?
- When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

DEPARTMENT OF MATHEMATICAL SCIENCES

2017-2018 DEPARTMENTAL ANNUAL REPORT

Closing the Assessment Loop

a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?

Lead by the MTSC 121 College Algebra Course Coordinator, Dr. Sharon Smith, and as one of the NSF Targeted Infusion - Cyber Infused Mathematics Initiatives, the instructors participated in Professional Learning Communities (PLC) to review student performance on assessments. This course has common scoring guides and common exams (including the final exam) across all sections of the course. In particular, they targeted CLOs that students found most challenging on assessment throughout the semester. They also focused on those CLOs that were most needed for subsequent course and built a targeted in-class review for the students to master the content. Then they created a final exam that corresponded to the selected CLOs. After the common grading of the final exam, they found that students slightly increased their performance on some of the CLOs that were selected. For example, based on the assessment report for MTSC 121, CLO 1 [Be able to translate word problems into appropriate equations and then to solve the equations using the appropriate algebraic operations] had a 32% performance increase from last year (2016-2017). Additionally, CLO 2 [Be able to
express mathematics ideas in written, graphic, and algorithmic form] had a 15% increase from last semester. Currently, the instructors are discussing way to incorporate more word problems into the curriculum for students to demonstrate critical thinking and reasoning skills. This is particularly important for math majors as some of them place into College Algebra even though it is not a required course for their major. Thus, they need to demonstrate that they have the foundation to be successful in upper level mathematics courses.

b) Have these changes been implemented? If not, when will they be implemented?

The PLC, review of assessments, and targeting final exam review and targeting final exam questions have all been implemented in 2017-2018.

c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

This is an ongoing process that will be conducted every semester to improve student performance on MTSC 121 CLOs.

**Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.**

**DEPARTMENT OF MATHEMATICAL SCIENCES**

2017 - 2018 DEPARTMENTAL ANNUAL REPORT

**Bibliography of Scholarly Product**

There are 5 publications for the 2017-2018 academic year.

Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

See Attachment.

Mission / Purpose

The mission of the Mathematical Sciences Department is to provide for the people of Delaware and others who are admitted to the University the language, structure, beauty, relevance, utility, and pedagogy of mathematics, to make contribution to reach in mathematics, mathematics education and related disciplines, and to recruit, retain, and graduate students who can make positive contributions to their professions and their community.

The purpose of the Mathematical Sciences Department is to provide for the people of Delaware and others who are admitted to the University with opportunities to develop advanced levels of quantitative literacy, skills in the use of mathematical analysis and mathematical modeling, and to develop advanced skills in the teaching and learning of mathematics. The department of Mathematical Sciences also seeks to make positive contributions to the local community, the state, and the larger community through research in pure, applied mathematics and mathematics education. The Department's mission statement complements the university mission statement by focusing on meaningful, and relevant education that contributes to both the liberal and professional aspects of higher education.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning Goals

All Mathematics (B.S.) majors registered in mathematical science courses will develop proficiency in mathematics.

Associated required courses (not all courses are evaluated):

- MTSC 213 Discrete Mathematics
- MTSC 251 Calculus I
- MTSC 252 Calculus II
- MTSC 253 Calculus III
- MTSC 313 Linear Algebra
- MTSC 317 Number Theory
- MTSC 319 Combinatorics
- MTSC 341 Probability
- MTSC 351 Differential Equations
- MTSC 411 Algebraic Structures I
- MTSC 412 Algebraic Structures II
- MTSC 451 Advance Calculus I
- MTSC 452 Advanced Calculus II
- MTSC 461 Real Analysis
- MTSC 498 - Topics in Mathematics

**SLO 1: SLO 1 - Demonstrate conceptual knowledge and procedural mathematics methods**

Students will demonstrate conceptual knowledge and procedural mathematics methods (i.e., breadth and depth knowledge of facts, concepts, principles, and algorithms) to solve textbook exercises and real world problems. This includes using elementary and advanced mathematics, estimation, checking answers for reasonableness, identifying alternatives, selecting optimal results and using technology/tools.

**Relevant Associations:**
Provide general education to help all students understand the role that mathematics plays in today's world.

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 1: UG SLO-1**

Students’ scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. We are not looking at how each individual student meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.
-----Fall 2016------
Final Exam

-----Spring 2017-----
251, 319, 454, 461: Students' average score for questions on cumulative final exam;
252, 452: Students' average score on cumulative final exam using the Math Rubric;
313: Students' average score for questions on cumulative final exam; In-class exams, Homework
491: Students' average score for questions on cumulative final exam;
Presentation, Papers, Proof Discussion
498: Students' average score for questions on cumulative final exam; Project and Project Discussion

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target:**
A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO1.

**Findings (2016-2017) - Target: Met**

-----Fall 2016------
Average for SLO1 is 76.58% (Met)

213: Students demonstrated procedural fluency in this course. Overall students scored 72%, and Math Ed students averaged 96% in this area. 251: For this course, the average performance on this SLO was 54%. Nine out of 15 questions were in this category. Questions were, finding the limits of various functions both algebraically and graphically; computing derivatives and higher order derivatives; computing differential; finding the derivative using the limit definition; determining the points of discontinuity; computing definite and indefinite integrals. Questions tested students’ basic conceptual understanding and how well they could carry out procedural methods. Students demonstrate difficulty in both areas. It is noted that this course is one of the first courses that majors complete. Student proficiency in this area shows a general improvement over the course sequence. 411: Overall student average is 79%. One question determined whether the dihedral group was abelian, or cyclic, finding orders of each element, and finding cyclic subgroups of the dihedral group. All students except one performed 90%-100%. There were three questions in the in-class exam. One was to determine for a function whether it is a homomorphism, one-to-one, or onto and they needed to find its kernel. Their performance over that question is 88%. In a second question they were supposed to determine for a concrete subgroup whether it was normal or not, and write out the members of the quotient group. The majority of students had difficulty writing the members of the quotient group. In the third question, they were supposed to find the greatest common divisor of two numbers using Euclid's algorithm. All students got 7 or 8 out of 8 in this question. Overall, the majority of students understand the concepts well and can carry out procedural mathematics.
Average for SLO1 is 80.9% (Met)
Course 251: Average Math major performance: 90%. Nine out of 15 questions were in this category. Questions were finding the limits of various functions both algebraically and graphically; computing derivatives and higher order derivatives; computing differential; finding the derivative using the limit definition; determining the points of discontinuity; computing definite and indefinite integrals. Questions tested basic conceptual understanding of students and how well they can carry out procedural methods. Students have had difficulty in both aspects.
252: Average Math major performance: 67%. Most students have very good procedural understanding and are able to compute the derivative of a log function. A correct but inefficient strategy is chosen or an efficient strategy is chosen but implemented with some errors. Chosen strategies are based on the mathematical situation in the task. Evidence of solidifying prior knowledge and applying it to the problem-solving situation is present. Significant progress toward a solution is made. A correct answer is achieved most of the time.
313: Average Math major performance: 69.2%. A calculation is performed appropriately, but there is a lack of understanding of underlying concepts that are inherent in the procedure when interpreting results. Or, it is evident that the correct procedure is applied, but the calculation is flawed.
319: Average Math major performance: 93.75%. The students were able to show that they can solve textbook exercises and real world problems. This is especially true for applications of combinatorics principles such as elementary counting using combinations and permutations.
452: Average Math major performance: 92%. All students are able to find the area of a parallelogram formed by different methods. A procedure is applied accurately and efficiently. Evidence is provided to support and justify the appropriate procedure/calculation. Minor calculation flaws may exist.
454: Average Math major performance: 78.8%. Students performed adequately in solving fairly straightforward PDEs.
461: Average Math major performance: 79.17%. For the question in the take-home, students needed to find an estimate for the root of a polynomial, by applying intermediate value theorem and using the bisection method. All students got full credits in this question. In the question in the in-class exam, students needed to find the supremum and the infimum of two sets and were asked to prove one of them, which was done in the class. The question's basic goal was to test students' understanding of the concepts supremum and infimum. Except one student who got 0 from the second question, overall student performance was good for this SLO.
491: Not reported this cycle
498: Average Math major performance: 77.8%. The students were able to solve mathematical problems related to image processing. They successfully designed a solution that used the Convolution Theorem to perform filtering in the frequency domain. They manually calculated the Discrete Fourier Transform and calculated convolutions between vectors.
Findings (2015-2016) - Target: Met
-----Fall 2015-----

MTSC 213: In this course the mathematics majors met all course objectives. Some changes will be made to put more emphasis on parts of the course in which non-majors had difficulty, mainly proofs.
MTSC 251: In this course more emphasis is needed on designing problems and exercises that involve the use of novel mathematics.
MTSC 253: In this course the mathematics majors met all course objectives and no changes will be needed.
MTSC 313: In this course it was found that students need more work on deeper comprehension.
MTSC 317: In this course more focus needs to be given on understanding the underlying theories of number theory and classroom time should be devoted towards giving students time to work on application of the theory.
MTSC 351: In this course it was found that students need more work on deeper comprehension.
MTSC 411: In this course students struggled with proof content.

-----Spring 2016-----

There was one final exam questions on this CLO, Average score 17.9%. Question 3 dealt with this CLO. Question 3 was to determine if each of three real numbers is algebraic over the set of rational numbers and determine is degree if it is. The solution involves finding a polynomial of lowest degree having the given number as a root or equivalently finding an irreducible polynomial having the number as a root. Two of the four students were able to find a polynomial having one of the numbers as a root but were unable determine the degree of the algebraic number. The other two students were able to much of anything on the problem.

Findings (2012-2013) - Target: Partially Met

Currently, the data covers all those who took upper-level mathematics courses. In the future we will categorize the data according to the
major. Students registered in MTSC 251, 252, 253, 341, 351 and 452 did not

successfully demonstrate SLO1. These courses are computational in

nature. In particular, students appear to have difficulty solving

computation problems. However, it is worthwhile to mention that 251 and

253 met the goal

with high marks.

Findings (2011-2012) - Target: Partially Met

Currently, the data covers all those who took upper-level mathematics courses. In the future we will categorize the data according to the major. Students registered in MTSC 251, 252, 253, and 313 did not successfully demonstrate SLO1. These courses are computational in nature, unlike MTSC 213, 319, 411, and 498 which are proof based courses. In particular, students appear to have difficulty solving computation problems. This may be due to a lack of understanding of the concepts taught during class.

Final exam modification
Established in Cycle: 2011-2012
In the future we will categorize the data according to the major. The department is recommending that teachers for these courses...

Students work more closely with tutors and attend more office hours
Established in Cycle: 2012-2013
First, recommendation is that students work more closely with tutors and attend more office hours. It is imperative that student...
SLO 2:SLO 2 - Construct and Interpret Various Representations

Students will be able to represent and interpret mathematical information symbolically, graphically, numerically, written, verbally, and/or programming language. Students will be able to transform real world situations into mathematical algorithms.

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 2:UG SLO-2**

Students' scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. For example, "success rate of SLO 1 in MTSC 213 is 78%" means in the course MTSC 213, all students who have taken the final exam, together have scored 78% on all questions associated with SLO 1. So, it is an overall approach where we are not looking at how each individual student meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

-----Fall 2016------
Final Exam

-----Spring 2017-----
251, 319, 454, 461: Students' average score for questions on cumulative final exam;
252, 452: Students' average score on cumulative final exam using the Math Rubric;
313: Students' average score for questions on cumulative final exam; In-class exams, Homework
491: Students' average score for questions on cumulative final exam; Presentations, Papers, Proof Discussion
498: Students' average score for questions on cumulative final exam; Project and Project Discussion
Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target:**
A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO2.

**Findings (2016-2017) - Target: Met**
--------Fall 2016--------

Average for SLO2: 82.63% (Met)

213: Students were able to use and understand basic mathematics terminology in problems. While overall, students scored 79%, Math Ed students averaged 100%. 251: In this course, the average performance was 14%. The two questions that corresponded to this SLO included an applied optimization problem and a problem requiring finding the area of the region enclosed by the x-axis and a parabola. Only a minority of students were able to answer both question correctly and most did not attempt the question, despite similar questions included in the online homework. 411: Overall performance for this CLO was 86.78%. This CLO was assessed by a question requiring finding some arithmetic relationships in the dihedral group of order 8 and forming a multiplication table for the elements of the dihedral group. All students got perfect score in this question. This CLO was also assessed using a question on equivalence classes. Students were to show that a given relation is an equivalence relation and determine the members of some of the equivalence classes. Their performance in this question was 9 out of 12. Half of the students had difficulty determining the members of the equivalence classes. 491: Students demonstrated their ability to communicate verbally through in class presentations. Students also designed and led class activities that required representing and interpreting mathematical information in a variety of forms. The average scores of 92% overall, and 93% for math ed majors.

--------Spring 2017--------

Average for SLO2: 85.2% (Met)

251: Average Math major performance: 100% (One student). There were two questions that corresponded to this SLO. One of them was an applied optimization problem. The other was finding the area of the region enclosed by the x-axis and a parabola. Only a minority of students were able to answer both question correctly. Most of the students did not attempt the question. There were similar questions in the online homework.
252: Average Math major performance: 80% (3.2/4) Most students displayed very good representation skills and are able to differentiate and integrate exponential functions. An appropriate mathematical representation is constructed to solve problems or portray solutions.

313: Average Math major performance: 69.2% An attempt is made to construct a mathematical representation to record and communicate problem solving but it is not accurate and/or is incomplete.

319: Average Math major performance: 77.5% The students were efficient at representation of mathematical information in multiple forms. This is mainly because most students were juniors or seniors and have reached a specific level of mathematical maturity. However they need to work a bit more on abstract thinking and connecting different representations, such as providing proofs using purely combinatorial techniques.

452: Average Math major performance: 92% Most students can basically understand mappings and inverse mappings. An appropriate mathematical representation is constructed to solve problems or portray solutions.

454: Not reported this cycle

461: Not reported this cycle

491: Average Math major performance: 94.1% Students demonstrated their ability to communicate in an oral manner through their in class presentations. They also designed and led appropriate class activities.

498: Average Math major performance: 83.75%. Students achieved proficient performance in manual application of the steps of the statistical technique of histogram equalization to enhance image contrast of a test numerical matrix. They connected the statistical concepts of PDF and CDF to derive an image intensity transformation.

Findings (2015-2016) - Target: Met
-------Fall 2015-------

MTSC 213: In this course the mathematics majors met all course objectives. Some changes will be made to put more emphasis on parts of the course in which non-majors had difficulty, mainly proofs.

MTSC 251: In this course more emphasis is needed on designing problems and exercises that involve the use of novel mathematics.

MTSC 253: In this course the mathematics majors met all course objectives and no changes will be needed.
MTSC 313: In this course it was found that students need more work on deeper comprehension.
MTSC 317: In this course more focus needs to be given on understanding the underlying theories of number theory and classroom time should be devoted towards giving students time to work on application of the theory.
MTSC 351: In this course it was found that students need work on deeper comprehension.
MTSC 411: In this course students struggled with proof content.
MTSC 451:

----- Spring 2016-----

There was one final exam questions on this CLO, Average score 96%. Question 2 dealt with this CLO. Question 2 was to determine if each of five polynomials is irreducible over some field and factor the polynomial if it is not irreducible. Each polynomial was or was not irreducible for different reasons. Reasons why each polynomial was or was not irreducible was given during the classes final exam review. One student was able to determine irreducible or non irreducible of 4 of the 5 polynomials. A second student able to determine irreducible or non irreducible of 3 of the 5 polynomials. The other two students only guessed the answers.

- Spring 2016 BS-Data

Findings (2012-2013) - Target: Partially Met

Currently, the data covers all those who took upper-level mathematics courses. In the future we will categorize the data according to the major. Students registered in MTSC 251, 252, 253, 341, 351 and 452 did not successfully demonstrate SLO1. These courses are computational in nature. In particular, students appear to have difficulty solving computation problems. However, it is worthwhile to mention that 251 and 253 met the goal with high marks.

Findings (2011-2012) - Target: Partially Met

Similar to SLO 1, students registered in MTSC 251, 252, 253, and 313 did not successfully demonstrate SLO2. This particular SLO focuses on interpretations between different mathematical representations.

SLO 3: SLO 3 - Apply Novel Problems

Students will apply mathematics in novel situations that may require the development/acquisition of new skills.

Relevant Associations:

DSU Learning Goal Associations:  
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 3: UG SLO-3

Students’ scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. For example, "success rate of SLO 1 in MTSC 213 is 78%" means in the course MTSC 213, all students who have taken the final exam, together have scored 78% on all questions associated with SLO 1. So, it is an overall approach where we are not looking at how each individual student meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

-----Fall 2016------
Final Exam
-----Spring 2017-----
251, 319, 454, 461: Students' average score for questions on cumulative final exam;
252, 452: Students' average score on cumulative final exam using the Math Rubric;
313: Students' average score for questions on cumulative final exam; In-class exams, Homework
491: Students' average score for questions on cumulative final exam; Presentations, Papers, Proof Discussion
498: Students' average score for questions on cumulative final exam; Project and Project Discussion

Source of Evidence: Comprehensive/end-of-program subject matter exam

Target:
A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO3

Findings (2016-2017) - Target: Partially Met

---------- Fall 2016---------
Average for this SLO: 64.75% (Not Met)

213: Students demonstrated proficiency in applying knowledge in less familiar contexts. Math Ed students averaged 100%. 251: The average performance was 25%. Students were asked to determine whether the statement "every continuous function is differentiable" is true or false and to explain their answer. 411: The overall student performance was 59%. Students were asked to find all subgroups of the Dihedral group and form the lattice diagram. They were also asked to show that an equation has no integer solution using the natural homomorphism from Z onto Z_7. No student was able to solve the question.

----------Spring 2017---------
Average for this SLO: 76.6% (Met)
251: Average Math major performance: 100% (One student). This question was a "related rates" problem. Given the radius of a circular plate and rate of change of the radius at given radius, students were supposed to find the rate of change of the area. Only one student earned a perfect score. One student made substantial progress but made calculation errors. A few students were able to relate rates, but were not able to compute derivatives. The remaining students either did not answer the question or wrote irrelevant answers.
252: Average Math major performance: 43%
A. Average is 2.1 of 4.0 (52.5%). Most students have good problem solving ability and are able to use the differentiation techniques to find derivative and integral of functions involving trigonometric functions. A correct but inefficient strategy is chosen or an efficient strategy is chosen but implemented with some errors. Chosen strategies are based on the mathematical situation in the task. Evidence of solidifying prior
knowledge and applying it to the problem-solving situation is present. Significant progress toward a solution is made. A correct answer is achieved most of the time.

B. Average is 1.3 of 4.0 (32.5%) Some students are not able differentiate function involving inverse trigonometric function. Arguments are made with some mathematical basis. Some correct reasoning or justification for reasoning is present.

313: Average Math major performance: 69.2% A correct but inefficient strategy is chosen or an efficient strategy is chosen but implemented with some errors. Chosen strategies are based on the mathematical situation in the task. Evidence of solidifying prior knowledge and applying it to the problem-solving situation is present. Significant progress toward a solution is made. A correct answer is achieved most of the time. Arguments are constructed with adequate mathematical basis. Clear mathematical reasoning is present, but may not directly lead to a fully developed argument and/or conclusion.

319: Average Math major performance: 67.5% While the students were able to use elementary counting techniques effectively, they found it difficult to combine these principles to solve applications

452: Average Math major performance: 81.9% A. Average is 3.67 of 4.0 (92%). Most students can obtain the Jacobian matrix, the Hessian and apply the chain rule. A correct but inefficient strategy is chosen or an efficient strategy is chosen but implemented with some errors. Chosen strategies are based on the mathematical situation in the task. Evidence of solidifying prior knowledge and applying it to the problem-solving situation is present. Significant progress toward a solution is made. A correct answer is achieved most of the time. Arguments are constructed with adequate mathematical basis. Clear mathematical reasoning is present, but may not directly lead to a fully developed argument and/or conclusion.

454: Average Math major performance: 84.2% Students performed well even when nonstandard terms were added to PDE problems.

461: Average Math major performance: 66.7%. Students were given a sequence defined recursively. They were supposed to show that the sequence is bounded, it is increasing, deduce by Monotone Convergence Theorem that the sequence is convergent, and find the limit. Three of the students answered the question perfectly. Two students were able choose the correct strategy and implement it with some errors. The other two students were able to choose the correct strategy but were not able to make significant progress towards solution.

491: Not reported this cycle.

498: Average Math major performance: 100%. The students showed distinguished ability in applications of mathematics in novel situations such as mathematical image processing techniques. They built computational skills to solve problems and understand concepts of digital imaging.

-----Spring 2016-----

There was one final exam question on this CLO, Average score 26.7%. Question 2 dealt with this CLO. Question 2 had two parts. One part was to find the greatest common divisor of two polynomials and the second part was to express the GCD as a combination of the two polynomials. The first part can be done by either expressing the two polynomials in factored form or by repeated polynomial division. The second part can be done only by repeated polynomial division. One student solved the GCD problem the factoring method but didn’t know how to do the harder second part by repeated division. A second student attempted to do both problems by repeated division but named the last quotient as the GCD rather than the last divisor and expressed the last divisor as a combination of the two polynomials. A third student attempted to do the problems by polynomial division but was unable to do polynomial division. A forth student didn’t attempt the problem.

**Target:**
A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO4.

**Findings (2016-2017) - Target: Met**

---------- Fall 2016----------
Average for SLO 4 is 84.17% (Met)

213: Students did not demonstrate proficiency in writing mathematical statements (specifically contrapositives and converses). Math Ed students averaged 50% 251: The average student performance was 25%. Students were asked to determine whether the statement "every continuous function is differentiable" is true or false and explain their answer. Five students gave accurate answers. 15 students determined
that the statement is false, but were not able to explain it. 411: Overall performance is 78%. Students were asked to write the definition of a cyclic group and to state Lagrange's theorem. With few exceptions, students responded correctly and expressed themselves in a coherent way. One question was an application of First isomorphism theorem. Most students knew first isomorphism theorem and were able to apply it in a basic setting. The last question was a true/false question which consisted of six parts. These were basic questions about properties of groups, application of basic theorems. Eight out of eleven students demonstrated a good understanding of definitions, concepts, and fundamental theorems of group theory, and were able to communicate their ideas. The other three had some gaps in their understanding and expressing themselves. 491: Students demonstrated their ability to read and communicate by sharing their opinion on class readings in class and writing papers. Averages scores was 99% for math ed majors which indicates that the target for this measure was met.

-----Spring 2017-----
Average for SLO 4 is 73.2% (Met)
251: Average Math major performance: 75%. This was a true/false question testing students’ understanding of Intermediate Value Theorem. Four students gave perfect answers. Eight students were able to tell that the statement was true and gave some explanation. Two of these eight students were able to give some reasonable explanation but did not refer to Intermediate Value Theorem, six of them did not give a satisfactory explanation. Remaining students did not show understanding of Intermediate Value Theorem.
252: Average Math major performance: 60%. (2.8 of 4.0) Determined in class by asking students questions. A sense of audience or purpose is communicated. Verbal/written communication of an approach is evident through a methodical, organized, coherent, sequenced and labeled response. Formal math language is used to share and clarify ideas. Frequent use of formal math terms or symbolic notation is evident, in any combination.
313: Average Math major performance: 66.7%. A sense of audience or purpose is communicated. Verbal/written communication of an approach is evident through a methodical, organized, coherent, sequenced and labeled response. Formal math language is used to share and clarify ideas. Frequent use of formal math terms or symbolic notation is evident, in any combination. The majority of students are capable of providing a written statement that reflects the strategies utilized during problem solving. Stronger students utilize correct verbiage including definitions and theorems. Encourage other students to become more confident in their discussions.
319: Average Math major performance: 75%. Students showed that they can read, comprehend and communicate mathematical ideas and concepts. They were able to construct to solve a problem using the Strong Principle of Induction, and they could count the number of functions using an application of the bijective method.
461: Average Math major performance: 66.7%. This was a true/false question for which they needed to give an explanation. There were five questions testing their understanding of basic concepts and theorems, and how they communicate their reasoning. Four of the seven students showed understanding of the concepts and theorems involved and expressed themselves in a mathematically sound way. Two of the
students did not know some of the concepts, and a sense of purpose was lacking in some instances. One student had some awareness of audience or purpose, misunderstanding and misstating some of the concepts, lacking in mathematical formality in general.

491: Average Math major performance: 91.2%. Students demonstrated their ability to read and communicate by sharing their opinion on class readings in class and writing papers. Averages scores indicate that the target for this measure was met.

498: Average Math major performance: 81.25%. The students reached exceptional performance in comprehending and writing proofs related to the mathematical operations involved in image digitization and the sampling theorem. They were also able to explain the notion of dynamic range and contrast of the image intensity function.

**Target:**
A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO5.

**Findings (2016-2017) - Target: Met**

---------- Fall 2016----------
Average for SLO5: 82.82% (Met)

213: Students had difficulties with proofs but were able to demonstrate proficiency. Math Ed students averaged 89%. 251: Not measured 411: Overall performance is 82%. Students were asked to show that the cartesian product of two groups is a group and show that a given subset of it was a normal subgroup. All students performed well in this question. Students were also asked to show a simple property of abelian groups using mathematical induction. The majority of students got full credits for this question. Finally students were asked to show a group of order 13 is cyclic, using Lagrange's Theorem. Although two students were able to provide a perfect proof, half of the students had some idea how to prove. 491: Students demonstrated their ability to read and communicate by sharing their opinion on class readings concerning proofs in class. Averages scores of 100% for math ed majors.

----------Spring 2017----------
Average for SLO5: 74.3% (Met)
251: Not reported this cycle.
252: Not reported this cycle.
313: Average Math major performance: 65.8% The proof structure, though correct, is needlessly complicated in some minor way. Some variable symbols are missing but can be understood from the context. The use of hypotheses is implied, but should be more explicit. The mathematical reasoning is mostly sound, but perhaps lacking in some minor way.
319: Average Math major performance: 67.5% While the students were able to prove the classic Pigeonhole Principle, they were not successful in constructing a solution of a problem using the Binomial Theorem.
452: Average Math major performance: 81%
A. Average Math major performance: 75% (3.3 of 4.0) Most students are able to produce a suitable proof structure. The proof structure, though correct, is needlessly complicated in some minor way.
B. Average Math major performance: 100% (4.0 of 4.0). All students are able to use and name symbols properly. All symbols to be used in the proof are clearly defined.

C. Average Math major performance: 75% (3.0 of 4.0). The use of hypotheses is implied, but should be more explicit.

D. Average Math major performance: 62.5% (2.5 of 4.0). Most students are able to use acceptable logic and reasoning in their proofs. The mathematical reasoning is mostly sound, but perhaps lacking in some minor way.

E. Average Math major performance: 87.5% (3.5 of 4.0). Most students are able to use mathematical terminology and notations properly. Notation and terminology are used correctly with only a few exceptions.

F. Average Math major performance: 87.5% (3.5 of 4.0). The proof is complete and correct.

G. Average Math major performance: 87.5% (3.5 of 4.0). Most students are able to have a clear process of proof. The proof is well-written, with appropriate amount of detail, easy to follow, and approaches elegance.

H. Average Math major performance: 75% (3.0 of 4.0). Most students are able to produce a correct conclusion. The conclusion is implied, but must be supplied by the reader.

461: Average Math major performance: 50%. Students needed to show that the image of the intersection of two sets is a subset of the intersection of the images, and then they needed to provide an example why they would not necessarily have the reverse inclusion. Three out of seven students were able to prove the result almost perfectly and provide a counter example for the second part. Their proofs were clearly written and well-communicated except a few notational errors. One student had a flaw in his counter example, but for the first part gave a perfect proof. One student had mostly a correct answer with a minor error and he needlessly complicated the proof. For the remaining two students there was not identifiable structure to the proof, their reasoning was seriously flawed and were not able to use the right notation.

491: Average Math major performance: 88%. Students demonstrated their ability to read and communicate by sharing their opinion on class readings concerning proofs in class. Averages scores of 94% overall, 100% for math ed majors, and 88% for math majors indicate that the target for this measure was met.

498: Average Math major performance 94%. The students were proficient at reading and communicating mathematical concepts and procedures to show that differential operators can be used to select the high frequency information of an image.

------Fall 2015------
MTSC 213: In this course the mathematics majors met all course objectives. Some changes will be made to put more emphasis on parts of the course in which non-majors had difficulty, mainly proofs.

MTSC 251: In this course more emphasis is needed on designing problems and exercises that involve the use of novel mathematics.

MTSC 253: In this course the mathematics majors met all course objectives and no changes will be needed.

MTSC 313: In this course it was found that students need more work on deeper comprehension.

MTSC 317: In this course more focus needs to be given on understanding the underlying theories of number theory and classroom time should be devoted towards giving students time to work on application of the theory.

MTSC 351: In this course it was found that students need more work on deeper comprehension.

MTSC 411: In this course students struggled with proof content.

MTSC 451:

-----Spring 2016-----

There was one final exam question on this CLO. Average score 1%. Question 4 dealt with this CLO. Question 4 was to show that if two particular algebraic numbers of degree 2 are adjoined to the field of rational numbers the resulting extension field is of degree 4. The solution involves showing that if one of the algebraic numbers is adjoined to the field of rational numbers, the resultant extension field does not contain the second algebraic number. Only 1 of 4 students scored any points on this problem.

**SLO 6:SLO 6 - Connections**

Students will also be able to make connections among the different representations.

**Relevant Associations:**

**DSU Learning Goal Associations:**

1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Strategic Plan Associations:**

*College of Mathematics, Natural Sciences, & Technology*

1.1 For all bachelor's degree programs, develop a robust honors curriculum available to all majors and designed to challenge the best students, culminating in a research thesis.
1.3 Improve courses and curricula to maximize student learning, using proven research-based pedagogy and incorporating inquiry-based active-learning strategies.

*Delaware State University*

2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 6:UG SLO-6**

Students' scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. For example, "success rate of SLO 1 in MTSC 213 is 78%" means in the course MTSC 213, all students who have taken the final exam, together have scored 78% on all questions associated with SLO 1. So, it is an overall approach where we are not looking at how each individual student meeting a particular student
learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

-----Fall 2016-----
Final Exam

-----Spring 2017-----
251, 319, 454, 461: Students' average score for questions on cumulative final exam;
252, 452: Students' average score on cumulative final exam using the Math Rubric;
313: Students' average score for questions on cumulative final exam; In-class exams, Homework
491: Students' average score for questions on cumulative final exam; Presentations, Papers, Proof Discussion
498: Students' average score for questions on cumulative final exam; Project and Project Discussion

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO2.

**Findings (2016-2017) - Target: Met**

---------- Fall 2016----------

Average for SLO 6: 77.6% (Met)

213: Not measured 251: Average performance was 43%. Students were to find local extrema, inflection point(s) of the function and determine its behaviour whether it is increasing/decreasing or concave up/down. About one third of students answered the question perfectly or almost perfectly. Almost half of the students did not get any points or got only a few points. Some of the remaining students were able to analyze the function based on first derivative, but not the second. Some others were able to analyze the behaviour of the function but were not able to determine local extrema or inflection points. Average performance for this question was 45%. In the second question, students were given the graph of velocity of a particle moving on a coordinate plane and were asked to make some interpretations regarding velocity and acceleration of the particle. Only a few students were able to give perfect or almost perfect answers. About a third of the students were not able to interpret any of the information correctly. Remaining students had some correct interpretations. 411: Overall performance on this CLO is 94.55%. Students were asked to show that the group of invertible matrices quotient the normal subgroup of matrices whose determinant is 1 is isomorphic to all nonzero real numbers. This was an application of the first isomorphism theorem which also helped them to refresh their linear algebra knowledge in a new setting.

--------Spring 2017--------
Average for SLO 6: 70.8% (Met)
251: Not reported this cycle
252: Average Math major performance: 20%. (0.8 of 4.0) Average is 2.9. Most students are able to integrate a simple rational function using Log rule of integration. A mathematical connection is made. Proper contexts are identified that link both the mathematics and the situation in the task.
313: Average Math major performance: 71.7%. Mathematical connections are used to extend the solution to other areas/fields of mathematics or to a deeper understanding of the mathematics in the task.
319: Average Math major performance: 65%. Students found some difficulties in connecting the power series form with the Generalized Binomial Theorem. It seems they were more accustomed to using the Taylor Series form to solve such problems but were not able to show the abstract thinking to connect such problems to combinatorics.
452: Average Math major performance: 73.25%. (2.93 of 4). Most students are able to find the change of variables formula in three dimensions for some simple cases. A mathematical connection is made. Proper contexts are identified that link both the mathematics and the situation in the task.
454: Average Math major performance: 95%. Students performed well on the programming assignment. A few students did have some issues with properly presenting and labeling graphs however.

Spring 2017 Action Plan
Established in Cycle: 2016-2017
Action Plan Recommendations for 241: Student preparation and effort are the largest factors that influence classroom performance...

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Hiring

Hire more full time faculty, create long term teaching positions to minimize the use of adjuncts.

Established in Cycle: 2009-2010
Implementation Status: Planned
Laboratory
More students need to be encouraged to take advantage of the resources and support systems that have been provided, particularly the Mathematics Laboratory.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Implementation Description: Lab activities are becoming a culture of learning for those who would otherwise not like mathematics.
Responsible Person/Group: The Lab Supervisor and student tutors.
Additional Resources Requested: Consistent implementation of Lab fees to sustain the functioning of the Mathematics Laboratory in terms of equipment and updates.

Technology
Continue the development/revision of courses to be implemented in the Fall 2010 and beyond. Faculty members are encouraged to infuse more technology in their courses where appropriate or necessary.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Implementation Description: Most of the undergraduate Math courses are using coursecompass.
Responsible Person/Group: Min Gibson
Additional Resources Requested: Support from the IT dept

Increase Faculty Members

Hire more full time faculty, create long term teaching positions to minimize the use of adjuncts.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Final exam modification
In the future we will categorize the data according to the major. The department is recommending that teachers for these courses teach more elementary proofs or real world applications to assist students in their understanding of mathematical computations. We recommend that final exam questions have a variety of different problem types. To accomplish this, we need to reduce the number of strictly computational problems that are associated with SLO 1.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: UG SLO-1 | Outcome/Objective: SLO 1 - Demonstrate conceptual knowledge and procedural mathematics methods

Responsible Person/Group: Course coordinator and course instructors

Final exam modifications
In the future we will categorize the data according to the major. The department is recommending that teachers for these courses teach more elementary proofs or real world applications to assist students in their understanding of mathematical computations. We recommend that final exam questions have a variety of different problem types. To accomplish this, we need to reduce the number of strictly computational problems that are associated with SLO 1.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Responsible Person/Group: Course coordinator and course instructors

Novel problems
In most classes, students have difficulty applying their mathematics knowledge to novel problems. Novel problems are problems that were not taught during class or provided as homework, but that the knowledge gained from the course could be applied to solve the problem. Again, a variety of problems should be offered to the students with an emphasis on comprehend in addition to computation. Similarly, we are suggesting that final exam questions be evaluated by a group of instructors to ensure that exam questions are measuring the intended SLOs and Course Learning Objectives (CLO) as outlined in the syllabus. In particular, we recommend that an interrater reliability of at least 80% that an exam question addresses a specific SLO. We recommend that this evaluation be the responsibility of the course coordinator and course instructors as a
team.

Established in Cycle: 2011-2012  
Implementation Status: Planned  
Priority: High

Relationships (Measure | Outcome/Objective):  
Measure: UG SLO-3 | Outcome/Objective: SLO 3 - Apply Novel Problems

Responsible Person/Group: Course Coordinator and course instructors

Problem Variety  
It is recommended that teachers of these courses implement a variety of problems types during the lesson that help students identify similarities and difference between mathematical representation.

Established in Cycle: 2011-2012  
Implementation Status: Planned  
Priority: High

Relationships (Measure | Outcome/Objective):  
Measure: UG SLO-2 | Outcome/Objective: SLO 2 - Construct and Interpret Various Representations

Responsible Person/Group: Course coordinators and course instructors

Proof writing experiences  
MTSC 213, 319, 411, and 498 are proof based courses. However, very few course instructors indicated that they are measuring students proof reading and writing skill. Again, instructors of these courses need properly identify which test questions are associated with proof writing and adjust the syllabus according. We recommend that coordinators of proof courses must include at least one proof on the final exam.

Established in Cycle: 2011-2012  
Implementation Status: Planned  
Priority: High

Relationships (Measure | Outcome/Objective):  
Measure: UG SLO-5 | Outcome/Objective: SLO 5 - Comprehend and Construct Proofs
**Responsible Person/Group:** Course coordinator and course instructors

**Reading comprehension**

More emphasis must be placed on reading mathematics for understanding. Students need an opportunity to interpret the mathematics they see both during class time, as well as outside of class.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** UG SLO-4
- **Outcome/Objective:** SLO 4 - Read, Comprehend, and Communicate

**Responsible Person/Group:** Course coordinator and course instructors

**Students work more closely with tutors and attend more office hours**

First, recommendation is that students work more closely with tutors and attend more office hours. It is imperative that students practice math outside of the classroom by doing their HW and or consulting the instructors. The help is readily provided and for the most part students do not seem to take advantage of it. Second, recommendation is to emphasize areas of weak mathematical understanding during class time. This includes determining alternative ways to teach the material to help students better understand the topic.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** UG SLO-3
- **Outcome/Objective:** SLO 3 - Apply Novel Problems

**Spring 2017**  
Action Plan Recommendations for 241:  
Student preparation and effort are the largest factors that influence classroom performance. Students should review their previous exams and homework questions when prepare for the exam.
Action Plan Recommendations for 251:
1) Encourage students to do the online homework.
2) Encourage students to use math lab for extra help, perhaps giving some bonus points for participation in the lab.
3) Meet with instructors of the course regularly during the semester.
4) Action Plan Recommendations for 252:
5) This course requires students to spend a lot of time on it. Instructors may consider to encourage students to do more practice questions by giving them some incentive.

Action Plan Recommendations for 253:
1) Collect student homework to check for completion of problems and to identify gaps in problem solving.
2) Have students utilize Matlab to graph conic sections. Spend an additional lecture on graphing.
3) Create a "How to " worksheet with examples of each problem to help the students differentiate between the types of problems and what is being asked of them to find.
4) Create worksheets for students to transform word problems into mathematical expressions.
5) Include proof based problems where possible.
6) Include the use of Matlab workbook with real world applications.

Action Plan Recommendations for 313:
1) Create a rubric for each chapter that defines the type of solution required for specific types of problems and distribute the rubric before the material is presented. Refer to the rubric as each topic is covered. Better associate figures and drawings with mathematical representations. Highlight strategies within the rubric.
2) Help students to begin a problem with the appropriate strategy and work the problem until the solution is reached. Several students begin a problem and then quit in the middle.
3) Majority of the students are capable of providing a written statement that reflects the strategies utilized during problem solving. Stronger students utilize correct verbiage including definitions and theorems. Encourage other students to become more confident in their discussions.
4) For SLO5, students either performed excellently on failed miserably. Provide simpler proofs as exercises early in the course so that students become more comfortable proving compound propositions and understand how to relate theorems to common themes in order to conduct proofs.
5) Divide the class into groups with students who can make connections and those who are having difficulty making connections and have the students develop a connections tree.

Action Plan Recommendations for 319:
The instructor may need to
1) concentrate on the main concepts of combinatorics and
2) motivate the students to solve a lot more problems and understand basic theorems in more depth.
3) emphasize the applications of abstract ideas of combinatorics. One possible solution is to let the students explore these applications and discuss them in the classroom.

Action Plan Recommendations for 452:
1) Encourage students to meet with their instructors to discuss ways to improve their motivation and work efforts outside the classroom.
2) Student preparation and effort are the largest factors that influence classroom
performance.
3) Encourage students to do more practice. Practice make perfect.

Action Plan Recommendations for 454:
1) The syllabus and CLOs could use some improvement. In particular the CLOs do not differentiate between 2 dimensional and 3 dimensional problems. Additional there is no distinction between methods such as separation of variables versus eigenfunction expansion.
2) Find an additional source that properly covers CLO 5.
3) Restructure first few weeks of course to better suit undergraduate students. Students struggled in the beginning of the course before more active learning components were added to teaching style.

Action Plan Recommendations for 461:
Transfer students who are visiting DSU for a year performed better than DSU students, who are mathematics majors. Transfer students seemed to have a better background in Calculus and their abstract reasoning skills are more developed. They also have good studying habits. If a future class has a similar structure, I plan to assign group homework and/or a project, pairing up transfer students with math major students.

Action Plan Recommendations for 491:
Low performance on CLO2 and sporadic poor efforts by students leads me to believe that it is important to better motivate students to be more involved in class. Currently I have partially implemented a plan to do this by ending class with a challenging problem for students to work on that relates to that days discussion material. This concept of challenges will be better developed next time I teach.

Action Plan Recommendations for 498:
Overall, the SLO targets were met and the students gained experience in how to solve group projects using team work. Moreover, it would be meaningful to help the students connect mathematical methods with real-world problems - one application domain is image processing and analysis. A significant area of improvement is the development of computational skills that will benefit the students for their professional career or graduate studies. This can be achieved by 1) making the course a bit more project-oriented and 2) including more frequent group presentations in which the students will present their progress and discuss successes, failures, and potential solutions. Of course this modification should be balanced so that the students can still build the theoretical foundation, before moving ahead to more advanced topics.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Senior Capstone AtC Results | Outcome/Objective: SLO 4 - Read, Comprehend, and Communicate
**Spring 2017 Action Plan**

Action Plan Recommendations for 241:
Student preparation and effort are the largest factors that influence classroom performance. Students should review their previous exams and homework questions when prepare for the exam.

Action Plan Recommendations for 251:
1. Encourage students to do the online homework.
2. Encourage students to use math lab for extra help, perhaps giving some bonus points for participation in the lab.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning Goals

All Mathematics (M.S.) majors registered in mathematical science courses will develop proficiency in mathematics.

SLO 1: Math (M.S) SLO-1 Novel Problems
Students will apply mathematics in novel situations that may require the development and acquisition of new skills.

Relevant Associations:

DSU Learning Goal Associations:
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Related Measures:

M 1: Math (M.S) SLO-1

Students' scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. We are not looking at how each individual student is meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

Source of Evidence: Comprehensive/end-of-program subject matter exam
Target:
A weighted score of at least 80% for each course indicates that students successfully demonstrated SLO1.

Findings (2016-2017) - Target: Met
--------Fall 2016------
Average score on this SLO is 100%. All students are able to incorporate the knowledge learned in this course to their research, and it is reflected by the following measurements on various CLOs. CLO1 (score of 100%): students are able to solve large linear system using direct and indirect numerical methods. CLO5 (score of 100%): students are able to solve ordinary differential equations using numerical methods.

----Spring 2017----
Average score on this SLO is 85%.
*This SLO is not measured by MTSC 500.
*Average score of MTSC 651 is 73%. The student did well when complications were added to basic problems.
*Average score of MTSC 621 is 97%. Students were supposed to survey a topic and present it in class. One of the survey topics were applications of functional analysis to integral equations and the other was to differential equations. Both showed understanding of the topics and were able to apply some functional analysis theorems to special cases.

Connected Documents
- Spring 2017 - MS
- Fall 2016 - MS

Findings (2015-2016) - Target: Met
Average score on this SLO is 100%. All students are able to creat advanced and detailed proofs in the area of numerical analysis, and it is reflected by the following measurements on various CLOs. CLO1 (score of 100%): students are able to solve large linear system using direct and indirect numerical methods. CLO6 (score of 100%): students are able to analyze numerical errors from various sources and ways of controlling its accumulation.

----Fall 2015----
There was two final exam questions on this SLO. Average score on the two questions was 50%.
Question 1 was to show that the union of a countable set and an uncountable set is a uncountable set and to use the result to show that the set of irrational numbers is an uncountable set. This question builds on a question asked on the midterm exam that the union of two countable sets is a countable set. Both graduate students attempted this question. One of the students was able to connect the second part of the question to the first part but didn't prove the first part. The other student got some partial credit for knowing what a countable set is.
Question 5 was to show that an inductively defined sequence is contractive and find its limit. Neither of the students chooses to answer this question.
For MTSC 561: There was two final exam questions on this SLO. Average score on the two questions was 50%. Question 1 was to show that the union of a countable set and an uncountable set is a uncountable set and to use the result to show that the set of irrational numbers is an uncountable set. This question builds on a question asked on the midterm exam that the union of two countable sets is a countable set. Both graduate students attempted this question. One of the students was able to connect the second part of the question to the first part but didn't prove the first part. The other student got some partial credit for knowing what a countable set is. Question 5 was to show that an inductively defined sequence is contractive and find its limit. Neither of the students chooses to answer this question.

For MTSC 621: There was four questions on this SLO. Average score on final exam for this SLO was 38.5%. Question 2 was to show that for any linear operator T, the range of T is a vector space and that if the dimension of the domain of T is equal to n, then the dimension of the range of T is less than or equal to n. 4 of 5 students choose to answer this question. Two of the students showed that the range of T is a vector space but didn't prove the dimension statement. One student remaining students knew that they needed to show that the range of T is closed under addition and multiplication by a scalar but didn't succeed in proving it. Neither of the three students proved the second part or made unproven assumptions to prove the second part. A forth student just restated the question. Question 3 was to prove for a linear operator T from X into Y with dimension of X = dimension Y = n that the range of T is equal to Y if and only if T^-1 exists. 4 of 5 students choose to answer this question. One of the 4 students was able to show that if T^-1 exists then the range of T is equal to Y. None of the four students were able to show that T^-1 exists. Question 4 was to find the norm of a particular linear functional. All 5 students choose to answer this question. Two of 5 students were able to find the norm of the linear functional. One of the other students was able to show that the norm of the functional was equal to or less than the correct value but not that its value was equal to the correct norm value. Two of the 5 students didn't have any idea how to find the norm of the linear functional.

**Findings (2012-2013) - Target: Met**

While the importance of this SLO is unquestionable, the students show sufficient mastery of the objective for many of the courses. All the
observed courses required this objective. Among them, as evidenced in the charts, MTSC 551, 571, 661 and 699 met the goal, while MTSC 500 and MTSC 562 are at 77% and 75% respectively. Comparatively, this is a very challenging goal even for most graduate students. Success rate of at least 80% will improve over the course of time as students get used to the nature of the SLO.

**Findings (2011-2012) - Target: Not Met**

In MTSC 561 (Real Analysis) as evidenced in the chart, students did not meet the goal. Traditionally, this is a very challenging course for most graduate students; it is one of the first proof-oriented graduate courses. Success rate of at least 80% will improve with time as students get used to the intensity of the course.

**SLO 2: Math (M.S) SLO-2: Read, Comprehend, and Communicate**

Students will demonstrate the ability to read, comprehend and communicate abstract mathematical concepts and procedures.

**Relevant Associations:**

**DSU Learning Goal Associations:**

6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.

**Related Measures:**

**M 2: Math (M.S) SLO-2**

Students' scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. We are not looking at how each individual student is meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

Source of Evidence: Comprehensive/end-of-program subject matter exam
Target:
A weighted score of at least 80% for each course indicates that students successfully demonstrated SLO1.

Findings (2016-2017) - Target: Met
----- Fall 2016 -------
Average score on this SLO is 100%. All students are able to incorporate the knowledge learned in this course to their research, and it is reflected by the following measurements on various CLOs. CLO1 (score of 100%): students are able to solve large linear system using direct and indirect numerical methods. CLO5 (score of 100%): students are able to solve ordinary differential equations using numerical methods.

----- Spring 2017 -----
Average score on this SLO is 91%.
*Average score of MTSC 500 is 94%. The MTSC 500 problems involved finding logical equivalences and determining if relations are functions.
*Average score of MTSC 651 is 100%. The student did well with basic PDE problems.
*Average score of MTSC 621 is 80%. One question asked them to show that the set of compact operators from one Banach space to other is a subspace of the Banach space of all bounded operators from a Banach space to another. A second question asked them to investigate some properties of shift operators on the Hilbert space l^2. Both questions were straightforward, testing their understanding of definitions, concepts, and how they communicate basic mathematical arguments.

- Spring 2017 - MS
- Fall 2016 - MS

Findings (2015-2016) - Target: Met
----- Fall 2015 -------
There was two final exam questions on this SLO, Average score on the two questions was 86%.
Question 2 was to prove Bernoulli's inequality: \( (1 + x)^n \geq 1 + nx \) for \( x > -1 \). It can be proven by mathematical induction. Both graduate students attempted this question. One student gave an excellent proof using mathematical induction. The other student tried to prove it by mathematical induction but messed up the main induction step.
Question 3 was four problems asking to determine if a sequence is convergent or divergent and find its limit if it is convergent. Both graduate students attempted this question. One student was able to determine if each sequence is convergent or divergent and compute all limits but not justify one of the limit values well. The other student was able to justify convergence or divergence except for one sequence.

----- Spring 2016 -----
For MTSC 561: There was two final exam questions on this SLO,
Average score on the two questions was 86%.
Question 2 was to prove Bernoulli's inequality: \((1 + x)^n \geq 1 + nx\) for \(x > -1\). It can be proven by mathematical induction. Both graduate students attempted this question. One student gave an excellent proof using mathematical induction. The other student tried to prove it by mathematical induction but messed up the main induction step.
Question 3 was four problems asking to determine if a sequence is convergent or divergent and find its limit if it is convergent. Both graduate students attempted this question. One student was able to determine if each sequence is convergent or divergent and compute all limits but not justify one of the limit values well. The other student was able to justify convergence or divergence except for one sequence.

For MTSC 621: There was four questions on this SLO. Average score on final exam for this SLO was 30.3%.
Question 5 was to prove for a linear independent set in normed space \(X\), there is a positive number \(c\) such that the norm of every linear combination of members in the linear independent set is equal to or greater than \(c\) times the sum of the absolute values of the scalars of the linear combination. 4 of 5 students choose to answer this question. One of 5 students gave a proof with one unjustified statement. Two of 5 students gave nothing useful toward a proof. One student tried to give a proof in the context of an inner product space rather than a normed space.
Question 6 was to prove that if \(X\) is a finite dimensional normed space, then every linear operator on \(X\) is bounded. 3 of 5 students attempted this question. It proof can be based upon the statement of question 5. One of 3 students gave a correct proof using the statement of question 5. One student started the proof but didn't use the result of question 5 to finish the proof. The last student gave no statements in the direction of a proof.
Question 9 was to show that if a Hilbert space \(H\) has an orthonormal sequence, then every \(x\) in \(H\) is expressible as an infinite linear combination of the members of the orthonormal sequence whose scalar coefficients are the Fourier coefficients of \(x\) with respect to the orthonormal sequence. 2 of 5 students choose to answer this question. One of the students gave the idea of the proof but no actual proof. The other gave statements that were off base.
Question 10 was to write a statement of the Riesz's Theorem and use the theorem to prove that the dual space of real space \(l^2\) is \(l^2\). 1 of 5 student choose to answer this question. The student gave an incorrect statement Riesz's Theorem and made no attempt to prove that the dual space of real space \(l^2\) is \(l^2\).

Findings (2016-2017) - Target: Met
------ Fall 2016 -------
Not reported
------ Spring 2017 ------
Average score on this SLO is 75%.
*Average score of MTSC 500 is 87%. This SLO was measure through proofs involving each area of the course MTSC 500.
*This SLO is not measured by MTSC 651. Average score of MTSC 621 is 87%.
*Average score of MTSC 621 is 63%. In one question, students needed to show that certain subspace of the Banach space of all bounded sequences, is not closed and identify its closure. In a second question they needed to verify a property for Hilbert spaces. A third question consisted of two parts. In part I, students needed to show that a special metric on the set of all continuous functions on a closed set is indeed a metric and in the second part, they were given a sequence and were required to show that the sequence was Cauchy but not convergent. Neither of the students were able to get full credits in these questions. Both students were able to carry the proofs to some extent. However, they had difficulty verifying details, lacked in rigor, and they had some flaws in their proofs, in some instances these were major flaws.

• Fall 2016 - MS

Findings (2015-2016) - Target: Met
-------- Fall 2015-----

There was five final exam questions on this SLO. Average score on the questions was 73.9%.

Question 4 was to define a "Cauchy sequence" and prove that every Cauchy sequence is bounded. Both graduate students attempted this question. Both students were able to write the definition of a Cauchy sequence other for an incorrect symbol usage by one student. One student was able to give a proof of the second part based upon a much stronger theorem rather than based upon the definition.

Question 8 was to establish the convergence or divergence of two series. Both students choose to answer this question. One student was able to justify convergence or divergence of each series. The other student describes which series are converges or diverges but with no justification.

Question 9 was to find the limit of four functions if its limit exists and justify its limit value based upon limit theorems covered. Each student got the correct limit values for the functions whose limit exists. One student didn't give the theorems used. Neither student gave complete justification for why one limit did not exist.

Question 6 was to show that if the series sum An with An > 0 is convergent then the series sum An^2 is convergent. 1 of 2 students chooses to answer this question but gave an incorrect argument for its proof.

Question 7 was to prove that a function f is continuous at point c in its domain if and only if f is sequentially continuous at c. 1 of 2 students chooses to answer this question. The student gives a proof based upon a limit criterion of continuity of a function at a point which is not equivalent to continuity of a function at a point in all cases.
For MTSC 561: There was five final exam questions on this SLO. Average score on the questions was 73.9%.
Question 4 was to define a "Cauchy sequence" and prove that every Cauchy sequence is bounded. Both graduate students attempted this question. Both students were able to write the definition of a Cauchy sequence other for an incorrect symbol usage by one student. One student was able to give a proof of the second part based upon a much stronger theorem rather than based upon the definition.

Mission / Purpose

The mission of the Mathematical Sciences Department is to provide for the people of Delaware and others who are admitted to the University the language, structure, beauty, relevance, utility, and pedagogy of mathematics, to make contributions to areas in mathematics, mathematics education and related disciplines, and to recruit, retain, and graduate students who can make positive contributions to their professions and their community.

The purpose of the Mathematical Sciences Department is to provide for the people of Delaware and others who are admitted to the University with opportunities to develop advanced levels of quantitative literacy, skills in the use of mathematical analysis and mathematical modeling, and to develop advanced skills in the teaching and learning of mathematics. The department of Mathematical Sciences also seeks to make positive contributions to the local community, the state, and the larger community through research in pure, applied mathematics and mathematics education. The Department's mission statement complements the university mission statement by focusing on meaningful, and relevant education that contributes to both the liberal and professional aspects of higher education.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning Goals

All Mathematics Education (B.S.) majors registered in mathematical science courses will develop proficiency in mathematics.

Associated required courses (not all courses are evaluated):

- MTSC 203 College Geometry
- MTSC 213 Discrete Mathematics
- MTSC 241 Statistics
- MTSC 251 Calculus I
- MTSC 252 Calculus II
MTSC 253 Calculus III
MTSC 313 Linear Algebra
MTSC 341 Probability
MTSC 411 Algebraic Structures I
MTSC 403 Methods of Teaching Secondary Mathematics

SLO 1:UG SLO-1 Breadth and Depth

Students will demonstrate conceptual knowledge and procedural mathematics methods (i.e., breadth and depth knowledge of facts, concepts, principles, and algorithms) to solve textbook exercises and real world problems. This includes using elementary and advanced mathematics, estimation, checking answers for reasonableness, identifying alternatives, selecting optimal results and using technology/tools.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators

Related Measures:

M 1:UG SLO-1

Students’ scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. For example, "success rate of SLO 1 in MTSC 213 is 78%" means in the course MTSC 213, all students who have taken the final exam, together have scored 78% on all questions associated with SLO 1. So, it is an overall approach where we are not looking at how each individual student meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

Source of Evidence: Comprehensive/end-of-program subject matter exam

Target:
A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO1.
Findings (2016-2017) - Target: Partially Met
----- Fall 2016------

Overall Math Ed performance = 76.58% (Met). 213: Students demonstrated procedural fluency in this course. Overall students scored 72%, and Math Ed students averaged 96% in this area. 251: For this course, the average performance on this SLO was 54%. Nine out of 15 questions were in this category. Questions were finding the limits of various functions both algebraically and graphically; computing derivatives and higher order derivatives; computing differential; finding the derivative using the limit definition; determining the points of discontinuity; computing definite and indefinite integrals. Questions tested students' basic conceptual understanding and how well they could carry out procedural methods. Students demonstrate difficulty in both areas. It is noted that this course is one of the first courses that majors complete. Student proficiency in this area shows a general improvement over the course sequence. 411: Overall student average is 79%. One question determined whether the dihedral group was abelian, or cyclic, finding orders of each element, and finding cyclic subgroups of the dihedral group. All students except one performed 90%-100%. There were three questions in the in-class exam. One was to determine for a function whether it is a homomorphism, one-to-one, or onto and they needed to find its kernel. Their performance over that question is 88%. In a second question they were supposed to determine for a concrete subgroup whether it was normal or not, and write out the members of the quotient group. The majority of students had difficulty writing the members of the quotient group. In the third question, they were supposed to find the greatest common divisor of two numbers using Euclid's algorithm. All students got 7 or 8 out of 8 in this question. Overall, the majority of students understand the concepts well and can carry out procedural mathematics.

-------Spring 2017-------

Overall Math Ed performance = 68.11% (Not Met). 203:A procedure is applied accurately and most of the time efficiently. Students were very adept at deciding whether their solution made sense in the context of the problem and would ask questions if something did not make sense. For the most part they did not rely on a rehearsed procedure to arrive at a solution to a problem. 81%. 251: Average performance: 45%. Math major performance: 100%. Math Ed Major performance: 40%. Nine out of 15 questions were in this category. Questions were finding the limits of various functions both algebraically and graphically; computing derivatives and higher order derivatives; computing differential; finding the derivative using the limit definition; determining the points of discontinuity; computing definite and indefinite integrals. Questions were straightforward and tested basic conceptual understanding of students and how well they can carry out procedural methods. Students have had difficulty in both aspects. 313 A calculation is performed appropriately, but there is a lack of understanding of underlying concepts that are inherent in the procedure when interpreting results. Or, it is evident that the correct procedure is applied, but the calculation is flawed. ALL = 59%. Math Education majors = 83.33%. 491: SLO not measured this term.
Findings (2015-2016) - Target: Met

-----Fall 2015-----
Final exam data across both sections of the MTSC 105 course for Fall 2015 indicate that students successfully met several CLOs. Using the 70% target for success for each question, data show that students were successful in the following CLOs: 2, 3, 4, 7, 9, 11, 13, 16, 17, 19 and 21. (Previous Fall semester: 1, 6, 7, 11, 12, 14, 16, 21, and 24)

-----Spring 2016-----
Final exam data across both sections of the MTSC 105 course for Fall 2014 indicate that students successfully met several CLOs. Using the 70% target for success for each question, data show that students were successful in the following CLOs: 1, 6, 7, 11, 12, 14, 16, 21, and 24. objectives. Additional time spent on these objectives early in the semester likely contributed to student proficiency. The definitions of numeral, quantity, and number are introduced at the beginning of the course and use them throughout. If different contexts, however, students are not precise in distinguishing between the three.

Findings (2014-2015) - Target: Partially Met

The number of students in each of the 3 courses is too small to draw a conclusion for meeting SLOs \( n(251)=1; n(317)=2 : n(403)=2 \).

There was a mixed performance for students demonstrating conceptual and procedural mathematics knowledge in Fall 2014 MTSC 251, 317, and 403 with SLO 1 averages of 94%, 50%, and 75% respectively. Weighed Averager 68.8%

For the methods course MTSC 403, although students meet the Acceptable range with an average of 2.3 points (SD 0.35), it is preferred that most meet the Target range with averages higher than 2.5 points. Students should have a deeper knowledge of mathematics at the high school level and their score reflects them meeting but not exceeding that knowledge as desired.

- Fall 2016 BS ED

- Spring 2016 BS-ED-Data
- Fall 2015 BS-ED data

- Fall 2014 BS Math Ed SLO & CLO Charts
Findings (2013-2014) - Target: Not Met
Students were unsuccessful in demonstrating conceptual and procedural mathematics knowledge in the content courses MTSC 203, 253, 351, and 411, with SLO 1 averages of 52%, 54%, 54%, and 35% respectively.

According to the MTSC 203 instructor, students appear to do well on homework assessments, but not on the cumulative final exam.

For the methods course MTSC 403, although students meet the Acceptable range with an average of 2.35 points (SD 0.29), it is preferred that most meet the Target range with averages higher than 2.5 points. For mathematics education majors, their average score on SLO 1 is 78%, which is consistent with the average point score for all students enrolled in MTSC 403. Students should have a deeper knowledge of mathematics at the high school level and their score reflects them meeting but not exceeding that knowledge as desired.

- Spring 2014 MTSC 498

Findings (2012-2013) - Target: Partially Met
Data represents F2012 final exam assessments BS Mathematics Education majors only. Only 1 Math Ed major in MTSC 241 - Statistics and MTSC 451 - Advanced Calc I. Students successfully met SLO1. Three Math Ed majors in 251- Calculus 1. However, only one student successfully met SLO 1. Two Math Ed majors in 313 - Linear Algebra. They were unsuccessful in meeting SLO 1. Final, there were 3 Math Ed majors in 411 - Algebraic Structures. Students successfully met SLO 1. Students registered in MTSC 241,251,313 did not consistently demonstrate conceptual and procedural skill in classes that are heavily computational. MTSC 411, and 451 are proof based courses. In particular, students appear to be more successful in proof based courses than computational courses. This may be due to students improving their understanding of mathematics as they progress to higher level courses. However, in order for this analysis to be meaningful, we will need more student data to make clear judgments about students achieving SLO1. Small numbers of 1-3 students does not provide insight for improving teaching or student learning.

Connected Document
Findings (2011-2012) - Target: Partially Met

Currently, the data covers all those who took upper-level mathematics courses. In the future we will categorize the data according to the major. Students registered in MTSC 251, 252, 253, and 313 did not successfully demonstrate SLO1. These courses are computational in nature, unlike MTSC 213, 319, 411, and 498 which are proof based courses. In particular, students appear to have difficulty solving computation problems. This may be due to a lack of understanding of the concepts taught during class.

Relevant Associations:

DSU Learning Goal Associations:

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 2:UG SLO-2

Students' scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. For example, "success rate of SLO 1 in MTSC 213 is 78%" means in the course MTSC 213, all students who have taken the final exam, together have scored 78% on all questions associated with SLO 1. So, it is an overall approach where we are not looking at how each individual student meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

Source of Evidence: Comprehensive/end-of-program subject matter exam

Target:

A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO2

Findings (2016-2017) - Target: Partially Met

-----Fall 2016-----

Overall Math Ed Performance = 82.63% (Met).

213: Students were able to use and understand basic mathematics terminology in problems. While overall, students scored 79%, Math Ed students averaged 100%. 251: In this course, the average performance was 14%. The two questions that corresponded to this SLO included an applied optimization problem and a problem requiring finding the area of the region enclosed by the x-axis and a parabola. Only a minority of students were able to answer both question correctly and most did not attempt the question, despite similar questions included in the online homework. 411: Overall performance for this CLO was 86.78%. This CLO was assessed by a question requiring finding some arithmetic relationships in the dihedral group of order 8 and forming a multiplication table for the elements of the dihedral group. All students got perfect
score in this question. This CLO was also assessed using a question on equivalence classes. Students were to show that a given relation is an equivalence relation and determine the members of some of the equivalence classes. Their performance in this question was 9 out of 12. Half of the students had difficulty determining the members of the equivalence classes. 491: Students demonstrated their ability to communicate verbally through in class presentations. Students also designed and led class activities that required representing and interpreting mathematical information in a variety of forms. The average scores of 92% overall, and 93% for math ed majors.

-----Spring 2017-----

Overall Math Ed Performance = 67.9% (Not Met).
203: For the most part students used appropriate mathematical representations to solve problems. They became more skilled at this as the course progressed. They became less reliant on the actual picture and more reliant on what was portrayed by the labels and given information. 83% 251: Average performance: 17%. Math major performance: 100%. Math Ed Major performance: 8%. There were two questions that correspond to this SLO. One of them was an applied optimization problem. The other one was finding the area of the region enclosed by the x-axis and a parabola. Only a minority of students were able to answer both question correctly. Most of the students did not attempt the question. There were similar questions in their online hw.
313: An attempt is made to construct a mathematical representation to record and communicate problem solving but it is not accurate and/or is incomplete.
ALL = 60% 491: Students demonstrated their ability to communicate in an oral manner through their in class presentations. They also designed and led appropriate class activities. The average scores of 92% overall, 89% for math ed majors, and 94% for math majors all met the target measure.

**Connected Documents**
- Spring 2017 - BS - ED
- Fall 2016 BS ED

**Findings (2015-2016) - Target: Met**

CLO 1 focus on students' understandings of numeration systems and number sense. Data indicate that students are knowledgeable of the properties of numeration systems (70%), the Hindu-Arabic numeration system, and of based systems more generally (75.5%). Students also demonstrated success in (CLO6) ordering numerals (78.8%). Students were also successful with this CLO during the previous Fall semester (84%). CLOs 7, 11, and 14 reflect students' understandings of story problems. Students were successful in identifying the part whole relationship in addition and subtraction story problems (81.8%), demonstrating knowledge of the four categories of multiplication story problems (100%), and in demonstrating competencies in writing addition/subtraction and multiplication/division story problems (79.5%).
Students also demonstrated proficiency in creating diagrams to model and accurately solve addition/subtraction problems (CLO 16; 81.8%), extending the meanings of the operations to negative numbers (CLO 21; 81.2%), and understanding and performing algorithms for addition and subtraction (CLO 24; 70%).

-----Spring 2016------

Students demonstrated proficiency in constructing sets of measuring units for based place valued numeration systems (CLO3; 75.7%). Constructing MUs is introduced at the beginning of the course and is applied throughout the course. Students were able to represent the same quantity in different numeration systems. At times, however, students do not accurately construct the appropriate sets of MUs for each system. Students were able to represent the same quantity in different numeration systems. At times, however, students do not accurately construct the appropriate sets of MUs for each system. Also, when students are given the numeral for the quantity, rather than the quantity itself, they may not transfer strategies for representing quantities. This indicates some deficiency in student understanding.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target:**  
A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO3

**Findings (2016-2017) - Target: Not Met**  
-----Fall 2016-----
Overall Math Ed performance = 64.75% (Not Met).  
213: Students demonstrated proficiency in applying knowledge in less familiar contexts. Math Ed students averaged 100%. 251: The average performance was 25%. Students were asked to determine whether the
statement "every continuous function is differentiable" is true or false and to explain their answer. 411: The overall student performance was 59%. Students were asked to find all subgroups of the Dihedral group and form the lattice diagram. They were also asked to show that an equation has no integer solution using the natural homomorphism from Z onto Z_7. No student was able to solve the question.

-----Spring 2017-----
Overall Math Ed performance = 56.56% (Not Met). 203: Clear mathematical reasoning was present and most of the time it lead to a fully developed argument or conclusion. Students performed well on this type of task if they could take it out of the classroom and investigate it on their own for an extended period of time. 78% 251: Average performance: 4%. Math major performance: 100%. Math Ed Major performance: 0%. This question was a "related rates" problem. Given the radius of a circular plate and rate of change of the radius at given radius, they were supposed to find the rate of change of the area. Only one student got perfect score. One student made substantial progress but made calculation errors. A few students were able to relate rates, but were not able to compute derivatives. Remaining students either did not answer the question or wrote irrelevant answers. 313: A correct but inefficient strategy is chosen or an efficient strategy is chosen but implemented with some errors. Chosen strategies are based on the mathematical situation in the task. Evidence of solidifying prior knowledge and applying it to the problem-solving situation is present. Significant progress toward a solution is made. A correct answer is achieved most of the time. Arguments are constructed with adequate mathematical basis. Clear mathematical reasoning is present, but may not directly lead to a fully developed argument and/or conclusion. ALL = 60%, Math ED = 91.67%. 491: SLO not measured this term.

measure the success rate of students meeting one particular student learning
objective, we have to take into account the contribution from more than one
question. Since different question carries different possible value, weighted
approach is used to calculate the overall performance for each SLO. For
example, "success rate of SLO 1 in MTSC 213 is 78%" means in the course
MTSC 213, all students who have taken the final exam, together have scored 78% on all questions associated with SLO 1. So, it is an overall approach where we are not looking at how each individual student meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target:**
A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO4

**Findings (2016-2017) - Target: Partially Met**
-----Fall 2016-----
Overall Math Ed performance = 84.17% (Met).
213: Students did not demonstrate proficiency in writing mathematical statements (specifically contrapositives and converses). Math Ed students averaged 50% 251: The average student performance was 25%. Students were asked to determine whether the statement "every continuous function is differentiable" is true or false and explain their answer. Five students gave accurate answers. 15 students determined that the statement is false, but were not able to explain it. 411: Overall performance is 78%. Students were asked to write the definition of a cyclic group and to state Lagrange's theorem. With few exceptions, students responded correctly and expressed themselves in a coherent way. One question was an application of First isomorphism theorem. Most students knew first isomorphism theorem and were able to apply it in a basic setting. The last question was a true/false question which consisted of six parts. These were basic questions about properties of groups, application of basic theorems. Eight out of eleven students demonstrated a good understanding of definitions, concepts, and fundamental theorems of group theory, and were able to communicate their ideas. The other three had some gaps in their understanding and expressing themselves. 491: Students demonstrated their ability to read and communicate by sharing their opinion on class readings in class and writing papers. Averages scores was 99% for math ed majors which indicates that the target for this measure was met.

-----Spring 2017-----
Overall Math Ed performance = 54.2% (Not Met).

203: Students used the formal language of geometry throughout the course and frequent use of formal math terms was evident in most contexts. 80% 251: Average performance: 45%. Math major performance: 100%. Math Ed Major performance: 40%. Nine out of 15 questions were in this category. Questions were finding the limits of various functions both algebraically and graphically; computing derivatives and higher order derivatives; computing differential; finding the derivative using the limit definition; determining the points of discontinuity; computing definite and indefinite integrals. Questions were straightforward and tested basic conceptual understanding of students and how well they can carry out procedural methods. Students have had difficulty in both aspects. 313: A sense of audience or purpose is communicated. Verbal/written communication of an approach is evident through a methodical, organized, coherent, sequenced and labeled
response. Formal math language is used to share and clarify ideas. Frequent use of formal math terms or symbolic notation is evident, in any combination.

ALL = 60%, Math ED = 95%. 491: Students demonstrated their ability to read and communicate by sharing their opinion on class readings in class and writing papers. Averages scores of 93% overall, 96% for math majors, and 91% for math majors indicate that the target for this measure was met. 213: Students demonstrated proficiency in applying knowledge in less familiar contexts. Math Ed students averaged 100%. 251: The average performance was 25%. Students were asked to determine whether the statement "every continuous function is differentiable" is true or false and to explain their answer. 411: The overall student performance was 59%. Students were asked to find all subgroups of the Dihedral group and form the lattice diagram. They were also asked to show that an equation has no integer solution using the natural homomorphism from Z onto Z_7. No student was able to solve the question.

Findings (2015-2016) - Target: Partially Met
-------- Fall 2015--------

Students did not meet target or reach proficiency in demonstrating knowledge of 1) representing the same quantity with different based place valued numeration systems (CLO 5; 48.48%) 2) demonstrating competencies in making sense of and identifying children's invented algorithms knowing that children invent solution strategies for computational problems involving the four operations (CLO 22; 37.37%) 3) performing the invented, intermediate, and standard algorithms for multiplication (CLO 25; 39.39%) and 4) performing the invented, intermediate, and standard algorithms for division (CLO 25; 30.3%).

-------- Spring 2016--------

Significant class time is spent on developing students' abilities to distinguish division types and their connection to the meaning of multiplication. Students most often make use of these connections and their meaning, but may misassign the strategy name. They may not appropriately use the features of the divisor to make this determination, but may treat all divisors as if they are whole numbers. Students demonstrate competency in representing multiplication story problems using part whole diagrams. Students may find it difficult to translate from whole to decimal quantities, and also unclear on how to draw the part-whole representation when the number of groups (RS) is unknown. Students demonstrate competency in modeling multiplication. There is evidence however, that students do not have deep conceptual understandings of each part of the division model. That is, they proceduralize the process and have limited understandings of the models in terms of operating on actual quantities.

### Findings (2014-2015) - Target: Met

The number of students in each of the 2 courses is too small to draw a conclusion for meeting SLOs \( n(251)=1; n(403)=2 \).

SLO4 was measured for MTSC 251 and 403 only, in Fall 2014. Students were successful in demonstrating mathematics reading comprehension and communication in MTSC 251 and 403 with SLO 4 averages of 100% and 75% respectively. Weighted Average 83.3%

For the methods course MTSC 403, although students meet the Acceptable range with an average of 2.25 points (SD 0.35), it is preferred that most meet the Target range with averages higher than 2.5 points. They have several opportunities to demonstrate their knowledge of mathematics when writing lesson plans, and provide some information to demonstrate a deeper knowledge of those definition. Their score reflects them meeting but not exceeding that knowledge as desired.

### Connected Document
• *Fall 2014 BS Math Ed SLO & CLO Charts*

### Findings (2013-2014) - Target: Not Met

Students were unsuccessful in demonstrating mathematics reading comprehension and communication in their content courses. This reflects a lack of knowledge about mathematical definitions and theorems, and communicating their understanding of mathematical foundations in MTSC 203, and 411, with SLO 4 averages of 52%, and 50% respectively.

For the methods course MTSC 403, although students meet the Acceptable range with an average of 2.4 points (SD 0.14), it is preferred that most meet the Target range with averages higher than 2.5 points. They have several opportunities to demonstrate their knowledge of mathematics when writing lesson plans, and provide some information to demonstrate a deeper knowledge of those definition. In particular, mathematics education major average 81% on SLO 4, which reflects a growth in demonstrating mathematics reading comprehension and communication.

Findings (2012-2013) - Target: Partially Met
Data from F2012 final exam for BS Mathematics Education majors only. Similar to SLO1 and SLO2, students successfully met SLO4 in MTSC 241, 411, and 451, but were unsuccessful with SLO4 in MTSC 251, and 313. Again, reading and comprehending mathematics is directly linked to being able to successful compute mathematics, and making connections for various mathematical representations.

Connected Document
• Math Ed Charts F2012

Findings (2011-2012) - Target: Partially Met
Poor performance on SLO 1 can be directly related to SLO 4, which requires that student read and comprehend mathematics. If students cannot read and comprehend mathematical notation or statements, then they will have difficulty answering the questions.

SLO 5:UG SLO-5 Proofs

Students will be able to read and comprehend proofs and write logical and organized proofs.

Relevant Associations:

DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 5:UG SLO-5**

Students' scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. For example, "success rate of SLO 1 in MTSC 213 is 78%" means in the course MTSC 213, all students who have taken the final exam, together have scored 78% on all questions associated with SLO 1. So, it is an overall approach where we are not looking at how each individual student meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target:**

A weighted score of at least 70% for each course indicates that students successfully demonstrated SLO5

**Findings (2016-2017) - Target: Met**

-----Fall 2016-----

Overall Math Ed performance = 88.82% (Met).

213: Students had difficulties with proofs but were able to demonstrate proficiency. Math Ed students averaged 89%. 251: Not measured 411: Overall performance is 82%. Students were asked to show that the cartesian product of two groups is a group and show that a given subset of it was a normal subgroup. All students performed well in this question. Students were also asked to show a simple property of abelian groups using mathematical induction. The majority of students got full credits for this question. Finally students were asked to show a group of order 13 is cyclic, using Lagrange’s Theorem. Although two students were able to provide a perfect proof, half of the students had some idea how to prove. 491: Students demonstrated their ability to read and communicate by sharing their opinion on class readings concerning proofs in class. Averages scores of 100% for math ed majors.

-----Spring 2017-----

Overall Math Ed performance = 84.56% (Met).

203: When students do proofs on tests they are in the context of the topics that are in the chapter. When they have the context of the whole course to draw from students have a lot of trouble knowing what direction to go in to finish the proof. Some students will assume what they are trying to prove or use it to finish the proof. Students confuse
various methods of proof and try to use more than one method in a single proof. 67% 251: Not reported. 313: The proof structure, though correct, is needlessly complicated in some minor way. Some variable symbols are missing but can be understood from the context. The use of hypotheses is implied, but should be more explicit. The mathematical reasoning is mostly sound, but perhaps lacking in some minor way. ALL = 59%, Math ED = 86.67%. 491: Students demonstrated their ability to read and communicate by sharing their opinion on class readings concerning proofs in class. Averages scores of 94% overall, 100% for math ed majors, and 88% for math majors indicate that the target for this measure was met.

**Connected Documents**
- Spring 2017 - BS - ED
- Fall 2016 BS ED

**Findings (2015-2016) - Target: Partially Met**
-------- Fall 2015--------

CLO 1 focus on students’ understandings of numeration systems and number sense. Data indicate that students are knowledgeable of the properties of numeration systems (70%), the Hindu-Arabic numeration system, and of based systems more generally (75.5%). Students also demonstrated success in (CLO6) ordering numerals (78.8%). Students were also successful with this CLO during the previous Fall semester (84%). CLOs 7, 11, and 14 reflect students' understandings of story problems. Students were successful in identifying the part whole relationship in addition and subtraction story problems (81.8%), demonstrating knowledge of the four categories of multiplication story problems (100%), and in demonstrating competencies in writing addition/subtraction and multiplication/division story problems (79.5%). Students also demonstrated proficiency in creating diagrams to model and accurately solve addition/subtraction problems (CLO 16; 81.8%), extending the meanings of the operations to negative numbers (CLO 21; 81.2%), and understanding and performing algorithms for addition and subtraction (CLO 24; 70%).

--------Spring 2016--------

Students are less proficient with division modeling than modeling other operations. Students misinterpret the appropriate model; overgeneralizing partitioning division in ways that the divisor is always treated as if it is a whole number. Students demonstrate that they are developing the abilities to identify the key components of a sound justification. Students are not always thorough and detailed. While students met the CLO with respect to modeling multiplication, to translate in a way that reverses the direction of understanding of the model reveals deficiencies. This is connected to students’ tendency to proceduralize the models and miss/overlook key connections to actually operating on quantities. Students are generally consistent in extending the meanings of addition and multiplication to negative numbers. Subtraction requires, in some instances, representing the quantities (minuend) in a different way, by adding zero pairs. This is conceptually
and practically challenging for students to grasp. Also, with division students do not always make a distinction between the properties of integers and the implications of this for the model they choose in the same way they attend to implications of dividing by decimal quantities.

**Findings (2014-2015) - Target: Not Met**
SLO 5 was only measured in MTSC 317 (n(317)=2). In Fall 2014, students were unsuccessful (Average 53%) in their ability to read and comprehend proofs and write logical and organized proofs. MTSC 317 instructor stated there was a difficulty in understanding abstraction and deductive reasoning. Another area that needs to be improved is the construction and expression of proofs. These difficulties are probably caused by the increased level of difficulty of the above topics that require diligent and persistent efforts for 1) understanding how to approach a problem, 2) selecting a proof strategy, and 3) constructing the proof. No Math Ed Majors in 213, 241, 253, 411, 498.

**Connected Document**

Not measured.

**Findings (2015-2016) - Target: Not Met**  
------ Fall 2015------

CLO 1 focus on students’ understandings of numeration systems and number sense. Data indicate that students are knowledgeable of the properties of numeration systems (70%), the Hindu-Arabic numeration system, and of based systems more generally (75.5%). Students also demonstrated success in (CLO6) ordering numerals (78.8%). Students were also successful with this CLO during the previous Fall semester (84%). CLOs 7, 11, and 14 reflect students’ understandings of story problems. Students were successful in identifying the part whole relationship in addition and subtraction story problems (81.8%), demonstrating knowledge of the four categories of multiplication story problems (100%), and in demonstrating competencies in writing addition/subtraction and multiplication/division story problems (79.5%). Students also demonstrated proficiency in creating diagrams to model and accurately solve addition/subtraction problems (CLO 16; 81.8%), extending the meanings of the operations to negative numbers (CLO 21; 81.2%), and understanding and performing algorithms for addition and subtraction (CLO 24; 70%).

------ Spring 2016------

Students have narrow conceptions of algorithms and operating on quantities. Their thinking is limited to standard algorithms and calculator computations. While they recognize other strategies are viable, it is challenging to get them to value other strategies when the standard algorithm has proven valuable. The ability to view and make sense of others' work is conceptually challenging for students and requires openness and creativity and flexibility of thought. This level of proficiency is consistent with previous semesters. In particular, students are challenged by algorithms that are different from the standard. This is a cognitive shift that students are in the early stages of developing. Broadening their existing conceptions of algorithms and abilities to reason about unknown algorithms is an ongoing process. In this case also, limited time was spent on scaffolding algorithms only on the last day of classes. Students demonstrate abilities to distinguish between types of algorithms. They recognize, for example, that a distinction between standard and intermediate algorithm is the emphasis on place value ideas. However, students demonstrate limitations in connecting identified differences to teaching various algorithms.
Findings (2014-2015) - Target: Partially Met

SLO 7 was only measured in the methods course MTSC 403, in Fall 2014 (n(403)=2). Students meet the Acceptable range with an average of 2.22 points (SD 0.31). Percentage 74%. It is preferred that most meet the Target range with averages higher than 2.5 points. On average, these students were met 16 out of 16 course learning objectives mostly in the acceptable range. Areas of weaknness are as follows:
1) Students demonstrated some proficiency in identifying the embedded mathematical goals, but require additional experience in identifying subconcepts relevant to the mathematical goals.
2) Students demonstrated some proficiency in distinguishing between writing low level and high level questions. Students however, are inconsistent in applying this knowledge in their written and implemented lesson.
3) Students would benefit from additional opportunities to develop in the areas of effective collaboration and implementation of reflective practice.
4) Students successfully demonstrated conceptual understanding of mathematics content in some areas. At times, student knowledge, even of middle/elementary level mathematics is more procedural than conceptual. Students would benefit from additional opportunities to develop the mathematics knowledge needed for teaching (MKT).
5) Students have limited knowledge of technologies to be used in the classroom, and how those technologies can be used to develop children's mathematical thinking at a more than surface level. In some cases, technology is merely used for computation or display. In other cases, only the teacher used the technology.
6) Students demonstrated some success in engaging in reflection in order to effect change in learning. Students' reflection, however, in many cases focused on finding fault with students rather than identifying the ways in which instructions/learning conditions impact learning. There are all important components of being an effective teacher. They are currently meeting the minimum requirements.

Findings (2013-2014) - Target: Partially Met

SLO 7 was only measured in the methods course MTSC 403. Although students meet the Acceptable range with an average of 2.35 points (SD 0.30), it is preferred that most meet the Target range with averages higher than 2.5 points. On average, these students were met 14.5 out of 16 course learning objectives mostly in the acceptable range. Students designed lesson plans, and were measured in several pertinent areas.
They were unsuccessful in using assessment and data analysis to measure student learning. No students were able to meet Target on demonstrating knowledge of learning theories, using a variety of low and high level questioning, managing classroom activities, using technology to learn mathematics, reflection, and revision of lessons. There are all important components of being an effective teacher. They are currently meeting the minimum requirements.

**Findings (2012-2013) - Target: Partially Met**
Data from Final course grades for MTSC 403 Method of Teaching Secondary Mathematics. This course has rubrics for lesson planning and teaching using a variety non-traditional teaching practices to work with diverse populations, the use of technology for developing an understanding of mathematics, incorporating research finding in teaching practices, and using a variety of strategies to assess student learning.

Students earned the following averages...Technology project 69.2%; Lesson Planning 70%; Research and Teaching 60%. In particular, rubrics have 3 scores (Indicator not met, Indicator partially met, and Indicator met), of which the average scores for each indicator was between 2 and 3 points. The grade averages and indicators measure identify that students are partially demonstrating effective teaching and learning skills. In particular, they have the most difficulty making connections between research recommendation and teaching, creating lesson for diverse populations, designing a variety of different assessments, and incorporating technology and tool to help children understand mathematics. Students were most successful writing mathematical learning goals, making connections among various mathematical representations, and writing well organized and clear lesson plans.

**Findings (2011-2012) - Target: Partially Met**

All of the students demonstrated SLO 7, which is the ability to design and teach engaging lesson plans/units for diverse populations. The lesson plans/units will develop students' conceptual and procedural knowledge of mathematics, use a variety of teaching strategies, use a variety of strategies to assess student learning, and include the use of technology/tools. The mean performance on SLO 7 is 2.31 with a
standard deviation of 0.30. On average, these students were successful on 12.78 out of 14 course learning objectives.

Students’ scores on cumulative common final exams will be measured. In particular, each question in the final examination of a particular course is associated with at least one Student Learning Objective (SLO). Thus, to measure the success rate of students meeting one particular student learning objective, we have to take into account the contribution from more than one question. Since different question carries different possible value, weighted approach is used to calculate the overall performance for each SLO. For example, "success rate of SLO 1 in MTSC 213 is 78%" means in the course MTSC 213, all students who have taken the final exam, together have scored 78% on all questions associated with SLO 1. So, it is an overall approach where we are not looking at how each individual student meeting a particular student learning objective, rather we are trying to measure the collective response of the students in a particular course toward a particular SLO.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**

**test**
**Findings (2016-2017) - Target: Partially Met**

-----Fall 2016-----

Overall Math Ed performance = 77.6% (Met).

213: Not measured 251: Average performance was 43%. Students were to find local extrema, inflection point(s) of the function and determine its behaviour whether it is increasing/decreasing or concave up/down. About one third of students answered the question perfectly or almost perfectly. Almost half of the students did not get any points or got only a few points. Some of the remaining students were able to analyze the function based on first derivative, but not the second. Some others were able to analyze the behaviour of the function but were not able to determine local extrema or inflection points. Average performance for this question was 45%. In the second question, students were given the graph of velocity of a particle moving on a coordinate plane and were asked to make some interpretations regarding velocity and acceleration of the particle. Only a few students were able to give perfect or almost perfect answers. About a third of the students were not able to interpret any of the information correctly. Remaining students had some correct interpretations. 411: Overall performance on this CLO is 94.55%. Students were asked to show that the group of invertible matrices quotient the normal subgroup of matrices whose determinant is 1 is isomorphic to all nonzero real numbers. This was an application of the first isomorphism theorem which also helped them to refresh their linear algebra knowledge in a new setting.

-----Spring 2017-----

Overall Math Ed performance = 63.56% (Not Met).

203: Students are able to make mathematical connections in the proper context of each chapter and link the mathematics with the proper task, but if the problem is not necessarily in the context of a particular chapter students struggle with what course to take to solve the task. 82% 251: Average performance: 33%. Math major performance: 100%. Math Ed Major performance: 22%. There were two questions in this category. One of them was a standard question for which they were supposed to find local extrema, inflection point(s) of the function and determine its behaviour whether it is increasing/decreasing or concave up/down. About one sixth of students answered the question perfectly or made substantial progress towards the solution. Almost half of the students did not get any points or got only a few points. Some of the remaining students were able to analyze the function based on first derivative, but not the second. Some others were able to analyze the behaviour of the function but were not able to determine local extrema or inflection points. Some students calculated derivatives wrong or had errors with finding the zeros of the derivative. In a second question, students were given the graph of velocity of a particle moving on a coordinate plane and were asked to make some interpretations regarding velocity and acceleration of the particle. Most students successfully found the interval when the particle moves with constant speed, but they could not find when the body reverses direction or when the body’s acceleration is greater than 0. 313: Mathematical connections are used to extend the solution to other areas/fields of mathematics or to a deeper understanding of the mathematics in the task.

ALL = 60%, Math ED = 86.67%. 491: SLO not measured this term.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Technology

Continue the development/revision of courses to be implemented in the Fall 2010 and beyond. Faculty members are encouraged to infuse more technology in their courses where appropriate or necessary.

Established in Cycle: 2009-2010  
Implementation Status: In-Progress 
Priority: High  
Implementation Description: Most of the undergraduate Math courses are using coursecompass.  
Responsible Person/Group: Min Gibson  
Additional Resources Requested: Support from the IT dept

Hiring

Hire more full time faculty, create long term teaching positions to minimize the use of adjuncts.

Established in Cycle: 2009-2010  
Implementation Status: Planned 
Priority: High

Laboratory

More students need to be encouraged to take advantage of the resources and support systems that have been provided, particularly the Mathematics Laboratory.

Established in Cycle: 2009-2010  
Implementation Status: Finished 
Priority: High 
Implementation Description: Lab activities are becoming a culture of learning for those who would otherwise not like mathematics.  
Responsible Person/Group: The Lab Supervisor and student tutors. 
Additional Resources Requested: Consistent implementation of Lab fees to sustain the functioning of the Mathematics Laboratory in terms of equipment and
Data Collection

Data collection will begin Fall 2011

Project Completion Date: 08/31/2011
Final exam modifications
In the future we will categorize the data according to the major. The department is recommending that teachers for these courses teach more elementary proofs or real world applications to assist students in their understanding of mathematical computations. We recommend that final exam questions have a variety of different problem types. To accomplish this, we need to reduce the number of strictly computational problems that are associated with SLO 1.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: UG SLO-1 | Outcome/Objective: UG SLO-1 Breadth and Depth

Responsible Person/Group: Course coordinator and course instructors

Problem variety
It is recommended that teachers of these courses implement a variety of problem types during the lesson that help students identify similarities and difference between mathematical representation.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: UG SLO-2 | Outcome/Objective: UG SLO-2 Various Representations

Responsible Person/Group: Course coordinator and course instructors

Proof writing experiences
MTSC 213, 319, 411, and 498 are proof based courses. However, very few course instructors indicated that they are measuring students proof reading and writing skill. Again, instructors of these courses need properly identify which test questions are associated with proof writing and adjust the syllabus according. We recommend that coordinators of proof courses must include at least one proof on the final exam.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
**Measure:** UG SLO-5 | **Outcome/Objective:** UG SLO-5 Proofs

**Responsible Person/Group:** Course coordinators and course instructors

**Consolidate Course Data**
Combine data from various semester to get a bigger picture of SLO1 for Math Ed majors.

**Established in Cycle:** 2012-2013
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** UG SLO-1 | **Outcome/Objective:** UG SLO-1 Breadth and Depth

**Responsible Person/Group:** Course Coordinators/Instructors

**Connected Documents**
- Bachelor Math 2013-2014
- SLO averages for Math Bachelor’s Program

**Diversity and Technology Emphasis**
In the future, more emphasis should be placed on diversity, technology and designing assessments, without minimizing the effective lessons on learning goals and multiple representations. This could be accomplished by reducing the number of chapter summaries and incorporating a new technology project.

**Established in Cycle:** 2012-2013
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** UG SLO-7 | **Outcome/Objective:** UG SLO-7 Effective Teaching

**Responsible Person/Group:** Course Instructor.

**Problem variety**
It is recommended that teachers of these courses implement a variety of problems types during the lesson that help students identify similarities and difference between mathematical representation.

**Established in Cycle:** 2012-2013
**Implementation Status:** Planned
Proof Writing Experience
Although course instructors indicated that they are measuring students proof reading and writing skill, the exam questions are also associated with other SLOs. Instructors of these courses need to properly identify which test questions are associated with proof writing and adjust the syllabus accordingly. Also, for those courses that are proof based courses, more than one final exam question should be proof based to provide a clear picture of students' proof writing abilities.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: UG SLO-5 | Outcome/Objective: UG SLO-5 Proofs

Responsible Person/Group: Course coordinators/instructors

Additional opportunities to explore a variety of instructional technologies
Provide students additional opportunities to explore a variety of instructional technologies and their effective use in mathematics instruction. This can be achieved through additional in-class/out of class assignments. Design a new course to provide more opportunities to address technology.

Established in Cycle: 2013-2014
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: UG SLO-7 | Outcome/Objective: UG SLO-7 Effective Teaching

Encourage full time faculty to provide accurate data of student performance by major.
Encourage full time faculty to provide accurate data of student performance by major. Several courses had missing data, and missing student's major.

**Established in Cycle:** 2013-2014  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: UG SLO-1 | Outcome/Objective: UG SLO-1 Breadth and Depth

**Final exams for content courses**
Final exams for content courses needs to be redesigned to more specifically address individual SLO's and CLO's. In several courses, the final exam focused heavily on certain CLOs and therefore did not accurately measure student's overall learning. There needs to be a better mix of topics, proofs, exercises and applications

**Established in Cycle:** 2013-2014  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: UG SLO-5 | Outcome/Objective: UG SLO-5 Proofs

**SLO 1 Action Plan**

2) Findings indicate that students may have gaps and/or weaknesses in the prerequisite knowledge and proficiencies to be successful in their coursework. This may be addressed by evaluating course curricula to verify content and the appropriate sequencing of topics, and to discuss with faculty strategies for consistency in expectations and rigor across courses, perhaps, especially for those courses that are in sequence.

**Established in Cycle:** 2016-2017  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
**Measure:** UG SLO-1 | **Outcome/Objective:** UG SLO-1 Breadth and Depth

**Responsible Person/Group:** Program Coordinator

### SLO 4 Action Plan

3) Findings also provide some indication that students have limited proficiencies in reading mathematics texts with understanding and in effective strategies for studying mathematics. It is advisable for the department to address these issues collectively to identify instructional strategies and resources for improving student abilities in these areas.

**Established in Cycle:** 2016-2017
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** UG SLO-4 | **Outcome/Objective:** UG SLO-4 Read, Comprehend, and Communicate

**Responsible Person/Group:** Program Coordinator
Goals without Outcome/Objective Relationships Specified

G 1: Licensure Requirements
Students will meet the Licensure requirements for Middle Level Education

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Initial data will be available in May 2012. Data will be analyzed in July 2012.
The AMLE SPA approved the DSU AMLE Standards Portfolio in July 2011. Initial data will be available in May 2012. Data will be analyzed with summaries provided and course modifications made for September 2012.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Projected Completion Date: 09/15/2012
Responsible Person/Group: Dr. Faith Newton
Additional Resources Requested: 0
Budget Amount Requested: $0.00 (no request)

Collect, Analyze, Report Data to NCATE SPA ALME by September 15th
The data needs to be collected on all assessments this semester, entered into TK20, scored by the Professor, and then analyzed with recommendations and/or changes made based on the analysis of the data.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: Any changes or modifications to the courses will be made for the Fall 2012 courses dependent upon the data results.
Projected Completion Date: 09/15/2012
Responsible Person/Group: Dr. Faith Newton
Additional Resources Requested: 0
Budget Amount Requested: $0.00 (no request)

Collect, Analyze, Report Data to NCATE SPA ALME by September 15th 2011-2012
The AMLE SPA approved the Integrated, Interdisciplinary Thematic Unit in July 2011. Initial data will be available in May 2012.
Collect, enter, analyze data
The data needs to be collected on all assessments this semester, entered into TK20, scored by the Professor, and then analyzed with recommendations and/or changes made based on the analysis of the data.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: After the data has been analyzed, then the course content or instructional strategies and learner goals may need to be modified based on the results. Data needs to be summarized and prepared for the NCATE AMLE SPA Report due September 15, 2012.
Projected Completion Date: 06/15/2012
Responsible Person/Group: Dr. Faith Newton
Budget Amount Requested: $0.00 (no request)

Data to be collected in May 2012; analyzed and summarized by September 2012.
The AMLE SPA approved the DSU AMLE Standards Portfolio in July 2011. Initial data will be available in May 2012. Data will be analyzed, summarized with recommendations made to the NCATE SPA AMLE by September 15, 2012.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: Analyze and make curricular changes based on the data.
Projected Completion Date: 09/15/2012
Responsible Person/Group: Dr. Faith Newton
Additional Resources Requested: 0
Budget Amount Requested: $0.00 (no request)

Data will be collected and analyzed for any recommended changes to the courses.
The AMLE SPA approved the DSU AMLE Standards Portfolio in July 2011. Initial data will be available in May 2012.

Established in Cycle: 2011-2012  
Implementation Status: Planned  
Priority: High  
Projected Completion Date: 09/15/2012  
Responsible Person/Group: Dr. Faith Newton  
Additional Resources Requested: 0  
Budget Amount Requested: $0.00 (no request)

Data will be collected, analyzed with suggested changes to middle level course content.

The AMLE SPA approved the DSU AMLE Standards Portfolio in July 2011. Initial data will be available in May 2012. Data will be analyzed, summarized with recommendations made to the NCATE SPA AMLE by September 15, 2012.

Established in Cycle: 2011-2012  
Implementation Status: Planned  
Priority: High  
Implementation Description: Data will be collected, analyzed and summarized for the NCATE SPA AMLE report due on September 15, 2012.  
Projected Completion Date: 09/15/2012  
Responsible Person/Group: Dr. Faith Newton  
Additional Resources Requested: 0  
Budget Amount Requested: $0.00 (no request)
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Research Proposal in Neuroscience
After completing initial courses select a committee of 5 faculty to present a laboratory-based research proposal in an area of Neuroscience

SLO 1: Core Knowledge in Neuroscience
Demonstrate knowledge by completing your 4 required neuroscience graduate courses; also complete core general biology courses

Related Measures:

M 1: Thesis Completion
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

Target:
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without adequate demonstration of core knowledge in Neuroscience. All graduates must complete this milestone.

Findings (2016-2017) - Target: Met
During the 2016-17 academic year, one student in the program was eligible to defend a thesis. This student completed a successful thesis defense that was judged by their thesis committee to have demonstrated adequate core knowledge.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Measurement revision
Established in Cycle: 2016-2017
All measures will be revised as they do not adequately measure student progress through the program

SLO 2: Neuroscience Literature Knowledge
Demonstrate knowledge of neuroscience scientific literature in your research through use of references and proposal presentation

Related Measures:

M 1: Thesis Completion
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without adequate demonstration of the use of the scientific literature. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, one student in the program was eligible to defend a thesis. This student completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficient knowledge of the neuroscience literature.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Revised Measures**
*Established in Cycle: 2016-2017*
All measures will be revised as they do not adequately measure student progress through the program.

**SLO 3: Scientific Method**
Demonstrate through the experimental design of your proposed Neuroscience laboratory research project the ability to conduct hypothesis testing

**Related Measures:**

**M 1: Thesis Completion**
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without demonstration of proficient use of the scientific method in the conduct of their research project. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, one student in the program was eligible to defend a thesis. The student completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficient use of the scientific method in the development of a research program.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.
Revised Measures
Established in Cycle: 2016-2017

All measures will be revised as they do not adequately measure student progress through the program.

G 2: Perform Research and Present Findings
After completing all courses, and performing the proposed neuroscience laboratory-based research project, defend the results to your committee in an open forum to the scientific community.

SLO 3: Scientific Method
Demonstrate through the experimental design of your proposed Neuroscience laboratory research project the ability to conduct hypothesis testing.

Related Measures:

M 1: Thesis Completion
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

Target:
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without demonstration of proficient use of the scientific method in the conduct of their research project. All graduates must complete this milestone.

Findings (2016-2017) - Target: Met
During the 2016-17 academic year, one student in the program was eligible to defend a thesis. The student completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficient use of the scientific method in the development of a research program.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Revised Measures
Established in Cycle: 2016-2017

All measures will be revised as they do not adequately measure student progress through the program.

SLO 4: Conducting Neuroscience Research
Under the guidance of a research advisor (and consulting with your committee) complete proposed Neuroscience experiments with laboratory experiments while making adjustments to techniques used and/or design if needed.
**Related Measures:**

**M 1: Thesis Completion**
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without proficient conduct of neuroscience research. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, one student in the program was eligible to defend a thesis. This student completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficient conduct of scientific research in the development of a research project.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Revised measures**

*Established in Cycle: 2016-2017*

All measures will be revised as they do not adequately measure student progress through the program.

**SLO 5: Defense Preparation**
Upon completion of research as proposed, verified by advisor and committee, prepare a public presentation on the research project and your experimental outcome.

**Related Measures:**

**M 1: Thesis Completion**
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without demonstration the ability to prepare a defense presentation for their neuroscience research project. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, one student in the program was eligible to defend a theses. This student completed a successful thesis defense that was judged by their thesis committee to have demonstrated
proficiency through the successful preparation of a defense of their thesis.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Revised measures**
*Established in Cycle: 2016-2017*
All measures will be revised as they do not adequately measure student progress through the program.

**SLO 6: Scientific Communication**
Make a presentation to your committee and to the scientific public (advertised for 14 days) on your research findings and answer questions from both

**Related Measures:**

**M 1: Thesis Completion**
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without demonstration of proficient communication to an audience through their thesis defense presentation. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, one student in the program was eligible to defend a thesis. This student completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficiency in scientific communication through their public presentation of their scientific results from their thesis.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Revised measures**
*Established in Cycle: 2016-2017*
All measures will be revised as they do not adequately measure student progress through the program.

**G 3: Write an MS Thesis**
Report the Neuroscience research project in a Thesis that complies with DSU format and quality standards and is approved by your complete committee.

**SLO 5: Defense Preparation**
Upon completion of research as proposed, verified by advisor and committee, prepare a public presentation on the research project and your experimental outcome.

**Related Measures:**

**M 1: Thesis Completion**
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without demonstration of the ability to prepare a defense presentation for their neuroscience research project. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, one student in the program was eligible to defend a thesis. This student completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficiency through the successful preparation of a defense of their thesis.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Revised measures**
*Established in Cycle: 2016-2017*
All measures will be revised as they do not adequately measure student progress through the program.

**SLO 6: Scientific Communication**
Make a presentation to your committee and to the scientific public (advertised for 14 days) on your research findings and answer questions from both

**Related Measures:**

**M 1: Thesis Completion**
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without demonstration of proficient communication to an audience through their thesis defense presentation. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, one student in the program was
eligible to defend a thesis. This student completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficiency in scientific communication through their public presentation of their scientific results from their thesis.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Revised measures**  
*Established in Cycle: 2016-2017*  
All measures will be revised as they do not adequately measure student progress through the program.

**SLO 7: Write an MS Thesis**  
Following DSU thesis guidelines convert your scientific findings to a completed thesis that is approved by your committee and by DSU academic administration for presentation to the Library for binding and accessible to all.

**Related Measures:**

**M 1: Thesis Completion**  
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**  
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without demonstration of proficient writing and organization of the results from their thesis research project. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**  
During the 2016-17 academic year, one student in the program was eligible to defend a thesis. This student completed a successful thesis defense that was judged by their thesis committee to have produced a satisfactory thesis which documents their graduate research project.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Revised measures**  
*Established in Cycle: 2016-2017*  
All measures will be revised as they do not adequately measure student progress through the program.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student learning goals

Student learning goals

SLO 1: Analysis

Analyze music on a harmonic and formal basis.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 2: Harmonic Analysis

Students will analyze the harmonic structure of a given musical example. This will typically be assessed in Music Theory IV on the midterm exam.

Source of Evidence: Writing exam to assure certain proficiency level

Target:
100% of students will analyze 70% of the example correctly.

Findings (2016-2017) - Target: Not Met

On the final for Music Theory IV, Spring of 2017, one major portion of the exam tested the students in the area of Harmonic Analysis.

The goal is for 100% of the students to score 70% or better on each of these two areas.

Area one included a harmonic analysis of a given figured bass including, in addition to conventional chords, secondary dominant, secondary leading tone, Neapolitan, and Augmented Sixth chords. 43% of students met this goal.
M 3: Formal analysis.
Students will analyze the formal structure of a given musical example. This will typically be assessed in Music Theory IV on the final exam.

Source of Evidence: Writing exam to assure certain proficiency level

Target:
For 100% of the students to score 70% or better in this area.

Findings (2016-2017) - Target: Met
On the final for Music Theory IV, Spring of 2017, one major portion of the exam tested the students in the area of Formal Analysis.

The goal is for 100% of the students to score 70% or better in this area.

This measure was a formal analysis of a Sonata by Beethoven to identify formal divisions such as exposition, development, recapitulation, as well as themes, transitions, and sequences.

71% of students met this goal.

M 4: Aural Music Identification Quiz
In MUSC 324 (Music History II), there are approximately six questions on the final exam where students will listen to musical examples and by aural clues identify the era when each work was written.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

SLO 2: Historical Perspectives
Classify music by era aurally and by written analysis.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 4: Aural Music Identification Quiz
In MUSC 324 (Music History II), there are approximately six questions on the final exam where students will listen to musical examples and by aural clues identify the era when each work was written.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target:**
100% of the students will show improvement from the pre test to the post test. B. All students will pass at least 75% of the questions on the post test.

**Findings (2016-2017) - Target: Not Met**
A. Currently this assessment is a post test only. Beginning in fall 2018 data will be collected and reported as a pre and post test.
B. 75% of students passed at least 75% of the questions on the post test.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Changes to frequency of assessment.**
*Established in Cycle: 2016-2017*
Based on general poor results in the past, the following changes will be implemented. 1. Increase frequency of listening quizze...

**SLO 3: Performance**

Students will perform as soloists and as members of both large and small ensembles.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**SLO 4: Technology**
Use notation, recording and aural skills software.

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Reassignment of faculty**

The music history courses will be reassigned to another faculty member.

**Established in Cycle:** 2012-2013
**Implementation Status:** Planned
**Priority:** High

**Projected Completion Date:** 05/16/2014
**Responsible Person/Group:** Chairman of the department

**Changes to frequency of assessment.**

Based on general poor results in the past, the following changes will be implemented.

1. Increase frequency of listening quizzes.
2. Upon completion of the quiz, real time feedback will be provided for every question on the quiz.

**Established in Cycle:** 2016-2017
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Aural Music Identification Quiz | **Outcome/Objective:** Historical Perspectives

**Projected Completion Date:** 08/31/2018
**Mission / Purpose**

The mission of the Music Department (from the 05-06 catalog) is to:

1. Prepare students for elementary and secondary music teaching positions;
2. Prepare students for graduate study in a related area of music;
3. Stimulate students' development of musical understanding and appreciation by offering appropriate courses, activities and ensembles for their participation;
4. Function as a viable service unit that meets the needs of the University and extended community;
5. Develop elementary education majors' musical skills and pedagogy that are necessary for them to integrate music in areas of the school curriculum.

**B. Vision**

The vision of the newly independent music department is currently being re-shaped and reformed as is evident in the department's new strategic plan (attached at Appendix 4).

**C. Strategic Plan**

The newly independent music department's 5-year strategic plan was formed as the result of two full day strategic planning retreats held in the mid-late fall 2007. The final draft (attached as Appendix 4) is dated 4-1-08 and addresses the following six large objectives, all of which are in line with the University's and CAHSS' strategic plans:
1. Increase enrollment and retention of music students
2. Review/revise music department curriculum
3. Renovate/replace existing music facility
4. Improve the quality and quantity of our pool of music major applicants through proactive and early intervention and outreach programs for pre-college students.
5. Enhance the aesthetic quality of life on campus by continuing to pursue ways in which the arts, and music in particular, might become a more integral part of campus life.
6. Improve assessment. Create new and improve/revise existing music department assessment tools at all levels and all stages, from the student's matriculation through graduation and beyond.

Additionally, the DSU Band Program's Strategic Plan entitled: "The State of the Storm" is attached at Appendix 5.

B. Vision

The vision of the newly independent music department is currently being re-shaped and re-formed as is evident in the department's new strategic plan (attached at Appendix 4).

C. Strategic Plan

The newly independent music department's 5-year strategic plan was formed as the result of two full day strategic planning retreats held in the mid-late fall 2007. The final draft (attached as Appendix 4) is dated 4-1-08 and addresses the following six large objectives, all of which are in line with the University's and CAHSS' strategic plans:

1. Increase enrollment and retention of music students
2. Review/revise music department curriculum
3. Renovate/replace existing music facility
4. Improve the quality and quantity of our pool of music major applicants through proactive and early intervention and outreach programs for pre-college students.

5. Enhance the aesthetic quality of life on campus by continuing to pursue ways in which the arts, and music in particular, might become a more integral part of campus life.

6. Improve assessment. Create new and improve/review/revise existing music department assessment tools at all levels and all stages, from the student's matriculation through graduation and beyond.

Additionally, the DSU Band Program’s Strategic Plan entitled: "The State of the Storm" is attached at Appendix 5.

**Goals without Outcome/Objective Relationships Specified**

**G 3: IMPROVE THE QUALITY AND QUANTITY OF OUR POOL OF MUSIC MAJOR APPLICANTS**

Improve the quality and quantity of our pool of music major applicants.

**Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**G 1: REVIEW AND REVISE PERFORMANCE ASSESSMENTS**

Review and revise existing performance rubric assessments. Create new rubric assessments as needed.

**O/O 1: Review and Revise Performance Assessments**

Review and revise existing performance rubric assessments. Create new rubric assessments as needed.

**Related Measures:**

**M 1: Rubric assessment creation for performance juries**

To review and revise the existing performance assessments. New rubric assessments for the instrumental and vocal performance juries have been created.
Source of Evidence: Performance in subsequent schooling feedback

**Target:**
To pilot test the new rubric assessments for the instrumental and vocal performance juries.

**Findings (2010-2011) - Target: Met**
The new rubric assessments for the instrumental and vocal performance juries have been completed by Dr. Yvonne Johnson and will be distributed to faculty to be piloted during the 2011-2012 academic year. These newly created performance assessments have been included below.

G 2: ENHANCE THE AESTHETIC QUALITY OF LIFE ON CAMPUS.

ENHANCE THE AESTHETIC QUALITY OF LIFE ON CAMPUS. CONTINUE TO PURSUE WAYS IN WHICH THE ARTS, AND MUSIC IN PARTICULAR, MIGHT BECOME A MORE INTEGRAL PART OF CAMPUS LIFE.

O/O 2: Enhance the Quality of Life on Campus

Enhance the quality of life on campus by providing (1) music concerts; (2) brown bag lunch concerts; (3) faculty recitals; (4) invited professional music entertainers; (5) music workshops and master classes; and (6) music forums

Related Measures:

M 2: Aesthetic Enhancements

The music department will provide (1) music concerts; (2) brown bag lunch concerts; (3) faculty recitals; (4) invited professional music entertainers; (5) music workshops and master classes; and (6) music forums

Source of Evidence: Student course evaluations on learning gains made

Target:

The music department aspires to provide the following amounts of aesthetic enhancements annually: (1) music concerts = 3; (2) brown bag lunch concerts = 2; (3) faculty recitals = 4; (4) invited professional music entertainers = 5; (5) music workshops and master classes = 6; (6) music forums = 2 per month.
Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 3: Develop Ideal Student Enrollment Target

Develop an ideal student enrollment target for the music department (including majors & non-majors) based on current and future (orchestra?) ensemble needs, ideal piano studio size (9-12 students), and faculty and facility resources.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
  9 Increase Enrollment through active recruitment efforts by admissions and faculty

Related Measures:

M 3: Increased Enrollment
Increase quality and quantity of music student enrollment (especially majors) and improve music department 5 year graduation rate (currently at 15%) to match and eventually exceed DSU and national 5 year graduation rates. Allocate music department-controlled budget SPECIFICALLY dedicated to music student recruitment for the printing and mailing of attractive music department brochures, posters, and other promotional materials including CD's & DVD's, which can now be recorded in-house. Music Department will continue to coordinate effectively with the Admissions Office on all such efforts.

Source of Evidence: Job placement data, esp. for career/tech areas

Target:
Students are selected based upon the quality of their vocal and/or instrumental performance as well as the quality of their interview. This is an ongoing process from year to year within the music department.

Findings (2010-2011) - Target: Not Reported This Cycle
New student performance data will be available in the 2011-2012 cycle due to the newly created vocal and instrumental rubric assessments which are currently being piloted.
Goals without Outcome/Objective Relationships Specified

G 1: Undergraduate critical thinking competency

Students in Natural Resources will demonstrate an understanding of the natural cycles found in ecosystems and demonstrate how humans impact those cycles.

G 2: Undergraduate analytical competency

Students in Natural Resources will be able to analyze information to determine the sustainability of natural systems.

G 3: Undergraduate written and oral competency

Students in Natural Resources will be able to present arguments on the value of the air, land and water resources, including the need to protect the resources and the products that they provide for man and the biotic and abiotic environment.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1: Communication, inquiry and critical thinking competency

1 UG Student Learning Goal: Competent communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information.

Relevant Associations:

DSU Learning Goal Associations:

1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 1: Assess information literacy skills

Assessment of students in the capstone course, (Ecosystems) ability to successfully address natural cycles found in the environment and human impact on them.

Source of Evidence: Academic indirect indicator of learning - other

Target:
80 percent of students will have an understanding of natural cycles found in
the environment and how humans impact those cycles.

**Findings (2016-2017) - Target: Met**
Target met. According to instructor overall rating, 100 percent of students in the ecosystems class were found to be able to address man's impacts on natural cycles at the satisfactory or above level.

**M 2: Assess oral competency**

Oral Communication ATC rubric: Assessment of students ability to orally discuss issues pertaining to natural systems.

Source of Evidence: Presentation, either individual or group

**Target:**
Eighty percent of students will be assessed as satisfactory or better able orally discuss issues dealing with natural systems.

**Findings (2016-2017) - Target: Met**
Target met. In the spring semester of 2017, all 7 Natural Resource majors that were assessed with their oral capabilities were rated at satisfactory or above in the Soils class using the ATC Rubric for Oral Communication. An additional 2 students of two were also rated satisfactory or above in the Soil and Water management class ATC rubric for oral communication.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**M 3: Undergraduate written competency**

Writing in the Major ATC rubric: Assessment of students ability to communicate issues surrounding Natural Resource systems in writing.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
Eighty percent of students will be able communicate in writing on issues related to natural systems.

**Findings (2016-2017) - Target: Met**
Target met. In the Spring semester of 2017, all five Natural Resource majors that were assessed with writing in the major in the Ornithology and one of one student enrolled in Soil Science class were rated at satisfactory or above.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.
Continue to assess student written and oral competencies

Established in Cycle: 2016-2017

Plans are to continue with the capstone assessment in Ecosystems and with Oral and Written effectiveness. Since numbers are smal...

SLO 2: Effective inquiry, critical thinking and independent learning skills

2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information.

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success.

Relevant Associations:

DSU Learning Goal Associations:

2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 4: Assess information literacy skills

Assessment of students in the capstone course, ecosystems, ability to identify and discuss sustainable practices in natural systems. Additionally, students were also assessed as part of the capstone experience with a rubric utilized in an across the curriculum assessment.

Source of Evidence: Capstone course assignments measuring mastery

Target:

Eighty percent of students in the ecosystems course will be able to recognize and discuss sustainable practices in natural systems.

Findings (2016-2017) - Target: Not Met

Target was not met. Eighty percent 4 of 5 of students in capstone courses (Ecosystems and Sustainable Agriculture) were observed to be able to identify sustainable practices in a Natural system.

M 5: Assess critical thinking and problem solving skills

Assessment of students in the capstone course ability to use critical thinking skills and problem solving skills to assess sustainable practices in natural systems. This is assessed through critical thinking/problem solving element of the senior capstone rubric.

Source of Evidence: Capstone course assignments measuring mastery

Target:

Eighty percent of students in the capstone course will have satisfactory or better abilities to critically assess and problem solve sustainable practices in natural systems.
Findings (2016-2017) - Target: Met
Target met. All totaled 5 of 5 students (100%) assessed in the capstone course were found to be satisfactory or above in both Critical Thinking Skills and with Problem Solving Skills, 5 of the 5 students (100%) were assessed as satisfactory as well.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Continue to assess measures to collect additional data
Established in Cycle: 2016-2017
Additional data is needed due to the smaller program size, so we plan to continue to assess these measures to further substantia...

M 6: Assess information literacy skills
Assessment of students in the ecosystems capstone course on their knowledge of the value of air, land and water resources and the need to protect those resources and the products that they provide for man and the biotic and abiotic environment. Data collected in an instructor collected assessment based on student discussion, writing, test taking and participation in the ecosystems course. Additionally, students were also assessed as part of the capstone experience with a rubric utilized to assess computer and informational literacy in an across the curriculum assessment.

Source of Evidence: Academic indirect indicator of learning - other

Target:
Eighty percent of the students in Ecosystems will have a satisfactory or better ability to present arguments on the value of our natural resources and the products they provide for man and the biotic and abiotic environment.

Findings (2016-2017) - Target: Met
Target met. One hundred percent of the students in the class were able to provide a satisfactory or better argument on the value of our natural resources and the products they provide man.

M 7: Assess information literacy skills
Assessment of students satisfactory information literacy skills as it relates to a better understanding of natural resources and their use by man.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
Eighty percent of students will have satisfactory or better skill sets as they relate to information literacy and their understanding of natural resources.

Findings (2016-2017) - Target: Met
Target met. Five of five (100 percent) of the students were assessed at the satisfactory level or above for the development of their information literacy skills.

M 8: Assess computer literacy skills
Assessment of students' computer literacy skills as they relate to their capstone experience in natural resources and their use by man.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
Eighty percent of students will have satisfactory or better skill sets as they relate to computer literacy and their understanding of natural resources.

**Findings (2016-2017) - Target: Met**
Target met. Two of two of the students were assessed on their computer literacy skills and found to be at or above the satisfactory level.

**Related Action Plans (by Established cycle, then alpha):**

**Continued monitoring of student success**
*Established in Cycle: 2016-2017*
Data will continue to be collected to insure observed trends in student success are accurate. Program numbers in natural resourc...

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Continue to assess measures to collect additional data**
Additional data is needed due to the smaller program size, so we plan to continue to assess these measures to further substantiate the findings.

*Established in Cycle: 2016-2017*
*Implementation Status: Planned*
*Priority: High*

**Relationships (Measure | Outcome/Objective):**
**Measure:** Assess critical thinking and problem solving skills | **Outcome/Objective:** Effective inquiry, critical thinking and independent learning skills

**Continue to assess measures to collect additional data**
Data will continue to be collected to ensure observed trends in student success are accurate. Program numbers in natural resources are low and several years of data will be beneficial to substantiate observed trends.

Established in Cycle: 2016-2017  
Implementation Status: Planned  
Priority: High

Relationships (Measure | Outcome/Objective):  
Measure: Assess computer literacy skills | Outcome/Objective: Effective inquiry, critical thinking and independent learning skills

Continue to assess measures to collect additional data  
Data will continue to be collected to insure observed trends in student success are accurate. Program numbers in natural resources are low and several years of data will be beneficial to substantiate observed trends.

Established in Cycle: 2016-2017  
Implementation Status: Planned  
Priority: High

Relationships (Measure | Outcome/Objective):  
Measure: Assess computer literacy skills | Outcome/Objective: Effective inquiry, critical thinking and independent learning skills

Continue to assess student written and oral competencies  
Plans are to continue with the capstone assessment in Ecosystems and with Oral and Written effectiveness. Since numbers are smaller in the Natural Resource Major we would like to get more data to support the accuracy of these findings.

Established in Cycle: 2016-2017  
Implementation Status: Planned  
Priority: High

Relationships (Measure | Outcome/Objective):  
Measure: Assess oral competency | Outcome/Objective: Communication, inquiry and critical thinking competency  
Measure: Undergraduate written competency | Outcome/Objective: Communication, inquiry and critical thinking competency
Continued monitoring of student success

Data will continue to be collected to insure observed trends in student success are accurate. Program numbers in natural resources are low and several years of data will be beneficial to substantiate observed trends.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Asses computer literacy skills | Outcome/Objective: Effective inquiry, critical thinking and independent learning skills
Goals without Outcome/Objective Relationships Specified

G 1: Statistical competency

Graduate students in Natural Resources will be able to demonstrate the principles of experimental design and statistical analysis in their projects.

G 2: Writing and speaking competency

Graduate students in Natural Resources will demonstrate sound organizational, writing and speaking skills in preparation and presentation of their theses.

G 3: Population dynamics

Graduate students in Natural Resources will be able to discuss animal and plant population dynamics and the mathematical theory underlying the models of population growth.
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Scientific Proposal
After completing initial neuroscience and core courses select a committee of 5 faculty to present a laboratory-based research proposal.

SLO 1: Core Knowledge in Neuroscience
Demonstrate knowledge by completing the 4 required neuroscience graduate courses; the required PhD advanced courses; and also complete core general biology courses

Related Measures:

M 1: Dissertation Completion
Successful completion and public defense of the PhD research project design by the student

Source of Evidence: Senior thesis or culminating major project

Target:
Will be measured indirectly through dissertation completion in that a dissertation cannot be successfully completed without demonstration of proficiency in core knowledge in neuroscience in the conduct of their research project. All graduates must complete this milestone.

Findings (2016-2017) - Target: Met
During the 2016-17 academic year, two students in the program were eligible to defend their dissertations. Both completed a successful dissertation defense that was judged by their dissertation committee to have demonstrated adequate core knowledge in neuroscience.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Revised measures
Established in Cycle: 2016-2017
All measures will be revised as they do not adequately measure student progress through the program.

SLO 2: Neuroscience Literature Knowledge
Demonstrate knowledge of neuroscience scientific literature in your research through use of references, preparation and completion of Comprehensive exam, and proposal presentation

Related Measures:
**M 1: Dissertation Completion**
Successful completion and public defense of the PhD research project design by the student

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through dissertation completion in that a dissertation cannot be successfully completed without demonstration of proficient use of the scientific literature in neuroscience in the conduct of their research project. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, two students in the program were eligible to defend their dissertations. Both completed a successful dissertation defense that was judged by their dissertation committee to have demonstrated proficient use of the scientific literature in the writing and defense of their dissertation.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Revised Measures**
*Established in Cycle: 2016-2017*
All measures will be revised as they do not adequately measure student progress through the program.

**SLO 4: Scientific Method**
Demonstrate through the experimental design of your proposed Neuroscience laboratory research PhD proposal (and your Oral portion of Comprehensive Exam) the ability to conduct hypothesis testing

**Related Measures:**

**M 1: Dissertation Completion**
Successful completion and public defense of the PhD research project design by the student

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through dissertation completion in that a dissertation cannot be successfully completed without demonstration of proficient use of the scientific method in the conduct of their research project. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, two students in the program were eligible to defend their dissertations. Both completed a successful dissertation defense that was judged by their dissertation committee to have demonstrated proficient use of the scientific method in the development of a research program.
Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Revised Measures
Established in Cycle: 2016-2017
All measures will be revised as they do not adequately measure student progress through the program.

G 2: Comprehensive Examination
Complete and successfully pass both the written (based on core neuroscience courses) and the oral presentation (based on a research proposal outside your intended thesis research)

SLO 1: Core Knowledge in Neuroscience
Demonstrate knowledge by completing the 4 required neuroscience graduate courses; the required PhD advanced courses; and also complete core general biology courses

Related Measures:

M 1: Dissertation Completion
Successful completion and public defense of the PhD research project design by the student

Source of Evidence: Senior thesis or culminating major project

Target:
Will be measured indirectly through dissertation completion in that a dissertation cannot be successfully completed without demonstration of proficiency in core knowledge in neuroscience in the conduct of their research project. All graduates must complete this milestone.

Findings (2016-2017) - Target: Met

*Established in Cycle: 2016-2017*  
All measures will be revised as they do not adequately measure student progress through the program.

**G 3: Perform a Neuroscience Research Project**
Following the proposal acceptance by your committee, conduct the neuroscience research while regularly meeting with your committee to discuss findings and make adjustments as needed

**SLO 4: Scientific Method**
Demonstrate through the experimental design of your proposed Neuroscience laboratory research PhD proposal (and your Oral portion of Comprehensive Exam) the ability to conduct hypothesis testing

**Related Measures:**

**M 1: Dissertation Completion**
Successful completion and public defense of the PhD research project design by the student

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through dissertation completion in that a dissertation cannot be successfully completed without demonstration of proficient use of the scientific method in the conduct of their research project. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, two students in the program were eligible to defend their dissertations. Both completed a successful dissertation defense that was judged by their dissertation committee to have demonstrated proficient use of the scientific method in the development of a research program.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Revised Measures**
Established in Cycle: 2016-2017
All measures will be revised as they do not adequately measure student progress through the program.

**SLO 5: Conducting Innovative Neuroscience Research**
Under the guidance of a research advisor (and consulting with your committee) complete proposed Neuroscience experiments for a PhD dissertation by addressing new problem with laboratory experiments while making adjustments to techniques used and/or design if needed

**Related Measures:**

**M 1: Dissertation Completion**
Successful completion and public defense of the PhD research project design by the student
Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through dissertation completion in that a dissertation cannot be successfully completed without demonstration of innovation and independence in the conduct of their research project. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, two students in the program were eligible to defend their dissertations. Both completed a successful dissertation defense that was judged by their dissertation committee to have demonstrated proficient conduct of an independent scientific research project in the process of writing and defending their dissertation.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Revised Measures**

*Established in Cycle: 2016-2017*
All measures will be revised as they do not adequately measure student progress through the program.

**G 4: Defend a PhD Research Project**
After completing all courses, and performing the proposed neuroscience, laboratory-based research project, defend the results to your committee in an open forum to the scientific community. An outside expert in the research area is added to committee at this point.

**SLO 6: Dissertation Research Defense and Communication**
Upon completion of research as proposed, verified by advisor and committee, prepare a public presentation on the research project and your experimental outcome. Make a presentation to your committee and to the scientific public (advertised for 14 days) on your research findings and answer questions from both. An additional committee member with expertise in your research area is added at this time to ensure quality and integrity of DSU degree

**Related Measures:**

**M 1: Dissertation Completion**
Successful completion and public defense of the PhD research project design by the student

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through dissertation completion in that a dissertation cannot be successfully completed without a successful defense of their research project which will include proficient communication of their project to an audience. All graduates must complete this milestone.
Findings (2016-2017) - Target: Met
During the 2016-17 academic year, two students in the program were eligible to defend their dissertations. Both completed a successful dissertation defense that was judged by their dissertation committee to have demonstrated proficiency through the successful preparation of a defense of their dissertation. In addition, as an integral part of their dissertation defense, these students have demonstrated proficiency in public communication through their public presentation of their scientific results from their dissertation.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Revised Measures
Established in Cycle: 2016-2017
All measures will be revised as they do not adequately measure student progress through the program.

G 5: Write a PhD Dissertation
Report the research project in a Dissertation that complies with DSU format and quality standards and is approved by your complete committee.

SLO 7: Write a PhD Dissertation
Following DSU dissertation guidelines convert your scientific findings to a completed report that is approved by your committee, including the additional expert, and by DSU academic administration for presentation to the Library for binding and accessible to all.

Related Measures:

M 1: Dissertation Completion
Successful completion and public defense of the PhD research project design by the student

Source of Evidence: Senior thesis or culminating major project

Target:
Will be measured through dissertation completion in that a Ph.D program cannot be successfully completed without demonstration of the writing of a satisfactory dissertation on the topic of their research project. All graduates must complete this milestone.

Findings (2016-2017) - Target: Met
During the 2016-17 academic year, two students in the program were eligible to defend their dissertations. Both completed a successful dissertation defense that was judged by their dissertation committee to have produced a satisfactory dissertation which documents their graduate research project.

Related Action Plans (by Established cycle, then alpha):
Revised Measures
Established in Cycle: 2016-2017
All measures will be revised as they do not adequately measure student progress through the program.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Revised measures
All measures will be revised as they do not adequately measure student progress through the program.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Dissertation Completion | Outcome/Objective: Core Knowledge in Neuroscience

Projected Completion Date: 12/15/2017
Responsible Person/Group: Graduate Committee

Revised Measures
All measures will be revised as they do not adequately measure student progress through the program.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Dissertation Completion | Outcome/Objective: Demonstrate Professional Competence

Projected Completion Date: 12/15/2017
Responsible Person/Group: Graduate committee

Revised Measures
All measures will be revised as they do not adequately measure student progress through the program.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Dissertation Completion | Outcome/Objective: Neuroscience Literature Knowledge

Projected Completion Date: 12/15/2017
Responsible Person/Group: Graduate Committee

Revised Measures
All measures will be revised as they do not adequately measure student progress through the program.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Dissertation Completion | Outcome/Objective: Dissertation Research Defense and Communication

Projected Completion Date: 12/15/2017
Responsible Person/Group: Graduate Committee

Revised Measures
All measures will be revised as they do not adequately measure student progress through the program.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Dissertation Completion | Outcome/Objective: Scientific Method

Projected Completion Date: 12/15/2017
Responsible Person/Group: Graduate Committee

Revised Measures
All measures will be revised as they do not adequately measure student progress through the program.
Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Dissertation Completion | Outcome/Objective: Conducting Innovative Neuroscience Research

Projected Completion Date: 12/15/2017
Responsible Person/Group: Graduate Committee

Revised Measures
All measures will be revised as they do not adequately measure student progress through the program.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Dissertation Completion | Outcome/Objective: Write a PhD Dissertation

Projected Completion Date: 12/15/2017
Responsible Person/Group: Graduate Committee
Goals without Outcome/Objective Relationships Specified

G 4: Advocacy for human flourishing
The graduate should advocate for patients and families in ways that promote their self-determination, integrity, and ongoing growth as human beings.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Nursing judgment
The graduate should make decisions in practice, substantiated with evidence, that integrate nursing science in the provision of safe, quality care and that promote the health of patients within the family and community context.

SLO 1: Patient-centered care
Plan, provide and delegate patient-centered care and coordinated care that promotes safe and high quality outcomes.

Relevant Associations:

DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Education, Health & Public Policy
2.2 Cultivate an environment of academic and professional excellence
9.2 Develop and implement a student outcome assessment plan
Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

Related Measures:

M 1: Clinical Evaluation
All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

Target:
Satisfactory rating for SLO 1 on the clinical course evaluation for all students in clinical (semester and year, i.e., junior or senior).

Findings (2016-2017) - Target: Met
Fall 2016- NURS307C: 100% of juniors completing the course passed
SLO 1; NURS309C 100% of juniors completing the course passed SLO 1; NURS407C: 100% of seniors completing the course passed SLO 1; NURS408C: 100% of seniors completing the course passed SLO 1.

Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 1; NURS316C 100% of juniors completing the course passed SLO 1; NURS409C: 100% of seniors completing the course passed SLO 1; NURS412C: 100% of seniors completing the course passed SLO 1.

Findings (2015-2016) - Target: Met
Fall 2015 -
NURS307C: 100% of juniors completing the course passed SLO 1;
NURS309C 100% of juniors completing the course passed SLO 1 (no data for 1 student);
NURS407C: 100% of seniors passed SLO 1; NURS408C: 100% of seniors passed SLO 1

Spring 2016 -
NURS311C: 100% of juniors passed SLO 1; NURS312C 100% of juniors passed SLO 1; NURS409C: 100% of seniors passed SLO 1; NURS412C: 100% of seniors passed SLO 1

Findings (2014-2015) - Target: Met
100% of juniors, NURS307 Fall 2014, passed SLO 1 (minimum score = 1.5)
100% of juniors, NURS312 Spring 2015, passed clinical objective 1 (minimum score = 2.0)
100% of seniors, NURS407 Fall 2014, passed clinical objective 1 (minimum score = 2.5)
100% of seniors, NURS412 Spring 2015, passed clinical objective 1 (minimum score = 3.0)

M 2:NCLEX-RN pass rate
NCLEX-RN pass rates meet state and national benchmarks.

Source of Evidence: Certification or licensure exam, national or state

Target:
80% pass rate

Findings (2016-2017) - Target: Met
For Class of 2017, n= 20 , NCLEX-RN pass rate was 90 % (TBA from DE Board of Nursing) [Preview Formatting]

Findings (2015-2016) - Target: Not Reported This Cycle
For Class of 2016, n= 36 , NCLEX-RN pass rate was ____ % (TBA from DE Board of Nursing)

Findings (2014-2015) - Target: Met
For Class of 2015, n=25, NCLEX-RN pass rate was 84%
M 3: Progression of clinical performance/semester

Students' clinical performance is expected to progress incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation:

Source of Evidence: Performance (recital, exhibit, science project)

<table>
<thead>

Target:
On clinical evaluations, 80% of juniors in Fall Semester will achieve a satisfactory rating for SLO #1; 85% of juniors in Spring semester will achieve a satisfactory rating for SLO #1; 90% of seniors in Fall semester will achieve a satisfactory rating for SLO #1; 95% of seniors in Spring semester will achieve a satisfactory rating for SLO #1.

Findings (2016-2017) - Target: Met
Fall 2016- NURS307C: 100% of juniors completing the course passed SLO 1 (minimum score = 1.5); NURS309C 100% of juniors completing the course passed SLO 1 (minimum score = 1.5), NURS407C: 100% of seniors completing the course passed SLO 1 (minimum score = 2.5); NURS408C: 100% of seniors completing the course passed SLO 1 (minimum score = 2.5). Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 1 (minimum score = 2.0); NURS316C 100% of juniors completing the course passed SLO 1 (minimum score = 2.0); NURS409C: 100% of seniors completing the
course passed SLO 1 (minimum score = 3.0); NURS412C: 100% of seniors completing the course passed SLO 1 (minimum score = 3.0)

**Findings (2015-2016) - Target: Met**

Fall 2015-
NURS307C: 100% of juniors completing the course passed SLO 1 (minimum score = 1.5); NURS309C 100% of juniors passed SLO 1 (minimum score = 1.5) [no data for 1 student];
NURS407C: 100% of seniors passed SLO 1 (minimum score = 2.5);
NURS408C: 100% of seniors passed SLO 1 (minimum score = 2.5)

Spring 2016 - NURS311C: 100% of juniors passed SLO 1 (minimum score = 2.0); NURS312C 100% of juniors passed SLO 1 (minimum score = 2.0); NURS409C: 100% of seniors passed SLO 1 (minimum score = 3.0); NURS412C: 100% of seniors passed SLO 1 (minimum score = 3.0)

**M 4: ATI exit exam**
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

**Target:**
A minimum average score of 70 on the Patient Centered Care subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

**Findings (2016-2017) - Target: Met**
In Spring 2017 semester, Class of 2017 Seniors scored 78.1 on the Patient Centered Care subscale of the ATI exit exam within 2 attempts.

**Findings (2015-2016) - Target: Met**
In Spring 2016 semester, Class of 2016 Seniors scored 70.8 on the Patient Centered Care subscale of the ATI exit exam within 2 attempts.
Action plan: continue to monitor.

**SLO 2: Professional communication**
Engage in interdisciplinary communication effectively and employ patient care technologies, information systems, and communication devices that support safe nursing practice.

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
College of Education, Health & Public Policy
9.2 Develop and implement a student outcome assessment plan
Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.

**Related Measures:**

**M 1: Clinical Evaluation**

All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**

satisfactory rating for SLO # 2 on the clinical course evaluation, based on the student's status in the nursing major (semester and year, i.e., junior or senior).

**Findings (2016-2017) - Target: Met**

Fall 2016 - NURS307C: 100% of juniors completing the course passed SLO 2; NURS309C 100% of juniors completing the course passed SLO 2; NURS407C: 100% of seniors completing the course passed SLO 2; NURS408C: 100% of seniors completing the course passed SLO 2.

Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 2; NURS316C 100% of juniors completing the course passed SLO 2; NURS407C: 100% of seniors completing the course passed SLO 2; NURS412C: 100% of seniors completing the course passed SLO 2.

**Findings (2015-2016) - Target: Met**

Fall 2015 -

NURS307C: 100% of juniors completing the course passed SLO 2; NURS309C 100% of juniors completing the course passed SLO2 (no data for 1 student); NURS407C: 100% of seniors passed SLO 2; NURS408C: 100% of seniors passed SLO 2

Spring 2016 -

NURS311C: 100% of juniors passed SLO 2; NURS312C 100% of juniors passed SLO 2; NURS409C: 100% of seniors passed SLO 2; NURS412C: 100% of seniors passed SLO 2

**Findings (2014-2015) - Target: Met**

Students' clinical performance is expected to improve incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation.

100% of juniors, NURS307 Fall 2014, passed clinical objective 2 (minimum score = 1.5)
100% of juniors, NURS312 Spring 2015, passed clinical objective 2 (minimum score = 2.0)
100% of seniors, NURS407 Fall 2014, passed clinical objective 2
100% of seniors, NURS412 Spring 2015, passed clinical objective 2 (minimum score = 3.0)

**M 2: NCLEX-RN pass rate**

NCLEX-RN pass rates meet state and national benchmarks.

Source of Evidence: Certification or licensure exam, national or state

**Target:**

80% pass rate

**Findings (2016-2017) - Target: Met**

For Class of 2017, n = 20, NCLEX-RN pass rate was 90% (TBA from DE Board of Nursing)

**Findings (2015-2016) - Target: Not Reported This Cycle**

For Class of 2016, n = 36, NCLEX-RN pass rate was ____% (TBA from DE Board of Nursing)

**Findings (2014-2015) - Target: Met**

For Class of 2015, n = 25, NCLEX-RN pass rate was 84%

**M 3: Progression of clinical performance/semester**

Students' clinical performance is expected to progress incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation:

M 4: ATI exit exam
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

Target:
A minimum average score of 70 on the Teamwork and collaboration subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

Findings (2016-2017) - Target: Met
In Spring 2017 semester, Class of 2017 Seniors scored 79.5% on the
Teamwork and collaboration subscale of the ATI exit exam within 2 attempts.

**Findings (2015-2016) - Target: Met**
In Spring 2016 semester, Class of 2016 Seniors scored 77.5 on the Teamwork and collaboration subscale of the ATI exit exam within 2 attempts.

**SLO 3: Leadership**
Synthesize leadership concepts, principles and ethical reasoning in decision making to ensure quality outcomes in providing client care in a variety of settings

**Relevant Associations:**

**DSU Learning Goal Associations:**
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Strategic Plan Associations:**
- **College of Education, Health & Public Policy**
  - 1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
  - 1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
  - 2.1 Students are provided with leadership opportunities through course work and academic governance
  - 4.1 Enhance community engaged partnerships and outreach
  - 6.1 Promote international experiences and programs for all students

- **Delaware State University**
  - 1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
  - 1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice

**Related Measures:**

**M 1:Clinical Evaluation**
All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

M 4: ATI exit exam
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

**Target:**
A minimum average score of 70 on the Leadership subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

**Findings (2016-2017) - Target: Met**
In Spring 2017 semester, Class of 2017 Seniors scored 81.8% on the Leadership subscale of the ATI exit exam within 2 attempts.

**Findings (2015-2016) - Target: Met**
In Spring 2016 semester, Class of 2016 Seniors scored 81.0 on the Leadership subscale of the ATI exit exam within 2 attempts.

**SLO 4: Standards of Care**
Integrate professional standards in the practice of nursing with integrity, caring, accountability, respect, and excellence in nursing practice

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
College of Education, Health & Public Policy
1.1 Obtain and/or maintain accreditation of programs
values and ethical standards identified by their professional organizations and accrediting bodies
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.2 Cultivate an environment of academic and professional excellence
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy

Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
4.2 Collaboratively develop and enhance programs for underrepresented groups and undeserved communities

Related Measures:

M 1: Clinical Evaluation
All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

Target:
satisfactory rating for SLO # 4 on the clinical course evaluation, based on the student's status in the nursing major (semester and year, i.e., junior or senior).

Findings (2016-2017) - Target: Met
Fall 2016 - NURS307C: 100% of juniors completing the course passed SLO 4; NURS309C 100% of juniors completing the course passed SLO 4; NURS407C: 100% of seniors completing the course passed SLO 4; NURS408C: 100% of seniors completing the course passed SLO 4.
Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 4; NURS316C 100% of juniors completing the course passed SLO 4; NURS409C: 100% of seniors completing the course passed SLO 4; NURS412C: 100% of seniors completing the course passed SLO 4.

Findings (2015-2016) - Target: Met
Fall 2015 -
NURS307C: 100% of juniors completing the course passed SLO 4;
NURS309C 100% of juniors completing the course passed SLO 4 (no data for 1 student);
NURS407C: 100% of seniors passed SLO 4; NURS408C: 100% of seniors passed SLO 4

Spring 2016 -
NURS311C: 100% of juniors passed SLO 4; NURS312C 100% of juniors passed SLO 4; NURS409C: 100% of seniors passed SLO 4; NURS412C: 100% of seniors passed SLO 4
Findings (2014-2015) - Target: Met
Students' clinical performance is expected to improve incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation.

100% of juniors, NURS307 Fall 2014, passed clinical objective 4 (minimum score = 1.5)
100% of juniors, NURS312 Spring 2015, passed clinical objective 4 (minimum score = 2.0)
100% of seniors, NURS407 Fall 2014, passed clinical objective 4 (minimum score = 2.5)
100% of seniors, NURS412 Spring 2015, passed clinical objective 4 (minimum score = 3.0)

M 2: NCLEX-RN pass rate
NCLEX-RN pass rates meet state and national benchmarks.

Source of Evidence: Certification or licensure exam, national or state

Target:
80% pass rate

Findings (2016-2017) - Target: Met
For Class of 2017, n= 20, NCLEX-RN pass rate was 90 % (TBA from DE Board of Nursing)

Findings (2015-2016) - Target: Not Reported This Cycle
For Class of 2016, n= 36, NCLEX-RN pass rate was _____ % (TBA from DE Board of Nursing)

Findings (2014-2015) - Target: Met
For Class of 2015, n=25, NCLEX-RN pass rate was 84%

M 3: Progression of clinical performance/semester
Students' clinical performance is expected to progress incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation:

Source of Evidence: Performance (recital, exhibit, science project)

<table>

II  Assisted  2.0  second semester of clinical practice

III  Assisted - Supervised  2.5  third semester of clinical practice

IV  Supervised - Self-directed  3.0  Final semester of clinical practice

**Target:**
On clinical evaluations, 80% of juniors in Fall Semester will achieve a satisfactory rating for SLO #4; 85% of juniors in Spring semester will achieve a satisfactory rating for SLO #4; 90% of seniors in Fall semester will achieve a satisfactory rating for SLO #4; 95% of seniors in Spring semester will achieve a satisfactory rating for SLO #4.

**Findings (2016-2017) - Target: Met**
Fall 2016- NURS307C: 100% of juniors completing the course passed SLO 4 (minimum score = 1.5); NURS309C 100% of juniors completing the course passed SLO 4 (minimum score = 1.5), NURS407C: 100% of seniors completing the course passed SLO 4 (minimum score = 2.5); NURS408C: 100% of seniors completing the course passed SLO 4 (minimum score = 2.5). Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 4 (minimum score = 2.0); NURS316C 100% of juniors completing the course passed SLO 4 (minimum score = 2.0); NURS409C: 100% of seniors completing the course passed SLO 4 (minimum score = 3.0); NURS412C: 100% of seniors completing the course passed SLO 4 (minimum score = 3.0)

**Findings (2015-2016) - Target: Met**
Fall 2015- NURS307C: 100% of juniors completing the course passed SLO 4 (minimum score = 1.5); NURS309C 100% of juniors passed SLO 4 (minimum score = 1.5) [no data for 1 student]; NURS407C: 100% of seniors passed SLO 4 (minimum score = 2.5); NURS408C: 100% of seniors passed SLO 4 (minimum score = 2.5)

Spring 2016 - NURS311C: 100% of juniors passed SLO 4 (minimum score = 2.0); NURS312C 100% of juniors passed SLO 4 (minimum score = 2.0); NURS409C: 100% of seniors passed SLO 4 (minimum score = 3.0); NURS412C: 100% of seniors passed SLO 4 (minimum score = 3.0)
M 4: ATI exit exam
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

**Target:**
A minimum average score of 70 on the Professionalism and Professional Skills subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

**Findings (2016-2017) - Target: Met**
In Spring 2017 semester, Class of 2017 Seniors scored 75% on the Professionalism and Professional Skills subscale of the ATI exit exam within 2 attempts.

**Findings (2015-2016) - Target: Met**
In Spring 2016 semester, Class of 2016 Seniors scored 72.9 on the Professionalism and Professional Skills subscale of the ATI exit exam within 2 attempts.

SLO 5: Collaboration; cultural competence
Collaborate with clients and healthcare professionals to provide safe, effective and culturally competent nursing care through the integration of knowledge and skills

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
College of Education, Health & Public Policy
1.4 Provide interdisciplinary learning experiences for students
4.1 Enhance community engaged partnerships and outreach

Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community
4.2 Collaboratively develop and enhance programs for underrepresented groups and undeserved communities

**Related Measures:**

**M 1: Clinical Evaluation**
All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.
Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
satisfactory rating for SLO # 5 on the clinical course evaluation, based on the student's status in the nursing major (semester and year, i.e., junior or senior).

**Findings (2016-2017) - Target: Met**

Fall 2016 - NURS307C: 100% of juniors completing the course passed SLO 5; NURS309C 100% of juniors completing the course passed SLO 5; NURS407C: 100% of seniors completing the course passed SLO 5; NURS408C: 100% of seniors completing the course passed SLO 5.

Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 5; NURS316C 100% of juniors completing the course passed SLO 5; NURS409C: 100% of seniors completing the course passed SLO 5; NURS412C: 100% of seniors completing the course passed SLO 5.

**Findings (2015-2016) - Target: Met**

Fall 2015 -
- **NURS307C:** 100% of juniors completing the course passed SLO 5;
- **NURS309C:** 100% of juniors completing the course passed SLO 5 (no data for 1 student);
- **NURS407C:** 100% of seniors passed SLO 5; **NURS408C:** 100% of seniors passed SLO 5

Spring 2016 -
- **NURS311C:** 100% of juniors passed SLO 5; **NURS312C** 100% of juniors passed SLO 5; **NURS409C:** 100% of seniors passed SLO 5; **NURS412C:** 100% of seniors passed SLO 5

**Findings (2014-2015) - Target: Met**

Students' clinical performance is expected to improve incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation.

- 100% of juniors, NURS307 Fall 2014, passed clinical objective 5 (minimum score = 1.5)
- 100% of juniors, NURS312 Spring 2015, passed clinical objective 5 (minimum score = 2.0)
- 100% of seniors, NURS407 Fall 2014, passed clinical objective 5 (minimum score = 2.5)
- 100% of seniors, NURS412 Spring 2015, passed clinical objective 5 (minimum score = 3.0)

**M 2:NCLEX-RN pass rate**

NCLEX-RN pass rates meet state and national benchmarks.

Source of Evidence: Certification or licensure exam, national or state
Target:
80% pass rate

**Findings (2016-2017) - Target: Met**
For Class of 2017, n= 20 , NCLEX-RN pass rate was 90 % (TBA from DE Board of Nursing)

**Findings (2015-2016) - Target: Not Reported This Cycle**
For Class of 2016, n= 36 , NCLEX-RN pass rate was ____ % (TBA from DE Board of Nursing)

**Findings (2014-2015) - Target: Met**
For Class of 2015, n=25, NCLEX-RN pass rate was 84%

**M 3:Progression of clinical performance/semester**

Students' clinical performance is expected to progress incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation:

M 4: ATI exit exam
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

Target:
A minimum average score of 70 on the Patient Centered Care subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

Findings (2016-2017) - Target: Met
In Spring 2017 semester, Class of 2017 Seniors scored 78.1 on the Patient Centered Care subscale of the ATI exit exam within 2 attempts.

Findings (2016-2017) - Target: Met
In Spring 2017 semester, Class of 2017 Seniors scored 78.1 on the Patient Centered Care subscale of the ATI exit exam within 2 attempts.

Findings (2015-2016) - Target: Met
In Spring 2016 semester, Class of 2016 Seniors scored 70.8 on the Patient Centered Care subscale of the ATI exit exam within 2 attempts.
SLO 6: Clinical reasoning
Synthesize knowledge, skills and professional attitudes through the demonstration of clinical reasoning.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Education, Health & Public Policy
1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.2 Cultivate an environment of academic and professional excellence
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy

Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.

Related Measures:

M 1: Clinical Evaluation
All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

Target:
satisfactory rating for SLO # 6 on the clinical course evaluation, based on the student's status in the nursing major (semester and year, i.e., junior or senior).

Findings (2016-2017) - Target: Met
Fall 2016- NURS307C: 100% of juniors completing the course passed SLO 6; NURS309C 100% of juniors completing the course passed SLO 6; NURS407C: 100% of seniors completing the course passed SLO 6; NURS408C: 100% of seniors completing the course passed SLO 6.
Spring 2017 - NURS311C: 100% of juniors completing the course
passed SLO 6; NURS316C 100% of juniors completing the course passed SLO 6; NURS409C: 100% of seniors completing the course passed SLO 6; NURS412C: 100% of seniors completing the course passed SLO 6.

**M 4: ATI exit exam**
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

**Target:**
A minimum average score of 70 on the Evidence Based Practice subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

**Findings (2016-2017) - Target: Met**
In Spring 2017 semester, Class of 2017 Seniors scored 77.5% on the Evidence Based Practice subscale of the ATI exit exam within 2 attempts.

**Findings (2015-2016) - Target: Met**
In Spring 2016 semester, Class of 2016 Seniors scored 75.7 on the Evidence Based Practice subscale of the ATI exit exam within 2 attempts.

**G 2: Professional Identity**
The graduate should implement one's role as a nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse committed to evidence-based practice (EBP), caring, advocacy, and safe quality care for diverse patients within a family and community context.

**SLO 1: Patient-centered care**
Plan, provide and delegate patient-centered care and coordinated care that promotes safe and high quality outcomes.

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
College of Education, Health & Public Policy
2.2 Cultivate an environment of academic and professional excellence
9.2 Develop and implement a student outcome assessment plan
Delaware State University

1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

Related Measures:

M 1: Clinical Evaluation
All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

Target:
Satisfactory rating for SLO 1 on the clinical course evaluation for all students in clinical (semester and year, i.e., junior or senior).

Findings (2016-2017) - Target: Met
Fall 2016- NURS307C: 100% of juniors completing the course passed SLO 1; NURS309C 100% of juniors completing the course passed SLO 1; NURS407C: 100% of seniors completing the course passed SLO 1; NURS408C: 100% of seniors completing the course passed SLO 1.
Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 1; NURS316C 100% of juniors completing the course passed SLO 1; NURS409C: 100% of seniors completing the course passed SLO 1; NURS412C: 100% of seniors completing the course passed SLO 1.

Findings (2015-2016) - Target: Met
Fall 2015-
NURS307C: 100% of juniors completing the course passed SLO 1;

Findings (2016-2017) - Target: Met
Fall 2016- NURS307C: 100% of juniors completing the course passed SLO 1 (minimum score = 1.5); NURS309C 100% of juniors completing the course passed SLO 1 (minimum score = 1.5), NURS407C: 100% of seniors completing the course passed SLO 1 (minimum score = 2.5); NURS408C: 100% of seniors completing the course passed SLO 1 (minimum score = 2.5). Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 1 (minimum score = 2.0); NURS316C 100% of juniors completing the course passed SLO 1 (minimum score = 2.0); NURS409C: 100% of seniors completing the course passed SLO 1 (minimum score = 3.0); NURS412C: 100% of seniors completing the course passed SLO 1 (minimum score = 3.0)

Findings (2015-2016) - Target: Met
Fall 2015- NURS307C: 100% of juniors completing the course passed SLO 1 (minimum score = 1.5); NURS309C 100% of juniors passed SLO 1 (minimum score = 1.5) [no data for 1 student]; NURS407C: 100% of seniors passed SLO 1 (minimum score = 2.5); NURS408C: 100% of seniors passed SLO 1 (minimum score = 2.5).

Spring 2016 - NURS311C: 100% of juniors passed SLO 1 (minimum score = 2.0); NURS312C 100% of juniors passed SLO 1 (minimum score = 2.0); NURS409C: 100% of seniors passed SLO 1 (minimum score = 3.0); NURS412C: 100% of seniors passed SLO 1 (minimum score = 3.0)

M 4: ATI exit exam
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

Target:
A minimum average score of 70 on the Patient Centered Care subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

Findings (2016-2017) - Target: Met
In Spring 2017 semester, Class of 2017 Seniors scored 78.1 on the Patient Centered Care subscale of the ATI exit exam within 2 attempts.

Findings (2015-2016) - Target: Met
In Spring 2016 semester, Class of 2016 Seniors scored 70.8 on the
Patient Centered Care subscale of the ATI exit exam within 2 attempts.
Action plan: continue to monitor.

**SLO 2: Professional communication**
Engage in interdisciplinary communication effectively and employ patient care technologies, information systems, and communication devices that support safe nursing practice.

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success.

**Strategic Plan Associations:**
- College of Education, Health & Public Policy
  9.2 Develop and implement a student outcome assessment plan
- Delaware State University
  1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
  2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
  5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.

**Related Measures:**

**M 1: Clinical Evaluation**
All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
satisfactory rating for SLO # 2 on the clinical course evaluation, based on the student’s status in the nursing major (semester and year, i.e., junior or senior).

**Findings (2016-2017) - Target: Met**
Fall 2016 - NURS307C: 100% of juniors completing the course passed SLO 2; NURS309C: 100% of juniors completing the course passed SLO 2; NURS407C: 100% of seniors completing the course passed SLO 2; NURS408C: 100% of seniors completing the course passed SLO 2.
Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 2; NURS316C: 100% of juniors completing the course passed SLO 2; NURS409C: 100% of seniors completing the course passed SLO 2; NURS412C: 100% of seniors completing the course passed SLO 2.

**Findings (2015-2016) - Target: Met**
Fall 2015 -
NURS307C: 100% of juniors completing the course passed SLO 2;
NURS309C 100% of juniors completing the course passed SLO2 (no data for 1 student);  
NURS407C: 100% of seniors passed SLO 2; **NURS408C**: 100% of seniors passed SLO 2

Spring 2016 -  
NURS311C: 100% of juniors passed SLO 2; NURS312C 100% of juniors passed SLO 2; NURS409C: 100% of seniors passed SLO 2;  
NURS412C: 100% of seniors passed SLO 2

**Findings (2014-2015) - Target: Met**  
Students' clinical performance is expected to improve incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation.

100% of juniors, NURS307 Fall 2014, passed clinical objective 2 (minimum score = 1.5)  
100% of juniors, NURS312 Spring 2015, passed clinical objective 2 (minimum score = 2.0)  
100% of seniors, NURS407 Fall 2014, passed clinical objective 2 (minimum score = 2.5)  
100% of seniors, NURS412 Spring 2015, passed clinical objective 2 (minimum score = 3.0)

**M 2: NCLEX-RN pass rate**
NCLEX-RN pass rates meet state and national benchmarks.

Source of Evidence: Certification or licensure exam, national or state

**Target:**
80% pass rate

**Findings (2016-2017) - Target: Met**
For Class of 2017, n= 20 , NCLEX-RN pass rate was 90 % (TBA from DE Board of Nursing)

**Findings (2015-2016) - Target: Not Reported This Cycle**
For Class of 2016, n= 36 , NCLEX-RN pass rate was ____ % (TBA from DE Board of Nursing)

**Findings (2014-2015) - Target: Met**
For Class of 2015, n=25, NCLEX-RN pass rate was 84%

**M 3: Progression of clinical performance/semester**

Students' clinical performance is expected to progress incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation:
Source of Evidence: Performance (recital, exhibit, science project)

**Findings (2015-2016) - Target: Met**
Fall 2015- NURS307C: 100% of juniors completing the course passed SLO 2
(minimum score = 1.5); NURS309C 100% of juniors passed SLO 2 (minimum score = 1.5) [no data for 1 student]; NURS407C: 100% of seniors passed SLO 2 (minimum score = 2.5); NURS408C: 100% of seniors passed SLO 2 (minimum score = 2.5)

Spring 2016 - NURS311C: 100% of juniors passed SLO 2 (minimum score = 2.0); NURS312C 100% of juniors passed SLO 2 (minimum score = 2.0); NURS409C: 100% of seniors passed SLO 2 (minimum score = 3.0); NURS412C: 100% of seniors passed SLO 2 (minimum score = 3.0)

**M 4: ATI exit exam**  
Predictor exam for passing NCLEX-RN

**Source of Evidence:** Standardized test of subject matter knowledge

**Target:**  
A minimum average score of 70 on the Teamwork and collaboration subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

**Findings (2016-2017) - Target: Met**  
In Spring 2017 semester, Class of 2017 Seniors scored 79.5% on the Teamwork and collaboration subscale of the ATI exit exam within 2 attempts.

**Findings (2015-2016) - Target: Met**  
In Spring 2016 semester, Class of 2016 Seniors scored 77.5 on the Teamwork and collaboration subscale of the ATI exit exam within 2 attempts.

**SLO 4: Standards of Care**  
Integrate professional standards in the practice of nursing with integrity, caring, accountability, respect, and excellence in nursing practice

**Relevant Associations:**

**DSU Learning Goal Associations:**
1. UG Student Learning Goal: Competent Communicators  
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
**College of Education, Health & Public Policy**
1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies  
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies  
2.2 Cultivate an environment of academic and professional excellence  
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy

**Delaware State University**
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

4.2 Collaboratively develop and enhance programs for underrepresented groups and undeserved communities

**Related Measures:**

**M 1: Clinical Evaluation**

All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
satisfactory rating for SLO # 4 on the clinical course evaluation, based on the student's status in the nursing major (semester and year, i.e., junior or senior).

**Findings (2016-2017) - Target: Met**

Fall 2016 - NURS307C: 100% of juniors completing the course passed SLO 4; NURS309C 100% of juniors completing the course passed SLO 4; NURS407C: 100% of seniors completing the course passed SLO 4; NURS408C: 100% of seniors completing the course passed SLO 4.

Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 4; NURS316C 100% of juniors completing the course passed SLO 4; NURS409C: 100% of seniors completing the course passed SLO 4; NURS412C: 100% of seniors completing the course passed SLO 4.

**Findings (2015-2016) - Target: Met**

Fall 2015 -
NURS307C: 100% of juniors completing the course passed SLO 4;
NURS309C 100% of juniors completing the course passed SLO 4 (no data for 1 student);
NURS407C: 100% of seniors passed SLO 4; NURS408C: 100% of seniors passed SLO 4

Spring 2016 -
NURS311C: 100% of juniors passed SLO 4; NURS312C 100% of juniors passed SLO 4; NURS409C: 100% of seniors passed SLO 4; NURS412C: 100% of seniors passed SLO 4

**Findings (2014-2015) - Target: Met**

Students' clinical performance is expected to improve incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation.

100% of juniors, NURS307 Fall 2014, passed clinical objective 4 (minimum score = 1.5)
100% of juniors, NURS312 Spring 2015, passed clinical objective 4 (minimum score = 2.0)
100% of seniors, NURS407 Fall 2014, passed clinical objective 4
(minimum score = 2.5)
100% of seniors, NURS412 Spring 2015, passed clinical objective 4
(minimum score = 3.0)

**M 2: NCLEX-RN pass rate**
NCLEX-RN pass rates meet state and national benchmarks.

Source of Evidence: Certification or licensure exam, national or state

**Target:**
80% pass rate

**Findings (2016-2017) - Target: Met**
For Class of 2017, n= 20, NCLEX-RN pass rate was 90% (TBA from DE Board of Nursing)

**Findings (2015-2016) - Target: Not Reported This Cycle**
For Class of 2016, n= 36, NCLEX-RN pass rate was ____% (TBA from DE Board of Nursing)

**Findings (2014-2015) - Target: Met**
For Class of 2015, n=25, NCLEX-RN pass rate was 84%

**M 3: Progression of clinical performance/semester**

Students' clinical performance is expected to progress incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation:

Source of Evidence: Performance (recital, exhibit, science project)

M 4: ATI exit exam
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

Target:
A minimum average score of 70 on the Professionalism and Professional Skills subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

Findings (2016-2017) - Target: Met
In Spring 2017 semester, Class of 2017 Seniors scored 75% on the
Professionalism and Professional Skills subscale of the ATI exit exam within 2 attempts.

**Findings (2015-2016) - Target: Met**
In Spring 2016 semester, Class of 2016 Seniors scored 72.9 on the Professionalism and Professional Skills subscale of the ATI exit exam within 2 attempts.

**SLO 5: Collaboration; cultural competence**
Collaborate with clients and healthcare professionals to provide safe, effective and culturally competent nursing care through the integration of knowledge and skills

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
College of Education, Health & Public Policy
1.4 Provide interdisciplinary learning experiences for students
4.1 Enhance community engaged partnerships and outreach

Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community
4.2 Collaboratively develop and enhance programs for underrepresented groups and undeserved communities

**Related Measures:**

**M 1: Clinical Evaluation**
All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
satisfactory rating for SLO # 5 on the clinical course evaluation, based on the student's status in the nursing major (semester and year, i.e., junior or senior).

**Findings (2016-2017) - Target: Met**
Fall 2016- NURS307C: 100% of juniors completing the course passed SLO 5; NURS309C 100% of juniors completing the course passed SLO 5; NURS407C: 100% of seniors completing the course passed SLO 5;
NURS408C: 100% of seniors completing the course passed SLO 5. Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 5; NURS316C 100% of juniors completing the course passed SLO 5; NURS409C: 100% of seniors completing the course passed SLO 5; NURS412C: 100% of seniors completing the course passed SLO 5.

**Findings (2015-2016) - Target: Met**

Fall 2015 -
- **NURS307C:** 100% of juniors completing the course passed SLO 5;
- **NURS309C** 100% of juniors completing the course passed SLO 5 (no data for 1 student);
- **NURS407C:** 100% of seniors passed SLO 5; **NURS408C:** 100% of seniors passed SLO 5

Spring 2016 -
- **NURS311C:** 100% of juniors passed SLO 5; **NURS312C** 100% of juniors passed SLO 5; **NURS409C:** 100% of seniors passed SLO 5; **NURS412C:** 100% of seniors passed SLO 5

**Findings (2014-2015) - Target: Met**

Students' clinical performance is expected to improve incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation.

100% of juniors, NURS307 Fall 2014, passed clinical objective 5 (minimum score = 1.5)
100% of juniors, NURS312 Spring 2015, passed clinical objective 5 (minimum score = 2.0)
100% of seniors, NURS407 Fall 2014, passed clinical objective 5 (minimum score = 2.5)
100% of seniors, NURS412 Spring 2015, passed clinical objective 5 (minimum score = 3.0)

**M 2:NCLEX-RN pass rate**

NCLEX-RN pass rates meet state and national benchmarks.

Source of Evidence: Certification or licensure exam, national or state

**Target:**

80% pass rate

**Findings (2016-2017) - Target: Met**

For Class of 2017, n= 20 , NCLEX-RN pass rate was 90 % (TBA from DE Board of Nursing)

**Findings (2015-2016) - Target: Not Reported This Cycle**

For Class of 2016, n= 36 , NCLEX-RN pass rate was _____ % (TBA from DE Board of Nursing)
Findings (2014-2015) - Target: Met
For Class of 2015, n=25, NCLEX-RN pass rate was 84%

M 3: Progression of clinical performance/semester

Students' clinical performance is expected to progress incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation:

**M 4: ATI exit exam**
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

**Target:**
A minimum average score of 70 on the Patient Centered Care subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

**Findings (2016-2017) - Target: Met**
In Spring 2017 semester, Class of 2017 Seniors scored 78.1 on the Patient Centered Care subscale of the ATI exit exam within 2 attempts.

**Findings (2016-2017) - Target: Met**
In Spring 2017 semester, Class of 2017 Seniors scored 78.1 on the Patient Centered Care subscale of the ATI exit exam within 2 attempts.

**Findings (2015-2016) - Target: Met**
In Spring 2016 semester, Class of 2016 Seniors scored 70.8 on the Patient Centered Care subscale of the ATI exit exam within 2 attempts.

**G 3: Spirit of Inquiry**
The graduate should examine the evidence that underlies clinical nursing practice to challenge the status quo, question underlying assumptions, and offer new insights to improve the quality of care for patients, families and communities.

**SLO 3: Leadership**
Synthesize leadership concepts, principles and ethical reasoning in decision making to ensure quality outcomes in providing client care in a variety of settings

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Strategic Plan Associations:

**College of Education, Health & Public Policy**
1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.1 Students are provided with leadership opportunities through course work and academic governance
4.1 Enhance community engaged partnerships and outreach
6.1 Promote international experiences and programs for all students

**Delaware State University**
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice

Related Measures:

**M 1: Clinical Evaluation**
All clinical courses have associated clinical experiences where students demonstrate critical thinking and nursing skills. At the conclusion of the clinical experience a written evaluation, with rubric, is completed for pass/fail grading.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
satisfactory rating for SLO # 3 on the clinical course evaluation, based on the student's status in the nursing major (semester and year, i.e., junior or senior).

**Findings (2016-2017) - Target: Met**
Fall 2016- NURS307C: 100% of juniors completing the course passed SLO 3; NURS309C 100% of juniors completing the course passed SLO 3; NURS407C: 100% of seniors completing the course passed SLO 3; NURS408C: 100% of seniors completing the course passed SLO 3.
Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 3; NURS316C 100% of juniors completing the course passed SLO 3; NURS409C: 100% of seniors completing the course passed SLO 3; NURS412C: 100% of seniors completing the course passed SLO 3.

**Findings (2015-2016) - Target: Met**
Fall 2015 -
NURS307C: 100% of juniors completing the course passed SLO 3;
NURS309C 100% of juniors completing the course passed SLO 3 (no data for 1 student);
NURS407C: 100% of seniors passed SLO 3; NURS408C: 100% of seniors passed SLO 3

NURS311C: 100% of juniors passed SLO 3; NURS312C 100% of juniors passed SLO 3; NURS409C: 100% of seniors passed SLO 3; NURS412C: 100% of seniors passed SLO 3

Findings (2014-2015) - Target: Met

Students' clinical performance is expected to improve incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation.

100% of juniors, NURS307 Fall 2014, passed clinical objective 3 (minimum score = 1.5)
100% of juniors, NURS312 Spring 2015, passed clinical objective 3 (minimum score = 2.0)
100% of seniors, NURS407 Fall 2014, passed clinical objective 3 (minimum score = 2.5)
100% of seniors, NURS412 Spring 2015, passed clinical objective 3 (minimum score = 3.0)

M 2: NCLEX-RN pass rate

NCLEX-RN pass rates meet state and national benchmarks.

Source of Evidence: Certification or licensure exam, national or state

Target:
80% pass rate

Findings (2016-2017) - Target: Met
For Class of 2017, n= 20 , NCLEX-RN pass rate was 90 % (TBA from DE Board of Nursing)

Findings (2015-2016) - Target: Not Reported This Cycle
For Class of 2016, n= 36 , NCLEX-RN pass rate was _____ % (TBA from DE Board of Nursing)

Findings (2014-2015) - Target: Met
For Class of 2015, n=25, NCLEX-RN pass rate was 84%

M 3: Progression of clinical performance/semester

Students' clinical performance is expected to progress incrementally with each subsequent semester. The Clinical Evaluation form reflects this expected rating increase. See Expected Performance Levels table on page 1 of the clinical evaluation:

Source of Evidence: Performance (recital, exhibit, science project)
<table>
<thead>
<tr>

**Target:**
On clinical evaluations, 80% of juniors in Fall Semester will achieve a satisfactory rating for SLO #3; 85% of juniors in Spring semester will achieve a satisfactory rating for SLO #3; 90% of seniors in Fall semester will achieve a satisfactory rating for SLO #3; 95% of seniors in Spring semester will achieve a satisfactory rating for SLO #3.

**Findings (2016-2017) - Target: Met**
Fall 2016- NURS307C: 100% of juniors completing the course passed SLO 3 (minimum score = 1.5); NURS309C 100% of juniors completing the course passed SLO 3 (minimum score = 1.5), NURS407C: 100% of seniors completing the course passed SLO 3 (minimum score = 2.5); NURS408C: 100% of seniors completing the course passed SLO 3 (minimum score = 2.5). Spring 2017 - NURS311C: 100% of juniors completing the course passed SLO 3 (minimum score = 2.0); NURS316C 100% of juniors completing the course passed SLO 3 (minimum score = 2.5). Spring 2017 - NURS412C: 100% of seniors completing the course passed SLO 3 (minimum score = 3.0)

**Findings (2015-2016) - Target: Met**
Fall 2015-
NURS307C: 100% of juniors completing the course passed SLO 3 (minimum score = 1.5); NURS309C 100% of juniors passed SLO 3 (minimum score = 1.5) [no data for 1 student]; NURS407C: 100% of seniors passed SLO 3 (minimum score = 2.5);
NURS408C: 100% of seniors passed SLO 3 (minimum score = 2.5)

Spring 2016 - NURS311C: 100% of juniors passed SLO 3 (minimum score = 2.0); NURS312C 100% of juniors passed SLO 3 (minimum score = 2.0); NURS409C: 100% of seniors passed SLO 3 (minimum score = 3.0); NURS412C: 100% of seniors passed SLO 3 (minimum score = 3.0)

M 4: ATI exit exam
Predictor exam for passing NCLEX-RN

Source of Evidence: Standardized test of subject matter knowledge

Target:
A minimum average score of 70 on the Leadership subscale of the ATI exit exam will be obtained by seniors within 2 attempts prior to graduation.

Findings (2016-2017) - Target: Met
In Spring 2017 semester, Class of 2017 Seniors scored 81.8% on the Leadership subscale of the ATI exit exam within 2 attempts.

Findings (2015-2016) - Target: Met
In Spring 2016 semester, Class of 2016 Seniors scored 81.0 on the Leadership subscale of the ATI exit exam within 2 attempts.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

NCLEX Pass rate
Continue to monitor program based on NCLEX Program Reports, accrediting bodies Delaware Board of Nursing requirements.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Implementation Description: Review NCLEX pass rate for compliance with state requirement
Projected Completion Date: 09/29/2010
Responsible Person/Group: Chairperson
Additional Resources Requested: None
Budget Amount Requested: $0.00 (no request)

Inclusion of remedial activities
Monitor courses for inclusion of all necessary remedial activities and student progress.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: Each course has added portions of two national programs into their courses to help students learn to apply the varied concepts into an integrated whole. Portions of the program relate to the actual concepts taught. Students who score less than 80% on any given test will be directed to content
related areas in the remediation programs. Each student will take tests developed by those programs which are associated with the content they are to review until they get 80% or higher on the tests.

**Responsible Person/Group:** Course faculty  
**Additional Resources Requested:** None at present  
**Budget Amount Requested:** $0.00 (no request)

**NCLEX**  
Identify areas of deficit and develop and implement a plan of action.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High
Mission / Purpose

Department of Nursing Mission Statement

The mission of the baccalaureate of science nursing program aligns with the mission and core values of Delaware State University as well as the College of Education, Health, and Public Policy. The nursing program provides exceptional educational opportunities for students of diverse backgrounds and prepares entry level nurses to practice competently and safely in a variety of healthcare settings including preparation for future specialization and/or graduate study. Baccalaureate nursing graduates are prepared professionally to provide compassionate and culturally competent evidence-based healthcare to meet the current and future needs of individuals, families, and communities within the state of Delaware, the nation, and the international environment. (Last reviewed: 24 August 2015)

Department of Nursing Philosophy

The Department of Nursing's philosophy, at Delaware State University, is congruent with the College of Education, Health, and Public Policy as well as the University's mission statement. The faculty will provide nursing education while promoting distinguished academic excellence, innovation, and world-class service to the graduate. Faculty are also committed to best practice within a learning environment that fosters mutual commitment, respect, integrity, and accountability among students, faculty, administration, and staff.

The nursing philosophy encompasses the University's core values as they relate to professional nursing education and professional practice. This includes: Excellence in nursing education and practice in the form of scholarship; outreach to others with an appreciation for diversity; an engaging community which fosters skills in the art and science of nursing; and the ability to demonstrate ethical reasoning and integrity which promotes patient advocacy and professionalism in an ever changing health care environment.

The nursing faculty believes the nursing program prepares the graduate to provide safe, compassionate, and competent nursing care across the lifespan to individuals, families, and communities in a variety of practice settings. The graduate will integrate evidence-based principles, sound nursing judgments, the sciences, and clinical reasoning skills necessary for entry level practice. Graduate nurses are empowered to become effective nurse leaders with a professional identity to transform healthcare, maintain a spirit of inquiry, and are committed to life-long learning. (Last reviewed: 24 August 2015)

Goals without Outcome/Objective Relationships Specified
G 1: Nursing Judgment
The graduate should make decisions in practice, substantiated with evidence, that integrate nursing science in the provision of safe, quality care and that promote the health of patients within the family and community context.

G 2: Professional Identity
The graduate should implement one’s role as a nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse committed to evidence-based practice (EBP), caring, advocacy, and safe quality care for diverse patients within a family and community context.

G 3: Spirit of Inquiry
The graduate should examine the evidence that underlies clinical nursing practice to challenge the status quo, question underlying assumptions, and offer new insights to improve the quality of care for patients, families, and communities.

G 4: Advocacy for Human Flourishing
The graduate should advocate for patients and families in ways that promote their self-determination, integrity, and ongoing growth as human beings.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 2: Teaching (1)
Faculty and staff are qualified and credentialed, and sufficient in number to ensure the achievement of SLOs and program outcomes

Relevant Associations:
ACEN Standard II is met.

DSU Learning Goal Associations:
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Education, Health & Public Policy
1.4 Provide interdisciplinary learning experiences for students
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.1 Students are provided with leadership opportunities through course work and academic governance
2.2 Cultivate an environment of academic and professional excellence

Related Measures:
M 1: NCLEX-RN pass rate
NCLEX-RN pass rate will be at or above 80%
Source of Evidence: Certification or licensure exam, national or state

**Target:**
95% of seniors in the Special Topics course pass the ATI predictor exam by the second attempt.

**Findings (2016-2017) - Target: Met**
100% of 20 seniors in the Special Topics course passed ATI predictor exam by the second attempt.

**Findings (2015-2016) - Target: Met**
24 of 25 seniors in the Special Topics course passed ATI predictor exam before graduation date.

**M 3: Professional Development**
Faculty will document 30 continuing education credits for the designated two-year licensure renewal period.

Source of Evidence: Professional standards

**Target:**
100% of FT faculty hold a graduate degree in nursing.

**Findings (2016-2017) - Target: Met**
100% of FT faculty hold a graduate degree in nursing and current DE RN licensure.

**Findings (2015-2016) - Target: Met**
100% of FT faculty hold a graduate degree in nursing

**M 5: Simulation technology**
Follow through with curriculum-wide simulation program through training sessions for faculty and staff.

Source of Evidence: Academic direct measure of learning - other

**Target:**
80% of faculty will attend scheduled simulation trainings.

**Findings (2016-2017) - Target: Met**
Simulation training by Laerdal corp for new birthing model attended by both Nursing Lab Coordinator and Maternal-Child course coordinator (100% of faculty and staff utilizing birthing simulators).

**Findings (2015-2016) - Target: Partially Met**
Simulation training by Laerdal corp for Spring 2017 to be scheduled

**SLO 3: Retention (1)**

50% of the students who begin the first clinical lab nursing course will graduate from the Baccalaureate degree program within 150% of the time (6 semesters) allotted for the program.
Relevant Associations:
ACEN Standard 6.4.2 is met.

Strategic Plan Associations:
College of Education, Health & Public Policy
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.2 Cultivate an environment of academic and professional excellence
2.4 Student academic support and career planning services are provided within the department
2.5 Develop and/or expand student recruitment and retention strategies

SLO 4: Global awareness (1)
Continue to build a culture of global awareness by exploring cooperative relationships with study abroad programs, international post-secondary educational institutions, and foreign healthcare agencies

Relevant Associations:
Three undergraduate nursing students enrolled in CRN 18600 UNIV402 Learning without Borders (study abroad to London England) course for Spring 2017.

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Strategic Plan Associations:
College of Education, Health & Public Policy
1.2 Implement the University Program Review process to ensure quality educational experiences
1.4 Provide interdisciplinary learning experiences for students
2.1 Students are provided with leadership opportunities through course work and academic governance
2.2 Cultivate an environment of academic and professional excellence
5.2 Develop research centers that provide outcome based, community relevant research and policy
6.1 Promote international experiences and programs for all students
6.2 Become a World Health Organization/Pan American Health Organization Collaborating Center for Health Disparities

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 1: Accreditation (1)
Establish and maintain full ACEN accreditation status.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Education, Health & Public Policy
1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
1.2 Implement the University Program Review process to ensure quality educational experiences

Related Measures:

M 1: NCLEX-RN pass rate
NCLEX-RN pass rate will be at or above 80%
Source of Evidence: Certification or licensure exam, national or state

**Target:**
NCLEX-RN pass rate at or above 80%

**Findings (2016-2017) - Target: Met**
2017 DSU NCLEX-RN pass rate = 90%

**Findings (2015-2016) - Target: Partially Met**
2016 DSU NCLEX-RN pass rate = 83.3%

M 2: Accreditation
The Department of Nursing will maintain State approval and achieve full accreditation by ACEN.
Source of Evidence: Academic direct measure of learning - other

**Target:**
The nursing program will be approved without restrictions by the State of Delaware.
The nursing program will be in compliance with ACEN Standards 1 through 6.

**Findings (2016-2017) - Target: Met**
The Department of Nursing has full approval by the state of Delaware.
The Department of Nursing has full accreditation (warning status withdrawn) as of February 2017.

**Findings (2015-2016) - Target: Partially Met**
The nursing program has full approval by the state of Delaware.
The nursing program has been recommended for full accreditation (warning status withdrawn) as of February 2017.

Related Action Plans (by Established cycle, then alpha):
For full information, see the *Details of Action Plans* section of this report.

**Accrediation documentation**

*Established in Cycle*: 2015-2016

Monitor accreditation status via written documentation from ACEN, due summer 2017.

**M 3: Professional Development**

Faculty will document 30 continuing education credits for the designated two-year licensure renewal period.

Source of Evidence: Professional standards

**Target:**
The program is in compliance with ACEN Standard 2.3

**Findings (2016-2017) - Target: Met**
The program is in compliance with ACEN Standard 2.3

**Findings (2015-2016) - Target: Met**
The program is in compliance with ACEN Standard 2.3

**O/O 5: Faculty (1)**

Recruit and retain qualified faculty: FT faculty hold a minimum of a graduate degree with a major in nursing and a minimum of 25% of FT faculty also hold an earned doctorate or are currently enrolled in a doctoral program of study.

**Relevant Associations:**
ACEN Standard 2.1 is met.

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Strategic Plan Associations:**
*College of Education, Health & Public Policy*
3.1 Recruit and retain high quality faculty to deliver the curricula
3.2 Support an environment of high quality teaching
3.3 Faculty are engaged in scholarship and/or research
3.4 Promote faculty service in the community
3.5 Faculty provide high quality advising and mentoring

**Related Measures:**

**M 2: Accreditation**
The Department of Nursing will maintain State approval and achieve full accreditation by ACEN.

Source of Evidence: Academic direct measure of learning - other

**Target:**
Faculty will continue to maintain records and documents required for full approval and accreditation.
Findings (2016-2017) - Target: Met
Faculty produced requested documents and deliverables for the Feb. 2017 accreditation visit and consequently, warning status was discontinued. The Dept. of Nursing has full accreditation by ACEN.

Findings (2015-2016) - Target: Met
Faculty produced requested deliverables for the Feb. 2017 accreditation visit in a timely manner.

O/O 6: Grants/research (2)
To increase grant applications and research contracts to acquire $300,000 in funding annually.

Related Measures:

M 4: Financial aid
Financial assistance resources will be sufficient to sustain continuous student enrollment through completion of undergraduate nursing curriculum.

Source of Evidence: Administrative measure - other

Target:
A score of 2.5 or greater on the annual Student Survey will be reported for students services pertaining to financial aid.

Findings (2016-2017) - Target: Met
Students (n=29) scored 3.07 on the annual Student Survey for items pertaining to financial aid services.

Findings (2015-2016) - Target: Met
Student (n=58) scored 3.08 on the annual Student Survey for items pertaining to financial aid services.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Accreditation documentation
Monitor accreditation status via written documentation from ACEN, due summer 2017.

Established in Cycle: 2015-2016
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Accreditation | Outcome/Objective: Accreditation (1)
Executive Summary (1-2 pages)

Activity 1

New Proposed Curriculum Changes:

Reinstatement of MSN program (to start Spring 2019)

Faculty Senate's unanimous approval of the updates made to this graduate program was obtained in May 2018. Courses have been revised with new course names, descriptions and SLOs (Student Learning Outcomes). Identifying SLOs that lead to the new RSGCs (Role Specific Graduate Competencies) foster program alignment and help to maintain our accreditation requirements through ACEN (Accreditation Commission on Education in Nursing). All course objectives are designed to address the overall Student Learning Outcomes and increase in difficulty as the student progresses in the curriculum until the culmination of the Capstone for the Global Leadership or the Nursing Education track. The Capstone is designed to address all six SLOs as the student pursues a research focused scholarly project. The graduate program is designed so the SLOs are directly aligned with and lead to the four (4) Role Specific Graduate Competencies (RSGCs) based on the National League for Nursing (NLN) Competencies for Graduates (Nursing Judgement, Professional Identity, Spirit of Inquiry, and Human Flourishing). These competencies are embedded throughout the theoretical courses and are the foundation for the clinical practicum evaluation tools. Professional standards, guidelines, and competencies are also used in the development of course objectives and course content and support the student's attainment of the SLO's, RSGC's, and Program Outcomes.

The curriculum is designed and organized so courses either build upon or enhance one another, while enabling the student to achieve the SLOs and RSGCs. The relationship between the SLOs and the RSGCs are indicated on the first page of each course syllabus. The philosophy, RSGCs, SLOs, and program outcomes are the foundation upon which core curricula, nursing courses and the clinical practicum experiences are built. The SLOs, course to course, promote a progression in learning that leads to the achievement of the RSGCs.

Undergraduate Program

The revised curriculum continues to be monitored. NCLEX -RN pass rates are on a steady rise, with the 90% pass rate in 2017 exceeding the national average (71.9%) by almost 20%. The Department of Nursing was awarded full accreditation by the Accreditation Commission for Education in Nursing (ACEN) and full approval by the Delaware Board of Nursing.

Rigor is maintained in the clinical components of nursing courses. Student mastery of basic nursing skills is ongoing, and being assessed and verified by instructor signatures on test-out sheets, the clinical evaluation form was modified to include both qualitative and quantitative data, and simulation scenarios were enhanced as instructional and testing modalities. Additionally, faculty instituted open lab sessions in the Fall semester to allow students to engage in faculty-facilitated skills practice in the clinical lab. Fulltime and adjunct clinical faculty maintained open lab hours during the Spring semester.
Likewise, the new Computer Lab Coordinator expanded computer lab hours to facilitate student use of instructional technology. Some of these activities included subject-specific practice tests for early remediation of knowledge deficits, as well as the instruction on the use of the DocuCare Electronic Health Record (EHR) system into junior level clinical courses. Additionally, the live EPIC charting system utilized by Bayhealth nursing staff was made available to all students, and included intensive training sessions on site at the Bayhealth Training Center. This new EHR charting system was introduced to help achieve SLOs related to critical thinking, clinical reasoning, and evidence-based high-fidelity simulated documentation.

An intense curriculum content analysis took place at the end of the academic year. Faculty correlated theory content, standardized assessment results, and clinical laboratory and/or simulation experiences in each course with published blueprint criteria for the licensure examination. All criteria were identified specifically, and each NCLEX-RN blueprint criterion was assigned, by consensus, to at least one of the courses in the nursing major. Action plans to include these criteria were developed by each course coordinator and implemented during the academic year.

**Activity 2**

**Standardized testing**

Implementation of ATI standardized testing was revised according to curricular content and incorporated into all courses in the nursing major. Subject-specific standardized testing accounts for 10% of the course grade. If students were unable to meet the nationally prescribed benchmarks (score of 850/Level II) on these exams, remediation was required and began immediately. This strategy was continued and the results have been promising as students strived to achieve needed mastery in identified weak areas. A revised rubric was implemented during the Spring Curriculum retreat to reflect the mastery achieved after remediation.

Again this year, seniors are required to pass a comprehensive pre-licensure predictor examination and to attend a Live NCLEX-RN Review program prior to graduation. Seniors had to achieve a score of 850 or better on this exam in order to pass the course for which this exam was required. Two attempts were allowed with intense remediation prior to the second try. All 2018 graduating seniors met this benchmark on the first attempt.

Established standardized and progressive grading criteria were carried through to this year’s clinical courses for nursing majors. Teacher-made examinations for junior nursing students were required to have a minimum of 50% application questions formatted in a similar way to the licensure examination. Each course must have three examinations of this type consisting of 75 questions each; a fourth examination is the final exam that must have 100 questions of the same nature. Examinations for seniors followed a comparable format, but consisted of a minimum of 95% application questions and 100 NCLEX-RN style questions per examination. **Activity 3**

**New Admission Criteria**

A change in the admission criteria was implemented for applicants who would be accepted into the nursing major as incoming juniors in Fall 2016. Eligibility for admission to the nursing program still requires a GPA of 3.0 or higher; however, the new admission exam is the ATI TEAS pre-admission test, with a minimum level of proficient required for applicants to the nursing major. The Department of Nursing
Admission Committee has been monitoring these criteria, and will further develop a cut score within the Proficiency level when ATI TEAS results for 100 applicants have been recorded. Best practice guidelines for the cut score will be used in accordance with the established test psychometrics published by ATI.

Activity 4

Student Enrollment

The number of junior students enrolled in the program doubled (n=28) from last year (14). The ratio of faculty to students was maintained at a maximum 1:6 ratio for med-surg (adult health) clinical courses. Additionally, advisement of junior nursing students was assigned to full time faculty, whose daily interactions with students were planned to be early identifiers of problems, making interventions and remediation action plans timely and more effective.

Junior and senior nursing students continued to be enrolled in 8-week block clinical courses. This strategy maintained an effective faculty-student ratio in theory courses, allowing classroom instructors a better opportunity to identify knowledge deficits and provide targeted tutoring and remediation strategies to students in need.

Unit(s) Profile

Faculty Position

Dr. Agnes Richardson Associate Professor and Chairperson

Dr. Jennifer Akey Associate Professor

Dr. Sally Danz Associate Professor

Dr. Nicole Bell Rogers Assistant Professor

Mrs. Paula Rutledge Assistant Professor

Dr. Yvonne Stringfield Adjunct Instructor

Mrs. Yesenia Sudler Adjunct Instructor

Mrs. Christina Darpino Adjunct Instructor

Mrs. Effie Davis Adjunct Instructor
Mrs. Lisa Livingston Adjunct Instructor
Ms. Janelle Thomas Adjunct Instructor
Ms. Rosemarie White Adjunct Instructor
Mrs. Anna Chenjo Adjunct Instructor
Mrs. Adetokundo Fisher Adjunct Instructor
Mr. Kwami Opoku-Agyemang Adjunct Instructor
Ms. Chavon Crampton Adjunct Instructor
Mrs. Ngozi Azuogu Adjunct Instructor
Dr. Lori Grant Associate Professor - Resigned

Staff Position
Ms. Roblyn Davis Computer Lab Coordinator
Mrs. Michele McIntosh Nursing Clinical Coordinator
Ms. Cookie Shockley Senior Secretary
Mrs. Deborah Lord Clinical Skills Lab Coordinator - Resigned

Unit(s) Initiatives accomplished in this cycle
Units initiatives accomplished this cycle

• Hired a Computer Lab Coordinator
• Interviewed Clinical Skills Lab Coordinators
• Reinstated Masters Curriculum was approved by Faculty Senate
• Incorporation of simulation in all clinical nursing courses
• Maintained simulation observation room for increased educational opportunities for students
• Maintenance of technology for SMART rooms
• DocuCare EHR acquired and Pyxis medication administration system ordered, to provide students with current trends in documentation and medication administration.
• Utilization of ATI to better facilitate students learning outcomes, provide remediation, and to enhance their probability of success on NCLEX
• Seniors Offered Additional Remediation (SOARs) continued to provide seniors with mentoring, tutoring, and support

Unit(s) Honors/Awards and Achievements

• National Council Licensure Examination (NCLEX) pass rate for the class of 2017 was 90%

• 100% of senior class are predicted to pass NCLEX-RN, according to standardized test results.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

Goal 1: Increase marketing initiatives for the undergraduate and graduate nursing programs

Marketing/Recruitment

• Outreach community efforts at our clinical sites
• HOSA
• Enhance our Web-site
• Delaware Nurses Association
• Dept. Chair and Faculty attending off campus University recruitment efforts

Goal 2: Develop methods to increase the DON retention and graduation rates

Retention/Graduation
· 77% graduation rate for Class of 2017
· Students offered additional remediation (SOARS)
· Student Scholarships from available funding source (Health Fund)
· Fulltime nursing faculty advisors were appointed for all nursing majors

Goal 3: Employ methods to ensure the academic rigor of program

Academic Quality

- Revision of admission criteria
- Increased academic rigor by maintaining passing grade to a minimum of 80%
- Requiring skills check offs and meeting identified benchmarks
- Incorporation of curriculum-wide standardized testing
- Incremental increases in overall scoring on clinical evaluations: Fall juniors = 1.5, Spring juniors = 2.0, Fall seniors = 2.5, Spring seniors = 3.0)

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.  

a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  
b) Have these changes been implemented? If not, when will they be implemented?  
c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Closing the Assessment Loop

a. List one or two examples of how the unit used assessment result/findings to plan changes (initiatives) designed for improvements?

The Department of Nursing utilizes a systematic evaluation plan (SEP) that addresses all standards for nursing accreditation. This plan has provided the DON with a method of evaluating student learning outcomes (SLO) and program outcomes. Additionally, the SEP provides a method for program assessment utilizing tools within the following domains:

- Course specific ATI proctored test results
- FECA: Faculty Evaluation of Clinical Agency
- SECA: Student Evaluation of Clinical Agency
- Employer satisfaction ratings of graduates
- Student evaluations of nursing program
- Clinical evaluation form
Changes are consistent with action plans. We review scores below the benchmark and revise Departmental policies and procedures and adjust course content and examinations accordingly.

b. Have these changes been implemented? Yes

c. When does the unit plan to conduct the assessment again to ascertain whether or not these changes (initiatives) have made a difference?

These initiatives continue to make a difference in the quality of instruction. The SEP is reviewed according to timelines specified within this document. Updates and revisions are reviewed at the Department semester retreats in December and May.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

None

Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

Mission / Purpose

The Delaware State University Foundation, Inc. is a not-for-profit corporation devoted solely to the welfare and development of Delaware State University (DSU). In support of the DSU vision, mission, and core values, the Office of Development manages all private fundraising initiatives including gift management, donor relations and stewardship activities by the DSU Foundation.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Annual Giving Drive.

Establish an Annual Giving drive that will achieve fundraising goals set for the alumni, employees, individuals, corporations and foundations, and others (clubs, organizations, groups, and government).

O/O 1: Dollars from contacts, collaborations, initiatives.

Increase the dollar amount from contacts, collaborations, and initiatives.

Related Measures:

M 1: Amount of dollars from contacts, collaborations, and initiatives.
Amount of dollars from contacts, collaborations and initiatives as tabulated from the Raiser's Edge development software. The dollar amount generated from these areas is monitored daily. This data is shared with the entire staff at the weekly staff meeting, and the Board of Trustee's Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

Target:
Obtain at least $2,760,684 from contacts, collaborations, and initiatives for FY 2012.
Findings (2011-2012) - Target: Met

The final dollar amount greatly exceeded the goal with a total amount raised of $2,802,448.23. The target for 2011-2012 was $2,760,684.

Findings (2010-2011) - Target: Met

The final dollar amount greatly exceeded the goal with a total raised of $2,581,595 as compared to the goal of $2,339,079.

O/O 2:Dollars from alumni and participation rate.

Achieve alumni fiscal year dollar amount and participation rate goals.

Related Measures:

M 2: Amount of dollars and participation rate from alumni.
Amount of dollars and participation rate from alumni as tabulated from the Raiser's Edge development software. The dollar amount generated from these constituents is monitored daily. This data is shared with the entire staff at the weekly staff meeting, and the Board of Trustees' Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

Target:
Obtain at least $203,188 from alumni for FY 2012 and attain at least a 5.2% participation rate from alumni giving (equaling 582 donors).

Findings (2011-2012) - Target: Not Reported This Cycle

The data will not be known until the end of the fiscal year (June 30, 2012).

Findings (2010-2011) - Target: Met
Exceeded alumni FY 2011 goal and raised $257,884, however only achieved a 5% participation rate and 494 donors.

O/O 3: Dollars from corporations/foundations and number of donors.

Achieve corporations/foundations fiscal year dollar amount goal and increased number of grants.

Related Measures:
M 3: Amount of dollars and number of grants from corporations/foundations.

Amount of dollars and number of grants from corporations/foundations as tabulated from the Raiser's Edge development software. The dollar amount generated from these constituents is monitored daily and the number of donors counted. This data is shared with the entire staff at the weekly staff meeting, and the Board of Trustees' Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

**Target:**
Obtain at least $1,621,664 from corporations/foundations for FY 2012.
Obtain at least 70 gifts.

**Findings (2011-2012) - Target: Not Reported This Cycle**
The data will not be known until the end of the fiscal year (June 30, 2012).

**Findings (2010-2011) - Target: Met**
Exceeded corporation/foundation FY 2011 goal and raised $1,544,442. Exceeded the target number of corporation/foundation gifts of 70 and increased to 98 gifts.

O/O 4: Dollars from friends/individuals.

Achieve friends/individuals fiscal year dollar amount goal.

**Related Measures:**

**M 4: Amount of dollars from friends/individuals.**

Detailed description: Amount of dollars from friends/individuals as tabulated from the Raiser's Edge development software. The dollar amount generated from these constituents is monitored daily. This data is shared with the entire staff at the weekly staff meeting, and the Board of Trustees' Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

**Target:**
Obtain at least $185,624 from friends/individuals for FY 2012.
**Findings (2011-2012) - Target: Not Reported This Cycle**

The data will not be known until the end of the fiscal year (June 30, 2012).

**Findings (2010-2011) - Target: Partially Met**

Raised approximately 90% ($154,687) of the friends/individuals FY 2011 goal, which was almost double the previous year's goal. While it was a great achievement, the new goal was not reached.

**O/O 5:Dollars from others (clubs, organizations, groups, and government).**

Achieve others (clubs, organizations, groups, government) fiscal year dollar amount goal.

**Related Measures:**

**M 5:Amount of dollars from others (clubs, organizations, groups, government).**

Amount of dollars from others (clubs, organizations, groups, government) as tabulated from the Raiser's Edge development software. The dollar amount generated from these constituents is monitored daily. This data is shared with the entire staff at the weekly staff meeting, and the Board of Trustees' Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

**Target:**

Obtain at least $700,207 from others (clubs, organizations, groups, government) for FY 2012.

**Findings (2011-2012) - Target: Not Reported This Cycle**

The data will not be known until the end of the fiscal year (June 30, 2012).

**Findings (2010-2011) - Target: Partially Met**

Achieved over 74% of the others (clubs, organizations, groups, government) FY 2011 goal.

**O/O 6:Dollars from faculty/staff and participation rate.**
Achieve faculty/staff fiscal year dollar amount and participation rate goals.

**Related Measures:**

**M 6:** Dollars and participation rate from faculty/staff.

Amount of dollars and participation rate from faculty/staff as tabulated from the Raiser's Edge development software. The dollar amount generated from these constituents is monitored daily and the participation rate is calculated. This data is shared with the entire staff at the weekly staff meeting, and the Board of Trustees' Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

**Target:**

Obtain at least $111,631 from faculty and staff for FY 2012 and attain at least a 41.5% participation rate from faculty and staff giving (equating 310 donors).

**Findings (2011-2012) - Target: Not Reported This Cycle**

The data will not be known until the end of the fiscal year (June 30, 2012).

**Findings (2010-2011) - Target: Met**

Exceeded the faculty/staff FY 2011 goal of $85,000 and raised $93,026 and obtained 282 donors for a participation rate of 35.3.

**O/O 7:** Number of proposal submissions

Detailed description: Increase proposal submissions and letters of inquiry each year.

**Related Measures:**

**M 7:** Number of proposal submissions.

Number of proposal submissions as tabulated from the Raiser's Edge development software. The number of proposals submitted is monitored daily. This data is shared with the entire staff at the weekly staff meeting, and the Board of Trustees' Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

**Target:**

Increase proposal submissions and letters of inquiry by 10%.
**Findings (2011-2012) - Target: Not Reported This Cycle**
The data will not be known until the end of the fiscal year (June 30, 2012).

**Findings (2010-2011) - Target: Met**
Increased proposal submissions and letters of inquiry by more than the goal of 10%. A total of 130 were submitted in FY 2011 as opposed to 115 in FY 2010, resulting in a 13% increase.

G 2: Donor Relations and Stewardship program

Established a Donor Relations and Stewardship program to ensure all gifts are properly recorded and acknowledged, and donors are stewarded to higher giving levels.

O/O 8: Process all gifts.

Process all gifts according to the written gift processing guidelines.

**Related Measures:**

**M 8: Percentage of gifts processed.**

The processing, and entering of all gifts into the Raiser's Edge development software and data is verified weekly receipts. This data is shared with the budget analyst, financial administrator I, development technician and the associate vice president for development prior to being reported as part of the Annual Fund totals at the weekly staff meeting, and the Board of Trustee's Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

**Target:**

All (100%) of gifts are processed and tracked in the Raiser's Edge development software.

**Findings (2011-2012) - Target: Not Reported This Cycle**
The data will not be known until the end of the fiscal year (June 30, 2012).

**Findings (2010-2011) - Target: Met**
All gifts were processed.
O/O 9: Acknowledge all gifts.

Strive to acknowledge all gifts according to best practices.

Related Measures:

M 9: Acknowledgements made to Donors according to best practices.

Donors are acknowledged in less number of days from receipt of gift than in prior years as tabulated from the Raiser's Edge database and a copy of the acknowledgement is uploaded to Raiser's Edge. The acknowledgements are prepared daily in the form of formal letters mailed to each donor.

Source of Evidence: Existing data

Target:
Donors are acknowledged within a 48 hour time period

Findings (2011-2012) - Target: Not Reported This Cycle
The data will not be known until the end of the fiscal year (June 30, 2012).

Findings (2010-2011) - Target: Partially Met
Donors are acknowledged within a week down from almost two weeks. The number of days it takes to acknowledge donors was reduced by the introduction of process efficiencies i.e. establishing a tracking system on completed tasks.

O/O 10: Increase number of donors.

Increase the number of donors each year.

Related Measures:

M 10: Number of Donors.

Detailed description: Number of donors increases as tabulated from the Raiser's Edge database. The number of donors is monitored weekly. This data is shared with the entire staff at the weekly staff meeting and the Board of Trustee's Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

Target:
The total number of donors increases by 10% each year.
Findings (2011-2012) - Target: Not Reported This Cycle
The data will not be known until the end of the fiscal year (June 30, 2012).

Findings (2010-2011) - Target: Met
The number of donors increased more than 10%.

G 4: Senior Class Gift Drive
Establish a senior class gift drive in collaboration with the senior class president for all seniors to contribute towards a gift to DSU from their class.

O/O 13: Establish a senior class gift drive
Establish a senior class gift drive in cooperation with the Annual Fund Office to promote and encourage giving among the new graduates, via standard mail, email, social network outlets, campus-wide promotions and announcements in class meetings.

Related Measures:

M 13: Amount of dollars
Amount of dollars received from senior class members as tabulated in Raiser’s Edge database, feedback from constituents as solicited by surveys.

Source of Evidence: Existing data

O/O 14: Promote a senior class annual gift drive
Promote an annual gift drive centered on an attainable dollar goal with creative and full involvement of the senior class.

Related Measures:

M 14: Results of fundraising efforts
The results of fundraising efforts are tabulated and reported weekly in staff meetings and shared with senior class leaders.

Source of Evidence: Existing data

G 5: Anniversary Class Giving Program
Establish alumni giving programs and projects centered on acknowledgement of anniversary milestones rather than reunions which imply a physical gathering is necessary to the commemoration of the milestone. Set fundraising goals; targeting
classes using the traditional five-year reunion model, soliciting gifts from anniversary celebrants, setting specific, attainable goals, working with individuals and cohorts.

**O/O 15:Solicit contributions from alumni milestone classes**

Solicit contributions annually from alumni celebrating milestone quinquennial anniversaries, with emphasis on classes celebrating major milestones of 50, 25, 10 and five years; utilizing personalized standard and electronic correspondence, promotions and advertisements.

**Related Measures:**

**M 14:Amount of dollars**

Amount of dollars received from quinquennial celebrants responding to the anniversary class fundraising drive as tabulated in Raiser's Edge development software, the results of which are reported weekly in staff meetings and shared with cohort leaders.

Source of Evidence: Existing data

**Target:**

Obtain a minimum of $10,000 from the 50-Year anniversary class; $5,000 from the 25- and 10-Year classes; and $3,000 from the five-year class in FY 2012

**Findings (2011-2012) - Target: Not Reported This Cycle**

50-Year Class drive has successfully reached goal in FY 2012, due to engagement of an effective cohort, constant outreach to class members, effective online giving process and leadership of alumni office staff. Goal surpassed by 30%. Class leader was intimately and aggressively involved with the promotion of the class drive. Drive still in progress. Final data available at end of FY 2012.

**O/O 16:Establish leadership cohorts**

Establish leadership cohorts for each major milestone class to assist in contacting and encouraging responses to the class gift drives that will support achievement of projected goals

**Related Measures:**
M 15: Number of alumni cohorts

Number of alumni cohorts established and noted in Raiser’s Edge development software; monitored weekly and shared with staff in weekly meetings, cohort leaders, and reported monthly to the Development Office and the Vice President of Institutional Advancement/Chief of Staff.

Source of Evidence: Existing data

Target:
Cohort leaders have been identified to help advance the fundraising drives of the other four major milestone classes; however, specific data will not be available until the end of FY 2012.

Findings (2011-2012) - Target: Not Reported This Cycle

Cohort leaders have been identified to help advance the fundraising drives of the other four major milestone classes; however, specific data will not be available until the end of FY 2012.

O/O 20: Golden Anniversary Class Drive
Establish a 50 year anniversary class drive to celebrate and raise funds for scholarships.

Related Measures:

M 2: Amount of dollars and participation rate from alumni.
Amount of dollars and participation rate from alumni as tabulated from the Raiser’s Edge development software. The dollar amount generated from these constituents is monitored daily. This data is shared with the entire staff at the weekly staff meeting, and the Board of Trustees’ Development & Investment Committee at least quarterly.

Source of Evidence: Existing data

G 6: Comprehensive Campaign

Conduct a comprehensive campaign to raise funds to build the University endowed scholarships, student programs, teaching and research, and current use scholarships.

O/O 17: Establish a campaign steering committee

Establish a campaign steering committee representative of the community and leadership gift donors.

Related Measures:
M 16: Committee meetings held.
Committee meetings held at least quarterly.

Source of Evidence: Existing data

**Target:**
Develop Campaign Steering Committee comprising of no more than 20 members by November 2011 to meet at least quarterly.

**Findings (2011-2012) - Target: Not Reported This Cycle**
Progress data will not be known until the end of the fiscal year (June 30, 2012).

O/O 18: Focused areas

Identify the focused areas to build the campaign.

**Related Measures:**

M 17: Committee meeting minutes

Committee minutes (initiatives) maintained for each meeting and reported to the Board.

Source of Evidence: Existing data

**Target:**
Committee will identify at least four focused areas for the comprehensive campaign.

**Findings (2011-2012) - Target: Not Reported This Cycle**
Progress data will not be known until the end of the fiscal year (June 30, 2012).

O/O 19: Raise funds

Raise funds to support the identified focused areas.

**Related Measures:**

M 18: Dollar amount raised

Dollar amount of funds raised for the campaign focused areas.

Source of Evidence: Existing data
**Target:**
To be determined - dollar amount of funds to be raised during the comprehensive campaign.

**Findings (2011-2012) - Target: Not Reported This Cycle**
F1-F3 Progress data will not be known until the end of the fiscal year (June 30, 2012).
Mission / Purpose

The University College introduces first-year students to their college experience by providing a collegiate and academically enriched environment. As the point of entry for freshmen and incoming transfers, our support programs facilitate ongoing student engagement, while promoting intellectual growth and development. The University College encourages social integration through a variety of programs designed to assist students in succeeding during their freshmen year, as they persist toward graduation.

Designed to transition and introduce new students to their college experience.

Provide centralized and cohesive programs for first-year students.
Develop intellectual foundation and holistic journey which could yield a challenging academic, and social experience for freshmen.

Ensure that campus resources are accessible at every turn for students to focus on successful completion of their first year.
Goals without Outcome/Objective Relationships Specified

G 1: Student Success Objectives for First-Year Students

University College Objectives for First-Year Student Success (aligned to KPI, Goal 2 Student Success)

STUDENT OBJECTIVES FOR FIRST-YEAR SUCCESS

Students will:
§ Become aware of University policies and procedures

§ Understand curriculum requirements

§ Identify campus resources
§ Strengthen oral and written communication skills

§ Participate in academic community and social engagement opportunities

§ Engage in peer learning

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 1: First-Year Student Outcomes

1. First-year Retention Rate
2. Cohort GPA/Academic Performance
3. Engagement Satisfaction Survey
4. UC Exit Survey
5. Student Learning Outcomes - tutorial center, writing studio, and QRC

Related Measures:

M 1: First-Year Student Success Measures

Measures of Success (Students' Needs & Expectations)

1. Surveys and/or focus groups

2. Connelly Readiness Inventory (CRI)

3. Non-returning student survey

Measures of Success (Processes)
1. Individual Development Plan

2. Student and Advisor interactions/contacts

3. Intervention Strategies

Source of Evidence: Administrative measure - other

**M 2: Fall 2016 Academic Profile and Retention Analysis**

This analysis contains academic profile information on the 997 first-time freshman who entered DSU in Fall 2016. The review of data is presented in four classifications: 1) average high school GPA, 2) average SAT reading and math composite scores, 3) preliminary remedial math enrollment, and 4) preliminary first semester enrollment credits.

**Average High School GPA**

§ While comparing the Fall 2015 cohort's (N=887) academic profile to the Fall 2016 cohort (N=997), the difference is not material in the average high school GPA (3.11 and 3.12) and SAT composite scores (896.9 and 898.1) respectively.

§ A review five year trend (2012-2016) depicts that the Fall 2016 first-time freshman cohort as having the highest mean GPA of 3.12.

§ While measuring the high school performance of the past five cohorts, the mean high school GPA has increased year over year.

§ During this five-year period, the mean high school GPA depicts a 4.16% increase from 2012-2016.

**Average SAT Reading and Math Composite Scores**

§ Among the SAT Reading and Math composite scores, the Fall 2016 cohort has an average score of 898.1

§ The average SAT scores over the 2012-2016 five year period have remained flat within a range of scores 896.9 (low) in 2015 and 906.0 (high) in 2014.

§ The five year trend yields an average SAT reading and math composite score of 900.28.

**Preliminary Remedial Math Enrollment**
§ Over the past five years, the percentage of first-time freshman requiring remedial math substantiates the lowest placement* in Fall 2016.

§ During the 2012-2016 time period, remedial math enrollment indicates the highest percentage (76.9%) was recorded in Fall 2013.

§ Among the 997 Fall 2016 first-time freshman, 33.8% are enrolled in remedial math (MTSC-075), down from 63.0% from the previous year's (2015) placement.

*The university administered the ALEKS placement test for the first time to the incoming Fall 2016 new freshman cohort.

First Semester Enrollment Credits - 15 Strong to Completion

§ A review of the Fall 2016 first-time freshman cohort enrollment credits revealed that 933 (93.5%) out of 997 new freshmen are enrolled in a minimum of 15 credit hours of course work.

§ While the remaining 64 students are full-time, this population of first-time freshman elected to enroll between a range of 12-14 credits due to professional/work obligations and personal responsibilities. Documentation of the students' preferences is documented in the IDP.

Source of Evidence: Performance (recital, exhibit, science project)
Mission / Purpose

The Opportunity Scholars Program is composed of Dreamer students who possess a Deferred Action for Childhood Arrivals (DACA) status in the United States. The students are considered undocumented immigrants; however, their DACA status gives them a lawful presence in the United States with the benefit to be able to work legally and go to school.

The Opportunity Scholars Program began in the fall 2016 through a partnership with TheDream.US, which is the nation's largest college access and success program for Dreamers. The 1st cohort (fall 2016) consisted of 34 Dreamers and the 2nd cohort (fall 2017) consisted of 47 Dreamers. The Program expects to welcome a 3rd cohort of 41 Dreamer students in the fall 2018 semester.

The Opportunity Scholars Program serves and provides academic, personal, social, career, and professional support to all Dreamers to ensure a successful post-secondary education at Delaware State University. The Program works in collaboration with other departments as well as students, faculty, staff, and other administrators to ensure a welcoming, safe, inclusive, and successful transition to DSU for all Dreamers.

Annual Report Section Responses

Executive Summary (1-2 pages)

The Opportunity Scholars Program is composed of Dreamer students who possess a Deferred Action for Childhood Arrivals (DACA) status in the United States. The students are considered undocumented immigrants; Nevertheless, their DACA status provides them with a lawful presence in the United States with the benefit to be able to work legally, go to school, among other benefits.

The Opportunity Scholars Program began in the fall 2016 through a partnership with TheDream.US, which is the nation's largest college access and success program for Dreamers. The 1st cohort (fall 2016) consisted of 34 Dreamers and the 2nd cohort (fall 2017) consisted of 47 Dreamers. The Program is welcoming a 3rd cohort of 41 new Dreamer students in the fall 2018 semester.

The Opportunity Scholars Program serves and provides academic, personal, social, career, and professional support to all Dreamers to ensure a successful post-secondary
education at Delaware State University. The Program works in collaboration with other departments as well as students, faculty, staff, and administrators to ensure a welcoming, safe, inclusive, and successful transition to DSU. Furthermore, with the assistance and collective efforts of the student body, faculty, staff, and administrators, the Program intends to achieve a successful campus life integration process for all Dreamers.

**Unit(s) Initiatives accomplished in this cycle**

- Created Dreamers Success Account with the purpose to offset the educational needs of Dreamers enrolled at Delaware State University. The funds will support educational needs not covered by TheDream.US scholarships, such as books, supplies, coverage of exam fees (GMAT, GRE, etc.), DACA renewal fees, and other relevant academic based needs.

- Successfully engaged in fundraising efforts with advocacy committees such as the Progressive Democrats of Sussex County, Matthew 25 Action Committee, and the Unitarian Universalists of Southern Delaware. Due to the engagement and participation of such efforts, I have been able to fundraise approximately $6,000.

- Due to the connections made with advocacy groups/committees, I was able to make housing available for those Dreamers who do not have the financial resources to return home during school breaks (i.e. Thanksgiving) including summer and winter recesses.

- Successful Persistence/Retention rate

  **1st Cohort - 85.2% retention rate:** Out of 34 Dreamers who matriculated at DSU in the fall 2016 semester, 29 of them returned to and have remained enrolled at DSU. The 5 Dreamers who did not return, transferred to one of TheDream.US partner colleges due to DSU not having their desired major/academic career.

  **2nd Cohort - 97.8% retention rate:** Out of the 47 Dreamers who matriculated at DSU in the fall 2017 semester, 46 of them returned and have remained enrolled at DSU. The only one Dreamer who did not remain to DSU, decided to transfer to one of TheDream.US partner colleges due to DSU not offering his desired major/academic career.

  **Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.**

  1. **Goal: Render support to Dreamers**

     **Objective/Outcome:** Financial support
     **Measurement:** Number of Donations received towards the Dreamers Success Account
     An excel spreadsheet will be utilized in order to keep track of all donations (i.e. personal, corporate, etc). In addition, the DSU Foundation will be sharing monthly reports pertaining to the available funds in the Dreamers Success Account.
Target: $3,000 in the first year
Findings 2016-2017: Met through engagement and participation of fundraising events. Approximately $6,000 were collected.
Action Plan 2016-2017: Director will continue to connect with organizations who have the potential to provide financial contributions to the Dreamers.

Objective/Outcome: Academic Support - Dreamers Academic Standing
Measurement: GPA tracking
An excel spreadsheet will be utilized to track the GPA of each individual Dreamer as well as of each cohort and the Program as a whole.
Target: 3.25 GPA
Findings 2016-2017: Met. The overall cumulative GPA for the Program was a 3.5. The 1st Dreamer cohort achieved a GPA of 3.6. The 2nd cohort achieved a GPA of 3.35.
Action Plan 2016-2017: Continue to provide academic support to all Dreamers and closely monitor overall GPA.

Objective/Outcome: Program's retention rates
Measurement: Considering the number of Dreamers who have remained matriculated at DSU on a year to year basis.
Target: To achieve a 70% retention rate for the Program
Findings 2016-2017: The retention rate for the 1st cohort is at 85.3% and the retention rate for the 2nd cohort is at 97.9%. The overall retention rate for the program is at 91.6%.
Action Plan 2016-2017: Currently, all Dreamers are on track to achieve graduation in 4 years or less. However, the Opportunity Scholars Program has not had a graduating class yet to perform an assessment on graduation rates.

Closing the Assessment Loop: Please share one or two prime examples of your unit's assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? b) Have these changes been implemented? If not, when will they be implemented? c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

- Due to Dreamers' limited financial resources for books and other academic needs, the Opportunity Scholars Program has decided to engage in fundraising activities and efforts. Such engagement has created an opportunity for the Program to collect donations not only for academic needs, but also for Dreamers' immigration status renewals. Furthermore, due to the students' limited financial resources, different departments such as the Testing Office, Integrated Academic Support Services, Career Services, and the Counseling Department have created paid on-campus job opportunities particularly for Dreamer students. The DSU Foundation is also one of the departments who have financially contributed to the Program.
- The Opportunity Scholars Program has achieved an overall GPA of 3.5, which has created many opportunities for the program and the Dreamer students.
- The Program's retention rate is a 91.6%, which has allowed for the Program to continue receiving the financial support that it needs.
Mission / Purpose

The objectives of the graduate program in physics and optics aim at training future workforce and researchers in diverse fields of physics and optical sciences. Our educational activities are combined and integrated with our research focus, creating a stimulating and engaging environment for the students to achieve professional success and leadership status and opening opportunities to a highly demanding multidisciplinary market.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Prepare each graduate for success in professional careers
Prepare each graduate for success in professional careers in industry, research, government, or academia in the 21st century global society by providing them with necessary skills and knowledge in their area of study

SLO 1: Students will learn the advance Optics content needed to solve problems quantitatively

Students will learn the advance Optics content needed to solve problems quantitatively using analytic and numerical methods to find their carriers in different organizations.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Related Measures:

M 1: Midterms, quizzes, and final exams

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.
Source of Evidence: Writing exam to assure certain proficiency level

**Connected Documents**
- List of Outcome based Assessment-PhD Optics FALL 2017
- Outcomes based Assessment PhD OPTICS FALL 2017
- List of Outcome based Assessment-PhD Optics Spring 2018
- Outcomes based Assessment of classes PhD OPTICS SPRING 2018

**Target:**
The class average of all the student learning outcomes should be > 3.00 in a scale of 5.00.

**Findings (2017-2018) - Target: Met**
The class average from the courses offered in Fall 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose: 1. PHYS 563 - Math Methods III, 2. Modern Optics, 3. PHYS 605 - Principles of lasers & Optical Devices, 4. PHYS 675-Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The class average from the courses offered in Spring 2018 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

**Findings (2016-2017) - Target: Met**
The class average from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 671 Advanced Electromagnetic Theory I. The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.
The class average from the courses offered in spring 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 665 Statistical Mechanics, 3. PHYS 667 - Mathematical Methods IV, 4. PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2015-2016) - Target: Met**

The class average from the courses offered in Fall 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 563 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 665 Statistical Mechanics, 5. PHYS 675 Quantum Mechanics I The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in Spring 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 667 Math Methods IV, 3. PHYS 676 Quantum Mechanics II, 4. PHYS 803 Modern Laser Spec Methods. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2014-2015) - Target: Met**

Fall 2014: The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 671 Advanced Electromagnetic Theory I, 5. PHYS 803 Modern Laser Spec Method. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Spring 2015: The class average from the courses offered in spring 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:
1. PHYS 667 - Mathematical Methods IV, . PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2013-2014) - Target: Met

**Fall 2013**: The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose. 1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 675 Quantum Mechanics I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2014**: The class average from the courses offered in spring 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose: 1. PHYS 601 - Non Linear Optics, 2. PHYS 667 - Mathematical Methods IV, 3. PHYS 676 Quantum Mechanics II. The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

Findings (2012-2013) - Target: Met

The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose. 1. PHYS 565 Math Methods III 2. PHYS 600 Modern Optics 3. PHYS 605 Principles of Lasers & Optical Devices 4. PHYS 671 Adv Electromagnetic Theory I The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2013**
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose. 1. PHYS 601 Non Linear Optics 2. PHYS 667 Math Methods IV 3. PHYS 672 Advanced Electromagnetic Theory II 4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2011-2012) - Target: Met

The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are
the courses which have been used for this purpose.

1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 665 Statistical Mechanics
5. PHYS 675 Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in spring 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 676 Quantum Mechanics II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

**M 2: Student course evaluation**
Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

**Connected Documents**
- Student Survey of Outcomes PhD Optics FALL 2017
Target:
The student response of survey relating to the student learning outcomes should be > 3.00 in a scale of 5.00.

Findings (2017-2018) - Target: Met

The average of the student response relating to the understanding of the subject matters from the course offered in Fall 2017 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the subject matters from the course offered in Spring 2018 semester (one which has this outcome fulfilled) have been taken into account. **SLO 2:** Students will engage in research projects and learn of state-of-the-art technologies

Students will engage in research projects and learn of state-of-the-art technologies to become an independent researcher in his area of research

**Relevant Associations:**

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.

7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

Related Measures:

M 1: Midterms, quizzes, and final exams

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

Midterms, quizzes, and final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Target:
The class average of all the student learning outcomes should be > 3.00 in a scale of 5.00.

Findings (2017-2018) - Target: Met

The class average from the courses offered in Fall 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose: 1. PHYS 563 - Math Methods III, 2. Modern Optics, 3. PHYS 605 - Principles of lasers & Optical Devices, 4. PHYS 675-Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The class average from the courses offered in Spring 2018 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

Findings (2016-2017) - Target: Met

The class average from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are
the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 671 Advanced Electromagnetic Theory I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in spring 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 665 Statistical Mechanics, 3. PHYS 667 Mathematical Methods IV, 4. PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2015-2016) - Target: Met**

The class average from the courses offered in Fall 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 563 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 665 Statistical Mechanics, 5. PHYS 675 Quantum Mechanics I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in Spring 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 667 Math Methods IV, 3. PHYS 676 Quantum Mechanics II, 4. PHYS 803 Modern Laser Spec Methods. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2014-2015) - Target: Met**

Fall 2014: The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

Spring 2015: The class average from the courses offered in spring 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 667 - Mathematical Methods IV, . PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2013-2014) - Target: Met**

**Fall 2013:** The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 675 Quantum Mechanics I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2014:** The class average from the courses offered in spring 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:
1. PHYS 601 - Non Linear Optics, 2. PHYS 667 - Mathematical Methods IV, 3. PHYS 676 Quantum Mechanics II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2012-2013) - Target: Met**

**Fall 2012**
The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 671 Adv Electromagnetic Theory I
The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2013**
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 672 Advanced Electromagnetic Theory II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 665 Statistical Mechanics
5. PHYS 675 Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 676 Quantum Mechanics II

**SLO 4:** Students will be able to organize and conduct original investigations and reach scientifically appropriate conclusions.

Students will be able to organize and conduct original investigations and reach scientifically appropriate conclusions.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

**Related Measures:**

**M 1: Midterms, quizzes, and final exams**

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

5. PHYS 675 Quantum Mechanics I

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 676 Quantum Mechanics II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

G 3:Produce graduates that have the broad-based knowledge and communication skills needed for success in the global society

SLO 5:Students will be capable of effectively communicating the results of their studies in a variety of formats

Students will be capable of effectively communicating the results of their studies in a variety of formats, including written reports and peer-reviewed publications in known scientific journals and poster presentations in scientific conferences, or oral presentations to peers in the scientific community.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.

**Related Measures:**

**M 1: Midterms, quizzes, and final exams**

Midterms, quizzes, and final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 665 Statistical Mechanics
5. PHYS 675 Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 676 Quantum Mechanics II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Plans for Data Collection Relating to Direct Measurement

1. An Assessment committee has been formed (a total of six faculty members and Department Assistant Ms. Amal Juracka) to coordinate the assessment process of the Department. The committee is chaired by Dr. Mukti M. Rana, an Assistant Professor in the Department of Physics and Pre-Engineering. 2. In the Fall of 2011, the committee prepared the syllabi of all the courses for various degree programs of the department. The syllabi were based on a uniform format which has the catalog description of the course, learning outcomes of the course and relationship of the learning outcomes of the course with the student learning outcomes (SLO) of the program which it belongs to, among others. The instructor of the course makes sure that the prepared course syllabus complies with his view. 3. A survey questionnaire has been prepared for each of the courses. These questions are same as learning outcomes of the course. 4. At the end of the semester, the students are asked to fill out their response relating to the understanding of the subject matter covered. They response should be in the scale of 1-10 with 1 being the lowest and 10 being the lowest. 5. The average of the response was determined and linked with the SLO's of the program and that number gives the final indirect measurement of student assessment. 6. Sample feedback form is attached here.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Responsible Person/Group: 1. Teaching faculty members 2. Assessment committee

Student feedback form will be used as indirect measurement

1. An Assessment committee has been formed (a total of six faculty members and Department Assistant Ms. Amal Juracka) to coordinate the assessment process of the Department. The committee is chaired by Dr. Mukti M. Rana, an Assistant Professor in the Department of Physics and Pre-Engineering.
2. In the Fall of 2011, the committee prepared the syllabi of all the courses for various degree programs of the department. The syllabi were based on a uniform format which has the catalog description of the course, learning outcomes of the course and relationship of the learning outcomes of the course with the student learning outcomes (SLO) of the program which it belongs to, among others. The instructor of the course makes sure that the prepared course syllabus complies with his view.

3. A survey questionnaire has been prepared for each of the courses. These questions are same as learning outcomes of the course.

4. At the end of the semester, the students are asked to fill out their response relating to the understanding of the subject matter covered. They response should be in the scale of 1-10 with 1 being the lowest and 10 being the lowest.

5. The average of the response was determined and linked with the SLO's of the program and that number gives the final indirect measurement of student assessment.

6. Sample feedback form is attached here.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Finished  
**Priority:** High  

**Responsible Person/Group:** 1. Teaching faculty members 2. Assessment committee
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 3: Lesson Planning
Candidate’s ability to plan instruction.

SLO 3: To design and develop a pedagogically sound standard-based lesson plan
Students will be able to design and develop a pedagogically sound standard-based lesson plan.

Related Measures:

M 3: Lesson Plan Assessment (Assessment # 3)
Scores on the Lesson Plan Assessment (Assessment # 3).
Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
80% of the students will attain target or acceptable level in designing and developing a lesson plan.

Findings (2016-2017) - Target: Met
100% of TEP students in Physical Education were able to develop a pedagogically sound standard-based lesson plan.

Findings (2015-2016) - Target: Met
100% of TEP students in Physical Education were able to develop a pedagogically sound standard-based lesson plan.

Findings (2013-2014) - Target: Met
100% of all TEP students in Physical Education were able to develop a pedagogically sound standard-based lesson plan.

G 4: Student Teaching Observation
Internship or Clinical Experiences.

SLO 4: Effective teaching performance
Teacher Candidates will demonstrate an effective teaching performance.
Related Measures:

M 4: Student Teaching Rubric (Assessment # 4)
Scores on Student Teaching Rubric (Assessment # 4).
Source of Evidence: Field work, internship, or teaching evaluation

G 5: Student candidate's effectiveness on student learning
Student candidate’s effectiveness as reflected by TWS.

SLO 5: To plan, to deliver, and assess a standard-based instructional unit
Student Teachers will be able to plan, to deliver, and assess a standard-based instructional unit that facilitates the learning of K-12 students.

Related Measures:

M 5: Teacher Work Sample Assessment Rubric (Assessment # 5)
Scores on Teacher Work Sample Assessment Rubric (Assessment # 5).
Source of Evidence: Field work, internship, or teaching evaluation

G 6: Unit planning addressing AAHPERD/NASPE standards
Students' ability in unit planning addressing AAHPERD/NASPE standards.

SLO 6: To plan and develop AAHPERD/NASPE standard-based unit plan
Students will be able to plan and develop AAHPERD/NASPE standard-based unit plan.

Related Measures:

M 6: Unit Planning Rubric (Assessment # 6)
Scores on Unit planning rubric.
Source of Evidence: Field work, internship, or teaching evaluation

Target:
80% of the students will demonstrate ability to plan and develop a standard-based unit plan.

Findings (2016-2017) - Target: Met
100% of all TEP students in Physical Education were able to plan and develop a standards-based unit plan.
Findings (2015-2016) - Target: Met
100% of all TEP students in Physical Education were able to plan and develop a standards-based unit plan.

G 7: Teaching implementation and instructional delivery
Teaching implementation and instructional delivery to meet the needs of diverse student population.

SLO 7: To implement standard based instruction

Teacher candidates will implement standard based instruction to meet the variety of students needs.

Related Measures:

M 7: Lesson Teaching Observation (Assessment #7)
Scores on the Lesson Teaching Observation rubric.

Source of Evidence: Field work, internship, or teaching evaluation

Target:
80% of the students will attain target or acceptable level in implementing standard based instruction.

Findings (2016-2017) - Target: Met
100% of the TEP students of physical education attained a target or acceptable level in implementing standard based instruction.

Findings (2015-2016) - Target: Met
100% of the TEP students of physical education attained a target or acceptable level in implementing standard based instruction. The data for this finding will be uploaded as Assessment #7 data.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 2: To obtain passing or higher Grade

Students will be able to obtain passing Grade or higher in the major content area courses.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Student success in the Scientific classes
Physical education faculty will meet with the physical education majors that are enrolled in Anatomy & Physiology for the first time to ensure they are aware of (1) the rigor associated with learning in this particular class, (2) study habits (individual and group) that can assist with the acquisition of the content knowledge, and (3) additional assistance that is available at the tutoring center on campus.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Meet with the students registered for Anatomy & Physiology, the first week of classes (or sooner), and apprise them of the key points listed above,  
**Responsible Person/Group:** Physical education faculty, Dr. Robert Martin and Dr. Nirmaljit Rathee.  
**Additional Resources Requested:** Possible tutoring.  
**Budget Amount Requested:** $0.00 (no request)

**Data for the Student Teaching Evaluation**  
The Student Teaching Evaluation data will be completed in May, 2012 and at that time the Program Coordinator, Dr. Robert Martin, will update the results of that assessment.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Planned  
**Priority:** High  

**Responsible Person/Group:** The physical education Program Coordinator, Dr. Robert Martin.  
**Additional Resources Requested:** None  
**Budget Amount Requested:** $0.00 (no request)

**Review of Student Teaching Evaluation Assessment**  
The data for the Student Teaching Evaluation will be available in May, 2012 and I will update Weave at that time.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Planned  
**Priority:** High  

**Projected Completion Date:** 05/04/2012  
**Responsible Person/Group:** The Physical Education Program Coordinator, Dr. Robert Martin  
**Additional Resources Requested:** None  
**Budget Amount Requested:** $0.00 (no request)
Learning to administer Fitnessgram

Beginning in the Fall 2013, EDUC 124 students who have successfully completed and passed Fitnessgram fitness tests as required by the NASPE/NCATE Standards for Beginner Teachers will assist in administering Fitnessgram to all other physical education majors annually.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Projected Completion Date: 12/10/2013
Responsible Person/Group: Dr. B. Martin, Dr. N. K. Rathee and students of Fitness course EDUC 124 in Fall 2013
Additional Resources Requested: Updated version of Fitnessgram and its installation in PE Lab computer terminals.
Mission / Purpose

The mission of the Department of Physics and Engineering is to provide a quality higher education in physics with emphasis in selected engineering disciplines that prepares students to achieve professional success and leadership status in their communities.

Vision:

The vision of the Department of Physics and engineering is to be a top choice for students in Delaware and the surrounding regions who are interested in pursuing studies in physics and related fields. We envision the department to be widely recognized and acclaimed for excellence in teaching, research, outreach, and service. We expect our graduates to be competitive and successful in their future endeavors, including the pursuit of graduate studies and careers in physics and related fields. In support of the University's and the CMNST's vision, the Department of Physics and Engineering will:

- Excel in the education of undergraduate and graduate students in the professional, technical, and scientific arenas;
- Support science and technology research and economic development in Delaware, especially in Kent and Sussex counties;
- Offer undergraduate programs in Physics, Engineering Physics, Physics Teaching, M.S. degree programs in Physics, Applied Optics and Physics Teaching and a Ph.D. program in Optics;
- Strengthen the existing degree programs by ensuring the courses and curricula are fully aligned with 21st century global needs and accreditation standards; and improve the Department's recognition regionally, nationally and internationally through quality education and engagement in cutting edge research.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Strengthen and support academic programs to enable students to reach their career goals.

Strengthen and support academic programs to enable students to reach their career goals.
O/O 1: Prepare graduates for higher education or employment

**Relevant Associations:**

**DSU Learning Goal Associations:**
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
College of Mathematics, Natural Sciences, & Technology
1.1 For all bachelor's degree programs, develop a robust honors curriculum available to all majors and designed to challenge the best students, culminating in a research thesis.
1.2 Develop and implement support and enrichment strategies that enable all interested students, even those who enter the University with weak preparation, to succeed as majors in the College and reach their career goals.
1.3 Improve courses and curricula to maximize student learning, using proven research-based pedagogy and incorporating inquiry-based active-learning strategies.

**Related Measures:**

**M 1: Conventional Assessment Tools**

Conventional assessment tools include homework and quiz performance, and exam questions designed to target specific physical concepts.

Source of Evidence: Evaluations

M2: Alumni Survey

Alumni surveys are conducted each year

Source of Evidence: Document Analysis

**Target:**
Indirect Measurement: Response of Alumni survey will be used for this purpose. A response of 3 out of 5 from alumni response is the target.
**Findings (2011-2012) - Target: Not Reported This Cycle**

Still Collecting Data

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Data is being processed**  
*Established in Cycle: 2011-2012*  
We are in the process of interviewing all the graduates of fall 2011 for their response.

**M 3: Internal data relating to alumni placement**

Each graduate of physics will be tracked relating to their future job placement or higher study.

Source of Evidence: Curriculum/syllabus analysis of course to program

**Connected Documents**
- Former DPE graduates and their status May 18
- 2017-18 Template for Faculty-data on Graduates to the chair for Annual Report

**Target:**
90% of our graduate will find their career in their area of expertise.

**Findings (2017-2018) - Target: Met**  
see attached table

**Findings (2016-2017) - Target: Met**  
see attached table

**Connected Document**
- Former DPE graduates and their status May 17

**Findings (2011-2012) - Target: Met**

Internally the data is collected to track the graduates after completing their degree in the Department. 5 undergraduate students graduated in May 2011; 3 are enrolled in graduate schools, 2 are working in industry. 2 MS graduated in Applied Optics December 2011, one in working in the government and the other in industry.

**O/O 6: Increase faculty, student participation in research**

Increase faculty, student participation in research.
Relevant Associations:

**DSU Learning Goal Associations:**
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**

**College of Mathematics, Natural Sciences, & Technology**

2.1 Increase the annual funding available through active research grants by 50% over three years when compared to the 2005-06 budget, and increase the success rate of proposals.
2.2 Increase the number and percentage of faculty with active research programs involving students and the publication and presentation of research results with student co-authors.
2.3 Continue to develop and improve research infrastructure, emphasizing 'shared' research equipment, instrumentation, space, and other resources making sure that these are supported appropriate to the value.
2.4 Identify and develop about four 'flagship' interdisciplinary and multi-departmental research areas in the College in which DSU becomes a recognized leader within five years.
2.5 Continue to develop and expand mutually beneficial research collaborations and partnerships with other state, regional, and national institutions.
2.6 Drive the actual average teaching assignment of faculty in the College toward 9 hours, to provide time for research.
3.2 Engage graduate students as K-12 teaching fellows, to assist the schools and improve communication and teaching skills of the fellows to prepare them for careers in the professorate.
4.2 Renovate, upgrade and expand laboratory space and infrastructure to support and enable high quality instruction and forefront research.
4.3 Champion and encourage improvements in campus-wide information technology infrastructure and desktop electronic access to scholarly materials.
4.4 Provide effective stewardship to reduce damage to and loss of equipment needed for teaching and research.
4.5 Utilize and further develop Internet 2, videoconferencing, and other capabilities to benefit learning, research, and partnerships.
4.6 Contribute interesting, engaging, and fun out-of-class enrichment activities featuring mathematics, science, engineering, and technology to enhance the living-learning environment on campus and involve student science clubs.

**Related Measures:**

**M 2: Alumni Survey**

Alumni surveys are conducted each year.
Source of Evidence: Document Analysis

**Target:**
1. Involve at least 15 undergrad students per year in research
2. Involve all the graduate student in research (100% involvement)
3. Involve all the faculty members to mentor students.
4. Increase the funded research by 5% each year.

**Findings (2017-2018) - Target: Met**
28 undergraduate students conducted research in various labs in the department, and presented their research findings on research day and other meetings, 2. All graduate students are involved in research 3. All DPE faculty members are involved in research with at least one student, 4. There is a an increase in grants money (from 2016 to 2017) (8 millions to almost 12 millions)

**Findings (2016-2017) - Target: Met**
26 undergraduate students conducted research in various labs in the department, and presented their research findings on research day and other meetings, 2. All graduate students are involved in research 3. All DPE faculty members are involved in research with at least one student, 4. There is a an increase in grants money (from 2015 to 2016) (6 millions to 8 millions)

**Findings (2011-2012) - Target: Met**
1. 15 undergraduate students are conducting research in various labs in the department
2. All graduate students are involved in research
3. All DPPE faculty members are involved in research with at least one student
4. There is a 17% increase in grants money (from 2010 to 2011) (12.5 millions to 15 millions).

M 7: Internal data for number of students faculty participate in research

Direct Measurement: Internal data for a) number of students, faculty participation in research projects b) amount of research funding recieved per year will be used.

Source of Evidence: Curriculum/syllabus analysis of course to program

**Target:**
1. Involve at least 15 undergrad students per year in research
2. Involve all the graduate student in research (100% involvement)
3. Involve all the faculty members to mentor students.
4. Increase the funded research by 5% each year

**Findings (2017-2018) - Target: Met**
28 undergraduate students conducted research in various labs in the department, and presented their research findings on research day and other meetings, 2. All graduate students are involved in research 3. All DPE faculty members are involved in research with at least one student,
4. There is an increase in grants money (from 2016 to 2017) (8 millions to almost 12 millions)

**Findings (2016-2017) - Target: Met**
26 undergraduate students conducted research in various labs in the department, and presented their research findings on research day and other meetings. 2. All graduate students are involved in research 3. All DPE faculty members are involved in research with at least one student 4. There is an increase in grants money (from 2015 to 2016) (6 millions to 8 millions)

**Findings (2012-2013) - Target: Met**
19 undergraduate students are conducting research in various labs in the department, and presented their research findings on Honors day, 2. All graduate students are involved in research 3. All DPPE faculty members are involved in research with at least one student. **There is a 17% increase in grants money (from 2010 to 2011) (12.5 millions to 15 millions)?**

**Findings (2011-2012) - Target: Met**
1. 15 undergraduate students are conducting research in various labs in the department 2. All graduate students are involved in research 3. All DPPE faculty members are involved in research with at least one student 4. There is a 17% increase in grants money (from 2010 to 2011) (12.5 millions to 15 millions).

**G 2: Improve and strengthen outreach efforts to academic and business populations of Delaware**

**O/O 2: Increase outreach activities particularly with local schools**

Increase outreach or collaboration with local schools so students as well as teachers from local K-12 schools will have opportunities to visit the department labs, participate in research and enroll in the degree programs.

**Relevant Associations:**
Strategic Plan Associations:
College of Mathematics, Natural Sciences, & Technology

3.1 Improve outreach to local and regional schools to strengthen mathematics, science, and technology programs, to improve motivation and course-taking of pre-college students, and be a resource to teachers.
3.2 Engage graduate students as K-12 teaching fellows, to assist the schools and improve communication and teaching skills of the fellows to prepare them for careers in the professorate.
3.3 Continue and increase partnerships and alliances with businesses and efforts to assist and attract underserved populations in the state.

Related Measures:

M 4: Internal data relating to outreach activities

Direct Assessment: Internal data relating to outreach activities such as (a) Number of times the visit by K-12 group happens per year to DSU (b) Number of students finds work in the research labs per year (c) Number of teachers work in the research lab employment in their area of expertise per year (d) Number of students enrolls from local school districts of Delaware in various program of DPE will be used as direct measurement.
Indirect Assessment Method: Number of visits conducted by DPE faculty/staff per year.

Source of Evidence: Evaluations

Target:
1. The students/teachers from the local school district will visit DPE twice in a year.
2. The DPE faculty/staff will visit the local k-12 twice in a year.
3. At least 2 students will work in the research labs of DPE in one year.
4. At least one faculty will serve as a judge in the science fair of the county.

Findings (2017-2018) - Target: Met
1. Held three one week Summer Middle School Student Mathematics and Physics camps 56 students participated,
2. Held the Annual OSCAR Summer high school student research program (7 students participated)
3. Held a five week Middle School Teachers Training Program (2 teachers participated), 4. Provided demonstrations at the Dover Public Library's MakerFest
5. Co-Sponsored and assisted with the Kent County Science Fair and awarded summer internships to 3 high school participants
6. Presented and performed science demonstrations at local school district's Science Night
7. Arranged lab tours for 50 students and teachers from a charter school in Brooklyn, NY

8. Donated Science Games and Kits to Smyrna Elementary School

9. Assisted with local school district’s Science Fair

10. Mentored four high school students in research labs during the 2017/2018 school year

**Findings (2016-2017) - Target: Met**

1. 
   a) Middle school Teacher from Seaford Middle Visited on 2/17/17,

   b) A DelTech Stanton Campus student visited and brought 4 middle school students with her 1/27/17

   c) 2 counselors and 13 students from DelTech Georgetown's Upward Bound Program visited on 3/11/17

2. 
   a) 5 faculty and staff and 4 students performed demonstrations at Fifer Middle school's Fall Festival

   b) Several faculty members and students volunteered at Capital school districts Science Night

   c) 3 Staff members provided Science Fair Project feedback to Milford Middle School students

   d) Faculty members judged Milford Middle and William Henry Middle School Science Fairs.

3. 26 undergraduate students and 12 graduate students (physics only)

4. 2 graduate students and 5 faculty volunteered to be judges at the Kent County Science Fair

**Findings (2016-2017) - Target: Met**

1. 
   a) Middle school Teacher from Seaford Middle Visited on 2/17/17,

   b) A DelTech Stanton Campus student visited and brought 4 middle school students with her 1/27/17

   c) 2 counselors and 13 students from DelTech Georgetown's Upward Bound Program visited on 3/11/17

2. 
   a) 5 faculty and staff and 4 students performed demonstrations at Fifer Middle school's Fall Festival
b) Several faculty members and students volunteered at Capital school districts Science Night

c) 3 Staff members provided Science Fair Project feedback to Milford Middle School students

d) Faculty members judged Milford Middle and William Henry Middle School Science Fairs.

3. 26 undergraduate students and 12 graduate students (physics only)

4. 2 graduate students and 5 faculty volunteered to be judges at the Kent County Science Fair

Findings (2011-2012) - Target: Partially Met
1. Students from local high school visited DPPE labs in Fall, 2011. Arrangements have been made with some of the high schools in the state to bring students to visit the department in summer 2012,
2. Two DPPE faculty will visit the local high schools in summer (OSCAR staff Jackie Jones visits each month)
3. During summer of 2012, at least three k-12 students will work in different labs of DPPE.
4. Two faculty members - Drs Rana and Boukari served as judge in sussex county science fair in 2012.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

More outreach to come in summer
Established in Cycle: 2011-2012
During the summer of 2012, we expect that more outreach will come.

G 3: Improve research and teaching infrastructure, technology, communication and electronic access to scholarly materials.

Improve research and teaching infrastructure, technology, communication and electronic access to scholarly materials.

O/O 3: Improve the teaching and research infrastructure

Improve the teaching and research infrastructure so the students will have access to modern teaching and research equipment, computers, internet access, display and technical journals in the field of Physics
Relevant Associations:

Strategic Plan Associations:
College of Mathematics, Natural Sciences, & Technology

4.1 Establish robust, diverse, lively, and effective communication methods to maximize information flow among College participants (students, staff, and faculty) and stakeholders on and beyond the campus.
4.2 Renovate, upgrade and expand laboratory space and infrastructure to support and enable high quality instruction and forefront research.
4.3 Champion and encourage improvements in campus-wide information technology infrastructure and desktop electronic access to scholarly materials.
4.4 Provide effective stewardship to reduce damage to and loss of equipment needed for teaching and research.
4.5 Utilize and further develop Internet 2, videoconferencing, and other capabilities to benefit learning, research, and partnerships.
4.6 Contribute interesting, engaging, and fun out-of-class enrichment activities featuring mathematics, science, engineering, and technology to enhance the living-learning environment on campus and involve student science clubs.

Related Measures:

M 2: Alumni Survey

Alumni surveys are conducted each year

Source of Evidence: Document Analysis

Target:
1. Provide smartboard support in teaching rooms.
2. Provide uninterrupted internet access including Wi-Fi access to the students.
3. Provide the necessary software and hardware for teaching labs.
4. Provide the state-of-the-art research equipment to the students.

Findings (2017-2018) - Target: Partially Met
1. every classroom/lab in the department is equipped with a smart board,
2. DSU is providing Wi-Fi access to students, 3. & 4. one lab was renovated for upper level courses, we are planning to renovate 2
teaching classrooms/lab, and the computer lab. More space is needed since the department is growing.

Findings (2011-2012) - Target: Partially Met
Our department has utilized Title III funds to improve teaching. First, 16 new compact computers were installed in two physics classrooms to enhance laboratory instruction. Second, a prototype video conferencing system was finished in our department, and it has been used on several occasions by faculty and students to connect with other institutions. Third, almost every physics classroom now has smartboard technology, which our students find extremely useful. Fourth, the computers in the computer lab have the Matlab software installed along with NI labview. Fifth many of the research labs, for instance, laser spectroscopy labs are equipped with ultra-speed femtosecond laser.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

More equipment or software buying in progress
Established in Cycle: 2011-2012
The renovation of teaching labs are in process. More equipment or software will be bought from Fall 2012.

M 5:Internal data relating to teaching and research facilities

Direct Assessment Method: (a) Equipment available to perform lab experiments based on the theories of various core courses (b) Number of desktop computers available to students for lab as well as theory courses. (c) Availability of number of smart board in each of the teaching lab (d) Availability of Wi-Fi network and internet in the lab computers. (e) Availability of journal papers published by American Physical Society.

Indirect Assessment Method: Exit Interview form students conducted each semester.

Source of Evidence: Professional standards

Target:
1. Provide smartboard support in teaching rooms.
2. Provide uninterrupted internet access including Wi-Fi access to the students
3. Provide the necessary software and hardware for teaching labs
4. Provide the state-of-the-art research equipment to the students.

Findings (2017-2018) - Target: Partially Met
We only have 4 teaching labs that serve as labs and classrooms, they are mainly equipped for lower level courses. We are planning to renovate 2 of the teaching labs and the computer lab. we renovated on lab for upper level courses, more lab space is still needed to conduct labs for upper level courses

Findings (2016-2017) - Target: Partially Met
We only have 4 teaching labs that serve as labs and classrooms, they
are mainly equipped for lower level courses. More lab space is needed to conduct labs for upper level courses.

**Findings (2011-2012) - Target: Partially Met**

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Lab Equipement and Software buying is progress**

*Established in Cycle: 2011-2012*
We are in the process of buying more hardware and software for our teaching labs.

**Request More Journal Papers to the Library**

*Established in Cycle: 2011-2012*
Access to the many other journal papers like: Sensors and Actuators, Journal of Infrared Physics and Technology has been request...

**O/O 6:Increase faculty, student participation in research**

Increase faculty, student participation in research.

**Relevant Associations:**

**DSU Learning Goal Associations:**

1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**

College of Mathematics, Natural Sciences, & Technology
2.1 Increase the annual funding available through active research grants by 50% over three years when compared to the 2005-06 budget, and increase the success rate of proposals.
2.2 Increase the number and percentage of faculty with active research programs involving students and the publication and presentation of research results with student co-authors.
2.3 Continue to develop and improve research infrastructure, emphasizing 'shared' research equipment, instrumentation, space, and other resources making sure that these are supported appropriate to the value.
2.4 Identify and develop about four 'flagship' interdisciplinary and multi-departmental research areas in the College in which DSU becomes a recognized leader within five years.
2.5 Continue to develop and expand mutually beneficial research collaborations and partnerships with other state, regional, and national institutions.
2.6 Drive the actual average teaching assignment of faculty in the College toward 9 hours, to provide time for research.
3.2 Engage graduate students as K-12 teaching fellows, to assist the schools and improve communication and teaching skills of the fellows to prepare them for careers in the professorate.
4.2 Renovate, upgrade and expand laboratory space and infrastructure to support and enable high quality instruction and forefront research.
4.3 Champion and encourage improvements in campus-wide information technology infrastructure and desktop electronic access to scholarly materials.
4.4 Provide effective stewardship to reduce damage to and loss of equipment needed for teaching and research.
4.5 Utilize and further develop Internet 2, videoconferencing, and other capabilities to benefit learning, research, and partnerships.
4.6 Contribute interesting, engaging, and fun out-of-class enrichment activities featuring mathematics, science, engineering, and technology to enhance the living-learning environment on campus and involve student science clubs.

Related Measures:

**M 2: Alumni Survey**

Alumni surveys are conducted each year

Source of Evidence: Document Analysis

**Target:**
1. Involve at least 15 undergrad students per year in research
2. Involve all the graduate student in research (100% involvement)
3. Involve all the faculty members to mentor students.
4. Increase the funded research by 5% each year.

**Findings (2017-2018) - Target: Met**
28 undergraduate students conducted research in various labs in the department, and presented their research findings on research day and other meetings, 2. All graduate students are involved in research 3. All DPE faculty members are involved in research with at least one student, 4. There is an increase in grants money (from 2016 to 2017) (8 millions to almost 12 millions)

**Findings (2016-2017) - Target: Met**
26 undergraduate students conducted research in various labs in the
department, and presented their research findings on research day and other meetings, 2. All graduate students are involved in research 3. All DPE faculty members are involved in research with at least one student, 4. There is an increase in grants money (from 2015 to 2016) (6 millions to 8 millions)

**Findings (2011-2012) - Target: Met**

1. 15 undergraduate students are conducting research in various labs in the department
2. All graduate students are involved in research
3. All DPPE faculty members are involved in research with at least one student
4. There is a 17% increase in grants money (from 2010 to 2011) (12.5 millions to 15 millions).

**M 7: Internal data for number of students faculty participate in research**

Direct Measurement: Internal data for a) number of students, faculty participation in research projects b) amount of research funding received per year will be used.

Source of Evidence: Curriculum/syllabus analysis of course to program.

**Target:**
1. Involve at least 15 undergrad students per year in research
2. Involve all the graduate student in research (100% involvement)
3. Involve all the faculty members to mentor students.
4. Increase the funded research by 5% each year

There is an increase in grants money (from 2015 to 2016) (6 millions to 8 millions)

**Findings (2012-2013) - Target: Met**

19 undergraduate students are conducting research in various labs in the department, and presented their research findings on Honors day, 2. All graduate students are involved in research 3. All DPPE faculty members are involved in research with at least one student 4. There is a 17% increase in grants money (from 2010 to 2011) (12.5 millions to 15 millions)?
Findings (2011-2012) - Target: Met
1. 15 undergraduate students are conducting research in various labs in the department.
2. All graduate students are involved in research.
3. All DPPE faculty members are involved in research with at least on student.
4. There is a 17% increase in grants money (from 2010 to 2011) (12.5 millions to 15 millions).

G 4: Conduct periodic assessment, evaluation to improve performance and to measure progress

Conduct systematic and periodic assessment, evaluation to obtain feedback for improving performance and measuring progress against goals and desired outcomes.

O/O 4: Conduct assessment and evaluation twice in a year

Conduct assessment and evaluation of student learning outcomes and departmental goals twice a year to measure progress and self improvement.

Relevant Associations:

Strategic Plan Associations:
College of Mathematics, Natural Sciences, & Technology
6.1 Utilize results of assessment with specific measurable targets to guide and drive continuous improvement of programs and processes, to understand trends, and to inform decisions.
6.1 Develop, implement, and utilize objective and credible processes to (a) assess student learning outcomes; (b) review and improve the quality and performance of programs, departments, and the College; (c) monitor progress on the goals in this strategic plan; and (d) report the results.

Related Measures:

M 1: Conventional Assessment Tools

Conventional assessment tools include homework and quiz performance, and exam questions designed to target specific physical concepts.

- DPE Outcomes based Assessment of classes SPRING 2018
- DPE Outcomes based Assessment of classes SPRING 2018
Target:
The assessment of the offered courses will be done after the end of fall and spring semesters (Twice in an academic year).

Findings (2017-2018) - Target: Met
A. The teaching faculties of all the core courses offered by the department turned in their course report. Then the assessment committee of the department met to analyze and compile the data. They looked at the report for assessment twice in a year. B. The average of student performance in quizzes midterms finals etc were used as a measure of direct assessment. The performance is mapped to course outcomes and course outcomes were then mapped to student learning outcomes for the programs. C. The class average from the courses offered in Fall 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose: 1. PHYS 191 - University Seminar I 2. PHYS 201 - General Physics I 3. PHYS 202 - General Physics II 4. PHYS 305 - Thermal Physics 5. PHYS 313 - Analytic Mechanics 6. PHYS 331 - Mathematical Methods I 7. PHYS 341 - Theory of Electricity & Magnetism 8. PHYS 361 - Modern Physics 9. PHYS 451 - Introduction to Research. The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details. The class average from the courses offered in Spring 2018 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose. 1. PHYS 192 - University Seminar II, 2. PHYS 201 - General Physics I 3. PHYS 202 - General Physics II, 4. PHYS 220 - Scientific Programming, 5. PHYS 314 Analytic Mechanics-Dynamics, 6. PHYS 332 - Mathematical Methods II, 7. PHYS 342 - Theory of Electricity & Magnetism II, 8. PHYS 362 - Quantum Mechanics, 9. PHYS 413-Intro to Lasers, 10. PHYS 418 - Theoretical & Experimental Research. The class average of this student learning outcome was found to be 4 in a scale of 5. - DPPE Student Survey of Outcomes based Assessment of classes ALL PROGRAMS SPRING 2012

**G 5:** Increase the number of students graduating from the department with bachelor’s degrees and with master’s degrees

Increase the number of students graduating from the department with bachelor’s degrees and with master’s degrees while raising the percentage of students graduating with honors.

**O/O 5:** Increase student (a) graduation rate and (b) retention rate

Increase s
tudent (a) graduation rate (b) retention rate.

**Relevant Associations:**

**Strategic Plan Associations:**
- College of Mathematics, Natural Sciences, & Technology
  7.1 Increase the percentage of freshmen declared majors in the College who enroll as sophomores to a total of 90% in four years by focusing on retaining declared majors and by attracting undeclared majors.
  7.2 Ensure the number of transfers into the College equals or exceeds the number transfers out of the College each year.
  7.3 Recruit and track transfer students with strong science/mathematics backgrounds, especially Associates degree recipients from Delaware Technical and Community College.
  7.4 Increase DSU’s visibility and appeal among high school students with strong preparation in mathematics and science.
  7.5 Ensure adequate financial support and on-campus, major-related employment (research, tutoring, etc) is available for every student with financial need in the College.
7.6 Provide paid graduate assistantships, tuition waivers, and benefits to full-time graduate students in all programs in the College.

**Related Measures:**

**M 6:Internal data relating to retention and graduation**

Direct Assessment Method: Internal data for retention and graduation of students in each year is used.

Source of Evidence: Focus groups on teaching, learning, program value

**Target:**

i. Graduation Rate
   1. Undergraduate Graduation Rate: a) BS in Physics 60%. b) BS in Engineering Physics 60%
   2. Graduate Graduation Rate: a) MS in Physics 80% b) MS in Applied Optics 80% c) PhD in Optics 80%

ii. Retention Rate
   1. Undergraduate Retention Rate: a) BS in Physics 60% b) BS in Engineering Physics 60%
   2. Graduate Retention Rate: a) MS in Physics 80% b) MS in Applied Optics 80%.c) PhD in Optics 80%

**Findings (2017-2018) - Target: Met**
The undergraduate retention rate as of Fall 2016 is 74.1 % according to school data

**Findings (2016-2017) - Target: Partially Met**
The retention rate of the past cycle is 74% according to school data

**Findings (2011-2012) - Target: Not Reported This Cycle**
in process of collecting data

Data is being processed
We are in the process of interviewing all the graduates of fall 2011 for their response.
Lab Equipment and Software buying is progress
We are in the process of buying more hardware and software for our teaching labs.

More equipment or software buying in progress
The renovation of teaching labs are in process. More equipment or software will be bought from Fall 2012.

More outreach to come in summer
During the summer of 2012, we expect that more outreach will come.
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Internal data relating to outreach activities | Outcome/Objective:
Increase outreach activities particularly with local schools

Projected Completion Date: 08/15/2012

Request More Journal Papers to the Library
Access to the many other journal papers like: Sensors and Actuators, Journal of Infrared Physics and Technology has been requested to the library.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Internal data relating to teaching and research facilities | Outcome/Objective: Improve the teaching and research infrastructure

Will be reported at the end of this cycle
Will be reported at the end of this cycle

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Internal data relating to retention and graduation | Outcome/Objective:
Increase student (a) graduation rate and (b) retention rate

Projected Completion Date: 08/15/2012

Annual Report Section Responses

Executive Summary (1-2 pages)
The Department of Physics and Engineering (DPE) is currently offering a full 4-years BS program in Engineering Physics that includes three different concentrations: Electrical Engineering, Bioengineering and Optical Engineering. The Department also offers the BS in Physics degree. DPE is host of the Optical Science Center for Applied Physics...
Research (OSCAR) at Delaware State University. A total of 11 undergraduate students received their BS degree in Engineering Physics (9), Physics (1), and physics education (1) in the current academic year. The exchange collaborative program in BS in Optics has been implemented in 2016 with Changchun University of Science and Technology, China. DPE is offering 4 courses in China the summer of 2018. We have also continued the development of the program of integration of research and education funded mostly by OSCAR. Students were involved in research projects under the mentorship of a faculty. The students enrolled in this program presented their work at the DSU Annual Research Day Presentation, 2018.

We also have graduate programs that include M.S. in Physics, M.S in Applied Optics and PhD in Optics. Two graduate students were awarded their PhD in Optics, 2 MS in Applied Optics. Students were also involved in mentorship and tutoring efforts of undergraduate students. Graduate students also made 21 presentations at regional, national and international conferences and professional societies meetings.

The OSCAR represents the collective efforts of the Center for Research and Education in Optical Sciences and Applications (NSF-CREST) and NASA-MIRO center named as The Optics for Space Technology and Applied Research (O*STAR). The majority of the graduate students are supported by OSCAR research grants.

In the current year, faculty members from DPE have submitted twenty research grants totaling nearly $12 M. Eighteen other grant proposals submitted by our faculty members which are still pending. The faculty members from DPE published 22 peer reviewed journal and conference proceedings, and 59 scientific presentations.

The OSCAR imaging facility has continued to grow and develop. This facility provides services in imaging, microscopy and spectroscopy for faculty-researchers inside and outside the university.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

List Unit’s Short Range Goals for the coming academic year, 2018-2019.

• Ensure that every student in the DPE is well advised and mentored

• Further develop mentorship for our junior faculty and ensure that they have the resources to jump start for new research programs

• Develop materials that will attract students to the University and DPE
• Work on further improving our departmental goals

• Develop mechanisms so that every faculty member participate and contributes to the Department's growth.

**List Unit's Long Range Goals for the academic years 2017-2018 through 2017-2021.**

• Launch MS in Engineering Physics degree and PhD in Physics programs

• Develop relationships with industry mainly geared to provide our engineering students "industrial" experience over the summer.

• Work to ensure that every faculty member in charge of a research lab (funded research) and/or grant has a teaching load comparable with that of major Universities.

• Develop sustainable mechanisms that will allow us to provide more time to faculty to develop research proposals.

• Develop programs that are unique in the region.

• Establish a board of external advisers for the program in Engineering Physics.
"KPI #1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

Please see attached

• 2017-18 UG KPI 1 and 10 Table

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? b) Have these changes been implemented? If not, when will they be implemented? c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?

We heard the feedback from the students regarding lack of our lab resources and seating arrangements in classes. In the current year, we are adding a new lab - Engineering lab to provide better facility of doing lab experiments for our engineering students. The renovation and establishment of the lab is currently in process in SC room #237. This work is being done from a funding. We are also renovating three of our class rooms to accommodate more students during the lecture hours.

b) Have these changes been implemented? If not, when will they be implemented?

In process. The whole process of renovation will be done by the end of summer, 2018.

c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

Mission / Purpose

The mission of the Department of Physics and Pre-Engineering is to provide a quality higher education in physics and physics with emphasis in selected engineering disciplines that prepares students to achieve professional success and leadership status in their communities.

The Department of Physics and Pre-Engineering fully supports the philosophy and values of the College of Mathematics Natural Sciences and Technology (CMNST). The department supports the mission of Delaware State University, with a commitment to providing all undergraduate students with the science education that is an essential component of a strong liberal arts education. The department helps students develop strong integrative thinking skills and broad-based knowledge needed for success in the global society. Placing students first, integrity, diversity, access, opportunity, and excellence are among the core values of the department. The department seeks to maintain a culture and climate consistent with being among the best in all that it does, while providing access to the traditionally underserved. The department believes that this uncompromising pursuit of excellence and access can only be achieved through teamwork, collegiality, partnerships, and delivering on commitments.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Prepare majors for success in graduate study, professional school, and careers in industry, research, government, or academia
   Prepare majors for success in graduate study, professional school, and careers in industry, research, government, or academia in the 21st century global society.

O/O 1: Students will learn the physics and engineering content needed to successfully transition to graduate schools or employment
   Students will learn the physics and engineering content needed to successfully transition to graduate schools or discipline related employment.

Relevant Associations:

DSU Learning Goal Associations:

1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Midterms, quizzes, and final exams

Midterms, quizzes, and final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

**M 2: Student course evaluation**

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

The class average of this student learning outcome was found to be 4 in a scale of 5.

**Spring 2014:** The average of the student response relating to the understanding of the subject matters from the courses offered in Spring
2014 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. PHYS 192 - University Seminar II, 2. PHYS 201 - General Physics, 3. PHYS 202 - General Physics II, 4. PHYS 220 Scientific Programming, 5. PHYS 311 Fiber Optics Communications, 6. PHYS 314 - Analytic Mechanics, 7. PHYS 319 Quant Optics Methods & Microscopy, 8. PHYS 362 - Quantum Mechanics, 9. PHYS 409 Biosensors & Bioinstrumentation, 10. PHYS 412 - Theory of Electricity & Magnetism II, 11. Theoretical & Experimental Research, 17. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2012-2013) - Target: Met

Fall 2012:
The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 305 Thermal Physics
5. PHYS 310 Optical Electronics
6. PHYS 313 - Analytic Mechanics I
7. PHYS 316 Intro to Optics
8. PHYS 361 - Modern Physics
9. PHYS 411 - Theory of Electricity & Magnetism
10. PHYS 451 - Introduction to Research
The class average of this student learning outcome was found to be 4 in a scale of 5.

Spring 2013:
The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:
1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 314 Analytic Mechanics II
5. PHYS 332 - Mathematical Methods II
6. PHYS 362 - Quantum Mechanics
7. PHYS 412 - Theory of Electricity & Magnetism II
8. PHYS 418 - Theoretical & Experimental Research

9. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2011-2012) - Target: Met
The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 313 - Analytic Mechanics
5. PHYS 331 - Mathematical Methods I
6. PHYS 361 - Modern Physics
7. PHYS 411 - Theory of Electricity & Magnetism
8. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 4 in a scale of 5.
The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 311 - Fiber Optics Communications
5. PHYS 318 Foundations of BioEngineering
6. PHYS 332 - Mathemtical Methods II
7. PHYS 362 - Quantum Mechanics
8. PHYS 412 - Theory of Electricity & Magnetism II
9. PHYS 418 - Theoretical & Experimental Research
10. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2010-2011) - Target: Not Reported This Cycle
Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

M 2: Student course evaluation

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

The class average from the courses offered in Spring 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

**Findings (2013-2014) - Target: Met**

**Fall 2013:** The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 191 - University Seminar I, 2. PHYS 201 - General Physics I, 3. PHYS 202 - General Physics II, 4. PHYS 220 - Scientific Programming, 5. PHYS 310 Optical Electronics, 6. PHYS 313 - Analytic Mechanics, 7. PHYS 316 Intro to Optics, 8. PHYS 361 - Modern Physics, 9. PHYS 411 - Theory of Electricity & Magnetism, 10. PHYS 441 - Selected Topics I, 11. PHYS 451 - Introduction to Research. The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

**Spring 2014:** The class average from the courses offered in spring 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 192 - University Seminar II, 2. PHYS 201 - General Physics, 3. PHYS 202 - General Physics II, 4. PHYS 220 Scientific Programming, 5. PHYS 311 Fiber Optics Communications, 6. PHYS 314 - Analytic
Mechanics, 7. PHYS 319 Quant Optics Methods & Microscopy, 8. PHYS 362 - Quantum Mechanics, 9. PHYS 409 Biosensors & Bioinstrumentation, 10. PHYS 412 - Theory of Electricity & Magnetism II, 11. Theoretical & Experimental Research, 17. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2012-2013) - Target: Met**

**Fall 2012:**
The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 305 Thermal Physics
5. PHYS 310 Optical Electronics
6. PHYS 313 - Analytic Mechanics I
7. PHYS 316 Intro to Optics
8. PHYS 361 - Modern Physics
9. PHYS 411 - Theory of Electricity & Magnetism
10. PHYS 451 - Introduction to Research
The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2013**
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 314 Analytic Mechanics II
5. PHYS 332 - Mathematical Methods II
6. PHYS 362 - Quantum Mechanics
7. PHYS 412 - Theory of Electricity & Magnetism II
8. PHYS 418 - Theoretical & Experimental Research
9. ENGR 309 Electronic Circuit Analysis
The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.
Findings (2011-2012) - Target: Met
The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 313 - Analytic Mechanics
5. PHYS 331 - Mathematical Methods I
6. PHYS 361 - Modern Physics
7. PHYS 411 - Theory of Electricity & Magnetism
8. PHYS 451 - Introduction to Research
The class average of this student learning outcome was found to be 4 in a scale of 5.
Please look at the attached documents for details.
The class average from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) has been taken into account.
Below are the courses which have been used for this purpose.
1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 311 - Fiber Optics Communications
5. PHYS 318 Foundations of BioEngineering
6. PHYS 332 - Mathematical Methods II
7. PHYS 362 - Quantum Mechanics
8. PHYS 412 - Theory of Electricity & Magnetism II
9. PHYS 418 - Theoretical & Experimental Research
10. ENGR 309 Electronic Circuit Analysis
The class average of this student learning outcome was found to be 4 in a scale of 5.
Please look at the attached documents for details.

Findings (2010-2011) - Target: Not Reported This Cycle
Has not been reported for this cycle because of the lack of data tracking.
Will be reported in next cycle (2011-12).

M 2: Student course evaluation

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made
Connected Documents
- Student Survey of Outcomes BS PHYSICS Spring 2018
- Student Survey of Outcomes BS PHYSICS FALL 2017

Target:
The student response of survey relating to the student learning outcomes should be > 3.00 in a scale of 5.00.

Findings (2017-2018) - Target: Met

The average of the student response relating to the understanding of the subject matters from the course offered in Fall 2017 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:
1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 305 - Thermal Physics
5. PHYS 313 - Analytic Mechanics
6. PHYS 331 - Mathematical Methods I
7. PHYS 341 - Theory of Electricity & Magnetism
8. PHYS 361 - Modern Physics
9. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the subject matters from the course offered in Spring 2018 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 220 - Scientific Programming
5. PHYS 314 - Analytic Mechanics-Dynamics
6. PHYS 332 - Mathematical Methods II
7. PHYS 342 - Theory of Electricity & Magnetism II
8. PHYS 362 - Quantum Mechanics
9. PHYS 413 - Intro to Lasers
10. PHYS 418 - Theoretical & Experimental Research

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

Findings (2016-2017) - Target: Met

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. PHYS 191 - University Seminar I
2. PHYS 200 - Analysis of Physical Systems
3. PHYS 201 - General Physics I
4. PHYS 202 - General

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2017 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

Findings (2015-2016) - Target: Met

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2015 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 191 University Seminar I,2. PHYS 200 Analysis of Phys Syst, 3. PHYS 201 General Physics I, 4. PHYS 202 General Physics II, 5. PHYS 305 Thermal Physics, 6. PHYS 313 Analytic Mechanics, 7. PHYS 316 Intro to Optics, 8. PHYS 352 Applied Physics Lab II, 9. PHYS 361 Modern Physics, 10. PHYS 411 Theory of Elec & Mag, 11. PHYS 451 Intro to Research. O/O 4: Students will learn to design and implement scientific investigations to investigate and answer questions about physical systems

Students will learn to design and implement scientific investigations to investigate and answer questions about physical systems

**Relevant Associations:**

**DSU Learning Goal Associations:**

1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 1: Midterms, quizzes, and final exams**

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

BioEngineering, 7. PHYS 332 - Mathematical Methods II, 8 . PHYS 351
Applied Physics lab, 9. PHYS 362 - Quantum Mechanics, 10.PHYS 412 -
Theory of Electricity & Magnetism II 11. . PHYS 418 - Theoretical &
Experimental Research.

The class average of this student learning outcome was found to be 4 in
a scale of 5. Please see attached documents for details.

**Findings (2015-2016) - Target: Met**

The average of the student response relating to the understanding of the
subject matters from the courses offered in Fall 2015 semester (one
which has this outcome fulfilled) have been taken into account. This was
done as part of indirect measurement. Below are the courses which have
been used for this purpose.

1. PHYS 191 University Seminar I, 2. PHYS 200 Analysis of Phys Syst, 3.
PHYS 201 General Physics I, 4. PHYS 202 General Physics II, 5. PHYS
305 Thermal Physics, 6. PHYS 313 Analytic Mechanics, 7. PHYS 316
Intro to Optics, 8. PHYS 352 Applied Physics Lab II, 9. PHYS 361
Modern Physics, 10. PHYS 411 Theory of Elec & Mag, 11. PHYS 451
Intro to Research. The class average of this student learning outcome
was found to be 4 in a scale of 5. Please look at the attached documents
for details.

The average of the student response relating to the understanding of the
subject matters from the courses offered in Spring 2016 semester (one
which has this outcome fulfilled) have been taken into account. This was
done as part of indirect measurement. Below are the courses which have
been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2014-2015) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2015 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 5 in a scale of 5. Please see attached documents for details.

Findings (2013-2014) - Target: Met

Fall 2013: The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose. 1. PHYS 191 - University Seminar I, 2. PHYS 201 - General Physics I, 3. PHYS 202 - General Physics II, 4. PHYS 305 Thermal Physics, 5. PHYS 310 Optical Electronics, 6. PHYS 313 - Analytic Mechanics I, 7. PHYS 316 Intro to Optics, 8. PHYS 361 - Modern Physics, 9. PHYS 411 - Theory of Electricity & Magnetism, 10. PHYS 441 - Selected Topics I, 11. PHYS 451 - Introduction to Research. The class average of this student learning outcome was found to be 4 in a scale of 5.

Spring 2014: The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2014 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. PHYS 192 - University Seminar II, 2. PHYS 201 - General Physics, 3. PHYS 202 - General Physics II, 4. PHYS 220 Scientific Programming, 5. PHYS 311 Fiber Optics Communications, 6. PHYS 314 - Analytic Mechanics, 7. PHYS 319 Quant Optics Methods & Microscopy, 8. PHYS 362 - Quantum Mechanics, 9. PHYS 409 Biosensors & Bioinstrumentation, 10. PHYS 412 - Theory of Electricity & Magnetism II, 11. Theoretical & Experimental Research, 17. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2012-2013) - Target: Met

Fall 2012: The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 305 Thermal Physics
5. PHYS 310 Optical Electronics
6. PHYS 313 - Analytic Mechanics I
7. PHYS 316 Intro to Optics
8. PHYS 361 - Modern Physics
9. PHYS 411 - Theory of Electricity & Magnetism
10. PHYS 451 - Introduction to Research
The class average of this student learning outcome was found to be 4 in a scale of 5.

Spring 2013:
The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:

1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 314 Analytic Mechanics II
5. PHYS 332 - Mathematical Methods II
6. PHYS 362 - Quantum Mechanics
7. PHYS 412 - Theory of Electricity & Magnetism II
8. PHYS 418 - Theoretical & Experimental Research
9. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 313 - Analytic Mechanics
5. PHYS 331 - Mathematical Methods I
6. PHYS 361 - Modern Physics
7. PHYS 411 - Theory of Electricity & Magnetism
8. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I

4. PHYS 311 - Fiber Optics Communications
5. PHYS 318 Foundations of BioEngineering
6. PHYS 332 - Mathematical Methods II
7. PHYS 362 - Quantum Mechanics
8. PHYS 412 - Theory of Electricity & Magnetism II
9. PHYS 418 - Theoretical & Experimental Research
10. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5.
Please look at the attached documents for details.

Findings (2010-2011) - Target: Not Reported This Cycle
Has not been reported for this cycle because of the lack of data tracking.
Will be reported in next cycle (2011-12).

O/O 5: Students will learn how to use instruments, computers and associated technologies
Students will learn how to use instruments, computers and associated technologies to collect and analyze data, and interpret the results.

Relevant Associations:

DSU Learning Goal Associations:
  2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
  4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Midterms, quizzes, and final exams

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

M 2: Student course evaluation

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

8. PHYS 412 - Theory of Electricity & Magnetism II
9. PHYS 418 - Theoretical & Experimental Research
10. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 5 in a scale of 5.
Please look at the attached documents for details.

**Findings (2010-2011) - Target: Not Reported This Cycle**
Has not been reported for this cycle because of the lack of data tracking.
Will be reported in next cycle (2011-12).

**G 3: Ensure that every physics graduate has strong critical thinking skills.**
Ensure that every physics graduate has strong critical thinking skills.

**O/O 6: Student will learn to integrate content knowledge and analytical thinking skills**
Students will learn to integrate content knowledge and analytic thinking skills to analyze a variety of problems and issues involving physical systems.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 1: Midterms, quizzes, and final exams**

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

Findings (2010-2011) - Target: Not Reported This Cycle
Has not been reported for this cycle because of the lack of data tracking.
Will be reported in next cycle (2011-12).

M 2: Student course evaluation

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

6. PHYS 362 - Quantum Mechanics
7. PHYS 412 - Theory of Electricity & Magnetism II
8. PHYS 418 - Theoretical & Experimental Research
9. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 313 - Analytic Mechanics
5. PHYS 331 - Mathematical Methods I
6. PHYS 361 - Modern Physics
7. PHYS 411 - Theory of Electricity & Magnetism
8. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) has been taken into account.
Below are the courses which have been used for this purpose.
1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 311 - Fiber Optics Communications
5. PHYS 318 Foundations of BioEngineering
6. PHYS 332 - Mathematical Methods II
7. PHYS 362 - Quantum Mechanics
8. PHYS 412 - Theory of Electricity & Magnetism II
9. PHYS 418 - Theoretical & Experimental Research
10. ENGR 309 Electronic Circuit Analysis
The class average of this student learning outcome was found to be 3 in a scale of 5.
Please look at the attached documents for details.

Findings (2010-2011) - Target: Not Reported This Cycle
Has not been reported for this cycle because of the lack of data tracking.
Will be reported in next cycle (2011-12).

M 2: Student course evaluation

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

Connected Documents

Findings (2010-2011) - Target: Not Reported This Cycle

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

G 4: Produce graduates that have the broad-based knowledge and communication skills needed for success in the global society.

Produce graduates that have the broad-based knowledge and communication skills needed for success in the global society.

O/O 8: Students will be capable of effectively communicating the results of their studies in a variety of formats

Students will be capable of effectively communicating the results of their studies in a variety of formats, including written reports, poster presentations, and PowerPoint®-like presentations.
Relevant Associations:

DSU Learning Goal Associations:
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Midterms, quizzes, and final exams

Midterms, quizzes, and final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 305 Thermal Physics
5. PHYS 310 Optical Electronics
6. PHYS 313 - Analytic Mechanics I
7. PHYS 316 Intro to Optics
8. PHYS 361 - Modern Physics
9. PHYS 411 - Theory of Electricity & Magnetism
10. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 5 in a scale of 5.

**Spring 2013:**
The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:

1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 314 Analytic Mechanics II
5. PHYS 332 - Mathematical Methods II
6. PHYS 362 - Quantum Mechanics
7. PHYS 412 - Theory of Electricity & Magnetism II
8. PHYS 418 - Theoretical & Experimental Research
9. ENGR 309 Electronic Circuit Analysis
The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

Findings (2011-2012) - Target: Met
The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 313 - Analytic Mechanics
5. PHYS 331 - Mathematical Methods I
6. PHYS 361 - Modern Physics
7. PHYS 411 - Theory of Electricity & Magnetism
8. PHYS 451 - Introduction to Research
The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 311 - Fiber Optics Communications
5. PHYS 318 Foundations of BioEngineering
6. PHYS 332 - Mathematical Methods II
7. PHYS 362 - Quantum Mechanics
8. PHYS 412 - Theory of Electricity & Magnetism II
9. PHYS 418 - Theoretical & Experimental Research
10. ENGR 309 Electronic Circuit Analysis
The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

Findings (2010-2011) - Target: Not Reported This Cycle
Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

O/O 9: Students will be capable of communicating orally with peers as colleagues in the scientific community
Students will be capable of communicating orally with peers as colleagues in the scientific community, using appropriate language skills and professional vocabulary.

Relevant Associations:
DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Midterms, quizzes, and final exams

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**M 2: Student course evaluation**

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 314 Analytic Mechanics II
5. PHYS 332 - Mathematical Methods II
6. PHYS 362 - Quantum Mechanics
7. PHYS 412 - Theory of Electricity & Magnetism II
8. PHYS 418 - Theoretical & Experimental Research
9. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2011-2012) - Target: Met

The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 191 - University Seminar I
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 313 - Analytic Mechanics
5. PHYS 331 - Mathematical Methods I
6. PHYS 361 - Modern Physics
7. PHYS 411 - Theory of Electricity & Magnetism
8. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) has been taken into account.
Below are the courses which have been used for this purpose.

1. PHYS 192 - University Seminar II
2. PHYS 201 - General Physics I
3. PHYS 202 - General Physics II
4. PHYS 311 - Fiber Optics Communications
5. PHYS 318 Foundations of BioEngineering
6. PHYS 332 - Mathemetical Methods II
7. PHYS 362 - Quantum Mechanics
8. PHYS 412 - Theory of Electricity & Magnetism II
9. PHYS 418 - Theoretical & Experimental Research
10. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5.

Please look at the attached documents for details.

**Findings (2010-2011) - Target: Not Reported This Cycle**

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**M 2: Student course evaluation**

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

**Connected Documents**

Please look at the attached documents for details.

**Findings (2010-2011) - Target: Not Reported This Cycle**

Has not been reported in this cycle, will be reported in next cycle (2011-12)

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**
Direct measurement of SLOs

1. An Assessment committee has been formed (a total of six faculty members and Department Assistant Ms. Amal Juracka) to coordinate the assessment process of the Department. The committee is chaired by Dr. Mukti M Rana, an Assistant Professor in the Department of Physics and Pre-Engineering. 2. In the Fall of 2011, the committee prepared the syllabi of all the courses for various degree programs of the department. The syllabi were based on a uniform format which has the catalog description of the course, learning outcomes of the course and relationship of the learning outcomes of the course with the student learning outcomes (SLO) of the program which it belongs to, among others. The instructor of the course makes sure that the prepared course syllabus complies with his view. 3. For each of the courses which belongs to a particular program, the teaching faculty will turn the course report. 4. The cover page of a sample course report is attached here. It will contain the sample tests, syllabus, quizzes, labs etc among others. 5. The course report will provide the measure of the student learning outcomes which a course would belong to. The SLOs will be prepared from the average of the student student's performance in the entire test criterion (for instance tests, finals, quizzes and/or homework, labs if any instructor wants to add it as part of assessment). This average is linked to the course learning outcomes and hence to the SLOs. 6. Course report for each of the courses offered for a particular degree program will be turned in by the faculty within one week of semester ending. 7. The average all the SLOs are then determined from each individual courses. This average number will serve as the indicator of student performance in a degree program. Sample syllabus, course report cover page and assessment of SLOs for a course is attached here.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Responsible Person/Group: 1. Teaching Faculty 2. Assessment Committee

Indirect Measurement of SLOs by Student Survey

1. An Assessment committee has been formed (a total of six faculty members and Department Assistant Ms. Amal Juracka) to coordinate the assessment process of the Department. The committee is chaired by Dr. Mukti M Rana, an Assistant Professor in the Department of Physics and Pre-Engineering. 2. In the Fall of 2011, the committee
prepared the syllabi of all the courses for various degree programs of the department. The syllabi were based on a uniform format which has the catalog description of the course, learning outcomes of the course and relationship of the learning outcomes of the course with the student learning outcomes (SLO) of the program which it belongs to, among others. The instructor of the course makes sure that the prepared course syllabus complies with his view. 3. A survey questionnaire has been prepared for each of the courses. These questions are same as learning outcomes of the course. 4. At the end of the semester, the students are asked to fill out their response relating to the understanding of the subject matter covered. They response should be in the scale of 1-10 with 1 being the lowest and 10 being the lowest. 5. The average of the response was determined and linked with the SLO’s of the program and that number gives the final indirect measurement of student assessment. 6. Sample feedback form is attached here.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High  

**Responsible Person/Group:** 1. Teaching Faculty 2. Assessment Committee

### Annual Report Section Responses

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

Please see attached
Mission / Purpose

The objectives of the M.S. degree in Physics aim at training future workforce and researchers in the basic foundations of physics. Our educational activities are combined and integrated with our research focus, creating a stimulating and engaging environment for the students to achieve professional success and leadership status and opening opportunities to a highly demanding multidisciplinary market.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Prepare each graduate for success in professional careers

Prepare each graduate for success in professional careers in industry, research, government, or academia in the 21st century global society by providing them with necessary skills and knowledge in their area of study.

SLO 1: Students will learn the advance contents of their field of study

Students will learn the advance contents of their field of study needed to solve problems quantitatively using analytic and numerical methods to find their carriers in different organizations.

Relevant Associations:

DSU Learning Goal Associations:

2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Related Measures:

M 1: Midterms, quizzes, and final exams

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level
Target:
The class average of all the student learning outcomes should be > 3.00 in a scale of 5.00.

Findings (2017-2018) - Target: Met

The class average from the courses offered in Fall 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose: 1. PHYS 563 - Math Methods III, 2. Modern Optics, 3. PHYS 605 - Principles of lasers & Optical Devices, 4. PHYS 675-Quantum Mechanics I.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The class average from the courses offered in Spring 2018 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

Findings (2016-2017) - Target: Met

The class average from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 671 Advanced Electromagnetic Theory I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.
The class average from the courses offered in spring 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 665 Statistical Mechanics, 3. PHYS 667 - Mathematical Methods IV, 4. PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2015-2016) - Target: Met**

The class average from the courses offered in Fall 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 563 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 665 Statistical Mechanics, 5. PHYS 675 Quantum Mechanics I The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in Spring 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 667 Math Methods IV, 3. PHYS 676 Quantum Mechanics II, 4. PHYS 803 Modern Laser Spec Methods. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2014-2015) - Target: Met**

Fall 2014: The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 671 Advanced Electromagnetic Theory I, 5. PHYS 803 Modern Laser Spec Method. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Spring 2015: The class average from the courses offered in spring 2015
semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 667 - Mathematical Methods IV, 2. PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2013-2014) - Target: Met**

**Fall 2013:** The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose. 1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 675 Quantum Mechanics I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2014:** The class average from the courses offered in Spring 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose: 1. PHYS 601 - Non Linear Optics, 2. PHYS 667 - Mathematical Methods IV, 3. PHYS 676 Quantum Mechanics II. The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

**Findings (2012-2013) - Target: Met**

**Fall 2012**

The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 671 Adv Electromagnetic Theory. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2013**
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 672 Advanced Electromagnetic Theory II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 665 Statistical Mechanics
5. PHYS 675 Quantum Mechanics I

Spring 2014: The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2014 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. PHYS 601 Non Linear Optics, 2. PHYS 667 Mathematical Methods IV, 3. PHYS 676 Quantum Mechanics II. The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

Findings (2012-2013) - Target: Met

Fall 2012
The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4.PHYS 671 Adv Electromagnetic Theory I.
The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details

Spring 2013
The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:
1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 672 Advanced Electromagnetic Theory II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

Findings (2011-2012) - Target: Met

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 665 Statistical Mechanics
5. PHYS 675 Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 676 Quantum Mechanics II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Connected Documents

- Student Survey of Outcomes based Assessment of classes MS Physics SPRING 2012
SLO 2: Students will engage in one or more research projects

Students will engage in one or more research projects to learn laboratory techniques, research protocol, and appropriate behavior expected in a research environment by using instruments, computers and associated technologies.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success
5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

Related Measures:

M 1: Midterms, quizzes, and final exams

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

M 2: Student course evaluation

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

**Findings (2012-2013) - Target: Met**

**Fall 2012**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 671 Adv Electromagnetic Theory I.

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

**Spring 2013**

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 672 Advanced Electromagnetic Theory II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have
been used for this purpose.

1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 665 Statistical Mechanics
5. PHYS 675 Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 676 Quantum Mechanics II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

SLO 4: Students will be able to organize and conduct original investigations

Students will be able to organize and conduct original investigations and reach scientifically appropriate conclusions

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

**Related Measures:**

M 1: Midterms, quizzes, and final exams
Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

M 2:Student course evaluation
Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.

**Related Measures:**

**M 1: Midterms, quizzes, and final exams**

Midterms, quizzes, and final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

**Target:**

The class average of all the student learning outcomes should be > 3.00 in a scale of 5.00.

**Findings (2017-2018) - Target: Met**

The class average from the courses offered in Fall 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose: 1. PHYS 563 - Math Methods III, 2. Modern Optics, 3. PHYS 605 - Principles of lasers & Optical Devices, 4. PHYS 675-Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The class average from the courses offered in Spring 2018 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

**Findings (2016-2017) - Target: Met**

The class average from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 671 Advanced Electromagnetic Theory I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in spring 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 665 Statistical Mechanics , 3. PHYS 667 - Mathematical Methods IV, 4. PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2015-2016) - Target: Met**

The class average from the courses offered in Fall 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 563 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Isr &Opt devices, 4. PHYS 665 Statistical Mechanics, 5. PHYS 675 Quantum Mechanics I The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in Spring 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 667 Math Methods IV, 3. PHYS 676 Quantum Mechanics II, 4. PHYS 803 Modern Laser Spec Methods. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.
Findings (2014-2015) - Target: Met

Fall 2014: The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 671 Advanced Electromagnetic Theory I, 5. PHYS 803 Modern Laser Spec Method. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Spring 2015: The class average from the courses offered in spring 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 667 - Mathematical Methods IV, 2. PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2013-2014) - Target: Met

Fall 2013: The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 675 Quantum Mechanics I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Spring 2014: The class average from the courses offered in spring 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 - Non Linear Optics, 2. PHYS 667 - Mathematical Methods IV, 3. PHYS 676 Quantum Mechanics II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2012-2013) - Target: Met

Fall 2012
The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 671 Adv Electromagnetic Theory. The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

Spring 2013
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 672 Advanced Electromagnetic Theory II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2011-2012) - Target: Met

The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 665 Statistical Mechanics
5. PHYS 675 Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

4. PHYS 803 Modern Laser Spectroscopic Methods
The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

M 2: Student course evaluation
Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect
measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Plans for Data Collection Relating to Direct Measurement**

1. An Assessment committee has been formed (a total of six faculty members and Department Assistant Ms. Amal Juracka) to coordinate the assessment process of the Department. The committee is chaired by Dr. Mukti M Rana, an Assistant Professor in the Department of Physics and Pre-Engineering. 2. In the Fall of 2011, the committee prepared the syllabi of all the courses for various degree programs of the department. The syllabi were based on a uniform format which has the catalog description of the course, learning outcomes of the course and relationship of the learning outcomes of the course with the student learning outcomes (SLO) of the program which it belongs to, among others. The instructor of the course makes sure that the prepared course syllabus complies with his view. 3. A survey questionnaire has been prepared for each of the courses. These questions are same as learning outcomes of the course. 4. At the end of the semester, the students are asked to fill out their response relating to the understanding of the subject matter covered. They response should be in the scale of 1-10 with 1 being the lowest and 10 being the lowest. 5. The average of the response was determined and linked with the SLO's of the program and that number gives the final indirect measurement of student assessment. 6. Sample feedback form is attached here.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Finished  
**Priority:** High  
**Responsible Person/Group:** 1. Teaching faculty members 2. Assessment committee

**Student feedback form will be used as indirect measurement**

2017-2018 Political Science (B.A.)
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)
Mission / Purpose

The Department of Psychology recognizes and supports the overall mission of Delaware State University by providing students with the necessary education for entry level positions in human service related fields. More specifically, the psychology program is designed to empower and affirm undergraduate students through broad based training in the foundations of psychology, which emphasizes the need to understand human behavior through critical thinking and scientific endeavors. The department recognizes and supports the mission of the American Psychological Association (APA) which is “to advance the creation, communication and application of psychological knowledge to benefit society and improve people’s lives” (APA, [2017]. APA Mission Statement. Retrieved July06, 2017 from http://www.apa.org/about/).

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning

Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.

Connected Document

• Psychology Department Subcommittees

SLO 2: Content Areas of Psychology

Students will demonstrate knowledge and understanding representing appropriate breadth and depth in selected content areas of psychology:

1. learning and cognition
2. individual differences, psychometrics, personality, and social processes, including those related to sociocultural and international dimensions
3. biological bases of behavior and mental processes, including physiology, sensation, perception, comparative, motivation, and emotion
4. developmental changes in behavior and mental processes across the life span
Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators

Related Measures:

M 3: Practicum Evaluation Measurement Tool
The students' ability to synthesize and integrate information and ideas can be measured subsequent to the completion of Practicum in Applied Psychology Course.

Source of Evidence: Academic direct measure of learning - other

Connected Document
- Senior Capstone Rubric

M 4: Personal and Professional Development Indicated by Course Success
Students will develop insight into their own and others' behavior and mental processes and apply effective strategies for self-management/self-improvement. This objective is measured indirectly throughout student success in various courses.

Source of Evidence: Academic indirect indicator of learning - other

M 5: Service Learning
Students' self-management/self-improvement, ethical standards and application of course content will be measured through their successful completion of Practicum in Applied Psychology Course.

Source of Evidence: Field work, internship, or teaching evaluation

SLO 3: Major perspectives of psychology
Students will explain major perspectives of psychology (e.g., behavioral, biological, cognitive, evolutionary, humanistic, psychodynamic, and sociocultural).

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 3: Practicum Evaluation Measurement Tool
The students' ability to synthesize and integrate information and ideas can be
measure subsequent to the completion of Practicum in Applied Psychology Course.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Graduate Placement**

The Psychology Program will have to devise a process that will adequately track the graduate to get an update. Also, the Program will need to think of an incentive to offer the graduate that will motive him or her to give an update of their post graduate status.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High

**Knowledge Base of Psychology**

Another pre and post test is under construction to be administered to the Fall 2012 Freshmen Cohort. This pre and post test will be based on the Fall 2011 Curriculum’s core psychology courses. There will be two questions from 12 core courses (e.g., Introduction to General Psychology; Applied Psychology; Elementary Statistics; Scientific Method; Personality; Developmental; Experimental; Abnormal; Social Psychology; Psychology of Learning; History & Systems and Senior Research
Seminar); the pre-test will consist of a 24-item questionnaire to assess the students' knowledge base of psychology. The post test will be the same test that was administered to each member of the Fall 2012 Freshmen Cohort. The post test will be given when the student takes Senior Research Seminar. The students will be identified by their D100 number and the pre-test will be scored and kept on file for comparison. Test comparison will demonstrate student learning and mastery of psychology content. The target will be for 65% or higher of the students to show improvement on the post test.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Pre and Post Test of Core Psychology Content
Projected Completion Date: 12/15/2012

Unit(s) Initiatives accomplished in this cycle

The Online Psychology Courses will be completed by July 31, 2018.
Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Provide quality instruction
   Provide high quality instruction that meets the needs of the psychology majors and the University community.

O/O 1: Regularly review curriculum
   Regularly review curriculum and update as needed.

Relevant Associations:

Strategic Plan Associations:
   Delaware State University
   1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
   2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community

Related Measures:

M 1: Psychology Curriculum Review Committee
   Psychology Curriculum Review Committee meets twice annually to review and recommend curriculum changes as needed. The Psychology Program curriculum is assessed by comparing the APA Undergraduate guidelines. More specifically, the Psychology Curriculum Review Committee will review the evidence-based practices in the field of psychology and human services to determine what psychology electives should be offered to the students.

Source of Evidence: Administrative measure - other

Target:
   The Psychology Curriculum Review Committee will meet twice annually to review and/or revise the curriculum's course offerings.

Findings (2010-2011) - Target: Met
   The Psychology Curriculum was revised and the new Fall 2011 Curriculum is in place as of Fall 2011 Semester.

G 2: Develop culture of scientific inquiry
   Develop a culture of original scientific inquiry within the Department of Psychology.

O/O 6: Support faculty research with University grants
   Support faculty research with University grants.
Relevant Associations:

Strategic Plan Associations:
  College of Arts, Humanities, & Social Sciences
  3 Create a model of scholarly research for all full time faculty.

O/O 9: Support faculty laboratory space
Support faculty with suitable laboratory space.

Relevant Associations:

Strategic Plan Associations:
  College of Arts, Humanities, & Social Sciences
  3 Create a model of scholarly research for all full time faculty.

O/O 10: Encourage undergraduate research involvement
Encourage the involvement of undergraduates in research projects.

Relevant Associations:

Strategic Plan Associations:
  College of Arts, Humanities, & Social Sciences
  3 Create a model of scholarly research for all full time faculty.

Related Measures:

M 8: Enrollment in Independent Study in Lab-Based Research
Enrollment in Independent Study in Lab-Based Research (36-432) was added to course offerings during the 2005-2006 academic year. This course provides students the opportunity to gain supervised experience in lab-based research which often is a key factor in obtaining graduate school admission.

Source of Evidence: Academic direct measure of learning - other

Target:
Not applicable target for 2010-11

Findings (2010-2011) - Target: Not Met
N/A

O/O 11: Facilitate collaborative research initiatives
Facilitate collaborative research initiatives with other departments, regional educational institutions, businesses, and State and Federal agencies.

Relevant Associations:

Strategic Plan Associations:
  College of Arts, Humanities, & Social Sciences
  3 Create a model of scholarly research for all full time faculty.

O/O 12: Encourage attainment of extra-mural funding
Encourage and support the attainment of extra-mural funding.

Relevant Associations:
Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
3 Create a model of scholarly research for all full time faculty.

G 3: Broaden community interface
Broaden the interface between the Department of Psychology and the community.

O/O 13: Expand practicum and internship opportunities
Expand practicum and internship opportunities.

Relevant Associations:

Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community
4.1 Strengthen and expand DSU’s outreach, Extension, engagement, entrepreneurship and economic development programs to benefit the people of Delaware, the nation and the world.
5.4 Engage the external community through partnerships to promote environmental sustainability practices.
Mission / Purpose

Consistent with the University’s Mission and Goals, the Mission of the Department of Public and Allied Health Sciences, is to prepare undergraduates for careers and graduate education in movement/exercise science, kinesiology, human performance, allied health disciplines, public health and community health.

Graduates of these majors are provided with theoretical, laboratory, research, service learning and community services opportunities to advance knowledge, ethical practice and service in future endeavors. The department provides the potential for current and meaningful interaction among constituents, the campus community, and the community at-large through the use of educational and research methodologies and community service activities.

Moreover, the Department promotes and provides programs which seek to remedy current under-representation of minorities in fitness and wellness, exercise/movement science, kinesiological, allied health, community health and public health professions. The Department is dedicated to meeting the educational and professional preparation needs of individuals who plan to interface with the diverse and ever-changing society of the 21st Century.

Created July 1, 2009
Reviewed, Adopted, and Endorsed - August 27, 2009

DEPARTMENTAL VISION:

Building on the mission of the University and the College of Education, Health and Public Policy, the mission of the Department of Public and Allied Health Sciences is to promote excellence in education, research and services for: our students, faculty and
staff, the community at-large, citizens of Delaware, the nation and the world. These pursuits will focus on increasing knowledge, translating research into practice, shaping policy, and providing solutions for health related issues. The educational programs are guided by the standards and ethics of our respective professional organizations and accrediting agencies. The Department is dedicated to preparing students for careers and graduate education in allied health, community health, and public health.

MOTTO:

Informed, dynamic professionals are empowered to lead and manage change while shaping society's future.

DEPARTMENTAL PHILOSOPHY:

The philosophy of the Department of Public and Allied Health Services is to develop effective practitioners, clinicians and researchers who possess comprehensive content knowledge and practice; utilize appropriate assessment procedures and techniques; demonstrate effective interpersonal communication skills; display ability to problem solve and develop strategies for successful outcomes, employ technology in a variety of settings; and use and apply successful strategies through proven models of research, best practices and service.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: The PAHS will be able to use health and fitness knowledge and abilities to positively impact the university and community.

   The PAHS will be able to use health and fitness knowledge and abilities to positively impact the university and community.

O/O 1: Serving the community

   Serve the community by offering programs and events to positively impact the health of the university and the local community.

   Related Measures:

   M 1: Amount of Community Service

   A log will be kept to document all participation in on-campus or local health-related community service, outreach projects, committees, and activities offered, attended, sponsored, and participated in by the faculty, department or student.
organizations. (O:1)

Source of Evidence: Activity volume

**Target:**
Four community service projects completed by the department per year

**Findings (2016-2017) - Target: Met**
18 community service projects were completed.

**Findings (2015-2016) - Target: Met**
Fifteen community service outreach projects were implemented and attended by PAHS faculty and students.

**Findings (2014-2015) - Target: Met**
Eleven community service projects were completed by the department this year.

The PAHS faculty will demonstrate continual development, contribute to their profession, and university involvement.

O/O 2:Faculty engaged in professional development
The PAHS faculty will actively engage in professional development and the development of knowledge within their respected field. (G:2)

**Related Measures:**
M 2: Amount of professional development

A log will be kept to document the faculty’s participate in their professional development and the development of knowledge within the field. This log will record the certifications and licensures the faculty possess, the number of professional development conferences attended by the faculty, the number of presentations at professional conferences, and number of published articles. (O:2)

Source of Evidence: Activity volume

Target:
1) At least one faculty or staff member will maintain or obtain the following certifications: CSCS and HFS

2) Each faculty member attend one conference per year

3) Within the department, two presentations will be made per year

4) Within the department, two publications will be submitted per year

Findings (2016-2017) - Target: Met
1) Three faculty members maintain the CSCS certification, and one maintains the HFS certification during the current reporting year

2) All faculty members attended at least one professional conference, clinic, or workshop during the current reporting year

3) Seven presentations were made during the current reporting year

4) Twelve publications were submitted.

Findings (2015-2016) - Target: Met
1) Three faculty members maintain the CSCS certification, and one maintains the HFS certification during the current reporting year

2) All faculty members attended at least one professional conference, clinic, or workshop during the current reporting year

3) Five presentations were made during the current reporting year

4) Four publication were made during the current reporting year

Findings (2014-2015) - Target: Met

Target 1 Met:
Two faculty members maintain the CSCS certification, and one maintains the HFS certification.

Target 2 Met:
Each faculty member attended at least one professional conference or meeting.

Target 3 Met:

Two presentations were given, both at professional conferences and University meetings.

Target 4 Met:

Seven publications were submitted by faculty this year.

The PAHS faculty will participate in activities to benefit the department, college, and university. (G:2)

**Related Measures:**

**M 3: Record of faculty participation to benefit the University**

A log will be kept to document the faculty's participation to benefit the department, college, and university. (O:2)

Source of Evidence: Activity volume

**Target:**

1) The department will submit two internal or external grants per year
2) The department faculty members will serve on two interdepartmental community or university committees or projects

**Findings (2016-2017) - Target: Met**

1) 6 granted in total, 2 grants rewarded, others pending

2) Faculty currently serve on 10 community committees, meetings, and projects

**Findings (2015-2016) - Target: Met**

1) 3 external and 6 internal grants submitted, and 3 grants rewarded

2) Faculty currently serve on 10 community committees, meetings, and projects

**Findings (2014-2015) - Target: Met**

Target 1 Met:

Five grants were submitted this year.

Target 2 Met:

Faculty served on eight community committees, meetings, and projects.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Continued Research**  
Based on successful results, the department plans to continue providing students with research and field experience throughout the 2011-2011 year

- **Established in Cycle:** 2010-2011  
- **Implementation Status:** In-Progress  
- **Priority:** High

**Department Information**  
The department plans to update any necessary program material and maintain current information with brochures, websites, catalogs, etc.

- **Established in Cycle:** 2010-2011  
- **Implementation Status:** In-Progress  
- **Priority:** High

**Develop database**  
The department intends to develop an on-going data base in order to maintain contact with previous students. This will be completed through mail correspondence, electronic mail, and other avenues.

- **Established in Cycle:** 2010-2011  
- **Implementation Status:** In-Progress  
- **Priority:** High

**Increase Enrollment**  
The department intends to continue promotion of both its programs and increase major enrollment.

- **Established in Cycle:** 2010-2011  
- **Implementation Status:** In-Progress  
- **Priority:** High
Increase Student Research Experience
With new changes made to the curricula, new courses allow more laboratory experience for students. A newly developed "Research Experience" course for upper-level students will provide them with the opportunity to explore their interests in research and be mentored by faculty members.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Student Service Learning

Additional Resources Requested: Recruit online instructors.

Pedagogical Presentations/Conferences/Meetings
Continue to exceed target for pedagogical conference attendance.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Attendance log of pedagogical conferences or presentations |
  Outcome/Objective: Faculty attend conferences or presentations
Student Satisfaction of Program
Exceed the target of 70% for student satisfaction with their program of study. Currently, the health promotion program underwent a curriculum change and the name was changed to public health. In addition, the movement science curriculum implemented approved curriculum changes. Therefore, the program changes will be under review and we are hoping to exceed our target student satisfaction goal.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Average student satisfaction rating | Outcome/Objective: The PAHS faculty will achieve high student satisfaction rating on course evaluations.

Projected Completion Date: 05/01/2017

Annual Report Section Responses

Executive Summary (1-2 pages)

Executive Summary
Since the formation of the Department of Public and Allied Health Sciences on July 1, 2009, two programs, Kinesiology (formerly Movement Science) and Public Health continue to gain interest. In the Fall of 2017, Two hundred ninety-seven (297) students were reported as declared PAHS majors, which consists of one (1) Community Health major, forty-five (45) Health Promotion or Public Health majors, fifty-six (56) Kinesiology majors and one hundred ninety-six (196) Movement Science majors. At the end of the 2016-2017 academic year one professional staff and one visiting instructor resigned. One full-time faculty member was hired (Kinesiology) spring 2018; therefore, the total department faculty/staff decreased to twelve (12) members.

1. Curriculum changes and a name change were approved by the Faculty Senate and Board of Trustees in 2017 for the Movement Science major. The name change to Kinesiology and the updated curriculum went into effect fall semester 2017. A transition plan was put into place for students who chose to change to the new curriculum and a 'teach-out' program was put into place for those who planned to complete Movement Science degree requirements.
2. The American Council on Exercise (ACE) personal training certification program, conducted as a collaboration with the Wellness and Recreation Center, had a successful year two with five students completing the program this year. It will be renewed for the 2018-2019 academic year. The program is offered to Movement Science/Kinesiology students as part of a co-curricular certification program to improve student skills and work experience while still matriculating through the Movement Science/Kinesiology program. Angela Shorter works with the Wellness Center staff to oversee the ACE certification program. High performing students are recommended and participants are selected by a committee. Students in the program can sit for the certification exam and provide at least one year of personal training services to the clients of the Wellness and Recreation Center upon successful completion of the program.

3. The Exercise Science Skills Checklist program was initiated in 2015. The department has worked to make improvements each year. Completion of selected skills from the checklist was added to relevant courses in 2016 and the program was reviewed in 2017-2018 to determine how it can complement the YMCA certification. Modifications to the Exercise Science Skills Checklist to make it consistent with the YMCA offering, will better equip Movement Science/Kinesiology majors for internship and employment opportunities within the field. As such, this co-curricular activity for Movement Science/Kinesiology students provides additional opportunities for students to improve KSA’s, and will continue to grow. Successful completion of the Exercise Science Skills Checklist provides a signed "Certificate of Completion" and is supervised by PAHS faculty. Four lab assistants were hired with Title III funds to staff "open labs" that enable additional time for students to practice skills. An additional two students have successfully completed the skills checklist this year. Since implementation of the program a total of nine students have earned a Certificate of Completion. Furthermore, the open lab provides the opportunity for students to work with the DSU Athletics Department to conduct body composition assessments for athletes using laboratory instrumentation.

4. This year the Movement Science/Kinesiology and Public Health student organizations combined to unify the department. The organizations have been increasingly involved with the local community through various activities. Please see Section C under “Unit Initiatives” for the full list.

5. The 4th Annual Public Health & Fitness Leaders Day (PHFLD) was held at the MLK Student Center on Wednesday February 21, 2018. Over 170 PAHS students registered in the Wellness Center. The event was well attended and an increased number of local businesses and graduate/professional programs participated to represent professional sectors. PHFLD provided networking opportunities with 35 local fitness and health business and government organizations, as well as practical workshops. PAHS students, professionals and 10 alumni presenters attended. There were breakout sessions, training sessions, and 14 students entered an awards competition. There was a last minute change in venue. The event was held at the Wellness Center and in the MLK Student Center, so the registered student attendees might not reflect the total attendance for the day.
6. The department is in the process of reviewing/reviving the connected degree program (Exercise Science) with Delaware Technical Community College.

14 Memorandums of Understanding (MOUs) remain intact with the following organizations:

- Children’s Hospital of Philadelphia (CHOP) - Philadelphia, PA
- Veterans Administration, Dept. of Kinesiotherapy - Perryville, MD
- Christiana Care
- Delaware Technical & Community College (DTCC) (with the Movement Science major - this agreement will need revision to be compatible with the KINE 2017 curriculum)
- Winston-Salem State University, DPT school

An assessment committee was formed spring 2018 semester with Dr. Rawlins as the Chair. He was selected as Chair based on his experience with assessment and research with student learning outcomes and assessment. Dr. Taylor and Dr. Rawlins had phone conferences with Dr. Gil Reeve, the consultant for the 2017 Kinesiology curriculum development, to begin the process of developing assessment plans for the PAHS programs. Action items, goals, and objectives will be revised for the Kinesiology and Health Promotion Programs. As the University finalizes its plan for restructuring, further development of academic strategies on the college and departmental levels will follow, with the intent of revising what we do: teach, conduct research, and provide outreach.

7. The Phi Epsilon Kappa professional fraternity for Movement Science and Health Promotion inducted 20 new members in spring 2018, an increase of 8 from the previous year.
They are the ones who are providing services to clients?

Yes; edited as such

The modifications are providing internship opportunities? What does that mean?

revised

Unclear.

revised

Finalizes its plan for what?

revised

Unit(s) Profile

Unit(s) Initiatives accomplished in this cycle

Unit(s) Honors/Awards and Achievements

A.

Report any special honors and/or awards for the year. Academic departments are to include key statistics, such as number of degrees awarded, average time-to-degree, graduation rate, retention rate (year-to-year and to graduation) as compared to university totals.

Number of Degrees Awarded (2016-2017) - 61

Graduation Rate (4 year) - MVSC 26.7 for 4 and 6 year; with the change from HEPR to PUBH, the data were not available

Retention Rate - MVSC 76.7%; PUBH 50%

Average time to degree - I do not have this information
Average GPA - 3.18

A. 

Major Achievements of Students (not included above) as compared to university totals. Additional information from Institutional Research Office might be available.

Honors Received by Majors

20 Students Inducted into P.E.K. Honors Society within PAHS department

Arthur Ashe, R. Sports-Scholar Award

• Imani Hill - lacrosse

• Elizabeth Burkholder - bowling (senior)

• Nakia Jones - volleyball (senior)

• Wisdom Nzidee - football (senior)

• Jessica Shalongo - softball - semi-finalist (senior)

• Sydney Armbrister - volleyball
• Kori Johnson - soccer (senior)

• Olivia Summerville - lacrosse

American Kinesiology Undergraduate Regional Scholar

• Chantice Jones (senior)

Activities of Student Groups (including civic and social activities)

Reported under B

Job Placement and/or Accomplishments of Seniors - We do not have our Exit survey Data this year - selected information that was made available to me

Leisha Cason - MS program Columbia
Michaela Rose - DPT program Temple University
Wisdom Nzidee - Athletic training program - Lenoir- Ryne
Kahdiija Reed - Athletic Training program - Bridgewater University
Jessica Sholongo - Occupational Therapy - Wesley University
Kori Johnson - Occupational Therapy - Wesley University
Aaron Griffith - Temple University - neuroscience graduate program
Rajae Sephes - Ann Arundel Medical Center - Orthotics specialist

Job Placement and/or Accomplishments of Graduate Degree Recipients

n/a

Follow-up of Graduates (All Degree Levels; Fall 2015 - Spring 2016) These are data from last year. I do not have new data - can we get updates from the university? [MH1]

1. Number and Percentage of Graduates Enrolled in full-time higher-level education within one year of graduation (2015-2016 graduates)

* 16 Moment Science graduates of the 2015-2016 academic year are enrolled in full-time graduate school, which is 30% of the 54 surveyed graduates--- as of 5/16/17

*Data based on phone calls/emails/word of mouth and surveys
7 Health Promotion/Public Health graduates of the 2015-2016 academic year are enrolled in full-time graduate school, which is 25% of the 28 surveyed graduates --- as of 5/16/17

*Data based on phone calls/emails/word of mouth and surveys

23 PAHS graduates of the 2015-2016 academic year are enrolled in full-time graduate school, which is 28% of the 82 surveyed graduates --- as of 5/16/17

*Data based on phone calls/emails/word of mouth and surveys

2. Number and Percentage of Graduates employed in the major field within one year of graduation (positive placement percentages) - Fall 2015/Spring 2016 graduates

46% Movement Science (25/54) --- as of 5/16/17

46% Health Promotion/Public Health (13/28) --- as of 5/16/17
• **46% PAHS graduates** (38/82) --- as of 5/16/17

*Data based on phone calls/emails/word of mouth and surveys

3. Overall Positive Placement of the Fall 2015/Spring 2016 graduates:

• **Movement Science: 69%** (37/54) --- as of 5/16/17

• **Health Promotion/Public Health: 61%** (17/28) --- as of 5/16/17

• **Overall PAHS Graduates: 66%** (54/82) --- as of 5/16/17

*Data based on phone calls/emails/word of mouth and surveys

4. Number and Percentage of Graduates in Delaware 5 years after graduation

• **Unknown**
5. Employer Satisfaction
Unknown

This was Erica’s note. Dr. Mason, please contact Dr. Kim Sudler for any updates.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

1.
1. Marketing/Recruiting - strategies will be discussed and developed for the 18-19 academic year

2. Retention/Graduation - strategies will be developed and implemented, including additional co-curricular and service-learning opportunities, open movement science lab hours are being added to provide more opportunities for professional KSA development outside of the classroom, and additional mentoring and academic support is being planned.

3. See below for additional information about the steps for the assessment planning and developing an advisory board for Kinesiology and Public Health.

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. 

a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  
b) Have these changes been implemented? If not, when will they be implemented?  
c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Objectives for assessment plan over the next year

1. Review current curriculum documentation and subsequent syllabi
a. Verify all student learning objectives are measurable actions

b. Student learning outcomes must be listed on the syllabus
   i. contain a verb
   ii. method of measurement

c. Ensure the objectives, assignments and rubrics for each course syllabus coincide with the curriculum document

d. Provide a concrete start and finish point for sequential courses.

2. Identify and Develop Curriculum Outcomes

a. Internal
   i. Pull work samples and assess using an A-T-C rubric to identify if we are meeting the objectives on a program level.
   ii. Work with the student success coach to identify high DFW course.

b. External
   i. Recruit professionals to sit on the DSU Kinesiology Advisory Board
ii.
Evaluate student performance on internships

3.
Document Policies and Procedures

   a.
   Lab Manual

   b.
   Hiring Protocol

   c.
   Available Funding

Time line

Will send to committee electronically over the summer to begin work in the fall

•
Review the objective of the Committee

  o
  Discuss course vs. program assessment

  o
  Identify long and short term methods of measuring student progress

•
Divide the courses among the four members

  o
  evaluate the language in the curriculum documentation
• assess the current syllabus for each course
  • Confirm student learning objectives are listed, relevant and measurable.
  • Confirm University and Departmental Standards are highlighted.
  • Articulate a scope and sequence
• Provide a concrete start and finish point for sequential courses.

Within the first month of the fall 2018 semester
• Discuss findings (areas of concern or areas that need improvement)
• Create a syllabus and rubric bank
• Identify unwritten policies and procedures
  • Hiring Lab Assistants
  • Identify funding sources for research assistants and/or student workers
• Discuss timeline and objectives moving forward
By the end of the fall 2018 semester

- Formalize the Committee Findings
- Provide specific recommendations for scope and sequence of courses.
- Create an implementation plan for A-T-C assessment.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

Bibliography of Scholarly Products for this reporting period. For departments and other units, Bibliography of Scholarly Products published in 2016-2017 by unit members should be provided. Colleges should just list the number of publications listed by the departments.

Podium Presentation:

Page 1901 of 2329

Harris, M. B., Blitzer, D., Wong, M., & Taylor, E. M., (in review), Affective response and pain measurement correlations during a 758 km, 30-day walking pilgrimage, *International Journal of Sport and Exercise Psychology*. [MH1] [RM2]

[MH1] Please add Roman numerals so formatting is consistent.

[RM2] Revised and removed all roman numerals

Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

Program data template

Mission / Purpose

Consistent with the University’s Mission and Goals, the Community Health program's mission is to prepare community health professionals, educators, researchers, and community leaders who are dedicated to advancing knowledge, creating quality systems and programs in health promotion and health education, and providing leadership necessary for community development and service. The program addresses the educational and health concerns of a changing society and an individual who can adapt to new problems and issues.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Career Paths

Prepare students to pursue selected public and community health career paths

SLO 1: Health-Related Issues (1a, 2a)

The student will demonstrate and apply knowledge and comprehension of health-related issues

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Health Practicum

In the Health Practicum Internship experience, students undergo 400 hours of work in a public/community health agency over the course of 12 weeks. During this time, they construct a portfolio containing all activities conducted at the agency, a description of a meeting of the governmental body at the community or municipal level, and a final evaluation of their experiences.
Source of Evidence: Portfolio, showing skill development or best work

**Target:**
Students must obtain a minimum grade of B in the internship experience. The target grade for all students is an A.

**Findings (2016-2017) - Target: Met**
All students completed the health practicum with an A.

**Findings (2015-2016) - Target: Partially Met**
96.2% (25 of 26 students) earned positive letters of evaluation from internship sites (based on 80% or higher rating). One student received an "I" (incomplete grade), and 5 earned a B.

**Findings (2013-2014) - Target: Met**
14 out of 14 students who completed the Health Practicum Experience in the Spring 2014 semester achieved a B or better in the course (100%). 11 earned an A and 3 earned a B for the course.

**Findings (2012-2013) - Target: Met**
6 out of 6 students who completed the Health Practicum Experience in the Spring 2013 semester achieved a B or better in the course (100%).

**Findings (2011-2012) - Target: Partially Met**
11 out of 12 students who completed the Health Practicum Experience during the 2011-2012 academic year, achieved a B or better in the course (92%). One student received a "C" grade

**Findings (2010-2011) - Target: Met**
Of 10 total students who completed the Health Practicum Experience during the 2010-2011 academic year, 9 achieved an A in the course and 1 student earned a B.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Maintain Positive Results**
*Established in Cycle: 2011-2012*

Only 1 out of 12 students who completed the Health Practicum did not meet the minimum target, which is why this measure was "p..."

**Maintain Performance**
*Established in Cycle: 2015-2016*
Maintain the high performance rate of the students during their health practicum.
M 2: Internship
Students complete a 12-week (400 hour) internship experience with a public/community health agency after all coursework has been completed. The internship supervisor monitors student attendance, participation, work ethic, and overall job performance; this culminates in a final letter of evaluation by the supervisor of the student's ability to work competently in the field.

Source of Evidence: Field work, internship, or teaching evaluation

Target:
Students must receive a positive letter of evaluation from their internship agency supervisors. This letter includes whether or not the agency would hire the student based on his/her overall performance during the internship. The goal is for all students to receive a letter of recommendation that states the cooperating agency would hire the student if a job opportunity arose.

Findings (2016-2017) - Target: Met
All 10 students enrolled in the Health Practicum Internship in the Fall 2016 and Spring 2017 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2015-2016) - Target: Met
All 34 students enrolled in the Health Practicum Internship in the Fall 2015 and Spring 2016 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2013-2014) - Target: Met
All 14 students enrolled in the Health Practicum Internship in the Spring 2014 semester received positive letters of evaluation/recommendation from their cooperating agencies. For the 11 students who earned an A, all agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2012-2013) - Target: Met
All 6 students enrolled in the Health Practicum Internship in the Spring 2013 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2011-2012) - Target: Met
All 12 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2010-2011) - Target: Met
All 10 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.
Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Not Reported
Established in Cycle: 2015-2016
Not reported for this cycle, 2016-2017 data will be collected.

M 3:A-t-C Rubrics
Across the Curriculum Rubrics are used to rate student proficiency in program coursework designed to assess: 1. Writing in the Major 2. Critical Thinking and Problem Solving 3. Information Literacy 4. Quantitative Reasoning 5. Oral Communication. The Senior Capstone Rubric specifically assesses reading, writing, listening, information literacy, computer competency, and critical thinking.

Source of Evidence: Academic direct measure of learning - other

Target:
A minimum 80% of students will achieve a rating of "Proficient" or better in coursework assigned to the Assessment Data Collection System (ADCS).

Findings (2016-2017) - Target: Not Reported This Cycle
ADCS did not collect data for A-t-C rubrics for health promotion during this reporting cycle.

Findings (2015-2016) - Target: Partially Met
72.4% Problems solving, 72.4% for Context & Assumptions, 72.4% for Develops Own Perspective, 72.4% for Supporting Data/Evidence, 72.4% for Other Perspectives, 72.4% for Conclusions, Implications, and Consequences, and 89.6% for Communicates effectively.

Findings (2013-2014) - Target: Not Met
The Critical Thinking & Problem Solving A-t-C rubric resulted in percentages of proficient or better in the following areas: Problem, Question, and Issue = 100% (Met), Context & Assumptions: 31%, Develops OWN perspective: 31%, Supporting Data/Evidence: 38%, Other Perspectives: 15%, Conclusions, Implications & Consequences: 23%, Communicates Effectively: 31%.

Findings (2012-2013) - Target: Not Reported This Cycle
Not assessed during 2012-2013 cycle.

Findings (2011-2012) - Target: Partially Met
The Critical Thinking & Problem Solving A-t-C rubric resulted in percentages of proficient or better in the following areas: Problem, Question, and Issue = 100% (Met), Context & Assumptions = 74% (Not Met), Develops OWN Perspective = 100% (Met), Supporting Data/Evidence = 42% (Not Met), Other Perspectives = 84% (Met), Conclusions, Implications & Consequences = 47% (Not Met), Communicates Effectively = 58% (Not Met)
The Information Literacy A-t-C rubric resulted in percentages of proficient or better in the following areas: Formulate & Define Information = 68% (Not Met), Access Information = 74% (Not Met), Evaluation Information Critically = 58% (Not Met), Integrate Information = 42% (Not Met), Documents Sources = 32% (Not Met)

The Senior Capstone A-t-C rubric resulted in percentages of proficient or better in the following areas: Reading in the Major = 100% (Met), Writing in the Major = 100% (Met), Speaking in the Major = 100% (Met), Listening in the Major = 100% (Met), Information Literacy = 100% (Met), Computer Literacy = 100% (Met), Critical Thinking = 100% (Met), Problem Solving = 100% (Met), Quantitative Reasoning = 100% (Met)

Findings (2010-2011) - Target: Met
ADCS statistical reports indicated that a minimum of 80% of students assessed received a rating of either "Proficient" or "Advanced" in the majority of components assessed by the A-t-C rubrics.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Data Collection
Established in Cycle: 2015-2016
Will report next year if ADCS data is provided.

SLO 2: Data Collection (1b)

The student will learn to access and collect existing health-related data from a variety of information resources.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Health Practicum
In the Health Practicum Internship experience, students undergo 400 hours of work in a public/community health agency over the course of 12 weeks. During this time, they construct a portfolio containing all activities conducted at the agency, a description of a meeting of the governmental body at the community or municipal level, and a final evaluation of their experiences.
Target:

Students must obtain a minimum grade of B in the internship experience. The target grade for all students is an A.

**Findings (2016-2017) - Target: Met**

All students completed the health practicum with an A.

**Findings (2015-2016) - Target: Partially Met**

96.2% (25 of 26 students) earned positive letters of evaluation from internship sites (based on 80% or higher rating). One student received an "I" (incomplete grade), and 5 earned a B.

**Findings (2013-2014) - Target: Met**

14 out of 14 students who completed the Health Practicum Experience in the Spring 2014 semester achieved a B or better in the course (100%). 11 earned an A and 3 earned a B for the course.

**Findings (2012-2013) - Target: Met**

6 out of 6 students who completed the Health Practicum Experience in the Spring 2013 semester achieved a B or better in the course (100%).

**Findings (2011-2012) - Target: Partially Met**

11 out of 12 students who completed the Health Practicum Experience during the 2011-2012 academic year, achieved a B or better in the course (92%). One student received a “C” grade.

**Findings (2010-2011) - Target: Met**

Of 10 total students who completed the Health Practicum Experience during the 2010-2011 academic year, 9 achieved an A in the course and 1 student earned a B.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Maintain Positive Results**

*Established in Cycle: 2011-2012*

Only 1 out of 12 students who completed the Health Practicum did not meet the minimum target, which is why this measure was "p..."

**Maintain Performance**

*Established in Cycle: 2015-2016*

Maintain the high performance rate of the students during their health practicum.
Students complete a 12-week (400 hour) internship experience with a public/community health agency after all coursework has been completed. The internship supervisor monitors student attendance, participation, work ethic, and overall job performance; this culminates in a final letter of evaluation by the supervisor of the student's ability to work competently in the field.

Source of Evidence: Field work, internship, or teaching evaluation

**Target:**
Students must receive a positive letter of evaluation from their internship agency supervisors. This letter includes whether or not the agency would hire the student based on his/her overall performance during the internship. The goal is for all students to receive a letter of recommendation that states the cooperating agency would hire the student if a job opportunity arose.

**Findings (2016-2017) - Target: Met**
All 10 students enrolled in the Health Practicum Internship in the Fall 2016 and Spring 2017 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2015-2016) - Target: Met**
All 34 students enrolled in the Health Practicum Internship in the Fall 2015 and Spring 2016 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2013-2014) - Target: Met**
All 14 students enrolled in the Health Practicum Internship in the Spring 2014 semester received positive letters of evaluation/recommendation from their cooperating agencies. For the 11 students who earned an A, all agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2012-2013) - Target: Met**
All 6 students enrolled in the Health Practicum Internship in the Spring 2013 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2011-2012) - Target: Met**
All 12 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2010-2011) - Target: Met**
All 10 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies.
agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Not Reported**
*Established in Cycle: 2015-2016*
Not reported for this cycle, 2016-2017 data will be collected.

**M 3:A-t-C Rubrics**

Across the Curriculum Rubrics are used to rate student proficiency in program coursework designed to assess: 1. Writing in the Major 2. Critical Thinking and Problem Solving 3. Information Literacy 4. Quantitative Reasoning 5. Oral Communication. The Senior Capstone Rubric specifically assesses reading, writing, listening, information literacy, computer competency, and critical thinking.

Source of Evidence: Academic direct measure of learning - other

**Target:**
A minimum 80% of students will achieve a rating of "Proficient" or better in coursework assigned to the Assessment Data Collection System (ADCS).

**Findings (2016-2017) - Target: Not Reported This Cycle**
ADCS did not collect data for A-t-C rubrics for health promotion during this reporting cycle.

**Findings (2015-2016) - Target: Partially Met**
72.4% Problems solving, 72.4% for Context & Assumptions, 72.4% for Develops Own Perspective, 72.4% for Supporting Data/Evidence, 72.4% for Other Perspectives, 72.4% for Conclusions, Implications, and Consequences, and 89.6% for Communicates effectively.

**Findings (2013-2014) - Target: Not Met**
The Critical Thinking/Problem Solving A-t-C rubric indicated that out of 13 students assessed, less than 80% of students achieved a rating "Proficient" in coursework assigned to the ADCS for the Fall 2013 semester. Problem, Question, Issue: 38%, Context and Assumptions: 31%, Develops OWN perspective: 31%, Supporting Data/Evidence: 38%, Other Perspectives: 15%, Conclusions, Implications & Consequences: 23%, Communicates Effectively: 31%.

**Findings (2012-2013) - Target: Not Reported This Cycle**
Not assessed during 2012-2013 cycle.

**Findings (2011-2012) - Target: Partially Met**
The Critical Thinking & Problem Solving A-t-C rubric resulted in percentages of proficient or better in the following areas: Problem, Question, and Issue = 100% (Met), Context & Assumptions = 74% (Not Met), Develops Own Perspective = 100% (Met), Supporting Data/Evidence = 42% (Not Met), Other Perspectives = 84% (Met),
Conclusions, Implications & Consequences = 47% (Not Met), Communicates Effectively = 58% (Not Met)

The Information Literacy A-t-C rubric resulted in percentages of proficient or better in the following areas: Formulate & Define Information = 68% (Not Met), Access Information = 74% (Not Met), Evaluation Information Critically = 58% (Not Met), Integrate Information = 42% (Not Met), Documents Sources = 32% (Not Met)

The Senior Capstone A-t-C rubric resulted in percentages of proficient or better in the following areas: Reading in the Major = 100% (Met), Writing in the Major = 100% (Met), Speaking in the Major = 100% (Met), Listening in the Major = 100% (Met), Information Literacy = 100% (Met), Computer Literacy = 100% (Met), Critical Thinking = 100% (Met), Problem Solving = 100% (Met), Quantitative Reasoning = 100% (Met)

Findings (2010-2011) - Target: Met
ADCS statistical reports indicated that a minimum of 80% of students assessed received a rating of either "Proficient" or "Advanced" in the majority of components assessed by the A-t-C rubrics.

Related Action Plans (by Established cycle, then alpha):

Data Collection
Established in Cycle: 2015-2016
Will report next year if ADCS data is provided.

SLO 3:Distinguish Behaviors (1c)
The student will distinguish between behaviors that foster or hinder well-being.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 1:Health Practicum
In the Health Practicum Internship experience, students undergo 400 hours of work in a public/community health agency over the course of 12 weeks. During this time, they construct a portfolio containing all activities conducted at the agency, a description of a meeting of the governmental body at the community or municipal level, and a final evaluation of their experiences.

Source of Evidence: Portfolio, showing skill development or best work
**Target:**
Students must obtain a minimum grade of B in the internship experience. The target grade for all students is an A.

**Findings (2016-2017) - Target: Met**
All students completed the health practicum with an A.

**Findings (2015-2016) - Target: Partially Met**
96.2% (25 of 26 students) earned positive letters of evaluation from internship sites (based on 80% or higher rating). One student received an "I" (incomplete grade), and 5 earned a B.

**Findings (2013-2014) - Target: Met**
14 out of 14 students who completed the Health Practicum Experience in the Spring 2014 semester achieved a B or better in the course (100%).
11 earned an A and 3 earned a B for the course.

**Findings (2012-2013) - Target: Met**
6 out of 6 students who completed the Health Practicum Experience in the Spring 2013 semester achieved a B or better in the course (100%).

**Findings (2011-2012) - Target: Partially Met**
11 out of 12 students who completed the Health Practicum Experience during the 2011-2012 academic year, achieved a B or better in the course (92%). One student received a "C" grade

**Findings (2010-2011) - Target: Met**
Of 10 total students who completed the Health Practicum Experience during the 2010-2011 academic year, 9 achieved an A in the course and 1 student earned a B

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Maintain Positive Results**
*Established in Cycle: 2011-2012*

Only 1 out of 12 students who completed the Health Practicum did not meet the minimum target, which is why this measure was "p..."

**Maintain Performance**
*Established in Cycle: 2015-2016*
Maintain the high performance rate of the students during their health practicum.

**Maintain Performance**
*Established in Cycle: 2015-2016*
Maintain the high performance rate of the students during their health practicum.
M 2: Internship
Students complete a 12-week (400 hour) internship experience with a public/community health agency after all coursework has been completed. The internship supervisor monitors student attendance, participation, work ethic, and overall job performance; this culminates in a final letter of evaluation by the supervisor of the student's ability to work competently in the field.

Source of Evidence: Field work, internship, or teaching evaluation

Target:
Students must receive a positive letter of evaluation from their internship agency supervisors. This letter includes whether or not the agency would hire the student based on his/her overall performance during the internship. The goal is for all students to receive a letter of recommendation that states the cooperating agency would hire the student if a job opportunity arose.

Findings (2016-2017) - Target: Met
All 10 students enrolled in the Health Practicum Internship in the Fall 2016 and Spring 2017 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2015-2016) - Target: Met
All 34 students enrolled in the Health Practicum Internship in the Fall 2015 and Spring 2016 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2013-2014) - Target: Met
All 14 students enrolled in the Health Practicum Internship in the Spring 2014 semester received positive letters of evaluation/recommendation from their cooperating agencies. For the 11 students who earned an A, all agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2012-2013) - Target: Met
All 6 students enrolled in the Health Practicum Internship in the Spring 2013 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2011-2012) - Target: Met
All 12 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.
Findings (2010-2011) - Target: Met
All 10 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Related Action Plans (by Established cycle, then alpha):

Not Reported
Established in Cycle: 2015-2016
Not reported for this cycle, 2016-2017 data will be collected.

M 3:A-t-C Rubrics
Across the Curriculum Rubrics are used to rate student proficiency in program coursework designed to assess: 1. Writing in the Major 2. Critical Thinking and Problem Solving 3. Information Literacy 4. Quantitative Reasoning 5. Oral Communication. The Senior Capstone Rubric specifically assesses reading, writing, listening, information literacy, computer competency, and critical thinking.

Source of Evidence: Academic direct measure of learning - other

Target:
A minimum 80% of students will achieve a rating of "Proficient" or better in coursework assigned to the Assessment Data Collection System (ADCS).

Findings (2016-2017) - Target: Not Reported This Cycle
ADCS did not collect data for A-t-C rubrics for health promotion during this reporting cycle.

Findings (2015-2016) - Target: Partially Met
72.4% Problems solving, 72.4% for Context & Assumptions, 72.4% for Develops Own Perspective, 72.4% for Supporting Data/Evidence, 72.4% for Other Perspectives, 72.4% for Conclusions, Implications, and Consequences, and 89.6% for Communicates effectively.

Findings (2013-2014) - Target: Not Met
The Critical Thinking/Problem Solving A-t-C rubric indicated that out of 13 students assessed, less than 80% of students achieved a rating "Proficient" in coursework assigned to the ADCS for the Fall 2013 semester. Problem, Question, Issue: 38%, Context and Assumptions: 31%, Develops OWN perspective: 31%, Supporting Data/Evidence: 38%, Other Perspectives: 15%, Conclusions, Implications & Consequences: 23%, Communicates Effectively: 31%.

Findings (2012-2013) - Target: Not Reported This Cycle
Not assessed during 2012-2013 cycle.

Findings (2011-2012) - Target: Partially Met
The Critical Thinking & Problem Solving A-t-C rubric resulted in percentages of proficient or better in the following areas: Problem,
Question, and Issue = 100% (Met), Context & Assumptions = 74% (Not Met), Develops Own Perspective = 100% (Met), Supporting Data/Evidence = 42% (Not Met), Other Perspectives = 84% (Met), Conclusions, Implications & Consequences = 47% (Not Met), Communicates Effectively = 58% (Not Met)

The Information Literacy A-t-C rubric resulted in percentages of proficient or better in the following areas: Formulate & Define Information = 68% (Not Met), Access Information = 74% (Not Met), Evaluation Information Critically = 58% (Not Met), Integrate Information = 42% (Not Met), Documents Sources = 32% (Not Met)

The Senior Capstone A-t-C rubric resulted in percentages of proficient or better in the following areas: Reading in the Major = 100% (Met), Writing in the Major = 100% (Met), Speaking in the Major = 100% (Met), Listening in the Major = 100% (Met), Information Literacy = 100% (Met), Computer Literacy = 100% (Met), Critical Thinking = 100% (Met), Problem Solving = 100% (Met), Quantitative Reasoning = 100% (Met)

**Findings (2010-2011) - Target: Met**

ADCS statistical reports indicated that a minimum of 80% of students assessed received a rating of either “Proficient” or “Advanced” in the majority of components assessed by the A-t-C rubrics.

Maintain the high performance rate of the students during their health
Maintain Performance
Established in Cycle: 2015-2016
Maintain the high performance rate of the students during their health practicum.

M 2: Internship
Students complete a 12-week (400 hour) internship experience with a public/community health agency after all coursework has been completed. The internship supervisor monitors student attendance, participation, work ethic, and overall job performance; this culminates in a final letter of evaluation by the supervisor of the student's ability to work competently in the field.

Source of Evidence: Field work, internship, or teaching evaluation

Target:
Students must receive a positive letter of evaluation from their internship agency supervisors. This letter includes whether or not the agency would hire the student based on his/her overall performance during the internship. The goal is for all students to receive a letter of recommendation that states the cooperating agency would hire the student if a job opportunity arose.

Findings (2016-2017) - Target: Met
All 10 students enrolled in the Health Practicum Internship in the Fall 2016 and Spring 2017 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2015-2016) - Target: Met
All 34 students enrolled in the Health Practicum Internship in the Fall 2015 and Spring 2016 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2013-2014) - Target: Met
All 14 students enrolled in the Health Practicum Internship in the Spring 2014 semester received positive letters of evaluation/recommendation from their cooperating agencies. For the 11 students who earned an A, all agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2012-2013) - Target: Met
All 6 students enrolled in the Health Practicum Internship in the Spring 2013 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.
Findings (2011-2012) - Target: Met
All 12 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2010-2011) - Target: Met
All 10 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Not Reported
Established in Cycle: 2015-2016
Not reported for this cycle, 2016-2017 data will be collected.

M 3:A-t-C Rubrics
Across the Curriculum Rubrics are used to rate student proficiency in program coursework designed to assess: 1. Writing in the Major 2. Critical Thinking and Problem Solving 3. Information Literacy 4. Quantitative Reasoning 5. Oral Communication. The Senior Capstone Rubric specifically assesses reading, writing, listening, information literacy, computer competency, and critical thinking.

Source of Evidence: Academic direct measure of learning - other

Target:
A minimum 80% of students will achieve a rating of "Proficient" or better in coursework assigned to the Assessment Data Collection System (ADCS).

Findings (2016-2017) - Target: Not Reported This Cycle
ADCS did not collect data for A-t-C rubrics for health promotion during this reporting cycle.

Findings (2015-2016) - Target: Partially Met
72.4% Problems solving, 72.4% for Context & Assumptions, 72.4% for Develops Own Perspective, 72.4% for Supporting Data/Evidence, 72.4% for Other Perspectives, 72.4% for Conclusions, Implications, and Consequences, and 89.6% for Communicates effectively.

Findings (2013-2014) - Target: Not Met
The Critical Thinking/Problem Solving rubric indicated that out of 13 students assessed, less than 80% of students achieved a rating "Proficient" in coursework assigned to the ADCS for the Fall 2013 semester. Problem, Question, Issue: 38%, Context and Assumptions: 31%, Develops OWN perspective: 31%, Supporting Data/Evidence: 38%, Other Perspectives: 15%, Conclusions, Implications & Consequences: 23%, Communicates Effectively: 31%.
Findings (2012-2013) - Target: Not Reported This Cycle
Not assessed during 2012-2013 cycle.

Findings (2011-2012) - Target: Partially Met

The Critical Thinking & Problem Solving A-t-C rubric resulted in percentages of proficient or better in the following areas: Problem, Question, and Issue = 100% (Met), Context & Assumptions = 74% (Not Met), Develops Own Perspective = 100% (Met), Supporting Data/Evidence = 42% (Not Met), Other Perspectives = 84% (Met), Conclusions, Implications & Consequences = 47% (Not Met), Communicates Effectively = 58% (Not Met)

The Information Literacy A-t-C rubric resulted in percentages of proficient or better in the following areas: Formulate & Define Information = 68% (Not Met), Access Information = 74% (Not Met), Evaluation Information Critically = 58% (Not Met), Integrate Information = 42% (Not Met), Documents Sources = 32% (Not Met)

The Senior Capstone A-t-C rubric resulted in percentages of proficient or better in the following areas: Reading in the Major = 100% (Met), Writing in the Major = 100% (Met), Speaking in the Major = 100% (Met), Listening in the Major = 100% (Met), Information Literacy = 100% (Met), Computer Literacy = 100% (Met), Critical Thinking = 100% (Met), Problem Solving = 100% (Met), Quantitative Reasoning = 100% (Met)

Findings (2010-2011) - Target: Met
ADCS statistical reports indicated that a minimum of 80% of students assessed received a rating of either "Proficient" or "Advanced" in the majority of components assessed by the A-t-C rubrics.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Data Collection
Established in Cycle: 2015-2016
Will report next year if ADCS data is provided.

SLO 7: Strategies and Interventions (1g)

The student will demonstrate ability to deliver strategies/interventions and carry out plans for evaluation and research.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success
**Related Measures:**

**M 1: Health Practicum**
In the Health Practicum Internship experience, students undergo 400 hours of work in a public/community health agency over the course of 12 weeks. During this time, they construct a portfolio containing all activities conducted at the agency, a description of a meeting of the governmental body at the community or municipal level, and a final evaluation of their experiences.

**Source of Evidence:** Portfolio, showing skill development or best work

**Target:**
Students must obtain a minimum grade of B in the internship experience. The target grade for all students is an A.

**Findings (2016-2017) - Target: Met**
All students completed the health practicum with an A.

**Findings (2015-2016) - Target: Partially Met**
96.2% (25 of 26 students) earned positive letters of evaluation from internship sites (based on 80% or higher rating). One student received an "I" (incomplete grade), and 5 earned a B.

**Findings (2013-2014) - Target: Met**
14 out of 14 students who completed the Health Practicum Experience in the Spring 2014 semester achieved a B or better in the course (100%). 11 earned an A and 3 earned a B for the course.

**Findings (2012-2013) - Target: Met**
6 out of 6 students who completed the Health Practicum Experience in the Spring 2013 semester achieved a B or better in the course (100%).

**Findings (2011-2012) - Target: Partially Met**
11 out of 12 students who completed the Health Practicum Experience during the 2011-2012 academic year, achieved a B or better in the course (92%). One student received a "C".

**Findings (2010-2011) - Target: Met**
Of 10 total students who completed the Health Practicum Experience during the 2010-2011 academic year, 9 achieved an A in the course and 1 student earned a B.

Findings (2015-2016) - Target: Partially Met
72.4% Problems solving, 72.4% for Context & Assumptions, 72.4% for Develops Own Perspective, 72.4% for Supporting Data/Evidence, 72.4% for Other Perspectives, 72.4% for Conclusions, Implications & Consequences, and 89.6% for Communicates Effectively.

Findings (2013-2014) - Target: Not Met
The Critical Thinking/Problem Solving rubric indicated that out of 13 students assessed, less than 80% of students achieved a rating "Proficient" in coursework assigned to the ADCS for the Fall 2013 semester. Problem, Question, Issue: 38%, Context and Assumptions: 31%, Develops OWN perspective: 31%, Supporting Data/Evidence: 38%, Other Perspectives: 15%, Conclusions, Implications & Consequences: 23%, Communicates Effectively: 31%.
Findings (2012-2013) - Target: Not Reported This Cycle
Not assessed during 2012-2013 cycle.

Findings (2011-2012) - Target: Partially Met
The Critical Thinking & Problem Solving A-t-C rubric resulted in percentages of proficient or better in the following areas: Problem, Question, and Issue = 100% (Met), Context & Assumptions = 74% (Not Met), Develops Own Perspective = 100% (Met), Supporting Data/Evidence = 42% (Not Met), Other Perspectives = 84% (Met), Conclusions, Implications & Consequences = 47% (Not Met), Communicates Effectively = 58% (Not Met)

The Information Literacy A-t-C rubric resulted in percentages of proficient or better in the following areas: Formulate & Define Information = 68% (Not Met), Access Information = 74% (Not Met), Evaluation Information Critically = 58% (Not Met), Integrate Information = 42% (Not Met), Documents Sources = 32% (Not Met)

The Senior Capstone A-t-C rubric resulted in percentages of proficient or better in the following areas: Reading in the Major = 100% (Met), Writing in the Major = 100% (Met), Speaking in the Major = 100% (Met), Listening in the Major = 100% (Met), Information Literacy = 100% (Met), Computer Literacy = 100% (Met), Critical Thinking = 100% (Met), Problem Solving = 100% (Met), Quantitative Reasoning = 100% (Met)

Findings (2010-2011) - Target: Met
ADCS statistical reports indicated that a minimum of 80% of students assessed received a rating of either "Proficient" or "Advanced" in the majority of components assessed by the A-t-C rubrics.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Data Collection
Established in Cycle: 2015-2016
Will report next year if ADCS data is provided.

G 2: Graduate School

Prepare students for post-graduate education in public and community health as well as various science and health-related programs.

SLO 1: Health-Related Issues (1a, 2a)

The student will demonstrate and apply knowledge and comprehension of health-related issues

Relevant Associations:
DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Health Practicum
In the Health Practicum Internship experience, students undergo 400 hours of work in a public/community health agency over the course of 12 weeks. During this time, they construct a portfolio containing all activities conducted at the agency, a description of a meeting of the governmental body at the community or municipal level, and a final evaluation of their experiences.

Source of Evidence: Portfolio, showing skill development or best work

Target:
Students must obtain a minimum grade of B in the internship experience. The target grade for all students is an A.

Findings (2016-2017) - Target: Met
All students completed the health practicum with an A.

Findings (2015-2016) - Target: Partially Met
96.2% (25 of 26 students) earned positive letters of evaluation from internship sites (based on 80% or higher rating). One student received an "I" (incomplete grade), and 5 earned a B.

Findings (2013-2014) - Target: Met
14 out of 14 students who completed the Health Practicum Experience in the Spring 2014 semester achieved a B or better in the course (100%). 11 earned an A and 3 earned a B for the course.

Findings (2012-2013) - Target: Met
6 out of 6 students who completed the Health Practicum Experience in the Spring 2013 semester achieved a B or better in the course (100%).

Findings (2011-2012) - Target: Partially Met
11 out of 12 students who completed the Health Practicum Experience during the 2011-2012 academic year, achieved a B or better in the course (92%). One student received a "C" grade

Findings (2010-2011) - Target: Met
Of 10 total students who completed the Health Practicum Experience during the 2010-2011 academic year, 9 achieved an A in the course and 1 student earned a B.
Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

**Maintain Positive Results**
*Established in Cycle: 2011-2012*

Only 1 out of 12 students who completed the Health Practicum did not meet the minimum target, which is why this measure was "p..."

**Maintain Performance**
*Established in Cycle: 2015-2016*
Maintain the high performance rate of the students during their health practicum.

**M 2: Internship**
Students complete a 12-week (400 hour) internship experience with a public/community health agency after all coursework has been completed. The internship supervisor monitors student attendance, participation, work ethic, and overall job performance; this culminates in a final letter of evaluation by the supervisor of the student's ability to work competently in the field.

Source of Evidence: Field work, internship, or teaching evaluation

**Target:**
Students must receive a positive letter of evaluation from their internship agency supervisors. This letter includes whether or not the agency would hire the student based on his/her overall performance during the internship. The goal is for all students to receive a letter of recommendation that states the cooperating agency would hire the student if a job opportunity arose.

**Findings (2016-2017) - Target: Met**
All 10 students enrolled in the Health Practicum Internship in the Fall 2016 and Spring 2017 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2015-2016) - Target: Met**
All 34 students enrolled in the Health Practicum Internship in the Fall 2015 and Spring 2016 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2013-2014) - Target: Met**
All 14 students enrolled in the Health Practicum Internship in the Spring 2014 semester received positive letters of evaluation/recommendation from their cooperating agencies. For the 11 students who earned an A, all agency supervisors stated that they would hire the students if a job opportunity became available.
Findings (2012-2013) - Target: Met
All 6 students enrolled in the Health Practicum Internship in the Spring 2013 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2011-2012) - Target: Met
All 12 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Findings (2010-2011) - Target: Met
All 10 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

Related Action Plans (by Established cycle, then alpha):

All students completed the health practicum with an A.

**Findings (2015-2016) - Target: Partially Met**
96.2% (25 of 26 students) earned positive letters of evaluation from internship sites (based on 80% or higher rating). One student received an "I" (incomplete grade), and 5 earned a B.

**Findings (2013-2014) - Target: Met**
14 out of 14 students who completed the Health Practicum Experience in the Spring 2014 semester achieved a B or better in the course (100%). 11 earned an A and 3 earned a B for the course.

**Findings (2012-2013) - Target: Met**
6 out of 6 students who completed the Health Practicum Experience in the Spring 2013 semester achieved a B or better in the course (100%).

**Findings (2011-2012) - Target: Partially Met**
11 out of 12 students who completed the Health Practicum Experience during the 2011-2012 academic year, achieved a B or better in the course (92%). One student received a "C"

**Findings (2010-2011) - Target: Met**
Of 10 total students who completed the Health Practicum Experience
during the 2010-2011 academic year, 9 achieved an A in the course and 1 student earned a B

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Maintain Positive Results**  
*Established in Cycle: 2011-2012*

Only 1 out of 12 students who completed the Health Practicum did not meet the minimum target, which is why this measure was "p..."

**Maintain Performance**  
*Established in Cycle: 2015-2016*  
Maintain the high performance rate of the students during their health practicum.

**M 2: Internship**  
Students complete a 12-week (400 hour) internship experience with a public/community health agency after all coursework has been completed. The internship supervisor monitors student attendance, participation, work ethic, and overall job performance; this culminates in a final letter of evaluation by the supervisor of the student's ability to work competently in the field.

Source of Evidence: Field work, internship, or teaching evaluation

**Target:**

Students must receive a positive letter of evaluation from their internship agency supervisors. This letter includes whether or not the agency would hire the student based on his/her overall performance during the internship. The goal is for all students to receive a letter of recommendation that states the cooperating agency would hire the student if a job opportunity arose.

**Findings (2016-2017) - Target: Met**

All 10 students enrolled in the Health Practicum Internship in the Fall 2016 and Spring 2017 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2015-2016) - Target: Met**

All 34 students enrolled in the Health Practicum Internship in the Fall 2015 and Spring 2016 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.
**Findings (2013-2014) - Target: Met**
All 14 students enrolled in the Health Practicum Internship in the Spring 2014 semester received positive letters of evaluation/recommendation from their cooperating agencies. For the 11 students who earned an A, all agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2012-2013) - Target: Met**
All 6 students enrolled in the Health Practicum Internship in the Spring 2013 semester received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2011-2012) - Target: Met**
All 12 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Findings (2010-2011) - Target: Met**
All 10 students enrolled in the Health Practicum Internship received positive letters of evaluation/recommendation from their cooperating agencies. All agency supervisors stated that they would hire the students if a job opportunity became available.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Not Reported**
*Established in Cycle: 2015-2016*
Not reported for this cycle, 2016-2017 data will be collected.

**M 3:A-t-C Rubrics**
Across the Curriculum Rubrics are used to rate student proficiency in program coursework designed to assess: 1. Writing in the Major 2. Critical Thinking and Problem Solving 3. Information Literacy 4. Quantitative Reasoning 5. Oral Communication. The Senior Capstone Rubric specifically assesses reading, writing, listening, information literacy, computer competency, and critical thinking.

Source of Evidence: Academic direct measure of learning - other

**Target:**
A minimum 80% of students will achieve a rating of "Proficient" or better in coursework assigned to the Assessment Data Collection System (ADCS).

**Findings (2016-2017) - Target: Not Reported This Cycle**
ADCS did not collect data for A-t-C rubrics for health promotion during this reporting cycle.

**Findings (2015-2016) - Target: Partially Met**
72.4% Problems solving, 72.4% for Context & Assumptions, 72.4% for Develops Own Perspective, 72.4% for Supporting Data/Evidence, 72.4%
for Other Perspectives, 72.4% for Conclusions, Implications, and Consequences, and 89.6% for Communicates effectively.

**Findings (2013-2014) - Target: Not Met**
The Critical Thinking/Problem Solving rubric indicated that out of 13 students assessed, less than 80% of students achieved a rating "Proficient" in coursework assigned to the ADCS for the Fall 2013 semester. Problem, Question, Issue: 38%, Context and Assumptions: 31%, Develops OWN perspective: 31%, Supporting Data/Evidence: 38%, Other Perspectives: 15%, Conclusions, Implications & Consequences: 23%, Communicates Effectively: 31%.

**Findings (2012-2013) - Target: Not Reported This Cycle**
Not assessed during 2012-2013 cycle.

**Findings (2011-2012) - Target: Partially Met**
The Critical Thinking & Problem Solving A-t-C rubric resulted in percentages of proficient or better in the following areas: Problem, Question, and Issue = 100% (Met), Context & Assumptions = 74% (Not Met), Develops Own Perspective = 100% (Met), Supporting Data/Evidence = 42% (Not Met), Other Perspectives = 84% (Met), Conclusions, Implications & Consequences = 47% (Not Met), Communicates Effectively = 58% (Not Met)

The Information Literacy A-t-C rubric resulted in percentages of proficient or better in the following areas: Formulate & Define Information = 68% (Not Met), Access Information = 74% (Not Met), Evaluation Information Critically = 58% (Not Met), Integrate Information = 42% (Not Met), Documents Sources = 32% (Not Met)

The Senior Capstone A-t-C rubric resulted in percentages of proficient or better in the following areas: Reading in the Major = 100% (Met), Writing in the Major = 100% (Met), Speaking in the Major = 100% (Met), Listening in the Major = 100% (Met), Information Literacy = 100% (Met), Critical Thinking = 100% (Met), Problem Solving = 100% (Met), Quantitative Reasoning = 100% (Met)

**Findings (2010-2011) - Target: Met**
ADCS statistical reports indicated that a minimum of 80% of students assessed received a rating of either "Proficient" or "Advanced" in the majority of components assessed by the A-t-C rubrics.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Data Collection**
*Established in Cycle: 2015-2016*
Will report next year if ADCS data is provided.

SLO 13: Professional Research and Writing Skills (2e)
The student will demonstrate professional research and writing skills.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 1: Health Practicum**
In the Health Practicum Internship experience, students undergo 400 hours of work in a public/community health agency over the course of 12 weeks. During this time, they construct a portfolio containing all activities conducted at the agency, a description of a meeting of the governmental body at the community or municipal level, and a final evaluation of their experiences.

Source of Evidence: Portfolio, showing skill development or best work

**Target:**
Students must obtain a minimum grade of B in the internship experience. The target grade for all students is an A.

**Findings (2016-2017) - Target: Met**
All students completed the health practicum with an A.

**Findings (2015-2016) - Target: Partially Met**
96.2% (25 of 26 students) earned positive letters of evaluation from internship sites (based on 80% or higher rating). One student received an "I" (incomplete grade), and 5 earned a B.

**Findings (2013-2014) - Target: Met**
14 out of 14 students who completed the Health Practicum Experience in the Spring 2014 semester achieved a B or better in the course (100%). 11 earned an A and 3 earned a B for the course.

**Findings (2012-2013) - Target: Met**
6 out of 6 students who completed the Health Practicum Experience in the Spring 2013 semester achieved a B or better in the course (100%).

**Findings (2011-2012) - Target: Partially Met**
11 out of 12 students who completed the Health Practicum Experience during the 2011-2012 academic year, achieved a B or better in the course (92%). One student received a "C"

**Findings (2010-2011) - Target: Met**
Of 10 total students who completed the Health Practicum Experience
during the 2010-2011 academic year, 9 achieved an A in the course and 1 student earned a B

Police Department

Public Safety also keeps comprehensive records on all law enforcement/security activities and actions, in accordance with the Clery Act federal law.

2010 Dover Campus Clery Report

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Mission / Purpose

The Recreation Management Minor has been developed to meet the industry demand and needs of students at Delaware State University, community, and surrounding states. The new minor will strengthen knowledge and skills in recreation management and empower student's capability in workforce. The program is management oriented and inline with NRPA accreditation guidelines.

This minor has been taught by using existing courses from the sport management curriculum. In addition, a previous recreation concentration which has not been offered for years due to the lack of facilities, faculty, and resources will provide additional courses. A survey was conducted by the department and more than 200 students indicated interested in the program. There are limited or unavailable programs in the surrounding states and the minor make our program unique. The minor offers specified knowledge and training for students who want to work in the recreation industry, such as; intramural sports, YMCA/YWCA, recreation department of city, town, county, and private clubs centers (tennis, golf, country clubs).
Mission / Purpose

The School of Graduate Studies and Research supports the mission of the University by providing infra-structural support for the development and implementation of transformative, high quality, graduate and professional degree programs that prepare leaders for the complexities of the 21st century.

VISION:
The School of Graduate Studies and Research will promote the vision of the University by offering graduate and professional degree programs that conform to the highest standards required by respective accrediting and funding agencies in DSU's pursuit of excellence.

Goals without Outcome/Objective Relationships Specified

G 3: Research and Scholarship

RESEARCH AND SCHOLARSHIP - Increase and sustain excellence in scholarly and creative research that addresses significant state, regional, national and global challenges.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Academic Climate and Culture

INTELLECTUAL CLIMATE AND CULTURE

Create an exceptional learning environment that promotes challenging, high-quality curricular and co-curricular programs, engaged student learning, and local and global citizenship

Connected Document
- Graduate Student Engagement Data 2013-2014
O/O 1: Establish Graduate Student Learning Outcomes and Competencies

The mission of the School of Graduate Studies and Research is aligned with the University's mission, core values, and student learning goals. To this end, all graduate programs will develop assessment tools to report on graduate student achievement in the following areas:

- All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.
- All graduate students will demonstrate clear and concise written and oral communication.
- All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.
- All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to insure their professional and personal success.
- All graduate students will participate in outreach and/or engagement activities as defined by their discipline and/or program.

Related Measures:

M 1: Graduate SLOs
90% or greater of graduate program directors have established SLOs for their graduate programs and will report outcomes and measures annually. The Graduate Council will discuss assessment strategies during the 2014-2015 academic year. The Director, Graduate Student Services will assist with development of Standard Rubrics for Capstone Activities so that summative assessment will be performed in the School of Graduate Studies.

Source of Evidence: Activity volume

O/O 2: Graduate Student Engagement
- Report on Graduate Student Engagement Annually

- Evidence of Research and Scholarly Activities
- Outreach and Service
- Practicum Internships and/or Field Experiences
- Leadership Program
- International Experiences

Connected Documents
- Graduate Student Engagement Data 2013-2014
- Graduate Student Contact Information 2013-2014
Relevant Associations:

Strategic Plan Associations:
Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally

Related Measures:

M 2: Capstone Activities by Program
Based upon available data, 146 or 32% of enrolled graduate students (fall 2013 census = 450 students enrolled) were engaged in some type of high impact activity (research, thesis, dissertation, capstone, etc). These activities are strong indicators of student learning, retention, and graduation.

This measure will be merged with in the Measure 9 (Capstone Experiences will be discontinued) 2014-2015 academic reporting cycle.

Source of Evidence: Existing data
Target:
Program Directors will report bi-annually or graduate student capstone experiences (100%). A template has been developed to capture data. For Spring 2014 only 20% are in compliance; however, the KPIs were developed late in the semester. Graduate Program Directors are now aware that this data should be maintained and reported annually.

Findings (2013-2014) - Target: Partially Met

Based upon available data roughly 30% (146/450) of graduate student engagement data was reported for the 2013-2014 academic year. Better reporting processes/strategies will be utilized for the 2014-2015 academic year in order to report a more fully report on graduate student engagement.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Graduate Program Directors (and Department Chairs) will report bi-annually or graduate student capstone experiences. A template ...

M 3: Graduate Student Participation in 4th Annual Research Symposium

The School of Graduate Studies and Research hosted its Fourth Annual Graduate Research Symposium. Slightly more than 10% of enrolled graduate students (56) representing all Colleges gave oral and poster presentations. Based upon survey results, responders enjoyed this activity but would like to see more student involvement between undergraduate and graduate students. In addition, responders would also like to see more faculty involvement and participation with outside institutions. SGSR sees many opportunities for growth in the areas of student recruitment and professional development for undergraduate and graduate students with this activity. A regional research symposium could provide an opportunity to showcase our new Optics Center.

Source of Evidence: Existing data

Target:
The target for the 2013-2014 academic year was to provide a venue for all graduate students to present their ongoing research/scholarship activities. SGSR met this expectation. All Colleges were also represented.

M 4: Graduate Student Gala - Recognition of Graduate Student Excellence
The School of Graduate Studies and Research hosted its first (Annual) Graduate Awards Gala on April 26, 2014; following our 4th Annual Graduate Research Symposium. The activity was well attended (more than 150 participants). SGSR anticipates hosted this activity semi-annually for the 2014-2015 academic year as a culminating event in celebration of our fall and spring graduates.

Source of Evidence: Existing data
O/O 8: Structure for Graduate Studies and Research

The School of Graduate Studies and Research will establish an infrastructure to ensure successful matriculation of graduate and professional students at Delaware State University.
This structure will address four key areas:

- **Admissions** - Review processes to ensure an efficient, effective, and decentralized graduate admissions process.
- **Academic Quality** - Review and implement policies and procedures to ensure the quality of our academic programs.
- **Student Services, Records and Data Management** - Implement and maintain a records management system for all currently enrolled graduate students consisting of admissions data, student progress to degree, admission to candidacy, defense of thesis or dissertation, time to degree, and graduation.
- **Co-curricular and Professional Development Activities** - In collaboration with the Graduate Student Association and academic programs, The School of Graduate Studies and Research will provide services and implement activities for graduate students that provide professional development and networking opportunities

**Relevant Associations:**

**Strategic Plan Associations:**

- Delaware State University
  
  2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
  
  6.6 Create a culture of accountability, high performance and service excellence.

**Related Measures:**

**M 10: Organizational Structure**

Two organizational structures have been presented to the Provost Council and a progress report submitted to the Board of Trustees in February. Roles and responsibilities for Graduate Program Directors have also been developed (and summarized under Student Success SLO). This is a standard structure and expectation for a School of Graduate Studies and Research and one that is needed if DSU wishes to raise its research profile as graduate students as researchers are needed to move this enterprise forward.

Position descriptions in several key areas have been developed. One position, Director for Graduate Student Services has been advertised and a finalist selected. 2-3 Positions anticipated for Academic Year 2014-2015 in key areas

**Anticipated Positions**

**2014-2015**

Assistant Dean for Graduate Studies or Director Graduate Enrollment
Coordinator for Admissions, Web-Services, and Marketing
Administrative Support/Office Manager

**2015-2016**

Coordinator - Office of Student Research and Scholarly Activities
Admission Recruiters/Coordinators as needed
Graduate Service Advisors/Counselors as needed

Source of Evidence: Professional standards

**Target:**
Organizational structure has been presented in the Dean's Council and Provost Council and submitted in the BOT Progress report. By 2015 Graduate Studies wants to have filled 3 key positions needed to ensure student enrollment, matriculation, and success.

**Findings (2013-2014) - Target: Partially Met**
One position has been advertised and a finalist selected and 3 positions have been requested for 2014-2015 academic year.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**G 2: Student Success**

**STUDENT SUCCESS - Recruit, develop, retain graduate and place outstanding students**
Establish expectations and responsibilities of all Program Directors and report productivity annually to Department Chair or Program Director's supervisor as a part of annual evaluation process.

**Relevant Associations:**

**Strategic Plan Associations:**
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 5: Program Director Responsibilities**

**Target:**
It is proposed that by fall 2015, all (100%) of Graduate Program Directors will receive formal appointments and be evaluated against expectations as a part of their formal workload annually. A position description has been developed.

**Findings (2013-2014) - Target: Partially Met**
While the reporting structure along with roles and responsibilities for program directors have been defined; questions remain regarding workloads, appointment length (9, 10, 11, or 12 months), administrative support, and the relationship between program director and chair in this process.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Graduate Program Director Position Description**
Established in Cycle: 2013-2014
Position Description for Graduate Program Directors

**O/O 5: Records Management and Graduate Student Milestones**
Establish records management processes and check points that monitor graduate student progress.
Enrolled graduate student files are audited every semester (currently manual) to determine if students have satisfied their provisional status (primarily standardize exam requirement).

The following is a general sequence for students enrolled in a thesis/dissertation program:
Program of Study
Committee Members (Thesis/Dissertation Programs)
Comprehensive Exam/Qualifier Exam Results (Doctoral Programs)
Candidacy
Request to Schedule Thesis/Dissertation Defense
Defense Outcomes
Graduation Application and Audit

Milestones along with deadlines are posted on the graduate studies website to keep students informed.

Students are contacted via email if they are missing documentation to move to their next milestone.

**Relevant Associations:**

**Strategic Plan Associations:**
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 6:Student Milestones**

Enrolled graduate student files are audited every semester (currently manual) to determine if students have satisfied their provisional status (primarily standardize exam requirement).

The following is a general sequence for students enrolled in a thesis/dissertation program:

Program of Study
Committee Members (Thesis/Dissertation Programs)
Comprehensive Exam/Qualifier Exam Results (Doctoral Programs)
Candidacy
Request to Schedule Thesis/Dissertation Defense
Defense Outcomes
Graduation Application and Audit

Milestones along with deadlines are posted on the graduate studies website to keep students informed.

Students are contacted via email if they are missing documentation to move to their next milestone.

Source of Evidence: Benchmarking of learning outcomes against peers
Target:
By Fall 2015, records management will be managed via automated workflows and housed in a student information format (BANNER). All students will receive automated responses informing them of upcoming deadlines. These process will ensure 100% compliance for enrolled graduate students and assist with advising, enrollment, retention, and graduation strategies.

Findings (2013-2014) - Target: Partially Met
An audit process has been established for Graduate Student however it is not possible to reach 100% compliance via the current (paper process). By 2015 SGSR proposes to manage its records via automated workflows housed via the University's student information format (BANNER). All students will receive automated responses informing them of upcoming deadlines. These process will ensure 100% compliance for enrolled graduate students and assist with advising, enrollment, retention, and graduation strategies.

Related Action Plans (by Established cycle, then alpha):

Strategic Plan Associations:
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

Related Measures:

M 8: Grad Program Productivity
Graduate Productivity is reported based upon Graduate Program FTEs/Student Credit Hours generated, enrolled graduate students and graduation data.

Source of Evidence: Existing data
Target:
SGSR met its target for the 2013-2014 academic year and reported time to degree data for 100% of enrolled graduate students.

Findings (2013-2014) - Target: Partially Met
KPIs have been developed for School of Graduate Studies and Research. The following data was requested through Institutional Research to address the following areas:

- Graduate Student Profile
- Graduate Program Productivity
- Time to Degree

Data will be used to develop a graduate student profile, establish baseline admission data (GPA, standardized exam, TOEFL/IELTS for International Students) for first-time graduate admits and link to performance and degree completion.

O/O 8: Structure for Graduate Studies and Research

The School of Graduate Studies and Research will establish an infrastructure to ensure successful matriculation of graduate and professional students at Delaware State University.

This structure will address four key areas:

- **Admissions** - Review processes to ensure an efficient, effective, and decentralized graduate admissions process.

**O/O 9: Capacity for Enrollment Growth**
Determine each program’s capacity for enrollment growth.

**Relevant Associations:**

**Strategic Plan Associations:**
*Delaware State University*
- 1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
- 2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
- 6.3 Continue to support, use, and enhance comprehensive assessment processes throughout all divisions in order to inform decision making

**Related Measures:**

**M 11: Capacity for Enrollment Growth**
A template has been developed requesting from each program director to assist in review of their program, current capacity, and needed resources for potential growth.

Source of Evidence: Existing data
Target:
Responses were received from the College of Business (MBA, SA), College of Arts, Humanities, and Social Sciences (Art Education, TESL, Historic Preservation), Departments of Mathematical Sciences (MS/Ph.D.) and Computer Science. No response from the College of Agriculture, College of Education, Health, and Public Policy. The response represents 50% of the Departments offering Graduate Programming.

Findings (2013-2014) - Target: Partially Met

While half of the programs did not respond; common areas of need are noted that are needed in order to grow graduate programming.

- Increase Graduate student funding which currently low or non-existent.
- Timely budget allocation (or projected budget allocation) so that faculty can make timely offers to competitive students (thus effecting retention and graduation)
- A marketing strategy and budget which is currently non-existent
- A strategic plan to overhaul web-site (strategic hire or funding to outsource) to increase our web-presence (also associated with marketing)
- Strategic faculty hires to enhance competitiveness of existing programs.
- Technology training/support to increase on-line presence.
- An established and transparent process for appointment of all graduate program directors, standardized workloads; commensurate with program enrollment, size and scope.
- Standardized support services for graduate programs

Mission / Purpose

Mission/Purpose

The mission of the BSW program is to prepare generalist (entry level) practitioners who are capable of utilizing professional knowledge, values and skills in order to intervene with, and on behalf of, individuals, families, groups, organizations and communities.

The Program's Purpose

The BSW program teaches students about the person in the environment as a central construct for practice, the professional relationship as the medium through which social workers assist clients, and that human rights and social and economic justice constitute the moral imperative and philosophical foundation for social work practice. The program also ensures that the Department's underpinnings are fully integrated into the explicit and implicit curricula and that a learning environment is fostered that encourages the development of students' intellectual and practice skills, including an orientation to achieving social change in diverse communities throughout the world.

The program's mission ensures that students are taught to consider each person within the context of his or her environment while utilizing a dynamic problem solving process that moves from engagement to termination. The program teaches about the professional relationship as the medium through which generalist level social workers assist clients at multiple levels. In addition to these core elements, the BSW program integrates the program's five underpinnings throughout the explicit curriculum. Therefore, the program's mission promotes a learning environment within and outside of the classroom that develops students' knowledge, values and skills and hones their competencies to practice with a diverse client population in a variety of practice settings.

Furthermore, throughout the explicit curriculum the program imparts the profession's central purpose; that is, to address the basic human needs of all people and communities and to foster dignity and social justice for all peoples. Accordingly, the program develops students' understanding of the manifestations of social injustice around the world and the need to
internalize the profession's goals to redress problems including, but not limited to, violence, hunger, genocide, and racism around the world.

BSW Program Mission Consistent with the Professional Purpose of Social Work

The BSW program’s mission is consistent with the purpose of social work, which is to promote human and community well-being. The profession's purpose serves as a compass for the program's curriculum, whose content ensures that students graduate with knowledge, values and skills that will allow them to practice according to social work's ethics as skilled generalist practitioners. The mission also ensures that upon graduation, students are able to plan and render culturally competent services to individuals, families, groups, organizations, and communities in a manner that reflects the program's conceptual underpinnings for practice and a recognition of the human need and suffering that social workers are mandated to address.

The program's mission is consistent with the profession's purpose, which is to reduce and eliminate clients' oppression, discrimination and victimization. President Clinton's 1998 Initiative on Race highlighted the historical and contemporary impact of discrimination and marginalization of racial minorities in America. Delaware State University's BSW program helps students understand that racism is not only black and white but that “...every minority group has a distinct and unique historical experience with racism and oppression” (The President's Initiative on Race, 1998, p. 41).

In fact, the Department's first underpinning-a Black perspective for social work practice-provides a framework and a unique set of lens with which students learn how to deconstruct systems of oppression and effectively respond to the seemingly intractable negative outcomes of social injustice, discrimination, and oppression that are experienced by all vulnerable and marginalized populations. The program's Black perspective for social work practice underpinning comprises elements of a framework with which to understand the unique oppressive experiences and world view(s) associated with being of African genetic origin in the United States. As such, there is no one monolithic set of activities or experiences that define "the Black experience." While some variability of life encounters, decisions, and choices negatively affect all populations in the U.S., African Americans are more likely to encounter expressions of dehumanization, discrimination, prejudice, and racism (all forms of oppression) more frequently than other racial and ethnic groups (Marger, 2013).
These idiosyncratic experiences shape Blacks' views of society and society's view of them. Since social work is distinguished by its focus on social problems in the context of one's environment, the BSW program teaches students that a Black perspective for social work practice requires taking environmental/external factors that create and contribute to structural problems into account when assessing and developing plans to help clients. Inherent in this empowerment perspective is the need to simultaneously resist the natural inclination to view clients as powerless victims of discrimination. Rather, students are taught that the primary emphasis must be placed on helping clients, whether African American or other oppressed group members, to develop, restore, and/or enhance their individual and collective resiliency. In this context, resiliency refers to one's ability to recover from negative conditions that adversely impact an individual's or group's life chances.

Goals without Outcome/Objective Relationships Specified

G 3: Employ empowerment oriented approach to practice

Goal 3. To graduate students who demonstrate the ability to employ an empowerment oriented approach to practice; that is, engagement, assessment, and implementation of evidence-based interventions that are intended to help clients achieve service goals.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Prepare students for entry level practice
    Demonstrate Ethical and Professional Behavior

SLO 1: Identify as a Professional Social Worker
    Students will identify as a professional social worker and conduct oneself accordingly.

    Relevant Associations:

    DSU Learning Goal Associations:
        4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

    Related Measures:

    M 4: Field Evaluation
    Field instructors' evaluation of student performance on outcomes/objectives (competencies).

    Source of Evidence: Field work, internship, or teaching evaluation
Target:
70% of BSW students will achieve a rating of Proficient or higher as assessed by field instructors on outcomes/objectives (competencies) stipulated by the Council on Social Work Education.

Findings (2010-2011) - Target: Met
87% of BSW students achieved a rating of Proficient or higher, as assessed by field instructors, on the Council on Social Work Education stipulated outcome/objective (competency)----Identify as a professional social worker and conduct oneself accordingly.

M 5: Senior Capstone ADCS rubric data
Senior capstone rubric is used to assess students in Senior Seminar course SCWK-460 during spring semester. Students are rated as advanced, proficient, satisfactory, unsatisfactory. During the Senior Seminar, students are given an opportunity to: 1) assess prior learning, and 2) assess their learning needs, practice skills, and theoretical understandings. Primary focus is on integrating theory and practice building on their field experience. Focus is on the development of an individual social work practice frame of reference.

Source of Evidence: Capstone course assignments measuring mastery

Target:
70% of BSW students will achieve a rating of Proficient or higher as assessed by course instructors on senior capstone rubric.

Findings (2016-2017) - Target: Partially Met
Students were rated as 80% or higher for reading, listening, information literacy, computer competency, critical thinking, problem solving and quantitative reasoning. The target was met for these elements of the senior capstone rubric. However, students were rated slightly below the target of 70% for writing and speaking (69.45% and 66.67% respectively). See below for details. No students received ratings of unsatisfactory for any elements of the rubric.

Findings (2010-2011) - Target: Met
73% of BSW students achieved a rating of Proficient or higher, as
assessed field instructors, on the Council on Social Work Education stipulated outcome/objective (competency----Advanced human rights and social and economic justice.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Engage Clients on the Micro, Mezzo and Macro Level**
Determine reasons for student not meeting target.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Director of Field Instruction will talk with field instructors about divergent assessments. Likert assessment indicates that field instructors Strongly Agree that students demonstrate the competency, but evaluations say something different. This discussion will be followed by specifying assignments student will receive. Particular attention will be given to insuring the field instructors give students assignments that allow them to demonstrate their mastery of the competence.

**Engage in research-informed practice and practice-informed research**

Determine under-performance of BSW students with outcome Practice-informed research and research informed practice.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** To meet the target several steps were taken, such as examples of how field instructors can help students engage in research-informed practice and practice-informed research were provided. Additional steps that will be taken include: ensuring that classroom instruction in research informs the field experience of students.
- **Projected Completion Date:** 05/30/2011
- **Responsible Person/Group:** Director of Field Instruction, research sequence, research faculty, Chair.

**Annual Report Section Responses**

**Executive Summary (1-2 pages)**

**Unit(s) Profile**

**Unit(s) Initiatives accomplished in this cycle**
1. Interview and hire a new Chair
2. Begin the accreditation cycle for CSWE

Unit(s) Honors/Awards and Achievements
Dr. Kiesel and Dr. Hill were awarded a research grant to complete a time study for Division of Child service for the State of Delaware.

Dr. Kingsberry was named as Social Worker of the Year by the National Association of Social Workers, Delaware Chapter. She was to be honored as a joint DESU event with NASW, but it was snowed out. A small quiet dinner to celebrate the occasion occurred later.

Dr. Franklin may have run the most attended program this year on campus. She and a colleague have a small grant for programming that involves wellness and health. Puppies from the SPCA arrived onto campus during finals to de-stress students there were over 400 people in attendance, as well that grant hosted a painting night. Dr. Franklin also started a graduation breakfast event that could turn into an annual tradition.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

1. Update student handbook for the BSW Program
2. Identify assignments and readings that match the CSWE dimensions and competencies.
3. Request additional faculty to meet the student-faculty ratio for CSWE accreditation standards

"KPI #1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

Social Work KPI #1 and #10

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? b) Have these changes been implemented? If not, when will they be implemented? c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Mission / Purpose

Mission/Purpose

The mission of the MSW program is to prepare advanced generalist social workers with the knowledge, values, and skills needed for effective practice, policy and research that are guided by professional ethics and values and for leadership roles in the development and implementation of social welfare programs and services in a diverse and global society.

The Program's Purpose

The MSW Program prepares advanced generalist practitioners who are capable of practicing in a manner that reflects the precepts of human rights and social and economic justice for individuals, families, groups, organizations, and communities. The program endeavors to graduate social workers whose core personal and professional impetus and framework for practice reflect the department's mission, purpose, core underpinnings, and principles. To this end, the program provides learning experiences that prepare students to engage, assess, and intervene with diverse clients who experience serious complex problems. The program's graduates have the capacity and skills to independently utilize multiple theoretical frameworks and effectively intervene at multiple practice levels simultaneously. The program also prepares students to advocate for changes at the micro, mezzo, and macro levels that will enhance the dignity, self-worth, and quality of life for diverse client systems.

The MSW program's classroom and field practicum experiences reflect the profession's concern with human need and social injustice from a global perspective. Accordingly, the program's activities are directed toward developing students' understanding of how social injustice is manifested around the world and to foster a commitment to redress significant problems including violence, hunger, genocide, and racism around the world.

MSW Program Mission Consistent with the Professional Purpose of Social Work

The MSW program's mission is consistent with the inherent purpose of the social work profession. As articulated in the Code of Ethics of the National Association of Social Workers, the profession's purpose is to promote the dignity and well-being, and help meet
the basic human needs of all people and communities, in particular those persons who are poor and/or who suffer the indignities of poverty, discrimination, and oppression. As such, the curriculum provides grounding for advanced generalist practitioners who are prepared for ethically guided professional practice - a key purpose of the profession.

The mission reflects the program's explicit intent that its graduates possess the competence to assume leadership roles to implement social welfare policies, programs, and services with, and on behalf of, individuals, families, groups, organizations, and communities that reflect a strengths-based and empowerment orientation and a Black perspective for social work practice in a global society. The program provides students with concrete learning opportunities within and outside of the classroom that prepare them to advocate for sustainable changes at the micro, mezzo, and macro levels to ultimately enhance the quality of services to clients. The program ensures that students thoroughly understand the profession's purpose and master the requisite knowledge, values, and skills that they must translate into the competencies and practice behaviors that form the core of the social work profession.

The program's mission is consistent with the profession's purpose to reduce and eliminate oppression, discrimination, and victimization. The department's fifth underpinning, a Black perspective for social work practice, provides a framework and a unique lens with which students know how to deconstruct systems of oppression and effectively respond to the seemingly intractable negative outcomes of social injustice, discrimination, and oppression that are experienced by all vulnerable and marginalized populations. The program's Black perspective for social work practice underpinning comprises elements of a framework with which to understand the unique oppressive experiences and world view(s) associated with being of African genetic origin in the United States. As such, there is not one monolithic set of activities or experiences that define "the Black experience." While some variability of life encounters, decisions, and choices negatively affect all populations in the U.S., African Americans are more likely to encounter expressions of dehumanization, discrimination, prejudice, and racism (all forms of oppression) more frequently than populations either from the dominant or majority groups. These idiosyncratic experiences shape Blacks' views of society and society's view of them. Since social work is distinguished by its focus on social problems in the context of one's environment, the MSW program teaches students that a Black perspective for social work practice requires taking environmental/external factors that create and contribute to structural problems into account when assessing and developing plans to help clients. Inherent in this empowerment perspective is the need to simultaneously resist the natural inclination to view clients as powerless victims of discrimination. Rather, students are taught that the primary emphasis must be placed on helping clients, whether African American or another oppressed group members, to develop,
restore, and/or enhance their individual and collective resiliency. In this context, resiliency refers to one's ability to recover from negative conditions that adversely impact an individual's or group's chances in life.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Advanced Generalist Perspective

To graduate advanced level practitioners who can independently employ empowerment oriented and strengths perspective frameworks to work with marginalized and oppressed populations within the context of a Black perspective for social work practice.

SLO 1: Identify as a Professional Social Worker

Students will identify as a professional social worker and conduct oneself accordingly.

Relevant Associations:

A score of 90 or above is considered "Distinguished" where as a score of 85-89 was "Proficient." Scores below this fall into the following classifications: 79-84 is "Satisfactory," 70-78 "Emerging," and 69 or below is "Unsatisfactory."

4 students received a rating of "Proficient" and 11 students received a rating of "Distinguished" for the Fall of 2016.

**SLO 6: Engage in Research-Informed Practice**
Students will engage in research-informed practice and practice-informed research.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 1: Field Evaluation**
80% of students will satisfactorily demonstrate all practice behaviors in the field
Source of Evidence: Field work, internship, or teaching evaluation

**Target:**
80% of students will be rated Proficient in all practice behaviors.

**Findings (2016-2017) - Target: Not Reported This Cycle**
Data were only collected as grades for the field evaluation, therefore, ratings of proficiency could not be accurately determined.

**Findings (2010-2011) - Target: Partially Met**
73.07% of MSW students achieved a rating of Proficient or higher as assessed by field instructors on the Council on Social Work Education stipulated outcome/objective(competency)---Engage in research informed and practice informed research.

**G 3: Intervention Strategies**
Graduate advanced level social workers with orientation for service that begins with prevention; can identify and incorporate protective factors and utilize the professional
relationship when assessing and intervening with diverse clients, particularly those experiencing difficult and complex challenges

**SLO 2: Apply Social Work Ethical Principals**

Students will apply social work ethical principles to guide professional practice.

**Relevant Associations:**

**DSU Learning Goal Associations:**

3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 1: Field Evaluation**

80% of students will satisfactorily demonstrate all practice behaviors in the field

Source of Evidence: Field work, internship, or teaching evaluation

**Target:**

80% of students will be rated Proficient in all practice behaviors.

Target:
80% of students will be rated Proficient in all practice behaviors.

Findings (2016-2017) - Target: Not Reported This Cycle
Data were only collected as grades for the field evaluation, therefore, ratings of proficiency could not be accurately determined.

Findings (2010-2011) - Target: Partially Met

84.2% of MSW students achieved a rating of Proficient or higher as assessed by field instructors on the Council on Social Work Education stipulated outcome/objective(competency)---Respond to contexts that shape practice.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Engage in Research-Informed Practice

Identify reason(s) for under-performance with outcome and implement teaching methods that will lead to achievement of target.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Projected Completion Date: 05/30/2011

Respond to Contexts
Faculty will take action to determine reasons for students not meeting target.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: 1. Faculty will meet with students for purpose of determining reasons for students not meeting target. 2. Faculty will meet to discuss reasons for program not meeting target and consider ways of improving student performance.
Projected Completion Date: 05/30/2011
Responsible Person/Group: Chair, MSW Program Director, MSW faculty

Aggregation of data for advanced practice 1 paper
The students have been given a breakdown of the how well they have demonstrated the competency/objective, utilized critical thinking, applied an appropriate writing style/format critique, and demonstrated a critical analysis of the assignment, using the assignment #4 rubric. However, the breakdown data has not been recorded and analyzed consistently, therefore, there is a need to collect/analyze the breakdown for all courses across the department, and report in Weave next year.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Advanced Generalist Practice Paper | Outcome/Objective: Identify as a Professional Social Worker

Implementation Description: A designated person needs to oversee the collection/analysis and entry of the data.
Projected Completion Date: 05/11/2018
Responsible Person/Group: All faculty members who teach the advanced practice courses, program evaluation, and administration, supervision and management courses are responsible to comply with data collection.
Additional Resources Requested: Permanent Chair, and administrative person to assist with coordinating data collection.

Improved field evaluation data collection and reporting
Evaluate online options for field evaluation data as a rubric format. The Director of Field will explore survey monkey and qualtrics survey platforms to secure a suitable data collection method. Also, the Director will train the field liaisons on how to evaluate the
students using the rubric and how to input data. After data collection, results will be analyzed and reported in Weave.

**Established in Cycle:** 2016-2017  
**Implementation Status:** Planned  
**Priority:** High  

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Field Evaluation  
- **Outcome/Objective:** Identify as a Professional Social Worker

**Projected Completion Date:** 05/11/2018  
**Responsible Person/Group:** Director of Field Practicum  
**Additional Resources Requested:** Purchase online survey system  
**Budget Amount Requested:** $400.00 (recurring)

Annual Report Section Responses

Executive Summary (1-2 pages)

The Social Work Department is comprised of two programs—the undergraduate program (BSW) and the graduate program (MSW). There are 9 (7 tenured and 2 non-tenured) faculty lines and 3 staff member, all vital to the operation. Two of the office staff spent a great deal of time this year on medical leave. Dr. Austin was on sabbatical in the Spring of 2018, Dr. Thomas was approved for sabbatical in Fall 2018. IN total the faculty published 5 articles, 1 book, and had 2 presentations, names of those artifacts are at the end of the report. A new chair was added half-way through the Spring semester. Through a grant and in cooperation with Health studies Dr. Franklin planned student anti-stress events. On June 11, 2018 HB 311 was signed into law providing multi-tiered licensure for social workers in the state of Delaware. This is thanks to the hard work and commitment of Dr. Marlene Saunders, Emeritus faculty, Dr. Franklin, Dr. Kingsberry and other NASW members. Field internships continue to be added as our program grows. Dr. Kingsberry was named Social Worker of the Year by the National Association of Social Workers, Delaware Chapter.

Documents for the upcoming 2020 reaccreditation began to be generated in Spring 2018.

The Department usually has approximately 150 undergraduate majors and 50 graduate students in process.

In the area of student affairs, several different areas are covered. Ten social work students (as well as two students from other majors) took an accelerated eight-week course that prepared them for an eight-day trip to Costa Rica. While there, the students visited agencies, completed service within the agencies and toured the area. The
students enjoyed the trip. As it was last year, social work practitioners from the area also went on the trip. This was planned by Dr. Kingsberry and Dr. Dottin. New internships were added. Three graduate students and four undergraduate students presented at the university research day in May.

The Director of Field Education reports that 5 of our BSW students in field placements were employed by their field placement agencies and 7 of our MSW students in field placements have been employed by their field placement agencies.

There will be a minimum of three primary objectives to be addressed by the Department's BSW and MSW Programs this coming year. These three objectives consist of the following:

1. Reviewing and revising syllabi for both programs to reflect and be in alignment with changes indicated by EPAS.
2. Reviewing and revising both programs’ assessment process and procedures to ensure compliance and alignment with the new EPAS requirements-and
3. Assuring that we meet the CSE required ratios

Two other major initiative will occur beyond the accreditation preparation, which includes making the website more manageable to navigate and make the online program more engaging.

Staff                     Position Title
Dr. Chavon Dottin         Director/Field Education
Mrs. Cherita Brown        Quality Assurance Manager & Medical Leave starting in Fall 2017, not returning to University
Ms. Shacre Bennett        Secretary                     Medical leave started Spring 2018, status pending.

Both the BSW and the MSW Programs are accredited by the Council on Social Work Education’s (CSWE) Commission on Accreditation (COA) through the year 2020. Documents for reaccreditation began to be generated in Spring 2018. The Department usually has approximately 130 undergraduate majors and 30 to 50 graduate students in process.

Unit(s) Initiatives accomplished in this cycle

There were initiatives taken during this period and several achievements realized by the Department. The initiatives and accomplishments will be presented in terms of student affairs and faculty affairs.

Students--

In the area of student affairs, several different areas are covered. Ten social work students (as well as two students from other majors) took an accelerated eight-week course that prepared them for an eight-day trip to Costa Rica. While there, the students visited agencies, completed service with agencies and toured the area. The students enjoyed the trip. Three graduate students and four undergraduate students presented at the university research day in May[MH1]. As it was last year, social work practitioners from the area also went on the trip.

Faculty-

The faculty in the department were busy with a variety of projects. Dr. Austin was on sabbatical following a research agenda while away. Dr. Thomas was approved for a sabbatical in Fall of 2017 and established a research agenda. During the spring, she published an article on transportation access for diabetes clients. Dr. Dottin published a
study on field internships. Several of the faculty attended the Council of Social Work Education Annual Program Meeting in the Fall of 2017. Dr. Franklin attended and presented at the Black Social Workers Conference and Dr. Kiesel presented at the National Association of Social Workers National Conference. Both events were held during the Spring 2018 semester. Dr. Kingsberry and Finger-Wright co-presented at a conference.

Dr. Franklin may have run the most attended program this year on campus. She and a colleague have a small grant for programming that involves wellness and health. Puppies from the SPCA arrived onto campus during finals to de-stress students, faculty and staff. It was obviously needed as there were over 400 people in attendance. Funds from this grant were also used to host a painting night. Dr. Franklin also started a graduation breakfast event that could turn into an annual tradition.

A major initiative that has taken years to build to fruition was spearheaded by multiple members of the department both current and former. On June 11, 2018 a law was signed that provides multi-tiered licensure for social workers in the state of Delaware. Delaware will be the 40th state to have multi-tiered licensure. This is thanks to the hard work and commitment of Dr. Marlene Saunders, Emeritus faculty, Dr. Franklin, Dr. Kingsberry and other NASW members.

Finally, a new Chair was hired. Dr. Kelly Ward was hired with tenure at the rank of full professor. She comes to the University after teaching and being MSW Director and BSW Director at other schools. She began March 19, 2018.

Dr. Dottin continues to uphold relationships in the community throughout the state. She offered her annual thank-you celebration, provided CEUs for various training opportunities, and continues to add placement site agencies as our needs grow.

**Unit(s) Honors/Awards and Achievements**

Dr. Kingsberry was named Social Worker of the Year by the National Association of Social Workers, Delaware Chapter. She was to be honored as a joint DESU event with NASW, but it was snowed out. A small quiet dinner to celebrate the occasion occurred later.

Dr. Kingsberry became a member of the editorial board of *Smith College Studies in Social Work*. The journal, established in 1931, is one of the oldest in the field of social work. It features articles that advance theoretical understanding of psychological and social functioning, presents clinically relevant research findings, and promote excellence in clinical practice. The journal, often viewed as a house organ to disseminate the research of students, addresses some of the most vital issues facing clinical social work practitioners. It addresses issues of mental health, therapeutic process, trauma and recovery, psychopathology, racial and cultural diversity, culturally responsive clinical practice, intersubjectivity, the influence of postmodern theory on clinical practice, community-based practice, and clinical services for specific populations of psychologically and socially vulnerable clients.

Dr. Kingsberry was invited to participate in the 2017 Leadership Program in the Holy Land from October 16-29, 2017. She was invited to attend this important leadership program because of her interest in increasing her knowledge about the conflict that has
existed between Israel and Palestine, and in Middle East Peace efforts in general. In spring 2017, she led the initiative to hold a symposium at Delaware State University that enabled over 300 undergraduate and graduate students to increase their knowledge about the historical background and current conflict between Israel and Palestine.

In November 2017 Dr. Kingsberry participated in a symposium, Managing Chronic Diseases in the Black Community: The Emerging Role of Faith Communities, entat Delaware Technical Community College. The purpose of the symposium was to raise awareness of the challenges that Black Americans who are managing chronic diseases face and to address the role that faith communities can play in helping them to better manage these diseases.

Dr. Anthony Hill was granted tenure. He also accepted a position as Director of Social Work at Winthrop University in Rock, Hill, South Carolina.

Dr. Kiesel was selected by the Associate Provost to be on interviewing committee to select the next Dean of Graduate Studies.

Dr. Thomas, Dr. Franklin, and Dr. Kiesel worked on large grants for RCMI and ACCEL. RCMI was not funded, but it is anticipated that ACCEL will be funded.

Dr. Kiesel and Dr. Hill were awarded a grant for approximately $27,000 from the State Division of Family Services for a time study regarding treatment social workers' caseloads.

Dr. Kiesel is partnering with a UD professor and doctoral student on a research project involving healthy masculinity and prevention of campus sexual assault.

Dr. Kiesel attended The Teaching Professor conference in Atlanta, 5/31-6/3.

For the first time the social work program had an online presence. Next year the focus will be on updating the course content and the components of student engagement.

Study Abroad: Costa Rica, 12 students attended, two graduate students and ten undergrads.

Employment: Administratively, the Department appointed a new Chair.

The Director of Field Education reports that 5 of our BSW students in field placements were employed by their field placement agencies and 7 of our MSW students in field placements have been employed by their field placement agencies. Preliminary information indicates that a minimum of five of the 38 BSW graduates have been admitted into graduate social work programs. At least two are admitted to Howard University School of Social Work and, to date, three have been admitted to Delaware State University's MSW Program. We had 99 Applicants to the MSW program this year.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.
The Social Work Department is currently preparing for the re-affirmation of accreditation to be completed by June 2020. In this regard, a primary concern was securing the employment of a capable Department chairperson - this was accomplished. A small group of faculty and staff (MSW Program Director and BSW Director) recently attended the CSWE Learning Academy Training Program to better understand the new 2015 Educational Policy and Standards (EPAS) for accreditation. This training highlighted the changes in policies and standards and oriented participants to processes and procedures as well as how to write a successful self-study. Two additional faculty members will be attending this training in the fall.

There will be a minimum of three primary objectives to be addressed by the Department's BSW and MSW Programs this coming year. These three objectives consist of the following:

1. Reviewing and revising syllabi for both programs to reflect and be in alignment with changes indicated by EPAS.

2. Reviewing and revising both programs' assessment process and procedures to ensure compliance and alignment with the new EPAS requirements and

Two other major initiative will occur beyond the accreditation preparation, which includes making the website more manageable to navigate and make the online program more

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? b) Have these changes been implemented? If not, when will they be implemented? c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

As the Council on Social Work Education’s Commission on Accreditation has modified process and standards around assessment, the Department will be restructuring its assessment measures and configurations to comply with the new Educational Policy and Standards (EPAS).

We will provide the assessment report which CSWE requires the program to report on its website for the Spring of 18 and Fall of 18. That data report will be ready in March of 2019. We will be reporting on students' performance in internships as reported by their field supervisors, students' performance in the classroom as reported by the faculty and the performance of student affairs (advising, registrar, student accounts and financial aid lines, as reported by students.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

NA
Mission / Purpose

The mission of the Department of Sociology and Criminal Justice is three fold:

(i) to foster in its students the sociological knowledge, skills, and aptitudes that will enable them to think critically and logically in preparation for pursuit of higher academic and professional degrees and employment in both public and private sectors.

(ii) to raise the social consciousness of students, encourage them to commit to social justice and social change, locally and globally, based on an awareness of social inequalities.

(iii) to educate students for world citizenship; for a meaningful and effective participation and functioning in a world that has, and continues to, become increasingly interconnected, by providing a broader and deeper understanding of human cultural diversity.

*Reviewed Spring 2009

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Qualified, Productive and Diverse Faculty

To recruit and retain qualified, productive and diverse faculty.

O/O 1: Faculty Qualifications

Ensure all full-time tenure-track teaching faculty have terminal degrees in Sociology and Criminal Justice.

Relevant Associations:

Strategic Plan Associations:

College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors

**Related Measures:**

**M 1: Percent of Faculty with Terminal Degrees**

Data source is Faculty Vita.

Source of Evidence: Administrative measure - other

**Target:**
100% of full-time tenure track faculty will have terminal degree in Sociology/Criminal Justice discipline.

**Findings (2016-2017) - Target: Met**
100% of tenure track faculty has terminal degrees.

**Findings (2015-2016) - Target: Met**
100% of tenure track faculty has terminal degrees.

**Findings (2014-2015) - Target: Met**
100% of tenure track faculty has terminal degrees.

**Findings (2013-2014) - Target: Not Met**
67% of tenure track faculty has terminal degrees. Two tenure track faculty starting in August 2012 did not complete doctorate (terminal degree).

**Findings (2012-2013) - Target: Not Met**
67% of tenure-track faculty have terminal degree in Sociology/Criminal Justice discipline. Three new faculty were hired in May 2012, to begin in August 2012 with terminal degree. Two of the three did not complete terminal degree by start date.

**Findings (2011-2012) - Target: Met**
100% of full-time tenure track faculty have terminal degrees in Sociology/Criminal Justice discipline.

**Findings (2010-2011) - Target: Met**
100% of full-time tenure track faculty have terminal degrees in Sociology/Criminal Justice discipline.
Findings (2009-2010) - Target: Not Met
80% of faculty members submitted all reports on 4/30/10. see attachment.

O/O 2: Faculty Matrix

Ensure that full-time tenure track faculty comprise a diverse matrix in regards to race, gender and discipline.
Ensure that full-time tenure track faculty positions are sufficient to meet the number of students in the program.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.

Related Measures:

M 2: Sufficient Faculty

Ensure sufficient faculty positions are allocated to meet student demand and to reflect professional standards related to student faculty ratios.

Source of Evidence: Professional standards

Target:
Maintain student faculty ratio comparable to Middle States accrediting standards.

Findings (2016-2017) - Target: Not Met
MSCHE recommended student faculty ratio is 20:1. DSU student faculty ratio is 15:1. DSU SCCJ department is 50:1.

Findings (2015-2016) - Target: Not Met
MSCHE student faculty ratio is 20:1. DSU SCCJ department is 45:1.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Secure additional faculty positions
Established in Cycle: 2015-2016
Current student faculty ratio is two times accreditation standard. Faculty coverage report indicates need for three new position.

**M 3: Faculty Diversity**

Ensure that faculty composition is diverse in regards to race, gender and discipline.

Source of Evidence: Administrative measure - other

**Target:**
Faculty matrix indicates diversity in regards to race, gender and discipline.

**Findings (2016-2017) - Target: Partially Met**
Faculty matrix indicates diversity in regards to gender but is in need of greater diversity in terms of race/ethnicity. Five faculty members are male and three are female. However, only two (one male and one female) are African American. Given that DSU is an HBCU, greater race/ethnic minority representation on the faculty is a hiring priority.

**Findings (2015-2016) - Target: Partially Met**
Faculty matrix indicates diversity in regards to gender but is in need of greater diversity in terms of race/ethnicity. Five faculty members are male and three are female. However, only two (one male and one female) are African American. Given that DSU is an HBCU, greater race/ethnic minority representation on the faculty is a hiring priority.

**Findings (2014-2015) - Target: Partially Met**
Faculty matrix indicates diversity in regards to gender and discipline. Half the tenure track faculty is female and half male. Of the six tenure track faculty with terminal degrees, three have Sociology degrees and three have Criminology degrees. However, only one fifth is minority. Increased diversity in regards to race/ethnicity is necessary to better match student profile and to meet the mission and goals of an HBCU.

**Findings (2013-2014) - Target: Met**
Faculty matrix indicates diversity in regards to race, gender and discipline. Half the tenure track faculty is female and half male. One third is minority. Of the four tenure track faculty with terminal degrees, two (half) have Sociology doctorate degrees and two (half) have Criminology doctorate degrees.

**Findings (2012-2013) - Target: Met**
Faculty matrix indicates diversity in regards to race, gender and discipline. Half the tenure track faculty is female and half male. One third is minority. Of the four tenure track faculty with terminal degrees, two (half) have Sociology doctorate degrees and two (half) have Criminology doctorate degrees.

**Findings (2011-2012) - Target: Not Reported This Cycle**
Due to continued vacancies during academic year objective could not be accurately accessed.
**Findings (2010-2011) - Target: Not Met**  
Due to vacancies in three full-time tenure track positions, matrix data is incomplete and objective can not be assessed.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Faculty Composition**  
*Established in Cycle: 2014-2015*  
During faculty searches and hiring, ensure that faculty meet the needs of students. Continue to recruit strategically, including...

**O/O 3: Faculty Publications**  
Promote publication of scholarly work by faculty members.

**Relevant Associations:**

**Strategic Plan Associations:**

*College of Arts, Humanities, & Social Sciences*

1. Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University

**Related Measures:**

**M 4: Submit and Publish Scholarly Articles**

Data source is Faculty Vita

Source of Evidence: Administrative measure - other

**Target:**
Each faculty member who has not reached full professor status to submit one scholarly work or publish a scholarly work each academic year.

**Findings (2016-2017) - Target: Partially Met**
All faculty, regardless of rank, have worked on scholarly publications. Two of faculty had work accepted for publication or published during the academic year for a total of five scholarly publications (three peer reviewed journal articles and two book reviews).

**Findings (2015-2016) - Target: Partially Met**
All faculty, regardless of rank, have worked on scholarly publications. Four (50%) of faculty had work accepted for publication or published during the academic year for a total of five scholarly publications.

**Findings (2014-2015) - Target: Partially Met**
Half of the faculty members who have not achieved full professor rank submitted scholarly publications.
Findings (2013-2014) - Target: Partially Met
Two of the four faculty members who have not achieved full professorship published scholarly work.

Findings (2012-2013) - Target: Partially Met
Two of the four faculty members who have not achieved full professorship published scholarly work.

Findings (2011-2012) - Target: Not Met
No faculty published scholarly articles this academic year due to teaching demands resulting from full-time faculty position vacancies. Two faculty, however, submitted articles for publication.

Findings (2010-2011) - Target: Met
100% of non tenured full-time faculty published scholarly work during the academic year.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Increase submission of scholarly work (Secondary KPI#13)
Established in Cycle: 2012-2013
Faculty who have not achieved full professor status to submit at least one scholarly work for publication each year.

O/O 4: Faculty Research
Promote faculty research by submitting proposals and conducting non-sponsored research.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
3 Create a model of scholarly research for all full time faculty.

Related Measures:

M 5: Faculty Research Activity
Faculty Vitea, grant proposals and award notices.
Source of Evidence: Administrative measure - other

Target:
All tenure track faculty and full professors will be involved in research activities.
Findings (2016-2017) - Target: Partially Met
All faculty are involved in research. Three proposals were submitted for external funding.

Findings (2015-2016) - Target: Partially Met
All faculty are involved in research. One proposal was submitted for federal funding. Two faculty conducted project evaluations for other agencies or units.

Findings (2014-2015) - Target: Met
100% of faculty report research activity. None of the current research is externally funded.

Findings (2013-2014) - Target: Partially Met
Four of the six faculty reported research activity.

Findings (2012-2013) - Target: Partially Met
Four of the six faculty reported research activity.

Findings (2011-2012) - Target: Not Met
Due to teaching demands and faculty vacancies, faculty unable to develop research grants.

Findings (2010-2011) - Target: Met
Dr. Dillard submitted a proposal to the National Institute of Justice in March 2010.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Increase funded research activities (KPI #6)
All faculty are involved in research activities; however, none of the research is supported with funding. Increasing funded res...

O/O 5: Faculty Service
To maintain faculty participation in University and community service work.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University

Related Measures:

M 6: Faculty Participation in University and Community Service Work
Data Source Faculty Vitea

Source of Evidence: Academic direct measure of learning - other

**Target:**
Each full-time faculty member to participate in at least one Department committee and one University or College committee.

**Findings (2016-2017) - Target: Met**
All faculty participate in department and University committees. In total, faculty provides service to 23 organizations and committees.

**Findings (2015-2016) - Target: Met**
All faculty participate in department and University committees.

**Findings (2014-2015) - Target: Met**
100% of tenure track faculty participate in Department and University committees. Faculty members participate in three or more committees.

**Findings (2013-2014) - Target: Met**
100% of full-time faculty involved in at least one Department and at least one University committee.

**Findings (2012-2013) - Target: Met**
100% of full-time faculty involved in at least one Department and at least one University committee.

**Findings (2011-2012) - Target: Met**
100% of full-time faculty members participated in at least one Department committee and one University or College committee. Each full-time Department faculty served on at least three (3) Department committees AND three (3) University or College committees.

**Findings (2010-2011) - Target: Met**
100% of full-time faculty participated in at least one Department and one University or College committee. On average, faculty participated in three Department and 3 University/College committees.

**G 2: Relevant and Credible Curricula**

To develop and offer relevant and credible curricular comprised of courses and other activities designed to prepare students for the work place and/or graduate/professional school.

**O/O 6: Curricula Development**

Implement a process to continually review and revise curricula to ensure relevancy and credibility.
Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
  2 Provide high quality instruction which meets the needs of all majors within
  the College of Arts, Humanities and Social Sciences and the General
  Education Requirements for all non-majors

Related Measures:

M 7: Revise Curricula
External review and self study findings indicate need for curricula revisions.

Source of Evidence: Administrative measure - other

Target:
Improve curriculum based on findings from student learning assessment,
changes in University, and/or changes in discipline.

Findings (2016-2017) - Target: Met
The department curriculum committee continued their work to strengthen
the course offerings of the department. Three new courses were
developed and approved. In addition, sociology and criminal justice
curriculum were revised to reflect previous changes and allow students
to better tailor their courses.

Findings (2015-2016) - Target: Met
The department Curriculum Committee revised course descriptions and
pre-requisites as a strategy to increase student adherence to the
curriculum and to improve student learning.

Findings (2014-2015) - Target: Partially Met
The Department Curriculum committee met regularly this academic year.
The committee proposed three additional 300/400 level Sociology and
Criminal Justice courses. The proposed courses reflect new faculty
expertise and research as well as better prepare students for graduate
school. However, student learning assessment findings suggest the
need to improve courses and strengthen curriculum impact on writing,
information literacy, and critical thinking.

Findings (2013-2014) - Target: Not Met
Due to faculty coverage issues, the Department Curriculum Committee
was not active during 2013-2014. Curricula revisions identified in the
Action Plan have not been addressed.

Findings (2012-2013) - Target: Met
Curricula revised in 2010 based on recommendations made in external
and internal program reviews. Student learning outcomes, syllabi and
curricula maps revised accordingly in 2012-2013. Assessment of student
learning goals and objectives indicate additional curriculum
development. See Sociology and Criminal Justice program Action Plans for specifics.

**Findings (2011-2012) - Target: Partially Met**
New program curricula used for incoming freshman (2011-2012). Curricula revisions require program goal and student learning outcome revisions.

**Findings (2010-2011) - Target: Met**
Curricula changes made and approved May 2011.

**G 3: Instructional Technology and Resources**
To develop and maintain technology and other instructional resources designed to supplement and support teaching.

**O/O 7: Technology and Instructional Resources Improvement**
Ensure that technology and other instructional resources are adequate to effective quality teaching and learning.

**Relevant Associations:**

**Strategic Plan Associations:**
*College of Arts, Humanities, & Social Sciences*
  2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors

**Related Measures:**

**M 8: Technology and Instructional Resource Capacity**
Inventory of instructional resources, including projectors, Smartboards, TV/DVD players.
Source of Evidence: Administrative measure - other

**Target:**

100% of classrooms meet minimum standards of technology and instructional resource capacity. Professors have access to technology to present powerpoint presentations and to show DVDs.

**Findings (2016-2017) - Target: Not Met**

Class rooms meet minimal technology standards. Functional Smart boards are needed in 3 class rooms in Delaware Hall.

**Findings (2015-2016) - Target: Not Met**

Class rooms meet minimal technology standards. Functional Smart boards are needed in 3 class rooms in Delaware Hall.

**Findings (2014-2015) - Target: Partially Met**

Class rooms meet minimum technology standards. One new class room was developed and is fully equipped with a Smart Board. Additional class rooms need to be equipped with Smart Boards.

**Findings (2013-2014) - Target: Partially Met**

Faculty have been trained on Smart class room technology. However, Department continues to lack sufficient laptops, projectors and Smart class rooms.

**Findings (2012-2013) - Target: Partially Met**

One class room was converted to a Smart class room. Faculty have not been trained on the class room. Department continues to lack sufficient laptops, projectors and Smart class rooms.

**Findings (2011-2012) - Target: Not Met**

No improvements to class room technology and instructional resource capacity made this year. Class rooms continue to be below resource expectation. Department continues to lack instructional technology including projectors, laptops, and Smartboards.

**Findings (2010-2011) - Target: Not Met**

Faculty share two TV/DVD players. There are zero projectors and no capacity to provide power point presentations. There are zero classrooms in Delaware Hall with Smartboards.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Instructional Technology**

*Established in Cycle:* 2014-2015

The remaining two class rooms in DH without instructional technology have not been equipped with functional smart boards.
G 4: Student Practical Experiences

To increase employability by providing opportunities to improve workplace skills through activities and experiences outside the classroom.

O/O 8: Develop and Increase Internship Opportunities
Continue to develop new internship opportunities. Maintain current internship relationships.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
   2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors

Related Measures:

M 9: Increase Student Internship Opportunities
Increase the number of new student internship opportunities each year by at least one new opportunity.

Source of Evidence: Administrative measure - other

Target:
Increase the number of student internship options by at least one each academic year.

Findings (2016-2017) - Target: Met
The Internship instructor continues to seek and develop additional internships. During 2016-1017 an additional internship course was added to the curriculum.

Findings (2015-2016) - Target: Met
The Internship instructor continues to seek and develop additional internships. New Internships were developed with federal law enforcement agencies, including ICE and Border Patrol. The department chair created an Internship - Career connection document which highlights testimonials about their internship experience from graduates. The document is on the web page, provided to students in the Internship course and to students in University Seminar. It underscores the importance of the internship and provides ideas on where to intern and how to use it as a bridge to gainful employment in the field.

Findings (2014-2015) - Target: Met
No new internship opportunities were developed. Sufficient internships agreements have been developed. This objective needs to be revised.

Findings (2013-2014) - Target: Met
Two new internship opportunities were established, including an
internship agreement with Connections CSP, Inc. Four students participated in the WISH program in DC. One student was selected for the WISH Intern Spotlight.

Findings (2012-2013) - Target: Met
Three new internships were initiated. A court observation project for students evolved into ongoing internship opportunities with the Delaware court system. A graduating senior secured an internship with the Federal Court system through this project. A formal partnership with WISH, a Washington DC based internship coordinating agency, was initiated and four students have been identified to participate in that program in Spring 2014. Internship opportunities with Stevenson House were established.

Findings (2011-2012) - Target: Met
Four new internship opportunities were established this academic year. Two of the new internship opportunities provided students with undergraduate research experience. Six students participated in these new internship opportunities.

Findings (2010-2011) - Target: Met
Internship relationship with Delaware Department of Correction and Delaware Department of Probation and Parole was renewed. Twelve students completed internships with these two agencies. Three new internship opportunities were established with Middletown Police Department, Brandywine Counseling and Community Services and Delaware Domestic Violence Coordinating Counsel. Three students completed internships with these agencies.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Revisit Internship objective
Linking students to meaningful internships that lead to professional employment is a key aim of the department and KPI #1. Now ...

O/O 9: Support Sociology and Criminal Justice Club
Continue to support student facilitated Sociology and Criminal Justice Club by providing a faculty sponsor and assisting with activities.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.

Related Measures:
M 10: Support Sociology and Criminal Justice Club
Data sources: Club Minutes and Resources provided to Club (e.g. List of Professional Contacts).

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
Department to provide faculty sponsor for Club. Faculty sponsor to provide resources and assistance as requested.

**Findings (2016-2017) - Target: Met**
Department continues to support the Sociology and Criminal Justice Club. Club meetings and activities will be included on the department web page which is being redesigned.

**Findings (2015-2016) - Target: Met**
Department continues to support the Sociology and Criminal Justice Club. Club meetings and activities will be included on the department web page which is being redesigned.

**Findings (2015-2016) - Target: Met**
Department continues to support the Sociology and Criminal Justice Club.

**Findings (2014-2015) - Target: Met**
Department continues to support Sociology and Criminal Justice club.

**Findings (2013-2014) - Target: Met**
Department continues to provide support to the Sociology/Criminal Justice Club.

**Findings (2012-2013) - Target: Met**
Department continues to provide support to the Sociology and Criminal Justice Club.

**Findings (2011-2012) - Target: Met**
Department continues to provide a faculty sponsor to the Sociology and Criminal Justice Club. Faculty sponsor assisted with arranging guest speakers and a trip.

**Findings (2010-2011) - Target: Met**
Department provides faculty sponsor. Department provided club officers with a professional contact list of potential speakers. Faculty assisted club officers in hosting speakers and scheduling events.

**O/O 10: Increase Student Volunteer Opportunities**

Continue to seek and publicize volunteer opportunities for students.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Arts, Humanities, & Social Sciences
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors

**Related Measures:**

**M 11: Student Volunteer Options**

Increase student volunteer options.

Source of Evidence: Administrative measure - other

**Target:**

Develop at least one new volunteer option each academic year.

**Findings (2016-2017) - Target: Met**

The department continues to advertise and encourage volunteer opportunities for students. The department web page, currently being redesigned, will include volunteer options.

**Findings (2015-2016) - Target: Met**

The department continues to advertise and encourage volunteer opportunities for students. The department web page, currently being redesigned, will include volunteer options.

**Findings (2014-2015) - Target: Met**

Volunteer opportunities are publicized and students are encouraged to participate.

**Findings (2013-2014) - Target: Met**

Volunteer options are distributed continuously and students are encouraged to participate.

**Findings (2012-2013) - Target: Met**

Two new volunteer opportunities were initiated this academic year with DSU preschool program and with a Milford based social service program.

**Findings (2011-2012) - Target: Met**

Two new volunteer opportunities were established; one with Apex and one with Homeless Coordinating Council.

**Findings (2010-2011) - Target: Met**

Two new volunteer options were developed: Whitney's Lights and Contact Lifeline.

**G 5: Reputable and Competitive Department**

Develop and maintain a reputable and competitive Department.
O/O 11: Increase Retention Rates
To increase retention rates.

**Related Measures:**

**M 12: Increase Retention Rates**
IR Data/Dept. Data

Source of Evidence: Administrative measure - other

**Target:**
Increase retention rate by 5% each year.

**Findings (2015-2016) - Target: Partially Met**
The department developed an Instructor and Retention Specialist position. Preliminary findings show a slight increase, 2.5%, in the retention rate for freshman from fall to spring, indicating the position is effective. Accurate freshman to sophomore retention rate not yet available.

**Findings (2014-2015) - Target: Met**
The department retention rate was 78.5%, a 12.5% increase from 2013-2014. The department developed a new position, Instructor and Retention Specialist, designed to improve the retention rate. The position was filled and the impact on the retention rate will be assessed in May 2016.

**Findings (2013-2014) - Target: Not Reported This Cycle**
Accurate Department retention data has not been provided by Institutional Research. Objective could not be assessed.

**Findings (2012-2013) - Target: Not Reported This Cycle**
Accurate Department retention data has not been provided by Institutional Research. Objective could not be assessed.

**Findings (2011-2012) - Target: Not Reported This Cycle**
Accurate Department Retention Rate has not been provided by Institutional Research. Objective could not be assessed.

**Findings (2010-2011) - Target: Not Met**
Department Retention Rate is unknown so objective could not be assessed.

**Related Action Plans (by Established cycle, then alpha):**

**O/O 12: Improve Graduation Rates**

Continue to improve graduation rates.

**Related Measures:**

**M 13: Increase Graduation Rates**
IR Data/Dept. Data

Source of Evidence: Administrative measure - other

**Target:**
Increase 4 year graduation rate by 5% each year.

**Findings (2016-2017) - Target: Partially Met**
A total of 70 students graduated during the 2016-2017 academic year (66 criminal justice and 4 sociology). Final graduation rate not available until September.

**Findings (2015-2016) - Target: Partially Met**
Final graduation rate not available until September.

**Findings (2014-2015) - Target: Partially Met**
The target was revised from a 5-year rate to a 4-year rate to match KPI #3 and IR data. The baseline 4-year graduate rate was provided in August 2014 and is 30%. The 2014-2015 4-year graduation rate is 31%.

**Findings (2013-2014) - Target: Not Reported This Cycle**
Accurate graduate rate for all majors in a five year period not provided by Institutional Research. Objective not assessed. However, 56 of the 62 seniors applying for graduation graduated for a graduation rate of 90%.

**Findings (2012-2013) - Target: Not Reported This Cycle**
Accurate graduate rate not provided by Institutional Research. Objective not assessed.
**Findings (2011-2012) - Target: Not Reported This Cycle**
Accurate Department Graduation Rate has not been provided by Institutional Research. Objective could not be assessed.

**Findings (2010-2011) - Target: Not Met**
department Graduation Rate is unknown so objective could not be assessed.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Increase Graduation Rate**
*Established in Cycle: 2010-2011*

Develop a departmental plan to improve graduation rates.

**Update Graduation Rate**
*Established in Cycle: 2015-2016*
Accurate data not available until September.

**O/O 13: Increase Graduate and Professional School Application**
To increase the number of students applying for professional/graduate schools.

**Related Measures:**

**M 15: Increase Student Professional/Graduate School Application**
Data Source: Senior Survey and updates from graduates.

Source of Evidence: Administrative measure - other

**Target:**
At least 25% of graduating seniors apply for graduate or professional school.

**Findings (2016-2017) - Target: Partially Met**
16% of graduating seniors applied for graduate or law school and 34% plan to apply in the future.

**Findings (2015-2016) - Target: Met**
26% of graduating seniors applied for graduate or law school and 13% were accepted prior to DSU graduation.

**Findings (2014-2015) - Target: Partially Met**
15% of graduating seniors applied for graduate school and 12% were accepted. This represents a 4% increase in the number of graduates applying for graduate/professional school and an 8% increase in the number of graduates accepted into graduate school.

**Findings (2013-2014) - Target: Not Met**
Only 11% (6 of the 56 graduating seniors) applied for graduate school. Two were accepted prior to graduation.
Findings (2012-2013) - Target: Met
Thirty-eight (38) of the 40 seniors in the Class of 2013 completed a survey for a completion rate of 95%. Thirteen (33%) of the seniors plan to attend graduate school or law school Fall 2013. All of them had completed applications to at least one school.

Findings (2011-2012) - Target: Partially Met
39 of the 40 seniors completed a senior survey for a 98% survey completion rate. 14 (36%) indicated that they would be attending graduate or law school in the Fall 2012. Of that 14, 7 (18%) have been accepted to graduate or law school.

Findings (2010-2011) - Target: Not Met
According to the Senior Survey responses, only about 12% of graduating seniors applied for graduate or professional school admission.

Related Action Plans (by Established cycle, then alpha):

Established in Cycle: 2010-2011
Academic advisors encourage and, where appropriate, assist juniors and seniors with graduate and professional school application...

Criminal Justice Master's Degree Program
Established in Cycle: 2010-2011
Continue to track need for a CJ Master's Degree program.

O/O 14: Increase Graduate Employment Rate
Continue to increase percentage of students employed in professional jobs upon graduation.

Related Measures:

M 16: Increase Graduate Job Placement
Increase Percentage of Students with Field Related Jobs Upon Graduation
Data Source: Dept. Senior Survey

Source of Evidence: Administrative measure - other

Target:
Increase employment rate by 5% each year.

Findings (2016-2017) - Target: Not Met
24% of graduating seniors not planning on attending graduate or law school in Fall 2016 had accepted a professional position in their discipline. This is a 5% decrease from the previous year.
Findings (2015-2016) - Target: Met
29% of graduating seniors not planning on attending graduate or law school in Fall 2016 had accepted a professional position in their discipline. This is a 5% increase from last year.

Findings (2014-2015) - Target: Met
24% of graduating seniors were employed in their discipline at the time of graduation, representing an 8% increase from the previous year.

Findings (2013-2014) - Target: Met
Nine of the 56 graduates obtained professional employment at the time of graduation. The employment rate for the 2014 graduating class was 16% (a 9% increase from the previous year).

Findings (2012-2013) - Target: Not Met
Fifteen of the 27 (56%) seniors not going to graduate or law school submitted employment applications. Only one (7%) had a job offer, down from 25% the previous year.

Findings (2011-2012) - Target: Partially Met
Of the 33 graduating seniors not accepted into graduate or law school for the Fall 2012, 8 (25%) have employment in a discipline related job upon graduation.

Findings (2010-2011) - Target: Not Met
Current job placement rate is unknown so objective could not be assessed.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Increase graduating senior job application rate (KPI #2)
Established in Cycle: 2012-2013
Advisors to work with graduating seniors to increase job application rate. Increase emphasis on job application and resume prep...

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continue Review
Continue review.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Develop Committee for Criminal Justice Program
Develop Committee by Spring 2011.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** High

**Implement an Assessment Process to Prepare Students for Graduation**
1a. Revise Benchmarks  
1b. Improve data collection process

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** High

**Increase Job Placement Upon Graduation**
Improve data collection process.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** High  
**Projected Completion Date:** 08/31/2010

**Seek University Resources and Support for Technology in Classrooms**
Continue to seek University Support and resources to improve technology in classrooms.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** High  
**Projected Completion Date:** 08/31/2010

**Technology Capability in Classrooms**
Continue to seek University support and resources to improve technology in classrooms.
Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Technology and Instructional Resource Capacity | Outcome/Objective: Faculty Matrix

Projected Completion Date: 08/31/2010

**Advise Juniors and Seniors on Graduate/Professional School Application**
Academic advisors encourage and, where appropriate, assist juniors and seniors with graduate and professional school application.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Increase Student Professional/Graduate School Application | Outcome/Objective: Increase Graduate and Professional School Application

Implementation Description: Increase emphasis on graduate and professional school application in academic advising efforts.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Academic Advisors
Additional Resources Requested: None

**Criminal Justice Master's Degree Program**

Continue to track need for a CJ Master's Degree program.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Low

Relationships (Measure | Outcome/Objective):
  Measure: Increase Student Professional/Graduate School Application | Outcome/Objective: Increase Graduate and Professional School Application

Implementation Description: Track market need and student need for a CJ Master's Degree program. Track meeting need with current MPA program and planned Forensic Science master's degree program.
Projected Completion Date: 05/24/2016
Responsible Person/Group: Chair
Additional Resources Requested: None

Increase Graduation Rate

Develop a departmental plan to improve graduation rates.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Increase Graduation Rates | Outcome/Objective: Improve Graduation Rates

Implementation Description: Faculty to develop a plan to improve graduation rates.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Department Assessment Chair
Additional Resources Requested: None

Increase Retention Rate (KP #4)

An Instructor and Retention Specialist position was developed and filled. The responsibilities of this position are aimed at improving the department retention rate. Preliminary data show a slight increase (2.5%) in the retention rate. The first year report is under development. Additional action plans will be included based on the findings of the first year report.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Increase Retention Rates | Outcome/Objective: Increase Retention Rates

Implementation Description: Instructor and Retention Specialist to develop and implement activities to improve retention rate.
Projected Completion Date: 10/01/2016
Responsible Person/Group: Instructor and Retention Specialist with support and assistance from Chair and faculty.
Additional Resources Requested: None
Curriculum Development
Assessment of student learning goals and objectives indicated need for additional curriculum development. Department Curriculum Committee to review Sociology and Criminal Justice Action Plans and address curricula needs.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Revise Curricula | Outcome/Objective: Curricula Development

Implementation Description: Department Curriculum Committee to review Sociology and Criminal Justice Action Plans and address curricula needs.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Curriculum Committee
Additional Resources Requested: None

Increase graduating senior job application rate (KPI #2)
Advisors to work with graduating seniors to increase job application rate. Increase emphasis on job application and resume preparation in the Internship course.

Established in Cycle: 2012-2013
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Increase Graduate Job Placement | Outcome/Objective: Increase Graduate Employment Rate

Implementation Description: Advisors to work with graduating seniors to increase job application rate.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Academic Advisors and Internship Instructor
Additional Resources Requested: None

Increase submission of scholarly work (Secondary KPI#13)
Faculty who have not achieved full professor status to submit at least one scholarly work for publication each year.

Established in Cycle: 2012-2013
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Submit and Publish Scholarly Articles | Outcome/Objective: Faculty Publications

Implementation Description: Individual faculty to develop professional development plan emphasizing publication submission. Chair will work with faculty to develop professional development plans and to support activities aimed at publication submission.
Projected Completion Date: 05/31/2017
Responsible Person/Group: Individual faculty and Chair
Additional Resources Requested: None

Support CAHSS MPA Program
Work with CAHSS to develop and implement MPA program

Established in Cycle: 2013-2014
Implementation Status: Planned
Priority: Medium
Implementation Description: Chair to represent Department on development and implementation of MPA program
Projected Completion Date: 05/31/2015
Responsible Person/Group: Chair

Faculty Composition
During faculty searches and hiring, ensure that faculty meet the needs of students. Continue to recruit strategically, including continuing to advertise with the Black Doctoral Network.

Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Faculty Diversity | Outcome/Objective: Faculty Matrix

Projected Completion Date: 08/26/2016
Responsible Person/Group: Search Committee members and Chair
Additional Resources Requested: None

Increase funded research activities (KPI #6)
All faculty are involved in research activities; however, none of the research is supported with funding. Increasing funded research activities is a priority for the department and supports KPI #6.

Implementation Status: In-Progress
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Faculty Research Activity  |  **Outcome/Objective:** Faculty Research

**Implementation Description:** Faculty to include activities to seek funded research in professional development plans. Chair to support activities to seek funding.

**Projected Completion Date:** 05/31/2017

**Responsible Person/Group:** Individual faculty supported by Chair.

### Instructional Technology

The remaining two class rooms in DH without instructional technology have not been equipped with functional smart boards.

**Established in Cycle:** 2014-2015

**Implementation Status:** Planned

**Priority:** Low

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Technology and Instructional Resource Capacity  |  **Outcome/Objective:** Technology and Instructional Resources Improvement

**Projected Completion Date:** 05/31/2017

**Responsible Person/Group:** Vince Ciammaichelli

### Revise Internship objective

Linking students to meaningful internships that lead to professional employment is a key aim of the department and KPI #1. Now that the department has established a strong and stable internship network, the Curriculum Committee needs to revise the objective to better meet KPI #1.

**Established in Cycle:** 2014-2015

**Implementation Status:** Planned

**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Increase Student Internship Opportunities  |  **Outcome/Objective:** Develop and Increase Internship Opportunities

**Implementation Description:** Curriculum Committee will draft a revised internship objective and will propose it to the department faculty.

**Projected Completion Date:** 05/31/2017

**Responsible Person/Group:** Curriculum Committee

**Additional Resources Requested:** None
Curriculum changes related to University and discipline changes

Both the sociology and criminal justice curriculum need to be changed to reflect the elimination of several math courses. Curricula will also be reviewed and changed to reflect changes in discipline.

Established in Cycle: 2015-2016
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Revise Curricula | Outcome/Objective: Curricula Development

Implementation Description: Curriculum committee will propose changes by November 2016. Faculty will vote on changes and submit to College Curriculum Committee by December 2016. Changes will be submitted to Faculty Senate by January 2017.
Projected Completion Date: 01/15/2017
Responsible Person/Group: Curriculum Committee

Secure additional faculty positions

Current student faculty ratio is two times accreditation standard. Faculty coverage report indicates need for three new positions, including the new position approved and search undertaken in 2015-2016. At a minimum, the vacancy created by Dr. Pagnucco's resignation needs to be filled.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Sufficient Faculty | Outcome/Objective: Faculty Matrix

Implementation Description: Chair will secure permission to fill current vacancy.
Projected Completion Date: 05/31/2017
Responsible Person/Group: Chair
Additional Resources Requested: Advertising and interviewing costs
Budget Amount Requested: $0.00 (no request)

Update Graduation Rate

Accurate data not available until September.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Increase Graduation Rates | Outcome/Objective: Improve Graduation Rates

Implementation Description: Chair of Assessment Committee to request IR data and update WEAVE findings in September.
Projected Completion Date: 11/01/2016
Responsible Person/Group: Chair Assessment committee

Update Retention Rate
IR retention data not accurate until after Fall 2016 no show (September).

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Increase Retention Rates | Outcome/Objective: Increase Retention Rates

Implementation Description: Chair Assessment committee to request IR data and update WEAVE findings September 2016.
Projected Completion Date: 11/01/2016
Responsible Person/Group: Chair Assessment Committee

Annual Report Section Responses

Executive Summary (1-2 pages)

Unit(s) Profile

Department of Sociology and Criminal Justice Unit Profile 2017-18

Faculty: For the 2017-18 academic year, the Sociology and Criminal Justice department was comprised of:

One (1) Professor (Dr. Lee Streetman)

Three (3) Associate Professors (Dr. Dorothy Dillard, Dr. Kylie Parrotta, and Dr. Laurin Parker)

Three (3) Assistant Professors (Dr. John Balzarini, Dr. Kevin Ralston, and Dr. Anwar Ouassini)

One (1) Lecturer II/Retention Specialist (Mr. Benjamin Shamburger)

Four (5) adjuncts (Dr. Raymond Tutu, Mr. Gregory Babowal, Mr. Jerry Hopkins, Dr. Iiasha Price, and Ms. Jennifer Snyder)
**Support Staff:** The department has one administrative secretary serving 324 students and 8 faculty and 5 adjunct instructors.

**Students:** The department serves 324 students with 30 Sociology majors and 294 Criminal Justice majors. During the academic year, 10 students left the department for other majors and 15 changed their major to either Criminal Justice or Sociology. The number of majors for both programs continues to increase. The department shows a net gain of 21 majors for this academic year compared to last academic year. The student to faculty ratio is 41:1. The department student to faculty ratio has increased and is two and a half times greater than the DSU average student to faculty ratio and two times higher the MSCHE recommended ratio. The Department continues to struggle to meet student demand for required courses and, thus, ensure timely program completion.

**Unit(s) Honors/Awards and Achievements**

Dr. Kylie Parrotta earned the Teaching Excellence Award.

Dr. Dorothy Dillard was nominated by Governor Carney and confirmed by the Senate to serve on the Board of Parole.
Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

In addition to the standard measures assessed annually, three additional activities will be the focus of assessment: ACUE's Effective Teaching Course, QEM Initiative, and ePortfolios. Faculty participating in the ACUE Effective Teaching Course will update faculty on new teaching strategies employed and will assess their impact on student learning. The DSU QEM team will provide a report on initiatives and their impact on improving student learning, student opportunity, and the development of a Master’s program. The Assessment Committee will assess the development and the implementation of ePortfolios.

"KPI #1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

Five students participated in research activities guided by faculty. Four students worked with the faculty advisor for NOBLE to collect and analyze survey responses from Town Hall meetings. One student worked with the Department Chair conducting literature research for a grant proposal.

56 students completed the required internship course and 14 students completed an additional internship. Students interned in a wide range of agencies, including the Lt. Governor’s Office, police departments, US federal law enforcement agencies, Delaware government agencies, social service agencies, and law firms. One CJ student was selected for the premiere Barclay’s internship.

Excel spreadsheet with detailed information submitted separately.

**Closing the Assessment Loop**: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.  
  a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  
  b) Have these changes been implemented? If not, when will they be implemented?  
  c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

The Department of Sociology and Criminal Justice systematically examines student learning by assessing the student learning objectives annually. The findings are discussed and areas of improvement are identified. The student learning objectives assessment findings are supplemented by additional student learning assessment initiatives undertaken by individual faculty members. Based on the 2016-2017 academic program student learning assessment findings and the department assignment findings reported in WEAVE, an Action Plan was developed. The Action Plan guided the work of the department during the 2017-2018 academic year. Allowing the Action Plan to guide the department’s activities ensured that department goals were achieved. For more detailed information on the work of the department, see the Action Plan below and the Unit Initiatives discussed above under #3.
At the first faculty meeting of the year, faculty review the previous year’s action plan, focusing on status at end academic year for each action item. The student learning assessment data and the annual report are also reviewed. In 2011, the Department initiated an effort, the Pre/Post Academic Program Evaluation, to assess impact of the academic program on student learning. The evaluation compares level of skill and knowledge across the key performance indicators including the University ADCS assessment. At the end of the sophomore level writing course (Writing in the Major SCCJ 200), the instructor assess students' skills and abilities using the ADSC Senior Capstone rubric. Sociology and criminal justice sophomores are assessed as if they were seniors, providing a baseline measure of skills and abilities prior to involvement in the academic program. This assessment is the pre academic program measure. The sociology and criminal justice majors are assessed as seniors using the same rubric. This assessment is the post academic program measure. The 2016-17 report is attached.

Based on the information from these sources, a new Action Plan is developed with goals for the academic year. For 2017-18, 14 action items were identified, 7 high priority, 6 medium priority, and 1 one low priority. Information to assess status of two of the action items were not available at the time of this report; however, the Department made progress on each of the other action items. Most importantly, progress is evident on the two area of greatest concern, hiring additional faculty and improving transfer of knowledge. The Department was approved to hire an additional tenure-track CJ faculty member and aims to hire before Fall 2018. The Department also made significant progress in developing the format and process for ePortfolios. Activity and status on all the action items are summarized on the attached Action Plan.

Detailed Assessment Report
As of: 9/27/2018 12:26 PM EST
2017-2018 Sociology (B.A.)
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Sociological Perspective

Students will develop and use a sociological perspective to understand and assess society and social problems.

SLO 1: Define Theories

Students will be able to define the primary sociological theories.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 1: Grade on assignment defining theories in Sociological Theories Course

Grade on assignment defining sociological theories in Sociological Theories course.

Source of Evidence: Academic indirect indicator of learning - other

Target:
At least 90% of students will make a C or better on the assignment defining theories.

Findings (2016-2017) - Target: Met
92% of students made a C or better on the assignment defining theories. This is the second cycle using a direct measure for the SLO and is a 4% increase from the previous year.
Findings (2015-2016) - Target: Partially Met
88% of students made a C or better on the assignment defining theories.
This is the first cycle using a direct measure for the SLO.

Findings (2014-2015) - Target: Met
95% of students made a C or better in the Sociological Theories course.
This measure will be revised to a direct measure in the 2015-2016 cycle.

Findings (2013-2014) - Target: Met
92% of students made a C or better in the Sociological Theories course.

Findings (2012-2013) - Target: Not Met
87% of students made a C or better in the Sociological Theories course.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Improve student ability to define sociological theories
Established in Cycle: 2015-2016
88% of students made a C or better on the assignment defining sociological theories.

SLO 2: Use Theories

Students will be able to use sociological theories to explain social phenomena.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 2: Capstone Theoretical Perspective

Rating on Theoretical Perspective element of the Capstone Research Paper Grading Rubric. Capstone assignment is to write a critical argument explaining a sociological issue using a sociological theoretical perspective.

Source of Evidence: Capstone course assignments measuring mastery

Target:
At least 90% of students will receive an adequate or better rating on the Theoretical Perspective element of the Capstone Research Paper Grading Rubric.
Findings (2016-2017) - Target: Met
93% of students received an adequate or better rating on the Theoretical Perspective element of the Capstone Research Paper Grading Rubric, representing a 3% improvement on this measure from the previous year.

Findings (2015-2016) - Target: Met
90% of students received an adequate or better rating on the Theoretical Perspective element of the Capstone Research Paper Grading Rubric, representing a 3% improvement on this measure.

Findings (2014-2015) - Target: Partially Met
87% of students adequately developed and used a theoretical perspective in their capstone papers. Although this finding does not meet the target, it is a 5% increase from the previous year.

Findings (2013-2014) - Target: Not Met
Only 82% of students adequately developed and used a theoretical perspective in their capstone papers.

Findings (2012-2013) - Target: Not Met
Only 80% of students received an adequate or better rating on the Theoretical Perspective element of the Capstone Research Paper Grading Rubric.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Improve Use of a Theoretical Perspective
Established in Cycle: 2012-2013

Ability to adequately develop and use a theoretical perspective has increased steadily over the past 5 years, it is still belo...

SLO 3: Develop a Critical Argument

Students will be able to develop a critical argument using a sociological perspective to explain and assess social phenomena.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:
M 3: Capstone Research Paper Grade
Grade on the capstone research paper. Capstone assignment is to write a critical argument explaining a sociological issue and its impact.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
At least 90% of students will receive a C or better on their final capstone research paper.

**Findings (2016-2017) - Target: Met**
100% of students received a C or better on their final capstone research paper. This is an 8% increase from the previous year.

**Findings (2015-2016) - Target: Met**
92% of students received a C or better on their final capstone research paper. This represents a notable improvement with a 10% increase. The improvement is most likely due to the sophomore writing course as well as increased writing assignments across the curriculum.

**Findings (2014-2015) - Target: Not Met**
Only 82% of students received a C or better on their final capstone research paper.

**Findings (2013-2014) - Target: Met**
90% of students received a C or better on their final capstone research paper.

**Findings (2012-2013) - Target: Not Met**
Only 81% received a C or better on their final capstone research paper.

Only 82% of students received a C or better on their final capstone research paper, indicating a need to improve writing, critic...

G 2: Scientific Nature of Sociology
Students will be able to identify, explain and use the elements and concepts of the scientific nature of sociology.

**SLO 4: Define the Scientific Process**
Students will be able to identify and define the elements of the scientific process used to examine sociological phenomena.
Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:

M 4: Research Methods Course Grade
Average grade on assignments assessing published research from Research Methods course.

Source of Evidence: Academic indirect indicator of learning - other

Target:
At least 90% of students will receive a C or better on the scientific process assignment/test in the Research Methods course.

Findings (2016-2017) - Target: Partially Met
89% of students received a C or better on the scientific process assignment/test in the Research Methods course. This is a 19% increase from the previous year.

Findings (2015-2016) - Target: Not Met
Only 70% of students received a C or better on the scientific process assignment/test in the Research Methods course.

Findings (2014-2015) - Target: Partially Met
83% of students received a C or better in the Research Methods course. Although this is below the 90% target, it is 4% increase from the previous academic year. The current measure is an indirect measure and will be revised to a direct measure for the 2015-2016 cycle.

Findings (2013-2014) - Target: Not Met
79% of students received a C or better in the Research Methods course.

Findings (2012-2013) - Target: Met
90% of students received a C or better in the Research Methods course.

Related Action Plans (by Established cycle, then alpha):

**SLO 5: Explain Research Methods**

Students will be able to identify and explain the various methods used to research sociological phenomena.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 4: Research Methods Course Grade**
Average grade on assignments assessing published research from Research Methods course.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
At least 90% of students will receive a C or better on the assignment/test explaining research methods in the Research Methods course.

**Findings (2016-2017) - Target: Partially Met**
80% of students received a C or better on the assignment/test explaining research methods. This is a 12% increase from the previous year.

**Findings (2015-2016) - Target: Not Met**
68% of students received a C or better on the assignment/test explaining research methods.

**Findings (2014-2015) - Target: Partially Met**
83% of students made a C or better in the Research Methods course. Although this is below the 90% target, it is 4% improvement from the previous academic year. This is an indirect measure that needs to be revised to direct measure.

**Findings (2013-2014) - Target: Not Met**
79% of students received a C or better in the Research Methods course.

**Findings (2012-2013) - Target: Met**
90% of students received a C or better in the Research Methods course.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.
Improve student ability to identify and explain sociological research methods
*Established in Cycle: 2015-2016*
Only 68% of students satisfactorily identified and explained various sociological research methods. Need to further examine gra...

**Research Methods**
*Established in Cycle: 2015-2016*
Only 88% of students made a C or better on the assignment explaining research methods.

**SLO 6: Interpret Research Findings**

Students will be able to interpret qualitative and quantitative sociological research findings.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 5: Rating on Capstone Rubric QR element**
Rating on Quantitative Reasoning element of the Capstone Rubric. Senior Seminar (Capstone course) includes several assignments in which students interpret research findings. The capstone assignment also requires the use of statistical information to demonstrate understanding and use of quantitative information.

Source of Evidence: Academic direct measure of learning - other

**Target:**
At least 90% of students will receive a satisfactory or better rating on the Capstone Rubric Quantitative Reasoning element.

**Findings (2016-2017) - Target: Partially Met**
80% of students (4 of 5) received a satisfactory or better rating.

**Findings (2015-2016) - Target: Met**
93% of students received a satisfactory or better rating.

**Findings (2014-2015) - Target: Met**
97% of students received a satisfactory or better rating on the Capstone Rubric Quantitative Reasoning element.

**Findings (2013-2014) - Target: Not Met**
88% of students received a satisfactory or better rating on the Capstone Rubric Quantitative Reasoning element.

**Findings (2012-2013) - Target: Not Met**
Only 77% of students received a satisfactory or better rating on the Capstone Rubric QR element.

**SLO 7: Critique Research**

Students will be able to assess the validity, integrity, credibility and utility of sociological research.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 6: Grade on Assignments Assessing Published Research**

Students will be able to critique published research, assessing method and findings.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
At least 90% of students will receive a C or better on written assignments critiquing published research.

**Findings (2016-2017) - Target: Partially Met**
84% of students received a C or better on assignment critiquing published research. This is a 4% increase from the previous year.

**Findings (2015-2016) - Target: Partially Met**
80% of students received a C or better on assignment critiquing published research. This is a 9% improvement from the previous year.

**Findings (2014-2015) - Target: Not Met**
76% of students received a C or better on written assignments critiquing published research.

**Findings (2013-2014) - Target: Not Met**
87% of students received a C or better on written assignments critiquing published research.

**Findings (2012-2013) - Target: Met**
93% of students received a C or better on written assignments critiquing published research.
Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Improve student ability to critique published research
Established in Cycle: 2013-2014
Improve student ability to critique published research.

SLO 8: Design Research Proposal

Students will be able to design a sound and ethical research proposal using acceptable protocol to examine sociological phenomena.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 7: Grade on Research Proposal
Students will be able to design a research proposal.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
At least 90% of students will receive a C or better on the written research proposal assignment.

Findings (2016-2017) - Target: Partially Met
87% of students received a C or better on the written research proposal assignment.

Findings (2015-2016) - Target: Met
90% of students received a C or better on the written research proposal assignment. This is a 9% improvement from the previous year.

Findings (2014-2015) - Target: Not Met
76% of students received a C or better on the written research proposal assignment.

Findings (2013-2014) - Target: Not Met
70% of students received a C or better on the written research proposal assignment.
Findings (2012-2013) - Target: Not Met
Only 74% of students made a C or better on the written research proposal assignment.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Improve student ability to design research proposal
Established in Cycle: 2012-2013

Only 88% of students made a C or better on the research proposal assignment.

SLO 9: Understand and Apply Statistical Principles
Students will be able to perform and interpret statistical analyses commonly used in sociology.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 8: Rating on Quantitative Reasoning Rubric Application Element
Students will be able to apply basic statistical principles used in sociological research.

Source of Evidence: Academic direct measure of learning - other

Target:
At least 90% of students will be able to apply basic statistical principles used in sociological research.

Findings (2016-2017) - Target: Met
100% of students adequately applied basic statistical principles. This is an 8% increase from the previous year.

Findings (2015-2016) - Target: Met
92% of students adequately applied basic statistical principles.

Findings (2014-2015) - Target: Partially Met
89% of students received a satisfactory or better rating on the Quantitative Reasoning Rubric Application Element. Although this is slightly below the 90% target, it is a 10% increase from the previous academic year.
Findings (2013-2014) - Target: Not Met
79% of students received a satisfactory or better rating on the Quantitative Reasoning Rubric Application Element.

Findings (2012-2013) - Target: Met
92% of students received a satisfactory or better rating on the Application element of the Quantitative Reasoning Rubric.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Improve student ability to apply statistical concepts
Established in Cycle: 2013-2014
Improve student ability to apply statistical concepts.

SLO 10: Use Scientific Findings to Support an Argument

Students will be able to identify and appropriately use qualitative and quantitative findings from sociological research to support an argument.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 9: Rating on Capstone Evidence
Rating on Evidence element of the Capstone Research Paper Grading Rubric. Capstone assignment is to write a critical argument assessing a sociological issue and requires the use of credible research findings to support argument.

Source of Evidence: Capstone course assignments measuring mastery

Target:
At least 90% of students will receive an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric.

Findings (2016-2017) - Target: Partially Met
80% of students (4 of 5) received an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric.

Findings (2015-2016) - Target: Met
95% of students received an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric.
Findings (2014-2015) - Target: Met

94% of students received an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric. This exceeds the 90% target and is a 20% increase from the previous academic year.

Findings (2013-2014) - Target: Not Met

74% of students receive an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric.

Findings (2012-2013) - Target: Not Met

Only 69% of students adequately used scientific findings to support a critical argument.

G 3: Centrality of Inequality

Students will understand inequaility from a sociological perspective.

SLO 11: Define and Explain Inequality in Sociological Terms

Students will be able to define, identify and explain inequality as it relates to sociological phenomena.

Relevant Associations:

DSU Learning Goal Associations:

1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 10: Grade on inequality assignment in Social Stratification Course
Grade on inequality assignment in Social Stratification course.

Source of Evidence: Academic indirect indicator of learning - other

Target:

At least 90% of students will receive a C or better on the assignment/test defining and explaining inequality in the Social Stratification course.

Findings (2016-2017) - Target: Met

100% of students (1 student) received a C or better on the inequality assignment. This is a 12% increase from the previous year.

Findings (2015-2016) - Target: Partially Met

88% of students received a C or better on the inequality assignment.

Findings (2014-2015) - Target: Partially Met

82% of students received a C or better in the Social Stratification course. Although this is below the 90% target, it is an 8% increase from the previous academic year.
Findings (2013-2014) - Target: Not Met
74% of students received a C or better in the Social Stratification course.

Findings (2012-2013) - Target: Met
93% of students made a C or better in the Social Stratification course.

Related Action Plans (by Established cycle, then alpha):

Improve student learning related to understanding inequality
Established in Cycle: 2013-2014

88% of students made a C or better on the inequality assignment in the Social Stratification course.

SLO 12: Examine the Intersection of Race, Class and Gender

Students will be able to identify and explain the intersection of race, class and gender as it relates to inequality and sociological phenomena.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 10: Grade on inequality assignment in Social Stratification Course
Grade on inequality assignment in Social Stratification course.

Source of Evidence: Academic indirect indicator of learning - other

Target:
At least 90% of students will receive a C or better on the intersection assignment in the Social Stratification course.

Findings (2016-2017) - Target: Met
100% of students (1 student) made a C or better on the intersection assignment. This is a 12% increase from the previous year.
Findings (2015-2016) - Target: Partially Met
88% of students made a C or better on the intersection assignment.

Findings (2014-2015) - Target: Partially Met
82% of students received a C or better in the Social Stratification course. Although this is below the 90% target, it is an 8% increase from the previous academic year.

Findings (2013-2014) - Target: Not Met
74% of students received a C or better in the Social Stratification course.

Findings (2012-2013) - Target: Met
93% of students received a C or better in the Social Stratification course.

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 11: Rating on Capstone Impact

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
At least 90% of students will receive an adequate or better rating on the Capstone Research Paper Grading Rubric Impact element.

**Findings (2016-2017) - Target: Partially Met**  
80% of students (4 of 5) adequately assessed impact in their capstone paper.

**Findings (2015-2016) - Target: Partially Met**  
88% of students adequately assessed impact in their capstone paper.

**Findings (2014-2015) - Target: Met**  
92% of students received an adequate or better rating on the Capstone Research Paper Grading Rubric Impact element.

**Findings (2013-2014) - Target: Not Met**  
74% of students received an adequate or better rating on the Capstone Paper Grading Rubric Impact element.

**Findings (2012-2013) - Target: Not Met**  
Only 71% of students adequately examined inequality in the capstone research paper.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Assessing Impact**
*Established in Cycle: 2015-2016*
88% of students adequately assessed impact in capstone research paper.

**G 4: Global Perspective**

Students will develop and use a global perspective.

**SLO 14: Define and Explain a Global Perspective**
Students will be able to define and explain a global perspective.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators  
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 12: Rating on Global Learning View Systemic Issues Element**
Rating on Global Learning View Systemic Issues Element

Source of Evidence: Academic direct measure of learning - other

**Target:**
At least 90% of students will receive a satisfactory or better rating on the View Systemic Issues element of the Global Learning Rubric.

**Findings (2016-2017) - Target: Met**
100% of students (1 student) received a satisfactory or better rating on the View Systemic Issues element. This is a 7% increase from the previous year.

**Findings (2015-2016) - Target: Met**
93% of students received a satisfactory or better rating on the View Systemic Issues element.

**Findings (2014-2015) - Target: Met**
91% of students received a satisfactory or better rating on the View Systemic Issues element of the Global Learning Rubric.

**Findings (2013-2014) - Target: Met**
100% of students received a satisfactory or better rating on the View Systemic Issues element of the Global Learning Rubric.

**Findings (2012-2013) - Target: Not Met**
Only 61% of students received a satisfactory or better rating on the View Systemic Issues element of the Global Learning Rubric.

**SLO 15: Define and Explain Multiculturalism**

Students will be able to define and explain multiculturalism.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**M 13: Rating on Global Learning Rubric Able to Apply Global Perspective Element**
Rating on Able to Apply Global Perspective element of Global Learning Rubric. Assessed in Cultural Anthropology course.
Source of Evidence: Academic direct measure of learning - other

**Target:**
At least 90% of students will receive a satisfactory or better rating on the Able to Apply Global Concepts element of the Global Learning Rubric.

**Findings (2016-2017) - Target: Met**
91% of students satisfactorily applied global concepts.

**Findings (2015-2016) - Target: Met**
93% of students satisfactorily applied global concepts.

**Findings (2014-2015) - Target: Met**
91% of students received a satisfactory or better rating on the Able to Apply Global Concepts element of the Global Learning Rubric.

**Findings (2013-2014) - Target: Met**
100% of students received a satisfactory or better rating on the Able to Apply Global Concepts element of the Global Learning Rubric.

**Findings (2012-2013) - Target: Not Met**
Only 56% of students received a satisfactory or better rating on the Able to Apply Global Concepts element of the Global Learning Rubric.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Determine if new Writing course improves critical thinking and writing skills**
The Department developed a new writing course to begin in Fall 2012. The course is designed to improve critical thinking and analysis and improve writing skills. This course should have a direct impact on assessing understanding of inequality since that is demonstrated through critical writing exercises.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Continue assessment as designed. Track if assessment findings improve as students complete new Writing course.  
**Responsible Person/Group:** Department Assessment Committee chair  
**Additional Resources Requested:** None

**Identify direct measure to assess intellectual differences in social sciences**
Identify direct measure to assess understanding of intellectual differences between sociology and other social sciences.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Department faculty to identify direct measure.  
**Responsible Person/Group:** Department faculty with guidance from Department
Work with New Faculty Ensuring Assessments Are Consistent With Department Standards
Work with new faculty to ensure assessment and grading are consistent with Department standards.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

Work With New Faculty To Ensure Assessment & Grading Meet Department Standards.
Work with new faculty to ensure assessment and grading are consistent with Department standards.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

Work With New Faculty To Ensure Assessment Are Consistent With Department Standards
Work with new faculty to ensure assessment and grading are consistent with Department standards.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

Continue to increase emphasis on computer skills
Continue to increase skill building related to appropriate use of internet and other computer-based information sources.

**Established in Cycle:** 2011-2012  
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** Revise course learning objectives to ensure that computer skills are addressed. Increase course assignments related to identifying, accessing and using computer-based information sources.
Increase emphasis on critical thinking and writing
Continue to increase critical thinking and writing assignments and assessments in all curriculum courses.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: Revise course learning objectives to strengthen emphasis on critical thinking and writing. Work with faculty to increase critical thinking and writing assignments and assessments.
Projected Completion Date: 05/25/2013
Responsible Person/Group: Department Assessment Committee Chair to revise course objectives. Faculty responsible for increasing and improving critical thinking and writing assignments and assessments.
Additional Resources Requested: None

Increase emphasis on multiculturalism
Revise course learning objectives in relevant courses to emphasize multiculturalism.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: Department Assessment Committee Chair to revise course learning objectives. Faculty responsible for developing assignments emphasizing multiculturalism.
Projected Completion Date: 05/25/2013
Responsible Person/Group: Department Assessment Committee Chair to revise course learning objectives. Faculty responsible for developing assignments emphasizing multiculturalism
Additional Resources Requested: None

Increase published research assessment skills
Increase assignments designed to assess published research.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: Instructor of course to ensure sufficient assignments to teach assessment skills.
Projected Completion Date: 05/25/2013
Responsible Person/Group: Instructor
Additional Resources Requested: None

Improve student ability to design research proposal

Only 88% of students made a C or better on the research proposal assignment.

Established in Cycle: 2012-2013
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Grade on Research Proposal | Outcome/Objective: Design Research Proposal

Implementation Description: Research methods instructor to identify ways to improve student ability to design research proposals.
Projected Completion Date: 05/31/2017
Responsible Person/Group: Faculty and instructors

Improve Use of a Theoretical Perspective

Ability to adequately develop and use a theoretical perspective has increased steadily over the past 5 years, it is still below the target of 90%. As part of a larger effort, the Curriculum Committee will identify ways to better connect courses, improve transfer of knowledge across the curriculum, and improve writing, critical thinking, and information literacy. Improvement in these areas will improve development and use of a theoretical perspective.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Capstone Theoretical Perspective | Outcome/Objective: Use Theories

Implementation Description: Curriculum Committee will identify ways to better connect courses, improve transfer of knowledge across the curriculum, and improve writing, critical thinking, and information literacy.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Curriculum Committee
Additional Resources Requested: None
Improve Writing, Critical Thinking and Information Skills Across the Curriculum

Only 82% of students received a C or better on their final capstone research paper, indicating a need to improve writing, critical thinking, and information literacy skills. As part of a larger effort, the Curriculum Committee will identify ways to better connect courses, improve transfer of knowledge across the curriculum, and improve writing, critical thinking, and information literacy. These improvements will result in increased percentage of students making a C or better on their final capstone research paper.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Capstone Research Paper Grade | Outcome/Objective: Develop a Critical Argument

Implementation Description: Identify ways to better connect courses, improve transfer of knowledge across the curriculum, and improve writing, critical thinking, and information literacy
Projected Completion Date: 05/31/2016
Responsible Person/Group: Curriculum Committee
Additional Resources Requested: None

Revise measure assessing ability to explain inequality in sociological terms

The faculty agreed to revise the measure so that it is a direct measure. The Assessment Committee will revise the measure and data to assess the direct measure will be collected in the 2015-2016 cycle.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Grade on inequality assignment in Social Stratification Course | Outcome/Objective: Define and Explain Inequality in Sociological Terms

Implementation Description: The Assessment Committee will revise the measure and data to assess the direct measure will be collected in the 2015-2016 cycle.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Assessment Committee
Additional Resources Requested: None
Revise measure to assess ability to examine intersection of race, class and gender

The faculty agreed to revise the measure so that it is a direct measure. The Assessment Committee will revise the measure and data to assess the direct measure will be collected in the 2015-2016 cycle.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Grade on inequality assignment in Social Stratification Course | Outcome/Objective: Examine the Intersection of Race, Class and Gender

Implementation Description: The Assessment Committee will revise the measure and data to assess the direct measure will be collected in the 2015-2016 cycle.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Assessment Committee
Additional Resources Requested: None

Revise measure to assess scientific process objective

The faculty agreed to revise the measure so that it is a direct measure. The Assessment Committee will revise measure for the 2015-2016 cycle.

Established in Cycle: 2012-2013
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Research Methods Course Grade | Outcome/Objective: Define the Scientific Process

Implementation Description: Identify a direct measure to assess student ability to define the scientific process. Collect assessment data on the direct measure for the 2015-2016 cycle.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Assessment Committee
Additional Resources Requested: None

Improve student ability to apply statistical concepts

Improve student ability to apply statistical concepts.
Established in Cycle: 2013-2014  
Implementation Status: Finished  
Priority: Medium

Relationships (Measure | Outcome/Objective):  
Measure: Rating on Quantitative Reasoning Rubric Application Element |  
Outcome/Objective: Understand and Apply Statistical Principles

Implementation Description: Increase assignments related to applying statistical concepts.  
Projected Completion Date: 05/31/2015  
Responsible Person/Group: Curriculum Committee

**Improve student ability to critique published research**

Improve student ability to critique published research.

Established in Cycle: 2013-2014  
Implementation Status: In-Progress  
Priority: Medium

Relationships (Measure | Outcome/Objective):  
Measure: Grade on Assignments Assessing Published Research |  
Outcome/Objective: Critique Research

Implementation Description: Work with all instructors to increase assignments related to critiquing published research.  
Projected Completion Date: 05/31/2017  
Responsible Person/Group: Faculty and Instructors

**Improve student learning related to understanding inequality**

88% of students made a C or better on the inequality assignment in the Social Stratification course.

Established in Cycle: 2013-2014  
Implementation Status: In-Progress  
Priority: Medium

Relationships (Measure | Outcome/Objective):  
Measure: Grade on inequality assignment in Social Stratification Course |  
Outcome/Objective: Define and Explain Inequality in Sociological Terms

Implementation Description: Faculty and instructors to increase activities and assignments related to understanding inequality.  
Projected Completion Date: 05/31/2017
Responsible Person/Group: Faculty and instructors

Assessing Impact
88% of students adequately assessed impact in capstone research paper.

Established in Cycle: 2015-2016
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Rating on Capstone Impact | Outcome/Objective: Examine Inequaility

Implementation Description: Faculty and instructors will strengthen teaching strategies
Projected Completion Date: 05/31/2017
Responsible Person/Group: Faculty and instructors

Improve grade on methods assignment scientific process
Only 70% of students received a C or better on the Methods course assignment assessing ability to identify and define elements of the scientific process. Need to examine grades and identify areas of weakness. Need to work with instructors to supplement teaching strategies in these areas.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Research Methods Course Grade | Outcome/Objective: Define the Scientific Process

Projected Completion Date: 08/25/2017
Responsible Person/Group: Assessment Committee and Methods instructors.
Additional Resources Requested: NONE

Improve student ability to define sociological theories
88% of students made a C or better on the assignment defining sociological theories.

Established in Cycle: 2015-2016
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
**Measure:** Grade on assignment defining theories in Sociological Theories Course  
**Outcome/Objective:** Define Theories  
**Implementation Description:** Faculty and instructors will strengthen teaching strategies.  
**Projected Completion Date:** 05/31/2017  
**Responsible Person/Group:** Faculty and instructors

**Improve student ability to identify and explain sociological research methods**  
Only 68% of students satisfactorily identified and explained various sociological research methods. Need to further examine grades on assignments and improve teaching strategies.  

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High  
**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Research Methods Course Grade  
- **Outcome/Objective:** Explain Research Methods  
**Implementation Description:** Identify areas of weakness and improve teaching strategies.  
**Projected Completion Date:** 08/25/2017  
**Responsible Person/Group:** Assessment Committee and Methods instructors  
**Additional Resources Requested:** NONE

**Intersection of race, gender, and class**  
88% of students made a C or better on intersection assignment in Social Stratification course.  

**Established in Cycle:** 2015-2016  
**Implementation Status:** In-Progress  
**Priority:** Medium  
**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Grade on inequality assignment in Social Stratification Course  
- **Outcome/Objective:** Examine the Intersection of Race, Class and Gender  
**Implementation Description:** Faculty and instructors will strengthen teaching strategies  
**Projected Completion Date:** 05/31/2017  
**Responsible Person/Group:** Faculty and instructors

**Research Methods**
Only 88% of students made a C or better on the assignment explaining research methods.

Established in Cycle: 2015-2016
Implementation Status: In-Progress

Relationships (Measure | Outcome/Objective):
  Measure: Research Methods Course Grade | Outcome/Objective: Explain Research Methods

Implementation Description: Research methods instructor will strengthen teaching strategies.
Projected Completion Date: 05/31/2017
Responsible Person/Group: Faculty and instructors
Mission / Purpose

In accordance with Delaware State University's vision to serve a diverse student population with a broad range of programs, the Department of Spiritual Life seeks to educate the whole person by advancing the values of integrity, justice, civility, and respect in a safe environment. The Department of Spiritual Life empowers students to create an environment rooted in faith that is integrated into their daily life through experience.

Our aim is that The Department of Spiritual Life will empower students to create an environment rooted in faith that is integrated into daily life through experience.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: A Welcoming Environment

Provide students from diverse populations a welcoming environment and connections to campus resources.

O/O 1: Effective Programming

Develop effective programming with monthly themes that encourage and uplift student population.

The Goals Can Be Accomplished By:

- Interfaith Services
- Gospel Church Services
- Offering of Liturgy and Sacraments
- Pastoral Care and Support
- Cultural Enrichment
- Mediation

Related Measures:
M 1: Religious and Spiritual Life Quality Scale Survey
This scale survey was created to evaluate students Religious and Spiritual experience. It had three questions:

1. Did you learn anything new attending the 5:30pm Church Service?
2. How likely are you to attend these services during the Spring Semester?
3. In what ways has these services helped you grow as a person?

Source of Evidence: Evaluations

**Target:**
I would like to have a 100% response from students who are present at the last service of the semester. Hopefully the survey will show that the church services are effective. I also hope that they are leaving with knowledge they can apply to their everyday lives.

**Findings (2016-2017) - Target: Met**
The Department of Spiritual Life found that students do appreciate the Church services on Sunday. They are more than likely to attend in the Spring Semester, due to gaining knowledge from the word of God. The students also commented on having a better understanding of prayer and developing a true relationship with Christ. Growing as a person was a central theme on all the evaluations that was returned.

G 2: Attend to the Whole Person

Attend to the whole person through vibrant opportunities, addressing people of all faiths and cultures.

O/O 2: Engagement with Student Population

Develop effective programming with monthly themes that encourage and uplift student population.

August - "You Were Meant to Succeed"

September - "Come On! Get Real!"

October - "Falling in Love with Life"

November - "Ultimate Power Tools"

December - "Capturing the Spirit of Christmas"

January - "Tipping Point or Turning Point?"
February - "On the Wings of L.O.V.E."

March - "Bridging the Gap"

April - "Share the Love, Share the Light, Share Your Authentic Self"
G 1: Student learning goals

SLO 1: Application of Knowledge
The student will be able to apply sport industry leadership, management, financial, legal and marketing practices and principles

Relevant Associations:

DSU Learning Goal Associations:
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Comprehensive Project - Outcomes
80% or above approval rating on the comprehensive project for each outcome.

Source of Evidence: Comprehensive/end-of-program subject matter exam

Target:
80% or better approval of the overall project.

Findings (2017-2018) - Target: Met
Approval rate was 100%.

Findings (2016-2017) - Target: Met
Approval rate for final project was 100%.
Findings (2015-2016) - Target: Met
9 out of 9 students completed the comprehensive project with an 80% or greater approval rating.

Findings (2014-2015) - Target: Met
7 out of 7 students, 100%, scored 80% or better on their Comprehensive Projects.

Findings (2013-2014) - Target: Met
18 out of 19 (94.7%) of the comprehensive projects scored 80% or better.

Findings (2012-2013) - Target: Met
17 students submitted their comprehensive projects of which all 17 received an 80% or better approval rating,

M 2:Sport Management Assignment
Ethical, moral, and social responsibility related to management of sport.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
80% of students demonstrated knowledge of ethical, moral, and social responsibility within sport and sport-related organizations.

Findings (2016-2017) - Target: Met
92% of students demonstrated knowledge of ethical, moral and social responsibility within sport.

Findings (2015-2016) - Target: Not Reported This Cycle
Information not available.

Findings (2012-2013) - Target: Met
87.5% of 24 students demonstrated knowledge of ethical, moral, and social responsibility within sport and sport-related organizations in the written assignment.

M 4:Internship
Internal and external evaluation of internship performance

Source of Evidence: Field work, internship, or teaching evaluation

Target:
80% or better on Internship site supervisor evaluation

Findings (2017-2018) - Target: Met
100% of the students met or exceeded the standard.

Findings (2016-2017) - Target: Met
All of the students received 80% or better on the site supervisor's evaluation.
Findings (2015-2016) - Target: Not Reported This Cycle
Information was not available.

Findings (2014-2015) - Target: Not Reported This Cycle
Not available at this time.

Findings (2013-2014) - Target: Met
All of the internships for the 2013-2014 academic year received 80% or better on the site supervisor evaluation.

Findings (2012-2013) - Target: Met
All of the interns for the 2012-13 academic year have received 80% or better on the evaluation of the internship site supervisor.

M 5: Current Trends/Issues Analysis
Students will achieve 80% on the project to reach target.

Source of Evidence: Project, either individual or group

Target:
Student will identify current trends/issues in a variety of professional publications over a 5 year period of time for use in his/her analysis of the current trends/issues in sport. Target is that 80% or better on the current trend/issues analysis.

Findings (2017-2018) - Target: Met
100% met or exceeded the standard.

Findings (2016-2017) - Target: Met
100% of students received 80% or better on the trend analysis.

Findings (2015-2016) - Target: Met
12 of 15 (80%) of the students scored 80% or better on the current trend/issues analysis.

Findings (2013-2014) - Target: Not Reported This Cycle
Analysis of Current Trends and Issues in Sport is no longer used for this SLO.

Findings (2012-2013) - Target: Not Reported This Cycle
N/A - measurement will begin in summer session I of 2013.

M 6: Exit Survey
90% or more of the students scoring the relevant components of the SLOs at the "Proficient" level or better.

Source of Evidence: Exit interviews with grads/program completers
Target:
90% or more of the students scoring the relevant components of the SLO at the "Proficient" level or better.

Findings (2017-2018) - Target: Met
100% of the students scored the relevant components at "Proficient" or higher.

Findings (2016-2017) - Target: Met
100%

Findings (2015-2016) - Target: Met
100% of students scored the relevant components of the SLOs at the proficient level or better.

Findings (2014-2015) - Target: Partially Met
The percentage of students scoring this outcome at "proficient" or better is as follows:
- Management: 100%
- Law: 100%
- Finance: 67%
- Marketing: 100%

Findings (2013-2014) - Target: Met
The percentage of students scoring the following components at the "Proficient" level or better is:
- Management - 95%
- Law - 90%
- Finance - 95%
- Marketing - 95%

SLO 2: Examination of sport environment/culture
The student will critically examine sport from an ethical, economical, legal, and social perspective and formulate strategies for change as needed.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Comprehensive Project - Outcomes
80% or above approval rating on the comprehensive project for each outcome.

Source of Evidence: Comprehensive/end-of-program subject matter exam
Target:
At least 90% of students will score 80% or better on the course project in SPSC 675, Current Trends and Issues in Sport.

**Findings (2017-2018) - Target: Met**
100% of students met the standard.

**Findings (2016-2017) - Target: Met**
100% of the students scored 80% or higher.

**Findings (2015-2016) - Target: Not Met**
12 of 15 students (80%) performed at a level of 80% or better on the course project.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**monitor**
*Established in Cycle: 2015-2016*
We will monitor and revise as needed.

**M 2: Sport Management Assignment**
Ethical, moral, and social responsibility related to management of sport.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
Students will receive 80% or better on the written assignment.

**Findings (2016-2017) - Target: Met**
100% received an 80% or better.

**Findings (2015-2016) - Target: Not Reported This Cycle**
Information not available.

**Findings (2012-2013) - Target: Met**
87.5% of the students completed the written assignment with 80% or better.

**M 3: Research Project**
Students will receive 80% on the project to achieve target.

Source of Evidence: Project, either individual or group

**M 5: Current Trends/Issues Analysis**
Students will achieve 80% on the project to reach target.

Source of Evidence: Project, either individual or group

**Target:**
Students will submit a literature review of a particular current trend/issue and provide a breakdown of managerial considerations and suggestions for
improvement, both of which entail an examination of the ethical, moral, and social implications and practices. Target is a grade of 80% or better on the literature review.

Findings (2017-2018) - Target: Met
100% met or exceeded the standard.

Findings (2016-2017) - Target: Met
92% of the students received 80% or better on their literature review.

Findings (2015-2016) - Target: Met
12 of 15 (80%) of the students scored 80% or better on the current trend/issues analysis.

Findings (2014-2015) - Target: Met
12 of 13, 92%, of the students scored 80% or higher on the course project.

Findings (2013-2014) - Target: Met
20 out of 21 (95%) of the students scored 80% or better on the Current Trends & Issues in Sport Project.

Findings (2012-2013) - Target: Not Reported This Cycle
N/A - measurement will begin in summer session I of 2013.

M 6: Exit Survey
90% or more of the students scoring the relevant components of the SLOs at the "Proficient" level or better.

Source of Evidence: Exit interviews with grads/program completers

Target:
90% or more of the students scoring the relevant components of the SLO at the "Proficient" level or better.

Findings (2017-2018) - Target: Met
100% scored proficient or higher.

Findings (2016-2017) - Target: Met
100%

Findings (2015-2016) - Target: Met
100% of students scored the relevant components of the SLOs at the proficient level or better.

Findings (2014-2015) - Target: Met
100% of the students scored at the "Proficient" level or better.

Findings (2013-2014) - Target: Met
100% of the students scored at the "Proficient" level or better.

SLO 3: Advanced Research & Technology
The student will utilize appropriate technologies to conduct research and evaluate, analyze and communicate information related to current issues and trends within the sport industry.
**Relevant Associations:**

**DSU Learning Goal Associations:**
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 1: Comprehensive Project - Outcomes**
80% or above approval rating on the comprehensive project for each outcome.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target:**
80% or better approval of overall project.

**Findings (2017-2018) - Target: Not Met**
60% of the students did not meet the standard.

**Findings (2016-2017) - Target: Met**
100% of students received an 80% or better on their comprehensive project.

**Findings (2015-2016) - Target: Not Met**
13 of 24 (54%) students scored 80% or higher on the research project in SPSC 625.

**Findings (2013-2014) - Target: Not Reported This Cycle**
Comprehensive Project is no longer used to assess this SLO.

**Findings (2012-2013) - Target: Met**
17 students submitted their comprehensive projects of which all 17 received an 80% or better approval rating.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**monitor**
*Established in Cycle: 2015-2016*
We will monitor and revise as needed.

**training**
*Established in Cycle: 2017-2018*
Instructor needs to attend workshops to become a more effective teacher.
M 2: Sport Management Assignment
Ethical, moral, and social responsibility related to management of sport.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
80% or better on Sport Management written assignment

**Findings (2017-2018)** - Target: **Not Reported This Cycle**
No reported.

**Findings (2016-2017)** - Target: **Not Reported This Cycle**
Information not available.

**Findings (2015-2016)** - Target: **Not Reported This Cycle**
Information not available.

**Findings (2012-2013)** - Target: **Met**
87.5% of students received 80% or better on the written assignment.

**Findings (2011-2012)** - Target: **Met**
81% of the students received 80% or better on their Sport Management written assignment.

**Findings (2010-2011)** - Target: **Met**
100% of the students reached or exceeded the 80% target level.

**Findings (2009-2010)** - Target: **Met**
81% of student achieved target.

M 3: Research Project

Students will receive 80% on the project to achieve target.

Source of Evidence: Project, either individual or group

**Target:**
80% or better on research project

**Findings (2017-2018)** - Target: **Not Met**
60%

**Findings (2016-2017)** - Target: **Not Met**
60% of the students received 80% or better on the research project.

**Findings (2015-2016)** - Target: **Not Met**
13 of 24 (54%) of students scored 80% or better on research project.

**Findings (2014-2015)** - Target: **Not Reported This Cycle**
Data not available at this time. However, it should be noted that high
percentage, 38%, of students receive a grade of "C" or below in this course.

**Findings (2013-2014) - Target: Not Met**
8 out of 12 (67%) of the students scored 80% or better on the Research Project.

**Findings (2012-2013) - Target: Met**
89% of students received 80% or better on the research project.

**Related Action Plans (by Established cycle, then alpha):**

Mission / Purpose

A; Mission: The mission of the Sport Management Program is to prepare students becoming ethical leaders and managerial professionals in sport related industries in the global community.

B. Vision: The Sport Management Program should (a) excel in delivering quality education for state of the art and science programs that develop the professionals who will serve the sport related industry in global community with integrity and ethical standards; (b) engage serves in community and sport organizations for diverse populations; and (c) develop an applied research and scholarship agenda that engages the sport related professions in global community and integrates theory with practice.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Knowledge
The students will master general and/or advanced professional knowledge of sport related professions, be aware of ethics, cultural and individual differences in the diverse social environment and global community, and demonstrate competences of critical thinking, decision making and problem solving in sport related industries.

SLO 2: Demonstrate Diversity Awareness
Demonstrate legal, ethical, global, cultural and diversity awareness as related to sport management profession.

Relevant Associations:

DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:

M 2: Capstone Project (D-2)
The senior capstone project is used to measure students' general knowledge based on CPC, information literacy, written communication, and ability to understand diversity. The comprehensive capstone project rubric measures SLO 1, 2, 4, and 5 (Professional Knowledge, Diversity Awareness, Communication, and Information Technology). The project is completed in the Sport Management Senior Seminar (SPSC-475) during the fall semester.
Source of Evidence: Academic indirect indicator of learning - other

**Target:**
For Capstone Project Grading:
MET= 90% or more senior graduates achieved 3.00 or above (5-lickert scale, 5 = advanced, 1= unsatisfied); Partially MET: 89% to 70% achieved 3.00 points or above. Not Met: only 69% or lower achieved.

**Findings (2017-2018 ) - Target: Not Reported This Cycle**
Information was not provided.

**Findings (2010-2011) - Target: Met**
SPSC 373-01 ORG. BEHAVIOR/PROGRAMMING
SPSC 271-01 INTRO TO SPORT MGMT & RECRE
SPSC 372-00 LEADERSHIP & ETHICS IN SPORT

Achievement target was MET for the total number of student achieving course grades of A, B, or C at 95%.

**M 7:Senior Exit Interview (I-1)**
The Senior Exit Interview is used as indirect measure for the following student learning outcomes: (a) SLO-1, professional knowledge; (b) SLO-2, diversity awareness; (c) SLO-3, intellectual competence, and (d) SLO-6, integrative experience. Students are expected to respond to the questions given by two faculty evaluators. The score is an average of two rates given. The interview is administered at end of Senior Seminar of Sport Management (SPSC-475) offered during the fall semester.

Source of Evidence: Exit interviews with grads/program completers

**Target:**
To have 90% graduates scored satisfactory level of Senior Exit Interview

**Findings (2017-2018 ) - Target: Not Reported This Cycle**
No findings were reported.

**Findings (2015-2016) - Target: Met**
All of the students performed at the proficiency level or above.

**Findings (2014-2015) - Target: Met**
All of students have achieved higher than satisfactory level performance.

**Findings (2013-2014) - Target: Met**
Indirect Measure - 1: (Senior Exit Interview); 15/15 100% scored Satisfactory level or higher.
SLO 3: Employ Critical Thinking

Employ critical thinking, decision making, and problem solving skills to analyze current issues in sport related industries.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 4: Intellectual Case Study (D-4)**

The Intellectual Case Study is designed to measure critical thinking, problem solving and decision making skills. The rubric addresses SLO-4 and is administered in two courses: Marketing in Sport (SPSC-374) and Leadership and Ethics in Sport (SPSC-372). These courses are offered in the fall semester.

Source of Evidence: Academic direct measure of learning - other

**Target:**
To have 80% or more students scoring above satisfactory level on Intellectual Case Study.

**Findings (2017-2018) - Target: Not Reported This Cycle**
No findings reported.

**Findings (2015-2016) - Target: Met**
All of the students scored at the level of proficiency or above.

**Findings (2014-2015) - Target: Met**

about 85% of students have achieved higher than satisfactory level in this area.

**Findings (2013-2014) - Target: Met**
Direct Measure - 4: (Intellectual Case Study); 19/20, 95% scored Satisfactory level or higher.

**M 7: Senior Exit Interview (I-1)**

The Senior Exit Interview is used as indirect measure for the following student learning outcomes: (a) SLO-1, professional knowledge; (b) SLO-2, diversity awareness; (c) SLO-3, intellectual competence, and (d) SLO-6, integrative experience. Students are expected to respond to the questions given by two
faculty evaluators. The score is an average of two rates given. The interview is administered at end of Senior Seminar of Sport Management (SPSC-475) offered during the fall semester.

Source of Evidence: Exit interviews with grads/program completers

Target:
To have 90% graduates scored satisfactory level of Senior Exit Interview

Findings (2017-2018) - Target: Not Reported This Cycle
Nothing reported.

Findings (2015-2016) - Target: Met
100% of the students scored above the satisfactory level. 8 students scored Achieved level and 4 were scored as Proficient.

Findings (2014-2015) - Target: Met
All of students have achieved higher than satisfactory level performance.

Findings (2013-2014) - Target: Met
Indirect Measure - 1: (Senior Exit Interview); 15/15 100% scored Satisfactory level or higher.

G 2: Skills
The students will demonstrate proficient skills of using various information technologies for individual and professional purposes, and be effective communicators in the sport related professions.

SLO 4: Communicate Effectively
Communicate effectively through oral and written communication forms in the sport management profession.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators

Related Measures:

M 2: Capstone Project (D-2)
The senior capstone project is used to measure students' general knowledge based on CPC, information literacy, written communication, and ability to understand diversity. The comprehensive capstone project rubric measures SLO 1, 2, 4, and 5 (Professional Knowledge, Diversity Awareness, Communication, and Information Technology). The project is completed in the Sport Management Senior Seminar (SPSC-475) during the fall semester.
Source of Evidence: Academic indirect indicator of learning - other

**Target:**
To have 80% or more students scoring above satisfactory level on capstone project.

**Findings (2017-2018) - Target: Not Reported This Cycle**
Information not reported.

**Findings (2015-2016) - Target: Met**
8 students received Achieved and 4 were rated as Proficient so 100% of the students scored above the satisfactory level.

**Findings (2014-2015) - Target: Met**
All students of submitting the capstone projects have achieved higher than satisfactory level.

**Findings (2013-2014) - Target: Met**
Direct Measure - 2: (Capstone Project); 21/22 95% scored Satisfactory level or higher.

**M 3: Capstone Presentation (D-3)**

The Capstone Presentation rubric is an effective measure of students' oral communication, and application of information literacy/ technology skills. The measurement tool and rubric are designed to evaluate SLO 3. This evaluation is conducted in the junior level course, Organizational Theory and Behavior in Sport (SPSC 373) offered during the fall semester.

Source of Evidence: Presentation, either individual or group

**Target:**
To have 80% or more students scoring above satisfactory level on Capstone Project and Capstone Presentation.

**Findings (2017-2018) - Target: Met**
100% of the students scored above satisfactory.

**Findings (2015-2016) - Target: Met**
All of the students performed at the level of proficiency or above.

**Findings (2014-2015) - Target: Met**
All students who participated in conducting senior capstone projects have achieved the higher than satisfactory level.

**Findings (2013-2014) - Target: Met**
Direct Measure - 2: (Capstone Project, writing); 21/22 95% scored Satisfactory level or higher.
Direct Measure - 2: (Capstone Presentation, verbal); 29/29, 100% scored Satisfactory level or higher.

**M 8: Internship Evaluation (I-2)**

Internship Supervisor Evaluation is designed to measure and report students' performance and behaviors during the internship. The managerial practitioners who serve as the site supervisors will observe the students for practical applications in three areas: Information Technology, Communication Skills used in the internship, and Integrative Experience obtained during the internship. The evaluation indirectly measures student learning outcomes SLO-4, 5, and 6 at the end of senior internship in the Spring Semester or Summer.

Source of Evidence: Field work, internship, or teaching evaluation

**Target:**
To have 90% graduates scored satisfactory level of Senior Exit Interview

**Findings (2017-2018) - Target: Met**
100% of the students met or exceeded the standard.

**Findings (2015-2016) - Target: Met**
All of the students performed at satisfied level or above.

**Findings (2014-2015) - Target: Met**
All of students have achieved higher than satisfactory level performance.

**Findings (2013-2014) - Target: Met**
Indirect Measure - 2: (Site Supervisor Evaluation); 15/15 100% scored Satisfactory level or higher.

**SLO 5: Demonstrate Technological Proficiency**

Demonstrate proficiency in utilizing technology (e.g., internet, MS word, Power-point, Excel, SPSS) to search for information, to retrieve and analyze data, and to compile/present sport related reports.

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**
M 2: Capstone Project (D-2)

The senior capstone project is used to measure students' general knowledge based on CPC, information literacy, written communication, and ability to understand diversity. This evaluation is conducted in the junior level course, Organizational Theory and Behavior in Sport (SPSC 373) offered during the fall semester.

Source of Evidence: Presentation, either individual or group

**Target:**
To have 80% or more students scoring above satisfactory level on Capstone Presentation.

**Findings (2017-2018) - Target: Met**
96% of the students scored above satisfactory.
Findings (2015-2016) - Target: Met
All of the students scored at the level of proficiency or above.

Findings (2014-2015) - Target: Met
All students who submitted the capstone projects have achieved higher than satisfactory level.

Findings (2013-2014) - Target: Met
Direct Measure - 2: (Capstone Project, technology); 21/22 95% scored Satisfactory level or higher.

Direct Measure - 2: (Capstone Presentation, technology); 29/29, 100% scored Satisfactory level or higher.

M 8: Internship Evaluation (I-2)

Internship Supervisor Evaluation is designed to measure and report students' performance and behaviors during the internship. The managerial practitioners who serve as the site supervisors will observe the students for practical applications in three areas: Information Technology, Communication Skills used in the internship, and Integrative Experience obtained during the internship. The evaluation indirectly measures student learning outcomes SLO-4, 5, and 6 at the end of senior internship in the Spring Semester or Summer.

Source of Evidence: Field work, internship, or teaching evaluation

Target:
To have 90% graduates scored satisfactory level of Senior Exit Interview

Findings (2017-2018) - Target: Met
96% of the students met or exceeded the standard.

Findings (2015-2016) - Target: Met
100% of the students scored above the satisfactory level. 8 students scored Achieved level and 4 were scored as Proficient.

Findings (2014-2015) - Target: Met
All of students have achieved higher than satisfactory level performance.

Findings (2013-2014) - Target: Met
Indirect Measure - 2: (Site Supervisor Evaluation); 15/15 100% scored Satisfactory level or higher.

G 3: Experience
The students will demonstrate leadership, integrative experience and commitment to continuing professional growth through various academic and professional activities.
SLO 6: Apply knowledge and skills in integrative experience

Apply knowledge and skills in practical settings and acquire leadership and integrative experience through professional activities and a structured internship.

Relevant Associations:

DSU Learning Goal Associations:
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Comprehensive Examination (D-1)

Comprehensive Examination Assessment (senior students)
The comprehensive examination is designed to measure student learning outcomes of general knowledge based on the Common Professional Component (CPC). The first portion of this examination contains 30 multiple choice questions (2 points for each x 30 questions = 60 points total). These questions are generated from content in the professional sport management courses. The second portion of the examination includes ten comprehensive essay questions, in which each question represents a particular area of CPC of sport management. Students are required to answer four out of the ten essay questions. The examination tests students' general CPC knowledge (multiple choice, 60% of total) and provides an opportunity for the students to demonstrate their strengths/interests in their selected areas (essay questions, 40%). The total test score is worth 100 points (60 +40 = 100). The multiple choice and essay questions are provided by faculty members in their respective areas of teaching expertise. The test questions are organized into Form A and Form B with the same level of difficulty to ensure academic integrity. Using a combination of correct multiple choice questions and essay evaluation rubrics, a student must score a minimum of 70 points to meet the target. For inter-rater reliability, the essays will be graded by two qualified faculty members in the program using an average score of the two raters as the final result. The examination mainly measures SLO-1 (Knowledge based on Common Professional Component) The exam is administered in the course of SPSC-475, Senior Seminar of Sport Management in the Fall Semester.

Source of Evidence: Comprehensive/end-of-program subject matter exam

Target:
more than 80% of students should meet the standards.
Findings (2017-2018) - Target: Met
All of the students met or exceeded the target.

Findings (2015-2016) - Target: Met
Six students of the twelve students who took the exam scored at the proficient level and six scored at the achieved level. Thus, the goal was exceeded.

Findings (2014-2015) - Target: Met
We have all seniors taking this exam and have all of them passed the exam above satisfactory level.

M 5: Position Paper (D-5)
The position paper of integrative experience is required for all senior students who complete a structured internship. The paper serves as a direct measure of Student Learning Outcome - 6 with related rubric. The students should demonstrate integrative experience in the aspects of (1) Knowledge Applied, (2) Practical Experience, (3) Enhanced Understanding, and (4) Expectation Awareness. The Paper must be submitted and evaluated at end of a 400-hour internship experience offered during the fall or summer semesters.

Source of Evidence: Academic direct measure of learning - other

Target:
To have 80% or more students scoring above satisfactory level on the position paper.

Findings (2017-2018) - Target: Not Reported This Cycle
No findings were reported.

Findings (2015-2016) - Target: Met
All of the students performed at the satisfied level or above.

Findings (2014-2015) - Target: Met
All of students have achieved higher than satisfactory level performance.

Findings (2013-2014) - Target: Met
Indirect Measure - 1: (position paper); 13/13 100% scored Satisfactory level or higher.

M 7: Senior Exit Interview (I-1)
The Senior Exit Interview is used as indirect measure for the following student learning outcomes: (a) SLO-1, professional knowledge; (b) SLO-2, diversity awareness; (c) SLO-3, intellectual competence, and (d) SLO-6, integrative experience. Students are expected to respond to the questions given by two faculty evaluators. The score is an average of two rates given. The interview is administered at end of Senior Seminar of Sport Management (SPSC-475) offered during the fall semester.

Source of Evidence: Exit interviews with grads/program completers
Target:
To have 90% graduates scored satisfactory level of Senior Exit Interview

Findings (2017-2018) - Target: Not Reported This Cycle
No findings were reported.

Findings (2015-2016) - Target: Met
100% of the students scored above the satisfactory level. 8 students scored Achieved level and 4 were scored as Proficient.

Findings (2014-2015) - Target: Met
All of students have achieved higher than satisfactory level performance.

Findings (2013-2014) - Target: Met
Indirect Measure - 1: (Senior Exit Interview); 15/15 100% scored Satisfactory level or higher.

M 8: Internship Evaluation (I-2)
Internship Supervisor Evaluation is designed to measure and report students’ performance and behaviors during the internship. The managerial practitioners who serve as the site supervisors will observe the students for practical applications in three areas: Information Technology, Communication Skills used in the internship, and Integrative Experience obtained during the internship. The evaluation indirectly measures student learning outcomes SLO-4, 5, and 6 at the end of senior internship in the Spring Semester or Summer.

Source of Evidence: Field work, internship, or teaching evaluation

Target:
To have 90% graduates scored satisfactory level of Senior Exit Interview

Findings (2017-2018) - Target: Not Reported This Cycle
Nothing reported.

Findings (2015-2016) - Target: Met
100% of the students scored above the satisfactory level. 8 students scored Achieved level and 4 were scored as Proficient.

Findings (2014-2015) - Target: Met
All of students have achieved higher than satisfactory level performance.

Findings (2013-2014) - Target: Met
Indirect Measure - 2: (Site Supervisor Evaluation); 15/15 100% scored Satisfactory level or higher.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
**Improvement will be made next year.**
Discuss the performance in department meeting to see if we need to adjust the target or improve interview skills of students.

### Annual Report Section Responses

**Executive Summary (1-2 pages)**

2017-2018 Sport Management Department Executive Summary (1-2 pages) The following is a list of Departmental major academic activities: (a) Fall 2017 enrollment for undergraduate students was 151 a slight decrease of 9 students from the previous year; the graduate program experienced a decrease in fall enrollment from 35 in Fall 2016 to 26 in 2017. A review of the graduate and undergraduate curriculums is underway to ensure we are meeting the industry's knowledge and skill requirements; (b) For the year we graduated 26 undergraduate majors (4 in December and 22 in May) and 9 graduate students (5 in December and 4 in May); (c) Faculty members provided students with the following external experiences: 2 (two) students were given the opportunity to attend the NFL Career Workshop in Atlanta, GA; 2 (two) students were given the opportunity for a paid internship with CF Charities in Philadelphia; and the SMO provided an excellent Conference and networking experience on campus. (d) As for the faculty's own professional development, service and scholarship Dr. Chen had 2 research presentations at a national conference, Dr. Chen complete the 2nd edition of a book chapter, he also had 1 peer-reviewed publication, all faculty members have participated in academic workshops and/or conferences for academic development and have served on various committees on the international, national, and campus levels.

**Unit(s) Profile**
The Department has 5 (five) full time faculty; 4 tenured faculty members and 1 not tenured. Faculty members by name and rank are as follows: (1) Dr. Li Chen (Full professor and tenured) (2) Dr. Janet Blade (Associate Professor and tenured) (3) Dr. Mark Still (Associate Professor, tenured) (4) Dr. Lifang Zhang (Associate Professor, tenured) (5) Mr. Maurice Suggs (Instructor/Lecturer, not tenured). Unit(s) Initiatives accomplished in this cycle Provided three valuable external professional development initiatives for our students. **Unit(s) Profile**

The Department has 5 (five) full time faculty; 4 tenured faculty members and 1 not tenured. Faculty members by name and rank are as follows: (1) Dr. Li Chen (Full professor and tenured) (2) Dr. Janet Blade (Associate Professor and tenured) (3) Dr. Mark Still (Associate Professor, tenured) (4) Dr. Lifang Zhang (Associate Professor, tenured) (5) Mr. Maurice Suggs (Instructor/Lecturer, not tenured).

**Unit(s) Initiatives accomplished in this cycle**

Provided three valuable external professional development initiatives for our students

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

We are working on means to assess student professional disposition beginning in Fall 2018 semester.

**Bibliography of Scholarly Products published in 2017-2018 by unit members.** Colleges should just list the number of publication listed by the departments.

Dr. Zhang is a reviewer for the *International Journal of Sport Management*.

**Undergraduate Program Information:** Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Quality of Program

Departmental Goal #1: Ensure high quality educational programs that are guided by the standards and ethics of the related professional organizations and accrediting agencies. The department should have a high quality faculty team (at least 70% faculty members should have terminal degrees) to ensure quality teaching and programs. All faculty members should be able to use advanced technology and apply updated knowledge and skills to classroom teaching. The department encourages each faculty member to attend national or regional professional conferences for advancing their knowledge and skills and enhance effective classroom teaching.

Objective 1-1: Preparing Program to Obtain Accreditations of Sport Management.
Objective 1-2: Develop a Coaching Minor and Recreation Management Minor for undergraduate program in next 3 years.
Objective 1-3: Increase enrollment of graduate and undergraduate students in the department across major and minors.
Objective 1-4: All students will be involved in community service activities as part of their learning experiences through internship and fieldwork.
Objective 1-5: Ensure the curricula meeting the industry standards and are consistent with future trends of the profession.

Objectives 1-6: Ensure that the educational programs provide and uphold professional values and ethical standards.

O/O 1: Accreditation (1)
Preparring Program to Obtain Accreditation of Sport Management.
Relevant Associations:

Strategic Plan Associations:
College of Business
1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
8 Improve the process of program review to ensure compliance with requirements for certification and accreditation.
9 Develop and implement plans and programs to increase placement of COB graduates and encourage businesses to recruit COB graduates.

O/O 2: Offering minors (1)
Offering Coaching Minor and Recreation Management Minor for undergraduate program.

Relevant Associations:

Strategic Plan Associations:
College of Business
1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
2 Develop programs in teaching and research that are supportive of scholarly activity by faculty that foster student participation.

O/O 3: Minors enrollment (1)
Increase enrollment of graduate and undergraduate students in the department across major and minors.

Relevant Associations:

Strategic Plan Associations:
College of Business
1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
2 Develop programs in teaching and research that are supportive of scholarly activity by faculty that foster student participation.

O/O 4: Community service (1)
All students will be involved in community service activities as part of their learning experiences through internship and fieldwork.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
1.2 Implement the University Program Review process to ensure quality educational experiences
1.3 All curricula include service learning activities
1.4 Provide interdisciplinary learning experiences for students
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies

**O/O 5: Industry standards (1)**

Ensure the curricula meeting the industry standards and are consistent with future trends of the profession.

**Relevant Associations:**

**Strategic Plan Associations:**

- College of Education, Health & Public Policy
  1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
  1.2 Implement the University Program Review process to ensure quality educational experiences
  1.3 All curricula include service learning activities
  1.4 Provide interdisciplinary learning experiences for students
  1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies

**O/O 6: Values and ethics (1)**

Ensure that the educational programs provide and uphold professional values and ethical standards.

**Relevant Associations:**

**Strategic Plan Associations:**

- College of Education, Health & Public Policy
  1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
  1.2 Implement the University Program Review process to ensure quality educational experiences
  1.3 All curricula include service learning activities
  1.4 Provide interdisciplinary learning experiences for students
  1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies

**G 2: Quantity of Learning**

**Departmental Goal #2:** Prepare students to graduate with the knowledge and ability to provide excellent service to the industries of sport, recreation, fitness industry, and communities.
Objective 2-1: Develop student leadership through course work, internship, and student governing bodies, and campus activities.

Objective 2-2: Cultivate an environment of academic and professional excellence.

Objective 2-3: Ensure that students have gained necessary professional and analytic ability and experience.

Objective 2-4: Provide quality student academic advising and support services.

Objective 2-5: Develop an alumni network for student recruitment and retention system.

O/O 7: Student leadership (2)
Develop student leadership through course work, internship, and student governing bodies, and campus activities.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
1.2 Implement the University Program Review process to ensure quality educational experiences
1.3 All curricula include service learning activities
1.4 Provide interdisciplinary learning experiences for students
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.1 Students are provided with leadership opportunities through course work and academic governance
2.2 Cultivate an environment of academic and professional excellence
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy
2.4 Student academic support and career planning services are provided within the department
2.5 Develop and/or expand student recruitment and retention strategies
2.6 Alumni network actively participates in the College

Related Measures:

M 2: Activities with sport industry
1. Number of faculty and students engaged and involved in activities with sport industry:
All 4 faculty members have positively engaged with sport industry. Drs, Chen, Zhang, and Mr. Still directly engaged with International Speedway, Wilmington Blue Rocks, Recreation Department of Dover, and Philadelphia 76ers with the activities of placing internship, consultation, and guest lectures made by industry leaders. Dr. Blade has communicated with Golf court of Dover with student internship.

Source of Evidence: Academic direct measure of learning - other

**Target:**
1. students involvement in sport management association
2. leadership experience in sport industry through internship

**Findings (2016-2017) - Target: Met**
Majority of our students are in the Sport Management Organization. All of the seniors completed an internship.

**Findings (2015-2016) - Target: Met**
Majority of students are involved in the SMO. All of the graduating seniors have completed an internship.

**Findings (2012-2013) - Target: Met**
Yes, majority of students are involved in sport management association. All seniors have experienced the leadership in sport industry through internship.

**Findings (2011-2012) - Target: Met**
We have achieved this objective.

**Findings (2009-2010) - Target: Met**
(1) Sport management association has provided leadership opportunity for students. The executive board of the association has experienced leadership and organizational skills during their services.
(2) All students who have placed in internship with our partnership have experienced in first line management.

**O/O 8:Excellence (2)**
Cultivate an environment of academic and professional excellence.

**Relevant Associations:**

**Strategic Plan Associations:**

**College of Education, Health & Public Policy**
1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
1.2 Implement the University Program Review process to ensure quality educational experiences
1.3 All curricula include service learning activities
1.4 Provide interdisciplinary learning experiences for students
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.1 Students are provided with leadership opportunities through course work and academic governance
2.2 Cultivate an environment of academic and professional excellence
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy
2.4 Student academic support and career planning services are provided within the department
2.5 Develop and/or expand student recruitment and retention strategies
2.6 Alumni network actively participates in the College

Source of Evidence: Academic direct measure of learning - other

**Target:**
All faculty members should work toward excellence in professional competencies.

**Findings (2016-2017) - Target: Met**
Faculty members continue to work towards professional competencies.

**Findings (2015-2016) - Target: Met**
All faculty members continue to work toward excellence in professional competencies.

**Findings (2015-2016) - Target: Met**
All faculty members continue to work toward excellence in professional competencies.

**Findings (2012-2013) - Target: Met**
yes, all faculty members have worked toward improvement of professional competencies.

**Findings (2011-2012) - Target: Met**
We have met the objectives.

**Findings (2009-2010) - Target: Met**
All faculty members participated in the professional conference or workshops.
One faculty member is working toward finishing the doctoral degree.
O/O 9: Professional experience (2)
Ensure that students have gained necessary professional and analytic ability and experience.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Education, Health & Public Policy

1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
1.2 Implement the University Program Review process to ensure quality educational experiences
1.3 All curricula include service learning activities
1.4 Provide interdisciplinary learning experiences for students

**M 2: Activities with sport industry**
1. Number of faculty and students engaged and involved in activities with sport industry:
All 4 faculty members have positively engaged with sport industry. Drs, Chen, Zhang, and Mr. Still directly engaged with International Speedway, Wilmington Blue Rocks, Recreation Department of Dover, and Philandelphia 76ers with the activities of placing internship, counsultation, and guest lectures made by industry leaders. Dr. Blade has communicated with Golf court of Dover with student internship.

Source of Evidence: Academic direct measure of learning - other

**Target:**
Faculty members and students obtain more professional experiences through academic and practical activities with the industry.

**Findings (2016-2017) - Target: Met**
Faculty and students have worked with professionals in the sport industry.

**Findings (2015-2016) - Target: Met**
Faculty and students have worked with professionals in the sport industry.
Findings (2012-2013) - Target: Met
Yes, all faculty members and many students obtain professional experience in the industry. Dr. Blade has involved with NCAA, Dr. Zhang has conducted an international conference and tour of sport facility. Dr. Still has worked with NCAA D-1 football event. Dr. Li Chen has accessed the leadership with Alliance for Sport Business.

Findings (2011-2012) - Target: Met
We have achieved this objective.

Findings (2009-2010) - Target: Met
All faculty members and more students participated in the activities with sport industry and continue to obtain professional experience.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Continuing obtain experience
Established in Cycle: 2009-2010
department will seek for more opportunities for our faculty and students to gain more professional experience

O/O 10:Advising (2)

Provide quality student academic advising and support services.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
1.1 Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
1.2 Implement the University Program Review process to ensure quality educational experiences
1.3 All curricula include service learning activities
1.4 Provide interdisciplinary learning experiences for students
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.1 Students are provided with leadership opportunities through course work and academic governance
2.2 Cultivate an environment of academic and professional excellence
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy
2.4 Student academic support and career planning services are provided within the department
2.5 Develop and/or expand student recruitment and retention strategies
2.6 Alumni network actively participates in the College
Related Measures:

M 2: Activities with sport industry
1. Number of faculty and students engaged and involved in activities with sport industry:
All 4 faculty members have positively engaged with sport industry. Drs, Chen, Zhang, and Mr. Still directly engaged with International Speedway, Wilmington Blue Rocks, Recreation Department of Dover, and Philadelphia 76ers with the activities of placing internship, consultation, and guest lectures made by industry leaders. Dr. Blade has communicated with Golf court of Dover with student internship.

Source of Evidence: Academic direct measure of learning - other

Target:
Continue to provide advising service to our student majors.

Findings (2016-2017) - Target: Met
Faculty advised juniors and seniors.

Findings (2015-2016) - Target: Met
Faculty advised juniors and seniors.

Findings (2012-2013) - Target: Partially Met
Yes, all faculty members have provided advising services to our students: Dr. Blade advised graduate students, Dr. Still advised undergraduate students (last name N-Z); Dr. Chen advised all minor students for S7. Dr. Zhang advised undergraduate students (last name A-M) but with some minor issues.

Findings (2011-2012) - Target: Partially Met
We are good on this part but need to improve by adding one specialist of advising.

Findings (2009-2010) - Target: Partially Met
All faculty members provided quality service to our students. However, there has been advising errors reported by the students and other parties.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

enhancing advising quality
Established in Cycle: 2009-2010
1. sending junior faculty to workshop
2. Department workshop for advising students in new curriculum.

implementing in next year
Established in Cycle: 2012-2013
enhancing importance of advising in the faculty meeting and have weak faculty members to attend workshop.
O/O 11: Alumni network (2)
Develop an alumni network for student recruitment and retention system.

**Relevant Associations:**

**Strategic Plan Associations:**

**College of Education, Health & Public Policy**

1. Obtain and/or maintain accreditation of programs values and ethical standards identified by their professional organizations and accrediting bodies
2. Implement the University Program Review process to ensure quality educational experiences
3. All curricula include service learning activities
4. Provide interdisciplinary learning experiences for students
5. Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies

**Related Measures:**

**M 2: Activities with sport industry**

1. Number of faculty and students engaged and involved in activities with sport industry:

All 4 faculty members have positively engaged with sport industry. Drs. Chen, Zhang, and Mr. Still directly engaged with International Speedway, Wilmington Blue Rocks, Recreation Department of Dover, and Philadelphia 76ers with the activities of placing internship, consultation, and guest lectures made by industry leaders. Source of Evidence: Academic direct measure of learning - other

**Target:**

keep communicating with alumni of the program to obtain feedback.

**Findings (2016-2017) - Target: Met**

Alumni presented at the SMO Conference and have provided feedback regarding the program and program offerings.

**Findings (2015-2016) - Target: Met**

Alumni presented at the Sport Management Conference and continue to provide feedback about strengths and weaknesses of the program.
Findings (2011-2012) - Target: Met
We have communicate with alumni and invited them back to give presentations.

Findings (2009-2010) - Target: Met
Have held sport management leadership conference and have alumni as guest speakers to our current students.
Work on the alumni survey to gather input for the program future.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Alumni survey
Established in Cycle: 2009-2010

Keep alumni survey each year.

G 3: Quality of Faculty

Departmental Goal #3: Enhance faculty ability and quality to provide excellent teaching, research and service.

Objective 3-1: Recruit and retain high quality faculty who maintain up to date knowledge in their fields.

Objective 3-2: Support an environment of high quality teaching.

Objective 3-3: Promote faculty scholarship/research.

Objective 3-4: Promote faculty service in the community and university.

O/O 12: High quality faculty (3)
Recruit and retain high quality faculty who maintain up to date knowledge in their fields.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
3.1 Recruit and retain high quality faculty to deliver the curricula
3.2 Support an environment of high quality teaching
3.3 Faculty are engaged in scholarship and/or research
3.4 Promote faculty service in the community
3.5 Faculty provide high quality advising and mentoring

Related Measures:

M 3: Evaluations
1. Student evaluation scores: The students evaluation scores ranged from average 2.9 to 4.5 for all courses that indicate above average satisfaction of student learning.

Source of Evidence: Evaluations
2. Peer evaluation scores: The peer evaluation scores for junior faculty members ranged from 3.5 to 4.5 with above average to good performance of faculty.

Target:
More that 80% department faculty hold doctoral degree. All faculty members keep updated knowledge in the profession.

Findings (2016-2017) - Target: Met
80% of the department faculty hold doctorate degrees and knowledgeable of current developments in the profession.

Findings (2015-2016) - Target: Met
80% of department faculty hold doctoral degrees. All faculty members keep current with applicable knowledge and skills.

Findings (2012-2013) - Target: Met
Yes, all faculty members have doctoral degrees.

Findings (2011-2012) - Target: Met
All faculty now have held doctoral degrees. We have achieved this objective.

Findings (2009-2010) - Target: Met
Three faculty members with doctoral degrees and one is ABD. All faculty members participated in national conferences or workshop.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Doctoral Degree
Established in Cycle: 2009-2010
One faculty member should complete doctoral degree to achieve 100% faculty members holding doctoral degrees.
Department encour...
Keep quality of faculty
Established in Cycle: 2009-2010
The department will keep enhancing quality of faculty.

O/O 13: High quality teaching (3)
Support an environment of high quality teaching.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
  3.1 Recruit and retain high quality faculty to deliver the curricula
  3.2 Support an environment of high quality teaching
  3.3 Faculty are engaged in scholarship and/or research
  3.4 Promote faculty service in the community
  3.5 Faculty provide high quality advising and mentoring

Related Measures:

M 3: Evaluations
1. Student evaluation scores: The students evaluation scores ranged from average 2.9 to 4.5 for all courses that indicate above average satisfaction of student learning.

Source of Evidence: Evaluations
2. Peer evaluation scores: The peer evaluation scores for junior faculty members ranged from 3.5 to 4.5 with above average to good performance of faculty.

Target:
Student evaluation scores near 4.00 in average.

Findings (2016-2017) - Target: Met
Number of student evaluations was not sufficient enough to provide validity and reliability to scores. However, most scores were close to 4.0.

Findings (2015-2016) - Target: Not Reported This Cycle
N/A Student evaluations were not available.

Findings (2012-2013) - Target: Met
The student evaluation scores near 4.00 on 5 point scale.

Findings (2011-2012) - Target: Met
We have partially achieved this. with 3/4 of faculty members having 4.00 student evaluation.

Findings (2009-2010) - Target: Partially Met
The student evaluation scores in average ranged from 2.9 to 4.5.
Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Teaching Improvement
Established in Cycle: 2009-2010
All faculty should continue to improve teaching and update the class syllabi.

O/O 14: Scholarship & research (3)
Promote faculty scholarship/research.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
3.1 Recruit and retain high quality faculty to deliver the curricula
3.2 Support an environment of high quality teaching
3.3 Faculty are engaged in scholarship and/or research
3.4 Promote faculty service in the community
3.5 Faculty provide high quality advising and mentoring

Related Measures:

M 3: Evaluations
1. Student evaluation scores: The students evaluation scores ranged from average 2.9 to 4.5 for all courses that indicate above average satisfaction of student learning.

Source of Evidence: Evaluations
2. Peer evaluation scores: The peer evaluation scores for junior faculty members ranged from 3.5 to 4.5 with above average to good performance of faculty.

Target:
The department should have 3/4 of faculty members participate in scholarly work including research, presentation, and writing grants.

Findings (2016-2017) - Target: Met
All faculty members have done some type of scholarly work.

Findings (2015-2016) - Target: Met
All faculty department faculty participate in some form of scholarly work.

Findings (2012-2013) - Target: Met
Yes, Drs. Chen, Zhang, and Still have had scholarly in research manuscripts and presentations.
Findings (2011-2012) - Target: Met
Yes, we have achieved this objective. More 3/4 faculty members participated in research project.

Findings (2009-2010) - Target: Partially Met
1. All faculty members have attended national conferences or workshops.
2. Published 6 research papers and abstracts and one is under review
3. Presented 3 scholarly papers at national conferences
4. Wrote 4 grants proposal and 2 have been awarded.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Research group work
Established in Cycle: 2009-2010
develop research projects that more than one faculty member should participate.

O/O 15: Community service (3)
Promote faculty service in the community and university.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
  3.1 Recruit and retain high quality faculty to deliver the curricula
  3.2 Support an environment of high quality teaching
  3.3 Faculty are engaged in scholarship and/or research
  3.4 Promote faculty service in the community
  3.5 Faculty provide high quality advising and mentoring

Related Measures:

M 3: Evaluations
1. Student evaluation scores: The students evaluation scores ranged from average 2.9 to 4.5 for all courses that indicate above average satisfaction of student learning.

Source of Evidence: Evaluations
2. Peer evaluation scores: The peer evaluation scores for junior faculty members ranged from 3.5 to 4.5 with above average to good performance of faculty.

Target:
All faculty members should provide community services.

Findings (2016-2017) - Target: Met
All faculty members have done community service.
Findings (2015-2016) - Target: Not Reported This Cycle

Unsure if all faculty have completed this objective due to lack of information.

Findings (2012-2013) - Target: Met
Yes, all faculty members have provided community service.

Findings (2011-2012) - Target: Met
Yes, more than 3/4 of faculty members have participated in community service.

Findings (2009-2010) - Target: Met
All faculty members have participated in community services including consultation, interaction, member of organization:
1. Sport Commission of Delaware (Chen)
2. Department of Recreation (Chen, Zhang, Still)
3. International Speedway (Chen, Zhang, Still)
4. Golf court of Dover (Blade)
5. Athletics of DSU (Blade, Chen, Still, Zhang)

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Community Service
Established in Cycle: 2009-2010
Keep good relationship with community

G 4:Partnerships

Departmental Goal #4: Perform as a leading institution by participating in various organizations, schools, and communities with relationship or partnerships through service and outreach.

Objective 4-1: Encourage participation of community service through internship and partnerships.

O/O 16:Internships (4)
Encourage participation of community service through internship and partnerships.
Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
  4.1 Enhance community engaged partnerships and outreach

Related Measures:

M 4: Services & partnerships

1. Number of service provided to University, college, and department

A total of 24 services provided by the faculty members to the levels of department, college, university, state and regional, and the national professional association.

- Department committee service (8)
- College committee service (3)
- University Committees (5)
- State and regional Committees (3)
- National professional associations (5)

2. Number of partnerships established

A total of 6 partnerships have been established in sport related industries including:
- International Speedway, Dover (professional auto race)
- Wilmington Blue Rocks (professional minor league baseball)
- Department of Athletics, DSU
- Department of Recreation and Park, Dover, Delaware
- Center of Wellness and Recreation, DSU
- Philadelphia 76ers (professional basketball, NBA)

Source of Evidence: Academic direct measure of learning - other

Target:
Ensure Senior students have good experience through internship

Findings (2016-2017) - Target: Met
All students who completed an internship have reported it was a good experience.

Findings (2015-2016) - Target: Not Reported This Cycle
Information was not reported.

Findings (2012-2013) - Target: Met
Yes, 100% of seniors have reported that they have had positive experiences from their internship.

Findings (2011-2012) - Target: Met
Yes, all senior students have had a good experience in internship.
Findings (2009-2010) - Target: Met
1. All students who completed their internship reported good experience.
2. department established 5 partnership for student internship.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Internship experience
Established in Cycle: 2009-2010
Keep interaction with sport industry for more opportunity of internship for our students.

G 5: Scholarship

Departmental Goal #5: Become a leading institution in community in Research and Scholarship.

Objective 5-1: To encourage student research with faculty especially for graduate students.
Objective 5-2: To increase the quantity and quality of research activities involving faculty and students.

Objective 5-3: To collaborate with state, national and international research institutions for conducting research projects of faculty and students.
Objective 5-4: Increase submission of research grants to support scholarly activities.

Objective 5-5: Build research laboratories for enhancing teaching effectiveness and supporting faculty/student research.

O/O 17: Student research (5)
To encourage student research with faculty especially for graduate students.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
  5.1 Cultivate an environment that reinforces the importance of research and publication
  5.2 Develop research centers that provide outcome based, community relevant research and policy

Related Measures:

M 5: Publications & grants
1. Quantity and quality of publications and presentations:
2. Number of grants submitted and awarded

Source of Evidence: Academic direct measure of learning - other

**Target:**
Encouraging students participating in research activities.

**Findings (2016-2017) - Target: Met**
Students have completed research activities and await the opportunity to present.

**Findings (2015-2016) - Target: Met**
Two undergraduate students presented research at a professional conference.

**Findings (2012-2013) - Target: Met**
Yes, the department has 5 graduate students participated in the research projects and the results have been presented at national conference. Zou Liyi has received award in DSU research symposium hosted by the graduate studies.

**Findings (2011-2012) - Target: Met**
Our graduate and undergraduate students have participated in the research activities.

**Findings (2009-2010) - Target: Partially Met**
Have 3 students participated in research projects.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Increasing number of students in research**
*Established in Cycle: 2009-2010*
Continuing increment of students participated in research in master program and undergraduate program.

**O/O 18:Increase research activities (5)**
To increase the quantity and quality of research activities involving faculty and students.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Education, Health & Public Policy
5.1 Cultivate an environment that reinforces the importance of research and publication
5.2 Develop research centers that provide outcome based, community relevant research and policy

**Related Measures:**

**M 5: Publications & grants**

1. Quantity and quality of publications and presentations:
2. Number of grants submitted and awarded

Source of Evidence: Academic direct measure of learning - other

**Target:**
Three publications
Three presentations at national conference
Three proposal of grants submitted or awarded

**Findings (2016-2017) - Target: Not Reported This Cycle**
Information not available.

**Findings (2015-2016) - Target: Not Reported This Cycle**
Information was not available.

**Findings (2012-2013) - Target: Met**

The department has 3 presentations accepted by national and international conferences. 3 manuscripts have been in writing and revision for submission. 3 grant proposals (one from Dr. Chen, one for Dr. Zhang, one for Dr. Still).

**Findings (2011-2012) - Target: Partially Met**
We have partially met this objective with 3/4 of faculty members presented and published scholarly work.

**Findings (2009-2010) - Target: Met**

1. Publications:

2. Number of grants submitted and awarded:

- Liu, F, Chen, L, & Moore, C. International Education Program Grant Submitted to US Department of Education (2010, $300,000 for 3 years)

- Chen, Federal Grant Submitted for Establishing Coaching Program at HBCU Institution (09, title III, $19,500)

- Chen, Federal Grant Submitted for Obtaining National Accreditation for Sport Management Program (2009. Title III, $9,800)

- Chen, Federal Grant Awarded to Conduct Evaluating National Survey of Accreditation for Sport Management (2009, Title III, $11,655.00).

- Chen, Professional Development Grant Obtained, Delaware State University (2010, $1,800)
• Zhang, Professional Development Grant Obtained from Delaware State University (2010, $1,700)

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Increasing scholarly work**
*Established in Cycle: 2009-2010*
Encouraging more scholarly work in departmental faculty members.

**O/O 19: State, national research (5)**
To collaborate with state, national and international research institutions for conducting research projects of faculty and students.

**Relevant Associations:**

**Strategic Plan Associations:**
*College of Education, Health & Public Policy*
- 5.1 Cultivate an environment that reinforces the importance of research and publication
- 5.2 Develop research centers that provide outcome based, community relevant research and policy

**Related Measures:**

**M 5: Publications & grants**
1. Quantity and quality of publications and presentations:
2. Number of grants submitted and awarded

Source of Evidence: Academic direct measure of learning - other

**Target:**
department should have 4 research projects at state and national levels.

**Findings (2016-2017) - Target: Not Reported This Cycle**
Information not available.

**Findings (2015-2016) - Target: Not Reported This Cycle**
Information was not reported.
Findings (2012-2013) - Target: Met
Yes, the department has 4 research projects at national levels. (Dr. Chen has 3, Dr. Zhang has 1).

Findings (2011-2012) - Target: Met
We have 4 presentations this year and 1 publication. So we met.

Findings (2009-2010) - Target: Met
The department faculty members have produced 8 research products in this year.

**O/O 20:Scholarly activities (5)**
Increase submission of research grants to support scholarly activities.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Education, Health & Public Policy
5.1 Cultivate an environment that reinforces the importance of research and publication
5.2 Develop research centers that provide outcome based, community relevant research and policy

**Related Measures:**

**M 5:Publications & grants**
1. Quantity and quality of publications and presentations:
2. Number of grants submitted and awarded

Source of Evidence: Academic direct measure of learning - other

**Target:**
All faculty members of department should participate in scholarly activities.

**Findings (2016-2017) - Target: Met**
All department members have participated in scholarly activities.

**Findings (2015-2016) - Target: Not Reported This Cycle**
Information was not available.

**Findings (2012-2013) - Target: Met**
Yes, all faculty members have participated in scholarly activities (Dr Blade advised a dissertation, Dr. Zhang has worked on a manuscript, Dr. Chen has worked on a manuscript, Dr. Still is working on his manuscript).

**Findings (2011-2012) - Target: Met**
So we have met this by having

**Findings (2009-2010) - Target: Partially Met**
There have been 8 scholarly products produced by Dr. Chen and Dr. Zhang.
Mr. Still has worked on his dissertation.
3/4 faculty members have achieved the department goals.
Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Enhancing scholarly activities of faculty
Established in Cycle: 2009-2010
All faculty members should participate in the scholarly activities in coming year.

O/O 21: Build research laboratories (5)
Build research laboratories for enhancing teaching effectiveness and supporting faculty/student research.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
  5.1 Cultivate an environment that reinforces the importance of research and publication
  5.2 Develop research centers that provide outcome based, community relevant research and policy

Related Measures:

M 5: Publications & grants
1. Quantity and quality of publications and presentations:
2. Number of grants submitted and awarded

Source of Evidence: Academic direct measure of learning - other

Target:
Department may develop a research laboratory for research activities of faculty and students.

Findings (2016-2017) - Target: Met
Department has a computer lab that can be used for research.

Findings (2015-2016) - Target: Met
Department has a computer lab that can be used for research.

Findings (2012-2013) - Target: Met
Yes, the department has developed a computer research lab and is using by our faculty and students.

Findings (2011-2012) - Target: Met
We have operating a research lab with limited computers.

Findings (2009-2010) - Target: Partially Met
The research lab of movement sciences has been established.
The research/computer lab of sport management has been planned but not function due to limited budget.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Research/computer Lab**
*Established in Cycle: 2009-2010*

The computer lab of sport management program should be established in 2010-2011 academic year.

**G 6:Internationalization**

**Departmental Goal #6: Enhance and facilitate international exchange programs.**

**Objective 6-1:** Promote international experiences and programs for all students and faculty.

**Objective 6-2:** Develop academic exchange programs with international institutions.

**Objective 6-3:** Provide opportunities for students learning in a global community.

**O/O 22:International experiences (6)**

Promote international experiences and programs for all students and faculty.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Education, Health & Public Policy
- 6.1 Promote international experiences and programs for all students
- 6.2 Become a World Health Organization/Pan American Health Organization Collaborating Center for Health Disparities

**Related Measures:**

**M 6:International programs**
1. Quantity and quality of international exchange projects

Source of Evidence: Academic direct measure of learning - other

**Target:**
Providing International experience for faculty and students.

**Findings (2016-2017) - Target: Partially Met**
2 faculty members have taught in our Sanming 3+1 program however students have not been given an opportunity to study abroad.
Findings (2015-2016) - Target: Partially Met

Three faculty members taught in our 3+1 program in Sanming China. Students have not been provided an opportunity to study abroad.

Findings (2012-2013) - Target: Met

The department has developed an international 3+1 program and will be implemented in Fall 2013. There will be one international visiting scholar coming in Fall 2013.

Findings (2011-2012) - Target: Met

We have hosted International delegations for 2 times and recruited 6 international graduate students. Hosted the Culture Camp on DSU campus.

Findings (2009-2010) - Target: Met

At least 2 faculty members involved in international exchange program (Drs. Chen and Zhang). Recruiting 6 Graduate Students from China (Hunan Normal University, Shangdon University, and Ningbo Tech University) Established and developed International Exchange Program with China

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

All faculty involving International program
Established in Cycle: 2009-2010
Encouraging all faculty members involved in international exchange program.

plan
Established in Cycle: 2015-2016
Create opportunities for students to study abroad.

O/O 23:International exchange programs (6)
Develop academic exchange programs with international institutions.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
6.1 Promote international experiences and programs for all students
6.2 Become a World Health Organization/Pan American Health Organization Collaborating Center for Health Disparities

Related Measures:

M 6:International programs
1. Quantity and quality of international exchange projects

Source of Evidence: Academic direct measure of learning - other
Target:
Establishing International Exchange Program

**Findings (2016-2017) - Target: Met**
Sanming 3+1 program.

**Findings (2015-2016) - Target: Met**
Department still has 3+1 program with Sanming University.

**Findings (2012-2013) - Target: Met**
The department has established an international 3+1 undergraduate sport management program with Sanming University of China and will be implemented in Fall 2013.

**Findings (2011-2012) - Target: Met**
We have worked on the international program that is 3+1 undergraduate program. It has been approved by DSU and Sanming University of China but pending on approval by Chinese Center Government.

**Findings (2009-2010) - Target: Met**
Established and developed International Exchange Program with China include:

- College of Sport Management, Beijing Sport University
- College of Physical Education and Sport, Hunan Normal University
- College of Sport and Physical Education, Shangdon University
- College of Sport and Physical Education, Jishou University

Activities include: (1) Lectures to graduate students and faculty to those universities; (2) exchange academic and research ideas with the universities; (3) developed academic exchange programs; and (4) facilitating exchange activities of university leadership.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Enhancing quality of international program**
*Established in Cycle: 2009-2010*
Department should enhance quality of international program with all faculty members.

**O/O 24: Global community (6)**
Provide opportunities for students learning in a global community.

**Relevant Associations:**
Strategic Plan Associations:
College of Education, Health & Public Policy
6.1 Promote international experiences and programs for all students
6.2 Become a World Health Organization/Pan American Health Organization Collaborating Center for Health Disparities

Related Measures:

M 6: International programs
1. Quantity and quality of international exchange projects

Source of Evidence: Academic direct measure of learning - other

Target:
Increasing global community relations

Findings (2016-2017) - Target: Partially Met
Two faculty members taught in China.

Findings (2015-2016) - Target: Met
Three department faculty members taught at Sanming Univ over the summer.

Findings (2012-2013) - Target: Met
The department has done this well. Dr. Zhang has cooperated with China's sport facility conference. Dr. Chen has lectured in China for 7 universities during his academic leave.

Findings (2011-2012) - Target: Met
Yes, the faculty members have involved international program to present, lecture, and exchange academic ideas.

Findings (2009-2010) - Target: Met
The faculty members have provided academic services to global community that included:
(1) Lectures to graduate students and faculty to those universities; (2) exchange academic and research ideas with the universities; (3) developed academic exchange programs; and (4) facilitating exchange activities of university leadership.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Continuing on this effort
Established in Cycle: 2009-2010
The department should continue this effort with all faculty members contributed.

G 7: Staff Support
Department Goal #7: Enhance staff knowledge and ability to provide support for the departmental activities.

Objective 7-1: Improve staff capability to keep current on professional skills and ethics.

Objective 7-2: Ensure that staff and student assistants are aware of policies, procedures and working ethics at the department.

O/O 25: Staff (7)

Improve staff capability to keep current on professional skills and ethics.

Relevant Associations:

Strategic Plan Associations:

College of Education, Health & Public Policy

7.1 Promote staff capability to keep current on professional skills and changes in University computer programs

Related Measures:

M 7: Professional endeavors

1. Quantity and quality of professional endeavors.

Source of Evidence: Academic direct measure of learning - other

Target:

Quality and quantity of staff to support department.

Findings (2016-2017) - Target: Met

Department has 1 secretary, 2 students workers and 1 graduate assistant.

Findings (2015-2016) - Target: Met

The department has 1 secretary, 3 student workers and 1 graduate assistant.

Findings (2012-2013) - Target: Met

The department has one secretary who holds a MBA and functions well in department office management.
Findings (2011-2012) - Target: Partially Met
We only have one staff and need more human resources to help department function.

Findings (2009-2010) - Target: Partially Met
The department has experienced difficulty on staff quality. We found that temporary staff performed better that others.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Improvement staff performance
Established in Cycle: 2009-2010
The effort should be done with all parties (administration and staff union)

O/O 26:Ethics (7)
Ensure that staff and student assistants are aware of policies, procedures and working ethics at the department.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
7.1 Promote staff capability to keep current on professional skills and changes in University computer programs

Related Measures:

M 7:Professional endeavors
1. Quantity and quality of professional endeavors.

Source of Evidence: Academic direct measure of learning - other

Target:
All faculty and staff should hold the acceptable standards of ethics and consistent performance.

Findings (2016-2017) - Target: Met
Department faculty and staff have met this objective.

Findings (2015-2016) - Target: Met
For the most part, the department faculty and staff have met this objective.
Findings (2012-2013) - Target: Met
Yes, there has been no report for any violation in DSU policies and professional standards, and ethics issue among the department faculty and staff.

Findings (2011-2012) - Target: Met
Yes. We have achieved this objective.

Findings (2009-2010) - Target: Partially Met
All faculty and staff of department have been basically met the standards defined by the university.

G 8:Service

Departmental Goal #8: Provide high quality services to the university and community.

Objective 8-1: All faculty members of the department should participate in the committees of the department, college, and university to provide services in the academic environment.

Objective 8-2: All faculty members of department should involve in the service related to off campus recruiting, promotion, public relations, professional consultation, and involvement of professional organizations and community.

O/O 27: Committee service (8)
All faculty members of the department should participate in the committees of the department, college, and university to provide services in the academic environment.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
9.1 Develop an assessment plan to measure each program’s effectiveness in achieving its goals and objectives
9.2 Develop and implement a student outcome assessment plan

Related Measures:

M 8: Faculty service
1. Number of committees faculty participate on

Source of Evidence: Academic direct measure of learning - other

2. Number of community activities faculty engaged in

**Target:**
All faculty should participate in committee service at different levels.

**Findings (2016-2017) - Target: Met**
All faculty members have served on committees at various levels.

**Findings (2015-2016) - Target: Met**
Department faculty members have served on various committees at different levels.

**Findings (2012-2013) - Target: Met**
Yes, all faculty have participated in the committee service at national, state, DSU, College, and department (see personal files in the summary.

**Findings (2011-2012) - Target: Met**
Yes, we have achieved this.
1. national level offices = 3;
2. state level offices = 2
3. university level = 3.

**Findings (2009-2010) - Target: Met**
1. Number of committees faculty participate on
   (1) A total number of committees faculty participated in is 24 capacities. They have contributed significantly to the profession, university, college, and department.

2. Number of community activities faculty engaged in
   (2) A total number of community activities departmental faculty engaged in is 13. They have provided professional services to the community in large.

**O/O 28:Departmental service (8)**
All faculty members of department should involve in the service related to off campus recruiting, promotion, public relations, professional consultation, and involvement of professional organizations and community.
Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy

9.1 Develop an assessment plan to measure each program's effectiveness in achieving its goals and objectives
9.2 Develop and implement a student outcome assessment plan

Related Measures:

M 8: Faculty service
1. Number of committees faculty participate on

Source of Evidence: Academic direct measure of learning - other

2. Number of community activities faculty engaged in

Target:
All faculty members should provide service to the department and students.

Findings (2016-2017) - Target: Met
All faculty members have served the Department and its students.

Findings (2015-2016) - Target: Met
All faculty members have served the department and students in some capacity.

Findings (2012-2013) - Target: Met
Yes, all faculty members have provided services and to the department by participating in the committee and advising the students.

Findings (2011-2012) - Target: Met
Yes, we have had but need to improve.

Findings (2009-2010) - Target: Met
All faculty members of department have served at department committees and participated in the Leadership Conference of Sport Management.

G 9: Resources
Departmental Goal #9: Increase Financial and Human resources to ensure program growth.

Objective 9-1: Promote and increase number and amount of grants to support academic programs.

Objective 9-2: Develop relationships with agencies, community based organizations and stakeholders of the profession.

Objective 9-3: Encourage fundraising activities and contacts with other industry to support academic programs.

Objective 9-4: Develop and implement a marketing and financial plan for the department.

O/O 29: Increase grants (9)

Promote and increase number and amount of grants to support academic programs.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
9.1 Develop an assessment plan to measure each program’s effectiveness in achieving its goals and objectives
9.2 Develop and implement a student outcome assessment plan

Related Measures:

M 9: Grants (9)

1. Number of grants awarded and attempts made by the department members.

Source of Evidence: Project, either individual or group

Target:

at least 3 grants writing should be made and received 2.

Findings (2016-2017) - Target: Not Reported This Cycle
Information not available at this time.

Findings (2015-2016) - Target: Not Reported This Cycle
Information was not available.
Findings (2012-2013) - Target: Partially Met
The department has made 2 grants proposals (one from Dr. Chen, one from Dr. Zhang) but are unable to receive them due to limited funds available.

Findings (2011-2012) - Target: Met
yes, we have had 4 grants writing and all are approved.

Findings (2009-2010) - Target: Met
A total number of grants awarded is 4 including federal title III grants and Internal grants.
A total of grants attempts are 5.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

writing more
Established in Cycle: 2009-2010
encouraging faculty to write more.

encourage to writing more
Established in Cycle: 2012-2013
encourage more grant writing even if limited resources.

O/O 30:Agency relationships (9)
Develop relationships with agencies, community based organizations and stakeholders of the profession.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
9.1 Develop an assessment plan to measure each program’s effectiveness in achieving its goals and objectives
9.2 Develop and implement a student outcome assessment plan

O/O 31:Fundraising (9)
Encourage fundraising activities and contacts with other industry to support academic programs.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
9.1 Develop an assessment plan to measure each program’s effectiveness in achieving its goals and objectives
9.2 Develop and implement a student outcome assessment plan

Related Measures:
M 9:Grants (9)
1. Number of grants awarded and attempts made by the department members.

Source of Evidence: Project, either individual or group

**Target:**
encouraging fundraising activities in the department and student organization.

**Findings (2016-2017) - Target: Met**
The SMO raised funds through working with Athletics.

**Findings (2015-2016) - Target: Not Reported This Cycle**
Information was not available.

**Findings (2012-2013) - Target: Met**
The student organization has conducted fundraising activities by participating in the athletic events.

**Findings (2011-2012) - Target: Met**
we have worked on fundraising, especially from Sport Management Association.

**Findings (2009-2010) - Target: Met**
Sport Science Organization continued to raise funds for student activities (Mr. Still as advisor).

**O/O 32: Marketing/financial plan (9)**

Develop and implement a marketing and financial plan for the department.

**Relevant Associations:**

**Strategic Plan Associations:**
**College of Business**
1. Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
2. Develop programs in teaching and research that are supportive of scholarly activity by faculty that foster student participation.

**Related Measures:**

**M 9: Grants (9)**

1. Number of grants awarded and attempts made by the department members.

Source of Evidence: Project, either individual or group

**Target:**
Making a proper marketing and financial plan for the graduate and undergraduate programs.
Findings (2016-2017) - Target: Not Reported This Cycle
Information not available.

Findings (2015-2016) - Target: Not Reported This Cycle
Information not available.

Findings (2012-2013) - Target: Met
Yes, the department has submitted the proposal on how to managing and fiancing the international program.

Findings (2011-2012) - Target: Partially Met
We have worked on it and need improvement.

Findings (2009-2010) - Target: Partially Met
1. Marketing plan for Coaching minor program has been done.
2. Marketing Plan for sport management undergraduate program has been implemented successful (program, broucher, publicity)
3. Marketing Plan for Sport Administration graduate program needs to be enhanced to recruit more quality students.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Improvement of graduate program
Established in Cycle: 2009-2010
More effort should be made for graduate program of sport administration in terms of marketing.

G 10: Department Operation

Departmental Goal #10: Assess and Evaluate the effectiveness of operation of the

Objective 10-1: Develop an assessment plan to measure each program's effectiveness in achieving its goal and objectives.

Objective 10-2: Develop and implement a student outcome assessment plan under the direction of the university and college.

Objective 10-3: Assess student progress by using standard methods of disciplines and national standards (e.g., NASPE, and NASSM).

Objective 10-4: Assess faculty progress relative to faculty development plans and their
professional goals.

**O/O 33: Assessment plan (10)**

Develop an assessment plan to measure each program's effectiveness in achieving its goal and objectives.

**O/O 34: Student outcome assessment (10)**

Develop and implement a student outcome assessment plan under the direction of the university and college.

**Related Measures:**

**M 10: Student satisfaction**

1. Number of complaints by students, parents, and others

Source of Evidence: Academic direct measure of learning - other

2. Exit Survey

**Target:**

More than 90% should be successfully pass required professional courses. Exit survey results should about average.

**Findings (2016-2017) - Target: Met**

All of the seniors successfully passed their required professional courses.

**Findings (2015-2016) - Target: Met**

Met objective.

**Findings (2012-2013) - Target: Met**

Yes, 90% seniors have passed their required senior courses and the exit survey have been positive for student satisfaction about the program.

**Findings (2011-2012) - Target: Met**

Our students satisfaction average is over 4.00 in 5-lickert scale.

**Findings (2009-2010) - Target: Met**

1. More than 90% of major students in sport management have achieved C or better in their core courses.
2. More than 80% of graduate students have passed their professional courses.
3. More than 90% of coaching minor students have succeeded in their major courses.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Improvement of learning outcome**
*Established in Cycle*: 2009-2010
Providing better teaching and advising services to our students.

**O/O 35: Student assessment (10)**
Assess student progress by using standard methods of disciplines and national standards (e.g., NASPE, and NASSM).

**Related Measures:**

**M 10: Student satisfaction**
1. Number of complaints by students, parents, and others

Source of Evidence: Academic direct measure of learning - other
2. Exit Survey

**Target:**
Students' satisfaction scores should be better than 3.0 in their course evaluation.

**Findings (2016-2017) - Target: Not Reported This Cycle**
Information not available.

**Findings (2015-2016) - Target: Not Reported This Cycle**
Information was not available.

**Findings (2012-2013) - Target: Met**

The students' satisfaction scores in course evaluation have demonstrated a positive level of satisfaction.

**Findings (2011-2012) - Target: Met**
We have achieved this goal.

**Findings (2009-2010) - Target: Partially Met**

The students majored in sport management, sport administration, and coaching minor have conducted their course evaluation with the average scores ranging from 2.8 to 4.5.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.
Improvement of teaching  
*Established in Cycle: 2009-2010*

continue to improve the teaching in all courses offered by the department.

**O/O 36:Faculty development (10)**

Assess faculty progress relative to faculty development plans and their professional goals.

**Related Measures:**

**M 10:Student satisfaction**

1. Number of complaints by students, parents, and others

Source of Evidence: Academic direct measure of learning - other

2. Exit Survey

**Target:**
All faculty in the department should develop their faculty competencies.

**Findings (2016-2017) - Target: Met**
All faculty members have worked on their faculty competencies.

**Findings (2015-2016) - Target: Not Reported This Cycle**
Information was not available.

**Findings (2012-2013) - Target: Met**
Yes, all faculty members have intent or action in development thier faculty competencies.

**Findings (2011-2012) - Target: Met**
We are all working on the development of faculty competencies.

**Findings (2009-2010) - Target: Partially Met**
A majority of faculty members have participated in faculty development activities (conference, workshop, lecture demonstration, meeting to discuss teaching and advising).

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.
encouraging faculty development
*Established in Cycle: 2009-2010*
All faculty members should attend conference and workshop in next year.

**Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**O/O 37: Matching Plan of College and University**
The department strategic plan matching the plan of college and university.

**Relevant Associations:**

**Strategic Plan Associations:**
*College of Education, Health & Public Policy*

1.1 Obtain and/or maintain accreditation of programs
   values and ethical standards identified by their professional organizations and accrediting bodies
1.2 Implement the University Program Review process to ensure quality educational experiences
1.3 All curricula include service learning activities
1.4 Provide interdisciplinary learning experiences for students
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.1 Students are provided with leadership opportunities through course work and academic governance
2.2 Cultivate an environment of academic and professional excellence
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy
2.4 Student academic support and career planning services are provided within the department
2.5 Develop and/or expand student recruitment and retention strategies
2.6 Alumni network actively participates in the College
3.1 Recruit and retain high quality faculty to deliver the curricula
3.2 Support an environment of high quality teaching
3.3 Faculty are engaged in scholarship and/or research
3.4 Promote faculty service in the community
3.5 Faculty provide high quality advising and mentoring
4.1 Enhance community engaged partnerships and outreach
5.1 Cultivate an environment that reinforces the importance of research and publication
5.2 Develop research centers that provide outcome based, community relevant research and policy
6.1 Promote international experiences and programs for all students
6.2 Become a World Health Organization/Pan American Health Organization Collaborating Center for Health Disparities
7.1 Promote staff capability to keep current on professional skills and changes in University computer programs
8.1 Increase the income from grants and service contracts each year
8.2 Develop and implement a 5 year plan for enhancing human resources across the College
8.3 Enhance relationships with agencies, community based organizations and industry stakeholders
8.4 Strengthen the Colleges’ financial base by establishing new fund raising activities, in cooperation with the University Development Office
8.5 Increase alumni involvement in fund raising and resource development functions
8.6 Develop a financial plan for the College
8.7 Develop and implement a marketing plan for College
9.1 Develop an assessment plan to measure each program’s effectiveness in achieving its goals and objectives
9.2 Develop and implement a student outcome assessment plan

Details of Action Plans for This Cycle (by Established cycle, then alpha)

All faculty involving International program
Encouraging all faculty members involved in international exchange program.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: International programs | Outcome/Objective: International experiences (6)

Alumni survey

Keep alumni survey each year.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Activities with sport industry | Outcome/Objective: Alumni network (2)

Coaching Minor Program
Coaching Minor Program has been offered in 2009-2010. It has been healthy with expected enrollment and attraction. For ensuring the program quality with established reputation, the following 3 actions must be taken:
1. Reviewing the minor program with input of experts in coaching field;
2. Revision of the program curriculum; and
3. Considering the Coaching Education Major in plan.
Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium
Implementation Description: continue to offer the minor and make necessary modification for the curriculum.
Projected Completion Date: 08/30/2011
Responsible Person/Group: Dr. Li Chen/ Dr. Chris Malone (adjunct professor)
Additional Resources Requested: Keep a half time professor as program coordinator.

Community Service
Keep good relationship with community

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Evaluations | Outcome/Objective: Community service (3)

Continuing obtain experience
department will seek for more opportunities for our faculty and students to gain more professional experience

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Activities with sport industry | Outcome/Objective: Professional experience (2)

Continuing on this effort
The department should continue this effort with all faculty members contributed.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: International programs | Outcome/Objective: Global community (6)

Doctoral Degree
One faculty member should complete doctoral degree to achieve 100% faculty members holding doctoral degrees. Department encourages all faculty to participate in professional development activities.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Evaluations | Outcome/Objective: High quality faculty (3)

encouraging faculty development
All faculty members should attend conference and workshop in next year.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Student satisfaction | Outcome/Objective: Faculty development (10)

enhancing advising quality
1. sending junior faculty to workshop
2. Department workshop for advising students in new curriculum.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Activities with sport industry | Outcome/Objective: Advising (2)

Enhancing quality of international program
Department should enhance quality of international program with all faculty members.

**Established in Cycle:** 2009-2010  
**Implementation Status:** In-Progress  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** International programs  
- **Outcome/Objective:** International exchange programs (6)

**Enhancing scholarly activities of faculty**  
All faculty members should participate in the scholarly activities in coming year.

**Established in Cycle:** 2009-2010  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Publications & grants  
- **Outcome/Objective:** Scholarly activities (5)

**Improvement of graduate program**  
More effort should be made for graduate program of sport administration in terms of marketing.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Grants (9)  
- **Outcome/Objective:** Marketing/financial plan (9)

**Improvement of learning outcome**  
Providing better teaching and advising services to our students.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
**Measure:** Student satisfaction | **Outcome/Objective:** Student outcome assessment (10)

**Improvement of teaching**

continue to improve the teaching in all courses offered by the department.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**  
Measure: Student satisfaction | Outcome/Objective: Student assessment (10)

**Responsible Person/Group:** All faculty members/

**Improvement staff performance**

The effort should be done with all parties (administration and staff union)

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: Professional endeavors | Outcome/Objective: Staff (7)

**Increasing number of students in research**

Continuing increment of students participated in research in master program and undergraduate program.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**  
Measure: Publications & grants | Outcome/Objective: Student research (5)

**Implementation Description:** faculty leading research projects with students involvement.
Increasing scholarly work
Encouraging more scholarly work in departmental faculty members.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Publications & grants | Outcome/Objective: Increase research activities (5)

Internship experience
Keep interaction with sport industry for more opportunity of internship for our students.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Services & partnerships | Outcome/Objective: Internships (4)

Keep quality of faculty
The department will keep enhancing quality of faculty.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Evaluations | Outcome/Objective: High quality faculty (3)

Implementation Description: All faculty attend national conference or workshops.
Responsible Person/Group: Dr. Li Chen

Recreation Management Minor
The department has planned to offer Recreation Management Minor last year. The proposal to plan has been approved by all level of the university. The following 3 actions need to be taken for the program:
1. Presenting implementing the program proposal in fall 2010 to all levels:
2. Review and revise the minor curriculum based on the input of experts in the field; and
3. Preparing facility and faculty to implement the program.

**Established in Cycle:** 2009-2010
**Implementation Status:** Planned
**Priority:** Medium

**Responsible Person/Group:** Dr. Li Chen
**Additional Resources Requested:** Summer Adjunct instructor
**Budget Amount Requested:** $0.00 (no request)

**Research group work**
develop research projects that more than one faculty member should participate.

**Established in Cycle:** 2009-2010
**Implementation Status:** Planned
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
**Measure:** Evaluations | **Outcome/Objective:** Scholarship & research (3)

**Research/computer Lab**
The computer lab of sport management program should be established in 2010-2011 academic year.

**Established in Cycle:** 2009-2010
**Implementation Status:** In-Progress
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
**Measure:** Publications & grants | **Outcome/Objective:** Build research laboratories (5)

**Sport Administration Graduate Program**
Sport Administration Graduate Program have developed an online format associated by the Distance Learning Office. It is currently on the process for approval. Upon approval, the following actions need to be taken:
1. Scheduling both on site and online programs that should not have time conflict for students' need and faculty availability;
2. Both delivery formats need to be consistent with national standards
3. Promotion effort should be enhanced for ensuring sufficient enrollment.
4. Faculty adjustment to cover the courses.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium

Responsible Person/Group: Dr. Jan Blade
Additional Resources Requested: Adjunct faculty may be needed if current full time faculty are unable to cover.

Sport Management Undergraduate Program Accreditation
(1) Continuing on data collection for second year;
(2) Monitoring revised curriculum; and
(3) Updating accreditation information.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Implementation Description: By the end of next May, the second set of data should be collected and analyzed. The minor adjustment should be made and reported to both COSMA and Title III program.
Projected Completion Date: 05/30/2011
Responsible Person/Group: Dr. Li Chen
Additional Resources Requested: Computer Lab should be finished and open to sport management students. Membership of COSMA fees need to be paid with $1,800.
Budget Amount Requested: $10,000.00 (recurring)

Teaching Improvement
All faculty should continue to improve teaching and update the class syllabi.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Evaluations | Outcome/Objective: High quality teaching (3)

writing more
encouraging faculty to write more.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Grants (9) | Outcome/Objective: Increase grants (9)

**encourage to writing more**
encourage more grant writing even if limited resources.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Grants (9) | Outcome/Objective: Increase grants (9)

Implementation Description: writing more to increase opportunity to receive the grants.
Responsible Person/Group: all faculty
Additional Resources Requested: attending workshop

**implementing in next year**
enhancing importance of advising in the faculty meeting and have weak faculty members to attend workshop.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Activities with sport industry | Outcome/Objective: Advising (2)

Implementation Description: paying more attention to senior audits and doubly checked by department chair and program coordinator.
Projected Completion Date: 05/15/2013
Responsible Person/Group: undergraduate advisors.
Additional Resources Requested: workshop for new policies.

**plan**
Create opportunities for students to study abroad.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High
**Relationships (Measure | Outcome/Objective):**
*Measure: International programs | Outcome/Objective: International experiences (6)*

**plan**
Monitor and revise as needed.

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High

**plan**
Working on ways to promote the minor.

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High

**Plan**
Create ways to increase enrollment in the recreation minor.

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High
Mission / Purpose

The mission of the DSU Office of Student Leadership and Activities is to enhance the overall education experience of students through development of, exposure to, and participation in organized groups, programs and activities that complement the institution’s mission, core values and academic programs and improves leadership and social assets while preparing students to be responsible advocates and citizens.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1:Goal : Office
Provide leadership and supervision of student organizations and activities, set policies, strategies, and structures that translate DSU, Student Affairs, and OSLA mission and core values into business norms embodied by all constituents. Formulate concepts and world views into student leadership and activities that assists in developing effective student learning processes and procedures that are continuously being implemented, assessed, and improved.

O/O 1:Objectives for Office

1.1 Hire professional and support staff that possesses the qualifications and competencies to accomplish university, division, and department mission and goals.

1.2 Provide professional development venues for staff that cultivates achievement, meaningfulness, value, and accountability.

1.3 Develop student programs and activities that are grounded in principles and practices that produce leadership behaviors, civility, and global viewpoints.

1.4 Use sound technology that streamlines processes and procedures and effectively communicates pertinent, relevant, and current OSLA information.

1.5 Support and initiate programs, services, and activities that promote student learning, development, and engagement for residential and commuter students.

1.6 Manage and advise student organizations ensuring proper and efficient stewardship of campus resources and funds, safety and risk management.
1.7 Develop, implement, and utilize comprehensive and integrated assessment process for institutional effectiveness and student learning

**G 2: Goal: Leadership**
Optimize and integrate leadership methods, theories, and practices into all co-curricular activities that foster independent thinking, open-mindedness, systems and critical thinking, and personal mastery.

**O/O 2: Objectives for Leadership**

2.1 Create a leadership model that gives all students an opportunity to receive individual and corporate leadership development

2.2 Provide education and professional development venues for students that cultivates accountability and self-assessment

2.3 Host formal and informal venues on and off campus that allow students to learn, develop, and apply leadership attributes in a variety of settings

2.4 Provide specific moral-based social responsibility and governance, ethics and emotional intelligence education for top-level student leaders who have a greater capacity of leadership responsibilities

2.5 Host multicultural venues that increase student's knowledge of heritage, traditions, inclusion, and diversity of people groups around the world

2.6 Escort students to conferences and events focused on individual and corporate leadership development and application

**G 3: Goal: Activities**
Enhance the overall educational experience of students through development of, exposure to, and participation in programs and activities that improve student cooperation and leadership while preparing student to be responsible advocates and citizens and complementing the institution's academic programs.

**O/O 3: Objectives for Activities**

3.1 Formulate a campus activity board (CAB) consisting of students representative of the campus student population who will assist OSLA professional staff with developing on- and off-campus student activities and events.
3.2 Develop weekend activities and events pertaining to leadership, governance, community service, healthy lifestyles, and organizational development that are intellectual, social, recreational, cultural, multicultural, and spiritual in nature and support scholarship.

3.3 Offer and encourage student participation student-led campus activities that complement classroom instruction, opportunities to work in groups and leader/follower roles, promote physical and psychosocial wellbeing, promote diversity, foster meaningful interactions with faculty and staff, and build community relationships on and off campus.

3.4 Create activities and events that engage students in on- and off-campus cultural arts and entertainment.

3.5 Design activities and events specifically for non-traditional students, veterans, commuters and off-campus student groups.

3.6 Plan and attend leisure activities.

3.7 Use technology to communicate activities and events.

3.8 Plan, market, and implement assessment tools for activities and events.
Mission / Purpose

The Division of Student Affairs at Delaware State University supports and complements the academic mission of the institution by promoting purposeful student engagement and considering all aspects of the student life experience. We are committed to educating and empowering students to become leaders of the future by developing them intellectually, socially, professionally, spiritually, and physically through implementation of best practices for the life cycle of a student from recruitment to career placement or graduate school.

To fulfill the mission this division:

- Provides a safe, healthy, and inclusive environment;
- Provides quality programs and services to foster student learning outside of the classroom;
- Builds a sense of community that celebrates diversity;
- Provides opportunities for leadership and professional development;
- Promotes civic and social responsibility;
- Designs the future of services to support student success
Vision

Student Affairs will be renowned for providing exemplary programs and services that reflects the highest standards of excellence in professional practice.

Division Overview

The Division of Student Affairs place students at the center of our work. Through the expertise and motivation of our dedicated team, we are confident that Delaware State University students will reach self-identified echelons of success—both in and outside of the classroom.

There are 17 service units/departments in Student Affairs. Fourteen University departments: Athletics, Career Services, Conference and Events, Counseling Services, Housing and Residential Education, Facilities, Fleet Services, Judicial Affairs, Office of Student Leadership and Activities, Office of Title IX, Spiritual Life, Student Health Services, University Police Department, and Wellness and Recreation. Three external partners (auxiliary services): Follett Bookstore, Aramark Dining Services, and RICOH USA (Copy center and Mailroom). Each unit is responsible for developing individual goals and objectives to support the Division goals. A description of each unit is attached.
Goals without Outcome/Objective Relationships Specified

G 1: Diversity and Inclusion
Create a community environment that promotes diversity and inclusion.

G 2: Health, Wellness, and Campus Safety
Facilitate health, wellness, and campus safety.

G 3: Customer Service
Provide consistent, courteous, and excellent customer service at all times.

G 4: Leadership Opportunities
Increase student and staff leadership opportunities.

G 5: Technology
Maximize the use of technology in all aspects of operations.

G 6: Assessment
Provide consistent assessment of the effectiveness of departments and programs.
Mission / Purpose

The mission of the department of Student Health Services is to assist students in the pursuit of their academic goals and personal development by providing quality and confidential health care services. Striving to maintain a healthy campus community, emphasis is placed on the prevention of illness and the promotion of wellness through health education.

To fulfill our mission the Student Health Services staff:

- Provides quality health care in a professional and caring environment;
- Adheres to ethical, professional, and legal standards;
- Offers health promotional activities to assist students in making healthy lifestyle choices;
- Refers students for services not available on campus;
- Monitors for and respond to public health concerns.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Quality health care services
Provide the students of Delaware State University with comprehensive, cost effective, quality health care services

SLO 5: Family planning visit
Students that receive family planning services will become partners in their reproductive health and verbalize to the clinician how to reduce their risk of exposure to STDs and unplanned pregnancies prior to the end of the clinical visit.

Relevant Associations:

DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success
**Related Measures:**

**M 5: Family Planning Education**

Patient specific education will be reviewed/discussed with students during the clinical visit.

Source of Evidence: Discussions / Coffee Talk

**Target:**

A survey was not created for this cycle

**Findings (2015-2016) - Target: Not Reported This Cycle**

There were 421 unduplicated family planning visits. Teaching is done during each visit; however, a survey to measure learning outcomes was not administered during this cycle.

**Findings (2014-2015) - Target: Partially Met**

There were 434 unduplicated family planning visits; teaching is done during each visit; however, a survey to measure learning outcomes was not administered during this cycle.

**Findings (2012-2013) - Target: Not Reported This Cycle**

N/A

**Findings (2011-2012) - Target: Not Reported This Cycle**

Not reported this cycle.

**G 2: A healthy campus community**

Promote a healthy campus community

**SLO 4: Health care visit**

Students will be able to verbalize to the clinician an understanding of their treatment plan at the end of the clinical visit.

**Relevant Associations:**

**DSU Learning Goal Associations:**

- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 1: Student Satisfaction Survey**

This survey is administered to students after each visit via survey monkey. Direct measures to measure student learning will be included in the survey beginning with 2017-2018 cycle.

Source of Evidence: Student satisfaction survey at end of the program
Target:
85% of users will rate the over-all visit as satisfactory

Findings (2016-2017) - Target: Not Reported This Cycle
The student satisfaction survey was not administered during this period.

Findings (2015-2016) - Target: Not Met
During the months of November 2015 through February 2016, 455 students were surveyed regarding their satisfaction with services received at the student health center. Fifty-six percent (56%) were satisfied with the services they received, 34% were neutral (neither satisfied or dissatisfied) with the services they received, and 10% were dissatisfied with the services they received.

Findings (2014-2015) - Target: Not Reported This Cycle
Less than 2% of health center users completed satisfaction survey; therefore, results were not reported.

Findings (2012-2013) - Target: Not Reported This Cycle
Not reported due to low response rate.

Findings (2011-2012) - Target: Not Reported This Cycle
Not reported this cycle due to low survey response

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Survey numbers
Established in Cycle: 2011-2012
Increase the number of surveys emailed to student and encourage students to complete

Satisfaction Survey
Established in Cycle: 2016-2017
Revise satisfaction survey to include direct measure of student learning

SLO 6: Program participation
Students will be able to participate in health promotional activities and identify two things they have learned as a result of attending a health promotion activity.

Health promotion activities will be made available to students throughout the academic year by the Healthy Hornets Program. An events calendar will be created by the Student Affairs Health Committee at the beginning of the Fall semester.

Relevant Associations:
DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 2: Program Evaluation and Participation
Post-participation evaluation evaluations are administered to students after health promotion activities (i.e., HIV Awareness and Prevention Activities)

Source of Evidence: Evaluations

Target:
75% of students that complete the post-participation evaluation will list two things they learned as a result of attending the program.

Findings (2016-2017) - Target: Met
HIV/AIDS Awareness Initiative: In honor of World AIDS day the "Anything but Clothes" fashion show was hosted on campus. Twelve students entered to design/model clothing made out of condoms and other prevention materials. There were 219 attendees. Ninety-seven (97) evaluation forms were returned by attendees; 100% were able to identify 1 new thing they learned. 97% correctly identified a way to prevent HIV.

Findings (2014-2015) - Target: Not Reported This Cycle
Post-participation evaluations were not administered this cycle.

Findings (2012-2013) - Target: Not Reported This Cycle
Not reported due to low response rate

Findings (2011-2012) - Target: Not Reported This Cycle
Not reported due to poor survey response.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Post-Participation Survey
Established in Cycle: 2011-2012
Brainstorm with colleagues and students to come up with new ways to get students to complete surveys.

Evaluation
Update post-participation survey.

Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Quality health care services
Provide the students of Delaware State University with comprehensive, cost effective, quality health care services

**O/O 1: Referrals**
1. Refer students for services not available on campus.
2. Provide students with information on how to receive care after hours to include 24 hour nurse advice line, local urgent care (walk-in) facilities, as well as the local hospital emergency room.

**Related Measures:**

**M 7: Referrals**
Number of referral

Source of Evidence: Administrative measure - other

**Target:**
Number of students referred off-campus for care each semester.

**O/O 2: Maintain best practices**
Maintain best health practices through the following task:
1. Keep abreast of the changes in the fields of college health as well as general health care through participation in continuing education activities (staff development) and membership to professional organizations (networking).
2. The Director will perform annual audits of the clinical staff's credentials to ensure that professional licensure and certifications are maintained as required by professional practice and state law.
3. Conduct annual staff in-services that include a review of OSHA, HIPAA, and FERPA guidelines

**Relevant Associations:**

**Strategic Plan Associations:**
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 6: Healthy Campus Community**
Monitoring and response plans for public health concerns.

Source of Evidence: Administrative measure - other

**Target:**
Maintain partnerships with community health organizations

**Findings (2016-2017) - Target: Met**

Community Partners

- Delaware Division of Public Health (DDPH)
• Brandywine Counseling
• Walgreens
• Delaware Center for Health Promotion

Health Initiatives

• Participated in DDPH Influenza Surveillance Program
• Health Alerts sent out to University community
  o Influenza Prevention
  o Norovirus
• HIV/AIDS Awareness and Prevention

Findings (2016-2017) - Target: Met

Community Partners

• Delaware Division of Public Health (DDPH)
• Brandywine Counseling
• Walgreens
• Delaware Center for Health Promotion

Findings (2015-2016) - Target: Met

Community Partners

• Delaware Division of Public Health
• Walgreens
• DE Center for Health Promotion (on-campus)
• TOVA Health care

Health Initiatives:

• HIV/AIDS Awareness
• Flu Prevention
• Continued to participate with DPH Influenza Surveillance Program
**Findings (2014-2015) - Target: Met**

**Community Partners:**

- Delaware Division of Public Health (DPH)
- Walgreens
- TOVA health

**Health Initiatives:**

- Ebola monitoring and response plan developed in collaboration with DSU Enterprise Risk Management, DPH, and the University of DE
- Travel protocol developed for students traveling abroad
- Continued to participate with DPH Influenza Surveillance Program

**O/O 3: Awareness and utilization of health**

Students will be aware of and utilize the health services

**Relevant Associations:**

**Strategic Plan Associations:**
- Delaware State University
  - 2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 3: Number of Health Center visits**
Data is collected at the end of each month on the total number of health center visits (front office and clinical). Data is collected from the sign-in sheet and the electronic health record (EHR), then transferred to an Excel spreadsheet. Clinical visits are recorded as unduplicated visits (new students and first time visits) and return visits.

Source of Evidence: Activity volume

**Target:**
10% of health center visits will be first time users each semester.
**Findings (2016-2017) - Target: Partially Met**
Fall Semester 2016 (September through December)

- Student Contacts: 1,991
- Clinical Visits: 1161
  - 30% of clinical visits were first time users

Spring Semester 2017 (January through May)

- Student Contacts: 1544
- Clinical Visits: 1161
  - 3% of clinical visits were first time users

Summer Semester 2017

- Student Contacts: 450
- Clinical Visits: 99
  - 28% of clinical visits were first time users

*The number of first time users fell below the target of 10% for the Spring semester. This could be related to the increase in first time users during the Fall semester.*

**Findings (2015-2016) - Target: Met**
Fall Semester 2015 (September through December)

- Student Contacts: 2708
- Clinical Visits: 1412
  - 20% of clinical visits were first time users

Spring Semester 2016 (January through May)

- Student Contacts: 2305
- Clinical Visits: 1499
  - 16% of clinical visits were first time users

Summer Semester 2016 (June through August)

- Student Contacts: 688
- Clinical Visits: 126
  - 17% of clinical visits were first time users
**Findings (2014-2015) - Target: Met**

Fall Semester 2014 (September through December)

- Student Contacts: 2,844
- Clinical Visits: 1,601
  - 26% of clinical visits were first time users

Spring Semester 2015 (January through May)

- Student contacts: 2,554
- Clinical Visits: 1,645
  - 16% of clinical visits were first time users

Summer Semester 2015

- Student contacts: 1,029
- Clinical Visits: 289
  - 25% of clinical visits were first time users

**Findings (2012-2013) - Target: Met**

2012-2013 incoming first year student visits exceeded 10%

- **Measure:** Program Evaluation and Participation  
- **Outcome/Objective:** Program participation

**Implementation Description:** Administer after each health promotion/educational activity  
**Projected Completion Date:** 01/11/2016

**Satisfaction Survey**

Revise satisfaction survey to include direct measure of student learning
Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Student Satisfaction Survey | Outcome/Objective: Health care visit

Implementation Description: Will begin to administer the revised survey during the Spring 2018 semester
Projected Completion Date: 12/11/2017
Responsible Person/Group: Health Center staff
Additional Resources Requested: None
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Adjudicate cases of alleged student misconduct

Adjudicate cases of alleged student misconduct on and off campus in a timely, fair and consistent manner.

SLO 2: Provide training on JAMS to internal stakeholders

Provide training/presentations on JAMS software for Resident Assistants, Residential Directors, Public Safety, faculty/staff and unit directors to become more proficient with the software, and in turn, streamlining the judicial process. Judicial Affairs team will give a pretest/post test to the participants in the training. The data collected will be used to establish what areas of the Judicial process and the Simplicity (JAMS) system Judicial Affairs needs to further address and provide additional educational material for.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
Delaware State University
6.6 Create a culture of accountability, high performance and service excellence.

Related Measures:

M 2: Statistical Data Study
Continue to gather statistics regarding student violations. Age, race, classification, violation, GPA, multiple violations, repeat offender, sanctions are listed in Excel spreadsheet. Data is counted up at end of every semester.

Source of Evidence: Activity volume
SLO 3: Gather Statistical Data per Academic Year

Gather statistics from the Symplicity system per semester concerning violation type, location, student demographics (such as age, classification, and residence) that may show a trend in campus violations which can be used by the university and Judicial Affairs to better address campus needs. Judicial Affairs will utilize this information to assess what areas to focus programming on with the assistance of interns.

Related Measures:

M 1: Student Surveys
Each student completes a survey after they meet with the Director regarding their hearing. Stats will be gathered on a monthly basis.

Source of Evidence: Service Quality

Target:
75% satisfaction rate within student violators that have gone through the judicial process.

Findings (2016-2017) - Target: Partially Met
Judicial Affairs presented the students with a 10 question survey that highlighted key areas in the office such as timeliness and student rights. Students were given the survey prior to starting their hearing to fill out all demographic information (excluding name and identification number) and asked to complete the survey prior to leaving after their case was heard. The surveys were collected for review monthly. Monthly, 80% of students scored the survey with a 5 rating. Through the survey collection, it was noticed that an area that needed improvement was the student wait times. The way the office of Judicial Affairs plans to correct this issue is allotting more time in between cases. Allowing time for the Judicial officer and the student to complete the case.

M 2: Statistical Data Study
Continue to gather statistics regarding student violations. Age, race, classification, violation, GPA, multiple violations, repeat offender, sanctions are listed in Excel spreadsheet. Data is counted up at end of every semester.

Source of Evidence: Activity volume

Target:
Statistics of violations entered into stats as they come into office, added up at end of each month.

Findings (2016-2017) - Target: Partially Met
Judicial Affairs collects data through the Symplicity JAMs system after each semester and at the end of each academic year. Judicial Affairs seen a increase in Alcohol and Drug violations and will tailor the programming in the classroom, in the residential halls and community outreach to reflect the major violations seen on campus.

G 2: Provide educational programming to students.

Collaborate with campus departments in providing outreach for educational development to all students through programming.
SLO 3: Gather Statistical Data per Academic Year
Gather statistics from the Symplicity system per semester concerning violation type, location, student demographics (such as age, classification and residence) that may show a trend in campus violations which can be used by the university and Judicial Affairs to better address campus needs. Judicial Affairs will utilize this information to assess what areas to focus programming on with the assistance of interns.

Related Measures:

M 1: Student Surveys
Each student completes a survey after they meet with the Director regarding their hearing. Stats will be gathered on a monthly basis.

Source of Evidence: Service Quality

Target:
75% satisfaction rate within student violators that have gone through the judicial process.

Source of Evidence: Activity volume

Target:
Statistics of violations entered into stats as they come into office, added up at end of the each month.

Findings (2016-2017) - Target: Partially Met
Judicial Affairs collects data through the Simplicity JAMs system after each semester and at the end of each academic year. Judicial Affairs seen a increase in Alcohol and Drug violations and will tailor the programming in the classroom, in the residential halls and community outreach to reflect the major violations seen on campus.

G 4: Enhance customer service
Enhance customer service through feedback surveys completed by students after they have had their case(s) adjudicated.
**SLO 2: Provide training on JAMS to internal stakeholders**

Provide training/presentations on JAMS software for Resident Assistants, Residential Directors, Public Safety, faculty/staff and unit directors to become more proficient with the software, and in turn, streamlining the judicial process. Judicial Affairs team will give a pretest/post test to the participants in the training. The data collected will be used to establish what areas of the Judicial process and the Simplicity (JAMS) system Judicial Affairs needs to further address and provide additional educational material for.

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information  
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
Delaware State University  
6.6 Create a culture of accountability, high performance and service excellence.

**Related Measures:**

**M 2: Statistical Data Study**
Continue to gather statistics regarding student violations. Age, race, classification, violation, GPA, multiple violations, repeat offender, sanctions are listed in Excel spreadsheet. Data is counted up at end of every semester.

Source of Evidence: Activity volume

**Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**G 1: Adjudicate cases of alleged student misconduct**

Adjudicate cases of alleged student misconduct on and off campus in a timely, fair and consistent manner.

**O/O 1: Regulate the judicial process for student misconduct**

Regulate a fair and impartial process for student misconduct and case review, while remaining sensitive and aware of the university's community needs.

(Move to results) Students who have committed violations are being asked to fill out
a questionnaire (anonymously) and rate their experience as it relates to the judicial process.

**Relevant Associations:**

**DSU Learning Goal Associations:**

3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Strategic Plan Associations:**

Delaware State University

2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 3: Benchmark with other Universities**

Benchmark with other Universities regarding their judicial affairs department to learn new ideas and practices.

Source of Evidence: Benchmarking of learning outcomes against peers

**Target:**

Benchmark with at least 1 HBCU every 1-2 months

**Findings (2016-2017) - Target: Not Reported This Cycle**

Judicial Affairs did not benchmark with other universities during the 2016/2017 school year.

**O/O 4: Reduce student misconduct through a variety of means**

To teach students about misconduct and violations through a variety of educational interventions, programs and training.

**Related Measures:**

**M 1: Student Surveys**

Each student completes a survey after they meet with the Director regarding their hearing. Stats will be gathered on a monthly basis.

Source of Evidence: Service Quality

**Target:**

Present Judicial information at Residential Hall meetings, classroom time and NSO with heavy focus on the freshman population, high offense times (homecoming and spring fling). Through these avenues we would like to see a 10% reduction in student violators to be monitored by the JAM systems by running static reports monthly.

**M 2: Statistical Data Study**

Continue to gather statistics regarding student violations. Age, race, classification, violation, GPA, multiple violations, repeat offender, sanctions are
listed in Excel spreadsheet. Data is counted up at end of every semester.

Source of Evidence: Activity volume

**M 3: Benchmark with other Universities**
Benchmark with other Universities regarding their judicial affairs department to learn new ideas and practices.

Source of Evidence: Benchmarking of learning outcomes against peers

**O/O 7: Enhance relationships with other departments on campus**
Establish a solid relationship for working hand-in-hand with key departments and staff on campus, namely Public Safety, Title IX, Residential Housing, and Counseling, among others. Partnership with these departments will allow us to serve the students in a more cohesive manner.

**Related Measures:**

**M 4: Develop and Increase Student Internships**
Increase the use of interns - especially in fields such as Criminal Justice and Pol Science.

Source of Evidence: Field work, internship, or teaching evaluation

**G 2: Provide educational programming to students.**
Collaborate with campus departments in providing outreach for educational development to all students through programming.

Detailed Assessment Report  
As of: 9/27/2018 12:26 PM EST  
2017-2018 Studio Art (B.A.)  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Goals without Outcome/Objective Relationships Specified

G 2: technology literate

Students will be able to integrate technology in all aspects of art making and research.

G 4: contributions of art on society

Students will be able to make connections and research contributions of art on society.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: student proficiency in content area

Students will become proficient in media techniques.

(Art Division)

SLO 3: Engage in creative activity to show mastery of technique

The student will engage in a creative activity that shows consistency in mastery of technique, imagery and/or presentation.

Relevant Associations:

DSU Learning Goal Associations:  
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Studio art experience rubric
Students create a body of art work for the art show. Students are assessed on their understanding of their specific medium, acquired knowledge required to successfully complete the capstone art making and technique requirements. The studio art experience rubric is used to evaluate student performance.

Source of Evidence: Evaluations

**Target:**
All students should be rated at acceptable rating or above on this rubric.

**G 3: Student proficiency in art history**
Students will understand and become proficient in the chronological understanding of art history

**SLO 2: Acquire a chronological understanding of the development of art**
Students will acquire a chronological understanding of the development of art throughout history worldwide.

**Relevant Associations:**

**DSU Learning Goal Associations:**
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**G 5: High level proficiency in techniques, research and portfolio preparation**
Students will successfully complete a senior capstone experience in studio art by showing a high level of proficiency in specific media techniques, qualitative research, and a professional portfolio of their work.

**SLO 1: Develop Icon Id**
Students will develop iconographical identification and historical sequencing

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**SLO 3: Engage in creative activity to show mastery of technique**

The student will engage in a creative activity that shows consistency in mastery of technique, imagery and/or presentation.
Relevant Associations:

DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Studio art experience rubric

Students create a body of art work for the art show. Students are assessed on their understanding of their specific medium, acquired knowledge required to successfully complete the capstone art making and technique requirements. The studio art experience rubric is used to evaluate student performance.

Source of Evidence: Evaluations

Target:
All students should be rated at acceptable rating or above on this rubric.

SLO 4: Prepare thesis show

The student will prepare a body of work for a thesis (capstone) show that demonstrates their knowledge of matting, framing, preparing invitations and hanging the work.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 1: Studio art experience rubric

Students create a body of art work for the art show. Students are assessed on their understanding of their specific medium, acquired knowledge required to successfully complete the capstone art making and technique requirements. The studio art experience rubric is used to evaluate student performance.

Source of Evidence: Evaluations
Target:
All students should be rated at acceptable rating or above on this rubric.

**M 2: Written assignment - artist influences**

When "Writing across the curriculum" mandate was adopted by all programs, we started to add a writing component in most of the studio classes (Advanced Drawing - sophomore level course, Intro to Painting - sophomore level course, Watercolor - junior level course, Print Making - junior level course) where students had to reflect on their work, along with completing a research paper related to artists within the media field that the student was in at that specific semester. (i.e., in painting, research painters that influenced the students work and write about them and their techniques). This aspect was repeated in many upper division classes, as well as in the intro to drawing class. Students need to research about artists related to course and complete a research paper. The writing component of the senior capstone rubric is used to evaluate student performance.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
By end of sophomore level, all students should be rated at acceptable rating or above.

**Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**SLO 5: develop skill with technology**

2.2 Students will develop technical skills in creating imagery derived through various programs on the computer.

**Related Measures:**

**M 1: Studio art experience rubric**

Students create a body of art work for the art show. Students are assessed on their understanding of their specific medium, acquired knowledge required to successfully complete the capstone art making and technique requirements. The studio art experience rubric is used to evaluate student performance.

Source of Evidence: Evaluations

Target:
All students should be rated at acceptable rating or above on this rubric.

**SLO 6: growth thru software assisted imagery**
2.3 Students will explore and grow as artists through computer-software-assisted imagery as it relates to the fundamentals of drawing and design.

**SLO 7: research art through out history and relate to their own work**

The student will research artists and art movements that show a relationship to their personal work and how they have benefited from their knowledge of those artists.

**Related Measures:**

**M 2: Written assignment - artist influences**

When "Writing across the curriculum" mandate was adopted by all programs, we started to add a writing component in most of the studio classes (Advanced Drawing - sophomore level course, Intro to Painting - sophomore level course, Watercolor - junior level course, Print Making - junior level course) where students had to reflect on their work, along with completing a research paper related to artists within the media field that the student was in at that specific semester. **Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**portfolio review**

after reviewing assessment rubric in capstone, changes are implemented in process during semester for review of work and supporting paper

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** review year of assessments and make adjustments in capstone review for art making, and paper development  
**Projected Completion Date:** 05/25/2017  
**Responsible Person/Group:** all studio faculty
Other Outcomes/Objectives, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 1: Summer Bridge Programs

We also collected statistics on Summer Bridge participants from both Jumpstart and Project Success Programs. The figures collected for both programs are based upon educational performance during the summer, fall and spring. The outcomes are listed in the results section of this report.

SUMMER BRIDGE

<tbody>
<tr>
<td>18</td>
<td>3.48</td>
<td>2.97</td>
<td>3.22</td>
<td>1</td>
<td>2.8 (17)*</td>
<td>3.08</td>
</tr>
</tbody>
</table>

*One student did not return

There were 18 students in the Fall 2015-16 Jumpstart cohort. Table 3 reflects their academic performance during the Summer, Fall and Spring semesters. Among the 18 students, 1 student was on academic probation due to poor performance; however, this student did not return for the Spring semester. At the end of the Spring 2016 semester one student is below a 2.0 gpa.

</tbody>
</table>

* Two students did not return after the summer and in the fall one student was dismissed from the college.

**Two students did not return for the spring.

Twenty-three (23) Project Success students returned for the fall semester. At the end of the Fall semester five students had a cumulative grade point average below 1.7, all but one student returned for the Spring semester. For the first time in the history of the program all students were allowed to return in the spring regardless of their gpa. At the end of the Spring semester four students were still under the required 2.0 gpa required.

Goals without Outcome/Objective Relationships Specified

G 2: TESL Objectives

The MA in TESL is designed to achieve the following:

- Provide candidates with exposure to the theory and practice of teaching English to those whose first language is not English: Limited English Proficiency (LEP) and English Language Learners (ELL);

- Certify teachers as ESL teachers;

- Provide candidates with an advanced level of expertise and a thorough training in the discipline of analyzing the various facets of teaching LEP and ELL learners through analyzing the various linguistic and cultural aspects of English; and

- Provide candidates with the pedagogical and intellectual preparations necessary for careers as schoolteachers

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Teach English to non-English speaking learners

Students will be able to teach English to speakers of other languages.

SLO 1: Demonstrate ability to teach English as a second language
Students will demonstrate ability to teach oral and aural skills to learners, using specific methods and materials.

Relevant Associations:

DSU Learning Goal Associations:

5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.

8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.
Related Measures:

M 1: Final Performance of Students
The available measure includes the final outcome and performance of students.

Source of Evidence: Performance (recital, exhibit, science project)

Target:
Completion of Curriculum Requirements, resulting in Graduation.

Findings (2016-2017) - Target: Met
The program was put on hold in the Fall of 2014. The program and curriculum was completely revised and approved by faculty senate in Spring 2017. Enrollment is now open for the students to begin Spring 2018 semester. During the 2016-2017 academic year there were not students in the program. The mission, goals, objectives, and measures will all be revised for the 2017-2018 year (next year’s report) to reflect the curricular changes of the program that have been made and will be instituted as the program is reactivated Spring 2018.

Findings (2015-2016) - Target: Met
The program was put on hold in the Fall of 2014. The program and curriculum is currently being revised and will begin enrolling students in Fall 2017. During the 2015-2016 academic year there were no students in the program.

Findings (2014-2015) - Target: Met
The program was put on Hiatus in the Fall of 2014, is currently under revision, and will be re-opened in Fall 2017. The two remaining candidates in the program during the 2014-15 academic year successfully met all requirements and graduated.

SLO 2: Understanding of Language as a system
Candidates demonstrate understanding of language as a system, including phonology, morphology, syntax and semantics, to support ESOL students as they acquire English in order to communicate with native speakers of English.

Relevant Associations:

DSU Learning Goal Associations:
6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.

Related Measures:

M 1: Final Performance of Students
The available measure includes the final outcome and performance of students.

Source of Evidence: Performance (recital, exhibit, science project)

Target:
Completion of Curriculum Requirements, resulting in Graduation.

Findings (2016-2017) - Target: Met
The program was put on hold in the Fall of 2014. The program and
Curriculum was completely revised and approved by faculty senate in Spring 2017. Enrollment is now open for the students to begin Spring 2018 semester. During the 2016-2017 academic year there were not students in the program. The mission, goals, objectives, and measures will all be revised for the 2017-2018 year (next year's report) to reflect the curricular changes of the program that have been made and will be instituted as the program is reactivated Spring 2018.

Findings (2015-2016) - Target: Met
The program was put on hold in the Fall of 2014. The program and curriculum is currently being revised and will begin enrolling students in Fall 2017. During the 2015-2016 academic year there were no students in the program.

Findings (2014-2015) - Target: Met
The program was put on Hiatus in the Fall of 2014, is currently under revision, and will be re-opened in Fall 2017. The two remaining candidates in the program during the 2014-15 academic year successfully met all requirements and graduated.

SLO 3: Instruction and role of culture in TESL
Candidates know, understand, and use in their instruction, major theories and research related to the nature and role of culture, and how cultural groups and individual cultural identities affect language learning and school achievement.

Relevant Associations:

DSU Learning Goal Associations:
5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

Related Measures:

M 1: Final Performance of Students
The available measure includes the final outcome and performance of students.

Source of Evidence: Performance (recital, exhibit, science project)

Target:
Completion of Curriculum Requirements, resulting in Graduation.

Findings (2016-2017) - Target: Met

Findings (2016-2017) - Target: Met
The program was put on hold in the Fall of 2014. The program and curriculum was completely revised and approved by faculty senate in Spring 2017. Enrollment is now open for the students to begin Spring 2018 semester. During the 2016-2017 academic year there were not students in the program. The mission, goals, objectives, and measures will all be revised for the 2017-2018 year (next year’s report) to reflect the curricular changes of the program that have been made and will be instituted as the program is reactivated Spring 2018.

Findings (2015-2016) - Target: Met
The program was put on hold in the Fall of 2014. The program and curriculum is currently being revised and will begin enrolling students in Fall 2017. During the 2015-2016 academic year there were no students in the program.

Findings (2014-2015) - Target: Met
The program was put on Hiatus in the Fall of 2014, is currently under revision, and will be re-opened in Fall 2017. The two remaining candidates in the program during the 2014-15 academic year successfully met all requirements and graduated.

SLO 6: Instruction of TESL students
Candidates can interpret a variety of standards-based language proficiency instruments, usually norm-referenced, to meet district, state and federal guidelines, to inform their instruction. They also understand their uses for identification, placement, and demonstration of language growth of English learners.

**Relevant Associations:**

**DSU Learning Goal Associations:**

5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.

7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

**Related Measures:**

**M 1: Final Performance of Students**
The available measure includes the final outcome and performance of students.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
Completion of Curriculum Requirements, resulting in Graduation.

**Findings (2016-2017) - Target: Met**
The program was put on hold in the Fall of 2014. The program and curriculum was completely revised and approved by faculty senate in Spring 2017. Enrollment is now open for the students to begin Spring 2018 semester. During the 2016-2017 academic year there were not students in the program. The mission, goals, objectives, and measures will all be revised for the 2017-2018 year (next year’s report) to reflect the curricular changes of the program that have been made and will be instituted as the program is reactivated Spring 2018.

**Findings (2015-2016) - Target: Met**
The program was put on hold in the Fall of 2014. The program and curriculum is currently being revised and will begin enrolling students in Fall 2017. During the 2015-2016 academic year there were no students in the program.

**Findings (2014-2015) - Target: Met**
The program was put on Hiatus in the Fall of 2014, is currently under revision, and will be re-opened in Fall 2017. The two remaining candidates in the program during the 2014-15 academic year successfully met all requirements and graduated.

**Annual Report Section Responses**

**Executive Summary (1-2 pages)**
The MA TESOL / Bilingual Education program was re-instated beginning Spring 2018 semester. The curriculum for this new program has been significantly revised to adapt to current standards and to provide further opportunities for individuals pursuing education in TESOL and Bilingual Education. The revisions and updates are
summarized below:

- **MA Curriculum** has been revised to meet the updated (January 2017) DDOE standards for K-12 certification in both "1561 Bilingual Teacher" and "1562 Teacher of English Learners." Revisions were also made to meet TESOL (professional organization) standards, and developing practices in the field. Revisions include the restructuring of the curriculum sheet and adjustments to the curriculum map. Student Learning Objectives were also updated to coincide with the TESOL International Association standards for TESOL programs. In order to make the necessary updates to the program, a total of seven new courses were created.

- **Development of Online Certificate Track** - There is a growing demand for Adult Education ESL credentialing for teaching English to speakers of other languages abroad. The online certificate program requires the completion of four online courses. These courses are part of the revised MA program. All four courses for this online track exist within the revised MA curriculum. (This track does not lead to K-12 certification).

- **TELL Track**: Development of Teacher of English Learners / Bilingual Teacher Minor and Secondary Certification - Delaware has seen a substantial increase in K-12 students who are English Learners (over 300% increase in a majority of southern Delaware school districts), as well as an increase in the number of bilingual immersion education programs. Its timely addition will also provide the necessary training currently in demand in K-12 education. All courses required (5 courses/15 credit hours) for the minor / secondary certification already exist and are requisite for the MA program.
  - The addition of this minor program allows undergraduate students to pursue secondary certification, and does not require the creation of any new courses. Per the graduate school policy, undergraduate students may enroll in up to 9 credit hours of graduate courses at the undergraduate tuition rate. The existing courses have undergraduate and graduate course numbers with corresponding workload content and expectations. Undergraduate students can enroll at the undergraduate or graduate level depending on individual circumstances and if the individual student meets requirements per the graduate school policy.
  - Further, current educators with an earned Bachelor and initial teaching certification can enroll in this fifteen credit hour track at the graduate level to earn secondary certification. The courses completed for this track may be applied toward the completion of the MA program.
Unit(s) Profile

Faculty: 1) Brody Bluemel, PhD - Assistant Professor and Program Director

Adjuncts: 1) Donna Bain Butler, PhD., 2) Schalea Sanders, MA

Course Offerings:

• Fall 2017
  1. Program was still inactive. First course offerings were Spring 2018 (one section)

• Spring 2018
  1. ENGL 518 - Methods of Teaching English as a Second Language (one section)

• Summer 2018
  1. ENGL 411 - Teaching Literacy for English Language Learners (one section)
  2. ENGL 511 - Teaching Literacy for English Language Learners (one section)
  3. ENGL 512 - Seminar on Theories and Practice of Second Language Learning and Testing (one section)

Unit(s) Initiatives accomplished in this cycle

Goals:

• Launch the revised MA TESOL program (and new tracks within the program).

  The MA TESOL program (and new programs tracks) were launched in Spring 2018 semester. One course was offered during this term.

• Partner with K-12 institutions to recruit students.

  A formal partnership was formed with Caesar Rodney School District. The district promises to support of at least 1-2 currently employed K-12 educators in the MA TESOL program or one of the new tracks within the program. Further, meetings were held with district and school representatives from Milford School District, Capital School District, Seaford School District, Indian River School District, and Aspira Academy to advertise and inform these institutions of the new program offering.
Further, email notification and advertisement has gone out to districts throughout the state.

- Recruit current undergraduate education majors.

In Spring 2018 semester, one current undergraduate student was recruited and enrolled in the TELL track within the MA TESOL program. A second student was recruited and joined this track in Summer 2018. A total of 6 current undergraduate education majors are now recruited and enrolled in the program for Fall 2018.

*** A key challenge for recruitment and acceptance this year was that the application was not made available until after Spring 2018. The program applications were supposed to be created and in the graduate applications system by Fall 2017, but were not addressed until mid-Spring 2018, and not finalized until May 2018. Without an actual application, it made it very challenging to have any students apply to the program. Now that we actually have this resource available, we hope to have applicants this coming year!***

**Unit(s) Honors/Awards and Achievements**

Program Director, Dr. Brody Bluemel received the following grants/awards:

  - $246,600 research grant over three years
- Educator Preparation Partnership Grant, Teacher & Leader Effectiveness Branch of the State of Delaware Department of Education. Partnered with Caesar Rodney School District.
- Advanced Academic Literacy Modules, Project funded for the 13th cycles of the Delaware State University Teaching Innovation and Enrichment Mini-Grant.
  - $2,000 grant

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.
Student Learning Outcomes:

- **SLO 1: Language** - Candidates will understand and be able to apply the major research theories related to the structure and acquisition of language in order to mediate learners in developing language and literacy and achievement in content areas.
  - Data will be collected to evidence achievement of this learning objective by:
    - a) evaluating the outcomes of associated courses completed that assess this SLO, 
    - b) analyzing results of student portfolios that evidence through the use of self-rated and instructor evaluated rubrics the mastery of each individual sub-skill categorized under this SLO.

- **SLO 4: Assessment** - Candidates will demonstrate functional understanding of various assessment issues affecting second and foreign language learners, and be able to implement a variety of language proficiency instruments to show language growth and inform instruction.
  - Data will be collected to evidence achievement of this learning objective by:
    - a) evaluating the outcomes of associated courses completed that assess this SLO. Specifically, the course ENGL 512 - Seminar on Theories and Practice of Second Language Learning addresses this SLO in detail, and the outcomes of this course will therefore be evaluated in detail. 
    - b) analyzing results of student portfolios that evidence through the use of self-rated and instructor evaluated rubrics the mastery of each individual sub-skill categorized under this SLO.

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

N/A

Closing the Assessment Loop: Please share one or two prime examples of your unit's assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. 
  a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? 
  b) Have these changes been implemented? If not, when will they be implemented? 
  c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

The MA TESOL program is newly re-instated. The revised program was created after evaluating the former program and significantly adjusting that program to meet the
current professional needs of the program. The program has not yet completed a full cycle since being re-instated, and will not be able to assess results and findings until the next academic year. There are measures in place to provide for ongoing assessment of the program to make adjustments as needed. One key measure includes the use of a digital portfolio that is tied directly to all SLOs for each individual course and for the program. This instrument provides for continual collection of data to demonstrate which areas of the program students are performing well in, and which areas need further development to enhance student success.

**Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.**

**Undergraduate Program Information:** Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

| N/A |

For graduate program annual reports TABLE 4: Graduate Student Information. For each activity indicated in TABLE 3, please provide student contact information along with faculty advisor/supervisor (See template from SGS&R). Upload in the Document Management section and connect to this section of the Annual Report. If the student has received gainful employment or a promotion during their graduate enrollment at DSU, please indicate this information in the space provided. If the student is matriculating into another graduate or professional program, please indicate the program, institution and enrollment term. If your activity required a field supervisor (rather than a faculty advisor), please note this in the comment section.

N/A for 2017-18 academic year.
Mission / Purpose

The testing center activities incorporate the following values:

- Work meets the needs of the sponsoring test vendor or individual.
- Data is collected for all vendors.
- Work is timely, accurate, and reliable.
- Information is readily available to those who need it, secure from those who do not.

Our team is committed to the following work ideals:

- Professionalism
- Responsiveness
- Thoroughness
- Accessibility
- Friendliness
- Sensitivity to data confidentiality issues

TSP's goals are manifested through its services and programs, which are aligned with the testing center operational objectives, aspirations, and vision and core values of Delaware State University (DSU).

Goals without Outcome/Objective Relationships Specified

G 1: Purpose and Goals
**Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**SLO 4: Test Offerings**

**Test Offerings**

Testing Services and Programs has over 100 vendors and offers over 58,000 exams. We do not test for all these vendors on a daily or monthly basis but have the capacity to do so. The goal is to increase partnerships and more vendors.

**Relevant Associations:**
- National College Testing Association
- Association Test Publishers

**Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**O/O 2: Objective:**

Objective:
To continue to serve DSU and the local communities by providing a variety of programming events, certification opportunities through proctored exams and multi-tier programs that facilitate life-cycle of client-based credentialing (workshops, testing, and certification).

**Relevant Associations:**
- National College Testing Association (NCTA)
- Association of Test Publishers
- American Council of Education
- Council for the Advancement of Standards in Higher Education (CAS) - Testing Programs and Services Standards (information was taken and combined with NCTA)

**Related Measures:**

**M 2: TSP evaluations and the results**

Source of Evidence: Service Quality

**Target:**
Met = Increase revenue and build sustaining partnerships

**M 3: Assessments for TSP**

Source of Evidence: Service Quality
Target: 
Objectives:

- Evaluate the benefits of proper test preparation
- Consider a wide array of testing strategies and assess the usefulness of each
- Discuss how to prepare for specific testing situations
- Provide quality service to our DSU community (students, faculty, staff, alumni) and the surrounding communities.
- Provide workshops that build a connection to resources leading to student success.
- Provide holistic testing approaches

O/O 3: Objectives and Learning Outcomes

Relevant Associations:
TSP is a hybrid department. We provide sessions for DSU students to practice exams (GRE, GMAT, PRAXIS, etc...).
TSP offers all graduate exams.
We offer Testing Strategies workshops.

Related Measures:

M 3: Assessments for TSP

Source of Evidence: Service Quality

Target:

Details of Action Plans for This Cycle (by Established cycle, then alpha)

TSP Action Plan - May 2016 to May 2017

Executive Summary:

The mission of the Testing Services and Programs Office is to assist DSU students and the surrounding communities in assessing their knowledge, skills, and abilities by providing a variety of programming to engage and promote credentialing certifications exams. This is accomplished with written, computer-adapted assessments and testing instruments. Testing Services and Programs is committed to promoting an innovative and diverse environment that encourages staff and stakeholder growth and development. TSP set the standard of excellence in the testing center by providing quality services to our DSU community, surrounding communities in Delmarva and the Atlantic Region. Our partnership and outreach
efforts align us with the DSU core values and KPI for our focus area (goals 2 & 6). Testing Services and Programs align more with KPI #13 as an auxiliary revenue unit. DSU’s Testing Services and Programs subscribes to the testing guidelines, standards and procedures of the National College Testing Association (NCTA) and a part of the Consortium of College Testing Centers (CTCC).

The testing center activities incorporate the following values: Work meets the needs of the sponsoring test vendor or individual; Data is collected for all vendors; Work is timely, accurate, and reliable and the information is readily available to those who need it, secure from those who do not. TSP’s goals are manifested through its services and programs, which are aligned with the testing center operational objectives, aspirations, vision, and core values of Delaware State University (DSU). TSP's goals include 1. To become a premier revenue-generating testing center in the Atlantic Region. 2. Providing a service and location where students can complete their independent (distance education) studies requirements as well as state and national board certified credentialing exams. 3. We utilize a computerized registration portal Register Blast. 4. The computerized system captures the candidates’ information and assists in gathering necessary data to improve processes, revenue, customer feedback and testing trends. 5. Disseminating the results of applied research and evaluations conducted at the testing center. 6. Provide data and consultation to other departments on campus and community organizations as it relates to testing.

Testing Services and Programs is to provide testing strategies workshops (mid-term/final exams) that cover exclusive problem-solving techniques, critical-thinking skills and test-taking tips facilitated by our certified testing personnel. Students will be introduced to a systematic approach on how to answer and analyze questions. Students will learn how to break each question down and identify common traps. Students will also learn tips to help develop test-taking skills for before the test and during the test, as well as develop endurance techniques to help them finish strong based on resources from Education Testing Service (ETS) and College Board. Testing Services and Programs also offers credentialing certification exams for DSU students, test vendors, partners and other stakeholders that will enable participants to meet the challenges of a rapidly changing and highly competitive global workforce economy.

**Concerns/Issues:** The cost of the placement invoices impedes our area from purchasing test vouchers and bringing in revenue and providing service to the test vendors and candidates.

**GOAL 2: STUDENT SUCCESS** - Recruit, develop, retain, graduate and place outstanding students
KPI # 2

Goal/Objective to support KPI #2 (Percent of Students Obtaining Gainful Employment in 12 months)

§ 2.1. Provide graduate and professional exams.

§ 2.2. Increase vendors and credentialing exams that will provide DSU students with certifications related to their degrees.

§ 30 Day: Provide information on credentialing certifications for job readiness.

§ 60 Day: Reach out to departments on campus to find out what testing services are needed for their students.

§ 90 Day: Review how the newly implemented changes impact TSP, DSU, and surrounding communities; Educate students about CLEP and DSST in person or via social media, and website; Provide continuous professional and graduate testing for DSU students (Castle, NLN, Praxis, MAT, and CLEP).

KPI # 4

Goal/Objective to support KPI #4 - (First-Year Retention Rate)

§ 4.1. Provide testing strategies workshops

§ 4.2. Presentation at University Seminar classes about TSP offerings

§ 4.3. Promote college readiness

30-60-90 Day Action Plan to Meet Goal/Objective

§ 30 Day: Search other test center websites, best practices and use as a resource for TSP's improvement; Review testing strategies workshop surveys and make changes as needed; Courtesy accessibility testing for DSU students.

§ 60 Day: College Readiness presentations to high schools throughout Delaware; Partner with 21st Century clubs at title 1 schools in Delaware to provide assessment/evaluations of students' college readiness (grades 5-12).

90 Day: Reach out to departments on campus regarding testing strategies needs
GOAL 6: INSTITUTIONAL AND OPERATIONAL EFFECTIVENESS - Enhance, leverage, and diversity our resources to fulfill the University's mission.

KPI #13:

Goal/Objective to support KPI #13 - (Increase Overall University Funding)

§ 13.1 Expand test offerings

§ 13.2 Increase partnerships and outreach

30-60-90 Day Action Plan to Meet Goal/Objective

§ 30 Day: Search other test center websites, best practices and use as a resource for TSP's improvement; Brainstorming sessions as a team about new vendor offerings; Look at other test center websites, best practices and use as a resource for TSP's; improvement; Read customer surveys to see what changes need to be implemented (if applicable) and Reaching out to the community and vendors (Seeing what they need and what we can offer them).

§ 60 Day: Hold bi-monthly team meetings; Visit new partners and companies to expand test offerings (credentialing certifications); Continuously updating TSP website with hours, test, price, and registration requirements; Expand on Mobile Testing; Promote MyCAA program (send info to military units).

§ 90 Day: Update website to allow candidates to schedule, reschedule, and pay for testing appointments via RegisterBlast; Visit new partners and companies to expand test offerings; Expand on programs DSU and the surrounding communities; Quarterly increasing revenue by adding 3-5 new partners and/or vendors; Have staff evaluations to make sure that everyone is aligned with mission TSP and promoting the standards of NCTA; Review and implement testing best practices via training and webinars; Review testing hours, test offerings and align services with programs on-campus and in the community to offer the credentialing exams.

Implementation Timeline 30-60-90 Day Action Plan to Meet Goal/Objective (the information is separated by the sections based on below - due to the size of max length - details not included).
Note: TSP is working on the rebranding of our DSU web page and brochures.

**Established in Cycle:** 2016-2017  
**Implementation Status:** Finished  
**Priority:** High

**Responsible Person/Group:** TSP

**Action Plan - Jan to May 2018**

**Established in Cycle:** 2017-2018  
**Implementation Status:** Planned  
**Priority:** High

**Responsible Person/Group:** TSP  
**Additional Resources Requested:** Support from AVP

**Workshops for DSU Students**

**Established in Cycle:** 2017-2018  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Per semester and goal is to add more plans

**Annual Report Section Responses**
Executive Summary (1-2 pages)

Unit(s) Profile

TSP has been working without support since July 2017.

Unit Profile

Sheldon S. Taylor, MHRM
Testing Specialist III (formerly Testing Associate)
Delmarva Testing Association Committee Member
7 years testing experience

Vacant
Testing Specialist II
Vacant
Testing Specialist I

Amarysh Y. H. Church
Director of Operations/TCA
NCTA Lead for Ambassador Program
NCTA Conference Committee
Oversight Committee Member for IBT Proctor Program
Delmarva Testing Association Board Member
CAS Committee for Testing Programs and Services
14 years testing experience

Unit(s) Initiatives accomplished in this cycle

Promoting quality programming (workshops and forums) for student success.

TSP maintained the below partnerships

1) Partnership with 21st Century Programs at Dover High School, Central Middle
School and William Henry (college readiness)

2) Expanded Journey trade exams partnerships

3) Military partnerships

4) Technical K-12 testing

5) Community and mobile testing outreach

Testing Services and Programs is promoting its test offerings among employers of in-demand career fields and test candidates seeking credentials along the Atlantic Region. By reviewing Bureau of Labor statistics, identifying the needs of the Department of Labor and Department of Education partnerships and assessing regional occupational demands, TSP delivers exam scheduling, onsite and offsite testing based on customer demands.

As a result of TSP enhanced test offering to program, exiting DSU students, individuals enrolled in career readiness and vocational programs and industry employee are provided with credentialing opportunities throughout the lifecycle of their employment.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

Strategic Goal/Student Learning Outcome

Testing Services and Programs workshops cover exclusive problem-solving techniques and test-taking tips facilitated by our certified test administrator and testing specialist. The workshops focus on strategies and critical thinking skills needed for exams. Students will be introduced to a systematic approach to answering application and analysis questions. Students are taught to dissect questions, identify distractors and select correct answers. By learning to apply these skills before and during the test, students develop mental endurance techniques to help successfully complete extensive board exams and help them finish strong based on resources from Education Testing Service (ETS) and College Board.

Goals:

- Provide quality student-centered programs to ensure academic success and improve the first-year retention rate.
- Help students to understand why developing good test-taking strategies will be beneficial for their college years and future employment.

Objectives:
• Evaluate the benefits of proper test preparation
• Consider a wide array of testing strategies and assess the usefulness of each
• Discuss how to prepare for specific testing situations

**Learning Outcomes:**

• Students will be able to assess their test-taking skills and make a plan for improvement.
• Students will learn what test anxiety is and techniques to relax.
• Students will be able to identify and learn how to best prepare for the objective and subjective test.
• Students will learn test strategies to improve their test-taking skills before and during the test.
• Students will learn how to break down test questions and identify common traps.
• Students will be able to define common test-taking terms.
• Students will be able to apply test-taking strategies to all exams to help them raise their test scores and course grades.

**KPI #2 and #6**

TSP primarily aligns with KPI#13 - Goal 6 (increase overall university funding) as it relates to the services offered to the DSU community, Delmarva and the Atlantic region and KPI #2 - Goal 2 (percent of students obtaining gainful employment in 12 months) is addressed by providing credentialing certification exams that DSU students are able to complete; while working on their degree (i.e. sport management students can earn their athletic trainer certification and MBA students can earn their project management certification).

TSP does not address KPI #6 (contracts and grants) - Goal 3 (TSP partners and forge contract agreements with vendors, agencies, and other stakeholders. All contracts are reviewed and approved by the General Counsel and the VP of Finance).

**Closing the Assessment Loop**

TSP utilizing the built-in customer survey in Registerblast as to ensure our staff provides quality customer service to candidates, test publishers, and other stakeholders. The survey results are reviewed and changes/improvements are implemented based on feedback.
a) Customer surveys for testing and workshops.

b) Yes, we make changes based on the survey feedback.

c) We request all customers to complete a survey.

TSP focus on providing career specific test credentialing for workshop graduates. Review of TSP 30-60-90 Day reports and an annual review from May 2017 to May 2018 have identified current best practices and methodologies and future ones that can be implemented.

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? b) Have these changes been implemented? If not, when will they be implemented? c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Four Measures of Assessment:

- Customer Surveys
- Vendor Audits/Inspections
- Team Reflections/Discussions based on Irregularity Reports
- DAR Responses

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

Dr. AYHC assisted in writing the CAS contextual statement for Testing Standards with Kristen Vickey and Dr. Jim Wollack.

Dr. AYHC submitted the proposal for 2017 conference presentations and upcoming presentation on test security, the evolution of testing and testing and the retention of black males (upcoming conference presentations in September and November 2018 and March 2019).

All required research and reviewed by a scholar committee for acceptance.

Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

Goals without Outcome/Objective Relationships Specified

G 1: Communicate ideas in written, oral and visual forms using appropriate skills
Communicate ideas in written, oral and visual forms using appropriate skills.

G 2: Demonstrate critical and creative thinking skills
Demonstrate critical and creative thinking skills, including the ability to critically evaluate and compare diverse perspectives.

G 3: Develop well-rounded, world citizens
Be ethical, collaborative, and productive citizens of a complex, and diverse world

G 4: Analyze career paths within textiles apparel and design industry
Analyze career paths within textiles apparel and design industry

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1: Apply knowledge of textiles and apparel product development
Apply knowledge of textiles and apparel in product development, marketing, sales, and consumption and analyze the roles of dress in consideration with historical, socio-cultural, and psychological factors.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators

Related Measures:

M 1: Research paper and presentation
Research paper and presentation. Students are evaluated on competency in merchandising research, marketing and consumer analysis, and the application to merchandising problem.

Source of Evidence: Project, either individual or group

Target:
Expect 75% of students receive a rating above good.

Findings (2016-2017) - Target: Not Met
Target Not Met:
All students participated in class discussions on the reading assignments. All students completed the research project. 30% of students received a
rating of excellent in the categories of problem identification, research, implementation and oral presentation (refer to oral presentation rubric). 40% of students received a rating of good; 30% of students received a rating of average.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Academic advising to include College Algebra recommendation
Academic advisor must advise students to take College Algebra before students take HMEC-307: Quantitative Merchandising.
Faculty should discuss class expectation at the earlier levels. Faculty need offer more help sessions. Faculty need revised a project in which students able to develop marketing, media and communication plans, and strategies based on research and objective-setting.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High
Faculty expectations of general science, fiber content and fabric structure
Faculty emphasis on general science knowledge at the earlier levels. Need to develop various observation techniques to identify fiber content, yarn structure, and fabric structure.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Faculty expectations of student inquiry and presentation skills
Faculty should discuss their expectation on the inquiry projects and whether the presentation skills are what holds students back at the earlier levels. Perhaps a restatement of the performance standard is indicated. Also, faculty should emphasize research methods, and so students will be able to perform primary research through the documented gathering of evidence and secondary research through selection of review of appropriate literature.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Faculty focus on mass production in the global economy
In order to improve students' learning, faculty needs to focus on mass production in the global economy, the relationship quality standard of clothing and pricing. Faculty should discuss the outlets where students experience international markets.
Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Comprehend domestic and international labeling laws |
Outcome/Objective: Evaluate product quality and identify consumer needs

Faculty survey of internship supervisors
In order to understand industry expectation, faculty needs to conduct a survey of internship supervisors, and create opportunities for industry contact by sponsoring guest lectures and field trips. Also, faculty encourage students to take responsibilities for their own learning.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Professional attitudes and skills | Outcome/Objective: Apply career plan and job search strategies to worldwide opportunities

Incorporate technical design component in HMEC-205
Because of the current industry emphasis on technical design, the program is implementing learning about specs (A technical drawing of a garment showing construction details along with a table of measurement) in HMEC-205: Flat pattern and Design course.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Research paper and presentation | Outcome/Objective: Apply knowledge of textiles and apparel product development
Mission / Purpose

Title III is committed to providing a mechanism for coordinating the activities designed to strengthen programs to retain and prepare students for high-demand occupations and graduate study. Also, it is continuing to strengthen programs, services, and activities in support of the University. This includes: monitoring goal achievement and the attainment of objectives; ensuring compliance with federal regulations and statutes; articulating and clarifying the purpose of Title III to activity directors; and preparing and submitting reports as required. Therefore, the Title III programming efforts will support through funding the University's mission and vision of strengthening and improving programs that increase retention and graduation rates; and, that expand programs that educate undergraduates in the advance sciences, technology, liberal arts, and professional studies arenas in order to provide an education for the people of the State of Delaware, the region, and globally. In addition, the major focus of Title III is to fund activities that facilitate an increase in the retention and graduation rate of the institution. However, with additional funding resources, the Title III Program aspires to be able to fund activities that encourage students to continue their educational pursuits in graduate studies. This directly links to the student satisfaction with an institution and ultimately increases the retention and graduation rates.
Given in this report are the Title III Program Activities and how they relate to the University's Strategic Plan Institutional Goals for Fiscal Year 2007 - 2011, which continues
to apply to the HBCU Grant Program--Grant Period: 2012 - 2017. The SAFRA Grant Program (Grant Period: 2015 - 2020) and HBGI Grant Program (Grant Period: 2014 - 2019) are built on the Goals and Objectives given in the new "Strategic Goals and Objectives-Pride 2020."

**Goals without Outcome/Objective Relationships Specified**

**G 1: Supervise the Title III Office Operations.**

1. Supervise and administer the operation of the Title III Office for the grant period(s).

**G 2: Submit all internal and external reports.**

2. Submit all reports (internal and external) as designated for the grant period(s).

**G 3: Develop and administer accounting methods.**

3. Develop and administer accounting methods related to Title III for the grant period(s).

**G 4: Employ key personnel for Title III Office.**

4. Employ key personnel for Title III Office--Title III Coordinator/Director, Assistant to Coordinator/Director, and Title III Program Specialist.

**G 5: Title III staff professional development.**

5. Title III Office staff will attend professional development workshops/conferences each year.

**Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**O/O 1: Monitor grant activities goal achievement.**

1.1 Monitor goal achievement of Title III and Institutional goals of all activities.

1.2 Maintain files and records pertaining to Title III.

1.3 To act as a liaison between Activity Directors and the institutional leadership.

1.4 Administer the activity budget, requisitions for all purchases, and travel requests/forms forwarded to the Program Coordinator

1.5 Ensure the development of an effective evaluation system, internal and external.

**Connected Document**
- *Title III Unit Goals and Objectives 2012 - 2017*

**Related Measures:**

**M 1: Monitoring, evaluating, and approving report submissions.**

All requisitions, travel requests, inventories, Quarterly Reports, Time and Effort Reports, Interim Performance Reports (where applicable), and Annual Performance Reports (APR) will be submitted by the Activity Directors to the Title III Office for approval.

Source of Evidence: Administrative measure - other
Connected Document
• Title III Unit Goals and Objectives 2012 - 2017

Target:
All Activity Directors (100 percent) will submit for approval complete, correct, and timely reports.

O/O 2: Prepare and submit correct and timely reports.
2.1 Prepare internal and external reports.
2.2 Prepare internal and external based on data collected.
2.3 Ensure Title III Quarterly, Time and Efforts, Interim Performance, and Annual Reports are completed in a correct and timely manner.

Related Measures:

M 2: Prepare and submit all required reports.
Submit all Title III Program Office reports--Phase I and II, Interim Performance Reports (where applicable), Annual Performance Reports, Carryover Reports, Endowment Reports, as designated (both internal and external).

Source of Evidence: Administrative measure - other

Target:
All required reports (100 percent) will be submitted complete, correct, and timely.

O/O 3: Maintain compliance in internal and external regulations.
3.1 Maintain compliance with grant and fiscal regulations (internal and external).
3.2 To assess the utilizations of program financial resources to ensure fiscal accountability.
3.3 Assist Central Receiving in meeting requirements for equipment.

Related Measures:

M 3: Develop and administer accounting methods related to the Title III grant activities.
Develop and administer accounting methods related to Title III to be in compliance with internal (University) and external (U.S. Dept. of Edu.) policies and procedures.

Source of Evidence: Administrative measure - other

Target:
Title III Program Office will assess/evaluate 100 percent of the accounting methods and/or systems utilized for compliance--both internal and external.

O/O 4: Employ Title III Program Staff (Yearly)
1.1 Employ a Title III Program Coordinator/Director.
1.2 Employ a Title III Program Coordinator Assistant.
1.3 Employ a Title III Program Specialist.

Related Measures:

M 4: Employ key Title III Program Staff yearly.
Employ key Title III Program staff--Coordinator/Director, Assistant to Coordinator, and Program Specialist--yearly.

Source of Evidence: Administrative measure - other

**Target:**
Each Title III Program Office staff positions (100 percent) will be staffed yearly.

**O/O 5:** Professional Development for Title III staff.
5.1 Attend Technical Assistance Workshops and other professional development workshops/seminars/conferences.

**Related Measures:**

**M 5:** Title III personnel will attend professional development workshops yearly.
Title III personnel will attend professional development conferences/workshops (both internal and external) yearly.

Source of Evidence: Activity volume

**Target:**
Each Title III Program Office staff will attend at least two (2) professional development workshops/conferences yearly.
Mission / Purpose

Delaware State University is committed to protecting the rights of its faculty, staff and students to ensure that policies and procedures are implemented in complete fairness and within the full scope of the law. The Office of Title IX serves as policy, education, and awareness avenues for Delaware State University concerning sexual misconduct, discrimination, retaliation, disability, and harassment. Title IX of the Education Amendments of 1972 protects people from discrimination based on sex in education programs or activities which receive Federal financial assistance. Title IX states that:

No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.

Delaware State University adheres to all federal and state civil rights laws banning discrimination in public institutions of higher education. Delaware State University will not discriminate against any employee, applicant for employment, student or applicant for admission.

Goals without Outcome/Objective Relationships Specified

G 1: Meet Federal, State, and Local Mandates

Meet Federal, State, and Local Mandates concerning Sexual Misconduct and Title IX awareness throughout the campus community.

G 3: Collaboration will campus units

Collaborate with all campus units that center around sexual misconduct, harassment, and discrimination to create a smooth process for reporting, education and awareness.
G 2: Education, Safety, and Awareness

Educate the campus community about Sexual Misconduct, Harassment, and Discrimination, through learning how to report an assault, understanding their due process, and implementing programs to create awareness.

Create a safe campus environment through education and awareness.

Increased the amount of bystanders from 82/2016 to 96/2017 giving a total of 188 bystanders.

SLO 1: Education Awareness

Educate the students on the university policy process involving sexual misconduct.

Relevant Associations:

DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.

Strategic Plan Associations:
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

Related Measures:

M 1: Education and awareness
The students were given a pre-test about domestic violence. We polled 78 students. This pre-test demonstrated that they were unfamiliar with the terminology of domestic violence. The pre-test also demonstrated they were not aware of the scope of domestic violence that occurs within their age group. This was our highest type of sexual misconduct which occurred on the campus during the 2016-17 year. During our orientations and presentation on sexual misconduct, we will take out time to talk about domestic violence specifically and add scenarios, and examples that are synonymous with our campus community.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target:
Increase our bystanders to 150 over two years, we reached 188 bystanders this past year.

Findings (2016-2017) - Target: Met

We asked students if they were interested in becoming a bystander, and they took the pledge and became bystanders. We gave them the information and the strategies to help them become effective bystanders. Students are to help prevent a sexual assault without putting themselves or someone else in harms way.

SLO 2: Programming
Create programs and activities to help the students understand all the aspects of Title IX. Title IX Presentations were made in all the following areas: New Student Orientation, New Student Employee Orientation, New Employee Orientation, and Welcome Back Week.
The presentations were specific to the different terms, and what determines which sexual assault category has been violated such as: domestic violence, sexual assault, non consensual contact, rape, stalking, sexual harassment.

**Relevant Associations:**

**DSU Learning Goal Associations:**

3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Strategic Plan Associations:**

Delaware State University

2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
Mission / Purpose

The mission of the Chemistry and Biochemistry Department is to (i) provide its students with a mastery of content and foundation in chemistry theory and practice that is grounded in student learning goals, experimentation, computer technology, and oral and written communication skills, (ii) provide research opportunities for students outside the classroom to foster research and new discovery that brings financial resources and vitality to the university, (iii) instill a foundation of cognitive skills necessary to engage in life-long learning and intellectual growth, Sperry and (iv) help prepare students to assume leadership positions in their personal lives and careers.

Action 1
Action

Implementation Status: Planned
Priority: High

Annual Report Section Responses

Executive Summary (1-2 pages)
The Department of Sociology and Criminal Justice continued to grow in terms of number of majors. However, this continuous increase in students has not resulted in increased faculty. The shortage of faculty continues to put a strain on the department in terms of meeting student demands, including offering sufficient courses for academic progress and providing sufficient advising and mentoring. Despite this staffing deficiency, the faculty and staff have worked collaboratively to advance the department. The primary goal of the department continues to be improving student learning and readiness for graduate school and professional employment. To this end, the department focuses on faculty support and development, curriculum and course coverage and development, and student success. The current status and efforts to improve each are described below.

Faculty Support and Development: During the 2016-2017 academic year, the department was comprised of 8 faculty teaching and advising 352 majors. The majority of faculty members in the unit are junior faculty, including 5 Assistant Professors. Only two faculty members are tenured, including one Professor (who was on sabbatical Spring term) and one Associate Professor (who also serves as chair). In an effort to improve retention and student success, the department created an Instructor/Retention Specialist (classified as a Lecturer II) position. This position is responsible for teaching all University Seminar courses, mentoring freshman, and supporting the IDP process. In order to come closer to offering sufficient and appropriate courses to meet the
student demand, the Instructor/Retention Specialist taught two Introduction to Sociology courses and faculty taught a total of five courses as overloads. The department also supplemented full-time faculty with four adjuncts who taught a total of 10 courses.

Despite these efforts, the department continues to fall short of meeting student demand. At least 10 additional courses need to be taught each academic year to ensure sufficient academic success for students. The most concerning impact of insufficient faculty is the extraordinarily high student faculty ratio. The student to faculty ratio is 50:1. The department student to faculty ratio has increased and is three and a half times greater than the DSU average student to faculty ratio and two and a half times higher the MSCHE recommended ratio.

Despite the extraordinary teaching demand, faculty remain on schedule for promotion and tenure. One faculty member was promoted to Associate Professor and one earned tenure. Faculty also fulfilled research, publishing, and service obligations. Faculty worked on three grant proposals for external funding. Faculty published a total of three peer reviewed journal articles and two book reviews. Two additional articles have been submitted for publication and one evaluation report was produced for another university. In addition, SCCJ faculty conducted eight presentations to a wide range of groups, including professional discipline specific conferences (Urban Affairs Association and ISSA), community groups, and DSU functions (CAHSS Roundtable, NFO). The department faculty provides extensive service to the University, professional organizations, and the community. In total, faculty provides service to 23 organizations and committees.

One of the primary achievements of the department during this academic year was the development of the Individual Professional Development plan, including promotion and tenure rubrics. The SCCJ IPDP is in compliance with the CBA and provides faculty with a process to ensure continued productivity and professional development.

Curriculum and Course Development: The department continued the work initiated by the curriculum committee last year. Three new courses were developed and approved (two special topic courses and Internship II). Both sociology and criminal justice curriculum were revised to reflect the termination of previously required math courses. The new curriculum allow students to tailor their courses of study by requiring additional SCCJ 300/400 electives.

Student Success: Of greatest concern, is student success. The department continues to ensure and improve student success through a number of efforts. The department continuously seeks opportunities for students to expand their experiences. The primary ways include the Soc/CJ Club, NOBLE, Study Abroad and Internships. The Soc/Club is comprised of 25 students and hosted two job fairs for the NY State Police. It also hosted several guest speakers and recruiters from federal law enforcement agencies. The DSU NOBLE (National Organization of Black Law Enforcement Executives) is the only collegiate chapter of the professional organizations. Twelve students attended the national conference in July 2016. NOBLE participated in job fairs and hosted several speakers. Students assisted the parent chapter of NOBLE with fundraising and sponsored a career fair. The department co-sponsored two Re-Entry Simulations; one for professionals and one for students. The department offered Study Abroad for the third year and 7 students traveled to London. Sixty-three students participated in internships with professional organizations and 46 participated in courses addressing sustainability.

Graduation and Placement: The ultimate goal of the department is to graduate our majors and connect them to graduate and law school or professional employment. In
2016-2017, 70 students graduated, including 66 criminal justice majors and 4 sociology. Eight (16%) of the seniors plan to attend graduate school or law school Fall 2017. Half of them were accepted to at least one school at the time they completed the survey, including Wesley College, Kean University, and Wilmington University. Another 17 (34%) plan to attend graduate or law school in the future. Twelve (24%) of the graduating seniors had been offered and accepted professional positions. Three seniors were hired by service and advocacy organization, two by the military, two by city or state agencies, and five by a corporation.

Assessment: Assessment of student learning and department activities is key to improving student success. Student learning goals and objectives are assessed and revised annually. The findings from the student learning assessment are used to guide curriculum and course changes as well as initiate new activities to improve student success (see attached Action Plan). All measures are direct measures. Review of student learning assessment findings coupled with discussions among faculty have led to a desire to examine transfer of knowledge as students progress through the academic program. Faculty are continuously frustrated that students in upper level courses do not recall skills and information taught in previous courses. We believe that this lack of transfer of knowledge and skills negatively effects student learning outcomes. The faculty agreed that exploring this issue will be the program focus for 2017-2018. At the first department meeting of the academic year, the chair of the department assessment committee will work with faculty to design an assessment process.

**Unit(s) Profile**

II. DEPARTMENT PROFILE

a) Personnel (Faculty/Professional and/or Classified Staff)

i) List by rank or title and in alphabetical order all full or part-time employees, including adjuncts.

Professor:

Dr. Michael A. Katz-Accounting  
Dr. Bernadette M. Ruf-Accounting  
Dr. Youngsik Kwak-Finance (interim chair)

Associate Professor:

Dr. Bridget Anakwe-Accounting  
Dr. Jan E. Christopher-Economics  
Dr. Nandita Das-Finance  
Dr. Nancy Ning-Finance

Assistant Professor

Dr. Susan Muzorewa-Accounting

Visiting Professor

Ms. Valeri Pepper-Accounting  
Mr. Wade Robinson-Economics

Adjunct:

Dr. Lynda Murray-Jackson-Accounting  
Dr. Vincent Ikwuagwu-Accounting  
Mr. Mark Nehra-Finance
Mr. Peter Gaertner-Finance

Classified Staff
Raquel Farmer

ii) List all personnel changes (new faculty, professional and/or classified staff, retirements, leaves, etc.)

Dr. Richard F. Bieker retired as of January 2017.

b) Centers (list specialized areas of instruction, research, or service)
   · University Center for Economic Development & International Trade (UCEDIT)
   · Economic Development Leadership Institute (EDLI)
   · Center for Homeland Security Research

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report. See attached.

Connected Document
   • KPI 1 and 10 Sociology and Criminal Justice 2017

Closing the Assessment Loop: Please share one or two prime examples of your unit's assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.
   a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? b) Have these changes been implemented? If not, when will they be implemented? c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

ETS standard examinations for Business practices has shown us that problem based learning strategies implemented during this past year has had significant effects on student comprehension, as evidenced by increased scores on the national exam.

Future activities will be aimed at exercising pre assessments so that we may be able to assess student learning throughout the semester.

The Department of Sociology and Criminal Justice systematically examines student learning by assessing the student learning objectives annually. The findings are discussed and areas of improvement are identified. The student learning objectives assessment findings are supplemented by additional student learning assessment initiatives undertaken by individual faculty members. Based on the 2015-2016 academic program student learning assessment findings and the department assignment findings reported in WEAVE, an Action Plan was developed. The Action Plan guided the work of the department during the 2015-2017 academic year. Allowing the Action Plan to guide the department's activities ensured that department goals were achieved. For more detailed information on the work of the department, see the Action Plan below and the Unit Initiatives discussed above under #3.
At the end of every academic year, the faculty meets to review the Action Plan updates and any new assessment data. This year the faculty focused on the trends in student learning findings across academic years. The preliminary findings are presented at the end of the this section. Two primary trends were noted. First, revising student learning measures to direct measures appears to provide a more accurate assessment of student learning. The data tables below show two examples. Prior to 2015-16, student learning related to understanding sociological and criminological theories was measured by final course grades, an indirect measure. In 2015-16, the measures were changed to direct measures. The data below shows that the direct measure more accurately differentiates student learning related to understanding theories.

Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

See attached.
Mission / Purpose

The overall mission of Fleet Services / Transportation is to provide professionally, timely and at the highest level of quality services for students, faculty and staff.

Goals without Outcome/Objective Relationships Specified

G 1: Admissions Processes
   Implement best practices that ensure efficient, effective, graduate admissions process.

G 2: Academic Quality
   Review and implement policies and procedures to ensure the quality of our academic programs.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1: Student Services and Records Management
   Implement and maintain a records management system for all currently enrolled graduate students consisting of admissions data, student progress to degree, admission to candidacy, defense of thesis or dissertation, time to degree, and graduation.

   Relevant Associations:

   DSU Learning Goal Associations:
   7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Implement online interactive exercises
   Implement online interactive exercises to provide additional practice for students.

   Established in Cycle: 2015-2016
   Implementation Status: Planned
   Priority: High

   Projected Completion Date: 08/24/2017
   Responsible Person/Group: Dr. Joe Amoako
   Additional Resources Requested: $500 to purchase software
   Budget Amount Requested: $0.00 (no request)
Mission / Purpose

The mission of the Chemistry and Biochemistry Department is to (i) provide its students with a mastery of content and foundation in chemistry theory and practice that is grounded in student learning goals, experimentation, computer technology, and oral and written communication skills, (ii) provide research opportunities for students outside the classroom to foster research and new discovery that brings financial resources and vitality to the university, (iii) instill a foundation of cognitive skills necessary to engage in life-long learning and intellectual growth, Sperry and (iv) help prepare students to assume leadership positions in their personal lives and careers.

VISION:

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Implement online interactive exercises

Implement online interactive exercises to students needing additional practice.

Implementation Status: Finished
Priority: High

Projected Completion Date: 05/27/2016
Responsible Person/Group: Bina Daniel
Additional Resources Requested: Textbook,
Budget Amount Requested: $0.00 (no request)
Mission / Purpose

The Mission of the Assessment Office is to oversee a holistic assessment process at the institution. This Office works collaboratively with units to ensure that they have efficient and sustainable assessment plans. This includes verifying that units are collecting data that are used to improve programs/services and enhance student learning. This office works closely with the Information Technology and Institutional Research units to facilitate data collection and reporting. Furthermore, this Office contributes to the assessment of strategic initiatives and supports efforts to attain and maintain various accreditations. The Assessment Office serves as the primary source for assessment resources, workshops, training, and recent directives from accrediting bodies. Lastly, this Office assists units with the analysis and reporting of assessment data for the purpose of demonstrating that the institutional mission of "integrating the highest standards… in its … programs and preparing students to become capable and productive leaders" is being carried out and that units are supporting the initiatives laid out in the University's current and future Strategic Plans.

Vision Statement:
Mission / Purpose

In support of the mission of Wells College to "equip students for lifelong learning," Career Development Services (CDS) assists students in developing skills and gaining experiences they will need for future success in academic and work settings. CDS provides the resources for students and alumnae to explore career, post-graduate education and employment opportunities. The Wells College Internship Program, coordinated through CDS, allows students to "practice the ideals of the liberal arts" by applying classroom learning in real life situations. As a member of the National Association of Colleges and Employers (NACE), the CDS staff has agreed to apply the association's professional standards to facilitate excellence in the creation, maintenance, and delivery of programs and services; to understand the legal responsibilities inherent in working with students and employers; and adhere to the spirit and intent of equal opportunity laws in all activities.

VISION
Wells College is ...... 
Mission was adopted in 2014 and revised in ....

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1:Citation Methodology- Chicago Style
Student demonstrates understanding of the Chicago citation methodology including required content, order of information and punctuation for footnotes, endnotes, and bibliography with few errors.

SLO 1:Demonstrate Understanding and Use of Chicago Citation Methodology
The Chicago Citation Method is the citation method used in the field of history. A working knowledge of this style is important for the production of history papers by documenting the source of information used. Students will progress over the course of study as a history major with the accurate and appropriate use of the Chicago Citation Method. It is expected that students will increase their proficiency in the use of this citation method over the course of their study as a history major.

Mission / Purpose

The Department of Training's mission is to promote student achievement and preparation for global competitiveness by fostering educational excellence and ensuring equal access.

To develop the Departments workforce capability in order to enable its students to become leaders and to make their mark on the world by:

· providing structured initial training;

· updating and improving skills on a structured and continuous basis;

· Developing leadership capacity;

· Reducing the skills bottlenecks, especially in priority and scarce skills areas;

· Improving low-participation rates;

· Correcting distortions in the distribution of access to education and training; and

· Improving the quality and efficiency in the training system and its sub-systems.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1:Hire and retain quality staff members

Give top priority to recruitment, professional development, and compensation for quality staff and administrators.

SLO 10:Continue to develop and define performance measures to enhance departmental and university efficiencies.

· The DSU should train the faculty that works to internationalize curricula and the experiences of students.
The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.

The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

**G 2: Faculty Excellence**

To develop a comprehensive plan for reinvestment in its faculty to meet its goals of reducing compensation gaps and increasing the number of tenure-track faculty. This plan on faculty development will include investments in applied institutional research about effective pedagogy, effective practices in student engagement, and ways to improve educational outcomes.

**SLO 10: Continue to develop and define performance measures to enhance departmental and university efficiencies.**

· The DSU should train the faculty that works to internationalize curricula and the experiences of students.

· The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.

· The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

**G 3: Educational Excellence**

The emphasis of this section is (a) the excellence of faculty teaching, (b) international and public engagement aspects of education, and (c) the health and well-being of students. The strategic plan implies that the university should give special attention to enhancing faculty teaching, enriching opportunities in the international and public engagement arenas, and promoting students' overall health and well-being. The health and well-being of students deserve special attention, because increasing reports indicate that excessive stress is negatively affecting students' learning.

**SLO 3: Educational Excellence**

· Create and sustain a culture that supports teaching excellence in all academic units.

· Strengthen institutional structures that promote innovations both centrally and within colleges and programs.
· Provide a more unified and shared educational experience for undergraduates and graduates.

· Strengthen the educational impact of international opportunities and experiences for students.

· Promote the health and well-being of students (undergraduate, graduate, and professional) as a foundation for academic and life success.

· Strengthen efforts to attract, train and educate an excellent and diverse body of undergraduate students.

· Strengthen the capacity of graduate and professional programs to recruit and educate a diverse body of the very best students.

**SLO 9:Reduce existing achievement gaps**

· Set clear goals and performance benchmarks that can be the basis for accountability for achieving these results

· Work will need to occur at each of the points in the educational pipeline where leakages are occurring.

· Detailed analyses are necessary to distinguish between system wide goals and measures in these areas, and more specific metrics appropriate for individual universities.

**SLO 10:Continue to develop and define performance measures to enhance departmental and university efficiencies.**

· The DSU should train the faculty that works to internationalize curricula and the experiences of students.

· The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.

· The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

**G 4:Excellence in Research, Scholarship and Creativity**
This section emphasizes the importance of raising the quality and stature of select departments to a position of academic leadership and of providing support for research, scholarship, and creativity in a careful, strategic, and cost-effective way. The latter is particularly important because of the increasing costs of research, the competitive environment for external support for research, and the financial pressures on areas with less potential for external funding (i.e., humanities and the arts).

**SLO 4: Excellence in Research, Scholarship and Creativity**

- Increase the number of departments or graduate fields that have achieved world leadership in their areas.

- Build and maintain world leadership in a select set of departments within the following broad areas: humanities and the arts; life sciences and agricultural sciences; physical sciences and engineering; social sciences; and professional schools and programs.

- Strengthen support for and recognition of important interdisciplinary areas, while ensuring excellence in disciplines as a foundation.

- Significantly improve institution-wide services for the administration and support of research grants (including government, foundation, and industry funding).

- Maintain and selectively strengthen in cost-effective ways of the core infrastructures for research, scholarship, and creativity, including in particular libraries and shared research facilities.

- Encourage productive, mutually beneficial collaborations between faculty and students in academic-based programs and faculty and students at Colleges and Graduate Schools.

**SLO 10: Continue to develop and define performance measures to enhance departmental and university efficiencies.**

- The DSU should train the faculty that works to internationalize curricula and the experiences of students.

- The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.

- The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

**G 5: Excellence in Public Engagement**
Public engagement refers to the proactive involvement of faculty, students, and staff designed to have an impact on the world outside the university, from local to global communities. It subsumes the full panoply of ways that Cornell's faculty, staff, and students make meaningful contributions to local, societal, and global issues (e.g., problems of environmental sustainability, health, and poverty), from participating in public discourse or the performing arts to applied research and formal extension programs. Conceiving of the university's outreach mission as "public engagement" is an important shift because it recasts that mission in broader and more inclusive terms.

**SLO 10:** Continue to develop and define performance measures to enhance departmental and university efficiencies.

- The DSU should train the faculty that works to internationalize curricula and the experiences of students.

- The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.

- The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

**G 6: Staff Excellence**

Staff excellence is a critical component in virtually all of the university's academic and nonacademic activities. From postdoctoral fellows to supervisors to administrative assistants and the custodians, staff are essential to achieving the central mission of the university. Many staff, in fact, have daily contact with students and contribute significantly to the overall educational experience of students (e.g., in career, health, counseling, and advising services). DSU's core values suggest the creation and maintenance of a workplace that provides respect, dignity, and fairness to all employees across all job classifications and units. Moreover, DSU has a history of constructive relations with its academic and nonacademic and union and nonunion staff, as reflected in its commitment to a fair and humane workplace. Due to budgetary reductions, however, the recent period has been marked by staff reductions through retirements, attrition, and layoffs, and this has generated heightened levels of uncertainty among staff.

**SLO 10:** Continue to develop and define performance measures to enhance departmental and university efficiencies.

- The DSU should train the faculty that works to internationalize curricula and the experiences of students.

- The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.
· The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

G 7: Enhance student opportunities for "active learning"
Substantial evidence exists to indicate that student involvement in research and community activities increases retention, enhances learning, contributes to building skills and habits of collaboration and problem-solving, and increases chances for success after graduation. Accordingly, the DSU will develop specific plans and programs to enhance opportunities for undergraduate and graduate students to link classroom learning to research and community participation, including service, as part of their educational experience.

SLO 7: Enhance student opportunities for "active learning"

· The DSU Should develop specific plans and programs to enhance opportunities for undergraduate and graduate students to link classroom learning to research and community participation, including service, as part of their educational experience.

· The DSU has within it many institutions with exemplary programs in undergraduate research and service; these need to be translated to best-practice models and replicated throughout the system as a distinctive teaching and learning 'brand' for the DSU.

· Need for an improved infrastructure for applied research on training programs.

SLO 8: Expand student outreach

· The DSU will continue its leadership in reaching out to new populations of students, beginning with expansion of "early outreach" efforts to high schools.

· The Early Assessment Program needs to be deepened and extended, and strengthened through systemic partnerships with school districts throughout the state.

SLO 9: Reduce existing achievement gaps

· Set clear goals and performance benchmarks that can be the basis for accountability for achieving these results

· Work will need to occur at each of the points in the educational pipeline where leakages are occurring.
· Detailed analyses are necessary to distinguish between system wide goals and measures in these areas, and more specific metrics appropriate for individual universities.

**SLO 10: Continue to develop and define performance measures to enhance departmental and university efficiencies.**

· The DSU should train the faculty that works to internationalize curricula and the experiences of students.

· The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.

· The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

**G 8: Expand student outreach**

The DSU will continue its leadership in reaching out to new populations of students, beginning with expansion of "early outreach" efforts to middle schools. The great success of the Early Assessment Program needs to be deepened and extended, and strengthened through systemic partnerships with school districts throughout the state.

**SLO 8: Expand student outreach**

· The DSU will continue its leadership in reaching out to new populations of students, beginning with expansion of "early outreach" efforts to high schools.

· The Early Assessment Program needs to be deepened and extended, and strengthened through systemic partnerships with school districts throughout the state.

**SLO 9: Reduce existing achievement gaps**

· Set clear goals and performance benchmarks that can be the basis for accountability for achieving these results

· Work will need to occur at each of the points in the educational pipeline where leakages are occurring.

· Detailed analyses are necessary to distinguish between system wide goals and measures in these areas, and more specific metrics appropriate for individual universities.
SLO 10: Continue to develop and define performance measures to enhance departmental and university efficiencies.

· The DSU should train the faculty that works to internationalize curricula and the experiences of students.

· The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.

· The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

G 9: Reduce existing achievement gaps
Closing existing achievement gaps requires attention first to closing expectations and performance gaps among administrators and teachers, from elementary school through the university. The DSU needs to continue to focus on preparation of adequate numbers of well-trained teachers and to work with leaders and the community colleges to create the structures needed to sustain effective learning strategies in our schools and to effect seamless educational transitions for students.

SLO 9: Reduce existing achievement gaps

· Set clear goals and performance benchmarks that can be the basis for accountability for achieving these results

· Work will need to occur at each of the points in the educational pipeline where leakages are occurring.

· Detailed analyses are necessary to distinguish between system wide goals and measures in these areas, and more specific metrics appropriate for individual universities.

SLO 10: Continue to develop and define performance measures to enhance departmental and university efficiencies.

· The DSU should train the faculty that works to internationalize curricula and the experiences of students.

· The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.
· The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

**G 10: Continue to develop and define performance measures to enhance departmental and university efficiencies.**

The Delaware State University cannot accomplish all that must be done by acting on its own. To meet the future needs of the State of Delaware, the DSU will need to be strategically linked with state policy leaders, community college, and University of Delaware leaders; the business community; and the broad philanthropic community. The DSU alumni network is a rich resource to connect to those stakeholder groups, and needs to be part of the strategy-building to accomplish this goal. Issues that require such partnerships and state-level attention include building state policy capacity, funding, and statewide educational structures to better align curriculum, increase student preparation for college, and improve student transitions across educational sectors.

**SLO 10: Continue to develop and define performance measures to enhance departmental and university efficiencies.**

· The DSU should train the faculty that works to internationalize curricula and the experiences of students.

· The DSU needs to continue to expand its graduate and professional program offerings in order to meet the workforce needs of the state.

· The DSU will need to develop a systematic plan to expand its training capacity through university extension programs to promote better models for meeting the needs for continuing education and retraining of working men and women.

**Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**G 1: Hire and retain quality staff members**

Give top priority to recruitment, professional development, and compensation for quality staff and administrators.

**O/O 1: Hire and retain quality staff members**

· Hire for attitude, train for skills.

· Accomplished by maintaining a caring and fair work environment.
· Staff morale is the most critical segment to the success of the area.

· Only with the right personnel, can the other goals can be reached.

**G 2: Faculty Excellence**

To develop a comprehensive plan for reinvestment in its faculty to meet its goals of reducing compensation gaps and increasing the number of tenure-track faculty. This plan on faculty development will include investments in applied institutional research about effective pedagogy, effective practices in student engagement, and ways to improve educational outcomes.

**O/O 2: Faculty Excellence**

· Increase the size and quality of faculty in strategically important academic areas.

· Significantly increase the diversity of faculty through new hires and enhanced retention efforts.

· Ensure competitive faculty compensation.

· Develop and implement policies to retain highly valued faculty.

· Devise and implement new mechanisms or policies for rewarding outstanding faculty and for continually assessing faculty performance as scholars and teachers.

· Foster an exciting intellectual environment by providing opportunities for more dialogue and engagement.

· Develop ways to enable faculty to focus their time on being highly productive in their core academic activities (research, scholarship, and creativity; teaching; public engagement).

**G 5: Excellence in Public Engagement**

Public engagement refers to the proactive involvement of faculty, students, and staff designed to have an impact on the world outside the university, from local to global communities. It subsumes the full panoply of ways that Cornell's faculty, staff, and students make meaningful contributions to local, societal, and global issues (e.g., problems of environmental sustainability, health, and poverty), from participating in public discourse or the performing arts to applied research and formal extension programs. Conceiving of the university's outreach mission as "public engagement" is an important shift because it recasts that mission in broader and more inclusive terms.

**O/O 5: Excellence in Public Engagement**

· Make public engagement a distinctive feature of education at DSU.
· Construct a unified concept and vision for the university's public engagement mission.

· Develop rigorous, systematic evaluations of all outreach and extension programs.

· Strongly connect public engagement to on-campus research and educational strengths.

· Promote stronger collaborations and partnerships between the university and stakeholders that can make use of and strengthen DSU's research (e.g., business, K-12 schools, nonprofit organizations, government).

**G 6: Staff Excellence**

Staff excellence is a critical component in virtually all of the university's academic and nonacademic activities. From postdoctoral fellows to supervisors to administrative assistants and the custodians, staff are essential to achieving the central mission of the university. Many staff, in fact, have daily contact with students and contribute significantly to the overall educational experience of students (e.g., in career, health, counseling, and advising services). DSU's core values suggest the creation and maintenance of a workplace that provides respect, dignity, and fairness to all employees across all job classifications and units. Moreover, DSU has a history of constructive relations with its academic and nonacademic and union and nonunion staff, as reflected in its commitment to a fair and humane workplace. Due to budgetary reductions, however, the recent period has been marked by staff reductions through retirements, attrition, and layoffs, and this has generated heightened levels of uncertainty among staff.

**O/O 6: Staff Excellence**

· Give priority to retention of highly qualified staff in valued positions as the university reorganizes to address budgetary constraints.

· Attract a talented and diverse workforce to DSU.

· Be an exemplary employer across the entire spectrum of staff.

· Provide job skill training to staff in a variety of venues.

· Sustain and, wherever possible, enhance flexibility in the workplace and workforce.

· Work with the local community to keep the DSU to live and work.

Mission / Purpose

University College is devoted to enhancing the first year experience for freshman students at Delaware State University by serving as the premier resource for connecting incoming students with the academic components of the institution, faculty, staff and campus-wide resources. University College provides the guidelines and oversight of University Seminar I & II. The following is the common syllabus of the course sequence of University Seminar. Individual departments and instructors will provide additional syllabi, outlines, schedules, and assignments.

I. COURSE DESCRIPTION:

University Seminar is a two semester, general education comprehensive core course requirement that focuses on assisting first year students in a seamless transition from high school to college, and in becoming familiar with Delaware State University. University Seminar is specifically designed to develop academic skills including critical reading, thinking, listening, writing and speaking, as well as using the academic library and pertinent technology. As a result of this course, each student should come to realize that the university is a unique culture grounded in tradition and history and guided by shared assumptions and expectations of students, professors, and administrators. The strands and goals of the General Education Program are embedded in the class activities, providing each student the opportunity to cultivate the critical thinking skills and knowledge necessary to become globally competitive.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Essential Attitudes
IV. COURSE GOALS/OBJECTIVES/LEARNING OUTCOMES:

Opportunities will be provided for self-evaluation through assessment of career possibilities and basic learning strategies, including behavior-time management, note taking and problem solving. Knowing the history of the University, feeling connected to the University and having a common freshman year, educational experience are important goals of this course. The course goals/objectives are parallel to many of the General Education Across-the-Curriculum (A-t-C) learning outcomes.

Goal 1:

Essential attitudes & behaviors that promote academic success

SLO 1: Goal 1: Essential attitudes & behaviors that promote academic success

Objectives

1. · Develop networking skills, community building and rapport with faculty in one’s chosen major.
2. · Develop good and positive academic attitudes and behaviors that yield to academic course rationale and personal responsibility and accountability
3. · Demonstrate effective academic skills (critical thinking, reading, and writing, speaking, and listening) in completing course assignments.
4. · Understand that behavior and time management is essential to academic and career success.
5. · Reach an understanding of his/her strengths and weaknesses as a learner.
6. Become familiar with the University catalogue, student handbook, and academic advising process.

Relevant Associations:
University Seminar is a General Education Core Course
The Core---

those courses that all students must complete because they are fundamental to all learning and basic to the mission of the University. The Core provides students with the knowledge and habits of mind that they will need in order to accomplish their academic goals in all major programs. A grade of "C" or better is required in all Core courses.
Core Course # | Core Course Name     | Credits Name
-------------|----------------------|-------------
XXXX-191     | University Seminar I | 1           
XXXX-192     | University Seminar II|             

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
Delaware State University
2.1 Increase retention and graduation rates by at least two percent annually for the next five years
2.2 Use enrollment management best practices to increase overall enrollment to 5,000 students
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community

Related Measures:

**M 1: VII. ATTENDANCE, CLASS PARTICIPATION**

VII. ATTENDANCE, & CLASS PARTICIPATION

Attendance is required in every class and is a product of mutual and reciprocal respect among students themselves and between students and the instructor. Early departure, as well as anticipated absences, should be coordinated with the instructor prior to class. Successful completion of this class will be strongly correlated with class attendance and active participation.

Source of Evidence: Activity volume

**Target:**
Freshman Forum Participation

**G 2: Information literacy and Technology**

**Goal 2:**

Information literacy & technology
SLO 2: Goal 2: Information literacy & technology

1. · Develop skills and habits to use the web in a responsible scholarly way and technology communication etiquette
2. · Demonstrate through research, written, and/or oral communication knowledge of career choices.
3. · Utilize computer technology for information gathering and report presentation.
4. · Have a general understanding and knowledge of General Education course offerings, requirements of their selected major programs

Relevant Associations:

DSU Learning Goal Associations:

M 1: VII. ATTENDANCE, CLASS PARTICIPATION

VII. ATTENDANCE, & CLASS PARTICIPATION

Attendance is required in every class and is a product of mutual and reciprocal respect among students themselves and between students and the instructor. Early departure, as well as anticipated absences, should be coordinated with the instructor prior to class. Successful completion of this class will be strongly correlated with class attendance and active participation.

**G 3: Critical Thinking and Problem Solving**

**Goal 3:**

Critical thinking & problem solving

**SLO 3: Goal 3: Critical thinking & problem solving**

1. Develop an analytic frame of mind that integrates critical thinking with study skills and an appreciation of the liberal arts
2. Examine conflict resolution techniques and life style choices that can improve the quality of one's life and relationships with others
3. Evaluate and resolve moral and ethical dilemmas.

**Relevant Associations:**

**DSU Learning Goal Associations:**

1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**

Delaware State University

2.1 Increase retention and graduation rates by at least two percent annually for the next five years
2.2 Use enrollment management best practices to increase overall enrollment to 5,000 students
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community

**Related Measures:**

**Mission / Purpose**

**Mission Statement**

The Department of Wellness and Recreation is committed to providing outstanding educational and instructional programs, services and facilities to Delaware State University students, faculty, staff, and the local Dover community. The Department will provide recreational activities and programming that strengthen the campus community by promoting personal health, safety and wellness.

**Component Areas**

**Adapted Recreation**

Recreational opportunities for physically challenged and disabled students are offered through our department. Activities such as swimming and weight training can be arranged with individual instruction and assistance.

**Aquatics**

Recreational swimming is available in the Wellness & Recreation Center Pool. Lap swim, open swimming, and special aquatic programming are also made available to all WRC members.

**Group Fitness**

Group fitness sessions are held in the WRC and are available to all current members. Sessions are offered at various times throughout the week and admittance is on a first-come, first-served basis. Individuals at beginner, intermediate, and advanced fitness levels are welcome to participate.

**Informal Recreation**
The WRC is available for "walk-in" informal recreation at specified hours. Ample time is available for fitness conditioning, lap and open swimming, as well as court sports such as basketball, volleyball, badminton, and indoor soccer.

**Intramural Sports**

Intramurals sports are designed to provide a flexible, yet structured environment in which to participate. Sports are co-recreational (men/women) and are offered in either tournament or league format.

**Personal Training**

Our Hornet Personal Training program is a phenomenal coeducational opportunity for students to gain real world experience as personal trainers that complements their academics training while simultaneously providing high caliber service to the DSU campus and local community.

**Special Events**

This area is unique in that each activity is held in one day or over a brief period of time. The programs offered are designed to promote health and wellness in all of our members.

**Sport Clubs**

These groups share a common interest in a sport activity and have gained university recognition via the Department of Wellness & Recreation. The sport club program is student initiated and organized with an emphasis placed on participation.

**Student Staff Development**

The department of Wellness & Recreation annually employs approximately 60 student staff to help with the delivery of its programs. The development of our student staff is a significant priority for the department. This program encompasses a multitude of training areas, leadership opportunities, recognition avenues and special activities.

**Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**G 3: Program and Service Development**
Programs and services are the primary means by which we will interact with students and impact the University. We will constantly strive for the highest level of quality in every program and service.

**SLO 1: American Red Cross CPR/AED Certification**
Support the Student Staff Development initiative area for work place safety to include a formalized recertification process focusing on theoretical knowledge and practical skill testing for Adult CPR/AED and First Aid.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 4: Certification of All Student Staff Members**
This objective was met by certifying all student staff members for the Department of Wellness & Recreation.

Source of Evidence: Administrative measure - other

**Target:**
100% of student staff members will be certified by October 30th each year.

**Findings (2010-2011) - Target: Met**
100% of student staff members were certified by December 22, 2010.

**SLO 10: Special Events**

Offer a minimum of 12 special events throughout the 2011-2012 academic year that promote fitness activity, health and wellness.

**Related Measures:**

**M 8: Special Events Hosted**
We met the objective by hosting the following events for the academic year 2010-2011.

1. Faculty/Staff Flag Football Game
2. Cardboard Board Race
3. Pool Olympics
4. Six Flic - Float Events
5. All Star Weekend Basketball Event
6. Fall Semester Pool Party
7. Senior Olympics
8. Annual Blood Drive
9. Two Delawell Health Screenings
10. Zumba 2-Day Training
11. BodyPump 3-Day Training
12. BodyFlow 3-Day Training
13. RPM 2-Day Training

Source of Evidence: Activity volume

**Target:**
Host ___ special events throughout the course of the 2010-2011 academic year.

**Findings (2010-2011) - Target: Met**
The Department of Wellness & Recreation hosted the following special events during the 2010-2011 academic year:

- Faculty/Staff vs. Students Flag Football Game
- Cardboard Board Race
- Pool Olympics
- Six (6) Flick -n- Float Events
- All Star Weekend Basketball Event
- Includes Faculty/Staff vs. Students Basketball Game
- Fall Semester Pool Party
- Senior Olympics
- Annual Blood Drive
- Two (2) Delawell Health Screenings
- Zumba 2-Day Training
- BodyPump 3-Day Training
- BodyFlow 3-Day Training
- RPM 2-Day Training

**G 4: Professional Development**

Our greatest asset is our people. Professional development is the intentional effort to enhance an employee's performance - professional, administrative, student - through work-related training.

**SLO 1: American Red Cross CPR/AED Certification**
Support the Student Staff Development initiative area for workplace safety to include a formalized recertification process focusing on theoretical knowledge and practical skill testing for Adult CPR/AED and First Aid.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
**Related Measures:**

**M 4: Certification of All Student Staff Members**

**Findings (2010-2011) - Target: Met**
100% of student staff members were certified by December 22, 2010.

**SLO 2: Student Leader Round Table**
Conduct one student leader roundtable session for all student staff in the Department of Wellness & Recreation each semester. Student staff will have a curriculum on leadership skill development focused on supervision of peers, professional behavior, conflict resolution, and risk management issues.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**SLO 3: Student Staff Training Program**
Develop student staff training program to incorporate peer facilitation of training objectives.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 6: Employee Training Program**
We met the objective by creating and implementing a comprehensive employee training program for all student staff employees.

Source of Evidence: Efficiency

**Target:**
Create and implement a comprehensive employee training program for all student staff employees that includes recurrent monthly trainings and regular weekly trainings.
Findings (2010-2011) - Target: Met

Conducted 7 monthly meetings with all student staff members that reviewed pertinent work-related topics:
* Emergency Procedures
* Customer Service
* Conflict Resolution
* Job Specific Skills Review
* Leadership

Conducted bi-weekly student staff supervisor meetings designed to develop the supervisor team as leaders within the department.

M 16: Student Leader Roundtable Discussions
Conduct one student leader roundtable session for all student staff in the Department of Wellness & Recreation each semester. Student staff will have a curriculum on leadership skill development focused on supervision of peers, professional behavior, conflict resolution, and risk management issues.

Source of Evidence: Student course evaluations on learning gains made

G 5: Collaboration and Communication
Collaboration is a sincere effort by an individual or department to join forces with another to achieve a shared outcome. Communication is the key to effective collaboration. We will utilize effective communication and strategic collaborations to enhance our organizational performance each year.

SLO 16: Supervisor Team Meetings
Schedule recurrent meetings with all members of the supervisor team to ensure proper communication is occurring at all times.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 9: Conducted Supervisor Meetings
We met this communication objective by conducting weekly meetings with both professional staff and supervisor staff.

Source of Evidence: Efficiency

Target:
Schedule and conduct bi-weekly meetings with student supervisor team.
Findings (2010-2011) - Target: Met
Scheduled and conducted bi-weekly supervisor team meetings on Tuesdays at 11am.

Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 3: Program and Service Development

Programs and services are the primary means by which we will interact with students and impact the University. We will constantly strive for the highest level of quality in every program and service.

O/O 22: Implement Facility Management Software
Research, purchase and implement facility management software for Wellness & Recreation Center.

Related Measures:

M 15: Implement Facility Management Software
We met this objective by purchasing and implementing EZFacility.

Source of Evidence: Service Quality

Target:
Purchase and implement facility management software by December 22, 2010.

G 4: Professional Development

Our greatest asset is our people. Professional development is the intentional effort to enhance an employee's performance - professional, administrative, student - through work-related training.

O/O 11: Professional Development Opportunities
Ensure 100% of the department full-time staff participates in a minimum of four (4) developmental experiences or activities throughout the 2016-2017 academic year.

Relevant Associations:

Strategic Plan Associations:
Delaware State University
6.6 Create a culture of accountability, high performance and service excellence.
Related Measures:

**M 14: Professional Certifications and Workshops**
We met the objective by completing the following professional workshops and events:

Jordin Williams
1. NIRSA National Conference (National Award Recipient)
2. NIRSA Regional Conference
3. HBCU Summit (Presenter)
4. DSU Student Affairs Professional Development Program (Committee Chair and Award Recipient - 4 Professional Development Workshop)

Kristin Trout
1. DSU Student Affairs Professional Development Program (Award Recipient - 4 Professional Development Workshops)
2. Les Mills Sh'Bam Certification
3. ACE Personal Training Certification
4. NASM Personal Training Certification
5. NIRSA Regional Conference
6. Les Mills Quarterly Event

Jon Stewart

Source of Evidence: Professional standards

**Target:**
All professional staff members must participate in a minimum of four (4) certifications or professional development workshops throughout the course of the 2010-2011 academic year.

**Findings (2010-2011) - Target: Met**
The professional staff members participated in the following activities to meet their certification/workshop requirements:

Jordin Williams
1. NIRSA National Conference (National Award Recipient)
2. NIRSA Regional Conference
3. HBCU Summit (Presenter)
4. DSU Student Affairs Professional Development Program (Committee Chair and Award Recipient - 4 Professional Development Workshop)

Kristin Trout
1. DSU Student Affairs Professional Development Program (Award Recipient - 4 Professional Development Workshops)
2. Les Mills Sh'Bam Certification

4. NASM Personal Training Certification
5. NIRSA Regional Conference
6. Les Mills Quarterly Event

Jon Stewart
1. DSU Student Affairs Professional Development Program (Award Recipient - 4 Professional Development Workshops)
2. American Red Cross Instructor-Trainer Certification
O/O 12: Maintain Professional Certifications
Ensure all professional staff maintain current professional certifications.

O/O 13: Educational Sessions
Offer a variety of educational sessions each semester for student staff.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 14: Program Collaboration
Collaborate on at least 8 programs throughout school year.

Related Measures:

M 12: Participation in Welcome Days
We met this objective by hosting one department sponsored event for each New Student Orientation session offered.

Source of Evidence: Administrative measure - other

Target:
Collaborate with OSLA to offer activities during Welcome Days at DSU.

Findings (2010-2011) - Target: Met
The Department of Wellness & Recreation participated in Welcome Back Days by offering a variety of recreational activities in the WRC on Thursday Night.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Hiring plan

Meet with VP for Student Affairs to develop hiring plan for Group Fitness Instructors. The hiring plan will be finalized by August 15, 2010 so that the interview process can begin and hiring can be finalized by the start of the Fall 2010 semester.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Responsible Person/Group:  Jordin Williams & Group Fitness Coordinator

Additional Resources Requested:  Assistance from HR for hiring of independent contractors
Mission / Purpose

The Women's and Gender Studies (WGS) Minor is an interdisciplinary program that offers students a theoretical understanding and appreciation of the historical and societal issues involving all peoples. The program's mission is to equip students with the all skills adequate to appreciating all of human diversity beyond what they may experience at Delaware State University; motivate students to pursue their interests in matters related to identity and power relations regarding the intersection of race, class, gender, ethnicity, and sexuality; and provide diverse learning experiences that advance the call for social justice for all peoples, with a specific emphasis on people of African and minority descents.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Communication Skills

The WGS program offers students opportunities to be effective communicators of human diversity with regard to the theories concerning women and gender that have shaped, defined, and redefined individuals historically and across cultures as well as national and global regions.

SLO 1: Communicate effectively about human diversity
Students will communicate effectively about human diversity with regard to the theories concerning women and gender that have shaped, defined, and redefined individuals historically and across national and global cultures and regions.

M 1: Written Assignment

INSTRUCTIONS
Write a paper of five to seven pages on a current issue pertinent to women's
and gender studies. Your paper includes the theory of intersectionality and knowledge of feminism, womanism, sexism, and other applicable terminologies of feminist discourse. It is also evidence of your ability to think critically, analyze thoughtfully, and communicate cogently and coherently on the subject and its related subtopics.

Your paper’s purpose is primarily to inform and secondarily to persuade.

Your paper’s audience is college students.

The number of sources to be cited parenthetically and referentially is eight to ten and adheres to the discipline in which you are majoring.

Due Dates

First meeting to discuss assignment: during the penultimate semester of graduation

Formal outline: at the beginning of the second week of the semester of graduation

First draft: by Mid-term week

Final draft: during Finals week

Assessment Rubric

Source of Evidence: Written assignment(s), usually scored by a rubric

</tbody>
</table>
The student's work exceeds the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented engage in shuttle diplomacy, which means that it goes back and forth between theories, as well as theories and empirical evidence. The truth upon which the topic and/or situation, and explanations indicate a high level of understanding contrasting and/or conflicting perspectives.

sufficiently relevant to the complexities of the topic and/or situation, and some explanations indicate a low level of understanding contrasting and/or conflicting perspectives.

The student's work is above average regarding the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented engage somewhat in shuttle diplomacy, which means that it goes back and forth between theories fairly well, as well as theories and empirical evidence. The truth upon which the topic and/or situation, and explanations indicate an above average level of understanding contrasting and/or conflicting perspectives.

The student's work meets the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented engage in shuttle diplomacy, which means that it goes back and forth between theories, as well as theories and empirical evidence. The truth upon which the topic and/or situation, and explanations indicate a good level of understanding contrasting and/or conflicting perspectives.

The student's work fails the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented fail to engage in shuttle diplomacy, as well as theories and empirical evidence. The work presents no evidence of truth, connections, and/or commonalities.
the main evidence. The truth upon which the main perspective relies is sound, useful, and embracing of connections and commonalities.

The student's work is well grounded in a specific discipline, refers accurately to other disciplines, and skillfully utilizes out-of-class experiences. The evidence presented goes beyond expectations and thoughtfully engages the values and assumptions, problem-solving, skill-sets, and sensibilities to the differences in culture and living experiences.

Diverse Experiences

The student's work is somewhat grounded in a specific discipline, with adequate reference to other disciplines and out-of-class experiences. The evidence presented meets standard expectations and is sufficiently thoughtful in its engagement of the values and assumptions, problem-solving, skill-sets, and sensibilities to the differences in culture and living experiences.

Insufficient evidence presented and what is presented does not engage in the values and assumptions, problem-solving, skill-sets, and sensibilities to the differences in culture and living experiences.
Composition

The student's writing excels in the use of Standard English, which includes vocabulary, usage, diction and style, grammar and mechanics, and spelling. Documentation complies with the student's disciplinary style.

The student's writing is above average in the use of Standard English, which includes vocabulary, usage, diction and style, grammar and mechanics, and spelling. Documentation complies with the student's disciplinary style.

The student's writing meets the standards of Standard English, which includes vocabulary, usage, diction and style, grammar and mechanics, and spelling. Documentation complies with the student's disciplinary style.

The student's writing does not meet the basic expectations in the use of Standard English, which includes vocabulary, usage, diction and style, grammar and mechanics, and spelling. Documentation does not comply with the student's disciplinary style.

G 2: Critical Thinking

The WGS program offers students opportunities to become critical thinkers about the intersection of race, class, gender, ethnicity, and sexuality as tools of liberation/oppression in the social construction of identities regarding self and others.

SLO 2: Critical thinkers with regard to intersectionality

Students minors will be able to demonstrate the skills of critical thinkers with regard to the intersection of race, class, gender, ethnicity, and sexuality as tools of liberation/oppression in the social construction of identities regarding self and others.

the student's work is above average regarding the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented engages somewhat in shuttle diplomacy, which goes back and forth between theories and empirical evidence. The truth upon which the main perspective

the student's work exceeds the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences engaged in shuttle diplomacy, which goes back and forth between theories, as well as theories and empirical evidence. The truth upon which the main perspective...
relies is sound, useful, and embracing of connections and commonalities. The main perspective relies is sound, useful, and embracing of connections and commonalities. The main perspective relies is satisfactorily useful and embracing of connections and commonalities.

The student's work is well grounded in a specific discipline, refers accurately to other disciplines, and sophisticatedly utilizes out-of-class experiences. The evidence presented goes beyond expectations and thoughtfully engages the values and assumptions, problem-solving, skill-sets, and sensibilities to the differences in culture and living experiences.

Diverse Experiences

The student's work is grounded in a specific discipline, refers accurately to other disciplines, and skillfully utilizes out-of-class experiences. The evidence presented meets standard expectations and thoughtfully engages the values and assumptions, problem-solving, skill-sets, and sensibilities to the differences in culture and living experiences.

Composition

The student's writing excels in the main perspective. The student's writing is above the main perspective. The student's writing meets the requirements of the main perspective. The student's writing does not meet the requirements of the main perspective.
the use of Standard English, which includes vocabulary, usage, diction and style, grammar and mechanics, and spelling. Documentation complies with the student's disciplinary style.

G 4: Information and Technology
The WGS program allows students to be able users of information and technology as separate media that continue to evolve throughout multiple societies and cultures.

SLO 4: Use aptly the skills of information and technology
Students will be able to use aptly the skills of information and technology as they continue to evolve throughout multiple societies and cultures.

G 5: Learning Skills
The WGS program allows students to become competent demonstrators of their collaborative, independent, and integrative learning skills.

SLO 5: Competent collaborative, independent, and integrative learning skills
Students will be able to demonstrate competence of skills with regard to collaborative, independent, and integrative learning.

Intersectional Understanding

The student's work exceeds the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented engages in shuttle diplomacy, which means that it goes back and forth between theories, as well as theories and empirical evidence. The complexities of the topic and/or situation, and explanations indicate a high level of understanding contrasting and/or conflicting perspectives.

The student's work is above average regarding the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented engages somewhat in shuttle diplomacy, which means that it goes back and forth between theories fairly well, as well as theories and empirical evidence.

The student's work meets the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented engages in shuttle diplomacy, which means that it goes back and forth between theories, as well as theories and empirical evidence. The complexities of the topic and/or situation, and explanations indicate an above average level of understanding contrasting and/or conflicting perspectives.

The student's work is above average. The evidences presented engages in shuttle diplomacy, which means that it goes back and forth between theories, as well as theories and empirical evidence. The evidences presented engages in shuttle diplomacy, which means that it goes back and forth between theories, as well as theories and empirical evidence. The examples are sufficiently relevant to the complexities of the topic and/or situation, and explanations indicate an above average level of understanding contrasting and/or conflicting perspectives.

The student's work meets the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented engages somewhat in shuttle diplomacy, which means that it goes back and forth between theories fairly well, as well as theories and empirical evidence. The work presents no evidence of truth, connections, and/or commonalities.

The student's work fails the challenge of confronting insights, findings, methods, techniques, language, and modes of thinking across multiple social issues. The evidences presented fail to engage in shuttle diplomacy, as well as theories and empirical evidence. The work presents no evidence of truth, connections, and/or commonalities.
Diverse Experiences

| The student's work is well grounded in a specific discipline, refers accurately to other disciplines, and sophisticatedly utilizes out-of-class experiences. The evidence presented goes beyond expectations and thoughtfully engages the values and assumptions, problem-solving, skill-sets, and sensibilities to the differences in culture and living experiences. | The student's work is somewhat grounded in a specific discipline, with adequate reference to other disciplines and out-of-class experiences. The evidence presented meets standard expectations and is sufficiently thoughtful in the values and assumptions, problem-solving, skill-sets, and sensibilities to the differences in culture and living experiences. | Insufficient evidence presented and what is presented does not engage in the values and assumptions, problem-solving, skill-sets, and sensibilities to the differences in culture and living experiences. |
Composition

The student's writing excels in the use of Standard English, which includes vocabulary, usage, diction and style, grammar and mechanics, and spelling. Documentation complies with the student's disciplinary style.

The student's writing is above average in the use of Standard English, which includes vocabulary, usage, diction and style, grammar and mechanics, and spelling. Documentation complies with the student's disciplinary style.

The student's writing meets the standards of Standard English, which includes vocabulary, usage, diction and style, grammar and mechanics, and spelling. Documentation complies with the student's disciplinary style.

The student's writing does not meet the basic expectations in the use of Standard English, which includes vocabulary, usage, diction and style, grammar and mechanics, and spelling. Documentation does not comply with the student's disciplinary style.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Quintessential Diversity Roundtable

"Quintessential Diversity Roundtable" is a humanities project because of its overarching emphases on gender, race, sexuality, and ethnicity, which are not synonymous with racism, a social construction that violates the recognition of all "beings as created equal." It is seeking to promote public dialogue on human rights that are non-negotiable in the call for human dignity. The project is intended to examine the ways in which religious, historical, literary, and philosophical texts have been used to invent laws and perpetuate mores that oppressed and denied Americans' access to basic human rights and an acceptable quality of life.

The project is structured to host six round tables: three during the fall 2015 semester and three during the spring 2016 semester. Each roundtable includes a panel of two faculty and two students:
- Tuesday, September 22, 2015, 7:00 pm: "To Be or Not to Be: What Literary History Teaches on Suicide." Discussion on the representation of suicide of famous literary figures who committed suicide.

- Tuesday, October 20, 22, 2015, 7:00 pm: "Surviving Violence in Relationships: Sex and Gender." Discussion on the problems faced by lesbians, bisexuals, gays, transgenders, queers, intersexuals, and asexuals.

- Tuesday, November 17, 2015, 7:00 pm: "Taking a Stand for the Right to Life: When the Law as Fiction Is Obviously Limited." Discussion on suicide bombing, euthanasia, mass murder, and mass suicide.

- Tuesday, February 23, 2016, 7:00 pm: "When Dating Goes Wrong: The Ethics of Relationships." Discussion on dating violence, blind dating, and the pitfalls of social media dating.

- Tuesday, March 22, 2016, 12:00 noon - 6:00 pm: "Celebrating Women's History: Focus on Native American Heritage, Migration, and Women in the Workplace." Discussion Native American women's achievements and current challenges that they and women in the workplace.

- Tuesday, April 19, 2016, 7:00 pm: "Because Knowledge Empowers: What World Religions Teach about Temperance, Moral Responsibility, and Individual Choices." Discussion on alcohol abuse, sexual assault, and individual responsibility.

The project is partially funded by the Delaware Humanities Forum and the Office of Provost, Delaware State University.

**Established in Cycle:** 2014-2015  
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** The project's launch was successful with the
audience's response giving the average rating of "excellent."

**Projected Completion Date:** 04/20/2016

**Responsible Person/Group:** The faculty of the Women's and Gender Studies Minor

**Additional Resources Requested:** Program's Resources: (1) the minor will be significantly enhanced with its own budget that would afford special speakers during Women's History Month. (2) A monthly speaker's series that is free and open to the public that would enrich both the campus and local communities while enhancing the University's image as addressing the needs of its diverse campus and local communities. Faculty Resources: (1) additional course offerings would avoid scheduling conflict. The program has twenty-eight declared minors, some of who have graduated without completing the required number of courses due to scheduling conflicts. (2) Conference attendance and participation would help keep faculty abreast of the evolving scholarship in this field. Students' Resources: students' educational experiences would be enriched by conference attendance and participation and field trips.

**Budget Amount Requested:** $30,000.00 (recurring)
