Mission / Purpose

The department's mission is to provide academic assistance to student-athletes in accordance to rules and regulatory by-laws set forth by the National Collegiate Athletic Association (NCAA) and Mid-Eastern Atlantic Conference (MEAC), respectively. From the time a prospective student-athlete expresses interest in Delaware State University and ultimately becomes a member of one of the 18 varsity sports, he or she is provided with a comprehensive academic support system that will remain consistent with the department's mission of retaining and graduating student-athletes within a five year timeline. In addition to retention and graduation efforts, Academic Services for Student-Athletes prides itself in educating students on the expectation of maintaining athletic eligibility from semester to semester. The department's core values include, but are not limited to, increased emphasis on academic progress rates for the most at-risk sports (men's basketball and football), increased graduation rates for single year and five year periods, customer service practices to internal (coaches, student-athletes, faculty, administration) and external constituents (i.e. parents, prospects, community, external colleges and universities), and systematic human development of student-athletes from freshman year to graduation. Our purpose is to cultivate academic enrichment and shape student-athletes to be model citizens of the city of Dover and beyond. Our mission is to provide comprehensive services that will prepare our student-athletes to compete and be successful in the classroom, ultimately fostering an environment conducive to graduating. We will be leaders in our conference and provide professional development opportunities to our staff so they can effectively master their craft of service to student-athletes.

Goals without Outcome/Objective Relationships Specified

G 2: Improvement athletic department graduation rates over a 5 year period
The department of Intercollegiate Athletics takes a position in a manner consistent with the President's list of priorities that its graduation rates must make steady improvement. Historically, student-athlete graduation rates are higher than that of the student body, yet it is the goal of the Academic Services for Student-Athletes unit that we maintain Graduation Success Rate above 60% and make strides to incrementally improve our 4 year Federal Graduation Rate by 1.5% over a five year period for 7.5% percentage points. Our 4 year graduation rate is currently 55%, with our Graduation Success Rate at 59%. Our current indicators place our University in fourth place amongst the Mid-Eastern Athletic Conference. In accordance to our President's goal to become the top-notched Historically Black College and University, we must continue to make strides toward improvement.

G 5: Strengthen communication between ASSA and campus at large
Academic Services for Student-Athletes continually seeks opportunities to market our program of services to department-wide liaisons and athletic support systems. We are an integral part of the campus fabric and collaborate with various academic units to enhance the partnerships between Athletics and the entire campus community (including external constituents groups not on campus).

**Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**G 1: Recruit Prospective Student-Athletes who can persist and graduate within four years**

Academic Services for Student-Athletes is expected to master the recruitment efforts by capitalizing on opportunities to engage prospective student-athletes and parents on the steps it takes to meet the Initial Eligibility standards set forth by the NCAA, as well as the minimum Admissions standards set forth by Delaware State University.

**Connected Documents**
- Pre-Evaluation Form_Freshmen
- Pre-Evaluation Form_Transfers

**O/O 3: 98% recruited prospective student-athletes will meet DSU minimum Admission Standards**

In review of all prospective student-athlete data, we believe that **98%** of those recruited will meet the minimum Admissions standards for freshmen at Delaware State University (800 SAT or 17 ACT with 2.00 in 19 Core Courses). The remaining **2%** of prospects may be directed to the Admissions Review Committee which may lead to Project Success or modified version of Project Success mirroring the services provided for all incoming regularly admitted student-athletes with restrictions.

**Related Measures:**

**M 1: NCAA Initial Eligibility Evaluations**

We are able to determine the admissibility of prospective student-athlete by using an Initial Eligibility evaluation. This evaluate involves identifying the best 16 NCAA core courses a student has taken in high school, in the following subject areas (English - 4, Math - 3, Science - 2, Additional English, Math, or Science - 1, Social Science - 2, Additional Core - 4 - cannot be computer related or fine art) and matching the core grade point average with the sliding scale score represented by that student's SAT or ACT score (or both). For transfer student-athletes, we work with the Office of Admissions to determine courses
that are transferable into the university as well as courses that are degree applicable. We collaborate with the respective chairs to determine elective credits that transfer in, but may eventually become department relevant courses.

Source of Evidence: Evaluations

**O/O 4:** Number of probation student-athletes will consist of less than 3% of the Athletic Department

We are committed to providing quality academic assistance to our 290+ student-athletes. However and from time to time, we have students who find difficulty in their courses despite our best efforts to provide tutoring and other forms of assistance. In looking at the overall success of the program combined with the number of non-student-athletes who are on academic probation at the end of the fall and spring terms, we believe there is not reason why we cannot commit to less than 3% of our program with students who may wind up on Academic Probation (term GPA <1.70).

**G 3:** Improve or maintain retention rates consistent with NCAA 930

Academic Services for Student-Athletes will work to increase retention rates of first year student-athletes 1% over the next five years and by 3% of our overall student-athlete population over the next five years.

**O/O 2:** 100% DSU Sports Teams Above 930 Multi-Year APR

In order to remain out of the penalty phase for NCAA (under the current APR model), teams must possess a multi-year APR above 900. Delaware State University achieved this objective under the 2011-2012 NCAA APR (that will go public in June 2013). However, the objective moving forward is to expect that all teams for which APR is conducted will have multi-year APR scores above the 930 required threshold.

**G 4:** Attain 930 MYR NCAA APR (All Sports)

Delaware State University is positioned to have one of the highest NCAA Academic Progress Rate scores in all of the Mid-Eastern Athletic Conference due in part by the commitment from the Administration to provide academic support services for over 300 student-athletes from 18 Division I sports. The NCAA mandate is that scholarship student-athletes work to maintain their eligibility from term to term and to be retained to the institution for which they were recruited in pursuit of graduating in four (8 semesters) or five (10 semesters) years. The benchmark for each team is 930 which is a ratio of the total points earned in a given year for scholarship student-athletes (by sport); divisible by the total possible points available for that squad.

SLO 5: Senior Assessment General Business Knowledge

Our students will graduate with an understanding of business knowledge to successfully work in a company. Students will have general knowledge in the following areas: 1) Financial Accounting; 2) Managerial Accounting; 3) Finance; 4) International Management; 5) Business Law I; 6) Management Processes; 7) Marketing; 8) Macroeconomics; 9) Microeconomics; 10) MIS; 11) Organizational Behavior; and 12) Statistics.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Additional Required Course added to program

Based on the results, the COB decided to require that the Managerial Communications course be added to the curriculum. In this course, students are required to write business reports and memos and to give an oral presentation.
Complete Curriculum Review
Compare accounting curriculum with other institutions.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Improving problem solving and Interpretation of Results

To improve Data Gathering, Problem Solving and Critical Thinking, the following change was agreed upon:

- More emphasis on problem solving and interpretation will be placed on homework assignments in Cost Accounting, Intermediate Accounting, Advanced Accounting and Business Law I and II.

Data Gathering, Problem Solving and Critical Thinking will be re-evaluated during 2011-2012 to determine whether students improved in the areas that were unsatisfactory.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Responsible Person/Group: Faculty covering these courses

No Action Required for IT
Based on the findings, 70% of the students performed in the acceptable or above range. At this time no action will be taken. The outcome will be re-evaluated in 2010-2011.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implement the 150 hour Accounting Program
150 hour has been approved but not fully implemented.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Resolve course requirement. Resolve whether the GMAT must be taken. Change fees on first graduate courses taken.

Improvement for Senior Assessment Test
This year results will be used as a base line. Given the low managerial accounting score, proposed changes are to have accounting students take managerial accounting in the principles level. This will be implemented in Spring 2012.

The senior assessment test has been modified over the years to improve on the quality of questions and to provide more detailed analysis of knowledge in the subject areas. These results along with reviewing the curriculum, two recommendations have been made as a result of these findings:

1. MIS was added back into the curriculum in addition to AIS to provide accounting students with more IT knowledge needed in accounting.
2. Accounting students currently only cover financial accounting in their first two introductory accounting courses. The curriculum was changed to expose students to both managerial accounting and financial accounting in the introductory accounting courses.

The senior assessment test will be administered each semester. Evaluation of the results will be conducted annually.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Improving oral communications
To improve oral communication several changes were agreed upon:

1) Increase presentation required in class.
   - While auditing and managerial cost currently have oral presentations, Governmental Accounting course has added an oral presentation.
Students will receive the rubrics prior to presentation, to ensure they are aware of expected performance.

2) Improve student interaction with audience.

- The Intermediate Accounting Course has adopted the case studies approach. This will require student to discuss the case and interact with each other more.

Oral Communication will be re-evaluated in 2011-2012 to determine whether students

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Improvements for Asenior Accounting Assessment**

Given this was the first time the test was administered, it was decided to use these scores as a base line.

Several changes to the test were recommended:

1) The whole committee will review the questions.

2) Questions will be re-evaluated to ensure it addresses general accounting knowledge and not specific information that can be looked up.

3) The number of questions will be increased.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Increase Writing Requirements**

The results are based on 7 student, representing 28% of junior accounting students. The faculty recommended the following changes: Case studies are being adopted in Intermediate Accounting and in Business Law which will increase students writing requirements.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High
Legal and Ethical Assessment Results

To improve ethical decision making the following changes to business law I and business law II will be made:

1) For both business law courses case studies will be introduced to increase class discussion aimed at increasing students reasoning abilities.

2) The rubrics used to evaluate student will also be handed out prior to the assignment.

Ethical Decision Making will be re-evaluated during 2011-2012 to determine whether students improved in the areas that were unsatisfactory.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Plan for Improving Writing Communication

The results are based on 7 student, representing 28% of junior accounting students. The faculty recommended the following changes: Case studies are being adopted in Intermediate Accounting and in Business Law which will increase students writing requirements.

Written Communication will be re-evaluated in 2011-2012.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Responsible Person/Group: Dr. Anakwe and mr. Katz
Mission / Purpose

Our mission is to provide a student-centered learning environment to develop accounting, economics and finance professionals with a national and global perspective. We emphasize the development of technical competencies through academic excellence, innovation, integrity in teaching, professional development, applied and instructional research, preparation for advanced studies, and outreach.

Goals without Outcome/Objective Relationships Specified

G 8: Improve program review to Ensure compliance

8.1 Conduct yearly curriculum review.
8.2 Design processes to solicit input from students, DAC, employers and other constituents on curriculum and programs.
8.3 Conduct and document Assurance of Learning/Outcomes Assessment.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Develop programs and processes to enhance student learning, professional development and success

1.1 Integrate international and ethical issues in the curriculum.
1.2 Review & evaluate outcome assessment measures for course and student performance.
1.3 Encourage student participation in and improve quality of internship program.
1.4 Provide support for student participation in professional activities, field trips, workshops, and student organizations.
1.5 Solicit funding and provide scholarships and grants to deserving students in AEF.

1.6 Encourage students to apply for program specific scholarships.
1.7 Create departmental honors courses.
1.8 Establish a series of informal, mini-workshops on professional business topics to enhance the intellectual interest of students.
1.9 Establish a strategic alliance with Delaware Tech via degree connected programs in Accounting

O/O 2: Number of internships

- Establish a list of Internships/due dates
- Establish and maintain bulletin boards
- Provide email notification
- Identify Internship opportunities within the local business market

**Relevant Associations:**

**Strategic Plan Associations:**

**College of Business**

1. Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development, and success.
2. Improve and strengthen outreach efforts by maintaining a positive relationship with students, parents, and alumni and by developing certificate and executive educational programs to serve the community.
3. Develop and implement plans and programs to increase placement of COB graduates and encourage businesses to recruit COB graduates.

**Delaware State University**

1. Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice.
2. Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community.

**Related Measures:**

**M 2: Number of Internships**

O/O 6: Increase scholarships

1.6 Encourage students to apply for program specific scholarships

O/O 7: Develop Honors courses
1.7 Create departmental honors courses.

Relevant Associations:

Strategic Plan Associations:
College of Business
1 Develop programs(undergraduate and graduate) and processes to enhance student learning, professional development and success.

O/O 11: Integrate technology in the classroom
Increase different applications in classroom learning. Integrate investment software in finance classrooms. Integrate spreadsheet and database through out curriculum.

Relevant Associations:

Strategic Plan Associations:
College of Business
1 Develop programs(undergraduate and graduate) and processes to enhance student learning, professional development and success.

G 2: Develop programs in teaching & research that are supportive of scholarly activity by faculty & that foster student participation
2.1 Provide financial support for faculty members to present research at professional conferences
2.2 Promote broader faculty participation and collaboration in research activities
2.3 Develop a plan to provide release time and other incentives to faculty members who initiate initiatives to faculty members who initiate grant writing activity, research, and public service

O/O 10: Ensure a minimum of 2 full time faculty per concentration
Hire three faculty members this year

Relevant Associations:

Strategic Plan Associations:
College of Business
2 Develop programs in teaching and research that are supportive of scholarly activity by faculty that foster student participation.

Related Measures:

M 9: Filled faculty lines
Fill all open faculty lines
Fill economics position 2012-2013
Source of Evidence: Administrative measure - other

Target:
Filled all faculty lines open

Findings (2015-2016) - Target: Met
The department had a minimum of 2 full-time faculty per concentration

Findings (2014-2015) - Target: Not Met
2014-2015
There is need to hire an accounting faculty member.

Findings (2009-2010) - Target: Partially Met
Hired three faculty. All lines are filled except Dr. Casson’s. Still waiting to see if he will return to department.

O/O 12: Provide faculty support to encourage paper presentation at conferences
Number of faculty presenting at national conferences

Relevant Associations:

Strategic Plan Associations:
College of Business
2 Develop programs in teaching and research that are supportive of scholarly activity by faculty that foster student participation.

Related Measures:
M 7: Faculty release time
To provide all faculty conducting research with a 3/3 load.

2010-2011 All faculty had a 3/3 load.

Source of Evidence: Activity volume

**Target:**
All faculty conducting research will teach a 3/3 load

**Findings (2015-2016) - Target: Met**
Except for 2 visiting professors, all other full-time faculty members received release time for research.

**Findings (2014-2015) - Target: Met**
2014-2015
All faculty conducting research have received release time and have been supported to attend conferences.

**Findings (2009-2010) - Target: Not Met**
All new faculty members will be teaching a 3/3 load next year

M 11: Number of faculty presenting at conferences
At least one presentation each year per faculty.

2011-2012 faculty had a total of 6 presentations and 22 participants in conferences.

2014-2015
The Department faculty has a total of 9 presentations and 19 participants at conferences/programs.

Source of Evidence: Activity volume

**Target:**
At least one paper presentation per year.

**Findings (2015-2016) - Target: Met**
Four faculty members presented their research papers at professional conferences.

**Findings (2010-2011) - Target: Met**
All Faculty member presented at least one paper this year.

**Findings (2009-2010) - Target: Not Met**
Total faculty presentations at national meeting were 11. All faculty members presented at at least one conference with the exception of one faculty member.

G 3: Improve Outreach efforts with students, parents, and alumni

3.1 Develop a series of certificate and executive programs
3.2 Develop courses to be offered online.
3.3 Establish study abroad programs as part of the undergraduate curriculum.
3.4 Continue to engage students in morale-building activities such as COB Fall Picnic, COB/SAC Season's Greetings, COB Valentine's Day Celebrations, Ice Cream Day with the Dean, and the Graduating Seniors Award Reception.
3.5 Utilize alumni as a resource for case studies job shadowing, mock interviewing, classroom visits, internships, full time positions, and funding.
3.6 Maintain affiliations with professional organizations such as the National Association of Black Accountants Inc (NABA), Institute of Management Accountants (IMA), AICPA, Advertising Education Foundation (AEF), National Economics Association (NEA), the American Economic Association (AEA), the Omicron Delta Epsilon (ODE) Honor Society in Economics and the Urban Bankers.
3.7 Utilize the Deans Advisory Council (DAC) to network with business executives and extend contacts to other business executives.
3.8 Civic outreach; community outreach of the faculty; media presentations, service to other organizations, individuals and communities.

O/O 2: Number of internships

- Establish a list of Internships/due dates
- Establish and maintain bulletin boards
- Provide email notification
- Identify Internship opportunities with in the local business market

Relevant Associations:

Strategic Plan Associations:

College of Business
1. Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
3. Improve and strengthen outreach efforts by maintaining a positive relationship with students, parents, and alumni and by developing certificate and executive educational programs to serve the community.
9. Develop and implement plans and programs to increase placement of COB graduates and encourage businesses to recruit COB graduates.

Delaware State University
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community

Related Measures:

M 2: Number of Internships

#### O/O 9: Update & maintain COB website

6.1 Provide information to update and maintain COB website.

#### O/O 15: Student satisfaction

Are student satisfied with the services the department provides to the students in terms of advising, office hours, teaching excellence, and job placement.

**Relevant Associations:**
**Strategic Plan Associations:**

**College of Business**

3 Improve and strengthen outreach efforts by maintaining a positive relationship with students, parents, and alumni and by developing certificate and executive educational programs to serve the community.

**G 4: Improve Quality of Student Life within AEF**

4.1 Engage students in the life of the COB/AEF by encouraging participation in COB student association, student professional clubs, i.e. Accounting and Finance Club.

4.2 Facilitate and encourage increased interaction between student and advisor.

**O/O 4: Engage students in clubs and organizations**

Engage students in the life of the COB/AEF by encouraging participation in COB student and professional organizations.

**Relevant Associations:**

**Standard Associations:**

AACSB 2016 Standards for Business Accreditation

4 STUDENT ADMISSIONS, PROGRESSION, AND CAREER DEVELOPMENT: Policies and procedures for student admissions, as well as those that ensure academic progression toward degree completion, and supporting career development are clear, effective, consistently applied, and aligned with the school’s mission, expected outcomes, and strategies.

13 STUDENT ACADEMIC AND PROFESSIONAL ENGAGEMENT: Curricula facilitate student academic and professional engagement appropriate to the degree program type and learning goals.

**Strategic Plan Associations:**

**College of Business**

4 Improve the quality of student life within COB.

**Delaware State University**

2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 5: Student participation in Professional Organizations**

Number of student participating in student and professional organizations.

2010-2011

12 students attended NABA Annual Eastern region Conference

2 students attended KPMG leadership Conference

4 students participated in the Annual Case Competition sponsored by NABA

10 student attended the FMA Leadership Conference

2011-2012

Accounting and Finance Club had 23 students attend the National Association
of Black Accountants (NABA) conference in October. Of the 23 students, 12 had interviews for internships.

The Investment Club had 15 students take a tour through the Federal Reserve in Washington D.C.

The Investment Club had 16 students participate in the Bloomberg Assessment Test held on Friday, November 11th.

The Investment Club had 18 students participate in the Symposium organized by the National Association of Security Professionals held at Wharton School of Business, Pennsylvania on Thursday, November 10th, 2011

Eight students attended the FMA Annual student Leadership conference in Chicago.

Source of Evidence: Activity volume

Target:
60% of our students should be members or participate in profession organizationas

**Findings (2015-2016) - Target: Met**
Accounting and Finance Club - 10 students attended NABA Conference.
65 students attended "Meet the Firm Night" sponsored by Accounting and Finance Club.
Investment club - 49 students participated in conferences/workshops/symposiums.
Economics club - 115 students participated in a debate sponsored by Economics club
15 students made a trip to the NY Federal Reserve Bank
Economics club debate team attended a debate in Princeton, NJ and won.

**Findings (2014-2015) - Target: Partially Met**
2014-2015

• Six (6) students volunteered and attended the Financial Planning Annual Conference in Seattle, October 2014.
• Seven (7) students attended National Association of Securities Professional (NASP) symposium in New York, February 2015.
• Two (2) students invited to participate in an all-expense paid TD Ameritrade Annual Conference, San Diego, in January 2015.
• Four (4) students worked on a business plan for the Opportunity Funding Corporation (OFC) Business Pan Competition organized by Thurgood Marshall which later got cancelled.
• Six students attended the Buttonwood Conference on Economic Development in New York, February 2015.
• Accounting and Finance Club had ## students attend the National Association of Black Accountants (NABA) conference in October. Of the ## students, ## had interviews for internships.
• Six students attended the KPMG Leadership conference.

G 5: Ensure use of technology resources in all aspects of student learning
5.1 Incorporate technology as appropriate in each course. (e.g. Myeconlab, myaccountinglab, and myfinancelab)

5.2 Use the Banner system in student advisement.
5.3 Integrating the trading network in appropriate Finance courses

O/O 11: Integrate technology in the classroom
Increase different applications in classroom learning. Integrate investment software in finance classrooms. Integrate spreadsheet and database throughout curriculum.

Relevant Associations:

Strategic Plan Associations:
College of Business
1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.

G 7: Cultivate a positive, collegial, support for improving student learning

7.1 Conduct annual evaluations for Faculty, & Staff, Department Chair and address any issues identified.
7.2 Establish AEF’s award for outstanding performance.
7.3 Encourage/support each faculty to be a member and active in at least one professional organization.
7.4 Design and implement a mentoring process for new faculty and staff in AEF.

O/O 19: Conference Attendance
Have all faculty attend at least one conference a year

G 9: Develop plans to increase placement of graduates
9.1 Collaborate with the Career Services to increase placement opportunities for AEF students.
9.2 Partner with the Admissions Office to participate in recruitment activities (school visits, career fairs, on campus visits, etc.).
9.3 Collaborate with professional organizations to increase placement opportunities for AEF majors. (e.g. NABA via the Accounting and Finance Club)

O/O 2: Number of internships

- Establish a list of Internships/due dates
- Establish and maintain bulletin boards
- Provide email notification
- Identify Internship opportunities within the local business market

Relevant Associations:

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Accurate Student email address**
We need to find a way to make sure we have accurate student email address. This has become a larger problem now that freshman and sophomore are listed as pre-management and not pre-economics and pre-finance.

Established in Cycle: 2009-2010  
Implementation Status: Planned  
Priority: High  
Implementation Description: We will provide announcement in all accounting classes for student to update their email addresses.  
Responsible Person/Group: Dr. Ruf & faculty

connecting with businesses
The COB has developed relationships with Barkcly Bank and JP Morgan to increase internships. Accounting has also developed relationships with KPMG to increase internships.

Established in Cycle: 2009-2010  
Implementation Status: Planned  
Priority: High  
Relationships (Measure | Outcome/Objective):  
  Measure: Number of Internships | Outcome/Objective: Number of internships  
Implementation Description: Develop more ties with Accounting firms. One each year. Also, need to increasde quality of students through recruitment.  
Responsible Person/Group: Dr. Rhodes and faculty

improving internships
Need to get students to update their email address so we have accurate email addresses.  
Need to put procedure in place to ensure posting are up-to-date.  
Need to create a list of when to expect internships/scholarships/job opening to become available.  
Need to create more opportunities for economic majors.

Established in Cycle: 2009-2010  
Implementation Status: Planned  
Priority: High  
Relationships (Measure | Outcome/Objective):  
  Measure: Number of Internships | Outcome/Objective: Number of internships  
Implementation Description: All internships and jobs are posted on Blackboard. Need to encourage students to view the site.  
Responsible Person/Group: Dr. Ruf
Increase students enrollment in the graduate program
Plan on informing students in their junior year how to prepare for graduate school.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: Hold info sessions in the junior year courses.
Responsible Person/Group: Dr. Ruf

Update website
To better keep in touch with alumni, a facebook page should be created on the website. Information on the web needs to be updated.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: Work with web master.
Responsible Person/Group: Dr. Ruf

IRPA Census Total Eligible for 201701 (Fall 2016) and 201801 (Fall 2017)

- Enrollment for the Accounting program on the main campus has been relatively stable. A number of the accounting students plan on continuing with a graduate degree and professional certification after graduation.
Finance Concentration has dropped in the fall of 2017 but increased by the spring of 2018 to 50 students with the introduction of the financial planning concentration. There was some initial confusion with the rollout of the new concentration.

Economics concentration had a slight drop but remains over 10 students.

There is some concern that having the finance and economics concentrations under the Management degree does not afford those programs the exposure that would result in attracting more students. There has been some conversations regarding bringing those two concentrations under the control of the AEF department where the faculty reside.

Unit(s) Initiatives accomplished in this cycle

Department Initiatives for 2017-2018

• ACCT 204 Lab and ACCT 205 Lab was approved by the College of Business Curriculum committee and the Faculty Senate to be formally offered during AY 2018-2019 cycle.
• The pre-accounting designation will be eliminated from AY 2018-2019 cycle. This was approved by the College of Business curriculum committee and the University Faculty Senate during AY 2017-2018 cycle.

Unit(s) Honors/Awards and Achievements

Honors/Awards and Achievements

Students:

• Two of the AY 2017-2018 Annual Deans Choice Award for College of Business students were from the AEF Department - Samantha Ellis (Accounting) and Nicholas Crib (Economics)
• HP HBCU Dean's Challenge Competition - Delaware State University. College of Business Winning team of 5 students included 3 Undergraduate students from Accounting, Economics, and Finance Department. These were Nyla Obey (Finance), Emma Pollock (Accounting), Kyron Bonner (Accounting and Finance). In addition, there was Nicholas Henry - who is a Finance Graduate and current MBA student.
• Undergraduate students led by Finance Faculty, Dr. Das were placed second in the Finance App competition.
• AEF Department students participated in discipline conferences, such as the TD, T3 (under the supervision of Dr. Nandita Das) and NABA (under the supervision of Dr. Susan Muzorewa).
Faculty:

- AEF Department faculty, Dr. Nandita Das was awarded the AY 2017-2018 Annual Dean's Award for Service to the College of Business.
- AEF Department faculty, Dr. Lynda Murray-Jackson was awarded the AY 2017-2018 Dean's Award for Teaching for the College of Business.
- Dr. Akash Dania was presented the key to the City of Natchez by the Mayor of the City of Natchez and the Board of Alderman for service to the City and County.
- Dr. Akash Dania was nominated for the 2017 best reviewer award for the annual conference of the Academy of International Business - Southeast.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

Strategic Goals for next year are:

1. Use of technology in classroom instructional delivery.
   a. Measuring the type and amount of technology in classes offered by the department. Target is for 15% of the classes to utilize technology in delivering their classroom instruction.

2. Student participation in extracurricular activities that enhances the classroom/book learning.
   a. Better document the number of students engaged in extracurricular activities and the impact of those activities on their course work. Target is for 10% of the department's students to engage in some sort of extracurricular activity during the academic year that they felt augmented their classroom experience.
"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report. See KPI information in the document attachment section. The department file has the accounting majors. The Finance and Economics file has those students with concentrations in Finance or Economics that are included in the Management degree/Business Administration department.

**Connected Documents**
- KPI 1 AND 10 Accounting Economics and Finance Department 2017-2018
- KPI 1 and 10 for Finance and Economics concentration 2017-2018

**Closing the Assessment Loop:** Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.  
  a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  
  b) Have these changes been implemented? If not, when will they be implemented?  
  c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Two prime examples of assessment activities for the department of Accounting, Economics and Finance are student internships and faculty presentations at conferences.

**Internships**

Internships are important because they provide our students with real world experiences that reinforce and supplement their classroom learning. The target is for all students with a GPA of 3.0 or higher to have an internship. By the spring 2018 semester, there were 50 students majoring in accounting and 22 with a concentration in finance or economics.

For the 50 accounting students, 13 had less than 60 hours and were not eligible. Of the remaining 37 students, 19 had internship, just over 50%.

For the 22 finance and economics students, 4 had less than 60 hours and were not eligible. Of the remaining 18 students 8 had internships, just under 50%.

The target was not met but the department and faculty will continue to work closely with the Industry Liaison for the College of Business to encourage all students to prepare for and apply to internships.

The department plans to assess the number of students with internships every year.

**Presentations**

Presentations at conference allows our faculty to showcase their research with and get feedback from their peers at other institutions of higher education.

The department has a total of 12 full time faculty including Ningbo faculty. All together they have presented papers at 15 various conferences, thereby meeting the target of
one presentation per faculty. In addition, the faculty has had 7 papers in peer reviewed journals. The importance of our faculty staying current in their discipline is paramount, we will continue to assess this measure annually.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

Mission / Purpose

The mission of the Office of Undergraduate Admissions at Delaware State University is to establish and activate a recruitment program that will meet the enrollment projections as specified by the University's Administrative Council. It is the endeavor of the office to market the University and to recruit and enroll the most qualified students available. While recognizing the historical heritage, the admissions office seeks to attract a diverse student population.

Goals without Outcome/Objective Relationships Specified

G 2: Recruitment Territories
Revisit recruitment territories to ensure territories assigned are still aligned with the University's mission and match the efforts to recruit and retain students from certain geomarkets.

G 3: Letter Flow and Communication Plan
Manage letter flow and communication plan to ensure communication with prospective students is clear and timely throughout the recruitment funnel - from prospect to enrolled.

G 4: Customer Excellence and Positive Attitude
Provide quality customer service and positive attitude reinforcement with emphasis on customer excellence (internal and external stakeholders).

G 5: Campus Tour Experience
Enhance campus tour experience by following the national model of student-led tours.

G 6: Calendar of Recruitment Events
Develop and maintain a monthly calendar of recruitment events from the Office of Admissions.
Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Marketing Materials for Recruitment
Review, edit, and update marketing materials each year, and determine the need for new images, logo/branding, and new/additional brochures along with Integrated Marketing Department.

Marketing materials include the Viewbook, Road Piece, Transfer Brochure, Early Bird Brochure, Inspire Scholarship Brochure, etc.

O/O 1: Distribute for corrections

Related Measures:

M 1: Viewbook Evaluation

Source of Evidence: Administrative measure - other

Target:
80% returned feedback

Findings (2010-2011) - Target: Not Met
10% returned

Mission / Purpose

The mission of the Division of Adult & Continuing Education (ACE), is to attract, enroll and serve adult learners in Delaware and beyond seeking educational opportunities for professional development, re-certification, career enhancement and lifelong learning. (Adopted 2009)

ACE recognizes that adult learners are a unique body of students with specific needs, preferences, and expectations in their higher education pursuits among these being quality academic programs, flexible scheduling options, experiential learning, and seamless access to student services.

VISION: ACE will support adult learners as they seek the life-changing benefits that higher education provides. The division will serve as the gateway to University programs and courses for adult learners seeking to start a degree, finish a degree, or attend the University as a special student who wants to enroll in a credit or non-credit course for professional development and lifelong learning.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Infrastructure Development
Develop the infrastructure, systems, processes, and procedures to effectively administer ACE programs

O/O 1: Non Credit Master Schedule
Build a master schedule of non credit courses in the University information system to capture all non credit course enrollments and transcript generation.

Related Measures:

M 3: Non-Credit Master Schedule
Build a master schedule of non credit courses in the University information system to capture all non credit course enrollments and transcript generation.

Source of Evidence: Administrative measure - other

Target:
Build a master schedule of non credit courses in the University information system to capture all non credit course enrollments and transcript generation.

Findings (2009-2010) - Target: Met
ACE staff collaborated with the Registrar to build all non-credit courses in the Banner system catalog. ACE course enrollments now become part of the student record for the Non-Credit level and reflect on student transcripts.
Target:
Establish online catalog of non-credit courses by June 30, 2010.

Findings (2009-2010) - Target: Met
The ACE Division collaborated with IT to create an online course catalog for non-credit courses.

ACE Online Course Catalog

ACE Webpage

O/O 2: Strengthen Web Presence
Develop a web presence that allows credit and non-credit adult learners to navigate the site, learn about educational opportunities, register for courses and pay online.

Related Measures:

M 1: Strengthen Web Presence
Develop a web presence that allows credit and non-credit adult learners to navigate the site, learn about educational opportunities, register for courses and pay online.

Source of Evidence: Administrative measure - other

Target:
Deployment of re-designed ACE web site.

Findings (2009-2010) - Target: Met
ACE staff received content management training to maintain the division pages. The team collaborated with Information Technology and the Registrar to build an online course catalog of non-credit courses. The Continuing Education site lists non-credit opportunities and now includes online registration functionality via the Registrar's office. ACE developed a registration confirmation email (sent by the Registrar) for non-credit students that directs them to online payment links in the University student services web page, myDesu. ACE staff created unified pages for the Wilmington and Georgetown sites that showcase accelerated undergraduate degrees and graduate degree programs (where applicable).

Connected Document
O/O 3: Tracking
Develop prospect tracking for prospective adult learners

Related Measures:

M 2: Prospect Tracking and Marketing
Prospect tracking and marketing
Source of Evidence: Activity volume

Target:
Increase the number of prospective students to which site programs are marketed (baseline 2009 ~ 2,000).

Findings (2009-2010) - Target: Met
ACE obtained student listings of associate degree graduates from Delaware Technical and Community College (DTCC) for its associate degree graduating classes of 2008, 2009, and 2010 (n~3,000). The listings were matched against the Banner system to check for existing admission applications. ACE invited individuals with unmatched records to information sessions and coordinated communications from Admissions and ACE. Additionally, ACE obtained a student listing for students enrolled in DTCC programs in 2009-2010 (n~1,100) that have existing connected degree agreements.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Tracking
Established in Cycle: 2009-2010

Load individuals from student listings into the Banner prospect module for future recruitment and communication activities.

O/O 4: Communication Plan
Create communication plans for adult learner information sessions and other recruitment events.

Related Measures:

M 4: Communication Plan
Create communication plans for adult learner information sessions and other recruitment events.
Source of Evidence: Administrative measure - other

**Target:**
Create communication plans for adult learner information sessions and other recruitment events.

**Findings (2009-2010) - Target: Met**
ACE collaborated with the Offices of Admissions and Integrated Marketing to include messages to ACE prospective students in the university communication plan. Messages were created for congratulating recent associate degree graduates, informing prospects about site programs, and inviting prospects to information sessions. Communications were sent by postal mail and email.

**Connected Document**
- ACE Communication Plan to Prospects

**G 2:Educational Opportunity Creation**

Lead/Champion the creation of educational opportunities for adult learners for credit and non-credit programs

**O/O 5:Credit and Non-credit Certificate Programs**
Provide labor market research to academic deans and department chairs to support credit and non-credit certificate program creation needs for adult learners.

**Related Measures:**

**M 5:Credit and Non-Credit Certificate Programs**
Provide labor market research to academic deans and department chairs to support credit and non-credit certificate program creation needs for adult learners.

Source of Evidence: Administrative measure - other

**Target:**
Research and inform academic deans and chairs about demand for bachelor degree programs for associate degree graduates and top program opportunities for transfer.

**Findings (2009-2010) - Target: Met**
Presented data to deans, chairs, and other constituents showing demand data for degree programs of associate degree graduates in Delaware. Information included transfer rates to other Delaware higher education institutions. Data was also presented showing occupational outlook and projected growth for jobs requiring bachelor degree level education for programs that the University has existing connected degree agreements in place with the state’s only community college.
O/O 6: Template Development
Develop a template/process to create non-credit programs.

**Related Measures:**

**M 6: Template Development**
Develop a template/process to create non-credit programs in response to community requests or market need for programs.

Source of Evidence: Administrative measure - other

**Target:**
Develop a template/process to create non-credit programs in response to community requests or market need for programs.

**Findings (2009-2010) - Target: Not Met**
No progress was made on this objective.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Process Template Creation**
*Established in Cycle: 2009-2010*

Develop a process template to create non-credit programs in response to community requests or market need for programs.

O/O 7: Collaboration
Collaborate with academic deans and departments to build scheduling tracks for existing degree programs utilizing evening, weekend, accelerated, summer, and online course options.

**Related Measures:**

**M 7: Collaboration**
Collaborate with academic deans and departments to build scheduling tracks for existing degree programs utilizing evening, weekend, accelerated, summer, and online course options.

Source of Evidence: Administrative measure - other

**Target:**
Build scheduling tracks for existing degree programs utilizing evening, weekend, accelerated, summer, and online course options.

**Findings (2009-2010) - Target: Met**
Created five accelerated, full-time evening degree scheduling tracks for existing connected degree programs at the Wilmington and Georgetown sites. Programs are designed for associate degree holders to enroll in full-time study in the evening that require students to attend only two nights per week. Completion of the bachelor degree is in a few as 2.5
academic years (five semesters). Accelerated tracks were created for programs in Social Work, Criminal Justice, Early Childhood Education, Early Care and Education, and Business Administration/Accounting. See links below:

http://www.desu.edu/sussex-site
Accelerate undergraduate degree programs at sites

O/O 8: Credit for work experience
Develop a formal process for adult students to obtain credit for work experience and lifelong learning to shorten time to degree.

Related Measures:

M 8: Credit for Prior Learning
Develop a formal process for adult learners to obtain credit for work experience and lifelong learning to shorten time to degree.

Source of Evidence: Administrative measure - other

Target:
Develop a formal process for adult learners to obtain credit for work experience and lifelong learning to shorten time to degree.

Findings (2009-2010) - Target: Not Met
The ACE leadership identified this objective as a best practice in serving adult learners. However, no progress was made on achieving this objective. Collaboration with the Student Affairs division is recommended.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Credit for Prior Learning
Established in Cycle: 2009-2010
The ACE leadership identified this objective as a best practice in serving adult learners. However, no progress was made on est...

O/O 9: Degree option for transfer students
Be an active member of the committee planning the "Liberal Studies Degree" to create a degree option for transfer students.

Related Measures:

M 7: Collaboration
Collaborate with academic deans and departments to build scheduling tracks for existing degree programs utilizing evening, weekend, accelerated, summer, and online course options.

Source of Evidence: Administrative measure - other
M 9: Degree Option for Transfer Students
Be an active member of the committee planning the “Liberal Studies Degree” to create a degree option for transfer students.

Source of Evidence: Administrative measure - other

Target:
Conduct research and share results with planning committee showing demand for liberal studies degree option for adult learners.

Findings (2009-2010) - Target: Partially Met
Provided planning committee with demand data for liberal studies degree option for adult learners.

O/O 18: Test Description

testing....

G 3: Student Services

Coordinate seamless delivery of student services for adult learners in credit programs attending any location.

O/O 10: Student Services

Evaluate and identify a comprehensive model to deliver student services to adult learners that includes the following: information session follow-up/pre-Advisement Counseling, Transcript Evaluation, Admission Application, Academic Advising, Registration, Financial Aid Application and Award Notification, Payment, Bookstore, Student Services, Library Access, IT Support.

Related Measures:

M 10: Student Services
Evaluate and identify a comprehensive model to deliver student services at the extended sites to adult learners

Source of Evidence: Administrative measure - other

Target:
Evaluate and identify a comprehensive model to deliver student services to adult learners that includes the following: information session follow-up/pre-Advisement Counseling, Transcript Evaluation, Admission Application, Academic Advising, Registration, Financial Aid Application and Award Notification, Payment, Bookstore, Student Services, Library Access, IT Support.

Findings (2009-2010) - Target: Not Met
The ACE division collaborated with Distance Education in identifying best practices in serving adult learners. ACE staff participated in the administrative working group to develop student support services for
students in distance programs. The work of this group is on-going.

**G 4: Grow Adult Learners**
Grow the number of adult learners who enroll in credit programs in all three Delaware counties.

**O/O 11: Information Sessions**
Host information sessions for adults to learn about educational opportunities and thereby increase the number of prospective adult students.

**Related Measures:**

**M 11: Information Sessions**
Develop information sessions for adult learners

Source of Evidence: Administrative measure - other

**Target:**
Host a series of information sessions for adults to learn about educational opportunities and thereby increase the number of prospective adult students.

**Findings (2009-2010) - Target: Met**
The ACE Division hosted 11 information sessions in spring/summer 2010 for graduates of Delaware Tech to learn about transfer opportunities and accelerated degree program options at the sites. Prospective students were able to talk with staff from admissions, financial aid, and representatives from academic departments in a single setting. The ACE team collaborated with Integrated Marketing to create an online information and registration page for the sessions. The accelerated program for Social Work had six students enroll in Sussex.

[http://www.desu.edu/info-sessions](http://www.desu.edu/info-sessions)
Information Session Web Page

**O/O 12: Marketing**
Market connected degree and transfer opportunities to current DTCC students and recent graduates.

**Relevant Associations:**
(G4)

**Related Measures:**

**M 1: Strengthen Web Presence**
Develop a web presence that allows credit and non credit adult learners to navigate the site, learn about educational opportunities, register for courses and pay online.

Source of Evidence: Administrative measure - other

**O/O 13: Summer College**
Market summer College offerings to DSU graduates, current students, Delaware educators, Delaware Tech graduates, and the community.

**Related Measures:**

**M 1: Strengthen Web Presence**
Develop a web presence that allows credit and non credit adult learners to navigate the site, learn about educational opportunities, register for courses and pay online.

Source of Evidence: Administrative measure - other

**M 12: Summer College**
Market summer College offerings to DSU graduates, current students, Delaware educators, Delaware Tech graduates, and the community.

Source of Evidence: Administrative measure - other

**Target:**
Market summer College offerings to DSU graduates, current students, Delaware educators, Delaware Tech graduates, and the community.

**Findings (2009-2010) - Target: Met**

The ACE Division marketed DSU Summer College to ~10,000 Delaware educators with special take-one course, get-one-course offer. Other populations ~3,000 recent graduates from Delaware Tech and the DSU continuing student population. Created Summer Guide for Youth Programs, and ACE Non-Credit Course Guide for website. Marketing included development of post card, email, and flyers.

**Connected Document**
- Summer College

**O/O 14: Marketing ACE Credit Programs**
Develop marketing campaign for ACE credit programs.

**Related Measures:**

**M 1: Strengthen Web Presence**
Develop a web presence that allows credit and non credit adult learners to navigate the site, learn about educational opportunities, register for courses and pay online.

Source of Evidence: Administrative measure - other

**G 5: Grow Adult Non-Credit Programs**
Grow the number of adult learners who enroll in non-credit programs.
O/O 15: Increase WIA Programs
Increase the number of programs for which DSU is an approved training provider with the Delaware Workforce Investment board.

**Related Measures:**

**M 13: Increase WIA Programs**
Increase the number of programs for which DSU is an approved training provider with the Delaware Workforce Investment board.

Source of Evidence: Administrative measure - other

**Target:**
Increase the number of programs for which DSU is an approved training provider with the Delaware Workforce Investment board. Baseline 0.

**Findings (2009-2010) - Target: Met**

The Delaware Workforce Investment Board approved ACE as a training provider for the CISCO Certified Network Administrator program series (four courses). Staff attended the annual WIA training provider forum. Two students received WIA funds to enroll in the programs. However, the program was not run due to low enrollment.

O/O 16: Financial Assistance
Promote opportunities for financial assistance for non-credit programs available through the partnership between DSU and the Delaware Higher Education Commission (Governor’s Education Grants) and others such as military benefits and education lenders.

**Related Measures:**

**M 13: Increase WIA Programs**
Increase the number of programs for which DSU is an approved training provider with the Delaware Workforce Investment board.

Source of Evidence: Administrative measure - other

O/O 17: Marketing for ACE non-credit programs
Develop marketing campaign for ACE non-credit programs.

**Related Measures:**

**M 1: Strengthen Web Presence**
Develop a web presence that allows credit and non credit adult learners to navigate the site, learn about educational opportunities, register for courses and pay online.

Source of Evidence: Administrative measure - other

**M 12: Summer College**
Market summer College offerings to DSU graduates, current students, Delaware educators, Delaware Tech graduates, and the community.
Credit for Prior Learning
The ACE leadership identified this objective as a best practice in serving adult learners. However, no progress was made on establishing a formal practice for evaluating credit for prior learning that takes place in employment or lifelong learning activities. Collaboration with the Student Affairs Division and the Office of Admissions is recommended.

Mission / Purpose

The Africana Studies Program at Delaware State University emerged sometime in the early 1980s and is designed to provide the student with a comprehensive introduction to the academic discipline of Africana Studies/Africalogy, an academic discipline created by principally United States African university students and professors in the late 1960s and the early 1970s. This new academic discipline emerged in the wake of a sudden and massive desegregation of predominately European universities and colleges all across the United States. It also emerged from the insistence by these students that their undergraduate academic studies locate the history, culture, problems, challenges, and realities of people of global Africa (with a particular focus on United States Africans) at the center of all academic study, whether in the arts and humanities or the sciences and social sciences. The program utilizes the theoretical, methodological, and analytical tools developed by scholars in the discipline of Africana Studies/Africalogy to shed light on the multidimensional nature of African experience, agency, and initiative in the United States, Africa, the Americas, and the world from the beginning of humankind to modernity.

In addition to instruction in courses in the discipline of Africana Studies/Africalogy, the Africana Studies Program at Delaware State University supplements its instruction by drawing upon various other academic disciplines, especially those in the humanities and the social sciences that focus on issues in the African world. Among its numerous intellectual contributions, Africana Studies/Africalogy pioneered in developing interdisciplinary and multidisciplinary approaches to teaching and academic study and research in the US university community. In addition to exploring new areas of contact and intersection among these disciplines, the minor degree helps DSU students to gain an appreciation of Africans' and Africa's place within an increasing awareness of the multi-ethnic and global character of human society in the historic African past through to African modernity. In addition, the Africana Studies Program presents students with the opportunity to build upon skills needed for graduate study and for professional careers in a variety of areas, including academia, education, government, law, private industry, and community service.

Goals without Outcome/Objective Relationships Specified

G 1: Strengthen and support academic programs
To strengthen and support academic programs to enable students to reach their career goals

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1: Africana cultural literacy
Students will gain a basic, insightful, and sophisticated literacy in the history, culture, and struggle of African people of the United States, Africa, the Americas, and the world as explored in the discipline of Africana Studies/Africalogy.
Relevant Associations:

DSU Learning Goal Associations:
   3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Strategic Plan Associations:
   College of Arts, Humanities, & Social Sciences
   2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
   6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
   8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

SLO 2: Conversance in cultural theory
   Students will become conversant in the basic cultural theories of African people in post sovereign era within the discipline of Africana Studies/Africalogy.

Relevant Associations:

DSU Learning Goal Associations:
   2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
   3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Strategic Plan Associations:
   College of Arts, Humanities, & Social Sciences
   2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
   6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.

SLO 3: Develop critical intellectual skills
   Students will develop the skills to effectively read, write, discuss, present, and critique academic research and theory within the discipline of Africana Studies/Africalogy.

Relevant Associations:

DSU Learning Goal Associations:
   1 UG Student Learning Goal: Competent Communicators
   2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Strategic Plan Associations:
   College of Arts, Humanities, & Social Sciences
   1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
   6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
SLO 4: Know ancient and medieval African history
Students will acquire a basic knowledge of ancient and medieval African history and culture as explored in the discipline of Africana Studies/Africalogy.

Relevant Associations:

DSU Learning Goal Associations:

3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Strategic Plan Associations:

College of Arts, Humanities, & Social Sciences
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
8 Develop and infuse cross-cultural/multicultural subject matter into all course materials

SLO 5: Preparation for graduate study
Students will be prepared and inspired to participate in graduate programs of study in the discipline of Africana Studies/Africalogy or in related or other disciplines within the humanities and social sciences.

Relevant Associations:

DSU Learning Goal Associations:

2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:

College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University,
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors,
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
Detailed Assessment Report  
As of: 9/27/2018 12:25 PM EST  
2017-2018 Agriculture & Natural Resources Department  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The mission of the Department of Agriculture and Natural Resources is to educate students in a way to prepare them for employment in either the public or private sector, to conduct research to increase the basic knowledge necessary to enhance our Agricultural and Natural Resources and to provide research based learning opportunities to the public with special consideration to the needs of underrepresented groups.

**Goals without Outcome/Objective Relationships Specified**

**G 1:Recruit, Retain, Graduate, Employ**

To attract, retain, graduate and employ students within the Agricultural and Natural Resource field.

**G 2:Encourage students' hands-on learning opportunities**

Encourage hands-on learning opportunities of students through experiential and service learning, study abroad opportunities, undergraduate research, and internships.

**Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**G 3:Encourage scholarly activities of the faculty**

Encourage scholarly activities of the faculty through grants, publications and outreach activities.

**O/O 3:Monitor faculty productivity**

Monitor faculty grant writing, publication and outreach each year.

**Relevant Associations:**

Institutional Goal I 1.4, Institutional Goal III, 3.1, Institutional Goal IV, 4.1

**Strategic Plan Associations:**

Delaware State University  
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement  
3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.
4.1 Strengthen and expand DSU’s outreach, Extension, engagement, entrepreneurship and economic development programs to benefit the people of Delaware, the nation and the world.

**Related Measures:**

**M 6:** Number of grants obtained

Number of grants obtained by the members of the department.

Source of Evidence: Benchmarking of learning outcomes against peers

**Target:**
Acquire $1,000,000 in new grant funding each year.

**Findings (2016-2017) - Target: Met**
Findings 2016-2017. Target was met. In this academic year there were over $5,000,000 in active grants in the department. Most of these grants had an active period of 2 to 5 years.

**M 7:** Number of publications produced

Number of refereed and lay publications produced by the faculty.

Source of Evidence: Benchmarking of learning outcomes against peers

**Target:**
Publish at least 10 refereed publications and 25 other publication from the department each year.

**Findings (2016-2017) - Target: Met**
Target was met. A total of 18 refereed publications were produced during this academic year with an additional 11 publications in review or in press. Additionally 36 lay publication and conference proceedings were also produced along with two book chapters.

**M 8:** Faculty outreach activities

Number of outreach activities including Extension meetings, professional meetings and workshops conducted by faculty members in the department.

Source of Evidence: Benchmarking of learning outcomes against peers

**Target:**
Conduct a minimum of 10 outreach meetings through the department each year.

**Findings (2016-2017) - Target: Met**
Target was met. Over 60 outreach presentations and meetings were conducted by department faculty over this period.

**Related Action Plans (by Established cycle, then alpha):**

**Monitor faculty productivity**  
*Established in Cycle: 2016-2017*

The department will continue to track grants, publications, and outreach activities of the faculty. We will continue to work ...

**Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**O/O 1: Monitor retention and graduation rates**

Monitor retention rates and graduation rates.

**Relevant Associations:**

Institutional Goal II 2.1, 2.2, 2.4

**Strategic Plan Associations:**

Delaware State University

- 2.1 Increase retention and graduation rates by at least two percent annually for the next five years
- 2.2 Use enrollment management best practices to increase overall enrollment to 5,000 students
- 2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community

**Related Measures:**

**M 1: Student enrollment within the majors will be tracked**

**Measure 1.** Student enrollment within the majors will be tracked

Source of Evidence: Benchmarking

**Target:**

Document student enrollment annually. Maintain student enrollment at 150 students or higher across the majors.

**Findings (2016-2017) - Target: Met**

Findings 2016-2017:
Target was met. The spring 2017 enrollment for the department of Agriculture and Natural Resources was 162 students of which 28 students were in Natural Resources and 134 students were majoring in Agriculture.

Related Action Plans (by Established cycle, then alpha):

Track student numbers, retention and employment
Established in Cycle: 2016-2017

Moving forward, the department will continue to track student numbers, retention and employment with the objective of continui...
O/O 2: Monitor Student Experiential Learning

Monitor student participation in study abroad, undergraduate research and other learning opportunities outside of the classroom.

Relevant Associations:

Strategic Plan Associations:
Delaware State University

1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
3.3 Provide opportunities for undergraduate students to participate in research.

Related Measures:

M 4: Track Student Experiential Learning Annually

Student participation in study abroad, undergraduate research, experiential learning opportunity, service learning opportunity, and internships will be tracked each year.

Source of Evidence: Benchmarking of learning outcomes against peers

Target:
Twenty-Five percent of all students will participate in study abroad, experiential or service learning, undergraduate research or internships each year.

Findings (2016-2017) - Target: Met

Target was met. A total of 65 students (65/162 = 40%) participated in the above mentioned activities in the 2016-2017 academic year. 22 participated in Undergraduate Research, 8 in study abroad, 8 in internships and 27 in Experiential Learning activities. This amounted to 40 percent of our total student population being involved in these outside of the classroom activities.

M 5: Student class participation

Insure student participation in classes related to sustainability.

Source of Evidence: Benchmarking of learning outcomes against peers

Target:
100 percent of students graduating from the program will participate in at least one sustainability class prior to graduation.
Findings (2016-2017) - Target: Met

Target was met. All senior students were able to enroll in the capstone/sustainable course. A total of 33 students (100 percent of the graduating students) participated in the Sustainable Agriculture and the Ecosystem classes which are our two capstone courses that are very relevant to sustainability. We do have additional courses with a sustainability component which were not included in this report but will be included in future reports.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Experiential Learning
Established in Cycle: 2016-2017

The department makes a lot of outside the class activities available to our students as a way of increasing their educational experience, however, we will continue to expand our offerings to insure most students have multiple opportunities to participate in these activities and we will continue to seek ways to make this a reality. Activities commonly provided in the department include undergraduate research, study abroad and experiential learning.

Annual Report Section Responses

Executive Summary (1-2 pages)

I. EXECUTIVE SUMMARY

In the current year, the Department of Agriculture and Natural Resources has had a slight decrease in undergraduate students numbers at 153 undergraduates and we also observed a slight decrease in graduate students to 29 students. The department is still considering the development of a Ph.D. program in Fisheries and Wildlife Science, provided we can secure funding to add additional faculty to make the program possible; a second Ph.D. program is also being considered in Agriculture with specialization in genomics. One concern of adding the Ph.D. programs is an added strain on our existing facilities, as the department does not have enough research laboratories to meet the current demand for space. In many ways, this is the major reason we haven't pushed these programs forward.

The department recently reinstated a concentration in Agri-Science Education. This was in response to the University of Delaware dropping their BS degree in Agriculture Education. The department continues to review their other curricula utilizing data collected on our student learning goals over the past several years to further enhance our programs.

Over the long term, the department hopes to continue to grow both the undergraduate and graduate programs through additional recruitment efforts. The college is fortunate to have a recruiter who is housed within the department and who has established rapport with area high schools that serve as seed schools to our programs. The addition of the college advisement center has enabled the recruiter to better focus his efforts, without a loss of service to our new students.

Faculty vacancies continue to be a concern. A Plant Pathologist funded through the EPSCoR grant was hired, however the person decided to leave to pursue an opportunity as the Pathologist Program Leader at USDA. The ability of the department to respond quickly when a vacancy occurs is essential and establishing processes to do this should be addressed in the coming year. Additionally, the department has identified a need for a GIS
specialist to further enhance our undergraduate and graduate programs, and if funding could be secured, an Agriculture and Natural Resource Economist position would also be useful.

The college recently added a student lounge, research lab and teaching lab to the Annex. As we continue to grow, the need for more research labs will grow. Efforts need to be made to find innovative ways to maximize the use of available space located in departmental facilities. Some areas in the W. W. Baker building may offer options for retrofitting for laboratory use, however consideration needs to be given to specialized equipment needs and the necessity of holding teaching laboratories in some of these spaces as well. It should be noted that the WW Baker building is overdue for renovation. Recent efforts include painting the older section of W.W. Baker building, which will greatly improve the aesthetics of the building.

Unit(s) Profile

List all personnel changes (new faculty, professional and/or classified staff, retirements, leaves, etc.)
The department has yet to fill the two faculty member positions that were lost last year. A Plant Pathologist and a Poultry Specialist. Funding will only allow the hiring of an Extension Poultry Specialist at the current time.

B. CENTERS(list specialized areas of instruction, research, or service)
The department houses two specific areas of specialized function: The Claude E. Phillips Herbarium and the USDA Seafood Safety Laboratory. The Herbarium has been utilized as a resource for certain graduate students in Agriculture: Plant Sciences, who are working with various segments of taxonomy and plant identification. It is a great
resource for our graduate and undergraduate students alike and the staff in the herbarium are actively involved in outreach activities. While the educational programs of the herbarium continue concern still exists that the curator position has not been filled.

The USDA Seafood Safety Lab houses, two full time scientists who conduct research on various aspects of shellfish safety. When a match exists, this laboratory has provided graduate students with the opportunity to conduct thesis research, resulting in win:win relationship with the lab. In the past, several undergraduate students have also been employed in the laboratory providing specialized training opportunities.

C. EDUCATIONAL PROGRAMS (section required only for academic departments)

Discussion of trends, projections, etc.
Over the past year, we have experienced slight decreases in both undergraduate and graduate enrollment. Enrollment in the undergraduate program has been positively impacted over the past 10 years by our college recruiter who regularly visits area high schools and has developed a relationship with staff at local and regional high schools and regularly works to schedule school visits and student consultations. Graduate enrollment is directly related to the availability of grants. Our graduate program enrollment is a direct reflection on the dollars brought into the program by our faculty who provide the necessary tuition and stipend dollars required to fund the program. Minimal support is provided by the institution for graduate programs. Transitional periods from one academic year to the next will result in some slight fluctuation in graduate student numbers. Additionally, the graduate program continues to strive to improve the type of students accepted into the program and the department has held to admission standards to enhance student success for those admitted into the program. The department is still considering a Ph.D. program in Wildlife and Fisheries Sciences and a Ph.D. in Agriculture with a specialization in genomics. Part of the delay in moving forward is due to concern over having adequate funding to support graduate students in the long term required to complete a Ph.D.

Unit(s) Initiatives accomplished in this cycle

VI. UNIT INITIATIVES

List and describe any new programs and/or initiatives.

Recruitment and retention continue to be two major areas identified by the University as critical to meeting the institutional goals for growth over the next five years. The Department of Agriculture and Natural Resources continues to work to improve efforts in both of these areas.

Recruitment efforts are ongoing for both the Undergraduate and Graduate programs and the hiring of a college recruiter has provided the department with a greater connection with high schools in the state and surrounding area. This should directly result in a higher number of applicants for admission into our programs. In addition, the recruiter continues to work to update and improve departmental brochures and promotional materials, and regularly represents the department during formal recruiting activities on and off of campus.

Academic Advising is another issue identified as critical to the mission of the institution and campus-wide efforts have made a new advising manual for use by University faculty
available on the University web site. Recently, college advising centers were set up to allow for better service to undergraduate students in their first two years at the institution. Following their first two years, students are assigned advisors based on their major and are encouraged to make appointments with their advisors every semester to discuss their programs, course needs and to receive mentoring. The Department Chairman serves as a secondary advisor to all students and regularly meets with students when needed.

List and describe any significant modifications in the past 12 months to pre-existing programs or curricula.

The department reactivated the concentration in Agri-Science Education. The effort to reactivate our BS program in Agri-Science Education occurred when the University of Delaware decided to eliminate their undergraduate program in education, creating a need for the program. Other programs are currently being reviewed for adjustments.

List Professional Development Efforts and/or Activities organized by the unit. List Professional Development Activities not organized by the unit but attended by or pursued by unit member(s), list names of members involved.

Faculty within the Department of Agriculture and Natural Resources routinely attend the annual meetings of their professional associations. Specific meetings attended can be found in the appendices at the end of this document.

List all community, public, and business outreach programs, activities and events occurring during the reporting year. Asterisk any that involved individuals from other DSU Units. Where appropriate, indicate the number of persons served by the outreach effort.

Many of the faculty are routinely involved with outreach activities, some of these groups include:

Sierra Club

Delaware Nature Society

Capital School District

Smyrna School District

National Wildlife Refuge - Prime Hook

National Wildlife Refuge - Bombay Hook

Council of Farm Organizations
Delaware Farm Bureau

Delaware Fisheries Advisory Council

Delaware State Grange

Others can be found in the appendices found at the end of this document

Technology Integration
Include a discussion of continuing effort or need for technology. Academic Departments are to include efforts in incorporating technology use in classroom instruction.

The department continues to provide students with a computer laboratory which is opened each day from 8:30 a.m. until 4:30 p.m. during the week. The laboratory houses 12 computers and is available to students to do their work. On occasion, the lab is signed out for teaching purposes, but at all other times it is available for student use. A laser printer has been provided in the lab for student use. The department also has several pieces of specialized research equipment that is utilized in teaching and research. These include: Electron Microscope, Flow Cytometer, Gas Chromatograph with Mass Spectrophotometer, Ultrasound, Beckman Ceq 2000 Genetic Sequencer, Growth Room and Chambers, Thermocyclers, and a Research Greenhouse.

List any facility and/or infrastructure improvements
Recent renovations of the Agriculture Annex provided an additional teaching lab, research lab, student lounge and office space. However, the department has used up nearly all the research space as more faculty develop their programs. The Outreach and Research Center in Smyrna has also been a great asset to our program and continues to provide research plot land for our agronomic and environmental research efforts. All of our facilities and farms have dual purposes, to provide for the conduction of research and to enhance our teaching capabilities. We continually look for ways to make our facilities more elastic to the needs of our faculty.

Terminated Programs
No programs were terminated in the current year.

Enter any other comments that you feel are important to the continued improvement of the Unit.
The department is currently suffering from a lack of adequate research space. The departmental facilities committee will be working during the summer to assess all the currently available space (offices, laboratories and storage) with the intent of making a recommendation for better space utilization.

**Unit(s) Honors/Awards and Achievements**

**VII. HONORS/AWARDS/ACHIEVEMENT OF STUDENTS**
Report any special honors and/or awards for the year. Academic departments are to include key statistics, such as number of degrees awarded, average time-to-degree, graduation rate, retention rate (year-to-year and to graduation) as compared to university totals.

USDA Scholar

Delaware State Grange Scholarship

NOAA Scholarships

In 2017-2018, 32 undergraduates were awarded B.S. degrees. Twenty-six of these were in Agriculture and six were in Natural Resources.

Fourteen of the graduates entered DSU in the Fall of 2014 and graduated in four years. Five additional students took five years to complete their degrees, one took six years and one took eight years. One student completed their degree in three years. The additional 10 students who graduated this academic year transferred into the department with varying numbers of credits. The fate of students who transferred out of the department is not known.

The department also graduated eight Master of Science Students this year. Six were in Natural Resources and two were in Agriculture.

Major Achievements of Students (not included above) as compared to university totals. Please provide information as available. Institutional Research Office may be contacted for needed information.

i Honors Received by Majors

One student in this year's graduating class graduated Suma Cum Laude, Jeniece Small. Five graduated Magna Cum Laude: Summer Pollinger, Moala Bannavti, Tahj Boston, Zane Collison, Morgan Jones. Four additional students graduated Cum Laude Jiajun Wu, Anthony Byrd, Mariah Williams and Andrew Wyttenbach. Over 30 percent of our 2017-2018 graduates, graduated with honors.

ii Activities of Student Groups (including civic and social activities)

The department currently has four active student groups including a Wildlife Society, a Collegiate FFA chapter, a MANRRS group (minorities in Agriculture and Natural Resource and Related Sciences) and a Pre-Veterinary Science Club. All four groups are active and regularly participate in regional or national events within their associations. Specific activities have included food drives, road cleanups, and recycling programs. We are proud of our active student groups and their commitment to the institution and surrounding community.
iii Job Placement and/or Accomplishments of Seniors

B.S. Degrees 2017-2018

Cheyenne Adams* Unknown

Shamar Amison - Attending Medical School in Arizona -18

Stephanie Austin - working as Dewayne Fox's technician

Moala Bannavti Ph.D. program in Engineering -18

Tahj Boston - attending vet school NCSU

Lauren Brown Attending University of Maryland Grad School

Mia Brown* Unknown

Dysha Bryant - Home Depot '18

Anthony Byrd - working for a farmer in Milford, DE

Zane Collison - Transportation Division Beracah Homes, Greenwood, De ‘18

Nevershi Ellis Attending Grad School at Tuskegee University

Drew Fox* Unknown

Justin Grimminger* EMT also working at Ficnr Farms in Middletown ‘18

Loren Harmon* Working for USDA as a Meat Inspector ‘18

Tajay Jackson Unknown

Julian Jones - attending Tuskegee University for graduate school Fall 18'
Morgan Jones Attending Environmental Law School in Michigan '18

Zhaneyah Kelley* Unknown

Kayla Kemp - Working on home farm '18

Kristen Lewis Unknown

Debbielynn Mayo* - working in residential housing at a university in Minnesota

Summer Pollinger* Working on a horse Farm in New Castle County ‘18

Jeniece Small Working with Family Day Care.

Ashley Tabbian Working for DSU Aquatic Demonstration Facility ’18

Qiara Tomlinson Working in NYC

Charles Wallace Attending Graduate School MS at University of Florida

Brian Ward Unknown

Fedrica Williams Unknown

Kyejah Williams Employed by the State of Maryland

Mariah Williams Attending Tuskegee Veterinary School ’18

Jiajun Wu* Working on MS at George Washington University ’18

Andrew Wyttenbach Working for DSU Cooperative Extension ’18

Job Placement and/or Accomplishments of Graduate Degree Recipients

M.S. 2017-2018 Graduates include:
Anju Biswas Research Technician, DSU '18

Amy Comer Stock Assess Scie: NC Division of Marine Fisheries '18

Melanie Fuoco Working Part Time with Dr. Gulnihal Ozbay DSU '18

Symone Johnson Science Educator at Baltimore National Aquarium '18

Keith Leonard Working as an educator at the NJ State Aquarium '18

Dylan Lynch - Frontier Scientific at FMC Stine-Haskell '18

Melanie Mancuso-

Petrina McKenzie-Reynolds Ph.D. program at UMES'18

Follow-up of Graduates (All Degree Levels; 2012 and before)

Student What they are doing

1996

Gregory Glovick Employed by Royal Farms 09

Steven Pieshala Employed with Southern States Co-op. (Ag Supply Co.)

J. Jay Davis High School Vocational Teacher in Smyrna 13

Karin Grosz Employed at Sussex Conservation District deceased 09

Jomelle Bowen Teaching Middle School in Dover

Jennifer Collison Formerly employed at Kent Con. District, Homemaker

Wayne Jester Currently Between Jobs, Has worked for Landscape Co.
Mark Del Vecchio In the military 09

Derek Fisher Employed as Insurance Salesperson for Prudential 10

Brian Harris Employed in Private Sector

McClennon Holmes Employed in Private Sector MS from Penn State Univ.

Richard Shepard Employed with Caroline County Conservation District

William Jones Prime Hook National Wildlife Refuge, Outdoor Director 09

David Hudson Employed at U.S. Geological Survey

David Arndt Practicing Attorney in Dover, DE

Jay Greenwood Unknown

Howard Miller Unknown

Richard Beaman Employed at Delaware Dept. of Transportation 12
Jada Bing working on Ph.D. at NCSU 12

Yaa Brobbey Employed as a Program Specialist for the State of NJ

Ty Burns Employed at Winner Ford

Misp Gwanmesia Working on Pharmacology Degree at Johns Hopkins 09

Shannan Hall AFRRI (Armed Forces Radiobiology Research Institute) 13

Frank Malinky Quality Control Officer for Tetra Tech/Foster Wheeler CO

Richard Mason M.S. NC A&T. Employed at Merck Pharmaceuticals PA.

Rodney Morehart Employed Conservation District Conservationist in PA 09

Jared Papen Employed on Family Farm

Kasey Spriggs Employed with Virginia Parks Service

Beth Sussman Employed with Social Security Administration, Dover DE

Linda Unterkofler Employed as a Veterinary Technician in Dover

2002

Dana Campbell Unknown

Courtland Cobb Unknown

Katarina Gillespie Homemaker

Robert Johnson Employed with Enterprise Car Rental Company

Kacie Messick Unknown
Aisha Miller Applying for Graduate School

Matthew Mills Farm worker ’15

Ashley Peebles Employed at the Delaware Dept. of Ag Forestry Section 12

Trawana Porter Employed with Camden, New Jersey Food Bank 12

Alexandra Tispouras Teaching Smyrna School District 09

Shanna Tull Employed by USDA, FSIS

Philip Ulrich Farmer/Substitute Teacher

2003

Sherry Absolom Working at Home Depot Garden Center in DE

Jason Allen Working on MBA at DSU

Nafis Austin Employed as a teacher in Philadelphia

Marshall Bailey Unknown

Heather Case Working at Lowes in Dover, married 12

Deanna Conquest Working in the Retail Food Industry

Arielle Dixon MBA U of Chicago, Employed with Financial Firm in IL.

Marcia Fox-Bilbrough Environmental Scientist, DNREC 14

Lori Goins Self-Employed Caterer in Philadelphia

Jonathan Harmon Employed in Pharmaceutical Industry in Delaware.
Herbert Holmes Unknown

Kerin Hume Working at Kent Conservation District 14

Theodore Layton Unknown Owns Construction Business 12

Annette Steward Completed M.S. in Ag. Econ. 05/Completed M.S. in School Counseling 11 Guidance counselor in Harvey School District 12

Johnny Teasley Working on M.S. at Old Dominion University.

Broc Turner Unknown

2004

Sequanna Anderson Employed at USDA Civil Rights, Washington, D.C. 13

Rachel Aqui Employed in the Poultry Industry

Sterling August Employed at Dept. of Education in Washington, D.C. 09

Stacy Blake Unknown

Rebecca Carrow(Brown) Working for NRCS as Soil Conservationist in Maryland 10

Marquisa Edmond Working for USDA 12

Garry Glanden Employed with DNREC as Env. Control Tech 13

Lindsay Gooden Grad School for teaching degree/substitute teaching
Derek Haley Working at a Golf Course in DE

Jason Hall Employed with USDA/ARS in MD

James Hughes Employed as a teacher Smyrna Middle School 13

Tarraca Jackson Comp MS in Animal Science at NCA&T 06’ in Nursing School 12

Kara Kochis Teaching Vocational Ag in Delaware

Dakaque Lewis Employed at Kraft Dover 12

Yolanda Lyons Unknown

Krystal McDevitt Unknown

Charles McMillan Completed DVM at Tuskegee University 12

Alex Meredith Recruiter for Dept. of Ag and NR, DSU 12

James Powell Employed at Dept of NR and Env. Control

Amber Still Working on M.S. degree at DSU

Jeramie Strickland Completed MS ISU, Working USFW Service 10

Elizabeth Swain Completed Vet School at Tuskegee University

2005

Michael Brown Working for the Maryland Department of Agriculture 10

Brendon Brock MS Working in New Jersey as Environmental Scientist 09
Charles Cawley Employed with McConnell Agronomics 13

Katie Gedney Working for Pro-Lock and Safe Co. 13

Matthew Grabowski Working DNREC Division of Soil and Water, Drainage 09

Christy Gustafson Working as Nutrient Management Tech in Maryland 09

Wesley Knapp MS Regional Botanist, MD Natural Heritage Program 10

Trevor Knight Professional Bass Fisherman http://www.knightfishing.com/ 10

Jennifer Leach Unknown

Michelle Rains Unknown

Lindsey Rash Completed MS degree at DSU in Plant Science

Alicia Revis Pursuing MS degree at DSU in Natural Resources

Edward Robinson Employed on family farm in Kent County, Delaware

2006

Jessica Dennis Unknown

Wade Dunning Working, AET Ag Consulting, Smyrna DE ’15

Viniece Jennings Biological Scientist, USDA ARS FS, Georgia ’15

Melissa Nicholson In Pharmacy School 12

Patricia Nugent Working on MS in Biology, DSU
Krystal Stanley Environmental Scientist at DNREC 09

Jesse Thomas MS Coordinator Most Endangered Rivers. American Rivers NGO 10

Jordan Zimmerman Working for DNREC, Fish and Wildlife & MS at DSU 12

2007

Kengara Alfayo Unknown

Rebecca Bonnell Working as Vet Tech at Governors Ave Hospital 12

Kesha Braunskill MS Working with the Delaware Forest Service. 15

Patrick Erbland MS Ph.D. program University of Maine 10

Marcia Fox MS Working at DNREC as an Environmental Scientist 15

Matthew Jones Wildlife Technician, USFWS 12

Mary Lambert MS Animal Communicator, NJ DEP ’15

Brandon Martin In the U.S. Coast Guard 11

Jamie Messick Unknown

Barbara Murray MS Unknown

Kawana Mutti Social Media Analyst at American Express, Miami, FL ’15

Guannan Qui MS Working at the Institute of Plasma Physics, Chinese Academy of Sciences, Hefei, China 10
Donald Shillingford Unknown

Jacob Urian Completed MS at DSU, Nutrient Management Consultant,
Kent Conservation District '15

Charles Wilson III Unknown

Ernie Wyatt Teaching School in Maryland 09

Kevin Neves MS Completed Ph.D. at UME. Currently Facilities/Operations Manager at Acadia Harvest Incorporated in Maine 14

2008

Anikka Ahmed Working on MS degree at Kansas State University 09

Kelvin Barthelmeh Working Construction

Jason Challandes Working for Cooperative Extension at DSU in MS program at DSU 12

Shanna Chambliss MS Earth Science Teacher in VA 12

Christina Collins Working for Monsanto in PA11

Tia Daly Working at Pet Smart in Newark, DE 11

Jodi Eierman Teaching Ag at High School in Caroline County MD 13

Kenneth Hockenberry Working on MS in Human Resources Georgetown U
Working with USDA/FNS in Alexandria VA 09

Leslie Howe Working DNREC as Environmental Sci. Solid Waste 09

Kerin Hume MS Working as Conservationist at Kent Cons. Dist. 13

Jonathan McKenzie MS Finished Ph.D Teaching at Edison State College in FL 14

Jeffery Melson Unknown

Rachel Melvin Working with Maryland Ag Commission, and as vet tech 13

Nicholas Munyei MS Working at a Senior Care Center in Newark 10

Brian Palmer Working for Willards Inc, Greenwood DE 09

Tabitha Prettyman Working for Perdue Farms 13

Lawrence Seeman In U.S. National Guard. Working at Starboard Bar 11

Christie Starke Working at Sussex Cons. Dist 11

Stephanie Stotts MS On faculty at Wesley College ’15

Sable Williams Unknown

Kelly Wolcott MS Environmental Biologist, Fed. Energy Regulatory

Commission in Washington DC

2009

Abiade Adekunle MS Working for the State of Pennsylvania WIC program 10

Beatrice Barner Unknown
Ashley Butler Unknown

Colette Cairns MS Working for NOAA-NMFS in MD as Permitting Officer 11

Christen Dillard M.S. Animal Science Drexel 11/Modeling 12

Samantha-Jo Ebert Working as a Vet Tech and in Vet Tech School in VA 11

Hillary Ennis Working for U of Delaware 13

Johnna Faye MS Working as a Technician, USDA ARS 12

Adrienne George Ph.D. Candidate, Univ. of South Florida ’15

Lindsey Gibson MS Working for NRCS

Ar’Quette Grant Completed MS in Food Science at DSU 11

Evan Griffin MS Working for Nestle Inc.

Tiffany Hebb Completed MS- U of Arizona, in Ph.D. program Tuskegee in integrated biosciences 12

Janaire Hughes RN in Orlando Florida ’15

Johari Jordan MS Started Ph.D. at NC A&T, didn’t finish ’15

Latasha Leggett MS Working for ARS in Wyndmoor PA

Frank Marenghi MS Working for MD DNR Env. Spec. III with oysters 11

Michael Mullings Unknown

Samantha Noviscky Unknown
Keleigh Provost MS Working at Florida Research Institute ‘15

Guannan Qui MS Returned to China

Alicia Revis-Mangum MS Environmental Specialist, NC ‘15

Melissa Schutte Educational Lab Specialist at DTCC, Dover, DE

Philip Simpson Working for Oregon Fish & Wildlife as a biologist 11

Brittany Smith M.S. Animal Science Penn State 11/Employed EPA 12

Antonette Todd MS Technician DSU-CIBER Lab/Pursuing Ph.d. at UD 12

Jenna Warren Applying to Graduate School

Navado Wood Unknown

2010

Robert Borntreger Working for Delaware Dept. of Ag, (Environ. Sci)’15

Kamerra Brown Assistant Riding Director, Bridgewater College ‘17

a. Number and Percentage of Honors Graduates
In the 2017-2018 academic year, 30% of our graduates graduated with honors.

b. Number and Percentage of Graduates Enrolled in full-time higher-level education within one year of graduation.

Two B.S. students and three M.S. students are continuing their education. 5 out of 38 or 13%.

c. Number and Percentage of Graduates employed in the major field within one year of graduation. Twenty three of 38 or 60% of the students are employed in their area of study within a year of graduation.

In the 2016 class, 58 percent are either pursuing advanced degrees or are employed in the field of their study or a closely related field.

d. Number and Percentage of Graduates in Delaware 5 years after graduation

Unknown

e. Employer satisfaction

While specific surveys are not being done, candid discussions with employers, about the success of our students in their positions and in various graduate and professional schools indicates satisfaction. The department needs to develop employer surveys and better quantification methods to gather data.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

I. Student Learning Goals and Objectives

B.S. Agriculture
1.) Students in Agriculture will be able to discuss, orally or in writing, agricultural systems as they relate to either crop or animal cycles along with production practices involved in those systems.

2.) Students in Agriculture will be able to analyze and recognize sustainable agricultural practices and compare and contrast them to practices that are not sustainable.

3.) Students in Agriculture will be able to discuss plants and animals and the critical essential roles they play in the provision of food, fiber and other products to man and other living organisms.

Method of Assessment: All students, majoring in Agriculture are required to take the senior capstone course entitled Sustainable Agriculture. While students take a variety of plant and animal courses during their program, the Sustainable Agriculture course pulls many of the courses together and approaches agricultural production in a systematic way. Faculty members teaching the Sustainable Agriculture will assess the students ability to achieve the goals listed above throughout the course but more specifically through a capstone project designed to determine a students understanding of the above goals.

Assessment Instruments: A capstone project will be developed by the students to showcase their understanding of agricultural systems, plant and animal cycles and production systems. The project will require that students develop a sustainable diversified farming system, where they will elaborate on the production systems chosen, describe them in detail and prepare a whole farm plan for evaluation. In addition, students will present their plan to the entire class for open discussion and evaluation. Capstone instructors will then evaluate each of the three learning goals based on the student's project and presentation as either: excellent, very good, good, fair or poor.

Process of Collecting and Analyzing Data: Since the Senior Capstone course is offered only in the spring semester, a group of Agriculture faculty will meet at the end of the spring semester and before commencement each year to evaluate the collected data and to determine the effectiveness of the program to prepare students in the above mentioned areas. Recommendations will be made back to the department curriculum committee if it is found that weaknesses exist in the program. Recommendations can include changes to specific courses, the addition of courses to the curriculum or even the deletion of courses from the curriculum.

Report of Assessment Data, Analysis of data and Recommended Changes

Sustainable Agriculture was taught in Spring of 2018. Data were collected in the Spring of 2018 using the capstone rubric plus three goals specific to the departments mission. Students were assessed in the capstone rubric for Reading, Writing, Speaking, Listening, Information Literacy, Computer Literacy, Critical Thinking, Problem Solving and Quantitative Reasoning and were ranked as either reaching the target performance, acceptable performance or unacceptable performance in each category. If a category was not applicable that was also noted. A total of 32 students were enrolled in the course in 2018. The following information was collected:

In the area of the three specific goals listed above. Student performance in the class on a percentage basis was:

Excellent Very Good Good Fair Poor
Based on the data collected above, no changes are currently planned in the curriculum, however as additional data are collected each year, the program will be re-evaluated.

**B.S. Natural Resources**

1.) Students in Natural Resources will demonstrate an understanding of the natural cycles found in ecosystems and how humans impact those cycles.

2.) Students in Natural Resources will be able to analyze information to determine the sustainability of Natural systems.

3.) Students in Natural Resources will be able to present arguments on the value of the air, land and water resources including the need to protect the resources and the products that they provide for man and the biotic and abiotic environment.

**Method of Assessment:** All students majoring in Natural Resources are required to take the senior capstone course entitled Ecosystems. While students take a variety of Natural Resource courses during their program, the Ecosystems course pulls many of the courses together and approaches the Natural Resources area in a systematic way. Faculty members teaching Ecosystems will assess the student's ability to achieve the goals listed above throughout the course, but more specifically through a capstone project designed to determine a student's understanding of the above goals.

**Assessment Instruments:** A capstone project will be developed by the students to showcase their understanding of Natural Resource Systems. The project will require that students develop a sustainable Natural Resource system, where they will elaborate on the natural resources, how they are sustainably utilized and managed and describe the system in detail and prepare a plan for evaluation. In addition, students will present their plan to the entire class for open discussion and evaluation. Capstone instructors will then evaluate each of the three learning goals based on the student's project and presentation as either excellent, very good, good, fair or poor.

**Process of Collecting and Analyzing Data:** Since the Senior Capstone course is offered only in the spring semester, a group of Natural Resource faculty will meet at the end of the spring semester and before commencement each year to evaluate the collected data and to determine the effectiveness of the program to prepare students in the above mentioned areas. Recommendations will be made back to the department curriculum committee if it is found that weaknesses exist in the program. Recommendations can include changes to specific courses, the addition of courses to the curriculum or even the deletion of courses from the curriculum.

**Report of Assessment Data, Analysis of data and Recommended Changes.**

Ecosystems was taught in the spring of 2018. Data were collected using the capstone rubric. Students were assessed for Reading, Writing, Speaking, Listening, Information Literacy, Computer Literacy, Critical Thinking, Problem Solving and Quantitative Reasoning and will be ranked as either reaching the target performance, acceptable performance or unacceptable performance in each category. Similarly, students were also assessed for the three goals of the Natural Resource program listed above. If a
category was not applicable that will be noted. Once collected and analyzed, the curriculum will be changed if data suggest that a need for change exists.

In 2018 there were 8 students in the Ecosystems class. In the area of the three specific goals listed above. Student performance was in percentage was:

Excellent Very Good Good Fair Poor
G1 25 50 25 0 0
G2 0 37.5 62.5 0 0
G3 37.5 62.5 0 0 0

Based on the data collected above, the instructor will re-evaluate the course to determine how to improve student performance with regards to departmental assessment criteria.

M.S. Agriculture
1.) Graduate Students in Agriculture will be able to demonstrate the principles of experimental design and statistical analysis in their projects.
2.) Graduate Students in Agriculture will demonstrate sound organizational, writing and speaking skills in the preparation and presentation of their theses.
3.) Graduate students in Agriculture will be able to develop ideas and implement research projects to investigate and solve problems with plants or animals in providing solutions to the complexity of problems that are encountered in agricultural careers and professions.

Method of Assessment: All students in the MS degree program are required to write a thesis, present the thesis in an open seminar and defend the thesis to their committee. In addition, all M.S. students within the department are required to take a graduate level course in Experimental Design. Assessment of the Learning goals listed above will take place during the student's defense of their thesis and will be conducted by the thesis committee. Student's organizational, writing and speaking skills will be evaluated by the committee during the preparation and defense of the thesis and student demonstration of experimental design, statistical analysis and ability to develop and implement their research projects will also be assessed by the thesis committee at that time.

Assessment Instruments: Thesis committee members will be provided with an assessment form on which they can evaluate student performance in the above areas as excellent, very good, good, fair or poor.

Process of Collecting and Analyzing Data:

Data collection will be ongoing as students defend their theses. At the end of each academic year,(and before Commencement) a committee of graduate faculty, within the Agricultural area will evaluate the data and determine if any changes need to be made in the program's required courses, or if additional training may be needed in the area of writing, speaking, experimental design or statistical analysis.

Report of Assessment Data, Analysis of data and Recommended Changes
The above three categories listed above will be evaluated by the students thesis committee as either Excellent level of competency, at an Very Good level of competency, Good level of competency, Fair Level of Competency or at a Poor level of competency. These rubrics were recently put into place and data was collected on the 2017 graduates. Data will be analyzed and the program re-evaluated and changed if changes are indicated.

In 2018 there were 2 students who completed their Masters Thesis in Agriculture (Dylan Lynch and Anju Biswas). The following information was collected:

% Excellent % Very Good % Good %Fair % Poor
G1 0 100 0 0 0
G2 100 0 0 0 0
G3 100 0 0 0 0

M.S. Natural Resources

1.) Graduate Students in Natural Resources will be able to demonstrate the principles of experimental design and statistical analysis in their projects.

2.) Graduate Students in Natural Resources will demonstrate sound organizational, writing and speaking skills in the preparation and presentation of their theses.

3.) Graduate students in Natural Resources will be able to discuss animal and plant population dynamics and the mathematical theory underlying the models of population growth.

Method of Assessment: All students in the MS degree program are required to write a thesis, present the thesis in an open seminar and defend the thesis to their committee. In addition, all M.S. students within the department are required to take a graduate level course in Experimental Design, Habitat Restoration and Conservation and Population Biology. Assessment of the Learning Goals’ listed above will take place during the students defense of their thesis and will be conducted by the thesis committee. Student's organizational, writing and speaking skills will be evaluated by the committee during the preparation and defense of the thesis and student demonstration of experimental design and population dynamics will also be assessed by the thesis committee at that time.

Assessment Instruments: Theses committee members will be provided with an assessment form on which they can evaluate student performance in the above areas as excellent, very good, good, fair or poor.

Process of Collecting and Analyzing Data:

Data collection will be ongoing as students defend their thesis’. At the end of each academic year,(and before Commencement) a committee of graduate faculty, within the Agricultural area will evaluate the data and determine if any changes need to be made in the program's required courses, or if additional training may be needed in the area of writing, speaking, experimental design, statistical analysis or population biology.

Report of Assessment Data, Analysis of data and Recommended Changes
The above three categories listed above were evaluated by the students thesis committee as either Excellent level of competency, at a Very Good level of competency, Good level of competency, Fair Level of Competency or at a Poor level of competency. These rubrics were put into place and were utilized on three students who defended their Natural Resource Thesis's and graduated in 2018. Data will be analyzed and the program re-evaluated and changed if changes are indicated. There were 6 Natural Resources students who finished in the 2017-2018 academic year. (Amy Comer, Melanie Fuoco, Symone Johnson, Keith Leonard, Melanie Mancuoso and Petrina McKenzie-Reynolds)

Goals without Outcome/Objective Relationships Specified

G 1: Undergraduate written and oral competency

Students in Agriculture will be able to discuss, orally, or in writing, agricultural systems as they relate to either crop or animal cycles along with production practices involved in those systems.

G 2: Undergraduate analytical competency

Students in Agriculture will be able to analyze and recognize sustainable agricultural practices and compare and contrast them to practices that are not sustainable.

G 3: Undergraduate critical thinking competency

Students in Agriculture will be able to discuss plant and animals and the critical essential roles they play in the provision of food, fiber and other products to man and other living organisms.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1: Communication, inquiry and critical thinking competency

1 UG Student Learning Goal: Competent Communicators

2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 2: Successful completion of capstone course

Students in Capstone Course, Sustainable Agriculture will be able to successfully address issues of crop and animal cycles utilized in agricultural systems.
Source of Evidence: Capstone course assignments measuring mastery

**Target:**
Eighty percent of students will be assessed as satisfactory or better in their ability to describe ag systems.

**Findings (2016-2017) - Target: Met**
Target was met. According to instructor overall rating of student performance, one hundred percent of students were able to accurately describe both plant and animal systems utilized in agricultural production.

**M 3: Effective oral communication**

Oral communication ATC rubric: Assessment of students' abilities to orally discuss issues surrounding agriculture effectively.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
Eighty percent of students will be assessed as satisfactory or better in their ability to orally describe both plant and animal production.

**Findings (2016-2017) - Target: Met**
Oral communication was assessed in Soil Science in the Spring of 2017. Of the 24 students assessed all but one was evaluated to be satisfactory or above in their ability to communicate orally using the Across the curriculum Rubric. Soil Science is typically taken in the Sophomore or Junior year of the curriculum.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Continued monitoring of student oral and written communication skills**

*Established in Cycle: 2016-2017*
We will continue to assess student oral and written communication to ensure that student success in communication continues.

**SLO 2: Effective inquiry, critical thinking and independent learning skills**

2 UG Student Learning Goal: Effective inquirers, critical thinkers and problem solvers able to use appropriate quantitative and qualitative information.

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success.
**Relevant Associations:**

**DSU Learning Goal Associations:**
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 4: Student ability to identify and discuss sustainable practices**
Assessment of students in Capstone Course, (Sustainable Agriculture) to test their ability to identify and discuss sustainable practices. Student knowledge was gathered by the instructor through student discussions, writings, tests and participation in the course. Additionally students were rated using the Capstone rubric.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
Target: Eighty-five percent of students in the sustainable agriculture class will be able to recognize practices that are sustainable.

**Findings (2016-2017) - Target: Met**
Target was met as 96.6 percent of students in the sustainable agriculture class were observed to be able to recognize sustainable practices.

**M 5: Critical thinking and problem solving skills**
Assessment of students in the capstone class: Ability to use critical thinking and problem solving skills necessary to assess sustainable practices. This is assessed through the critical thinking/problems solving element of the Senior Capstone Rubric.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
Ninety percent of students in the capstone course will have satisfactory or better abilities to critically assess and problem solve sustainable practices.

**Findings (2016-2017) - Target: Met**
Target met. One hundred percent of the students assessed in the capstone course were determined to have satisfactory or better problem solving skills and critical thinking skills.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.
Continued assessment of sustainable practices knowledge

*Established in Cycle: 2016-2017*

Data will continue to be collected to assess student knowledge of sustainable practices as we continue to meet departmental goal...

**SLO 3: Effective use of quantitative and qualitative information**

2 UG Student Learning Goal: Effective inquirers, critical thinkers and problem solvers able to use appropriate quantitative and qualitative information.

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success.

**Relevant Associations:**

**DSU Learning Goal Associations:**

2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 6: Assess knowledge of plant and animal systems**

Assessment of students in the capstone course, Sustainable Agriculture) ability to use their knowledge of plant and animal systems and the role they play in enhancing human life. Data was collected in an instructor collected assessment based on student discussion, writing, test taking and participation in the Sustainable Agriculture course. Additionally, students were also assessed as part of the capstone experience with a rubric utilized to assess computer and information literacy in an across the curriculum assessment.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**

80 percent of students in Sustainable Agriculture will have a strong knowledge of how plants and animals provide the food, fiber and other products to man and other living organisms.

**Findings (2016-2017) - Target: Not Met**

Target not met. Only 65.5 percent of the students enrolled in the sustainable agriculture class had a strong knowledge of how plants and animals provided food fiber and other products to man and other living organisms. 34.5 percent of the students in the class ranked only fair in their assessment of this goal.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

Continue to assess student knowledge of plant and animal systems

*Established in Cycle: 2016-2017*

Data will continue to be collected to assess how we can meet any targets that were not met and to determine how to improve stude...

**M 7: Assess information literacy skills**
Assessment of students satisfactory information literacy skills as it relates to sustainable agriculture and their capstone experience.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
Seventy-Five percent of students will have satisfactory or better skill sets as they relate to information literacy as it relates to their capstone experience in sustainable agriculture.

**Findings (2016-2017) - Target: Met**
Target met. All 26 students (100 %) enrolled in Sustainable agriculture were assessed at the satisfactory level or above for the development of their information literacy skill sets.

**M 8: Assess computer competency skills**
Assessment of students computer competency skills as it relates to sustainable agriculture and their capstone experience.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
Seventy-Five percent of students will have satisfactory or better skill sets as they relate to computer literacy as related to their capstone experience in sustainable agriculture.

**Findings (2016-2017) - Target: Met**
Target met. All 26 students enrolled in Sustainable agriculture were assessed at the satisfactory level or above for the development of their computer competency skill set.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Continue to assess student knowledge of plant and animal systems**
*Established in Cycle: 2016-2017*
Data will continue to be collected to assess how we can meet any targets that were not met and to determine how to improve student knowledge of both plant and animal systems or production. Consideration will be given to further assess additional courses in the plant and animal sciences as we move forward. Since the target was not met with Measure 6, departmental discussions will be held to determine how we can better reach the set goal by enhancing student learning experiences in the area of how plants and animals enhance human life.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Continue to assess student knowledge of plant and animal systems**
Data will continue to be collected to assess how we can meet any targets that were not met and to determine how to improve student knowledge of both plant and animal systems or production. Consideration will be given to further assess additional courses in the plant and animal sciences as we move forward. Since the target was not met with Measure 6, departmental discussions will be held to determine how we can better reach the set goal by enhancing student learning experiences in the area of how plants and animals enhance human life.

**Established in Cycle:** 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Assess computer competency skills | Outcome/Objective: Effective use of quantitative and qualitative information
Measure: Assess knowledge of plant and animal systems | Outcome/Objective: Effective use of quantitative and qualitative information

Continued assessment of sustainable practices knowledge
Data will continue to be collected to assess student knowledge of sustainable practices as we continue to meet departmental goals.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Critical thinking and problem solving skills | Outcome/Objective: Effective inquiry, critical thinking and independent learning skills

Continued monitoring of student oral and written communication skills
We will continue to assess student oral and written communication to ensure that student success in communication continues.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Effective oral communication | Outcome/Objective: Communication, inquiry and critical thinking competency
Goals without Outcome/Objective Relationships Specified

G 2: Graduate student writing and speaking competency
Graduate students in Agriculture will demonstrate sound organizational, writing and speaking skills in preparation and presentation of their theses.

G 3: Graduate student research competency
Graduate students in Agriculture will be able to develop ideas and implement research projects to investigate and solve problems with plants or animals in providing solutions to the complexity of problems that are encountered in agricultural careers and professions.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Graduate student statistical competency
Graduate students in Agriculture will be able to demonstrate the principles of experimental design and statistical analysis in their projects.

SLO 1: Effective inquiry and critical thinking skills
Effective inquirers, critical thinkers and problem solvers able to use appropriate and qualitative information.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 1: no data collected
No data collected as there were no graduates in the 2016-2017 academic year in agriculture.

Source of Evidence: Performance (recital, exhibit, science project)
Target:
No data collected as there were no graduates in the 2016-2017 academic year in agriculture.

Findings (2016-2017) - Target: Not Reported This Cycle

No data collected as there were no graduates in the 2016-2017 academic year in agriculture.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Collect data next academic year.
Established in Cycle: 2016-2017

SLO 2: Writing and speaking competency
Writing and speaking competency

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 2: No data collected

No data collected as there were no graduates in the 2016-2017 academic year in agriculture

Source of Evidence: Performance (recital, exhibit, science project)

SLO 3: Research competency
Graduate student research competency

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Collect data next academic year.**
Collect data next academic year.

*Established in Cycle:* 2016-2017  
*Implementation Status:* Planned  
*Priority:* High

**Relationships (Measure | Outcome/Objective):**
*Measure:* no data collected | *Outcome/Objective:* Effective inquiry and critical thinking skills
Mission / Purpose

Delaware State University Applied Mathematics Research Center (AMRC) was initially funded by the Department of Defense (DoD) in 2003. AMRC is designed to create a research environment where multidisciplinary groups work together to solve applied mathematics problems in military and other areas. The research center consists of faculty of Mathematics, Computer Science, Electrical Engineering, and Biotechnology, research associates, visiting professors and an administrative assistant.

The vision of AMRC is to be one of the top applied mathematics research center in doing DoD research in the area of Ground Penetrating Radar Imaging, Video Surveillance and 3D Models involving students, particularly under-represented minority students.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Establish permanent research base at DSU.
To establish a permanent research base at Delaware State University which produces new knowledge and quality, publishable, peer-reviewed research relevant to Department of Defense (DoD) research goals.

O/O 1: Publications and grants

More grants received since AMRC was funded in 2003 with $4,000,000 funding from Department of Defense. Current grants include a $1.3 million grant from CDMRP DoD on Breast Cancer research; and a $2.8 million grant funded by Department of Defense under PIRT Center for Advanced Algorithms (CAA) which will end on August 31, 2017. We have an excellent record of publications. We plan to send more grant applications.

Related Measures:

M 1: Apply for more grants to support AMRC
Applied for several grants. We obtained a few grants after the initial DoD funding in 2003 including a $2.8 million funded grant from DoD in 2011 which will end on August 31, 2017.

Source of Evidence: Administrative measure - other

M 2: Recruit more minority students
Recruit more minority students for the program. Apply for more grants.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
More papers to be published.

**G 2: Enhance minority involvement in research.**
To enhance participation and substantial involvement of minority graduate and undergraduate students, and faculty in the areas of Science and Mathematics research.

**O/O 2: Number of minority students**
Number of minority students increased. Faculty research capability has been enhanced.

**Related Measures:**

**M 2: Recruit more minority students**
Recruit more minority students for the program. Apply for more grants.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
More minority students to be recruited.
**Goals without Outcome/Objective Relationships Specified**

**G 1:** To provide students with a balanced graduate level curriculum

To provide students with a graduate level curriculum of theory and practice in chemistry.

**G 2:** To provide students with a solid foundation in the theory of chemistry

To provide students with the foundation to develop successfully in their disciplines, perform in the workplace, professional programs, or in doctoral programs.

**G 3:** To provide research opportunities

To provide opportunities for advanced studies in applied chemistry in response to global needs in academia, industry, and government agencies.

**Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**O/O 1:** Students will have a comprehensive understanding of chemistry

Students will have a comprehensive understanding of chemistry and its relation to physics, mathematics, and the natural sciences

**Related Measures:**

**M 4:** GPA/Grades

A GPA of 3.0 with no more than 2 C’s while matriculating through the graduate program.

Source of Evidence: Benchmarking of learning outcomes against peers

**Target:**

Retention of all graduate students that meet this minimum requirement and to improve the quality of incoming students.

**Findings (2016-2017) - Target: Met**

All students met this academic criteria
Findings (2010-2011) - Target: Met

The objective was met since all students matriculated in the M.S. program and three new students were entered into the program.

M 5: Analytical & Critical Thinking
Students will exhibit proficiency in analytical reasoning and critical thinking.

Source of Evidence: Senior thesis or culminating major project

M 6: Exit Survey
Upon completion of program requirements students will participate in an exit survey/interview to assess student satisfaction.

Source of Evidence: Exit interviews with grads/program completers

Target:
All graduates students will exhibit comprehensive understanding of chemistry as exhibited by successful thesis completion

Findings (2016-2017) - Target: Met
All graduate students exhibited proficiency in knowledge and application of chemistry

O/O 3: Students will complete a thesis or comprehensive literature research
Students will complete a thesis utilizing comprehensive literature research.

Related Measures:

M 7: Oral Defense of Thesis
Oral defense of an appropriate thesis in a public presentation by the evaluation of faculty.

Source of Evidence: Presentation, either individual or group

M 8: Thesis Review/Presentation
Thesis: conduct research based thesis and oral presentation acceptable to graduate advisor.

Source of Evidence: Presentation, either individual or group

O/O 4: Students will maintain ongoing interactions with their research advisor
Students and research advisors will maintain successful mentor-mentee relationships

O/O 5: Students will develop and conduct original research
To develop and conduct original research that contributes to the theoretical and scholarly understanding in the scientific community
Mission / Purpose

The objectives of the graduate program in physics and optics aim at training future workforce and researchers in diverse fields of physics and optical sciences. Our educational activities are combined and integrated with our research focus, creating a stimulating and engaging environment for the students to achieve professional success and leadership status and opening opportunities to a highly demanding multidisciplinary market.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Graduates will be prepared for their professional carrier with required skills and knowledge

Prepare each graduate for success in professional careers in industry, research, government, or academia in the 21st century global society by providing them with necessary skills and knowledge in their area of study.

SLO 1: Students will learn the advance contents of their field of study

Students will learn the advance contents of their field of study needed to solve problems quantitatively using analytic and numerical methods to find their carriers in different organizations.

Relevant Associations:

DSU Learning Goal Associations:

2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Related Measures:

M 1: Midterms, Quizzes, Final Exams

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure
Source of Evidence: Writing exam to assure certain proficiency level

4. PHYS 803 Modern Laser Spectroscopic Methods  

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.
M 2: Student course evaluation
Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

- Student Survey of Outcomes based Assessment of classes MS Applied Optics SPRING 2012

---

**SLO 2: Students will engage in one or more research projects**

Students will engage in one or more research projects to learn laboratory techniques, research protocol, and appropriate behavior expected in a research environment by using instruments, computers and associated technologies.

---

**Relevant Associations:**

**DSU Learning Goal Associations:**
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success
- 5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.
- 7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

**Related Measures:**

**M 1: Midterms, Quizzes, Final Exams**

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

- List of Outcome based Assessment - MS App Optics Spring 2018
- Outcomes based Assessment of classes MS APPLIED OPTICS SPRING 2018

**Target:**

The class average of all the student learning outcomes should be > 3.00 in a scale of 5.00.

**Findings (2017-2018) - Target: Met**

The class average from the courses offered in Fall 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose: 1. PHYS 563 - Math Methods III, 2. Modern Optics, 3. PHYS 605 - Principles of lasers & Optical Devices, 4. PHYS 675 - Quantum Mechanics I

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The class average from the courses offered in Spring 2018 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.
Findings (2016-2017) - Target: Not Reported This Cycle
not reported in this cycle

Findings (2015-2016) - Target: Met

The class average from the courses offered in Spring 2016 semester (one which has this outcome fulfilled)

has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 667 Math Methods IV, 3. PHYS 676 Quantum Mechanics II, 4. PHYS 803 Modern Laser Spec Methods. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2014-2015) - Target: Met

Fall 2014: The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 671 Advanced Electromagnetic Theory I, 5. PHYS 803 Modern Laser Spec Method. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2013-2014) - Target: Met

Fall 2013: The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 675 Quantum Mechanics I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Spring 2014: The class average from the courses offered in spring 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 - Non Linear Optics, 2. PHYS 667 - Mathematical Methods IV, 3. PHYS 676 Quantum Mechanics II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.
**Findings (2012-2013) - Target: Met**

**Fall 2013**
The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 671 Advanced Electromagnetic Theory

The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

**Spring 2013**
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 672 Advanced Electromagnetic Theory II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**M 2: Student course evaluation**
Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

G 2: Graduates will be prepared to think critically to analyze and solve problems
Prepared each graduate to think critically to analyze and solve problems through research and/or course work.

SLO 3: Students will be able to integrate content knowledge and analytic thinking skills
Students will be able to integrate content knowledge and analytic thinking skills to collect, analyze and interpret a variety of problems and issues involving physical systems.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

The class average from the courses offered in Spring 2018 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.
**Findings (2016-2017) - Target: Met**

The class average from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 671 Advanced Electromagnetic Theory I. The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in spring 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 601 Non Linear Optics, 2. PHYS 665 Statistical Mechanics, 3. PHYS 667 - Mathematical Methods IV, 4. PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

**Findings (2015-2016) - Target: Met**

The class average from the courses offered in Fall 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 563 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 665 Statistical Mechanics, 5. PHYS 675 Quantum Mechanics I The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

**Findings (2014-2015) - Target: Met**

Fall 2014: The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 671 Advanced Electromagnetic Theory I, 5. PHYS 803 Modern Laser Spec Method. The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.
Findings (2013-2014) - Target: Met

Fall 2013: The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose. 1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 675 Quantum Mechanics I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2012-2013) - Target: Met

Fall 2012
The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose. 1. PHYS 565 Math Methods III 2. PHYS 600 Modern Optics 3. PHYS 605 Principles of Lasers & Optical Devices 4. PHYS 671 Advanced Electromagnetic Theory

The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

Spring 2013
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose. 1. PHYS 601 Non Linear Optics 2. PHYS 667 Math Methods IV 3. PHYS 672 Advanced Electromagnetic Theory II 4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

M 2: Student course evaluation
Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranging from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

- Student Survey of Outcomes MS Applied Physics Spring 2018
Target:
The student response of survey relating to the student learning outcomes
should be > 3.00 in a scale of 5.00.

Findings (2017-2018) - Target: Met

The average of the student response relating to the understanding of the
subject matters from the course offered in Fall 2017 semester (one
which has this outcome fulfilled) have been taken into account. This was
done as part of indirect measurement. Below are the courses which have
been used for this purpose:

1. PHYS 563 - Math Methods III, 2. Modern Optics, 3. PHYS 605 -
   Principles of lasers & Optical Devices, 4. PHYS 675 - Quantum
   Mechanics I

The class average of this student learning outcome was found to be 4 in
a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the
subject matters from the course offered in Spring 2018 semester (one
which has this outcome fulfilled) have been taken into account. This was
done as part of indirect measurement. Below are the courses which have
been used for this purpose.

1. PHYS 601 - Non Linear Optics, 2. PHYS 665 - Statistical Mechanics,
   3. PHYS 667 - Math Methods IV, 4. PHYS 676 - Quantum Mechanics II,

The class average of this student learning outcome was found to be 5 in
a scale of 5. Please see attached documents for details.

Findings (2016-2017) - Target: Met

The average of the student response relating to the understanding of the
subject matters from the courses offered in Fall 2016 semester (one

Findings (2014-2015) - Target: Met

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods I & II, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 671 Advanced Electromagnetic Theory I, 5. PHYS 803 Modern Laser Spec Method. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.
**Findings (2013-2014) - Target: Met**

**Fall 2013:** The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 675 Quantum Mechanics I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2014:** The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2014 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. PHYS 601 - Non Linear Optics, 2. PHYS 667 - Mathematical Methods IV, 3. PHYS 676 Quantum Mechanics II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2012-2013) - Target: Met**

**Fall 2012**
The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. PHYS 565 Math Methods III 2. PHYS 600 Modern Optics 3. PHYS 605 Principles of Lasers & Optical Devices 4. PHYS 671 Advanced electromagnetic Theory The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

**Spring 2013**
The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. PHYS 601 Non Linear Optics 2. PHYS 667Math Methods IV 3. PHYS 672 Advanced Electromagnetic Theory II 4. PHYS 803 Modern Laser Spectroscopic Methods
The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 665 Statistical Mechanics
5. PHYS 675 Quantum Mechanics I

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 601 Non Linear Optics Math Methods III
2. PHYS 667 Mathematical Methods IV
3. PHYS 676 Quantum Mechanics II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**G 3:** Graduates will be prepared with broad-based knowledge and communication skills
Produce graduates that have the broad-based knowledge and communication skills needed for success in the global society.

**SLO 5:** Students will be capable of effectively communicating the results of their studies
Students will be capable of effectively communicating the results of their studies in a variety of formats, including written reports, poster presentations, and PowerPoint-like presentations to communicate orally with peers as colleagues in the scientific community using appropriate language skills and professional vocabulary.

**Relevant Associations:**

**DSU Learning Goal Associations:**

1. UG Student Learning Goal: Competent Communicators
2. 6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.

**Related Measures:**

**M 1: Midterms, Quizzes, Final Exams**

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level.

1. PHYS 601 Non Linear Optics, 2. PHYS 667 Math Methods IV, 3. PHYS 676 Quantum Mechanics II, 4. PHYS 803 Modern Laser Spectroscopy Methods. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2014-2015) - Target: Met**

Fall 2014: The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 671 Advanced Electromagnetic Theory I, 5. PHYS 803 Modern Laser Spectroscopy Method. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Spring 2015: The class average from the courses offered in spring 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

1. PHYS 667 - Mathematical Methods IV, 2. PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2013-2014) - Target: Met**

**Fall 2013**: The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 675 Quantum Mechanics I. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.
**Spring 2014:** The class average from the courses offered in spring 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:
1. PHYS 601 - Non Linear Optics
2. PHYS 667 - Mathematical Methods IV
3. PHYS 676 Quantum Mechanics II

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

---

**Findings (2012-2013) - Target: Met**

The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 565 Math Methods III
2. PHYS 600 Modern Optics
3. PHYS 605 Principles of Lasers & Optical Devices
4. PHYS 671 Advanced Electromagnetic Theory

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

---

**Spring 2013**

The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. PHYS 601 Non Linear Optics
2. PHYS 667 Math Methods IV
3. PHYS 672 Advanced Electromagnetic Theory II
4. PHYS 803 Modern Laser Spectroscopic Methods

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

---

**M 2: Student course evaluation**

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 10 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment. The response was normalized (converted) to a scale of 5.

Source of Evidence: Student course evaluations on learning gains made

**Connected Documents**
- Student Survey of Outcomes MS Applied Optics FALL 2017
- Student Survey of Outcomes MS Applied Physics Spring 2018
Target:
The student response of survey relating to the student learning outcomes should be > 3.00 in a scale of 5.00.

Findings (2017-2018) - Target: Met

The average of the student response relating to the understanding of the subject matters from the course offered in Fall 2017 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the subject matters from the course offered in Spring 2018 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 5 in a scale of 5. Please see attached documents for details.

Findings (2016-2017) - Target: Met

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 565 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 671 Advanced Electromagnetic Theory I. The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2017 semester (one which has this outcome fulfilled) have been taken into account. This was
done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 601 Non Linear Optics, 2. PHYS 665 Statistical Mechanics, 3. PHYS 667 - Mathematical Methods IV, 4. PHYS 672 Advanced Electromagnetic Theory II. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2015-2016) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2015 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. PHYS 563 Math Methods III, 2. PHYS 600 Modern Optics, 3. PHYS 605 Principles of Lasers & Optical Devices, 4. PHYS 665 Statistical Mechanics, 5. PHYS 675 Quantum Mechanics I The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2016 semester (one which has this outcome fulfilled) have been taken into account. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Direct Measurement of SLOs**

1. An Assessment committee has been formed (a total of six faculty members and Department Assistant Ms. Amal Juracka) to coordinate the assessment process of the Department. The committee is chaired by Dr. Mukti M Rana, an Assistant Professor in the Department of Physics and Pre-Engineering. 2. In the Fall of 2011, the committee prepared the syllabi of all the courses for various degree programs of the department. The syllabi were based on a uniform format which has the catalog description of the course, learning outcomes of the course and relationship of the learning outcomes of the course with the student learning outcomes (SLO) of the program which it belongs to, among others. The instructor of the course makes sure that the prepared course syllabus complies with his view. 3. For each of the courses which belongs to a particular program, the teaching faculty will turn the course report. 4. The cover page of a sample course report is attached here. It will contain the sample tests, syllabus, quizzes, labs etc among others. 5. The course report will provide the measure of the student learning outcomes which a course would belong to. The SLOs will be prepared from the average of the student student's performance in the entire test criterion (for instance tests, finals, quizzes and/or homework, labs if any instructor wants to add it as part of assessment). This average is linked to the course learning outcomes and hence
to the SLOs. 6. Course report for each of the courses offered for a particular degree program will be turned in by the faculty within one week of semester ending. 7. The average all the SLOs are then determined from each individual courses. This average number will serve as the indicator of student performance in a degree program. Sample syllabus, course report cover page and assessment of SLOs for a course is attached here.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High  

**Responsible Person/Group:** 1. Teaching Faculty 2. Assessment Committee

**Student feedback form will be used as indirect measurement**

An Assessment committee has been formed (a total of six faculty members and Department Assistant Ms. Amal Juracka) to coordinate the assessment process of the Department. The committee is chaired by Dr. Mukti M Rana, an Assistant Professor in the Department of Physics and Pre-Engineering.

2. In the Fall of 2011, the committee prepared the syllabi of all the courses for various degree programs of the department. The syllabi were based on a uniform format which has the catalog description of the course, learning outcomes of the course and relationship of the learning outcomes of the course with the student learning outcomes (SLO) of the program which it belongs to, among others. The instructor of the course makes sure that the prepared course syllabus complies with his view.

3. A survey questionnaire has been prepared for each of the courses. These questions are same as learning outcomes of the course.

4. At the end of the semester, the students are asked to fill out their response relating to the understanding of the subject matter covered. They response should be in the scale of 1-10 with 1 being the lowest and 10 being the lowest.

5. The average of the response was determined and linked with the SLO's of the program and that number gives the final indirect measurement of student assessment.

6. Sample feedback form is attached here

**Established in Cycle:** 2010-2011  
**Implementation Status:** Finished  
**Priority:** High  

**Additional Resources Requested:** 1. Teaching faculty members 2. Assessment committee
Mission / Purpose

The purpose of the Art Department is to provide high quality artistic preparation and cultural enrichment for our majors, elementary education majors, and other university students who elect to enroll in courses as a part of satisfying their humanities requirements. The Department is an important arts resource for the University and community.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Support and Strengthen the Department of Art
Support and Strengthen the Department of Art, as well as the activities and services provided by Delaware State University

O/O 1: Develop a community of scholars
Develop a community of scholars with talent and expertise that will garner regional and national recognition

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University

Related Measures:

M 1: Percentage of students participating in scholarly activities

Percentage of students participating in scholarly activities (ie. admission to M.F.A. programs, admittance into Honors Art Exhibition).

Source of Evidence: Activity volume

Target:
80% of students submit and get acceptance into Honors Exhibition.
50% of graduating studio art majors gain acceptance into M.F.A programs.

Findings (2008-2009) - Target: Partially Met test
G 2: Provide high quality instruction
Provide high quality instruction which meets the needs of all majors within the Department of Art, and the General Education Requirements for all non-majors

O/O 2: Address urgent need for facilities
Address urgent need for facilities for each department to meet the demand for all classes

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
  2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors

Related Measures:

M 4: Faculty end-of-semester reviews
Faculty end-of-semester reviews
Source of Evidence: Capstone course assignments measuring mastery

Target:
Faculty will collectively review student progress after sophomore year, based on art work created, level of accomplishment, and journal review.

M 5: Faculty assessment of test results from blackboard, adjustment of on-line tests
Faculty assessment of test results from blackboard, adjustment of on-line tests
Source of Evidence: Administrative measure - other

Target:
individual and collective review of on-line assessments and adjustment of questions and or answers based on student success rate on each answer.

Findings (2009-2010) - Target: Partially Met
adjustment of questions in some common tests, and re-wording of some answers in m-choice questions to align with success rate target for Intro to Art students in General Education Program.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Intro to Art assessment review
Established in Cycle: 2009-2010
review common assessments results for all Intro to Art Class Sections to ensure success rate is consistent for all sections.
M 6: Review existing facilities, research best practices and updated equipment and facilities
Review existing facilities, research best practices and updated equipment and facilities

Source of Evidence: Administrative measure - other

Target:
search for available funding sources to update equipment needed for each studio area. ongoing evaluation of current equipment status, and needed equipment for future. Review student outgoing questionnaire(s) for reliable feedback as it relates to preparation of current job skills and experience while at DSU.

G 3: Create a model of scholarly faculty research
Create a model of scholarly research for all full time faculty.

O/O 3: Obtain qualified faculty
Obtain qualified content specific faculty (Ph.D., Ed.D, D.M.A, M.F.A.)

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
3 Create a model of scholarly research for all full time faculty.
Delaware State University
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement
1.5 Recruit and retain outstanding and engaged faculty

Related Measures:

M 7: Faculty art production and shows, publications, peer reviewed publications, presentations at conferences.
Faculty art production and shows, publications, peer reviewed publications, presentations at conferences.

Source of Evidence: Presentation, either individual or group

M 8: Initiate national searches to fill vacancies within department and to fill much needed voids
Initiate national searches to fill vacancies within department and to fill much needed voids

Source of Evidence: Administrative measure - other

O/O 4: Promote a culture of faculty research
Promote a culture of research in the social sciences and exhibition of works in the humanities
Relevant Associations:

Strategic Plan Associations:

College of Arts, Humanities, & Social Sciences

3 Create a model of scholarly research for all full time faculty.

G 4: Implement effective assessment criteria

Implement effective assessment criteria in each of the content areas within the Art Department.

O/O 5: Examine existing programs

Examine existing programs to make them more efficient and effective

Relevant Associations:

Programs will be reviewed this spring, 2017. arts management no longer offered, teach out in place until 2019 (all existing students scheduled to graduate by that date)

Strategic Plan Associations:

College of Arts, Humanities, & Social Sciences

4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region

Related Measures:

M 9: Assessment of department issues and curriculum

Assessment of department issues and curriculum. Now that two programs have been deactivated, we are in process of evaluating ones that are left. All curriculum will be reviewed for changes and enhancements to correlate with presidents vision for internship opportunities in all programs.

Source of Evidence: Administrative measure - other

M 10: Establish assessment tools for all areas

Establish assessment tools for all areas

Source of Evidence: Administrative measure - other

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Intro to Art assessment review

Review common assessments results for all Intro to Art Class Sections to ensure success rate is consistent for all sections.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
  Measure: Faculty assessment of test results from blackboard, adjustment of online tests | Outcome/Objective: Address urgent need for facilities

Implementation Description: have faculty go into blackboard and download question results for each assessment, and review as gen. ed team for Intro to Art
Responsible Person/Group: Gen Ed. liason for intro to Art
Budget Amount Requested: $0.00 (no request)

review programs still offered after deactivation from PPI
reviewing the remainder programs since PPI deactivation. develop and implement internship opportunities for all students in department, to align with president Williams vision for internships.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High
Implementation Description: review existing program(s), and add class that will give all students opportunity to go out in field of choice.
Responsible Person/Group: existing faculty and gallery staff
Goals without Outcome/Objective Relationships Specified

G 1: content proficiency
   Students will be proficient in the content area.

G 2: technologically literate in content area
   Students will be technologically literate in the content area

G 4: effective communicators
   Students will effectively communicate their knowledge of the discipline.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 3: analysis of art
   Students will demonstrate analytical and critical thinking abilities in the content area.

SLO 1: integrate course content within DBAE

   1.3 Students will be able to integrate course content with the four components of Disciplined Based Art Education (art history, studio methods, aesthetic discourse and art criticism).

Relevant Associations:

DSU Learning Goal Associations:
   2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

DOE: 7.1, 7.2

The role of Visual Art in Community and Schools

PEU/NCATE: 1, 5
DOE: 1.7, 11.1
11.6

Displays little or no understanding of the value of visual art in multiple contexts.

Clearly identifies the connection between visual art and the community and is involved in collaborations in multiple contexts.

Always willing to work with colleagues and professionals, and attend art shows in order to be involved and collaborate with the community leaders. Recognize the existence of art in multiple contexts.

PEU/NCATE: 1, 5
DOE: 12.1, 12.2, 13.1, 13.3, 14.5

Reflection and Professional Development

Participates in university activities, active in professional organizations, and maintains a professional resume.

Participates in seminars, and university activities, active in professional organizations, and presentations, identifies current trends in art education, and maintains a professional resume.

Participates in seminars, and university activities, active in professional organizations, and presentations. Continually researches current trends in art education and collects relevant resources, and maintains a professional resume.

**SLO 7: competent practitioners of Art Instruction**
13 standards to meet with NCAte
**Mission / Purpose**

Mission: Delaware State University’s Arts Center/Gallery (ACG) brings to the University community and the community-at-large a variety of cultural and educational exhibits and events that promote excellence in the arts and humanities. The ACG and accompanying programs (VSA Delaware, Scholastics Art and Writing Awards and Congressional Art Awards) play an important role in arts education processes in schools and community settings throughout the state of Delaware. The mission of the ACG is to schedule educational experiences that bring new ideas and art forms to various audiences; broaden the interpretation of our multicultural heritage; and promote access to the arts for all audiences.

ACG Vision: Delaware State University’s Arts Center/Gallery (ACG) and accompanying programs (VSA Delaware and the Scholastics Art and Writing Awards) will be recognized as an integral educational resource for the University community, K-12 schools, special audiences and the arts communities throughout the state.

The ACG mission statement is directly related to the DSU mission statement that dictates the university's mission to "emphasize both the liberal and professional aspects of higher education" and to "serve a diverse student population with a broad range of programs in instruction, service and research."

The ACG vision is directly related to the DSU vision statement that dictates the University's plans to develop arts based University programs as well as cultivate relationships in the arts throughout the state.

**Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**G 1:** Increase participation in ACG events.
Increase administration, faculty, student and community-at-large (including special audiences) participation in ACG events and related programs.

**O/O 1:** Promote and market ACG to University.
Appropriately promote and market current ACG events and related programs through all University based resources.

**Relevant Associations:**

**Strategic Plan Associations:**

College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

Related Measures:

M 1: Monitor attendance and participation.

The ACG will monitor attendance and involvement at ACG events, as well as for related programs including VSA arts of Delaware and the Scholastic Art Awards programs.

Source of Evidence: Activity volume

Target:
The ACG will demonstrate a 20% increase in attendance/participation at ACG events by the University community. The Department of Art will not be included in this measurement.

Findings (2015-2016) - Target: Met
The ACG continues to have strong related programs (VSADE, Scholastics and NAP) that do provide broad based programming and serve diverse populations. These outreach services have active participation and have lead to increased community-at-large involvement with the ACG. However, attendance and participation at ACG events by the DSU community needs continued attention. Student attendance at ACG events and interactions with exhibit materials did increase slightly during the reporting year. DSU community attendance (other than students) did not increase.

Findings (2014-2015) - Target: Met
The ACG continues to have strong related programs (VSADE, Scholastics and NAP) that do provide broad based programming and serve diverse populations. These outreach services have active participation and have lead to increased community-at-large involvement with the ACG. However, attendance and participation at ACG events by the DSU community needs continued attention. Student attendance at ACG events and interactions with exhibit materials did increase slightly during the reporting year. DSU community attendance (other than students) did not increase.

Findings (2013-2014) - Target: Partially Met
The ACG has strong related programs (VSADE and Scholastics) that continue to provide broad based programming and serve special populations. These outreach services have active participation and have lead to increased community-at-large involvement with the ACG. Currently attendance and participation at ACG events still needs continued attention. Student attendance at ACG events and interactions with exhibit materials did increase slightly during the reporting year. DSU community attendance (other than students) did not increase.

Findings (2009-2010) - Target: Partially Met
The ACG has strong related programs (VSADE and Scholastics) that do
provide broad based programming and serve special populations. These outreach services have active participation and have lead to increased community-at-large involvement with the ACG. Currently attendance and participation at ACG events needs continued attention. Student attendance at ACG events and interactions with exhibit materials did increase during the reporting year. DSU community attendance (other than students) did not increase.

M 2: Survey ACG participants

Survey ACG participants to determine best marketing venues and related resources. Survey ACG participants to determine possible barriers to increased participation.

Source of Evidence: Service Quality

**Target:**
The ACG will survey current event participants to determine marketing venues, related resources and possible barriers to increased participation. Analysis of survey's will lead to development of strategic plan.

Continued feedback from ACG participants will provide information on the best marketing venues to implement within the University system as well as within the community-at-large.

**Findings (2015-2016) - Target: Partially Met**
Continued feedback from ACG participants will detail barriers to increased participation and provide a framework for improving the ACG's participation. There is still much need for a plan for greater access for individuals with disabilities. The community-at-large has documented that poor parking conditions and limited accessibility are barriers to attending ACG events.

**Findings (2014-2015) - Target: Partially Met**
Reassessment of marketing tools and different venues will need to be continually explored during FY 2016. Continued feedback from ACG participants will detail barriers to increased participation and provide a framework for improving the ACG's participation. There is still much need for a plan for greater access for individuals with disabilities. The community-at-large has documented that poor parking conditions and limited accessibility are barriers to attending ACG events.

**Findings (2013-2014) - Target: Partially Met**
It has been determined that DSU E-News is marginally successful as a marketing tool for ACG events and exhibits. Posters and direct mailings are also only marginally successful marketing tools for the DSU community. However, these print materials have been effective with reaching the community-at-large. The ACG is exploring email list-serves and Social Media. The ACG now has a social media presence.

Reassessment of marketing tools and different venues will need to be
continually explored during FY 2015. Continued feedback from ACG participants will detail barriers to increased participation and provide a framework for improving the ACG’s participation. There is still much need for a plan for greater access for individuals with disabilities. The community-at-large has documented that poor parking conditions and limited accessibility are barriers to attending ACG events.

**Findings (2009-2010) - Target: Not Met**

It was determined that DSU E-News is marginally successful as a marketing tool for ACG events and exhibits. Posters and direct mailings are also marginally successful marketing tools for the DSU community. However, these print materials have been effective with reaching the community-at-large. Current marketing tools are not as effective as necessary and are not reaching specific populations. Reassessment of marketing tools and different venues will need to be explored during FY2011.

Continued feedback from ACG participants will detail barriers to increased participation and provide a framework for improving the ACG’s participation. There is still much need for a plan for greater access for individuals with disabilities. The community-at-large has documented that poor parking conditions and limited accessibility are barriers to attending ACG events.

**O/O 2: Promote and market ACG events to community.**

Appropriately promote and market ACG events and related programs to surrounding communities, arts organizations and other educational facilities.

**Relevant Associations:**

**Strategic Plan Associations:**

**College of Arts, Humanities, & Social Sciences**

1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University

4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region

**Related Measures:**

**M 1: Monitor attendance and participation.**

The ACG will monitor attendance and involvement at ACG events, as well as for related programs including VSA arts of Delaware and the Scholastic Art Awards programs.
Source of Evidence: Activity volume

**Target:**
The ACG will demonstrate a 15% increase in attendance/participation at ACG events by the community-at-large.

**Findings (2015-2016) - Target: Partially Met**
The ACG continues to have strong related programs (VSADE, Scholastics and NAP) that do provide broad based programming and serve diverse populations. These outreach services have active participation and have lead to increased community-at-large involvement with the ACG. However, attendance and participation at ACG events by the DSU community needs continued attention. Student attendance at ACG events and interactions with exhibit materials did increase slightly during the reporting year. DSU community attendance (other then students) did not increase.

**Findings (2014-2015) - Target: Partially Met**
The ACG continues to have strong related programs (VSADE, Scholastics and NAP) that do provide broad based programming and serve diverse populations. These outreach services have active participation and have lead to increased community-at-large involvement with the ACG. However, attendance and participation at ACG events by the DSU community needs continued attention. Student attendance at ACG events and interactions with exhibit materials did increase slightly during the reporting year. DSU community attendance (other then students) did not increase.

**Findings (2013-2014) - Target: Partially Met**
The ACG has strong related programs (VSADE and Scholastics) that continue to provide broad based programming and serve special populations. These outreach services have active participation and have lead to increased community-at-large involvement with the ACG. Attendance and participation at ACG events needs continued attention. Student attendance (Department of Art AND other Departments) at ACG events and interactions with exhibit materials did increase during the reporting year. DSU community attendance (other then students) did not increase. Community-at-large attendance at ACG events marginally increased.

**Findings (2009-2010) - Target: Partially Met**
The ACG has strong related programs (VSADE and Scholastics) that do provide broad based programming and serve special populations. These outreach services have active participation and have lead to increased community-at-large involvement with the ACG. Currently attendance and participation at ACG events needs continued attention. Student attendance at ACG events and interactions with exhibit materials did increase during the reporting year. DSU community attendance (other then students) did not increase. Community-at-large attendance at ACG events marginally increased.

**M 2:Survey ACG participants**
Survey ACG participants to determine best marketing venues and related
resources. Survey ACG participants to determine possible barriers to increased participation.

Source of Evidence: Service Quality

**Target:**
The ACG will survey current event participants to determine marketing venues, related resources and possible barriers to increased participation. Analysis of survey's will lead to development of strategic plan.

**Findings (2015-2016) - Target: Partially Met**
The ACG will prioritize a process for evaluation of event participants to determine marketing venues, related resources and possible barriers to increased participation. Information will be used to further develop ACG outreach.

**Findings (2014-2015) - Target: Not Met**
The ACG will prioritize a process for evaluation of event participants to determine marketing venues, related resources and possible barriers to increased participation. Information will be used to further develop ACG outreach.

**Findings (2013-2014) - Target: Not Met**
The ACG will survey current event participants to determine marketing venues, related resources and possible barriers to increased participation. Analysis of survey's will lead to development of strategic plan.

**G 2: Develop ACG events to support needs.**
Support, strengthen and evaluate ACG events and related programs to reflect diversified programming that meets the needs of the University community and underserved communities.

**O/O 3: Develop ACG related programs.**
Continue development of ACG related programs that serve special populations and underserved communities.

**Relevant Associations:**

**Strategic Plan Associations:**
- College of Arts, Humanities, & Social Sciences
  1. Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
  4. To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region

**Related Measures:**

**M 2: Survey ACG participants**
Survey ACG participants to determine best marketing venues and related resources. Survey ACG participants to determine possible barriers to increased participation.
Source of Evidence: Service Quality

**Target:**
The ACG will survey ACG participants to assess ACG related programs.

**Findings (2015-2016) - Target: Not Reported This Cycle**
Not reported in this cycle.

**O/O 4: Build advisory committee.**
Develop plan for the development of an ACG Advisory Committee.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

**Related Measures:**

**M 3: Needs Assessment.**
Conduct needs assessment survey with various audiences to determine ACG and potential audience needs.

Source of Evidence: Evaluations

**Target:**
The ACG will re-establish an Advisory Committee

**Findings (2015-2016) - Target: Not Reported This Cycle**
During the 2015-2016 reporting year the ACG did establish an Advisory Committee. This committee is tasked with evaluating future ACG programming and planning exhibit schedule in coordination with the ACG Director.

**Findings (2014-2015) - Target: Partially Met**
The process for establishing an Advisory Committee was started.

**G 3: Enhance ACG administrative capacity.**
Enhance the administrative and management effectiveness and performance of ACG personnel.

**O/O 5: Build ACG staff capacity.**
Increase the productivity of ACG administration through increased staff capacity and resources.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Arts, Humanities, & Social Sciences

4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region

**Related Measures:**

**M 3: Needs Assessment.**
Conduct needs assessment survey with various audiences to determine ACG and potential audience needs.

Source of Evidence: Evaluations

**Target:**
The ACG will continue to investigate building staff capacity.

**Findings (2015-2016) - Target:** [Not Reported This Cycle](#)
Not reported this cycle.

**G 4: Improve ACG facility.**
Improve the appearance, accessibility and functionality of the ACG.

**O/O 6: Maintain ACG environment.**
Secure resources for regular maintenance of the ACG environment and equipment.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region

**Related Measures:**

**M 3: Needs Assessment.**
Conduct needs assessment survey with various audiences to determine ACG and potential audience needs.

Source of Evidence: Evaluations

**Target:**
The ACG will assess the ACG environment and determine a prioritized list of necessary repairs and improvements.

**Findings (2015-2016) - Target:** [Not Reported This Cycle](#)
Not reported this cycle.

**O/O 7: Improve cultural access.**
Continue to prioritize cultural access by providing a fully accessible pathway, entrance and programming for the ACG. Develop long-range cultural access plan and initiatives for the ACG as well as DSU events.

**Relevant Associations:**
Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region

Related Measures:

M 2: Survey ACG participants
Survey ACG participants to determine best marketing venues and related resources. Survey ACG participants to determine possible barriers to increased participation.

Source of Evidence: Service Quality

Target:
The ACG will survey participants to assess barriers to cultural accessibility for all visitors.

Findings (2015-2016) - Target: Not Reported This Cycle
Not reported this cycle.

O/O 8: Increase technology capacity.
Develop a plan for improving ACG technology and equipment to meet immediate, as well as long-term needs.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

Related Measures:

M 2: Survey ACG participants
Survey ACG participants to determine best marketing venues and related resources. Survey ACG participants to determine possible barriers to increased participation.

Source of Evidence: Service Quality

Target:
The ACG will survey event participants to determine technology needs.
Findings (2015-2016) - Target: Not Reported This Cycle
Not reported this cycle.

G 5: Develop ACG relationships.
Develop the ACG as an interactive resource for the Department of Art, College of Arts, Humanities and Social Sciences, DSU Community and the Community-at-large.

O/O 9: Increase internship opportunities.
Continue to increase student participation in Arts Management Internship opportunities, both gallery and community.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

Related Measures:

M 3: Needs Assessment.
Conduct needs assessment survey with various audiences to determine ACG and potential audience needs.

Source of Evidence: Evaluations

Target:
The ACG will access current internship opportunities and determine future programmatic goals.

**Executive Summary (1-2 pages)**

The Arts Center/Gallery (ACG) provides a necessary educational resource for the University community and the community-at-large. Through exhibits, performances and related program (VSA Delaware, Scholastics Art Awards, National Art Program and the Congressional Art Awards) activities and accomplishments, the ACG has proven its role
as a cultural resource for University programs, cultivating relationships with other arts and education organizations and providing programming to underserved populations.

Significant ACG accomplishments for the reporting year are as follows:
Presentation of At the Altar: From the Fruit of My Love and Labor, an art exhibition featuring installation artwork by mixed-media artist Amber Robles-Gordon. The related event, an evening with the artist, was held on October 12, 2017.

Significant outreach to K-12 education communities through ACG related program, VSA Delaware (VSADE). The VSADE Artist-in-Residency program provided arts education instruction to children with disabilities in all three counties, four school districts, twenty-one sites and forty-seven classrooms. The VSADE Performing Arts Program targeted transitional age students and provided school to work transition skill development.

Extensive exhibition schedule throughout the state of VSADE exhibits Celebration of Creativity 2017 (artwork created by individuals with disabilities). VSADE Celebration of Creativity 2017 & 2018 performances and receptions were attended by VSADE participants (individuals with disabilities), the education community, as well as the community-at-large.

Participation of over thirty schools, eighty-four art educators and 709 students in the annual Delaware Regional Scholastic Art & Writing Awards. Over 450 individuals attended the Scholastic annual exhibition and awards presentation. At the National Scholastics competition the Delaware Region submissions received one American Vision awards, six Gold Medal Awards and eight Silver Medal awards.

Coordination of the Delaware Congressional Art Awards program for the office of Congresswoman Lisa Blunt Rochester. The ACG convened a jury for the selection of artwork to represent Delaware’s Congressional District in the House of Representatives. Congresswoman Rochester presented the award (via video) at the ACG’s annual Scholastics event.

The ACG and related programs partnered with over ninety-five organizations, schools, corporations and businesses throughout the state of Delaware.

Unit(s) Profile
Personnel:

1. Jennifer Gunther: Arts Center/Gallery Director, VSA Delaware Executive Director, Scholastics Arts Regional Program Director, Congressional Art Awards Coordinator, Adjunct Faculty Department of Art.

Related Programs/Centers:

1. VSA Delaware
2. Regional Scholastics Arts Program
3. National Art Program
4. Congressional Art Awards

Unit(s) Initiatives accomplished in this cycle
The Arts Center/Gallery (ACG) provided a new series of exhibits during the reporting year. The ACG schedule includes annual exhibits and programs, as well as temporary traveling exhibits and visiting artists. The following is a detailed list of the ACG exhibits during the reporting year.
1. Department of Art Spring Senior Capstone Exhibit: April 24 - May 5, 2017, Reception April 27, 2017. This exhibit represents the culminating works of spring graduation candidates (four students) from the Department of Art. The students worked for the period of one semester preparing artwork and designing the exhibition.

2. VSA Delaware Celebration of Creativity 2017: May 15 - June 16, 2017, Community Reception May 24 and 31, 2017. This exhibition is the visual artwork produced by the various VSADE residency projects occurring throughout the state.

4. Department of Art Fall Senior Capstone Exhibit: November 28 - December 12, 2076, Reception December 7, 2017. This exhibit represented the culminating works of winter graduation candidates (two students) from the Department of Art. This students worked for the period of one semester preparing artwork and designing the exhibition.

5. Scholastic Art Awards: January 16 - February 10, 2018, Reception February 10, 2018. See below for more program information on the ACG Scholastics Program.

6. National Arts Program: February 26 - March 19, 2018, Award Ceremony March 18, 2018. This exhibit was held in partnership with the Delaware Division of the Arts and the Office of the Governor. The juried exhibit presented artwork by state of Delaware employees.

7. Department of Art Student Honors Exhibit: March 27 - April 20, 2017, Reception April 20, 2017. This is an annual exhibit that reflects the accomplishments of current Department of Art students. The exhibit is held in conjunction with Honors Day.

8. Department of Art Spring Senior Capstone Exhibits: April 23 - May 4, 2018, Reception April 26, 2018. This exhibit represents the culminating works of spring graduation candidates (nine students) from the Department of Art. The students worked for the period of one semester preparing artwork and designing the exhibition.

9. VSA Delaware Celebration of Creativity 2018: May 16 - June 15, 2018, Community Reception May 23, 2018. This exhibition is the visual artwork produced by the various VSADE residency projects occurring throughout the state.

The ACG also hosted the following events in the Gallery during the reporting year.
1. Various University program events.
2. Various University committee meetings.
3. Art Educators of Delaware meetings.
4. VSA Delaware Board of Directors meetings.
5. VSA Delaware Artist Training seminars.
6. State of Delaware Arts Council
7. Delaware Division of the Arts

Related ACG Programs
VSA Delaware (VSADE): VSADE is a non-profit arts education organization "sheltered" by the ACG. As an affiliated organization, VSADE is part of a network of over forty-three states and seventy-six international countries. VSA National is affiliated with the Kennedy Center for the Performing Arts so as to better share resources and network opportunities. The VSADE office is located in the ACG and provides programming throughout the state of
Delaware.

VSADE is dedicated to providing educational opportunities through the arts for children and adults with disabilities. The organization believes in the Vision of an inclusive community, Strength in shared resources and the Artistic expression that unites us all. To support these goals VSADE provides: artist-in-residency projects; art training support awards, arts-based educational resource development; veteran's administration arts projects; disability awareness and advocacy.

VSADE programs provide a variety of services that facilitate the development of successful and accessible creative projects that support the integration of various education curriculums, life-long learning experiences, the development of self-worth and creativity, as well as involved and committed community interactions. VSADE recognizes the need for children and adults with disabilities to be provided with opportunities to participate and achieve in the areas of performing and visual arts. The organization's Artist-in-Residence (AIR) program provides unique opportunities for children and adults with disabilities, in school and community settings and inclusion sites, to benefit in a multitude of ways from working with and receiving arts education training from professional artists and educators. A school AIR project might provide visual arts, music or theater experiences. Residency services provide arts instruction to students with disabilities that otherwise would not receive arts education experiences. In addition, to ensure quality programming, VSADE provides training for all program facilitators/artists in a variety of areas ranging from adaptability to arts standards to accessibility law.

To further facilitate VSADE’s mission, the organization works diligently to provide an understanding of the importance of accessibility to the arts for all individuals. The annual Celebration of Creativity (COC) exhibit shares the value of the artistic process and communicates the importance of all students and adults having access to the arts. As well, VSADE’s cultural access advocacy program shares the need and importance for making the arts accessible to all individuals, audiences and communities. Cultural Access is the process that ensures both physical and programmatic access to the arts for everyone. VSADE is recognized by the Delaware Division of the Arts and other state arts organizations as a resource for cultural access processes and initiatives.

Please see the Community Outreach section of this report for a complete list of VSADE AIR project sites and VSADE exhibit sites.

**Scholastic Arts & Writing Awards:** Scholastics is a longstanding ACG program and DSU is the regional sponsor for this statewide competition. Each year approximately two thousand visual art entries from Delaware students (7th - 12th grade) are processed and adjudicated by the ACG. A volunteer jury assists with the process of determining awards for the competition and making selections for the Scholastic exhibit. The regional award artwork is on display in the ACG for approximately one month and culminates with a community reception and awards ceremony. The ACG partners with the Art Educators of Delaware for the reception and regional scholarship awards. The annual reception and award ceremony was attended by over 460 individuals that represented students (7-12 grade), student families, K-12 educators, K-12 school administrators and community members from throughout the state.

The Delaware Congressional Art Awards are held in conjunction with the Scholastic program and through an adjudication process one Delaware student's artwork is selected to represent the state at the national exhibition. The ACG handles the Congressional Art Awards program for Congressman Carney’s office.

**Professional Development Efforts and/or Activities Organized by the Unit**
There were no professional development activities organized by the ACG during this period.
due to insufficient funds.

**Community, Public, and Business Outreach Programs, Activities and Events**

ACG Exhibit Schedule - Please see above information on reporting year exhibit schedule for the ACG. ACG exhibits and programs are advertised and marketed to the community-at-large

**VSADE Community and School Based Artist Residency Projects**

School Based Artist Residencies (SAR)

Alfred Waters Middle School, ILC, Middletown, DE: Visual Arts: 2 classrooms, 8 weeks (October 2017-March 2018)

Charlton School Transitional Education Program - PAG, Dover, DE: Performing Arts: 2 classrooms, 1 school site, 24 weeks (January-May 2018)

Dover Air Force Base Middle School, DAP, Dover, DE: Visual Arts, 2 classrooms, 8 weeks (January-March 2018)

Delaware Children's Museum, September 2017 - April 2018, Wilmington, DE
Wilmington Art Loop, Art on the Town, Wilmington, DE: October 2017
Redding New Castle County Building Gallery, Wilmington, DE: October 2017
Biggs Museum of American Art, Dover, DE: November 2017 - January 2018
Technology Integration
There is a critical need for increasing the technological capacity of the ACG. The ACG had antiquated equipment that is no longer serviceable or repairable.

The current computers in the ACG are not University system compatible and therefore provides only limited access to the University Banner system and no access to University based information systems. This presents a serious technology deficit for ACG staff and hinders the completion of specific responsibilities. Apple computer technology is necessary for specific applications and is still unsupported by the University.

The ACG needs a projection system and other "presentation" technology for multi-media installations and exhibits. The ACG needs a projection system that provides both video and audio components. The current environment presents a serious technology deficit for ACG and hinders the completion of specific responsibilities and interactions with the community-at-large. The ACG needs the ability to appropriately presentation digital media in support of the Department of Art’s Digital Media program. An interactive system would allow for the seamless integration of digital information into ACG projects and presentations, and create a more accessible environment and an aesthetically appropriate exhibit area.

Facility and/or Infrastructure Improvements
The gallery is "showing its age" and is in need of various improvements/renovations. Immediate areas of concern are:

1. The carpet in the ACG was not replaced during the 2008 renovations as the library carpet design was determined inappropriate for a gallery environment. Floo
2. The floor molding is inconsistent and peeling.
3. Bench seating in the gallery is over twenty-five years old and in poor condition.
4. Dated and obsolete equipment.

The ACG is not able to plan for any infrastructure improvements due to insufficient budget resources. The removal of outdated equipment and other obsolete installed items will continue to be a priority in FY 2019. As previously mentioned, the ACG’s technology needs immediate improvement in order for the ACG to act as a DSU and community-at-large resource.

Additional Comments
The ACG and related programs have proven their roles as valuable assets to the University. Assets that must be maintained and developed, or risk an irreparable “hole” in the cultural environment of this University. Therefore, continued efforts to build ACG capacity is crucial to the ACG role in supporting the vision of the University to develop the arts as an integral part of University programs. In order for the ACG to improve and broaden programming, the
following is recommended:

1. Increase the ACG budget. At the beginning of FY 2015 the ACG budget was cut by 60% and then an additional 20% for FY 2016. The current ACG budget is insufficient for maintaining current programming, improving exhibit opportunities, repairing the ACG physical environment, and adding necessary technology upgrades. Limited resources has dramatically affected the ACG's strategic planning and future growth. This issue is critical.
2. Increase the current ACG staff capacity to include a paid intern position and/or the assignment of a graduate assistant. The ACG is essentially managed by one part-time employee.
3. Improve access to the ACG with better visitor parking, delivery/exhibit off-load options and accommodations for special audiences. There currently is significant need for better accommodations for individuals with disabilities attending ACG and other University events.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

1. Increase resources. At the beginning of FY 2015 the ACG budget was cut by 60%. The FY 2016 budget dealt with another 20% cut. Currently the ACG does not have sufficient funds to continue to facilitate an exhibit schedule that is appropriate for a University Arts Center. During FY 2018 the ACG's exhibit schedule and events continued to be compromised due to limited funding.

"KPI #1 and #10". If the student has received gainful employment or a promotion during their graduate enrollment at DSU, please indicate this information in the space provided. If the student is matriculating into another graduate or professional program, please indicate the program, institution and enrollment term. If your activity required a field supervisor (rather than a faculty advisor), please note this in the comment section.

N/A
Mission / Purpose

The Mission of the Assessment Office is to oversee a holistic assessment process at the institution. This Office works collaboratively with units to ensure that they have efficient and sustainable assessment plans. This includes verifying that units are collecting data that are used to improve programs/services and enhance student learning. This office works closely with the Information Technology and Institutional Research units to facilitate data collection and reporting. Furthermore, this Office contributes to the assessment of strategic initiatives and supports efforts to attain and maintain various accreditations. The Assessment Office serves as the primary source for assessment resources, workshops, training, and recent directives from accrediting bodies. Lastly, this Office assists units with the analysis and reporting of assessment data for the purpose of demonstrating that the institutional mission of “integrating the highest standards… in its … programs and preparing students to become capable and productive leaders” is being carried out and that units are supporting the initiatives laid out in the University’s Strategic Plan.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Educate Faculty/staff about Assessment Processes
Educate Faculty/staff about Assessment Processes.

O/O 1: Educate Faculty and Staff about acceptable assessment processes via Workshop(s)
Educate Faculty and Staff about acceptable assessment processes by holding at least one assessment related program each semester.

Relevant Associations:

Strategic Plan Associations:
Delaware State University
6.2 Achieve excellence in administrative operational effectiveness and efficiency.
6.3 Continue to support, use, and enhance comprehensive assessment processes throughout all divisions in order to inform decision making

Related Measures:

M 1: Number of workshops, attendance, and evaluation results.
Number of workshops hosted, attendance at workshops, and/or evaluation results.

Source of Evidence: Activity volume
**Target:**
At least one (1) assessment related program will be held each semester (Title III activity objective).

**Findings (2013-2014) - Target: Met**

Seven workshops/trainings were held this budget year:

1. ADCS Introductory training for new Chairs and Assessment Coordinators was held on Oct. 10, 2013. Five chairs/representatives attended this small group two-hour session. Emailed presentation slides to the two chairs who were unable to attend and also answered their questions via phone/email. For this workshop, a flow chart of ADCS tasks for chairs was also created and shared with new Chairs.

2. Assessment Fellow Presentations workshop was held on April 8, 2014 for the five fellows to present their projects and data analysis to peers. There were 34 faculty, staff and administrators who participated in this workshop.

3. Data Day event was conducted by this Office on May 14, 2014 to support faculty/staff in reviewing student learning assessment data and developing suitable action plans for the next academic year. Dr. Jodi Levine Laufgraben was recruited to serve as keynote presented for the morning session. This event was well received by 103 faculty, staff, and administrators. A video tape of the keynote presentation was also made for faculty/staff to view. In the afternoon session, Office staff supported faculty/staff in reviewing student learning assessment data and developing suitable action plans for the next academic year.

4. WEAVEonline demonstration and discussion was held for Finance & Administration units in July 2014.

5. This Office collaborated with the Center for Teaching and Learning to present information about ADCS at the New Faculty Orientation on August 21, 2014. An introduction to ADCS and how the data are used for general education and program assessment process were presented and discussed with new faculty.

6. WEAVEonline Beginner User workshop was held on September 26, 2014 during the morning to demonstrate and provide hands-on practice with:
   - navigating WEAVEonline software
   - entering/modifying unit mission, goals, objectives
   - reviewing measures, achievement targets, and findings
   - distinguishing strategic goals/objectives from learning goals/objectives in WEAVEonline
   - recognizing differences between objectives, measures, and targets
   - running various WEAVE reports
   There were 15 faculty/staff members in attendance.

7. WEAVEonline Feedback Forum was held on September 26, 2014 during the afternoon. Feedback on assessment reports (submitted in WEAVE) was provided to unit administrators. Questions about the feedback were addressed. There were 4 staff members in attendance. Workshop slides, copies of completed WEAVE feedback forms and printed comments on Detailed Assessment reports were mailed to those who were unable to attend this session.

**Findings (2012-2013) - Target: Met**

· WEAVE Drop-In training sessions were held on April 22-26, 2013.
Individualized assistance was provided to ten (10) users in completing their unit Assessment Summary report and the 2013 Annual Report.

· The first Data Day event was held on May 15, 2013 to support faculty/staff in reviewing student learning assessment data and developing suitable action plans for the next academic year. Eighty-eight (88) faculty/staff members attended this event.

· WEAVE Beginner User Training was held on July 19, 2013. Twelve (12) faculty/staff members attended the training. Workshop evaluation results were collected electronically via Survey Monkey. Results indicated that 55% of the participants found the overall format of the workshop to be effective. However, 20-33% of participants stated their perceived confidence level for completing several tasks in WEAVE was "not confident."

· Assessment Fellow Presentation workshop was held on September 26, 2013. There were 23 faculty/staff members in attendance. Workshop evaluation results indicate most participants found this workshop useful (70%). They found the discussion of portfolio assessments, the tangible examples provided by faculty members, and the debate/question-answer section to be particularly useful (qualitative survey results).

· This Office also continued collaboration with the Center for Teaching and Learning to present information about ADCS to New Faculty Orientation was held in August 21, 2013. An introduction to ADCS and how the data are used for general education and program assessment process were presented and discussed with new faculty.

• **Findings (2011-2012) - Target: Met**
  Two WEAVEonline workshops were held during the fall semester. A total of 30 participants attended these sessions (19 participants at Academic Affairs training and 11 participants at Student Affairs training).

• During the fall, two Institutional Effectiveness Committee (IEC) meetings were also held: 13 faculty/staff members attended in November 2011 and 12 members attended in December 2011.

• Assessment Office staff also provided information and resources about the Unit's services, WEAVEonline, ADCS, and the general education program to approximately 35 participants at the New Faculty Orientation hosted by CTL (Center for Teaching and Learning). A demonstration of WEAVEonline and ADCS was also provided.

• **Findings (2010-2011) - Target: Met**
  1. A total of 3 group trainings for WEAVEonline were held. Group training sessions included introduction to the cyclic assessment process of setting goals, objectives, measures, and action plans that are related to unit and college mission. Users were also introduced to the process of linking objectives to the University strategic plan and linking student learning goals to the University learning goals.
• Training was held for Student Affairs units on 7-26-10
• Training was held for English Department on 10-21-10
• WEAVEonline training was held for Admissions Office, Social Work, Music, Education and Public Allied Health Sciences on 2-14-11

2. Other workshops hosted/conducted = 5:

• Student Learning Outcomes Workshop was held for Chairs and designated faculty on 8-18-10
• Assessment of Student Learning at the Program Level Workshop was conducted by national speaker, Peggi Maki, on 9-24-10
• Using A-t-C (Across-the-Curriculum) Rubrics Workshop was held on 11-23-10
• Using Data to Measure Objectives/Outcomes and to Inform the Planning Process Workshop 1-5-11
• Creating Action Plans based on Data Workshop was held on 5-12-11

3. Committee meetings related to assessment = 3:

• Committee meeting for the newly reconstituted Institutional Effectiveness Committee (IEC) was held on 3-15-11
• Committee meeting for IEC members to review and identify key findings of institutional data sets (NSSE/FSSE, Wabash, ADCS Capstone results) was held on 5-11-11
• Assisted and co-chaired self-study committee meetings

**Findings (2009-2010) - Target: Met**
1. A total of 11 group trainings or demonstrations for WEAVEonline were held. Group training sessions included introduction to the cyclic assessment process of setting goals, objectives, measures, and action plans that are related to unit and college mission. Users were also introduced to the process of linking objectives to the University strategic plan and linking student learning goals to the University learning goals.

• Small group orientation for WEAVEonline on 11 - 17 - 09
• small group orientation for WEAVEonline on 11 - 19 - 09
• Dean's Council demonstration of WEAVEonline on 12 - 3 - 09
• College of education WEAVEonline training on 12 - 16 - 09
• College of education WEAVEonline training on 3 - 8 - 10
• strategic planning committee demonstration of WEAVEonline on 1 - 19 - 10
• Hands-On group training held on 2 - 9 - 10
• hands-on group training held on 2 - 12 - 10
• hands-on group training using practice training entities in WEAVEonline held on 3 - 3 - 10
• annual report training for chairs (two sessions) held on 5 - 17 - 10

2. Other workshops hosted/conducted = 4:

• Faculty Discussion Sessions during afternoon session of the Faculty Staff Opening Institute on 08-25-09
• Program Review Workshop was held for faculty/chairs of programs that were reviewed in during academic year and internal program reviewers - on 9-17-09
• ADCS (Assessment Data Collection System) orientation and demonstration for chairs and faculty was held on 4-22-10
• ADCS (Assessment Data Collection System) orientation and demonstration for chairs and faculty was held on 4-23-10

3. Committee meetings related to assessment = 7:

• Committee meeting for Institutional Assessment and Assessment of Student Learning Subcommittee was held on 9-29-09
• Committee meeting for Institutional Assessment and Assessment of Student Learning Subcommittee was held on 3-23-10
• Committee meeting for Institutional Assessment and Assessment of Student Learning Subcommittee was held on 4-14-10
• Special rubric development session for the general education committee was held on 12 - 15 - 09. This half-day session was utilized to draft across-the-curriculum (A-t-C) rubrics that were used to collect assessment data in spring 2010.
• Assisted/co-led with Self Study Committee meetings on:
  o 12-18-09
  o 4-15-10
  o 4-20-10

**Related Measures:**

**M 2: Record of Website enhancements**
The number of links added to websites, number of additional pages added, and the google tracking report for site visits. Report on the number of time website is updated.

Source of Evidence: Activity volume

**Target:**
At least one (1) website enhancement per academic year will be completed (ie. links, new pages, workshop list, etc.)

**Findings (2014-2015) - Target: Not Met**
Website enhancements were not made during this cycle.

**Findings (2013-2014) - Target: Not Reported This Cycle**
This measure was not evaluated this cycle due to other priorities.

**Findings (2012-2013) - Target: Not Met**
No major website enhancements/updates were completed this year.

**Findings (2011-2012) - Target: Met**
In an effort to continue educating users, WEAVEonline manual and the Assessment Office website were updated during this year.

**Findings (2010-2011) - Target: Met**
Website was updated on 9/21/11. It includes links to ADCS software login page and WEAVEonline login page. There are also list of resource links for faculty/chairs.

**Findings (2009-2010) - Target: Not Met**
Work on website enhancements were started but was not completed. There was not enough time to continue working on website and to submit to webmaster.

**O/O 3: Support enrichment activities/conferences for faculty/staff**
Support enrichment activities/conferences for faculty/staff.

**Relevant Associations:**

**Strategic Plan Associations:**
Delaware State University

1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement
6.3 Continue to support, use, and enhance comprehensive assessment processes throughout all divisions in order to inform decision making
6.6 Create a culture of accountability, high performance and service excellence.
Related Measures:

M 3: Number of faculty/staff professional development opportunities
Report of the number of faculty/staff who attended/completed professional development opportunities related to Assessment.

Source of Evidence: Activity volume

Target:
At least one (1) faculty or staff member will be supported with funds to attend an assessment related workshop, training or conference throughout the year.

Findings (2013-2014) - Target: Met
This target was met because 8 faculty/staff participated or presented at an assessment related workshop. See below for details.

1. After observing a successful Data Day event, Dr. Jodi Levine Laufgraben invited a team from DSU to participate in Temple University’s first Summer Assessment Social. Five faculty/staff members attended this event. One Assessment Office member was selected to make a presentation as part of a panel discussion. She also presented a poster outlining the use of ADCS for General Education outcomes assessment at DSU. A faculty member from the History, Political Science and Philosophy Department participated as a panelist in another discussion. The other members included Assistant Vice President of Academic Affairs/Institutional Effectiveness, Center for Teaching and Learning Director, and a Department of Sociology and Criminal Justice faculty member. This was a useful event to collaborate and network with colleagues from other institutions. The event also served to develop a good relationship with Temple University’s institutional effectiveness team.

2. Our Office staff and other key members on the DSU self-study team were invited to make a presentation to the administration, faculty and staff of the University of District of Columbia (UDC). The team included: Assistant Vice President of Academic Affairs/Institutional Effectiveness, the Center for Teaching and Learning Director, and a History faculty member. In August 2014 this DSU team shared practical strategies and tools used for a successful self-study preparation and evaluation team visit. The team answered many questions and the audience was confident that they would benefit from the DSU teams' experiences. Travel expenses were paid by UDC.

Findings (2012-2013) - Target: Met
Two faculty members were supported with $500 stipends each to work on a student learning assessment project. The fellows worked individually and collaboratively to review each other’s data analysis. They presented their findings at the first Assessment Fellow presentations held in September 2012.

Funding was provided for the Assistant Director to attend the March 1, 2013 Association for American Colleges and Universities (AAC&U) General Education Assessment Conference. The AD prepared for and presented a poster session. Information about DSU’s general education assessment plan, past assessment
methods, the improved assessment system (ADCS), how assessment results have been utilized, and how other colleges can implement a similar homegrown application to collect/analyze/report assessment data was presented. The session was well attended and many positive comments were received from participants who visited the poster session.

- One faculty member and a staff member were also supported with travel funds to attend and present a session at the ACC&U Student Success conference in April. Last year, the AD developed a proposal for this Student Success conference. Two additional faculty and staff member were also involved in finalizing the proposal to AAC&U. This proposal was successfully accepted as a concurrent session. Although the AD could not attend this conference in April, she and the AVP (Assistant Vice President) worked with a faculty member and staff member from other units to develop/review conference materials. The AD virtually participated in the session via video/audio technology. Several conference participants requested more information about our system and tips on how they can implement a similar system.

Findings (2011-2012) - Target: Partially Met
Faculty members were selected to participate in AAC&U's (American Association of Colleges and Universities) 2012 Institute on Integrative Learning and the Departments in July 2012. Partial registration fees of $3,700.00 were provided by this unit for five faculty/staff members. Remaining registration fees were covered by Academic Enrichment Office. Other travel expenses were covered by Center for Teaching and Learning.

Findings (2010-2011) - Target: Met
Travel funds were provided for workshops/trainings = 7:

- Dr. Phyllis Edamatsu, attended Association for Institutional Research (AIR) Annual Forum on 5-29 through 6-1-2010
- The Assistant VP for Academic Affairs and Institutional Effectiveness attended AGLS (Association for General and Liberal Studies) Meeting on 10-6 through 10-11-10
- Assistant Director of Assessment attended Middle States Workshop on Meeting Middle States Expectations for Student Learning Assessment on 9-16 and 9-17-10
- The Assistant Director of Assessment attended Middle States Annual Conference on 12-8 through 12-9-11
- The Assistant Director of Assessment attended Middle States Pre-Conference Becoming an Assessment Facilitator on 12-8-11
- The Assistant VP for Academic Affairs and Institutional Effectiveness attended AAC & U Annual Meeting on 1-26 through 1-29-11
- The Assistant Director of Assessment attended Middle States Conference on Understanding and Using Student Learning Assessment Results on 4-6-11

Findings (2009-2010) - Target: Met
Travel Funds were provided for the following workshops/trainings = 9:

- Technical Analyst Staff member of Assessment Office completed Survey Analysis Using SPSS hand-on training provided by SPSS, Inc on 8-18 and 8-19-2009
- Technical Analyst also attended attended Middle States two-day workshop, Integrating Higher Education Planning and Assessment Workshop, on 9-22 and 9-23-2009.
• Technical Analyst attended Middle States two-day workshop, Integrating Higher Education Planning and Assessment Workshop, on 9-22 and 9-23-2009.
• Director of Assessment attended the 2009 Assessment Institute (IUPUI - Indiana University Purdue University) on 10-24 to 10-27-09
• Dr. Carol Geisecke, faculty member from Human Ecology Department, attended Middle States Workshop, Meeting Middle States Expectations for Student Learning Assessment on 9-24 and 9-25-09
• Dr. Phyllis Edamatsu, staff member from Institutional Research, attended Integrating Higher Education Planning and Assessment: Real strategies for real institutions on 8-13 & 8-14-09
• Dr. Charlie Wilson, chair of faculty senate, attended Integrating Higher Education Planning and Assessment: Real strategies for real institutions on 8-13 & 8-14-09
• Dr. Leandra Casson, faculty member from History, Political Science and Philosophy Department, attended AAC&U General Education Assessment Conference on 2-17 through 2-20-2010.
• Dr. Myrna Nurse, faculty member from English & Foreign Languages Department, attended AAC&U General Education Assessment Conference on 2-17 through 2-20-2010.

O/O 11: Faculty/Staff will recognize differences between objectives, measures, findings and targets.

Faculty/staff will recognize differences between objectives, measures, findings and targets.

Relevant Associations:
Faculty learning outcome

Strategic Plan Associations:
Delaware State University
6.3 Continue to support, use, and enhance comprehensive assessment processes throughout all divisions in order to inform decision making

Related Measures:

M 13: WEAVEonline Post-training Quiz
A nine-item multiple choice quiz administered to all participants who complete the WEAVEonline Beginner Training workshop. Question numbers 3, 4, 7, 8, and 9 ask participants to choose the correct definition or example of an objective, measure, and target.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target:
At least 75% of correct responses will be selected by faculty/staff who complete the quiz.

Findings (2016-2017) - Target: Not Met
During the July 25, 2017 Student Affairs training, a Kahoot quiz was administered at end of the training. There were 26 people in attendance, but 16 participated in the live Kahoot quiz with 67% correct responses selected.

See attached details for how each participant did on each question. Six
participants had more than 75% correct answers, while eight participants had between 50-73% correct responses and only two participants had below 50% correct response rate. Question #1 and #8 had the most incorrect response (81%, 75% respectively). During discussion, it was uncovered that Q#8 was ambiguous because it could sound like a target also, so many people selected this response.

**Related Action Plans (by Established cycle, then alpha):**

*For full information, see the Details of Action Plans section of this report.*

**Review quiz questions and modify if many people answered some questions incorrectly or if questions are ambiguous**

*Established in Cycle: 2016-2017*

Review all quiz questions, especially Q8 and revise wording from “Increase WRC membership sales by 5% throughout the 2016-2017..."

**G 2: Ensure that assessment processes exist for all units**

Ensure that assessment processes exist for departments, programs and other units.

**O/O 5: Review the assessment process with at least three units**

Evaluate the strategic and/or learning goals/objectives. Assist departments in developing syllabi for at least 5 courses which include objectives designed to support learning goals. Verify that the measures are valid. Help with the collection and organization of the data. Organize assessment data with at least three departments and record how the data results are being used to improve programs and teaching methods. Examine documentation which outlines utilization of the data.

**Relevant Associations:**

**Strategic Plan Associations:**

*Delaware State University*

1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
6.2 Achieve excellence in administrative operational effectiveness and efficiency.
6.3 Continue to support, use, and enhance comprehensive assessment processes throughout all divisions in order to inform decision making
6.6 Create a culture of accountability, high performance and service excellence.

**Related Measures:**

**M 4: WEAVEonline usage for assessment**

Review of the assessment processes and data submitted by units in WEAVE and useful feedback provided for improvements. Ensure that department/programs are entering assessment data in the WEAVEonline data management system.
Measured by # of units entering assessment data in WEAVE and the number of units evaluated.

Source of Evidence: Activity volume

**Target:**
At least three (3) units' WEAVEonline data will be reviewed each year and feedback/recommendations will be provided to them.

**Findings (2013-2014) - Target: Met**
Assessment process feedback form was completed for the following units. Head of the units were invited to attend the WEAVE feedback forum held on September 26, 2014. Only 4 staff members attended. Other were provided hard copies of their feedback.

1. Applied Chemistry program
2. Chemistry BS program
3. Chemistry Department
4. Institutional Research
5. Mentoring and Advising
6. Studio Art
7. Art Department
8. Testing Office
9. Agriculture & Natural Resources Department
10. School of Graduate Studies and Research

**Findings (2012-2013) - Target: Met**
· Closing Loop section of the 2012-2013 Annual Report indicated that 13 units submitted details on how assessment data were used to plan/implement action plans designed to improve their unit's impact.

· Review of the action plans report indicates that units are implementing strategies based on data. These include, but are not limited to:

- Evaluation of student test results to uncover challenging areas
- Improvements of course examinations to include critical thinking, problem solving, and real-world applications
- Use of pedagogical methods to enhance student learning in group settings
- Incorporation of practical experiences for students
- Tutoring
- Rubric development or revisions
- Survey administrations
- Improvement of advising
- Participation in outreach efforts
- Enhancement of library resources
- Modification of assessment methodology and targets
- Improvement of unit processes, manuals, procedures
- Recruitment and hiring of qualified faculty/staff
- Professional development and supporting resources for faculty/staff
• Committee assignments
• Student recruitment and marketing of programs/services
• Technology implementation, website enhancements and facility enhancements

Furthermore, there were 17 poster sessions presented by faculty/staff at the May 2013 Data Day event. These posters highlighted an outcome that was addressed, related measure(s), analysis of the data with emphasis on key findings, action plans developed based on the results, subsequent impact of the action plan, and any lessons learned from this process.

Findings (2011-2012) - Target: Met

Formally reviewed WEAVE assessment report for three units (Public and Allied Health Sciences Department including any program level subunits, Nursing Department and BS program, Human Ecology Department and programs). Written feedback for improvements were provided to these units.

Presented WEAVEonline assessment process rubric to IEC committee members for feedback on revisions. Based on comments from members, the rubric was updated to serve as an assessment process feedback form to units. The committee members were charged with reviewing three units in WEAVEonline and documenting their evaluation on the WEAVEonline feedback form. Some of the committee members reviewed 16 units (i.e. Accounting Program, Art Department, Aviation Program, CTL unit, Chemistry Department, Chemistry Programs, Computer and Information Technology Programs, English Program, English Education Program, History, Political Science & Philosophy Department, Mathematics Education Program, Math with Computer Science Program, Music Program, and Psychology Department).

The Assistant Director (AD) ran WEAVE report of all academic and program units (21 departments and 80+ programs) to review completed items. The AD completed a similar report for Student Affairs units. This information was used to print sample WEAVE Detailed Assessment Reports (DARs) for the Self-Study Document Room.

Findings (2010-2011) - Target: Met

This Office has started to review each department's assessment process in WEAVE. Reviews of 7 departments and all programs housed under the depts. (English, Sociology/Criminal Justice, Mass Communications, Center for Teaching and Learning, Psychology, and History) have been completed. Written feedback for improvements were provided to all units.

WEAVE Assessment Process Feedback form was drafted by using Texas A&M University and Moorehead State University templates. The DSU form was shared with Insititutional Effectiveness Committee (IEC) members. Recommendations from committee members were used to revise the form. Committee members were also asked to utilize the form to review 3 units (one administrative unit and 2 program units) and submit completed forms to Assessment Office. 14 units were review by some of the committee members. Several committee members have not completed
their review and some members have not selected units to review. This will be followed up at the next IEC meeting.

**Findings (2009-2010) - Target: Partially Met**

Informal feedback was provided to units that requested a review of their weave entries (i.e. Sociology and Criminal Justice Department, Law Studies minor program, College of health and public policy, etc.). A formalized review and feedback process was not organized this year.

**O/O 9: Facilitate/oversee General Education assessments**

Facilitate/oversee General Education assessments.

**Relevant Associations:**

**Strategic Plan Associations:**
*Delaware State University*

1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

**Related Measures:**

**M 6: Number of course assessments completed for departments/programs**
Assistance provided to academic departments in designing/documenting assessments; at least 5 courses with measurable objectives, assessments, rubrics, and data collection processes (Title III activity objective).

Source of Evidence: Service Quality

**Target:**
Work with departments/programs to gather assessment data for at least 5 courses per academic year.
**Findings (2013-2014) - Target: Met**

Target was exceeded because more than 82% of the 277 designated course sections had instructors who completed the Across-the-Curriculum (A-t-C) outcomes assessments in the Assessment Data Collection System (ADCS). These instructors utilized the Senior Capstone, Writing, Oral Communication, Global Learning, African-American Experience, Quantitative Reasoning, University Seminar Portfolio, and University Seminar Critical Essay rubrics.

**Findings (2011-2012) - Target: Met**

With the continued use of ADCS (Assessment Data Collection System), **341 course sections** submitted assessment data for **9 rubrics** (A-t-C - Across-the-Curriculum rubrics and the Senior Capstone). Three (3) new A-t-C rubrics (African-American Experience, Global Learning, and Wellness) were finalized at the institutional level and data collection started in ADCS. Departments are also developing and utilizing additional rubrics (i.e. Accounting, Business Administration, Art, Biological Sciences, Public and Allied Health Sciences, Social Work).

Data collection has also been implemented for University Seminar I and II (General Education Core courses) in ADCS. This consists of portfolio and critical essay rubrics.

**Findings (2010-2011) - Target: Met**

The number of courses that were assessed for Academic Year 2010-11 are 242.

**G 3: Facilitate periodic assessment evaluations**
Facilitate periodic assessment evaluations for strategic initiatives and accreditation requirements.

**O/O 4: Facilitate Program Reviews**
Facilitate Program Reviews with each program/unit being reviewed every 5 years

**Relevant Associations:**

**Strategic Plan Associations:**
- Delaware State University
  1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
  1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
  2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
  6.2 Achieve excellence in administrative operational effectiveness and efficiency.
  6.3 Continue to support, use, and enhance comprehensive assessment processes throughout all divisions in order to inform decision making
  6.6 Create a culture of accountability, high performance and service excellence.

**Related Measures:**

**M 5: Percentage of Program Reviews completed**
Report of the number and percentage of program reviews completed successfully per semester and/or academic year.
Source of Evidence: Activity volume

**Target:**
Ensure that at least 50% of the scheduled program reviews are completed each academic year.

**Findings (2016-2017) - Target: Not Reported This Cycle**
No program reviews were conducted this cycle. The process of conducting and utilizing program review reports is still being reviewed by the Program Review Subcommittee of the Institutional Effectiveness Committee (IEC) and Interim VP for Academic Affairs.

**Findings (2015-2016) - Target: Not Reported This Cycle**
No program reviews were conducted this cycle. The process of conducting and utilizing program review reports is being reviewed by the Program Review Subcommittee of the Institutional Effectiveness Committee (IEC) and Interim VP for Academic Affairs.

**Findings (2013-2014) - Target: Met**
The target was met because 100% of the six programs scheduled for review were conducted and one additional program review for International Affairs was also conducted. Program reviews were conducted for seven (7) units: Mass Communications, Music, Academic Enrichment, Academic Services for Student Athletes, International Affairs, Honors and Mathematical Sciences programs.

**Findings (2011-2012) - Target: Met**
Assessment Office coordinated internal and external reviewer teams for the following program reviews: Health Promotion, Movement Sciences, Food & Nutritional Sciences, Textile & Apparel Studies, Agriculture, Natural Resources, Sport Management, Sport Administration, Computer Sciences and Information Technology.

This resulted in approximately 89% of scheduled programs being reviewed. The internal review for the Nursing program was not done this year (Verify).

**Findings (2010-2011) - Target: Not Met**
Three of the scheduled eight program reviews (37.5%) were completed this year. The Art program review scheduled for 2009-10 was also completed in this cycle. Below is a list of program reviews completed:

- Physics and Pre-Engineering - Fall 2010
- Art - Fall 2010
- Psychology - Fall 2010
- Aviation - Spring 2011

Notes: General Education program review is postponed until a new General Education
Program Director is appointed. College of Business, Nursing and Social Work program reviews will be postponed until Fall 2011.

**Findings (2009-2010) - Target: Met**

Five of the six program reviews (83%) scheduled for Spring 2009 were completed. See attached document.

**Connected Document**

**Related Measures:**

**M 7:Number of units that were assisted with accreditation/evaluation efforts**

Record of the number of programs/units that sought accreditation assistance from the Assessment Office and the percentage that were assisted.
Source of Evidence: Activity volume

**Target:**
100% of all units who request help for accreditation reporting will be provided with assistance (i.e. assist the Department of Education with NCATE accreditation self-study feedback, recommendations, data, etc.)

**Findings (2013-2014) - Target: Met**
Assistance with preparing and reviewing accreditation reports was provided to 100% of the following units (7 out of 7 units) who requested guidance:

1. Sport Management (BS and MS) with COSMA
2. Didactic Program in Dietetics in Human Ecology with ACEND
3. Hospitality and Tourism Management (HTM) Program in the Department of Business with ACPHA
4. Nursing with ACEN
5. Accounting with AACSB
6. Management with AACS
7. Social Work (CSWE)

**Findings (2012-2013) - Target: Met**
Assistance with preparing and reviewing accreditation reports was provided to 100% of the following units (10 out of 10 units) who requested guidance:

1. Social Work
2. Sport Management
3. Nursing
4. Education
5. Council for Professional Education (CPE)
6. Human Ecology - Didactic Program in Dietetics
7. Hospitality and Tourism Management
8. College of Business
9. Distance Education and Learning Technologies,
10. Sport Administration Master Program - MSCHE Substantive Change Request

**Findings (2011-2012) - Target: Met**
This Office played a valuable role in the institutional self-study process by serving on the research group, reviewing and providing feedback on the self-study drafts, assisting with the document room materials, participating in the visit interviews, assisting with logistics, assisting campus constituents with assessment process reports and providing other vital reports and review.

Additionally, this Office continued to provide support to 9 programs/units maintaining or seeking new accreditation (100% of units that requested
assistance were supported with feedback and guidance from the Assistant Vice President). The programs were: Social Work (CSWE), Nursing (NLNAC), Didactic Program in Dietetics (ACEND), Middle-level Education program (AMLE), Accounting, Management, Hospitality & Tourism Management programs (AACSB), Sport Management and Sport Administration (COSMA).

**Findings (2010-2011) - Target: Met**
Three units requested and received assistance.

**Findings (2009-2010) - Target: Met**
Two units requested and received assistance.

**G 4: Facilitate, conduct, and/or analyze University-wide assessments**
Facilitate, conduct, and/or analyze University-wide assessments.

**O/O 7: Collaborate with units to track graduates**
Collaborate with Alumni Affairs, Career Services, Academic Enrichment, Title III Office, academic departments, and programs to maintain data related to graduates including efforts in further education and career achievements.

**Relevant Associations:**

**Strategic Plan Associations:**

2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community

**Related Measures:**

**M 8: Alumni Survey Progress**
Report of any progress made to the alumni survey: meetings with other units to improve/finalize survey progress in uploading survey to Snap software progress in posting survey to web location survey response rate completion of survey data analysis reporting of survey results to academic unit

Source of Evidence: Administrative measure - other

**Target:**
Increase participant response rate on the alumni survey by at least 5% each academic year. Establish a baseline rate after implementation of an online alumni survey form.

**Findings (2013-2014) - Target: Not Met**
Participated in the Alumni-on-Campus group meeting to get an idea on
alumni who work on campus. This group could serve as a pilot group for testing if the survey question and length are suitable.

**Findings (2012-2013) - Target: Partially Met**
This Office coordinated Institutional Effectiveness Committee meetings to discuss the Alumni Survey draft and recommend revisions. In March, Survey monkey was used to draft a version of the Alumni Survey for the vice presidents to review and approve. Their feedback has not been received as of this time.

In addition, a feedback survey about current program data gathering processes to collect senior or graduate data was also administered. The Chairperson feedback survey was administered in March 2013. Twenty-five (25) chairpersons or coordinators completed this survey. It was found that 48% of the chairs/coordinators indicated they had a method of collecting senior/graduate follow up data. Several respondents also indicated the need for a centralized alumni survey.

**Findings (2011-2012) - Target: Not Met**
This unit was not able to make significant progress in acquiring assessment data from alumni and employees. This is something that will need to be addressed in the next few cycles. Fortunately, the purchase of Survey Monkey technology may assist in alumni data and employee data collection. The next step will be gathering data from the employers of our alumni.

**Findings (2010-2011) - Target: Not Reported This Cycle**
Assessment Office was not involved with the administration of the Alumni Survey in 2010-11.

**M 9: Progress of the Graduate Follow-up Survey**

Source of Evidence: Administrative measure - other

**Target:**
Work with Career Services and academic departments to facilitate increased student participation (increase participation rate by at least 10% from each department) on the graduate follow-up survey.

**Findings (2016-2017) - Target: Met**
Staff in this office collaborated with Career Services to administer the Graduate Placement Survey (GPS). This self-reported survey was administered to acquire more information about students' post graduate activities (i.e. employment status, graduate school enrollment, etc.). Staff promoted survey to increase responses via eNews and Survey Monkey
emails. Response rate was 74%.

**Findings (2013-2014) - Target: Not Met**

No progress was made on this objective.

**Findings (2011-2012) - Target: Not Met**
Progress was not made this academic year.

**Findings (2010-2011) - Target: Not Met**

O/O 10: Oversee University participation in national assessments
Oversee University participation in national assessments

Relevant Associations:

Strategic Plan Associations:
Delaware State University
6.2 Achieve excellence in administrative operational effectiveness and efficiency.
6.6 Create a culture of accountability, high performance and service excellence.
Related Measures:

M 11: Number of nationally recognized assessments completed
The number of nationally recognized assessments completed each year.

Source of Evidence: Activity volume

Target:
Participate in at least one national institutional assessment instrument or analyze/report key findings from at least one completed institutional assessment instrument.

Findings (2015-2016) - Target: Met
Faculty Survey of Student Engagement (FSSE) was administered to faculty members who were teaching during spring 2016 term. Survey response rate was very low at 29% compared to 61% response rate from the 2009 FSSE administration. The average response rate from 119 participating institutions was 46%.

Findings (2013-2014) - Target: Met
One national institutional assessment instrument was administered and findings from at least three institutional survey results were analyzed.

1. Facilitated NSSE spring 2014 administration to first year students and seniors.
2. Uploaded Advisement Committee's survey for Faculty Advising Survey. This survey was administered to learn more about the practices being used on campus to advise students who have been identified as struggling academically and identified through the Early Alert system or otherwise. Analysis of the survey was compiled and emailed to the Committee chair who shared the results and discussed them during committee meeting.
3. Workshop results were tabulated from the April 8th Assessment fellow workshop and May 14th Data Day event. The Assessment fellow workshop evaluations were emailed to the five fellows, their administrators, and the Provost.

Findings (2012-2013) - Target: Met
Undergraduate Academic Advisement Survey was administered in October 2012. Response rate was 18% of undergraduate students.

- Advisement Survey results were compiled, analyzed and key findings were shared with Advisement Committee members in March 2013. Results were also shared with faculty/staff during the Data Day poster session in May 2013.
- Advisement Survey results for Biological Sciences students were also sorted and sent to their Chair per his request.
- University Seminar portfolio and Critical Essay assessment results were compiled, analyzed and key findings were presented to University seminar instructors in September 2013.

Findings (2011-2012) - Target: Partially Met
The National Survey of Student Engagement (NSSE) instrument was not administered in 2012.
However, institutional NSSE data from 2008 and 2011 were further analyzed. Some of these findings were shared with Student Affairs Vice President. Relevant NSSE findings were included in the self-study document and the Document Room library.

Continued analysis of institutional-level data in ADCS.

1. **Findings (2010-2011) - Target: Met**

NSSE institutional assessment instrument was administered in Spring 2011. The web plus instrumentation was selected.

2. Wabash National Study of Inquiry final phase of the longitudinal instrument was administered in Spring 2011. Individualized letters reminding student participants about the Wabash longitudinal study were sent to student home addresses, campus addresses, and email addresses.

**Findings (2009-2010) - Target: Not Reported This Cycle**
NSSE instrument was not administered in 2009-2010 academic year, but it will be administered in 2010-2011 cycle.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**NSSE data analysis**
*Established in Cycle: 2010-2011*
Analyze 2005-2011 NSSE data. Review webinars on for guidelines on how to report NSSE data. Complete a map of the NSSE findings...

**M 12: Number of students completing national assessments**
The number of students agreeing to participate in national assessments (CLA, NSSE, FSSE, Wabash, etc).

*Source of Evidence: Activity volume*

**Target:**
Increase the number of students (by 10% of total participants) agreeing to participate in the NSSE national assessment from base-line 2008 administration.

**Findings (2016-2017) - Target: Met**
The Director facilitated Spring 2017 NSSE administration to first-year students and seniors. The response rates were 35% and 43% respectively. This is an increase of 16% for first-year students and 21% increase for senior year students from the 2008 administration (19%
response rate and 22% response rate respectively). Assistance from Information Technology for posting the unique NSSE survey links into the individual student banner web login accounts was an important factor in helping us to achieve greater than 30% response rate this year. Due to lack of funding in the Institutional Advancement, ideal incentives such an iPad were not available. However, Business and Finance Division and Distance Education AVP assisted us in acquiring three $100 gift cards for raffle incentives.

**Findings (2013-2014) - Target: Partially Met**
Staff facilitated the NSSE spring 2014 surveys administration. Publicized survey administration details to students, faculty, and staff via eNews and other announcements. Also collaborated with Institutional Advancement for survey incentives. Continued working with NSSE team to ensure accurate data files were uploaded. NSSE 2014 survey response rates were 24% for first year students and 32% for seniors, in comparison to 19% for first year students and 22% for seniors during spring 2008 administration. There was a 10% increase for seniors, but only a 5% increase for first year students. Therefore, the target was partially achieved.

**Findings (2011-2012) - Target: Not Reported This Cycle**
National Survey of Student Engagement (NSSE) instrument was not administered in 2012.

- **Findings (2010-2011) - Target: Met**
NSSE - Efforts to increase student participation rates included raffle for iPad giveaways, eNews notices to students and staff/faculty, posters, Facebook and Twitter social marketing. As of June 6, 2011, NSSE participation rate for Spring 2011 was 26.85% (includes completes and partials; participation rates for completes alone was 21.58%). In 2008, the participation rate was 16.86%. The **2011 participation rate shows approximately a 10% increase from the 2008 participation rate**.

- **Wabash National Study of Inquiry - Assessment Office staff members and Student Assistant made numerous phone calls to students' home phones and cell phones to increase participation rates. This Office also sent emails to advisors of students in the study sample. Raffle for two iPad giveaways were also advertised. Wabash final phase participation rate in Spring 2011 was approximately 23% (57 students out of 247 sample pool = 53 completes and 4 partials).**

**Findings (2009-2010) - Target: Not Reported This Cycle**
NSSE instrument was not administered in 2009 - 2010 academic year, but it will be administered in 2010 - 2011 cycle.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**ADCS survey of how programs are using data**
Develop a survey to send to Chairs and/or Assessment Facilitators inquiring how units are utilizing ADCS data. Ask questions to find out what improvements faculty would like to see in student learning for the outcomes that have been assessed, what improvements have implemented and when the result of these improvements will be evaluated again. This survey can also include functionality questions about the software.
and what type of suggestions do they have for improving the software system.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Finished  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Number of course assessments completed for departments/programs |  
**Outcome/Objective:** Review the assessment process with at least three units

**Projected Completion Date:** 11/27/2012  
**Responsible Person/Group:** Bina Daniel  
**Additional Resources Requested:** Survey Monkey software  
**Budget Amount Requested:** $500.00 (recurring)

**Continue review of units academic units and begin review of administrative units (non-teaching units)**

Utilize the revised "WEAVE assessment process feedback form" to review additional units (academic and non-teaching units). Consider holding small group meetings with users to share the result of our review and provide feedback. It may be more time-efficient than conducting individual meetings with each user.

After meeting with users to discuss feedback/recommendations, follow up with users (within 3 month time frame) to see what progress has been made to improve their reports. At meetings, discuss the feedback forms that have been completed by IEC committee members to review that unit.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** WEAVEonline usage for assessment | **Outcome/Objective:** Review the assessment process with at least three units

**Projected Completion Date:** 04/30/2013  
**Responsible Person/Group:** Bina Daniel & Genevieve Tighe

**Create a Program Review Checklist**

In order to better prepare units that are undergoing program review, it may be beneficial to provide a checklist of items and generic deadlines (ie. 2 weeks before scheduled Program review date) that need to be completed by unit that being reviewed; tasks that need to be completed by Assessment Office; data support that needs to be provided
from Institutional Research, if applicable; and internal reviewer/external reviewer duties. For example

<table>
<thead>
<tr>
<th>Tasks to be completed by Unit that is being reviewed</th>
<th>Tasks to be completed by Assessment Office</th>
<th>Tasks to be completed by IR, if applicable</th>
<th>Internal Reviewer/External Reviewer duties</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Provide names of 3 potential reviewers to AVPAA/IE (Assistant VP for Academic Affairs/Institutional Effectiveness) at least 4 months before program review semester.</td>
<td>1. Contacts potential reviewers by phone or email and informs Unit head when a suitable reviewer is selected (at least 1 week after Reviewer has confirmed).</td>
<td>TBD</td>
<td>TBD</td>
</tr>
<tr>
<td>2.</td>
<td>2.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.</td>
<td>3.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Percentage of Program Reviews completed | **Outcome/Objective:** Facilitate Program Reviews

**Projected Completion Date:** 08/30/2012  
**Responsible Person/Group:** Bina Daniel

**Connected Document**  
- *WEAVE online orientation manual*

**Enhance/expand WEAVEonline Trainings**

Review of some assessment processes in WEAVE indicates that some users have difficulty with WEAVE terminology, understanding difference between objectives, measures, targets and findings. It may be helpful to provide trainings based on user needs and users' level of proficiency.

For example, offer various levels of training:  
1. New User WEAVEonline Training Part I - provide introduction to WEAVEonline, intro to assessment process and documenting assessment; information on entering mission, objectives, running reports and using the document management system. At this initial training, provide a Word template for users to enter Mission, goals, objectives, measures, etc... Ask them to email the completed document for our office to review prior to Part II training.  
2. New User WEAVEonline Training Part II - provide hands-on training for entering measures, achievement targets, findings, and action plans; provide practice on running
reports and uploading/associating documents using the document management system.

3. Intermediate User WEAVE training - incorporate more interactive exercises for reviewing objectives, student learning outcomes, measures, achievement targets, findings and revising, as needed. Provide hands-on practice for entering data in 2 cycles.

4. Advanced User WEAVE training - provide guidance on how to report ADCS (Assessment Data Collection System) data into findings section and enter plans for improvement in action planning section; reporting progress for action plans; using WEAVE for program review preparations/reporting; running various reports; train the trainer segment (how users can review assessment process for other units and assist other users in improving WEAVEonline reports).

5. Annual Report Training - continue to offer this training to chairs, directors, and deans in Academic Affairs.

6. Pilot Group training - Small group training (3-4 units only) for curriculum mapping feature in WEAVE.

7. Small group trainings for academic units and administrative units (non-teaching units)
   - Continue to provide users more individualized training upon request, in small group environment (2-5 users)

Another area that needs enhancement are the Demonstration entities in WEAVE. Revise the Demonstration Academic and Demonstration Administrative entities in WEAVE with more detailed examples of the various sections of WEAVE (perhaps, include definitions of mission, goal, objective, etc.). Also, create a demonstration entity - Academic Department.

---

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Number of workshops, attendance, and evaluation results.  
- **Outcome/Objective:** Educate Faculty and Staff about acceptable assessment processes via Workshop(s)

**Projected Completion Date:** 07/30/2013  
**Responsible Person/Group:** Bina Daniel & Genevieve Tighe  
**Additional Resources Requested:** Facilities (i.e. Testing Office Computer lab Mondays/Fridays; BOA Computer Lab); Workshop materials; Workshop refreshments  
**Budget Amount Requested:** $2,000.00 (recurring)

**Follow-up Meetings with Human Resources**

Request follow-up meeting with HR staff regarding implementation of an employee survey. Prepare agenda for meeting and record minutes. Assign duties during meeting and follow up with attendees to gather information about progress they have made on their tasks.
Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Progress of the Employee Survey | Outcome/Objective: Coordinate the development and implementation of employee surveys

Projected Completion Date: 08/31/2013
Responsible Person/Group: Genevieve Tighe
Additional Resources Requested: Budget is requested to purchase survey instrument; Technical assistance will be needed to promote instrument, collect/organize data, analyze data.
Budget Amount Requested: $5,000.00 (recurring)

Hire Technical Analyst

The number of demands for documenting, reviewing, and reporting institutional effectiveness are increasing for our Office. Currently, the Assistant Director is the WEAVEonline Administrator and the ADCS (Assessment Data Collection System) Administrator. This, in itself is a full-time work load with 130+ users, 21 academic department units, 90+ program units, 20+ administrative units (and growing). Substantial progress has been made to the Academic Affairs units. Progress is being made to Student Affairs units. The same diligence will be needed for units in Institutional Advancement and Business & Finance. ADCS is also expanding with faculty members requesting functionalities to upload and collect program level data using their own rubrics. Faculty enthusiasm to document and review assessment efficiently is a noteworthy accomplishment.

The Assistant VPAA/IE (Assistant Vice President for Academic Affairs/Institutional Effectiveness) serves the role of Middle States Liaison and reviews several drafts of documents being sent to accreditors.

Both members of this Office need support staff for:
- technical assistance, budget monitoring, purchase requisition needs, supplies inventory, facilities arrangements/follow up, workshop preparations, travel reimbursements
- national assessment instrument administrations
- drafting minutes for meetings
- utilizing Excel and SPSS for merging/analyzing and reporting data
- assisting with Title III and university annual reports
- assisting with arrangements for self-study meetings and document room preparations
- assisting with program review contracts and arrangements
- organizing/compiling Program Review reports in binders and storing electronically on share drive; creating PR report binders for Provost Office.
- supervising/assigning duties to student workers, title III reporting needs, and other administrative duties.
- providing general troubleshooting assistance for WEAVE, ADCS (i.e login, password reset, and other basic navigation)
- assisting with maintenance of Outlook Public folder (Provost Office) - pull documents as needed, create sub folders, organize posts, grant user privileges, provide general
troubleshooting assistance to users
• assisting with webpages for General Education and Assessment Office
• provide technical support for General Education Committee

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Progress of the Employee Survey | Outcome/Objective: Coordinate the development and implementation of employee surveys

Projected Completion Date: 01/15/2013
Responsible Person/Group: Genevieve Tighe & Bina Daniel
Additional Resources Requested: Budget and support from Provost Office
Budget Amount Requested: $60,000.00 (recurring)

Meeting with Career Services
Request meeting with Career Services staff for a mutually convenient date during the summer months. Plan for meeting by reviewing the Graduate Follow up form online.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Progress of the Graduate Follow-up Survey | Outcome/Objective: Collaborate with units to track graduates

Projected Completion Date: 08/30/2012
Responsible Person/Group: Bina Daniel & Genevieve Tighe

NSSE data analysis
Analyze 2005 - 2011 NSSE data. Review webinars on for guidelines on how to report NSSE data. Complete a map of the NSSE findings to DSU core values, DSU Student Learning Goals, etc.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Number of nationally recognized assessments completed | Outcome/Objective: Oversee University participation in national assessments
Request units to complete a Feedback report in response to Program Review report findings/recommendations (External & Internal)

At the time that we email program review reports to unit heads, we will request units to submit a 3-5 page report that addresses the Program review findings (from external and internal reviewers). The report may include items that were not clearly understood by the reviewers, recommendations from reviewers that are in progress/planned/completed and other comments. Deadline for submitting the "PR Feedback Report" will be given to users.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Percentage of Program Reviews completed | Outcome/Objective: Facilitate Program Reviews

Projected Completion Date: 06/26/2014
Responsible Person/Group: Genevieve Tighe & Bina Daniel

Review quiz questions and modify if many people answered some questions incorrectly or if questions are ambiguous

Review all quiz questions, especially Q8 and revise wording from "Increase WRC membership sales by 5% throughout the 2016-2017 fiscal year" to sound more like an objective only. Re-administer quiz at next training and re-assess.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: WEAVEonline Post-training Quiz | Outcome/Objective: Faculty/Staff will recognize differences between objectives, measures, findings and targets.

Projected Completion Date: 05/15/2018
Responsible Person/Group: Bina Daniel Brittany Platzke

Annual Report Section Responses
Executive Summary (1-2 pages)

The Assessment Office (AO) has completed many initiatives related to its mission, goals, objectives, and action plans during the first 6 months of this grant period. This unit's purpose is to coordinate, monitor and enhance institutional effectiveness initiatives at DSU. The Office serves faculty, staff, and administrators in their role of collecting, documenting, or reviewing assessment data.

The progress achieved for each of the main activity goals is outlined below:
1. Verifying that units are collecting data to measure their outcomes/objectives that are used to improve programs/services or enhance student learning:
   a. This was achieved through individual and group meetings with various faculty/staff in Academic Affairs and Student Services units.
   b. Review of the WEAVEonline data entry status report revealed that 70% of units have strategic and/or student learning assessment plans uploaded in WEAVE. This is slightly lower than the desired target of 75%.
   c. Staff in this Office also worked closely with nine (9) Assessment Fellows in order to provide assistance in updating findings for their unit assessment summary reports.
   d. Staff completed WEAVE assessment process feedback form for five units (5) to evaluate assessment processes and verify that the data are being used to develop action plans.
2. Collaborating with Information Technology and other units to facilitate data collection and reporting:
   a. Staff met with IT representatives to discuss options for enhancing current Assessment Data Collection System (ADCS). Due to other IT projects, enhancements could not be fully developed this year.
   b. Staff led initiatives to successfully research and recommend a new Assessment Management System to replace the existing WEAVE system and ADCS.
   c. Assessment Office also met with IT representatives to acquire their buy-in and discuss their role in the implementation of a new assessment system on campus.
   d. Staff worked with IT Programmer/Analyst to test out a modification in the ADCS and add two Breadth area rubrics to the system. Due to some technical glitches with the addition of a new dropdown, there was a shortened data collection time period. This resulted in the low data submission rate for fall 2017 of 55%, which is far below the desired rate of 80%. Fortunately, 82% data submission rate was achieved spring 2018 (preliminary). Therefore, the total percentage for both semesters was calculated to be 72% and this is still below the desired target. With the implementation of a new assessment management system, there is opportunity to improve this rate in Fall 2018-Spring 2019.
3. Contributing to the assessment of strategic initiatives and supporting efforts to maintain various accreditations by reviewing reports going to external agencies and evaluating the adequacy of data utilization:
   a. Staff provided assistance in reviewing accreditation reports for Nursing, Education and Social Work departments.
   b. Annual reports for Nursing Department and Education department were reviewed to provide feedback. Social Work’s assessment summary report and syllabi were reviewed to recommend changes.
   c. Staff participated in Education department’s Data Days to provided assistance in graphically representing data and linking data with self-study narrative sections.
4. Serving as the primary source for assessment resources, workshops, training, and recent directives from accrediting bodies:
   a. Two workshops were held for faculty/staff during this reporting period.
   b. Kahoot! workshop on utilizing this free gaming and student response tool was conducted on October 19, 2018. There were 31 attendees who participated. Workshop evaluation results, administered through Kahoot!, show that nearly all respondents
found the workshop to be useful.
c. Another workshop related to assessment summary reports was held for College of Arts, Humanities, and Social Sciences faculty/staff on January 31, 2018. There were 8 faculty/staff in attendance.
d. Staff prepared presentation slides for Institutional Effectiveness Committee (IEC) meeting on February 13 (14 attendees participated). During this meeting, WEAVEonline's four-year accreditation countdown timeline was presented and sample draft for DSU's 2021-22 site visit was shared. Director utilized Olympic sports analogies for the four year countdown in preparation for accreditation site visit. Staff also shared links of MSCHE revised standards and guided videos with IEC members to orient them to the new standards and requirements.
e. Staff participated in Baltimore, MD MSCHE Town hall about updates to the Annual Institutional to learn more about updated standards, new timeline for accreditation cycle and new annual report requirements.

5. Assisting units with the analysis and reporting of assessment data for the purpose of demonstrating that the University's Mission of "integrating the highest standards of excellence in its ... programs and preparing students to become capable and productive leaders" is being carried out and that units are supporting the institutional strategic plan:
   a. Held three meetings with Art Dept. assessment coordinator to provide feedback on student learning outcomes plan and wording for it. Worked with her to review Art Education syllabi in order to select applicable measures. Assisted her with setting targets and how to document findings for each cycle.
   b. Met with Mass Communications coordinator/assessment fellow to discuss requirements for assessment summary reports and utilizing WEAVEonline.
   c. Met with Fleet Services assistant director to provide guidance on completing the units assessment summary report. Reviewed assessment summary report for the spiritual life unit and provided feedback.
   d. Collaborated with Career Service and Institutional Research, Planning, & Analytics (IRPA) to administer and compile data for three administrations of the First Destination Survey. Staff worked diligently to learn the new Handshake portal for uploading survey questions, compiling population files, sending email invitations, monitoring response rates, and downloading survey results. Since this survey required students to create a Handshake account rather than just clicking a link, the response rate was a little lower than last year's administration. December 2017 response rate was 62% compared to the 75% response rate achieved in December 2016.
   e. Assessment Office staff also administered and analyzed results for the Chairs Data Utilization Survey and the Assessment Management System survey. These results were shared with the AVP for IE.

Sufficient progress has been made on meeting our unit's goals, expected outcomes, and performance measures thus far. Objectives and measures are on track for completion during the first year of the grant. This activity will continue to serve faculty, staff and administrators in order to support institutional effectiveness initiatives and accreditation requirements to ultimately improve student learning.

Unit(s) Profile
Director of Assessment - Bina Daniel
Assessment Data Specialist - Brittany Maday

The part-time position for Data Specialist was upgraded to a full-time position due to the availability of additional Title III funds and the new staff member was hired in September 2017.

Unit(s) Honors/Awards and Achievements
1. Assessment Office was awarded Title III grant funding for another 5 year cycle with an almost 50% increase in funding. This allowed the unit to hire a full-time staff member to assist the Director of Assessment with institutional effectiveness initiatives.

2. National Institute on Learning Outcomes Assessment (NILOA) HBCU representative invited the Director and DSU leadership team to a dinner for HBCUs who serve as exemplars of good assessment practices. The Director and Vice Provost participated in this dinner in September of 2017 which was held in Arlington, VA, to network and share information about DSU's best assessment practices as well as our challenges. This proved to be an incredible opportunity to share, learn and grow with our fellow HBCUs.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

"KPI #1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

For graduate program annual reports: TABLE 1: Admissions Data: Please upload complete Table 1 for Academic Years 2015-2018 in the Document Management section and connect to this section of the Annual Report.

For graduate program annual reports: TABLE 2: Graduate Student Enrollment by Program. Please upload Table 2 for Academic Years 2015-2018 in the Document Management section and connect to this section of the Annual Report (see template from SGS&R) and provide a narrative here regarding your student admission profile (Table I) and student performance over the last 3 years (AY 2015-AY2018)

For graduate program annual reports: TABLE 3: Graduate Student Engagement/Productivity: Please report the number of graduate students engaged in each activity in 2015-2018 in the Document Management Section and connect to this section of the Annual Report. (See template from SGS&R)
For graduate program annual reports TABLE 4: Graduate Student Information. For each activity indicated in TABLE 3, please provide student contact information along with faculty advisor/supervisor (See template from SGS&R). Upload in the Document Management section and connect to this section of the Annual Report. If the student has received gainful employment or a promotion during their graduate enrollment at DSU, please indicate this information in the space provided. If the student is matriculating into another graduate or professional program, please indicate the program, institution and enrollment term. If your activity required a field supervisor (rather than a faculty advisor), please note this in the comment section.

N/A
Mission / Purpose

The mission of Auxiliary Services to ensure that the University's commitment to its vision and core values are imbedded in the contractual relationships it establishes and maintains with vendors in such a way that the University's constituents (students, faculty, staff and the community at large) receive quality goods and services at an affordable cost.

The Office of Auxiliary Services and Dining makes every effort to insure that the following vendors including the University Bookstore, Printing Center, Post Office, Convenience Store, campus Dining, Beverage/Snack Vending, concessions and Campus Transportation, provides quality customer-centered service to the University community at large in an environmentally conscious and an affordable cost. Functioning together with these service units, we will ensure operational integrity relative to network development, risk management, resource management and utilization of best practices.

To support the mission provide quick, friendly and responsive service in a safe and clean environment. Practice environmental awareness to create this value of service for all of our customers

Goals without Outcome/Objective Relationships Specified

G 1: In effort to be customer centered, conduct pre and post evaluations of special events.;
Product Selection - survey all university customers to review their needs
Equipment - purchase equipment that will create added service whether this is for food, beverages or other added services
Technology - on going to upgrade software
Communication - through Enews, committees, door to door marketing, fliers, surveys, one on one meetings with customers

G 2: Conduct annual climate surveys
surveys are conducted daily, monthly, bi-annually and annually.

G 3: Participate in meetings with students, faculty and staff
meetings conducted through SGA Town Hall program, Dining Committee, Student Center committee to develop and improve current/new services
Faculty meetings to review graduation, commencement and other services
Staff meetings concerning alumni weekend, homecoming, Welcome Days, Orientation and other programs
Meetings with contract tenants, concession contractor, Pepsi and snack vending contractor

G 4: Constantly seek to keep costs at a fair minimum charge
Work with all contract programs and review costs to meet CPI report. to meet and improve product selection by staying abreast of best practices Identify industry benchmarks, advances in technology and equipment enhancements

G 5: work with other department to create partnerships

Create discussions between vendors, customers and others to ensure positive outcomes.

G 6: Create and mentor student leadership to enhance educational experience

This program is created through evaluations, job descriptions, students managing other students and university customers.

G 7: Enhance Go-Green program

Create an awareness through thermal reusable hot and cold beverage cups. Work with vendors to utilize their Green programs that are established within these contracted vendors.

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 1: Create an awareness of services available

These objectives are created through social media forums

**Related Measures:**

**M 1: Increase 3 - 4% for participation**

On campus and commuter students

Source of Evidence: Benchmarking

**M 2: Create opening and closing schedules that will benefit the customers**

Schedule of services in the auxiliary departments that will assist positive program; such as: student shuttle bus service, student center, bookstore, post office/printing and dining programs.

Source of Evidence: Efficiency

**M 3: Create menus for events**

Create and assist departments to develop menus for special events such as graduation, homecoming, convocation, H/R Awards, Parent's Day, President's Scholarship, Ball, Welcome Week and other events.

Source of Evidence: Service Quality

O/O 2: Recruit diverse students to work in service areas and develop their leadership

Through evaluations, training and one on one discussions

O/O 3: Identify various technology that can assist with new services

Through new software programs and social media contacts
O/O 4: Daily review operations and repairs for auxiliary departments
work orders developed for equipment and other items that need to be updated because of customer usage

**Related Measures:**

M 4: Daily review services to enhance customer satisfaction
Review Pepsi/snack vending machines, concession program to enhance customer awareness

Source of Evidence: Service Quality

O/O 5: Conduct pre and post surveys
create surveys for all auxiliary services that will give information concerning possible new services as well as review the services that are existing

O/O 6: Work with university green committee on new programs
monthly meetings to discuss and implement new ideas from vendors and students

**Relevant Associations:**
these meetings will enhance the awareness on what we can do as a community concerning the importance of Go-Green

O/O 7: Create new services kirkwood
assist with the opening of kirkwood with copier, dining, bookstore and other services as needed
Mission / Purpose

Our mission is for the DSU Aviation Program to establish the highest quality of aviation-education and related training, in order to develop highly successful aviation professionals with a global perspective. We will do this through a student-centered learning environment, emphasizing academic excellence through innovation and integrity in teaching, professional development, applied and instructional research and outreach.

Program Tenets

The Aviation Program will imbue the following tenets in the students and staff:

Dedication - to education, to professionalism, to the DSU community & to each other.
Safety - first and always, in and around aircraft, and all that we do.
Unity - of purpose, a team effort, mentoring each other - if you need a mentor find one, if you see someone else who needs a mentor, be one.
Attitude - think positively, work hard, and always strive to be better.
Professionalism - do the right thing the right way - set the example for others and be punctual in all aspects of flying.

Critical Success Factors

Safe aircraft operations.
Support DSU and COB missions, visions, goals & objectives.
Student achievement of their degree in four years.
Student/client satisfaction.
Financial stability and independence for the Aviation Program.
100% employment of graduates in an aerospace career; within 12 months of graduation.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Develop initiatives and processes to enhance student success
Develop initiatives and processes to enhance student learning, professional development, success and retention.

SLO 15: Students will demonstrate written communications skills in aviation
Students will be able to demonstrate written communications skills in aircraft systems, personnel evaluations, and aviation management.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: The number and percentage of students who successfully complete the applicable FAA written exams.
The number and percentage of students in each certification course who successfully complete the course and the applicable FAA written exam.

Source of Evidence: Certification or licensure exam, national or state

Target:
Maintain a 70% pass rate (first time).

Findings (2017-2018) - Target: Met
The following are our FAA written exam pass rate percentages:

- Private Pilot pass rate was: 100%
- Instrument Rating pass rate was: 100%
- Commercial Pilot pass rate was: 100%
- CFI rating pass rate was: 100%
- CFII rating pass rate was: 100%

Findings (2016-2017) - Target: Met
The following are our pass rate percentages:

- Private Pilot Check Ride Pass Rate: 86%
- Instrument Rating Check-ride Pass Rate: 73%
- Commercial Pilot Check-ride Pass Rate: 100%
- Multi-engine Check-ride Pass Rate: 100%
- CFI/CFII/MIE Check-ride Pass Rate: 95%

Findings (2015-2016) - Target: Met
Achieved at 71% pass rate.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Improve oral & practical exam first time pass rate
Established in Cycle: 2010-2011
Ensure students take the corresponding classroom course during a semester that minimizes the time separation between successful
SLO 16: Students will apply oral communications skills in the aviation field

Students will apply oral communications skills in the aviation field (i.e. aviation systems, with Air Traffic Controllers, during flight instruction, etc.).

Relevant Associations:

DSU Learning Goal Associations:
- 1 UG Student Learning Goal: Competent Communicators
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 2: The number and percentage of students who successfully complete the applicable FAA oral and practical exams.
The number and percentage of students in each flight lab who successfully complete the applicable FAA oral and practical exams.

Source of Evidence: Certification or licensure exam, national or state

Target:
The target is to maintain an 70% pass rate.

Findings (2017-2018) - Target: Met
The Aviation Program exceeded the target goal during the 2017-2018 academic year.

The following are our pass rate percentages:

- Private Pilot Check Ride Pass Rate: 86%
- Instrument Rating Check-ride Pass Rate: 73%
- Commercial Pilot Check-ride Pass Rate: 100%
- Multi-engine Check-ride Pass Rate: 100%
- CFI/CFII/MIE Check-ride Pass Rate: 95%

Findings (2016-2017) - Target: Met
Private Pilot Check Ride Pass Rate: 86%

Instrument Rating Check-ride Pass Rate: 73%

Commercial Pilot Check-ride Pass Rate: 100%

Multi-engine Check-ride Pass Rate: 100%

CFI/CFII/MEI Check-ride Pass Rate: 95%

Findings (2015-2016) - Target: Met
We achieved a 71% pass rate.

M 13: Continue to participate in conferences and other activities that offer recruiting opportunities.
Continue to participate in OBAP conferences, other conferences and activities that offer recruiting or future career/job opportunities.

Source of Evidence: Activity volume

**Target:**
Participate in the OBAP annual convention and in the Business/Industry/Education Alliance program.

**Findings (2017-2018) - Target: Met**
Participated in the OBAP Convention (10 students / 4 airplanes), we flew are own airplanes to Orlando, FL for the convention.

Took 10 students to the American Airlines training facility in DFW, TX for a visit; complements of Piedmont Airlines & American Airlines.

Took 10 students to the UAA Policy Seminar in Washington, D.C.

**Findings (2016-2017) - Target: Met**
The Director took 10 students to the 2017 OBAP Convention in Orlando, FL. We flew there in four of our own aircraft.

One student (Austin Jer Don) was honored by the Delaware Aviation Hall
of Fame; along with one of our alumni (Hans Reigle).

The Director is taking 8 students to the UAA Policy Seminar, in Washington D.C. (Jan 2018).

**Findings (2015-2016) - Target: Met**
Participated in The 99’s local chapter meetings, with the females in our aviation program.

Participated in the 2016 OBAP Convention, held in Chicago, IL. We took 7 students to this event.

**Findings (2011-2012) - Target: Met**
Participated in the OBAP annual convention and in the Business/Industry/Education Alliance program.

**Findings (2010-2011) - Target: Met**
Participated in the OBAP annual convention and in the Business/Industry/Education Alliance program.

Incorporate web-based assignments in appropriate courses.

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success
Strategic Plan Associations:
College of Business
5 : Ensure use of technology resources in all aspects of student learning, including curriculum development, pedagogy and student advising.

G 4: Increase external support for AP by nurturing collaborative research projects with public and private organizations.
Increase external support for the Aviation Program by establishing and nurturing relationships, with public and private organizations and individuals.

O/O 2: Encourage student participation in and increase the number of internship programs.

Encourage student participation in and increase the number of available aviation-related internship opportunities.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Business
1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.

Related Measures:

M 3: Feedback from internship employers regarding student preparation and performance.
Feedback from internship employers regarding student preparation and performance.

Source of Evidence: Field work, internship, or teaching evaluation

Target:
Feedback from internship employers regarding student preparation and performance will be used to assess maintenance and improvements to existing relationships (between employers and the DSU COB); and soft-skills.

The primary goal is for all students to receive an internship opportunity; within their degree field of study...each summer. The criteria for a student to be given an internship from COB is:

1) GPA <3.00
2) Sophomore or Junior academic standing
3) Updated resume on file with COB Academic Advising

**Findings (2017-2018) - Target: Not Reported This Cycle**

Students in the Aviation Program are in a unique position that there are more internship opportunities than students willing to take them. Students seem to prefer to continuing flight training without a break, get their flight hours, and then go off to an airline job opportunity.

The goal next academic year is to increase recruiting students for airline internships, so that we're sending at least 1-3 students per year to an internship (semester immaterial). This may be accomplished by having students who've completed internships, talk to students about the benefits of doing an internship.

**Findings (2016-2017) - Target: Not Reported This Cycle**

Feedback from internship employers regarding student preparation and performance was not evaluated this year. All students that wanted a summer, fall or spring internship received one.

The overwhelming number of Aviation Program students opt out of internships because they wish to continue complete flight labs and hours, toward their goal of getting hired; within 12 months of graduation.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

We have not met this objective as a direct result of decreased new enrollment for the 2008-2009. That year, we had 8 new stud...

**M 4: The percentage of students participating in internships.**
The percentage of students participating in internships; throughout the academic year.

We will track them via student feedback, during the sophomore, junior and senior academic years.

Source of Evidence: Activity volume

**Target:**

Have at least 10% of the total students in the Aviation Program participating in internships.

Qualifications include:
• Minimum of 3.0 GPA (cumulative)

Findings (2017-2018) - Target: Met
There were nine (9) Aviation Department students who chose to take the opportunity and do an internship.

• Justin Thompson - JetBlue
• Edgar Ortiz - Fireside Partners
• Roderick Brown - DRBA
• Ahmad Shammo - United Airlines
• Sangorme Kum - Dover, DE and Comcast
• Neal Dixon - Aviation Department (Maintenance)
• Penni Kimani - Aviation Department (Front office)
• Shelbe Jarrett - Aviation Department (Front office)
• Kasheeba Sweeney - Aviation Department (Front office)

Findings (2016-2017) - Target: Met
We had 12+ Aviation Program students working in various internships throughout the fiscal year.

Findings (2015-2016) - Target: Met
Our goal is to place all students with a 3.0 GPA (or higher) in an internship, during the summer of 2017. We have achieved this goal. All other students who did not choose an internship wanted to stay around and fly instead.

Findings (2011-2012) - Target: Not Met
One student participated in the DuPont internship. One student participated in the United internship.

Findings (2010-2011) - Target: Not Met
One student participated in the Continental internship. No students participated in the DuPont internship. One student participated in the Delaware River & Bay Authority internship.

Conduct quarterly performance counseling, which will accumulate content for the annual performance counseling evaluation of all faculty and staff.

Source of Evidence: Administrative measure - other

**Target:**
Conduct annual evaluation of faculty and staff by June 30.
Findings (2017-2018) - Target: Met
Completed quarter and annual evaluations on all Faculty/Staff.

Findings (2016-2017) - Target: Met
Completed quarterly counseling on all subordinate personnel (faculty and staff).

Findings (2015-2016) - Target: Partially Met
Completed quarterly performance counseling on all full-time faculty/staff (July-Sep 2016).

Findings (2011-2012) - Target: Not Met
Not completed within the specified time frame.

Findings (2010-2011) - Target: Not Met
Not completed within the specified time frame.

M 10: Conduct yearly curriculum review.

Conduct yearly curriculum review to ensure compliance with DSU core and general education requirements, aviation accreditation standards, COB accreditation requirements, and other industry standards. Make necessary changes to meet these standards and requirements that also permit student scheduling flexibility and student interest.

Source of Evidence: Professional standards

Target:
The program will receive an annual evaluation from the FAA and the VA; regarding core or required accreditation. Other accreditation may include assessments from AABI.

Conduct quarterly counseling, and annual evaluations on all faculty and staff.

Findings (2017-2018) - Target: Met
We have reviewed the Flight curriculum and are incorporating the following changes:

1. Added Upset Prevention and Recovery Training (UPRT) to the COMMERCIAL II flight lab (change of our TCO). This includes the spin training/endorsement required for the initial CFI.
2. Recommended a targeted increase in the flight labs:
   1. Increase the Private Pilot lab from $7353 to $8200.
   2. Increase the Instrument lab from $7605 to $8750.
   3. Increase the Commercial II lab from $4982 to $9550 (incl. UPRT).
   4. Increase the Commercial III lab from $5914 to $6900.
   5. Increase the CFI lab from $4958 to $5750.
   6. Increase the CFII lab from $3255 to $3650.
3. No change to the Commercial II, ME and MEI labs.
4. The Director is now the FAA ACR for the Private Pilot, Instrument and Commercial ratings. This allows the Department to conduct in-house examining authority on students taking check rides for those ratings.
There is no change to the academics.

**Findings (2016-2017) - Target: Met**
Quarterly counseling and annual evaluations were accomplished on all FT personnel; in the Aviation Department.

We are adding the Upset Prevention and Recovery Training (UPRT) flight training (conducted by Prevailance Aerospace) as a requirement for our Commercial II Flight lab students. We are in the process of seeking FAA (FSDO) approval for this change in our TCO.

We are currently accredited by the Veterans Administration (VA); and hold membership in ABBI, and UAA.

**Findings (2015-2016) - Target: Met**
We passed our VA accreditation (annual), and our FAA accreditation (annual).

**Related Measures:**
M 10: Conduct yearly curriculum review.

Conduct yearly curriculum review to ensure compliance with DSU core and general education requirements, aviation accreditation standards, COB accreditation requirements, and other industry standards. Make necessary changes to meet these standards and requirements that also permit student scheduling flexibility and student interest.

Source of Evidence: Professional standards

**Target:**
We will annually assess the program, seeking efficiency and improvements. Additionally, we will seek aviation industry feedback that may be incorporated into the curriculum and program.

**Findings (2016-2017) - Target: Partially Met**
We have incorporated the UPRT into the Commercial II training, but it has not been formally added as a permanent part of the curriculum. This constitutes a partially-met goal, however there is still more to do before final resolution.

This process requires both FAA and VA approval, along with a change in our TCO document/authority. The is an expected long process as the approving authorities are outside of DSU and this program.

This will also require approval by the State of Delaware VA, because of the out-sourcing of the UPRT training to Prevailance Aerospace.

The goal is to add the UPRT to the Commercial II curriculum.

**Findings (2015-2016) - Target: Met**
A note-worthy change is the addition of UPRT to the curriculum (Commercial III Flight Lab). This will be a mandate by the FAA, around 2020.

**Establish alumni database**
Acquire additional contact information for alumni in the e-mail list.
Collect names and complete contact information from alumni who are willing to provide the information.
Create a spreadsheet or database containing all collected information.

Established in Cycle: 2010-2011  
Implementation Status: Finished  
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Conduct yearly curriculum review. | Outcome/Objective: Conduct annual evaluation of faculty and staff.  
Measure: Establish an alumni database, including e-mail addresses and other contact information. Also use other communication media. | Outcome/Objective: Establish an alumni database.  
Measure: Maintain affiliations with a variety of aviation professional organizations. | Outcome/Objective: Maintain affiliations with professional organizations.  
Measure: Visit local/surrounding High Schools at least once during the academic year | Outcome/Objective: Increase the number of students in Aviation Program.

Implementation Description: Contact members already in the database. Contact the DSU Alumni Association.  
Projected Completion Date: 06/29/2011  
Responsible Person/Group: Program Director & Program Secretary  
Additional Resources Requested: None

**Improve oral & practical exam first time pass rate**
Ensure students take the corresponding classroom course during a semester that minimizes the time separation between successful completion of the ground course and their oral and practical exams.  
Ensure the Chief Instructor Pilot conducts a thorough final stage check for each student prior to FAA exam authorization.  
Review individual student progress during monthly flight instructor staff meetings.  
Offer tutoring and an Aviation-specific weekly Study Hall period, to students who show fail to progress at an appropriate rate.

Established in Cycle: 2010-2011  
Implementation Status: Finished  
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Conduct yearly curriculum review. | Outcome/Objective: Design processes to solicit input from students, EAC, employers and other constituents on curricula and programs.  
Measure: The number and percentage of students who successfully complete the applicable FAA oral and practical exams. | Outcome/Objective: Students will
apply oral communications skills in the aviation field

**Measure:** The number and percentage of students who successfully complete the applicable FAA written exams. | **Outcome/Objective:** Students will demonstrate written communications skills in aviation

**Implementation Description:** Advisors ensure students have made sufficient progress in flight training prior to authorizing enrollment in follow-on classroom courses. Chief Instructor providing more thorough oral and practical stage exams. All student progress reviewed at monthly staff / CFI meetings. Suggestions for individual improvement offered. Classroom instructors & tutors (upperclassmen) available by appointment & after class. Chief offer open tutoring once weekly.

**Projected Completion Date:** 06/30/2018
**Responsible Person/Group:** Program Director, Chief Instructor Pilot, & Faculty.
**Additional Resources Requested:** Time

**Increase student internship participation**

We have not met this objective as a direct result of decreased new enrollment for the 2008-2009. That year, we had 8 new students. Only 3 of those original 8 students remain in the program. Increasing enrollment and retention will help us meet this objective by year 2012-2013.

**Established in Cycle:** 2010-2011
**Implementation Status:** Finished
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Feedback from internship employers regarding student preparation and performance. | **Outcome/Objective:** Encourage student participation in and increase the number of internship programs.
- **Measure:** Increase the number of students in the Aviation Program. | **Outcome/Objective:** Increase the number of students in Aviation Program.
- **Measure:** Maintain affiliations with a variety of aviation professional organizations. | **Outcome/Objective:** Maintain affiliations with professional organizations.
- **Measure:** The percentage of students participating in internships. | **Outcome/Objective:** Encourage student participation in and increase the number of internship programs.

**Implementation Description:** See Objective 13 and Measure 21
**Responsible Person/Group:** Program Director
**Additional Resources Requested:** See objective 13 and Measure 21

**Require submission of research paper for successful completion of the course.**

To successfully pass the course, all students must submit a research paper.

**Established in Cycle:** 2010-2011
**Implementation Status:** Planned
Priority: High
Implementation Description: Requirement added to the course syllabus, effective 2011-2012 academic year.
Responsible Person/Group: Course instructor.
Additional Resources Requested: None

**Change requirement to new instructors.**
The remaining classroom instructors who are not qualified to teach online or hybrid courses are also adjunct instructors who have other full-time employment that precludes them from taking the training required to obtain the qualification. We will change this assessment to require all newly hired classroom instructors to obtain this qualification as part of their new hire process.

Established in Cycle: 2011-2012
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Conduct yearly curriculum review.
- Outcome/Objective: Design processes to solicit input from students, EAC, employers and other constituents on curricula and programs.

Implementation Description: Change this assessment to require all newly hired classroom instructors to obtain this qualification as part of their new hire process.
Projected Completion Date: 08/25/2012
Responsible Person/Group: Program Director.
Additional Resources Requested: On-demand Blackboard training for new hires.

**Discuss length and detail of document with Human Resources.**
The Human Resources Department issued a new evaluation form that is quite extensive and detailed. Discuss with Human Resources which portions of the document are required and the possibility of reducing the length and detail of the document.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Low
Implementation Description: Meet with HR.
Responsible Person/Group: Program Director.
Additional Resources Requested: Time

**Multiple changes to Instrument Rating course instruction.**

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- **Measure**: Conduct yearly curriculum review.
- **Outcome/Objective**: Design processes to solicit input from students, EAC, employers and other constituents on curricula and programs.

- **Projected Completion Date**: 08/25/2012
- **Responsible Person/Group**: Instrument Rating course instructor
- **Additional Resources Requested**: AADT
- **Budget Amount Requested**: $0.00 (no request)

Provide clear and specific directions for satisfactory research paper submission
Although the instructions for satisfactory completion of this assignment were already very clear and specific, make these instructions as clear and specific as possible.

- **Established in Cycle**: 2011-2012
- **Implementation Status**: Planned
- **Priority**: High
- **Implementation Description**: Edit the assignment instructions to make them as clear and specific as possible.
- **Projected Completion Date**: 01/13/2013
- **Responsible Person/Group**: Flight Safety course instructor
- **Additional Resources Requested**: None

Require writing instruction at DSU prior to senior capstone.
In order to ensure that students have received adequate writing instruction, require students to take at least one DSU course that includes significant writing instruction (University Seminar I, University Seminar II, English Composition I, English Composition II, Flight Safety) prior to taking the senior capstone course.

- **Established in Cycle**: 2011-2012
- **Implementation Status**: Planned
- **Priority**: High
- **Implementation Description**: During advisement and registration, ensure compliance with the requirement to have taken at least one DSU course that includes significant writing instruction prior to taking the senior capstone course.
- **Projected Completion Date**: 08/25/2013
- **Responsible Person/Group**: Faculty advisor
- **Additional Resources Requested**: None

Incorporate their Career Fair into our calendar, for participation
Incorporate their Career Fair into our calendar, for participation

**Implementation Status:** Planned  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Visit local/surrounding High Schools at least once during the academic year | **Outcome/Objective:** Increase the number of students in Aviation Program.

**Projected Completion Date:** 05/31/2018

**Annual Report Section Responses**

**Executive Summary (1-2 pages)**

The following is a summary of significant accomplishments for the academic year of 2017-2018, on success in achieving short range goals.

1. Participated in two DSU Admissions Open House reception held at DSU: Fall Open House / Spring Open House.
2. Held the 9th Annual Aviation Program BBQ Welcome in September 2017, and the Aviation Student Achievement and Awards event in March 2018.
3. Achieved an increased number of FAA Certifications earned this academic year by students in the flight program.
4. Achieved a record first-time check ride pass 96% rate for the Aviation Program.
5. The Director and ten (10) students flew four (4) DSU aircraft to the OBAP Convention in Orlando, FL; August 2017.
6. Student-led flyover for graduation and the DSU home football games (Fall 2017).
7. Student-led flyover for the Savannah State University vs. DSU football game (October 2017).
8. The Philadelphia Chapter of the Tuskegee Airmen Inc., awarded Ms. Peninah “Penni” Kimani, a Professional Pilot-major a $3,500 scholarship.
9. Dr. Don Blakey formed the Friends of the DSU Aviation Program, for the purpose of fundraising efforts and initiatives on behalf of the Aviation Program. Their goal was to raise $350,000 in order to purchase one new Piper Archer III airplane. Dr. Blakey planned and conducted a fundraising event in November of 2017; at the hangar.
10. During the 2018 graduation ceremony, two DSU Aviation Program students (Edgar Ortiz and Kirk Prange) were awarded the Presidential Academic Award. This award is given to students who successfully achieve a 4.0 GPA during all academic semesters at DSU. Both Edgar and Kirk were part of a group of a record-setting seven (7) total students who received this prestigious honor at graduation.
11. In February 2018, the Delaware River & Bay Authority (DRBA) conducted a formal dedication and opening of the new, extended runway at Delaware Airpark (33N).
12. In October of 2017, the Aviation Program’s Hornet Flight Team competed in the NIFA Region 7 competition and finished 4th Place.
13. The Aviation Program has been authorized by the Federal Aviation Administration (FAA) to conduct in-house practical test examining authority on our students, giving
check-rides for the Private Pilot License, Instrument Rating, and Commercial License.

Unit(s) Profile

The following are a complete listing of the Aviation Program's personnel, during the 2017-2018 year (incl. Faculty/Professional and/or Classified Staff):

1. Director of Aviation Programs - Lieutenant Colonel (Ret.) Michael A. Hales
2. Assistant Director/Assistant Professor - Dr. Jose Valentini (beginning August 2017)
3. Chief Flight Instructor - Mr. John Sherman
4. Chief of Aviation Maintenance - Mr. John O'Connor
5. Assistant Chief Flight Instructor - Major (Ret.) Neal Thompson
6. Assistant Chief Flight Instructor - Mr. Roger Kruser (March 2018)
7. Temporary Full-time Flight Instructor - Mr. Abdul-Wahab Kalejaye (until February 2018)
8. Senior Secretary - Ms. Marlene Cox
9. Part-time Aircraft Mechanic - Mr. Foye Cox
10. Seasonal Casual Aircraft Mechanic - Mr. Harlan Durham
11. Adjunct Academics Instructor - Dr. Polly Steenhagen
12. Adjunct Academics Instructor - Dr. Thomas Mercer
13. Adjunct Academics Instructor - Mr. Benjamin Clendaniel
14. Adjunct Academics Instructor - Mr. Scott Lovick
15. Adjunct Academics Instructor - Mr. Ira Thompson
16. Adjunct Academics Instructor - Mr. Stephen Williams
17. Adjunct Academics Instructor - Mr. Joe Lamonaca
18. Adjunct Academics Instructor - Mr. William Pickrum
19. Adjunct Flight Instructor - Mr. Roger Kruser (until March 2018)
20. Adjunct Flight Instructor - Mark Ramos
21. Adjunct Flight Instructor - Daeshawn Rose
22. Adjunct Flight Instructor - Tevin Williamson
23. Adjunct Flight Instructor - Cameron Chase
24. Adjunct Flight Instructor - L Phillips
25. Adjunct Flight Instructor - Joshua Holmes
26. Student Flight Instructor - Kí Tak "KT" Kim
27. Student Flight Instructor - Brandon Tisdell
28. Student Flight Instructor - Maurice Ellis
29. Student Flight Instructor - Michael Sharp
30. Student Flight Instructor - Mohammad Ahmed
31. Student Flight Instructor - Andrew Spagnolo
32. Student Office Worker - Peninah "Penni" Kimani
33. Student Office Worker - Kasheba Sweeney
34. Student Office Worker - Shelbe Jarrett
35. Student Aircraft Maintenance Worker - Neal Dixon
36. Student Van Driver - vacant
37. Student Teaching Assistants - Michael Sharp
38. Student Teaching Assistants - Mohammad Ahmed
39. Student Tutors - Andrew Spagnolo
40. Student Tutors - Michael Sharp
41. Student Tutors - Mohammad Ahmed
42. Student Tutors - Lane DeLeon
43. Student Tutors - Kaitlyn Kalousek
The following are all personnel changes (new faculty, professional and/or classified staff, retirements, left DSU employment, transferred to other departments, etc.):

1. Adjunct Academics Instructor - Mr. Benjamin Clendaniel
2. Full-time Flight Instructor - Abdul-Wahab Kalejaye
3. Adjunct Flight Instructor - Cameron Chase
4. Adjunct Flight Instructor - Tevin Williamson

The following are new personnel to the Aviation Program:

1. Assistant Director/Assistant Professor: Dr. Jose Valentini (August 2017)
2. Adjunct Academics Instructor - Mr. Joe Lamonaca

Other changes: None.

Centers (specialized areas of instruction or services): FAA Certified Flight Instruction (Part 141)

Academic Department (only):

- Degrees and degree options within the Department:
  - Bachelors of Science in Aviation with concentrations in:
    - Professional Pilot
    - Aviation Management
- Total enrollment by major concentrations: 92
  - Professional Pilot:
    - Freshman - 27
    - Sophomores - 16
    - Juniors - 13
    - Seniors - 11
  - Aviation Management:
    - Freshman - 5
    - Sophomores - 6
    - Juniors - 6
    - Seniors - 8
- Notes:
  - The Professional Pilot enrollment fluctuated again this academic year. This was primarily due to the loss of graduating students and a smaller Freshman class than the previous academic year. There were some students who changed their majors to Aviation Management during the academic year.
  - The 2018 graduation featured a total of ten (10) students; six (6) were Professional Pilots students and four (4) were Aviation Management students.
  - Projections:
    - Retention of new/incoming students will continue to be a priority and continue until capacity is reached. Our calculated capacity is 85 students in flight training, with our current aircraft fleet of 11 airplanes (7 Piper Warriors, 1 Piper Archer III, 2 Piper Arrows, 1 Piper Seneca). The combination will lead to an annual increase of between 1-3
students over the next several years, which could necessitate restricting enrollment in the Professional Pilot concentration, and/or additional pre-screening of prospective students; without adding to the aircraft fleet.

**Unit(s) Initiatives accomplished in this cycle**

The following are the Aviation Department's Mission, Vision, and Strategic Plan.

**Mission:**

- Our mission, is for the DSU Aviation Program to establish the highest quality of aviation education and related training, in order to develop highly successful aviation professionals with a global perspective.

**Vision:**

- The Aviation Program will be the preferred choice for the education of future aviation professionals in the air and on the ground. We will do this through a student-centered learning environment, emphasizing academic excellence through innovation and integrity in teaching, professional development, applied and instructional research and outreach.
- The Aviation Program also seeks to train knowledgeable and proficient airport managers, operations managers, air traffic controllers, aircraft dispatchers, Federal Aviation Administration employees and other aviation management professionals.
- Our Professional Pilot graduates will complete their FAA requirements for the Private Pilot License, Instrument rating, Commercial License, Certified Flight Instructor - Airplane, Certified Flight Instructor - Instrument and Multi-Engine ratings while earning a Bachelor's Degree. Graduates of our FAA Approved Part 141 Aviation program get hired into a Professional Pilot job leading to a career in aviation; within 12-months of graduating. The DSU flight training program opens the door to commercial and/or military aviation careers for those with the ability and tenacity to meet the rigorous academic and physical skills demanded of them.

**Strategic Plan for the Aviation Program:**

- Strategic Objectives include:

  - Lifecycle Management of Piper aircraft fleet
    - Aircraft & Avionics life-cycle management
    - ADS-B compliance in all aircraft
  - Increase student population to 500+ students in the Aviation Program (primarily Pro Pilot majors)
    - Establish a separate College of Aviation studies
  - Establish enduring scholarships and internships for all aviation majors
  - Establish 100% career-placement for all aviation majors (in their degree field); within 12-months of student graduation
  - Establish an Aviation Maintenance concentration degree curriculum
- Increase access of Aviation Distance Learning degree courses
- Establish opportunities for foreign students to flight train at DSU
- Continue the FREE Discovery Flights as a recruiting tool for future students into the Aviation Program
- Establish and eventually manage the Delaware Airpark FBO
- Demonstrate the ability to self-fund the entire Aviation Program
- Operate a cabin-class airplane for region-wide executive travel of key university leadership

**Department Initiatives.**

List and describe any significant modifications to pre-existing programs or curricula:

- The Aviation Program added Upset Prevention and Recovery Training (UPRT) to the Commercial II lab syllabus. The training is outsourced to Prevaliance Aerospace (Chesapeake, VA), who uses Extra 300 fully-aerobatic airplanes for the training. The UPRT also includes the initial-CFI Spin Training endorsement.
- Established one-on-one, tutoring opportunities for underclassmen, using paid-upperclassmen and student-CFIs. Tutors this academic year were:
  - Lane DeLeon
  - Andrew Spagnolo
  - Kaitlyn Kalousek
  - Mohammed Ahmed
  - Michael Sharp
    - Established paid-Teaching Assistants in the Private Pilot Certification and Instrument Rating courses. These individuals were:
      - Michael Sharp
      - Mohammed Ahmed
    - List any Professional Development Efforts and/or activities:
      - Chief of Maintenance attended recurrent training on aircraft engines, at the Lycoming factory (February 2018).
      - Hosted the summer Aviation Career Exploration (ACE) Camp, facilitated by the Organization of Black Aerospace Professionals (OBAP).
      - Completed the [first of its kind] fully-funded, "accelerated" Private Pilot flight training for five (5) National Advanced Flight Academy (NAFA) Scholarship recipients in the Civil Air Patrol (CAP).
      - Coordinated for and brought in several airlines to participate in the CoB "DEEP Day". Piedmont Airlines, American Airlines, Horizon Airlines and ExpressJet participated with representatives. Included the US Coast Guard contingent: Patrol boat and helicopter.
      - Hosted several airlines throughout the academic year, for the benefit of our aviation students to begin networking: Piedmont Airlines and Republic Airlines.
      - The Aviation Program was inspected by the FAA and was re-affirmed for our Part 141-approved status. Additionally, we were authorized by the inspector to be awarded in-house Designated Pilot Examining (DPE) authority; for the Private Pilot, Instrument, and Commercial Certificates.
      - The Aviation Program conducted a Fall semester FAAST Team Safety meeting, and a Spring semester FAAST Team Safety meeting.
      - The Aviation Program participated in the Thunder over Dover Airshow (at Dover AFB), with both a static display and a 4-aircraft formation flyover.
- The Aviation Program participated in the NAS Oceana Airshow (Oceana, VA) with an aircraft static display.
- In February 2018, we were invited by American Airlines to bring ten (10) students out to visit/tour their pilot training Academy, Operations Center, HQs and Museum and the aircraft maintenance facilities in Dallas, TX. American Airlines funded the entire trip including airfare, meals and hotel rooms for the 10 students and 2 faculty members. The American Airlines facilitators were Captain William Sheriff and First Officer Robert Barkers. The Piedmont facilitator was Ms. Lynnette Darnell.
  - Penni Kimani
  - Sydney Brown
  - Cindy Blair
  - Zaniya Dortch
  - Delilian Alford
  - Paul Moser
  - Kasheba Sweeney
  - KT Kim
  - Mohammed Ahmed
  - Adrian Bobb
  - Mr. Arnold Nearn - Aviation Director's Advisory Council
  - Lt.Col.(R) Michael Hales - Director of Aviation Programs
- In the Spring semester, Professor Nandita Das (Accounting/Finance) conducted several evening seminars to our Professional Pilot students regarding managing personal finances.
- Hornet Chat 'n Chew, with Aviation Program students volunteering at each session.
- Recruiting visit to Louis Redding Middle School's Career Fair
- In January, the Aviation Program paid for 10 students to Washington, D.C. to attend the University Aviation Association's (UAA) Aviation Policy Seminar. The UAA offered students the opportunity to network with aviation industry leaders and members of Congress during the 2018 UAA Aviation Policy Seminar for Students, taking place the first week in January in Washington, DC. This Seminar was recommended for juniors, seniors, graduate students, or those with a good background in aviation.
  - Students and faculty facilitators will spent the week on-site in the nation's capital attending briefings & seminars from the NTSB, the FAA, Congressional staff, and industry associations agencies such as NBAA and RAA.
  - Students were able to network with others from across the country and gain valuable exposure to leaders in these organizations.
  - Students had the opportunity to gain a better understanding of how these agencies interact in establishing aviation policy and what job opportunities may be available in the aviation industry.
  - Faculty and students will gain valuable insight into how they can participate in the process now and in the future.
- Students participated in regular meetings of The Delaware Chapter of the Ninety-Nines and the JHP Chapter of the Tuskegee Airmen.
- The Aviation Program hosted a Girl Scouts Aviation Day in our hangar. There were over 60 Girl Scouts in attendance and the event was staffed by students and The Delaware Chapter of the Ninety-Nines members. There was sponsorship from Piedmont Airlines for food and beverages.
- The Aviation Program coordinated with Textron Aviation to participate in Meet the Firms night, during the Spring semester. Textron Aviation flew to the event in a new Beechcraft Baron G58; which students were able to sit in and see.
The Director and two students participated in a "Lunch with Lyle Hogg" (President of Piedmont Airlines) session at the Philadelphia International Airport. This was sponsored by Piedmont Airlines.

- Aircraft accidents/incidents: None.

- Participated in numerous filming and news reporter interviews about the DSU Aviation Program.

- Technology Integration.
  - All Adjunct instructors and faculty members trained/proficient in the use of Blackboard; with all instructional materials and aids on the system.
  - List any facility and/or infrastructure improvements: None.

- Terminated Programs: None.

- Comments important to the continued improvement of the Department/Program:
  - Added learning objectives/outcomes to syllabi and strategic plan, and moved all objectives and plans to WEAVEOnline.

**Unit(s) Honors/Awards and Achievements**

The following are the HONORS, AWARDS and ACHIEVEMENTs of our students:
Report any special honors and/or awards for the academic year. Academic departments are to include key statistics, such as number of degrees awarded, average time-to-degree, graduation rate, retention rate (year-to-year and to graduation) as compared to university totals.

- Honors Received by Aviation Program Graduating Senior Awards
  - Academic Excellence Awardees: **Kirk Prange and Edgar Ortiz**
  - Academic Leadership Non-Academic Student Athlete: None.
  - One Sophomore student (Ms. Peninah "Penni" Kimani) awarded a **$3,500** scholarship from the Philadelphia Area Chapter of the Tuskegee Airmen International (TAI).
- The DSU Hornet Flight Team finished 4rd Place overall at the National Intercollegiate Flying Association (NIFA) Northeast Region 7 Competition; a top 5 finish.

Major Achievements of Students (not included above) as compared to university totals.

- FAA Certifications Earned:
  - Private Pilot - 18
    - Private Pilot Check-ride Pass Rate - 100%
    - Instrument Rating - 15
  - Instrument Rating Check-ride Pass Rate - 93%
    - Commercial Pilot Rating - 8
  - Commercial Pilot Check-ride Pass Rate - 100%
    - Multi-engine Rating - 5
  - Multi-engine Check-ride Pass Rate - 100%
    - Certified Flight Instructor (CFI) - 9
  - CFI Check-ride Pass Rate - 78%
    - Certified Flight Instructor - Instrument (CFI-I) Rating - 6
  - CFI-I Check-ride Pass Rate - 100%
    - Multi-Engine Instructor Rating (MEI) - 1
  - MEI Check-ride Pass Rate - 100%

- Activities of Student Groups (including civic and social activities)
  - Students participated in the fall and spring DSU open houses.
- Job Placement and/or Accomplishments of Seniors
  - All Professional Pilot graduates are in Professional Pilot career jobs within 12-months of graduation.
  - Incomplete information regarding Aviation Management graduates.
- Job Placement and/or Accomplishments of Graduate Degree Recipients: N/A.

Goals, Objectives, and Measures for 2018-2019 academic year:

- DSU Aircraft Fleet:
  - Aircraft and Avionics Life-cycle Management
  - ADS-B Compliance in all aircraft
- Recruiting Strategy:
  - Articulation agreements with local High Schools in DE
  - Articulation agreements with the DSU ECHS; for students to take aviation courses
  - Increased participation in recruiting opportunities and events
• Successfully accomplish two aviation summer camps
• Apply for at least one (1) grant that financially benefits the Aviation Program
• Submission of application and then begin the self-study for AABI accreditation
• Articulation agreement with Delaware Technical Community College (DETCC)
• Hire a FT Aircraft Mechanic

Long Range Goals for 2018-2022:

• The Director of Aviation Program’s Strategic Initiatives & Objectives include the following:
  o DSU Aircraft Fleet:
    ▪ Aircraft & Avionics Life-cycle Management
    ▪ ADS-B Compliance in all aircraft
  o Increase the number of students in the Aviation Program (primarily Professional Pilot-majors) to 500 or greater
  o Establish a College of Aviation separate from the College of Business
  o Establish scholarships and internships for all Aviation-majors
  o Establish a 100% career placement for all aviation-majors, in their degree field; within 12-months of graduation from DSU
  o Establish an Aviation Maintenance concentration within the Aviation Management degree program
  o Establish an Aviation Distance Learning (online) degree courses
  o Continue the FREE Discovery Flights as a recruiting tool for potential students
  o Establish an FBO and then manage the Delaware Airpark

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

The following are the Director’s Goals, Objectives, and Measures for 2018-2019 academic year:

• DSU Aircraft Fleet:
  o Aircraft and Avionics Life-cycle Management - measured by the decision of the DSU Administration to purchase new aircraft to replace the fleet; or measured by the Aviation Fundraising Advisory Councils ability to raise funds for either newer aircraft or avionics upgrades
  o ADS-B Compliance in all aircraft - measured by either the aircraft are compliant or not

• Recruiting Strategy:
  o Articulation agreements with two (2) local High Schools in DE - measured by there being an approved articulation agreement or not
  o Articulation agreements with the DSU ECHS; for students to take aviation courses - measured by an approved articulation agreement or not
  o Increased participation in recruiting opportunities and events -

• Successfully run and facilitate two aviation summer camps - measured by continued hosting of the OBAP ACE Camp; continuation of USAF-sponsored summer flight camp; or potentially hosting the CAP summer flight training camp
• Apply for at least one (1) grant that financially benefits the Aviation Program - measured by research and applying for aviation grants that financially benefit the Aviation Program
• Submission of application and then begin the self-study for AABI accreditation - measured by beginning the self-study of the Aviation Program
• Articulation agreement with Delaware Technical Community College (DETCC) - measured by completion and approval of the Articulation Agreement
• Hire a FT Aircraft Mechanic - measured by the hiring of a FT airplane mechanic

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report. See Excel Spreadsheet attachment.

Connected Document
• Aviation Program’s KPI #1 and #10 Annual Report

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? b) Have these changes been implemented? If not, when will they be implemented? c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Improve FAA oral & practical exam first time pass rate

Description: Ensure students take the corresponding classroom course during a semester that minimizes the time separation between successful completion of the ground course and their oral and practical exams. Ensure the Chief Instructor Pilot conducts a thorough final stage check for each student prior to FAA exam authorization. Review individual student progress during monthly flight instructor staff meetings. Offer tutoring and an Aviation-specific weekly Study Hall period, to students who show fail to progress at an appropriate rate.

• Measure: Conduct yearly curriculum review. Outcome/Objective: Design processes to solicit input from students, EAC, employers and other constituents on curricula and programs.
• Measure: The number and percentage of students who successfully complete the applicable FAA oral and practical exams. Outcome/Objective: Students will apply oral communications skills in the aviation field
• Measure: The number and percentage of students who successfully complete the applicable FAA written exams. Outcome/Objective: Students will demonstrate written communications skills in aviation
Implementation Description:

- Advisors ensure students have made sufficient progress in flight training prior to authorizing enrollment in follow-on classroom courses.
- Chief Instructor providing more thorough oral and practical stage exams.
- All student progress reviewed at monthly staff / CFI meetings.
- Suggestions for individual improvement offered. Classroom instructors & tutors (upperclassmen) available by appointment & after class.
- Chief offer open tutoring once weekly.

By implementing this, the result has been a record 96% Check-ride Pass Rate. This is the highest it has ever been within the program, and has resulted in the FAA trusting us [granting] in-house examining authority for:

- Private Pilot Certification
- Instrument Certification
- Commercial Certification

Ultimately, this will save our students almost $2000 in check-ride fees!

_Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments._

_Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below._

See Document Management Section.

*Undergraduate Program Information (2017-2018)*
Mission / Purpose

The mission of the Department of Biological Science is to provide comprehensive support, resources, and academic skills that will allow our students to prepare for their career choices through a deep understanding of the living world, an appreciation of the process by which that knowledge was obtained, and the ability to add to that foundation through critical thinking and research. Our students should be able to communicate their knowledge of biology to others, and use their knowledge to benefit themselves and society.

Our primary responsibility is to provide students at every academic level with meaningful educational experiences that creates a relevant foundation for their career goals. A strong faculty commitment to developing biological knowledge and providing service and research opportunities is invaluable to student success. With a guiding principle of continuous improvement, the Department faculty and staff will work collaboratively to:

- Integrate the scientific process, critical thinking, problem solving and analysis into our instructional framework;

- Engage students in our courses and laboratories with active, hands-on experiences that promote deep learning and intellectual growth;

- Encourage our students to be advocates for science and the power of the scientific approach as a way to meet the challenges our society faces;

- Pursue excellence in research and scholarship to advance our discipline, and provide training opportunities for our students;

- Participate in departmental governance and decision-making that is guided by scientific, respectful, thoughtful and demographic principles.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Strengthen and Support Academic Programs

Strengthen Academic Programs in Biological Sciences to enable students to reach their career goal. This includes providing students with excellence academic advising and mentoring to assist them in developing their career plan.

O/O 1: Strengthen academic programs

For incoming new biology majors, provide Recitation section and additional support time for BIOL 101/201/210 and 102/202 to measure success in passing course.
Related Measures:

**M 1: Measurements**

1. Actively train all faculty on advising
2. Revised curriculum; added courses
3. Monitor and assess each core course offered

2.1 External/internal grants funded; Grants submitted
2.2 Maintain common resources (Biotech)
2.3 Monitor number of students doing research - funded or not

3.1 Offer Professional Development course
3.2 Utilize student survey
3.3 Monitor success of placing graduates

4.1 Outreach to local schools
4.2 Conduct open houses and competitions for local schools
4.3 Serve on school advisory committees.

5.1 Utilize email system to communicate with Bio-students
5.2 Added small animal room.
5.3 Performing routine safety inspection; maintain DSU # system on equipment
5.4 Have social events for students

7.1 Review each course assessment outcome

8.1 Department developed Strategic Plan
8.2 Provide support to those having academic difficulty - utilize TA
8.3 Eliminate use of alt pins to ensure better advising
8.4 Adjuncts trained, evaluated and re-used
8.5 Review budget and spending routinely; coordinate with admin to ensure optimal support for students

9.1 Continue to explore partnerships for students
9.2 Develop DOD and DFS opportunities
9.3 Identify and add faculty instructors

Source of Evidence: Administrative measure - other

**O/O 7: Assessment**

Utilize results of assessment from core courses and from the university's General Education assessment system along with specific measurable targets to guide and drive continuous improvement of programs. In order to carry out this process, faculty must develop, implement, and utilize objective and credible assessment processes that (a) assess student learning outcomes; (b) review and improve the quality and performance of courses and programs; (c) report the results.

- *Example 5_Assessment*

**Relevant Associations:**

**Strategic Plan Associations:**
- *College of Mathematics, Natural Sciences, & Technology*
  1.3 Improve courses and curricula to maximize student learning, using proven research-based pedagogy and incorporating inquiry-based active-learning strategies.
  6.1 Utilize results of assessment with specific measurable targets to guide and drive continuous improvement of programs and processes, to understand trends, and to inform decisions.
  6.1 Develop, implement, and utilize objective and credible processes to (a) assess student learning outcomes; (b) review and improve the quality and performance of programs, departments, and the College; (c) monitor progress on the goals in this strategic plan; and (d) report the results.

*Delaware State University*
  1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and lifelong learners as measured by well-defined rubrics

**Related Measures:**

**M 1: Measurements**

1.1. Actively train all faculty on advising

1.2. Revised curriculum; added courses

1.3. Monitor and assess each core course offered
2.1 External/internal grants funded; Grants submitted

2.2 Maintain common resources (Biotech)

2.3 Monitor number of students doing research - funded or not

3.1 Offer Professional Development course
3.2 Utilize student survey
3.3 Monitor success of placing graduates

4.1 Outreach to local schools
4.2 Conduct open houses and competitions for local schools
4.3 Serve on school advisory committees.

5.1 Utilize email system to communicate with Bio-students
5.2 Added small animal room.
5.3 Performing routine safety inspection; maintain DSU # system on equipment
5.4 Have social events for students

7.1 Review each course assessment outcome

8.1 Department developed Strategic Plan
8.2 Provide support to those having academic difficulty - utilize TA
8.3 Eliminate use of alt pins to ensure better advising
8.4 Adjuncts trained, evaluated and re-used
8.5 Review budget and spending routinely; coordinate with admin to ensure spotal support for students

9.1 Continue to explore partnerships for students
9.2 Develop DOD and DFS opportunities
9.3 Identify and add faculty instructors

Source of Evidence: Administrative measure - other

**Target:**
   Obtain and analyze assessment data from all core courses in each program

**M 2:Course Assessment**
Assessment of programs will use data from course assessments carried out by faculty as well as assessment data on Biology students from the ADCS.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
Students assessed using the common departmental rubric will show improvement as they progress through the program.

**M 3: Graduate outcomes**
Track our students after graduation regarding their career status, i.e. graduate/professional school and gainful employment. We utilize Facebook, LinkedIn and direct communication with students.

Source of Evidence: Job placement data, esp. for career/tech areas

**Target:**
Have placement information on 50% of each year’s graduates within one year of graduation.

**G 2: Use Assessments**
Use assessment data from courses in the program to evaluate program success and how well student learning outcomes are being met. This will allow us to make the necessary changes in courses to ensure that students receiving every opportunity for academic success.

**O/O 3: Optimize programs for student goals**
Revise and continue to review curricula to better target career goals; align curricula for expected courses in professional programs (completed 2013).

Provide additional support in writing, literature, and analytical skills.

**Related Measures:**

**M 1: Measurements**

1. Actively train all faculty on advising
2. Revised curriculum; added courses
3. Monitor and assess each core course offered
2.1 External/internal grants funded; Grants submitted

2.2 Maintain common resources (Biotech)

**M 3:Graduate outcomes**
Track our students after graduation regarding their career status, i.e. graduate/professional school and gainful employment. We utilize Facebook, Linkedin and direct communication with students.

Source of Evidence: Job placement data, esp. for career/tech areas

**Target:**
Have placement information on 50% of each year’s graduates within one year of graduation

**G 3: Research Experience**

Increase student access to research experiences both internally and externally. Our goal is to increase the number research opportunities for students within the department and to encourage students to become involved in research as early as their freshman year. We also plan to increase the number of students participating in research and clinical internships outside of DSU.

**O/O 2: Increase research and access by students**

Increase the number and percentage of faculty with active research programs involving students and the publication and presentation of research results with student co-authors

Increase the number of students doing active research
Increase the number of students participating in external research programs.
Increase the number of students becoming involved in research as early as their freshman year.

**Related Measures:**

**M 1: Measurements**

1.1. Actively train all faculty on advising
1.2. Revised curriculum; added courses
1.3. Monitor and assess each core course offered

2.1 External/internal grants funded; Grants submitted

9.1 Continue to explore partnerships for students
9.2 Develop DOD and DFS opportunities
9.3 Identify and add faculty instructors

Source of Evidence: Administrative measure - other

**G 4: Education Quality**

Produce high quality graduates as measured by:

1. Scores on Biology Proficiency Exam and
2. Placements of graduates in Master's/PhD/MD/Post-Bac or other career positions.
3. Prepare students to enter in the job market.

**O/O 4: Outreach**

Improve outreach to local and regional schools to biology programs, to improve motivation and course-taking of pre-college students, and be a resource to teachers.
Extend outreach activities to middle school and elementary students to initiate the interest in STEM careers early.

Continue and increase partnerships and alliances with businesses and efforts to assist and attract under-served populations in the state.

Related Measures:

4. Outreach to local schools
   4.1 Outreach to local schools
   4.2 Conduct open houses and competitions for local schools
   4.3 Serve on school advisory committees.

5. Utilize email system to communicate with Bio-students
   5.1 Utilize email system to communicate with Bio-students
   5.2 Added small animal room.
   5.3 Performing routine safety inspection; maintain DSU # system on equipment
   5.4 Have social events for students

7. Review each course assessment outcome
   7.1 Review each course assessment outcome
8.1 Department developed Strategic Plan
8.2 Provide support to those having academic difficulty - utilize TA
8.3 Eliminate use of alt pins to ensure better advising
8.4 Adjuncts trained, evaluated and re-used
8.5 Review budget and spending routinely; coordinate with admin to ensure optimal support for students

9.1 Continue to explore partnerships for students
9.2 Develop DOD and DFS opportunities
9.3 Identify and add faculty instructors

Source of Evidence: Administrative measure - other

O/O 5: Increase use of technology

Establish effective communication methods to maximize information flow among students, staff, and faculty and beyond the campus.

When funding available, expand teaching space and research laboratory infrastructure to support and enable high quality instruction and forefront research.

Contribute interesting, engaging, and fun out-of-class activities featuring biological issues to enhance the environment on campus and involve Biology/Forensic/Health club.

Utilize team teaching in graduate and advanced courses to foster cohesiveness. Utilize innovative teaching pedagogy such as the flipped classroom model and programs such as infoshare, which allows real-time feedback from students.

Related Measures:

2.3 Monitor number of students doing research - funded or not

3.1 Offer Professional Development course
3.2 Utilize student survey
3.3 Monitor success of placing graduates

4.1 Outreach to local schools
4.2 Conduct open houses and competitions for local schools
4.3 Serve on school advisory committees.

5.1 Utilize email system to communicate with Bio-students
5.2 Added small animal room.
5.3 Performing routine safety inspection; maintain DSU # system on equipment
5.4 Have social events for students

7.1 Review each course assessment outcome

8.1 Department developed Strategic Plan
8.2 Provide support to those having academic difficulty - utilize TA
8.3 Eliminate use of alt pins to ensure better advising
8.4 Adjuncts trained, evaluated and re-used
8.5 Review budget and spending routinely; coordinate with admin to ensure optimal support for students

9.1 Continue to explore partnerships for students
9.2 Develop DOD and DFS opportunities
9.3 Identify and add faculty instructors

Source of Evidence: Administrative measure - other

**O/O 10: Provide valuable General Education courses**

Develop bio-related General Education courses that add value to student ‘life’ needs

Provide appropriate hands-on laboratory experiences

Continue to monitor course and laboratory experience to relate to modern global society and issues - for example expand sections on “Climate Change”

Utilize online teaching/courses for general education courses to meet the needs of non-traditional students pursuing a college degree.

**Related Measures:**

**M 1: Measurements**

1.1. Actively train all faculty on advising
1.2. Revised curriculum; added courses
1.3. Monitor and assess each core course offered

2.1 External/internal grants funded; Grants submitted

8.1 Department developed Strategic Plan
8.2 Provide support to those having academic difficulty - utilize TA
8.3 Eliminate use of alt pins to ensure better advising
8.4 Adjuncts trained, evaluated and re-used
8.5 Review budget and spending routinely; coordinate with admin to ensure optal support for students

9.1 Continue to explore partnerships for students
9.2 Develop DOD and DFS opportunities
9.3 Identify and add faculty instructors

Source of Evidence: Administrative measure - other

G 5: Curriculum Evaluation

Biological Sciences offers two BS degree (Forensic Biology and Biological Sciences); however, we have three tracks within Biological Sciences (Health Professions, Research Professions, and General). All curricula require the same core courses and the 'specialty' is developed with additional required courses. One aspect of evaluation of the success of each will use the post-graduate outcomes of graduates (e.g., medical/professional school, graduate school, teaching career, job placement, forensic
lab, etc.). Faculty and student feedback will also be considered in evaluating the structure and composition of the curriculum.

**O/O 3: Optimize programs for student goals**

Revise and continue to review curricula to better target career goals; align curricula for expected courses in professional programs (completed 2013)

Provide additional support in writing, literature, and analytical skills

**Related Measures:**

**M 1: Measurements**

1.1. Actively train all faculty on advising
1.2. Revised curriculum; added courses
1.3. Monitor and assess each core course offered

2.1. External/internal grants funded; Grants submitted
2.2. Maintain common resources (Biotech)
2.3. Monitor number of students doing research - funded or not

3.1. Offer Professional Development course
3.2. Utilize student survey
3.3. Monitor success of placing graduates

4.1. Outreach to local schools
4.2. Conduct open houses and competitions for local schools
4.3. Serve on school advisory committees.

5.1. Utilize email system to communicate with Bio-students
5.2. Added small animal room.
5.3. Performing routine safety inspection; maintain DSU # system on equipment
5.4. Have social events for students
7.1 Review each course assessment outcome

8.1 Department developed Strategic Plan  
8.2 Provide support to those having academic difficulty - utilize TA  
8.3 Eliminate use of alt pins to ensure better advising  
8.4 Adjuncts trained, evaluated and re-used  
8.5 Review budget and spending routinely; coordinate with admin to ensure optal support for students

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Summary of Department Goals 2009-2010
Implement new curriculum and focus on improving student academic preparation
Continue to evaluate courses and curriculum; develop honors program.
Recruit students to the Neuroscience PhD program
Increase research grant submissions; expand student research participation
Identify additional sources of funding for graduate students
Have a viable "Health Professions" resource for students

Established in Cycle: 2008-2009  
Implementation Status: In-Progress  
Priority: High  
Implementation Description: Faculty and Chair will continue, through departmental committee process, to implement these  
Projected Completion Date: 06/29/2011  
Responsible Person/Group: Chair  
Additional Resources Requested: Staff; equipment; technology  
Budget Amount Requested: $0.00 (no request)

Summary of Department Goals 2011-2015

Established in Cycle: 2008-2009  
Implementation Status: Planned  
Priority: High  
Implementation Description: Long-range plans
Projected Completion Date: 06/29/2015
Responsible Person/Group: Chair, Faculty - College
Additional Resources Requested: University support - including proper budgeting, especially in relation to lab fees, capital investments, and renewal/replacement items. More space.
Budget Amount Requested: $1,000,000.00 (recurring)
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Core Knowledge
Learning Objectives for students in the biological sciences include content based on the ability to:

SLO 1: Evolution
Analyzes situations or data using an understanding that evolution by natural selection explains both the unity and diversity of life

Relevant Associations:

DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Cumulative Exam on Core Courses Knowledge
This is a test given near the end of the spring semester of the Junior year. It is administered in BIOL 399, Junior Seminar course. It test the student's knowledge in Biol 101-102-210-215-310, the Core courses in Biology curricula. It is analyzed by the Assessment Committee, and reviewed by the department faculty. If a student fails (<60), student is required to take “Biology Review” course in fall of Senior year.

Source of Evidence: Standardized test of subject matter knowledge

Target:
Each student will obtain a score of 60% or higher on overall exam.

Findings (2016-2017) - Target: Not Reported This Cycle
The Cumulative Exam has been phased out and was not given in this academic year so there are no results from it to report. The department is in the process of transitioning to a course-centered, rubric-based assessment of student work. No results were gathered on this particular measure in this academic year.

Quantitative Reasoning  Every other year  Quantitative Reasoning GE assessment data  Assessment mechanism exists and is in use

Scientific Literature  Every year  Results from assessment in BIOL 299  Assessment implementation needs to be developed

Communication  Every other year  Writing in the Major GE assessment data  Assessment mechanism exists and is in use

Findings (2015-2016) - Target: Not Met
In the spring 2015 administration of the Biology Cumulative Exam, 13 of 29 students (44.8%) did not reach the target score. In the fall of 2015, 4 of these students retook the exam and all passed. Additionally, 6 students took the exam for the first time in the fall of 2015. Of these, 5 (83.3%) passed the exam.

Related Action Plans (by Established cycle, then alpha):

This is a test given near the end of the spring semester of the Junior year. It is administered in BIOL 399, Junior Seminar course. It test the student’s knowledge in Biol 101-102-210-215-310, the Core courses in Biology curricula. It is analyzed by the Assessment Committee, and reviewed by the department faculty. If a student fails (<60), student is required to take “Biology Review” course in fall of Senior year.

Source of Evidence: Standardized test of subject matter knowledge

Target:
Each student will obtain a score of 60% or higher on overall exam.

Findings (2016-2017) - Target: Not Met
The Cumulative Exam has been phased out and was not given in this academic year so there are no results from it to report. The department is in the process of transitioning to a course-centered, rubric-based assessment of student work. Some preliminary results from the new assessments are available and are reported below. These results are combined for both Biology program students and Forensic Biology students as both take this course.

In an assignment in BIOL 215 assessed using the departmental rubric, the following outcomes were reported -

- novice - 6.3%
- satisfactory - 50.0%
- proficient - 43.8%
- advanced - 0%

Findings (2015-2016) - Target: Not Met
In the spring 2015 administration of the Biology Cumulative Exam, 13 of 29 students (44.8%) did not reach the target score. In the fall of 2015, 4 of these students retook the exam and all passed. Additionally, 6 students took the exam for the first time in the fall of 2015. Of these, 5 (83.3%) passed the exam.

**M 5: General Education Assessments**
Use of available General Education Assessments outside of the Capstone course based on data in the Assessment Data Collection System.

Source of Evidence: Academic direct measure of learning - other
Target:
All students will score Satisfactory or higher on any Quantitative Reasoning assessment

Findings (2016-2017) - Target: Not Reported This Cycle
No Quantitative Reasoning assessment results for this period are recorded in the ADCS system.

Findings (2015-2016) - Target: Not Met
The QR assessment rubric has six separate objectives. Students in Biology were assessed in four separate courses in both Fall 2015 and Spring 2016. In all of the objectives, the percentage of students that did not meet target ranged from 20% to a high of 46.7%. Averaged over the six objectives, 62.2% of Biology students scored Satisfactory or higher for QR. This is an imprecise outcome in that these results represent assessments done in four different courses on 15 students over two semesters. The students also represented a mix of different statuses, from sophomore to senior. However, it does support anecdotal observations of student difficulty in successfully completing quantitative tasks. More tellingly, looking more closely at the results, only four of the 15 students were at least satisfactory in all six elements of the rubric.

SLO 8: Scientific Literature
Uses scientific literature to support and illuminate written and oral work

Relevant Associations:

DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 2: Research Project

BIOL 499

Source of Evidence: Capstone course assignments measuring mastery

Target:
All students assessed through the General Education Senior Capstone assessment will score Satisfactory or higher for Information Literacy

Findings (2016-2017) - Target: Not Met
The target was not met. Of the 17 Biology majors assessed, 1 scored unsatisfactory in this assessment. Of the rest, 2 were satisfactory, 10 were proficient and 4 were advanced. There was a high level of performance demonstrated by this assessment as demonstrated by the large proportion of the students who were either proficient or advanced.
Nevertheless, since one student was assessed as unsatisfactory, the target was not met.

**Findings (2015-2016) - Target: Met**
All students were Satisfactory or higher; 58.6% Satisfactory, 31.0% Proficient, 10.3% Advanced; n=29)

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Monitoring**
*Established in Cycle: 2016-2017*
We will follow data for at least one more year to see if the level of unsatisfactory performance continues or if it was an anomaly...

**SLO 9: Communication**
Communicates a variety of information in oral and written formats

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators

**Related Measures:**

**M 2: Research Project**
BIOL 499

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
All students assessed through the General Education Senior Capstone assessment will score Satisfactory or higher for Writing

**Findings (2016-2017) - Target: Not Met**
The target was not met. Of the 17 Biology majors assessed, 1 scored unsatisfactory in this assessment. Of the rest, 4 were satisfactory, 4 were proficient and 8 were advanced. These results demonstrated a high level of proficiency, with 12 of the 17 being either proficient or advanced. That almost half of the students were assessed at the advanced level is particularly noteworthy. Nevertheless, one student was assessed at an unsatisfactory level, so the target was not met.

**Findings (2015-2016) - Target: Not Met**
Not all students reached the target; 13.8% were unsatisfactory. Of the ones that met the goal, 34.5% were Satisfactory; 27.6% Proficient; and 24.1% were Advanced, n=29)

**M 5: General Education Assessments**  
Use of available General Education Assessments outside of the Capstone course based on data in the Assessment Data Collection System.

Source of Evidence: Academic direct measure of learning - other

**Target:**  
All students will score Satisfactory or higher on any Writing in the major assessment
Findings (2016-2017) - Target: Not Reported This Cycle
No Writing in the Major assessment results for this period for Biological Sciences students are recorded in the ADCS system.

Findings (2015-2016) - Target: Partially Met
This assessment was administered in the Junior Seminar (BIOL399) course in the Spring 2016 semester. There are five separate objectives within the assessment. The total number of students was 36 and, of these, either one or two scored below the target on each of the objectives. Three of the 36 students were not assessed. Averaged across the five objectives 23.9% scored Satisfactory, 33.9% were Proficient and 30.0% were Advanced.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Assessment at multiple points
Assessing students only at the end of their time in the program does not allow us to track student improvement as they progress through the program

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High
Projected Completion Date: 11/30/2016

Develop rubric
A rubric to assess student performance for each objective will be developed and student performance will be assessed in multiple courses at different points in the program using assignments that are organic to the courses. This will provide a more complete picture of student performance at various points in the program.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High
Projected Completion Date: 11/30/2016

Increase writing
This was a significant miss for such a critical element. It was also a higher proportion that missed target for writing than missed it in Junior Seminar as assessed by the General Education Writing in the Major assessment. We will monitor this over the next year or two to see if writing performance improves before making major program adjustments. All faculty will be reminded to emphasize writing in all courses so that students have multiple opportunities to gain experience writing in the major before reaching capstone.
Increased emphasis
Increased emphasis on this element of the capstone should be made in coming years to ensure that all students can perform at a satisfactory level at a minimum.

Monitor
The target was met and we will continue monitoring this element in this manner.

Monitor
The target was met and we will continue monitoring this element in this manner.

Monitor
The target was met and we will continue monitoring this element in this manner.

Opportunities
Opportunities for using quantitative reasoning skills must be provided in as many points in the curriculum as possible.

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High

**Replace exam as measure**  
The Biology Cumulative Exam does not have a practical way for us to evaluate student success in each of the objectives separately, thus it is an inadequate measure of program student learning outcomes and must be replaced.

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High

**Projected Completion Date:** 11/30/2016

**Review**  
Writing assessments were nearly on target. Considering that there were slightly more unsatisfactory results in Capstone, course content should be reviewed to make sure it aligns with the requirements of the Capstone.

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High

**Review coursework**  
Coursework needs to be reviewed to find some way of assessing this particular element.

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High

**Assessment development**  
The basic outline of what courses will be assessed and for which outcomes has been developed but the actual course measures using the program rubric need to be
developed by the relevant faculty and the results reported.

**Revised measures**
This measure will be removed and replaced by a course-centered rubric-based assessment

**Established in Cycle:** 2016-2017  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Cumulative Exam on Core Courses Knowledge | **Outcome/Objective:** Systems Biology

**Projected Completion Date:** 05/12/2018  
**Responsible Person/Group:** curriculum committee
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Scientific Proposal

After completing initial courses select a committee of 5 faculty to present a laboratory-based research proposal.

SLO 1: Core Biology knowledge
Demonstrate knowledge by completing your graduate courses

Related Measures:

M 1: Thesis Completion
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

Target:
All students will complete all required courses in the process of completing the program

Findings (2016-2017) - Target: Met
During the 2016-17 academic year, four students in the program were eligible to defend their theses. All four completed a successful thesis defense that was judged by their thesis committee to have demonstrated adequate core knowledge.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Measures will be revised
Established in Cycle: 2016-2017
All measures will be revised as they do not adequately measure student progress through the program.

SLO 2: Literature knowledge
Demonstrate knowledge of scientific literature in your research through use of references

Related Measures:

M 1: Thesis Completion
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without adequate demonstration of the use of the scientific literature. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, four students in the program were eligible to defend their theses. All four completed a successful thesis defense that was judged by their thesis committee to have demonstrated adequate use of the scientific literature.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Revised Measures**
*Established in Cycle: 2016-2017*
All measures will be revised as they do not adequately measure student progress through the program.

**SLO 3: Scientific Method**
Demonstrate through the experimental design of your proposed experimental laboratory research the ability to conduct hypothesis testing

**Related Measures:**

**M 1: Thesis Completion**
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without effective use of the scientific method. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, four students in the program were eligible to defend their theses. All four completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficient use of the scientific method in the development of a research program.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Revised Measures**  
*Established in Cycle: 2016-2017*  
All measures will be revised as they do not adequately measure student progress through the program.

**G 2: Complete and Defend a Research Project**  
After completing all courses, and performing the proposed biology laboratory-based research project, defend the results to your committee in an open forum to the scientific community.

**SLO 4: Conducting research**  
Under the guidance of a research advisor (and consulting with your committee) complete proposed thesis with laboratory experiments while making adjustments to techniques used and/or design if needed.

**Related Measures:**

**M 1: Thesis Completion**  
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**  
Will be measured indirectly through thesis completion in that a thesis cannot be successfully completed without completing a research program in a satisfactory manner. All graduates must complete this milestone.

**Findings (2016-2017) - Target: Met**  
During the 2016-17 academic year, four students in the program were eligible to defend their theses. All four completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficient conduct of scientific research in the development of a research project.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Revised Measures**  
*Established in Cycle: 2016-2017*  
All measures will be revised as they do not adequately measure student progress through the program.

**SLO 5: Defense preparation**  
Upon completion of research as proposed, verified by advisor and committee, prepare a public presentation on the research project and the outcome.

**Related Measures:**

**M 1: Thesis Completion**
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
As an integral part of the thesis process, a defense presentation will be created and presented by every graduate student in the program.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, four students in the program were eligible to defend their theses. All four completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficiency through the successful preparation of a defense of their thesis.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Revised Measures**
*Established in Cycle: 2016-2017*

All measures will be revised as they do not adequately measure student progress through the program.

**SLO 6: Public Communication**
Make a presentation to your committee and to the scientific public (advertised for 14 days) and answer questions from both.

**Related Measures:**

**M 1: Thesis Completion**
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**
As part of the thesis defense process, every student in the program will communicate the outcomes of their research in a public presentation in a manner that is acceptable to the thesis committee.

**Findings (2016-2017) - Target: Met**
During the 2016-17 academic year, four students in the program were eligible to defend their theses. All four completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficiency in public communication through their public presentation of their scientific results from their thesis.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Revised Measures**  
*Established in Cycle: 2016-2017*

All measures will be revised as they do not adequately measure student progress through the program.

**G 3: Write a MS Thesis**  
Report the research project in a Thesis that complies with DSU format and quality standards and is approved by your complete committee.

**SLO 6: Public Communication**  
Make a presentation to your committee and to the scientific public (advertised for 14 days) and answer questions from both.

**Related Measures:**

**M 1: Thesis Completion**  
Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

**Target:**  
As part of the thesis defense process, every student in the program will communicate the outcomes of their research in a public presentation in a manner that is acceptable to the thesis committee

**Findings (2016-2017) - Target: Met**  
During the 2016-17 academic year, four students in the program were eligible to defend their theses. All four completed a successful thesis defense that was judged by their thesis committee to have demonstrated proficiency in public communication through their public presentation of their scientific results from their thesis.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Revised Measures**  
*Established in Cycle: 2016-2017*

All measures will be revised as they do not adequately measure student progress through the program.

**SLO 7: Write a Thesis**  
Following DSU thesis guidelines convert your scientific findings to a completed thesis that is approved by your committee and by DSU academic administration for presentation to the Library for binding and accessible to all.
Related Measures:

M 1: Thesis Completion

Successful completion and public defense of the research project design by the student.

Source of Evidence: Senior thesis or culminating major project

Target:
As part of the thesis defense process, every student in the program will produce a thesis that documents the outcomes of their research that is acceptable to the thesis committee

Findings (2016-2017) - Target: Met

During the 2016-17 academic year, four students in the program were eligible to defend their theses. All four completed a successful thesis defense that was judged by their thesis committee to have produced a satisfactory thesis which documents their graduate research project.

Related Action Plans (by Established cycle, then alpha):

Mission / Purpose

Our mission is to provide a student-centered learning environment to develop successful business professionals with a global perspective. We emphasize academic excellence through innovation and integrity in teaching, professional development, applied and instructional research, and outreach.

Goals without Outcome/Objective Relationships Specified

G 1:G 2: Student Learning Goals

The MBA program has established the five student learning goals to see the outcomes/objectives and measures/findings, and then to apply the findings to the curriculum modifications.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1:SLO 1: Ethical Decision Making

The student identifies and illustrates ethical issues, concepts or theories; Student demonstrates organizational ethics within the limitations of corporate interests; Student identifies stakeholder positions and interests; Student demonstrates ethically based decision making.

Relevant Associations:

Standard Associations:
AACSB 2016 Standards for Business Accreditation
8 CURRICULA MANAGEMENT AND ASSURANCE OF LEARNING: The school uses well-documented, systematic processes for determining and revising degree program learning goals; designing, delivering, and improving degree program curricula to achieve learning goals; and demonstrating that degree program learning goals have been met.

DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Strategic Plan Associations:
College of Business
1 Develop programs(undergraduate and graduate) and processes to enhance student learning, professional development and success.
Delaware State University

1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice

**Related Measures:**

**M 1:M 1: Measurement on Ethical Decision Making Learning Goal**

After the visitation of the accreditation body (AACSB) in Spring 2016 and re-accreditiation, the MBA program has decided to begin the measurements again from next academic year cycle (2017-18). The program has 10 times of opportunity (10 semesters) to assess each learning goal and usually executes only three (3) assessments for each learning goal during the accreditation period. The below three measurements were for the last 5 years of accreditation period (2011-16). This Learning Goal was measured in Spring 2012, Spring 2015, and Fall 2015 in the MBA course, Business Law, and Ethics and Financial Management, using a few case analyses assignments. The result of the Fall 2015 measurement met the achievement target of 80%. The program will measure it continuously in the future to see if the results are consistent. The COB Graduate Program Committee recommended moving the target up if the results are consistent.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**

The target had moved to 80% since 2012 measurement and analysis. The target 80% includes both (1) Exceeds Standard and (2) Acceptable in the measurement.

**Findings (2017-2018) - Target: Not Reported This Cycle**

**Finding (2017-2018) - Target: Not Reported This Cycle**

As I mentioned in the previous section, the learning goal has not been measured during this academic year (2017-18). However, the MBA program plans to have the assessment on the learning goal in the next academic year (2018-19). There were three measurements on this Outcome/Objective since Spring 2012 (2nd in Spring 2015, 3rd in Fall 2015). The third measurement which was done in Fall 2015 was measured in the MBA course Financial Management using a case analysis assignment. Changes Made Based on Assessment Results: During March 2, 2016, GPC meeting, the committee discussed the results. The result met the target of 80%, but the percent that met the target was lower than the previous measurement. The committee recommended not changing the target. Assessment Tool: Ethical Decision Making - Measurement 3 Assessment Tool This skill was measured in Fall, 2015 in the MBA course Financial Management using a case analysis assignment. Use of
Assessment Results Learning Objectives Exceeds Standard Acceptable Below Standard Percent Met Target Ability to identify and illustrate ethical issues, concepts or theories. 1 (20%) 3 (60%) 1 (20%) 80% Ability to demonstrate organizational ethics within the limitations of corporate interests. 1 (20%) 3 (60%) 1 (20%) 80% Identifies stakeholder positions and interests. 1 (20%) 3 (60%) 1 (20%) 80% Demonstrates ethically based decision making. 1 (20%) 3 (60%) 1 (20%) 80% N = 5 Instructor’s Observation: The students, in general, appeared to understand the learning objectives of ethical decision-making but were often unable to express it from a finance perspective. Some of the students were able to link the ethical decision to long-term profitability. Changes Made Based on Assessment Results During March 2, 2016, GPC meeting, the committee discussed the results. The result met the target of 80%, but the percent that met the target was lower than the previous measurement. The committee recommended not changing the target. The target and finding were up to Fall 2015 and are the same as the previous year’s target and finding.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Planned Action on Ethical Decision Making Learning Goal
Established in Cycle: 2015-2016
The assessment of Ethical Decision Making is planned to measure at least three times from Fall 2016 to Spring 2021 to assess stu...

SLO 2: SLO 2: Data Gathering, Analysis, and Interpretation

The student demonstrates knowledge of the tools and techniques of data gathering; Student applies critical thinking skills to create a varied array of data gathering and analysis methodologies; Student demonstrates an understanding of data gathering and evaluates findings appropriately.

Relevant Associations:

Standard Associations:
AACSB 2016 Standards for Business Accreditation
8 CURRICULA MANAGEMENT AND ASSURANCE OF LEARNING: The school uses well-documented, systematic processes for determining and revising degree program learning goals; designing, delivering, and improving degree program curricula to achieve learning goals; and demonstrating that degree program learning goals have been met.

DSU Learning Goal Associations:
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Strategic Plan Associations:
College of Business
1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.

**Related Measures:**

**M 2:M 2: Measurement on Data Gathering, Analysis, and Interpretation Learning Goal**

After the visitation of the accreditation body (AACSB) in Spring 2016 and re-accreditation, the MBA program has decided to begin the measurements again from next academic year cycle (2017-18). The program has 10 times of opportunity (10 semesters) to assess each learning goal and usually executes only three (3) assessments for each learning goal during the accreditation period (5 years). The below three measurements were for the last 5 years of accreditation period (2011-16). The Learning Goal was measured in the MBA course, Operations Analysis & Management, in Spring 2012, Fall 2013, and Fall 2014. A Linear Programming exam questions were used to measure the skills.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target:**

This academic year's target has not been changed from previous cycle's 70%, based on the previous year's measurement and analyses (Findings)

**Findings (2017-2018) - Target: Not Reported This Cycle**

This measurement has not been assessed during this academic year just after the re-accreditation. There were three measurements on this Outcome/Objective since Spring 2012 (2nd in Fall 2013, 3rd in Fall 2014). The third measurement which was done in Fall 2014 was measured in the MBA course Operations Analysis & Management using a Linear Programming exam question. The target (minimum 70%) met by 94% in "Demonstrates knowledge of the tools and techniques of data gathering," by 75% in "Applied critical thinking skills to create a varied array of data gathering and analysis methodologies,"

and did not meet by 69% in "Demonstrates an understanding of data gathering and evaluates findings appropriately. Changes Made Based on Assessment Results: During October 7, & 21, 2015 GPC meeting, the committee discussed the results. The committee recommended that the instructor put more emphasis on data gathering and evaluating findings in class. Assessment Tool: Data Gathering, Analysis, and Interpretation - Measurement 3 Assessment Tool

This skill was measured in the MBA course Operations Analysis & Management in Fall 2014. A Linear Programming exam question was used to collect data. Use of Assessment Results Learning Objectives Exceeds Standard Acceptable Below Standard Percent Met Target Demonstrates knowledge in the tools and techniques of data gathering. 9 (56%) 6 (38%) 1 (6%) 94% Applied critical thinking skills to create a varied array of data gathering and analysis methodologies. 9 (56%) 3 (19%) 4 (25%) 75%
Demonstrates an understanding of data gathering and evaluates findings appropriately. 9 (56%) 2 (13%) 5 (31%) 69% N = 16 Changes Made Based on Assessment Results During October 7, & 21, 2015 GPC meeting, the committee discussed the results. The committee recommended that the instructor put more emphasis on data gathering and evaluating findings in class.

**Planned Action on Data Gathering, Analysis, and Interpretation Learning Goal**

*Established in Cycle:* 2015-2016

The assessment of Data Gathering, Analysis, and Interpretation is planned to measure at least three times from Fall 2016 to Spring...

**SLO 3: Information Technology**

To see if our students display information technology skills, students use networks i.e., Internet resources and library of databases, to obtain reliable information on assigned topics, download, and document necessary files. In detail, the outcome/objectives is to see if students effectively demonstrate how IT is applied in business and demonstrates knowledge of current & emerging technologies.

**Relevant Associations:**

**Standard Associations:**

AACSB 2016 Standards for Business Accreditation

8 CURRICULA MANAGEMENT AND ASSURANCE OF LEARNING: The school uses well-documented, systematic processes for determining and revising degree program learning goals; designing, delivering, and improving degree program curricula to achieve learning goals; and demonstrating that degree program learning goals have been met.

**DSU Learning Goal Associations:**

8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

**Strategic Plan Associations:**

**College of Business**

1 Develop programs(undergraduate and graduate) and processes to enhance student learning, professional development and success.

5 : Ensure use of technology resources in all aspects of student learning, including curriculum development, pedagogy and student advising.

**Delaware State University**

1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and lifelong learners as measured by well-defined rubrics.
Related Measures:

**M 3:M 3: Measurement on Information Technology Learning Goal**

After the visitation of the accreditation body (AACSB) in Spring 2016 and re-accreditation, the MBA program has decided to begin the measurements again from next academic year cycle (2017-18). The program has 10 times of opportunity (10 semesters) to assess each learning goal and usually executes only three (3) assessments for each learning goal during the accreditation period (5 years). The below three measurements were for the last 5 years of accreditation period (2011-16). The learning goal was measured in Spring 2012, Fall 2014, and Fall 2015 in the MBA course, Information & Technology Management. A case analysis of IT application, and two on-line discussion topics were used as instruments in assessing this skill.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
Based on the result of the previous measurement cycle (Findings), the target of this year's measurement has not been changed. It is still 75% which includes (1) Exceeds Standard (2) Acceptable in the measurement.

**Findings (2017-2018) - Target: Not Reported This Cycle**

This measurement has not been assessed during this academic year (2017-18) and the findings of the previous cycle are as follows:. There were three measurements on this Outcome/Objective since Spring 2012 (2nd in Fall 2014, 3rd in Fall 2015). The third measurement which was done in Fall 2015 was measured in the MBA course Information & Technology Management using a case analysis on IT application and two on-line discussion topics. The target met by 90% in "Student is able to use networks i.e., Internet resources and library databases, to obtain reliable information on assigned topic, download, and document necessary files," did not meet by 70% in "Ability to effectively demonstrate how IT is applied in business," and met by 80% in "Ability to effectively demonstrate knowledge of current & emerging technologies." Changes Made Based on Assessment Results: During March GPC meeting (3/2/2016), the committee discussed the results. The committee recommended measuring it again after spending more time on IT application in business.

**Assessment Tool:** Information Technology - Measurement 3 Assessment Tool

This skill was measured in Fall 2015 in the MBA course Information Technology Management. A case analysis of IT application and two on-line discussion topics were used as instruments in assessing this skill. Use of Assessment Results Learning Objectives Exceeds Standard Acceptable Below Standard Percent Met Target A student is able to use networks i.e., Internet resources and library databases, to obtain reliable information on assigned topic, download, and document necessary files. 6 (60%) 3 (30%) 1 (10%) 90% Ability to effectively demonstrate how IT is applied in business 3 (30%) 4 (40%) 3 (30%) 70% Ability to effectively demonstrate
knowledge of current & emerging technologies 3 (30%) 5 (50%) 2 (20%) 80% N = 10 Instructor's Observations: A case analysis (The Challenges of Local System Design for Multinationals: The Maxfli Sales Force Automation Systems at BAT) was used to measure the second objective and two online discussion topics on the current and emerging information technologies (Mobile Computing and Big Data) were used to measure the first and third objectives. The result of this measure suggests that the MBA courses need to include more learning on how IT is applied in business. Changes Made Based on Assessment Results During March GPC meeting (3/2/2016), the committee discussed the results. The committee recommended measuring it again after spending more time on IT application in business

Planned Action of Information Technology Learning Goal
Established in Cycle: 2015-2016
The assessment of Information Technology is planned to measure at least three times from Fall 2016 to Spring 2021 to assess stud...

SLO 4: Global, Culture, and Diversity
Capacity to understand differences and interconnectedness between societies and organizations; Student demonstrates awareness of global economic and political environment; Student demonstrates awareness of different socio-cultural environments and its relationship to business; Student demonstrates awareness of diversity in global business operations; Student demonstrates the understanding of the organization of global business operations

Relevant Associations:

Standard Associations:
AACSB 2016 Standards for Business Accreditation
8 CURRICULA MANAGEMENT AND ASSURANCE OF LEARNING: The school uses well-documented, systematic processes for determining and revising degree program learning goals; designing, delivering, and improving degree program curricula to achieve learning goals; and demonstrating that degree program learning goals have been met.

Strategic Plan Associations:
College of Business
1 Develop programs(undergraduate and graduate) and processes to enhance student learning, professional development and success.
Delaware State University
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice

Related Measures:

M 4: Measurement on Global, Cultural, and Diversity learning Goal
After the visitation of the accreditation body (AACSB) in Spring 2016 and re-accreditation, the MBA program has decided to begin the measurements again from next academic year cycle (2017-18). The program has 10 times of opportunity (10 semesters) to assess each learning goal and usually executes only
three (3) assessments for each learning goal during the accreditation period (5 years). The below three measurements were for the last 5 years of accreditation period (2011-16). Before this year's assessment, the learning goal was measured in Spring 2012, Fall 2014, and Spring 2015 in the MBA course, Marketing Management, using two distinct cases entitled: 'Mary Kay India: The Hair Care Product Line Opportunity, and VF Brands: Global Supply Chain Strategy.'

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target:**
Based on the result of the previous measurement cycle (Findings), the target of this year's measurement has not been changed from 70% and is still 70% which includes (1) Exceeds Standard (2) Acceptable in the measurement

**Findings (2017-2018) - Target: Not Reported This Cycle**

The learning goal has not been measured during this academic year (2017-18). Based on the findings of the previous cycle (below), the MBA program plans to assess the learning goal during coming academic year (2017-18). There were three measurements on this Outcome/Objective since Spring 2012 (2nd in Fall 2014, 3rd in Spring 2015). The third measurement which was done in Spring 2015 was measured in the MBA course Marketing Management using two cases entitled: 'Mary Kay India: The Hair Care Product Line Opportunity,' and 'VF Brands: Global Supply Chain Strategy.' The target met by 89% in "Student demonstrates a broad understanding of cultural diversity and global issues," by 78% in "Student is able to demonstrate awareness of cultural differences." The third learning objectives, 'Student demonstrates an understanding of socioeconomic class, and culture, to assist in the understanding of racial and ethical issues and how they influence internal, external, and global diversity' was not assessed in this measurement. Changes Made Based on Assessment Results: During October 7, & 21, 2015 GPC meeting, the committee discussed the results. The result met the target for the first two objectives, but the case used did not have the third learning objective component. The committee recommended exploring a revision of the rubrics for the third learning objective because it is too much comprehensive and inclusive.

**Assessment Tool:** Global, Cultural, and diversity - Measurement 3

**Assessment Tool The skill was measured in Spring 2015 in the MBA course Marketing Management using two distinct cases entitled: 'Mary Kay India: The Hair Care Product Line Opportunity, and VF Brands: Global Supply Chain Strategy.' Use of Assessment Results Learning Objectives Exceeds Standard Acceptable Below Standard Percent Met Target A student demonstrates a broad understanding of cultural diversity and global issues. 2 (22%) 6 (67%) 1 (11%) 89% A student is able to demonstrate awareness of cultural differences. 0 7 (78%) 2 (22%) 78% A student demonstrates an understanding of socioeconomic class, and culture, to assist in the understanding of racial and ethical issues and how they influence internal, external, and global diversity. n/a n/a n/a n/a N = 9

**Instructor's Observation:** For the international component of Marketing Management students were to assess two distinct cases-Mary Kay India: The Hair Care Product Line Opportunity, and VF Brands: Global Supply chain Strategy. Unfortunately, the Mary Kay India: The Hair Care Product Line Opportunity case was the second case and we were unable to discuss it in class, due to the class not meeting on Election Day. Since this was not
a formal case write-up, only case notes (a two-page summary) were required. So the assessment of cultural awareness is very limited. While the VF Brands case was discussed in class, this case had less to do with cultural awareness and more with economic and infrastructural resources. With these limitations in mind, there was no mention of sexual orientation and very little mention of socioeconomic status. By not having the in-class discussion, we were unable to touch upon these topics in terms of global diversity. Changes Made Based on Assessment Results During October 7, & 21, 2015 GPC meeting, the committee discussed the results. The result met the target for the first two objectives, but the case used did not have the third learning objective component. The committee recommended exploring a revision of the rubrics for the third learning objective because it is too much comprehensive and inclusive.

**Planned Action Plan for Global, Cultural, and Diversity Learning Goal**

*Established in Cycle: 2015-2016*

The assessment of Global, Cultural, and Diversity is planned to measure at least three times from Fall 2016 to Spring 2021 to as...

**SLO 5: Leadership and Communication**

The Student effectively formulates personal leadership philosophies; Student identifies leadership problems and makes appropriate recommendations; Student effectively expresses its leadership philosophy orally; Student succinctly summarizes information in writing; Student effectively presents complex information orally

**Relevant Associations:**

**Standard Associations:**

AACSB 2016 Standards for Business Accreditation

8 CURRICULA MANAGEMENT AND ASSURANCE OF LEARNING: The school uses well-documented, systematic processes for determining and revising degree program learning goals; designing, delivering, and improving degree program curricula to achieve learning goals; and demonstrating that degree program learning goals have been met.

**Strategic Plan Associations:**

College of Business

1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.

**Related Measures:**

**M 5: Measurement on Leadership & Communication Learning Goal**

After the visitation of the accreditation body (AACSB) in Spring 2016 and re-accreditation, the MBA program has decided to begin the measurements again from next academic year cycle (2017-18). The program has 10 times of opportunity (10 semesters) to assess each learning goal and usually executes only three (3) assessments for each learning goal during the accreditation period (5 years). The below three measurements were for the last 5 years of accreditation
period (2011-16). The learning goal has not been measured during this academic year. Based on the previous academic year's measurement (Findings), the MBA program has planned to assess the learning goal in next academic year cycle (2017-18). This learning goal was evaluated in the MBA course, Organizational Leadership & Behavior, in Spring 2012, Fall 2014, and Fall 2015. The measurement in Fall 2015 was assessed using diverse assignments - 1) Self-Leadership Project, 2) Modern Business Leader Analysis Project, 3) six written case assignments (Harvard Business School Cases), 4) Book Chapter Presentations and 5) Class Discussions

Source of Evidence: Project, either individual or group

**Target:**
The original target was 70% and changed to 75% which includes (1) Exceeds Standard (2) Acceptable in the measurement after the Fall 2014 measurement and analyses. The target remains at 75%.

**Findings (2017-2018) - Target: Not Reported This Cycle**

The learning goal has not been assessed during this academic year (2017-18). Based on the findings in the previous measurements (below), the MBA program has monitored the learnings in this learning goal and planned to assess the learning goal in the next academic year (2017-18). There were three measurements on this Outcome/Objective since Spring 2012 (2nd in Fall 2014, 3rd in Fall 2015). The third measurement which was done in Fall 2015 was measured in the MBA course Organizational Leadership & Behavior class using diverse assignments - 1) Self-Leadership Project, 2) Modern Business Leader Analysis Project, 3) six written case assignments (Harvard Business School Cases), 4) Book Chapter Presentations, and 5) Class Discussions. The target (minimum 70%) did not meet by 73% in "Students effectively formulate personal leadership philosophies," by 73% in "Students identify problems and make appropriate recommendations," by 73% in "Students effectively express their leadership philosophy orally," and by 73% in "Students succinctly summarize information in writing," and by 64% in "Students effectively present complex information orally."

Changes Made Based on Assessment Results: During March GPC meeting (3/2/2016), the committee discussed the results. The committee recognized that the new target 75% (was 70% and moved to 75% in Fall 2015) was not met, although they were very close. The committee decided to closely monitor the results from next measurement. Assessment Tool: Leadership & Communication - Measurement 3 Assessment Tool This learning outcome was evaluated in the MBA course Organizational Leadership & Behavior class in Fall 2015 using diverse assignments - 1) Self-Leadership Project, 2) Modern Business Leader Analysis Project, 3) six written case assignments (Harvard Business School Cases), 4) Book Chapter Presentations, and 5) Class Discussions. Use of Assessment Results Learning Objectives Exceeds Standard Acceptable Below Standard Percent Met Target Students effectively formulate personal leadership philosophies. 2 (18%) 6(55%) 3 (27%) 73% Students identify problems and make appropriate recommendations. 2 (18%) 6(55%) 3 (27%) 73% Students effectively express their leadership philosophy orally.
2 (18%) 6 (55%) 3 (27%) 73% Students succinctly summarize information in writing. 0 (0%) 8 (73%) 3 (27%) 73% Students effectively present complex information orally. 1 (9%) 6 (55%) 4 (36%) 64% N = 11 

Instructor's Observation: 1. Provide writing and speaking support to international students for whom English is not the first language. 2. The COB must ensure that the students have a level of mastery of the English language commensurate to the requirements for graduate business education. 3. Work closely with the DSU writing center to help international students improve their knowledge of the English language and ensure their academic success. 4. Because the course is writing and reading intensive, it would be better for international students not to take it as their first course, unless they have an 'improved' knowledge of the English language.

Changes Made Based on Assessment Results During March GPC meeting (3/2/2016), the committee discussed the results. The committee recognized that the new target 75% was not met, although they were very close. The committee decided to closely monitor the results from next measurement.

Planned Action on Leadership & Communication Learning Goal
Established in Cycle: 2015-2016
The assessment of Leadership & Communication is planned to measure at least three times from Fall 2016 to Spring 2021 to assess ...

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Offering 4+1 MBA Options with Other Programs

The MBA program is under exploring stage to find out the possibility to offer 4+1 MBA options with other programs in the campus.

Implementation Status: Planned
Priority: Medium
Implementation Description: Under an exploring stage.
Projected Completion Date: 06/30/2018
Responsible Person/Group: Dr. Kim (MBA Director)

Planned Action of Information Technology Learning Goal
The assessment of Information Technology is planned to measure at least three times from Fall 2016 to Spring 2021 to assess students' learning objectives in the learning goal. The COB accreditation body, AACSB, requires to measure our learning goals and recommends making changes based on our findings.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: M 3: Measurement on Information Technology Learning Goal |
  Outcome/Objective: SLO 3: Information Technology

Projected Completion Date: 05/31/2021
Responsible Person/Group: MBA Director
Additional Resources Requested: No

Planned Action on Data Gathering, Analysis, and Interpretation Learning Goal
The assessment of Data Gathering, Analysis, and Interpretation is planned to measure at least three times from Fall 2016 to Spring 2021 to assess students' learning objectives in the learning goal. The COB accreditation body, AACSB, requires to measure our learning goals and recommends making changes based on our findings.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: M 2: Measurement on Data Gathering, Analysis, and Interpretation Learning Goal |
  Outcome/Objective: SLO 2: Data Gathering, Analysis, and Interpretation

Projected Completion Date: 05/31/2021
Responsible Person/Group: MBA Director
Additional Resources Requested: No

Planned Action on Ethical Decision Making Learning Goal
The assessment of Ethical Decision Making is planned to measure at least three times from Fall 2016 to Spring 2021 to assess students' learning objectives in the learning goal. The COB accreditation body, AACSB, requires to measure our learning goals and recommends making changes based on our findings.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):

  Outcome/Objective: SLO 4: Global, Culture, and Diversity

Projected Completion Date: 05/31/2021
Responsible Person/Group: MBA Director
Additional Resources Requested: No

Annual Report Section Responses

Executive Summary (1-2 pages)
The program was without clear leadership in academic year 2017-18. New MBA Program Director is hired and is working out of Wilmington Campus to promote the program within the region and work closely with admissions, graduate school and corporations in the area. The MBA program in the College of Business at Delaware State University is struggling with maintaining its enrollment with regional competitors, thus the MBA program started its special task force in Spring 2017. The task force developed a report in April 2017 which includes: Executive Summary, Current State of DSU MBA Program, Methodology, SWOT Analysis, Marketing Mix, Target Market Demographics, Recommendations, Requested Budget, Proposed Key Personnel, Enrollment Projection, and the Next Step the MBA program should do. The MBA program really hopes to have the support included in the report (Attached). In detail, the MBA program has continued building up its program quality, offering newly added concentrations, focusing on the enrollment increase in the 2017-2018 academic year as follows: 1. built up an MOU with DSU-NBUT Accounting program to select students and prepare them to apply to our MBA program; 2. ready to offer 6 online MBA foundation courses and 8 online MBA core courses; 3. developing 2 elective courses to offer a pure online General MBA Degree program in Fall 2017; 4. ready to offer hybrid MBA concentration degrees in Fall 2017. The MBA office has done the followings to increase its enrollment: 1. held the MBA Recruitment Fairs twice in this academic year (November 2016 & March 2017); 2. updated and published an MBA brochure and an MBA information card; 3. updated a 4+1 MBA-CPA program brochure; 4. updated a Chinese 4+1 MBA-CPA program brochure for the Chinese audience; 5. distribute the brochures and information cards to outside of the campus; 6. visited 8 Chinese Universities to promote our MBA and MBA-CPA programs;
Mission / Purpose

The Department of Business Administration shares the same mission as the College of Business (COB). The COB mission: Our mission is to provide a student-centered learning environment to develop successful business professionals with a global perspective. We emphasize academic excellence through innovation and integrity in teaching, professional development, applied and instructional research, and outreach.

The mission and objectives for the College of Business were developed by stakeholders as a part of the strategic planning process during the period 2001-2003. The stakeholder group included the dean, chairs, the entire faculty, student representatives, alumni representatives and members of the Executive Advisory Committee. The Mission was revised, reviewed, and endorsed by the stakeholders to be the current one in 2008. The mission of the Department of Business Administration is congruent with the mission of Delaware State University. The mission includes providing meaningful and relevant education that emphasizes both the liberal and professional aspects of higher education. It prepares students for lifelong learning, emphasizes innovation and technology in teaching and learning, maintains continuous improvement of students, faculty, staff and programs, and promotes student professional development. It also maintains an appreciation of globalization in teaching and learning. By doing this, it includes the liberal art components and professional aspects of specified education of the parent institution, with the focus on Management education.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Develop programs and processes to enhance student learning

Develop programs and processes: (1) to enhance student learning and professional development, and (2) to enhance resources to meet the needs of department.

O/O 1: Review the undergraduate curricula

Objective 1.1: Review the undergraduate curricula to ensure the currency of programs and concentrations;

Relevant Associations:

Standard Associations:

AACSB 2016 Standards for Business Accreditation
8 CURRICULA MANAGEMENT AND ASSURANCE OF LEARNING: The school uses well-documented, systematic processes for determining and revising degree program learning goals; designing, delivering, and improving degree program curricula to achieve learning goals; and demonstrating that degree program learning goals have been met.
9 CURRICULUM CONTENT: Curriculum content is appropriate to general expectations for the degree program type and learning goals.

**Strategic Plan Associations:**
- College of Business
  1. Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
  8. Improve the process of program review to ensure compliance with requirements for certification and accreditation.

**Delaware State University**
  1.1. Ensure all students are provided high-quality programs that are recognized nationally and internationally

**Related Measures:**

**M 1: AOL assessment plan**
Annual Review of AOL assessment plan

Source of Evidence: Professional standards

**Target:**
Review AOL Plan annually.

**Findings (2016-2017) - Target: Not Reported This Cycle**
AOL plan was set to review during this academic year, but was not measured because of the extended AACSB accreditation peer review team visit. Thus, it was decided to postpone this year's AOL measurement to 17-18 academic year. AACSB AOL has a 5-year cycle and needs to measure at least three times to close the loop.

**Findings (2015-2016) - Target: Met**
AOL plan was reviewed and updated for FY 15/16 with time lines for some of the rubrics adjusted due to course offering changes.

**O/O 2: Develop and maintain student advisement and mentor processes**
Objective 1.2: Develop and maintain student advisement and mentor processes;

**Relevant Associations:**

**Standard Associations:**
- AACSB 2016 Standards for Business Accreditation
- 4 STUDENT ADMISSIONS, PROGRESSION, AND CAREER DEVELOPMENT: Policies and procedures for student admissions, as well as those that ensure academic progression toward degree completion, and supporting career development are clear, effective, consistently applied, and aligned with the school's mission, expected outcomes, and strategies.
- 10 STUDENT-FACULTY INTERACTIONS: Curricula facilitate student-faculty and student-student interactions appropriate to the program type and achievement of learning goals.

**Strategic Plan Associations:**
- College of Business
  9. Develop and implement plans and programs to increase placement of COB graduates and encourage businesses to recruit COB graduates.
- Delaware State University
2.1 Increase retention and graduation rates by at least two percent annually for the next five years
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 6: Advisor/Advisee**
Advisers access advisee information on Banner to facilitate deeper adviser/advisee interaction.

Source of Evidence: Professional standards

**Target:**
Update adviser/advisee list annually and periodically check for changes in advisers.

**Findings (2016-2017) - Target: Met**
Advisement Center updates adviser/advisee list annually. The center has assigned advisee by the alphabetical order.

**Findings (2015-2016) - Target: Met**
Advisors have been updated in Banner for all students designated as sophomores, juniors and seniors

**O/O 3: Develop guidelines for syllabus**
Objective 1.3: Develop guidelines for syllabus for multiple sectioned classes;

**Relevant Associations:**

**Standard Associations:**
AACSB 2016 Standards for Business Accreditation
9 CURRICULUM CONTENT: Curriculum content is appropriate to general expectations for the degree program type and learning goals.
12 TEACHING EFFECTIVENESS: The school has policies and processes to enhance the teaching effectiveness of faculty and professional staff involved with teaching across the range of its educational programs and delivery modes.

**Strategic Plan Associations:**
College of Business
1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 7: Standard syllabi**
Standardization of syllabi for classes with multiple sections

Source of Evidence: Professional standards
Target:
Multiple sections of same class have standard student learning objectives.

**Findings (2016-2017) - Target: Met**
The department office checks the common syllabi for the classes that have multiple sections.

**Findings (2015-2016) - Target: Met**
Faculty teaching different sections of same course have standard student learning objectives, but have freedom to organize class as they see appropriate.

G 2: Ensure the use of technology and maintain the currency of it
Ensure the use of technology and maintain the currency of it to enhance student learning, curriculum development, pedagogy, and student advising.

O/O 4: Maintain the use of ERP (SAP) modules across curriculum
Objective 2.1: Maintain the use of ERP (SAP) modules across curriculum to enhance new technology (ERP) used in industries.

**Relevant Associations:**

**Standard Associations:**
AACSB 2016 Standards for Business Accreditation
13 STUDENT ACADEMIC AND PROFESSIONAL ENGAGEMENT: Curricula facilitate student academic and professional engagement appropriate to the degree program type and learning goals.

**Strategic Plan Associations:**
College of Business
5: Ensure use of technology resources in all aspects of student learning, including curriculum development, pedagogy and student advising.
Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally

**Related Measures:**

**M 4: Technology infusion of courses**

Source of Evidence: Professional standards

- # of web enhanced courses
- # of courses including SAP material
Target:
Have at least 2 courses with SAP integrated each semester.

**Findings (2016-2017) - Target: Met**
Three courses currently have SAP infused into the courses.

1. MGMT-100 (Intro to Business) teaches 'Design Thinking' and ERPSim in the 7 sections of the course
2. MIS-305 (MIS) teaches Global Bike with SAP ERPs
3. MIS-300 (Business Processes with ERPs) teaches business processes with SAP ERPs

**Findings (2015-2016) - Target: Met**
Intro to Business and MIS currently have SAP infused into the courses.

O/O 5: Assess the upgrade and need of technologies
Objective 2.2: Assess the upgrade of technology and the need of new technology;

**Relevant Associations:**

**Standard Associations:**
AACSB 2016 Standards for Business Accreditation
12 TEACHING EFFECTIVENESS: The school has policies and processes to enhance the teaching effectiveness of faculty and professional staff involved with teaching across the range of its educational programs and delivery modes.

**Strategic Plan Associations:**
College of Business
5: Ensure use of technology resources in all aspects of student learning, including curriculum development, pedagogy and student advising.

Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 12: Lab and Classroom Technology**
Lab and classroom technology (i.e. # and type of software and hardware)

Source of Evidence: Professional standards

**Target:**
Ensure that students and faculty have software they need (i.e. course specific software, Microsoft Office, SAS, or SPSS)

**Findings (2016-2017) - Target: Met**
Faculty and students in the COB have access to these softwares in the labs and classrooms.

1. Faculty and students in MIS has MS SQL Servers, Global Bikes (SAP), and SAP ERP in computer lab 312
2. Faculty has access to SAS and SPSS for their research
3. Students has access to MS office in computer lab 301 and other COB rooms
Findings (2015-2016) - Target: Met
Faculty and students in the COB have access to these softwares in the labs and classrooms.

G 3: Create and sustain an environment that is supportive of scholarly activity
Create and sustain an environment that is supportive of scholarly activity by the faculty.

O/O 6: Reduce teaching loads for faculty engaged in research
Objective 3.1: Reduce teaching loads for faculty engaged in research;

Relevant Associations:

Standard Associations:
AASCB 2016 Standards for Business Accreditation
2 INTELLECTUAL CONTRIBUTIONS, IMPACT, AND ALIGNMENT WITH MISSION: The school produces high-quality intellectual contributions that are consistent with its mission, expected outcomes, and strategies and that impact the theory, practice, and teaching of business and management.
5 FACULTY SUFFICIENCY AND DEPLOYMENT: The school maintains and deploys a faculty sufficient to ensure quality outcomes across the range of degree programs it offers and to achieve other components of its mission. Students in all programs, disciplines, locations, and delivery modes have the opportunity to receive instruction from appropriately qualified faculty.
6 FACULTY MANAGEMENT AND SUPPORT: The school has well documented and well-communicated processes to manage and support faculty members over the progression of their careers that are consistent with the school’s mission, expected outcomes, and strategies.
15 FACULTY QUALIFICATIONS AND ENGAGEMENT: The school maintains and strategically deploys participating and supporting faculty who collectively and individually demonstrate significant academic and professional engagement that sustains the intellectual capital necessary to support high-quality outcomes consistent with the school’s mission and strategies.

Strategic Plan Associations:
College of Business
2 Develop programs in teaching and research that are supportive of scholarly activity by faculty that foster student participation.
Delaware State University
3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.
3.2 Increase, strengthen, and sustain the support systems and infrastructure to assist faculty, staff and students in all aspects of their research endeavors.

Related Measures:
M 2: # Faculty in concentrations

Target:
Minimum of 2 faculty members for each area except HRM which only needs 1.
Findings (2016-2017) - Target: Partially Met
Areas in MGMT, MKT, and MIS other than HRM has minimum of 2 faculties.
HRM has 1 faculty member.
Business Analytics has no faculty yet.

Findings (2015-2016) - Target: Partially Met
All areas other than HRM had requisite minimum 2 faculty. HRM did not have the requisite 1 faculty member.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Hire HRM faculty
Established in Cycle: 2015-2016
Hire a full time HRM faculty to support the program.

Hiring Faculties
Established in Cycle: 2016-2017
In the process of hiring a business analytics faculty.

O/O 7: Develop policies and procedures to engage in research activities
Objective 3.2: Develop policies and procedures to provide a plan and other incentives to faculty members to engage in research activities;

Relevant Associations:

Standard Associations:
AACSB 2016 Standards for Business Accreditation
2 INTELLECTUAL CONTRIBUTIONS, IMPACT, AND ALIGNMENT WITH MISSION: The school produces high-quality intellectual contributions that are consistent with its mission, expected outcomes, and strategies and that impact the theory, practice, and teaching of business and management.

Strategic Plan Associations:
College of Business
2 Develop programs in teaching and research that are supportive of scholarly activity by faculty that foster student participation.

Delaware State University
3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.
3.2 Increase, strengthen, and sustain the support systems and infrastructure to assist faculty, staff and students in all aspects of their research endeavors.

Related Measures:

M 9: Research Fund
Secure of: (1) research travel funds, (2) summer research grants, or (3) course reduction for research commitment

Source of Evidence: Professional standards
Target:
1. availability of research travel fund
2. summer research grant proposal
3. course reduction

Findings (2016-2017) - Target: Met
1. department secured $2,000 research travel fund per faculty (more than $2,000 to the faculty who are very active in their research)
2. summer research grant was offered to faculty who applied through filtering
3. course reduction was approved by the faculty commits research

Findings (2015-2016) - Target: Met
Grant proposal for summer transportation institute was put forward and approved for the 2015-16 academic year.

O/O 8: Conduct annual evaluation of faculty and staff
Objective 3.3 & 4.2: Conduct annual evaluation of faculty and staff using objective instrument to reward them by their performance;

Relevant Associations:

Standard Associations:
AACSB 2016 Standards for Business Accreditation
2 INTELLECTUAL CONTRIBUTIONS, IMPACT, AND ALIGNMENT WITH MISSION: The school produces high-quality intellectual contributions that are consistent with its mission, expected outcomes, and strategies and that impact the theory, practice, and teaching of business and management.
6 FACULTY MANAGEMENT AND SUPPORT: The school has well documented and well-communicated processes to manage and support faculty members over the progression of their careers that are consistent with the school's mission, expected outcomes, and strategies.

Delaware State University
3.2 Increase, strengthen, and sustain the support systems and infrastructure to assist faculty, staff and students in all aspects of their research endeavors.

Related Measures:

M 11: Faculty Annual Evaluation

# of refereed journal publications & # of proceedings & # of presentations (Measure on a 5 year rolling basis, but collect faculty annual reports every year)
Chair's evaluation of faculty and staff (every year)
Source of Evidence: Professional standards

**Target:**
1. At a minimum, on average each faculty member should have one (1) PRJ once every 5 years and 1 presentation every 2 years.
2. Chair evaluation

**Findings (2016-2017) - Target: Met**
This academic year starts another 5 year cycle of AACSB accreditation:
2. Chair's annual evaluation has done.

**Findings (2015-2016) - Target: Met**
The 12 faculty members in the department produced the following:
25 Peer Review Journals (PRJ) over 5 year period
67 presentations/proceedings over 5 year period

G 4: Retain quality faculty and staff
Attract and retain quality faculty and staff who are committed to excellence in teaching, research and service.

O/O 8: Conduct annual evaluation of faculty and staff
Objective 3.3 & 4.2: Conduct annual evaluation of faculty and staff using objective instrument to reward them by their performance;

**Relevant Associations:**

**Standard Associations:**
AACSB 2016 Standards for Business Accreditation

**Strategic Plan Associations:**
College of Business
7 Cultivate a positive, collegial, supportive environment, and build a structure to reward faculty and staff who are committed to improving student learning.
Delaware State University
1.5 Recruit and retain outstanding and engaged faculty

**Related Measures:**

**M 10: Measures 10 - Qualified faculty and concentration relevancy**

- number of AACSB qualified faculty members hired to meet our needs
- Review of concentrations to assure they are meeting department standards and goals

Source of Evidence: Professional standards

**Target:**
Hire AACSB qualified faculty to fill vacancies as needed.
Annual review of concentrations

**Findings (2016-2017) - Target: Partially Met**

Hiring and maintaining 4 Visiting Assistant Professor in:

1. two in Management
2. one in HRM
3. one in MIS

**Findings (2015-2016) - Target: Partially Met**

Offers made to HRM faculty, but was not able to move forward. Management faculty could not come to an agreement on salary.

- Concentrations were reviewed for relevancy

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Faculty Search**

*Established in Cycle: 2015-2016*

Continue to search for faculty members meeting AACSB requirements.

**G 5: Promote the image of the Department**

Promote the image of the Department of Business Administration.

**O/O 10: Promote major and under-represented concentrations**

- Objective 5.1: Develop flyers for promoting management major and promoting under-represented concentrations;
- Objective 5.2: Update department section of the college website;

**Relevant Associations:**

**Standard Associations:**

AACSB 2016 Standards for Business Accreditation
1 MISSION, IMPACT, AND INNOVATION: The school articulates a clear and distinctive mission, the expected outcomes this mission implies, and strategies outlining how these outcomes will be achieved. The school has a history of achievement and improvement and specifies future actions for continuous improvement and innovation consistent with this mission, expected outcomes, and strategies.

Strategic Plan Associations:

College of Business
3 Improve and strengthen outreach efforts by maintaining a positive relationship with students, parents, and alumni and by developing certificate and executive educational programs to serve the community.

Delaware State University
6.7 Build brand awareness and strengthen customer engagement through targeted integrated marketing initiatives.

Related Measures:

M 13: Measures 13 - Department promotional resources
Update of department promotional resources (i.e. flyers, website)

Target:
Annual review of department promotional material and website.

Findings (2016-2017) - Target: Met
Promotional material including brochures and website are updated.

Findings (2015-2016) - Target: Met
Promotional material was updated.
Website was updated for changes.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

AOL Committee Meeting
College of Business AOL committee did not meet in Spring 2014 to discuss Fall 2013 results. However, the department discussed the results and planned for intervention. Results were also shared with Accounting, Economics, and Finance department. College AOL committee needs to discuss the following early Fall 2014:

1. Assessment results from Fall 2013/Spring 2014.
2. Suggestions/Recommendations for intervention.
3. Review assessment rubrics and revise, if necessary.
4. Check feasibility to sync GenEd assessment timelines with COB assessment timelines.

AOL chair, Dr. Ruf was contacted on June 2, 2014 regarding the above.

Established in Cycle: 2013-2014
Faculty Search
Continue to search for faculty members meeting AACSB requirements.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Measures 10 - Qualified faculty and concentration relevancy | Outcome/Objective: Review faculty needs and develop recruiting plans

Hire HRM faculty
Hire a full time HRM faculty to support the program.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: # Faculty in concentrations | Outcome/Objective: Reduce teaching loads for faculty engaged in research

Implementation Description: Need to hire a full time candidate.
Projected Completion Date: 08/21/2016
Responsible Person/Group: Bus. Admin Chair
Additional Resources Requested: Budget line for full time faculty, $120,000 includes salary and fringe benefits.
Budget Amount Requested: $120,000.00 (recurring)

Resume internal research forums
Will begin to have research forums in the Fall 2016.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Projected Completion Date: 08/25/2016
Responsible Person/Group: Constant Beugre
**Hiring Faculties**  
In the process of hiring a business analytics faculty.

**Established in Cycle:** 2016-2017  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** # Faculty in concentrations  
**Outcome/Objective:** Reduce teaching loads for faculty engaged in research

**Implementation Description:** In the process of hiring  
**Projected Completion Date:** 08/31/2017

**Additional Resources Requested:** Budget line for full time faculty, $120,000 includes salary and fringe benefits.  
**Budget Amount Requested:** $120,000.00 (recurring)

**Annual Report Section Responses**

**Executive Summary (1-2 pages)**

**EXECUTIVE SUMMARY**

Below is the summary of significant accomplishments of the Department of Business Administration for the academic year 2017-2018 in the area of leadership, curriculum and program, enrollment, faculty & academic activities, service and community engagement, and grants. The Department of Business Administration constitutes mainly with Management program that has seven concentrations. The Department also includes two semi-independent programs - Aviation program and Hospitality and Tourism Management (HTM) program. The annual report here focuses on the Management program, so please visit the Aviation (B.S.) program and HTM (B.S.) program respectively for their annual reports.

1. Leadership:

Dr. Dae Ryong David Kim was appointed as the Chair of the Department of Business Administration (DoBA)/Professor in Fall 2017 after a nationwide search. Dr. Kim had been an interim MBA Director for three years and a chair of BoDA for 4 years before he was appointed the current position. He brings over a leadership experience in his previous positions

2. Curriculum and Program

• Management program received AACSB International (Association to Advance
Collegiate Schools of Business International) re-accreditation;
• Launched a Business Analytics program during the academic year 2017-2018;
• Continued reviewing curricula in the areas of Management, Marketing, Management Information Systems during the 2017-2018 academic year;
• Changes the title of Management Information Systems (MIS) concentration to Management Information Systems/Enterprise Resource Planning (MIS/ERP);
• Maintained a 'Connected Degree Program' between DelTech (Delaware Technical and Community College) and DSU (Delaware State University) - 1) Associate degree in Business Administration at DelTech and BS degree in General Management at DSU, 2) Associate degree in Accounting at DelTech and BS degree in General Management at DSU;
• Supported the DSU Online program in developing online courses and in assigning instructors to the courses;
• The program hired a full-time instructor in the area of HRM (Human Resource Management);
• Dr. Zahid Zamir was hired as a tenure-track assistant professor from Spring 2018.
• The program has aggressively pursued hiring in several faculties in vacant positions - General Management, Operations Management, MIS/ERP, and Business Analytics, but was not successful. Thus, the program needs to continue its effort in hiring tenure-track faculties in the area.
• Design and structure the course Operations Management MGMT 306 introducing a more applied and experiential pedagogy and the use of a learning platform (Pearson) to enhance student skill and competencies development.

3. Enrollment

There have been 265 enrollment during 2017-2018 in the Management program (6/4/2018). The distribution of the enrollment is as follows:

• Business Analytics: 1
• Business Economics: 8
• Finance and Banking: 36
• General Management: 12
• HRM (Human Resource Management): 33
• MIS/ERP (Management Information Systems/Enterprise Resource Planning): 39
• Marketing: 96
• Blanks: 40

4. Faculty & Academic Activities

• There is an academic journal housed in the Program - Journal of Current Research in Global Business.
• Faculties in the Management program has had 1 book, 1 book chapter, 4 peer-reviewed papers published, and 15 proceedings published.
• In addition, faculties served in many editorial boards in peer-reviewed journals, participated in professional associations, presented in many professional conferences.
• Dr. Zahid Zamir was hired as a tenure-track assistant professor from Spring 2018.
• The program has aggressively pursued hiring in several faculties in vacant positions but was not successful. Thus, the program needs to continue its effort in hiring tenure-track faculties in the area. - General Management, Operations Management, MIS/ERP, and Business Analytics

5. Service and Community Engagement
• Department faculty was active in providing service by means of serving on Department, College, University, Discipline and Civic committees during the academic year.
• Department faculties have served on University Faculty Senate, Curriculum Committee, Policies and Procedures Sub-Committee, Library Committee, Academic Affairs Committee, and Teaching Effectiveness Committee. They also served the various college and department committees including Assurance of Learning Committee.
• Many department faculties served as advisors of Beta Gamma Sigma Honorary Business Society, American Marketing Association Student Chapter.
• Department faculties also served for various communities, for example, a vice chair of member relations for Marketing for Higher Education Special Interest Group, a chair of Temple Management Committee, a chair of Board of Director for Delaware Korean United Methodist Church, a judge of Robotic Competition for First Lego League, a member of Port of Wilmington Maritime Society, a board member for the Capital School District Carree and Technical Education Advisory Board, a member of Board of Trustee for Western Hospitality Institute, Jamaica.

6. Grants

• Has obtained FHWA Summer 2017 Transportation Institute Grant ($71,000/year by Dr. Nunlee).

7. Success in achieving the 2017-2018 annual goals and objectives

• The Department of Business Administration met the goals designed by the collaboration among faculty, staff, and students. The department assessed its goals and objectives to assure the students’ learning by using direct and indirect methods (case studies, research presentations, tests, & etc. in various classes and ETS exams in the Strategic Management courses).
• The Curriculum in the Program was assessed continuously throughout the year to improve the quality of the curricula, based on developed program goals.

In summary, the Department of Business Administration was very productive in areas of teaching, research, service and community engagements.

Unit(s) Profile
UNIT PROFILE

1. Degree(s) and Degree options

• Degree: BS in Management
• Degree options - Concentrations in:

  o Business Analytics
  o Business Economics
  o Finance and Banking
  o General Management
o HRM (Human Resource Management)
o MIS/ERP (Management Information Systems/Enterprise Resource Planning)
o Marketing

2. Enrollment

• There have been 265 enrollments during 2017-2018 in the Management program (6/4/2018). The distribution of the enrollment is as follows:

o Business Analytics: 1
o Business Economics: 8
o Finance and Banking: 36
o General Management: 12
o HRM (Human Resource Management): 33
o MIS/ERP (Management Information Systems/Enterprise Resource Planning): 39
o Marketing: 96
o Blanks: 40

3. Personnel

• A list by rank and alphabetical order:

Professor: Dr. Winston Awadzi
Dr. Constant Beugre
Dr. Dae Ryong David Kim, Chair/Professor

Associate Professor: Dr. June Clarke
Dr. Chitti Govindarajulu
Dr. Martin Nunlee
Dr. Carlos Rodriguez
Dr. Praveen Pinjani, Associate Dean

Assistant Professor: Dr. Devdeep Mairy
Dr. Zahid Zamir
Vacant (General Management)
Vacant (Operations Management)
Vacant (MIS/ERP)
Vacant (Business Analytics)
Vacant (Director of HTM)

Visiting Professor: Dr. Carrie Awadzi
Dr. Charles Fletcher
Dr. Terry Yancey-Bragg
Mr. CP Ganatra

Adjuncts: Mr. Alfred Paoli
Mr. Louis Callazzo
Dr. Chandra Aleong
Mr. Srinivasa Sajja
Ms. Anand Singh
Ms. Dorethea Savage
Ms. Krystal Green
Mr. Vaughn Hopkins
Ms. Andrea Watkins
Mr. Reshid Walker

Staff: Ms. Kittina Coursey

Unit(s) Initiatives accomplished in this cycle
UNIT INITIATIVES ACCOMPLISHED IN THIS CYCLE

1. Curricula

- Management and Hospitality and Tourism Management programs in the Department of Business Administration received AACSB International (Association to Advance Collegiate Schools of Business International) re-accreditation;
- A new "Business Analytics" curriculum has been launched in the academic year.
- The title of MIS (Management Information Systems) concentration has been changed to MIS/ERP (Management Information Systems/Enterprise Resource Planning).
- A course number MGMT 305 has been changed to MIS 305 to reflect the content taught in the course.
- Two courses (MIS Elective and MIS 300) in MIS/ERP concentration has been switched to make students prepare TERP test training better.
- Design and structure the course Operations Management MGMT 306 introducing a more applied and experiential pedagogy and the use of a learning platform (Pearson) to enhance student skill and competencies development.
- Maintained a 'Connected Degree Program' between Deltech (Delaware Technical and Community College) and DSU (Delaware State University)

(1) Associate degree in Business Administration at Deltech and BS degree in General Management at DSU,
(2) Associate degree in Accounting at Deltech and BS degree in General Management at DSU;

- Supported the DSU Online program in developing online courses and in assigning instructors to the courses;
- Reviewed Marketing minor to revise to level the credit hours required with pre-requisites.
- A review of concentration curricula offered in the program has been continued to keep quality curricula that reflect industry requirements.

2. Faculty

- There is an academic journal housed in the Management program - Journal of Current Research in Global Business.
- Faculties in the Management program has had 1 book, 1 book chapter, 4 peer-reviewed papers published, and 15 proceedings published.
- In addition, faculties served in many editorial boards in peer-reviewed journals, participated in professional associations, presented in many professional conferences.
- Dr. Zahid Zamir was hired as a tenure-track assistant professor from Spring 2018.
- The program has aggressively pursued hiring in several faculties in vacant positions but was not successful. Thus, the program needs to continue its effort in hiring tenure-track faculties in the area:
i. General Management  
ii. Operations Management  
iii. MIS/ERP  
iv. Business Analytics  
v. Hospitality and Tourism Management (Director)

3. Students

• Eight students in the MIS/ERP concentration participated in the case competition during DEEP day in March 2018.  
• Ten students in the Marketing concentration participated in the case competition during DEEP day in March 2018.  
• One student in the General Management concentration participated in the case competition during DEEP day in March 2018.  
• Four students participated in the National Diversity Case Competition at Indiana University, Bloomington, January 2018 (Dr. Maity).

4. Grants

• Has obtained FHWA Summer 2017 Transportation Institute Grant ($71,000/year by Dr. Nunlee).

**Unit(s) Honors/Awards and Achievements**

UNIT HONORS/AWARDS AND ACHIEVEMENTS

1. Faculty:

• Faculties in the program have had 1 book, 1 book chapter, 4 peer-reviewed paper published, and 15 proceedings published.  
• In addition, faculties served in many editorial boards, participated in professional associations, presented in many professional conferences.  
• Has obtained FHWA Summer 2017 Transportation Institute Grant ($71,000 by Dr. Nunlee).  
• A Visiting Assistant Professor, Carrie Awadzi, received a 'Best Paper Award' from the 'Journal of Human Resource Management.'

2. Students:

• Students in the MIS/ERP concentration participated in the case competition of DEEP day and awarded 4th place.  
• Students in the Marketing concentration participated in the case competition of DEEP day and awarded 1st place.  
• Three students in the department - Ty'Ron Washington, Shannon Green, and Alondra Duenas - received COB Academic Excellence Awards.
Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

1. Promote the image of the Department
   • Complete the development and production of Bulletin Board
   • Complete the development and production of Brochure and Insert cards
   • Data - completion of the above materials and the use of the materials in NSOs.
   • Assess the progress of the completion of the materials above, and the use of the materials produced

2. Retain quality faculty and staff
   • Re-submit the hiring freeze form for 4 new tenure-track assistant professor
   • Seriously and diligently proceed the process of hiring of the positions:
     i. General Management
     ii. Operations Management
     iii. MIS
     iv. Business Analytics
   • Data - the result of the hiring of each position.
   • Assess the number of hiring

3. A student learning goal: Information Technology skills
   • Data - will be collected in the courses (MIS-305: Management Information Systems).
   • The instructor will collect the data from projects, case studies, or presentations in the class.
   • Assess the measure by the matrix

"KPI #1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

Refer the attached document (1WEAVE_KPI 1 & 10 - Chairs2018 - Business Administration 2017-18 Filled).

Please see the KPI 1 and 10 Finance and Economic in the Dept. of Accounting, Economics and Finance for students Management students with those concentrations.

Connected Document
  • KPI #1 & #10 - Department of Business Administration
Closing the Assessment Loop: Please share one or two prime examples of your unit's assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. 

a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? 

b) Have these changes been implemented? If not, when will they be implemented? 

c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

1. See the attachment. An example of Data gathering, analysis, and interpretation assessment has been done in Spring 2018 and analyzed by an AOL (Assurance of Learning) committee to see what needs to be implemented. The whole new assessments and analyses for the academic year 2017-2018 will be reported on or before October 30, 2018.

2. From the above example, two actions were recommended.

• Math general education should be strengthened.
• A thorough understanding of all operational functions and processes in a typical production, manufacturing, and service organization are recommended to include in the course of 'Introduction to Business' or equivalent.

3. Three more assessments on the same measurement are planned to be done in Spring 2019, Spring 2020, and Fall 2020 to close the loop.

* Connected Documents: An Example of Assessing, Analyzing, and Closing Loop

**Connected Document**
- An Example of Assessing, Analyzing, and

**Bibliography of Scholarly Products published in 2017-2018 by unit members.**

Colleges should just list the number of publication listed by the departments.

BIBLIOGRAPHY OF SCHOLARLY PRODUCTS PUBLISHED IN 2017-2018 BY UNIT MEMBERS. COLLEGES SHOULD JUST LIST THE NUMBER OF PUBLICATION LISTED BY THE DEPARTMENTS.

1. Peer-Reviewed Article Publications

• Martin Nunlee - Uncertainty and Motivation to Seek Information from Pharmacy Automated Communications, Pharmacy 6, 47; DOI:10.3390/pharmacy6020047

2. Peer-Reviewed Proceedings & Presentations

• Carlos Rodriguez - Luxury Brand Experiences and Relationship Quality for Millennials: The Role of Self-expansion, Proceedings Monaco Symposium on Luxury, 2018, Monaco, Monaco.
• Carrie Awadzi and Winston Awadzi - We aren't just playing games, we are motivating employees: Gamification and organizational effectiveness. International Association of Applied Business Research (IAABR) and the Academic Organization for Advancement of Strategic and International Studies (Academic OASIS). Fall 2017 conference. Las Vegas, Nevada. November 5 - 7, 2017
• Devdeep Maity - "Audience participation and endorsement effectiveness in video blogs" (Finnish Title: "Yleisön osallistuminen ja suosittelun tehokkuus videoblogeissa") in Finnish Conference of Media and Communication Research, 27th-28th April 2018, Jyväskylä, Finland.

3. Book Publications

• Constant Beugré - The Neuroscience of Organizational Behavior. Edward Elgar.
4. Book Chapters

• Constant Beugré - The Internet of Things and Cognitive Analytics. In M. Anandarajan & C. Simmons (Eds.), The Internet of People, Things, and Services: Workplace Transformations.

5. Invited Presentations

• Martin Nunlee - Is a Business Education Worth It, Special Session Marketing for Higher Education SIG, Summer American Marketing Association Conference, August 5.
• Martin Nunlee - Wealth Generation of The US Housing Market: The Case of the African American and Latinos. Marketing Ethnic Faculty Association (MEFA) Conference, August 3

Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.
Refer attached Excel template filled (1 WEAVE Undergrad_Program_Data - Business Administration_2017-2018 Filled).
Mission / Purpose

The mission of the CAHSS is to produce students in the finest tradition of the liberal arts who can think with intellectual vigor, communicate effectively, and possess a diverse perspective on peoples and cultures throughout the world.

The vision of the CAHSS is to develop, support and enhance the vision and core values of Delaware State University which include, outreach, community, scholarship, diversity and integrity.

M 8: Student report
By 2011, 25% of students report on their exit survey that they have had the opportunity to be involved with at least one research project.

Source of Evidence: Academic direct measure of learning - other

Annual Report Section Responses

Executive Summary (1-2 pages)

On September 5, CEHPP held a college meeting. The meeting shared the focus areas for 2017-18 of:

- Accreditation
- Program Growth, Retention and Graduation
- Increasing Access to Resources
- Professionalism

The Dean has been very active in raising the visibility of the College throughout the state and nation. The Dean serves on the Recruitment Group for Teach DE, the Community Advisory Committee (CAC) for Delaware-Ctr ACCEL, and the Board of Directors for the Delaware Foundation for Science and Mathematics Education.

The Dean and Associate Dean continued working on several college-wide grants including RCMI and ACCEL. The RCMI proposal was not accepted however, we plan to resubmit for the next funding cycle. Initial reviews for the ACCEL renewal grant were extremely positive. We are awaiting final word on whether the grant will be funded.

The Associate Dean continued to work with students applying to internships.
from CEHPP and other departments outside the college. As a result of this continued work, the following occurred:

· Two students received highly competitive undergraduate research summer positions

· Two students received yearlong paid internships at the prestigious Value Institute-Christiana Care

· Two students accepted paid summer positions via Summer Collab

· One student presented research at the Annual Black Doctoral Network Conference

· One student received a summer internship with the Health Career Connection Internship Program-New York State Health Foundation

· Two students are matriculating to graduate school at two premier universities-Columbia and Temple; and

· One student is matriculating to medical school at Drexel this fall.

Additionally, this led to involvement in developing a University-wide Health Professions Committee (HPC), which she currently chairs. The HPC provides pre-health professional advising and facilitates progress towards successful graduate health professional program application submission. Nine (9) students went before the committee for evaluation during spring semester.

The Academic Advising Center was extremely active preparing students for internships, Teacher Education Program admission and application to the nursing major. The Academic Advising Center is no longer a direct report to the Dean’s office, it now reports to University College. However, the director and staff continue to provide direct assistance the College.

The Delaware Center for Health Promotion (DCHP) held programs geared to get students, faculty and staff healthy - The Freshman 15 and Maintain, Don’t Gain holiday challenge. Additional items sponsored by the Delaware Center for Health Promotion are included in the document management section[MH1].

One focus of CEHPP has been inter-department projects/programs. This includes, but is not limited to the following:

· Study Abroad opportunities offered by the Nursing Department to Thailand during Spring Break and by the Social Work Department to Costa Rica during May. Students participating in these programs were from the home department and other departments in the College and campus.

· Development of an Academy of Healing Trauma Institute. A certificate program is in developmental stages; however, the planning committee included administration, faculty, staff and community from CEHPP and across the University (e.g., CAHSS, Student Affairs, and Public Safety).

· On April 26th, faculty from Social Work and Public and Allied Health Sciences co-sponsored a Puppy Stress Release Day. The SPCA provided 3 puppies. Over 400 students, faculty and staff attended the event.
During AY 2017-18, all Education programs submitted Program Reports and received National Recognition Report responses from the Council for the Accreditation of Educator Preparation (CAEP). Elementary Education, Physical Education, Middle Level Education and Educational Leadership (M.Ed. and Ed.D) received National Recognition with conditions. The Title II SAFRA grant titled Teacher Education Program Enhancement was approved for 2015-2020 with an award of $180,000 per year. This grant allows the Education Department to address the major issue of our students having tremendous difficulty passing the Praxis II by offering content area workshops. All teacher candidates are now required to take and pass the PPAT as a state requirement for certification. This past fall, 95% of our students that took the PPAT passed. Thirty-three (33) student completed their internships this academic year. Fourteen (14) students earned doctoral degrees and three (3) student earned Master’s degrees.

The Department of Nursing has been nominated as a Best Nursing Program Finalist by the HBCU Digest. The HBCU Awards Gala ceremony will be held on June 22. The Department of Nursing was awarded full accreditation by the Accreditation Commission for Education in Nursing (ACEN) and full approval by the Board of Nursing. The National Council Licensure Examination (NCLEX) pass rate for the class of 2017 was 90%.

The Department of Public and Allied Health Sciences offered a new curriculum in Kinesiology effective Fall 2017. As of Spring 2018, the new program had 56 majors. Eight Movement Science majors were named as Arthur Ashe, Jr. Sports Scholars 2018, including one female semi-finalist. The Food Pantry and Mobile Food Pantry continued to provide food for students from across the University. The 4th Annual Public Health & Fitness Leaders Day (PHFLD) was held on February 21, with over 170 participants.

Dr. Sheridan Kingsberry, Associate Professor, was named Social Worker of the Year by the National Association of Social Workers, Delaware Chapter. The MSW online program was offered in Fall of 2017. On June 11, 2018, a law implementing multi-tiered licensure for Social Workers was signed by the Governor. Several past and current faculty members worked to insure the approval of this bill.

Unit(s) Profile

Dean - Marshá T. Horton
Associate Dean - Jacqueline Washington
Admin Asst/Budget Analyst - Lynn McGinnis
Director, DE Center for Health Promotion - Marianne Carter
Student Services Center - now part of University College
Director - Michele Rush
Assistant Director - Charmaine Whyte
Unit(s) Initiatives accomplished in this cycle

All departments in CEHPP have research and internship experiences built into their curriculum. Specific information regarding the number of student participants are shown in the individual departmental reports; however, some of the highlights include:

- Elementary Education, Physical Education, Middle Level Education and Educational Leadership (M.Ed. and Ed.D.) received National Recognition with conditions from the Council for the Accreditation of the Educator Preparation (CAEP).
- 95% of the teacher candidates that took the PPAT test in Fall 2017 passed.
- MSN online program approved by Faculty Senate starting Spring 2019.
- 90% pass rate for Nursing graduating class of 2018 on the NCLEX-RN exam.
- Eight students from Nursing, Public Health and Education participated in a study abroad opportunity in Thailand during Spring Break.
- Kinesiology curriculum effective Fall 2017. As of Spring 2018, the new program had 56 majors. Students in Movement Science are being taught out.
- The American Council on Exercise Science (ACE) personal training certification program had a successful year two with five students completing the program. The program has been renewed for 2018-19.
- The 4th Annual Public Health & Fitness Leaders Day (PHFLD) was held on February 21, with over 170 students and representatives from 35 local fitness and health businesses participating.
- The Food Pantry and Mobile Food Pantry were open throughout the year.
- Ten students from Social Work participated in a study abroad opportunity in Costa Rica in May.
  Three graduate and four undergraduate Social Work students and two undergraduate and one graduate Education student presented at Research Day.

Unit(s) Honors/Awards and Achievements

- On April 27, 21 students were inducted into Kappa Delta Pi, International Honor Society in Education.
- The Department of Nursing has been nominated as a Best Nursing Program Finalist by the HBCU Digest. The HBCU Awards Gala ceremony will be held on June 22.
- The Department of Nursing was awarded full accreditation by the Accreditation Commission for Education in Nursing (ACEN) and full approval by the Board of Nursing.
- Eight Movement Science majors were named as Arthur Ashe, Jr. Sports Scholars 2018, including one female semi-finalist.
· The Phi Epsilon Kappa professional fraternity for Movement Science/Kinesiology and Health Promotion/Public Health inducted 20 new members in spring 2018.

· Social Work MSW program offered online starting Fall of 2017.

· June 11, 2018, a law implementing multi-tiered licensure for Social Workers was signed by the Governor. Several past and current faculty members worked to insure the approval of this bill.

· Dr. Sheridan Kingsberry was named Social Worker of the Year by the National Association of Social Workers, Delaware Chapter.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

**Strategic Goals**

1. Fully integrate the Department of Psychology into the newly reconfigured College of Health and Behavioral Sciences.

2. Launch the online RN to MSN program.

3. Launch the Trauma Certificate Program.

4. Increase the number of students participating in research, study abroad, service learning, experiential learning and/or leadership programs by fostering interdisciplinary and intra-departmental collaborations.

**Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.**

Education -- 5 journal articles, 2 books, 1 chapter in a book
Public and Allied Health Sciences - 4 journal articles
Social Work - 2 journal articles, 1 book
Mission / Purpose

The Center for Teaching and Learning (CTL) of Delaware State University maintains a focus on linking professional development to university improvement. Its principle mission is to strengthen and support academic programs that improve teaching and learning across all mediums of education for instructors and students by providing ongoing faculty support services. The CTL will expand its mission and goal by providing faculty professional developmental services that will help the university achieve the goal of student success. The CTL is a supportive resource for faculty and adjunct professors of Delaware State University and offers a variety of services for them to be effective and successful teachers within their classrooms. These services include Professional Development services (workshops, conferences, sponsorships for travel), Mini-Grant opportunities, Promotion & Tenure tips and assistance, and teaching assistance for faculty and adjunct professors; all of which allow university faculty to strengthen their teaching efforts through research-based methodologies, professional development experiences, advanced studies and assessment practices that lead to improved teaching and student learning.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Professional Development

Provide professional development activities and opportunities for faculty who delivering quality instruction and create of an exceptional learning environment that promotes academic excellence and transformative student learning.

O/O 1: Increase Professional Development Activities Sponsored by CTL

Increase by 50% over the amount offered in 2012, the number of workshops on campus that address high impact teaching practices and use of technology.

Relevant Associations:

Strategic Plan Associations:
Delaware State University
  1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
  5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.

Related Measures:
M 1: CTL sponsored workshops
Increase the number of CTL sponsored workshops by 50% over the amount offered in 2012, that address high impact teaching practices and use of technology that increase student learning. (10 workshops conducted in 2012).

Source of Evidence: Activity volume

Target:
Increase the number of workshops by 50% over the amount offered in 2012 that address high impact teaching practices and the use of technology to increase student learning (10 were conducted in 2012).

Findings (2016-2017) - Target: Met

A total of 28 workshops were conducted from October 1, 2016 to September 30, 2017, 21 of these workshops addressed the use of technology in the classrooms and high impact teaching practices. This represents a 110% increase from 2012.

October 4, 2016- Self Evaluations
October 6, 2016- SMART Board Training
October 10, 2016- Technology Training (Wilmington Campus)
October 13, 2016- Peer Evaluations #1
October 18, 2016- Let's Flip this Classroom
October 25, 2016- Active Learning vs. Passive Learning
November 11, 2016- Grant Writing
November 15, 2016- Effectively using Blackboard in the Classroom
November 15, 2016- Online Student Course Evaluations
November 29, 2016- Peer Evaluations #2
December 11, 2016- Working with Students with Disabilities
January 24, 2017- Student Evaluations Crash Course
January 31, 2017- Peer Evaluations #3
February 16, 2017- Blackboard Grade Center #1
February 21, 2017- Self Evaluations of Teaching
February 28, 2017- Blackboard Collaborate #1
March 16, 2017- Blackboard Grade Center #2
March 21, 2017- Mini Grant Presentation: The Graphic Syllabus, Dr. Susmita Roye
March 28, 2017- Blackboard Collaborate ULTRA #2
April 4, 2017- Integrated Learning
April 6, 2017- Course Evaluations
April 13, 2017- Blackboard Grade Center #3
May 5, 2017- Promotion & Tenure
August 24, 2017- New Faculty Orientation
September 5, 2017- Promotion & Tenure
September 19, 2017- Working with Students with Disabilities
September 21, 2017- Blackboard Workshop
September 26, 2017- Assessment Collection Data System (ACDS)

Findings (2015-2016) - Target: Met

Ten workshops were conducted in 2012 that addressed technology and high impact teaching.

This year a total of 21 have been completed, that directly relate to
technology and/or high impact teaching practices. This represents a 110% increase. The following workshops have been conducted:

October 9 - Learning Communities Basic Workshop
October 10 - "Syllabi" Workshop
October 17 - "Advising Basics" Workshop
October 21 - 9th Annual Mini Grant Presentations
October 29 - "Accessibility for All" Workshop
October 31 - Faculty Roundtable - MOOC's Discussion
November 6 - Learning Communities - Integrated Learning II Workshop
November 15 - Learning Communities Workshop
November 18 - MADE Clear Workshop (University of Delaware Presenters)
December 3 - 10th Annual Mini Grant Informational Session
January 23- ADVANCE Women's Interest Workshop
January 29- Learning Communities Workshop
February 6- Common Core Training for ECHS College Faculty
February 14-Physics Day Teaching Workshop - Active Engagement Through Technology
February 19 - Sustainability Teaching Workshop for Chemistry Department
February 20- Social Media Usage for Classroom Teaching Workshop
February 27-- Faculty Advising Workshop - Using Social Media
March 18 - PBL Math Chats Workshop for Mathematics Department
April 8 - Assessment Presentations, conducted preparation workshop for participating faculty.
April 15 - "Promotion & Tenure" Workshop - Electronic Portfolios

**Findings (2012-2013) - Target: Partially Met**

Ten workshops were offered in 2011-12 that specifically addressed high impact teaching practices or classroom technology. The target for 2012-13 was to increase that number by 50% which would be 20 workshops. A total of 15 workshops addressing high impact teaching and/or technology have been conducted as of June 30. We have two planned for August and will need to complete another 3 in September in order to
meet our target.

**Findings (2011-2012) - Target: Met**
Fifteen workshops were conducted by the CTL for the 2011-12 academic year; Aug 23, 24, Sept. 20,29, Oct. 20,25,28, Nov 14,16, Dec 8, Jan 11, Feb 21, March 22, April 18, May 9. This meets the target of increasing by 5% over the 2007-08 academic year.

**Findings (2010-2011) - Target: Met**
CTL sponsored workshops for the 2010-11 academic year totaled 20: August 23  
August 26  
September 10  
September 14  
September 24  
October 18  
November 10  
November 16  
December 6  
January 26  
February 23  
February 24  
March 4 and 5  
March 23  
March 28  
April 4  
April 6  
April 20  
April 27  
May 10

Natalie Belcher- 2017 NCTE National Conference

Findings (2015-2016) - Target: Met

We have reached our objective of having at least 12 faculty members attend conferences or workshops that examine specific, high-impact teaching practices.

Rebecca Fox-Lyken

Robin L. Krawitz

Keun K. Kim

Ladji Sacko

Vincent Ciammaichelli
Findings (2012-2013) - Target: Met

High impact teaching practices include any performance based classroom or assessment activities such as Problem-Based or Project Based Learning, any type of peer learning community, and faculty advisement/mentoring. The CTL has collaborated with the assessment office and Office of First-Year Programs to bring training to faculty members in the areas of Learning Communities and Performance Based Assessments. We will reach our measure of providing support for 12 faculty members to attend teaching conferences on specified topics, indirectly. Four faculty members did receive financial support for traveling to a conference where Service Learning, Project-Based Learning and/or Learning Communities were the focus. Because travel funds are limited several faculty members have engaged in an informal professional learning community where they have shared their experiences in teaching students together in the College Advance Program, College of Arts, Humanities and Social Sciences. Dr. Alton Thompson, Provost and Vice President for Academic Affairs supported faculty in their endeavor to share and form more Learning Communities, like College Advance. Liberal Education and America's Promise LEAP has endorsed the idea of Learning Communities, especially those that focus on real-world, integrative learning experiences which can help students improve their critical thinking and problem-solving skills. Dr. Myrna Nurse is the Learning Communities Steering Committee (LCSC) Chairperson. The committee has sponsored several collaborative workshops where faculty share ideas and design integrated projects/problems for student learning. This effort involves the identification of critical learning objectives and appropriate assessment for measuring improvement in students' critical thinking and or problem solving abilities. The LCSC has helped faculty create hard-linked and soft-linked courses through workshop activities and over 30 faculty members will be involved in this high-impact teaching practice by 2014. The CTL provides a unique faculty -to-faculty link for professional development and support for new emerging research-based practices in teaching and learning.
Findings (2011-2012) - Target: Met

Findings (2010-2011) - Target: Not Met
The CTL sponsored the following travel:

July, Aug, Sept 2010 - No travel awards
Jan, Feb, Mar 2011 - 4 travel awards as follows: McGary, Rich, Brickhouse, Brittingham
April, May, June 2011 - 8 travel wards as follows: Perrine, Fingerwright, Rich, Grevious, Fox-Lykens, Jackson, Liu, Fox-Lykens, Brickhouse

G 3: Scholarship of Teaching
Provide support to faculty for the research of innovative teaching practices that lead to improved student learning.

O/O 3: Teaching Innovation
Increase the number of mini-grants for teaching innovation by 50% over the amount submitted in 2011.

Relevant Associations:

Strategic Plan Associations:
Delaware State University
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement
3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.
3.3 Provide opportunities for undergraduate students to participate in research.
**Related Measures:**

**M 3:** Increase the number of mini-grant proposals submitted by faculty.

Increase the number of mini-grant proposals submitted by faculty for teaching by 50% over the amount submitted in 2012 (3 were submitted in 2012).

Source of Evidence: Activity volume

**Target:**
Support at least 3 faculty members enrolled in Doctoral programs by providing tuition reimbursement.

**Findings (2011-2012) - Target: Not Reported This Cycle**
This funding was reduced from the Title III Budget and is no longer available to faculty or staff.

**M 7:** Increase the number of mini-grant proposals submitted by faculty

Increase the number of mini-grant proposals submitted by faculty for teaching by 50% over the amount submitted in 2012 (3 were submitted in 2012).

Source of Evidence: Activity volume

**O/O 4:** Scholarship of Teaching and Learning (SOTL)

Provide travel support for at least three faculty members to attend seminars/workshops/conferences that relate directly to SOLT.

**Relevant Associations:**

**Strategic Plan Associations:**

*Delaware State University*

1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement

3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.

5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.

**Related Measures:**

**M 2:** Increase faculty support for travel to professional conferences.

Support for faculty members to attend teaching conferences that specifically address high impact teaching practices such as Problem-Based Learning, Service Learning, Learning Communities and Integrated Learning.

Source of Evidence: Activity volume

**Target:**
Twelve faculty members to attend teaching conferences addressing high impact teaching practices.

**M 3:** Increase the number of mini-grant proposals submitted by faculty.

Increase the number of mini-grant proposals submitted by faculty for teaching...
by 50% over the amount submitted in 2012 (3 were submitted in 2012).

Source of Evidence: Activity volume

**Target:**
Increase the number of mini-grant proposals from 3 to 6, that specifically address teaching and learning.

**Findings (2016-2017) - Target: Not Met**

During 2017, a total of 3 mini-grant proposals were received and funded up to $2000.00
Dr. Kam Kong - "Introducing Emerging Technologies in Mid Program Project Course"
Dr. Dalyne Johnson - "The Impact of Video Analysis in Mathematics for Teachers I"
Dr. Krystal Hans - "Active Learning Strategies in Forensic Biology"

**Findings (2015-2016) - Target: Met**

In 2012, only three mini grants were submitted.

Mini grant proposals submitted for this year totaled nine. This is a 200% increase. The following mini-grants were funded:

**Dr. Sangeeta Gupta** - Public Health Undergraduates: An Introduction to Research Ethics and Applied Research

**Dr. Daniela Radu** - Green Chemistry and Climate Change Aspects-Live

**Dr. Andrew Lloyd** - Students Communicating on a Social Media Platform

**Dr. Darla Scott** - Intellectual Exchange and Collaboration in Psychology (PSYC 201) Enhancing learning in introductory psychology using the Classroom Presenter"

**Findings (2012-2013) - Target: Partially Met**

Mini-grant funding helps new faculty with a small amount (up to $1000) of research funding through a competitive proposal submission process. The CTL has encouraged and helped faculty to submit projects that focus on assessment of student learning and classroom innovation. A total of four mini-grants have been awarded for teaching innovation.

**Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**O/O 5: Improve Outreach Efforts to Local Educational Agencies**

Provide sponsorship and encourage collaboration with DE Department of Education and local K-12 school districts.

**Related Measures:**

**M 4: Host professional development activities for LEAs.**  
The number of professional development activities sponsored for LEAs (two were held in 2011-12).

Source of Evidence: Activity volume

**Target:**  
Sponsor four professional development activities for LEAs (a 50% increase from 2011-2012 result of two trainings).

**Findings (2016-2017) - Target: Met**  
During 2016-2017, we hosted several professional development meetings for the Delaware Mathematics Coalition including a collaborative Math Equity Conference that focused on promoting equitable conditions in STEM for teachers and students, that was held on March 11, 2017. A total of 3 Math Leadership Coaching Labs were held on October 21, 2016, December 16, 2016 and March 16, 2017. A total of Elementary Math Teaching Leadership Cohorts meetings were held October 11, 2016, December 5, 2016 and March 16, 2017. These 7 activities were facilitated by the Delaware Mathematics Coalition.

**Findings (2015-2016) - Target: Met**  
In 2011-12 we hosted two trainings for outside agencies. This past year we hosted eleven. This is a 450% increase. The following Middle School Math teachers professional development took place at Delaware State University (this training was conducted by the Delaware Mathematics Coalition) :
COHORT I:
October 23
November 14
January 16, 2013
February 26
March 12
April 30
COHORT II
November 16
January 17, 2013
February 27
March 13
May 1

Findings (2012-2013) - Target: Met

Hosting professional development activities in collaboration with local educational agencies (LEAs) commits and situates the University as a community members striving alongside with them to make students and future residents of Delaware, engaged, life-long learners. Our performance measure was to host at least three events and we have hosted six events and we have planned an event with Mid-Atlantic Educational Laboratory for September 2013.

O/O 6: Recruitment and Retention of Quality Faculty
Identify problems in faculty recruitment, retention and satisfaction with work/life quality by conducting a nationally recognized faculty survey.

Relevant Associations:

Strategic Plan Associations:
Delaware State University
1.5 Recruit and retain outstanding and engaged faculty

Related Measures:

M 5: Faculty Recruitment and Retention
Survey faculty surveys such as Harvard University's COACHE survey or other AAUP surveys.

Source of Evidence: Activity volume
Target:
Attain a 50% response rate on faculty surveys.

Findings (2015-2016) - Target: Met
The 2015-16 year resulted in conducting an AAUP Nationally Recognized Faculty Survey on Shared Governance. Please see Faculty Senate's or CTL's Blackboard site for survey results.

Findings (2012-2013) - Target: Not Met
We will conduct the COACHE Survey in 2014.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

COACHE Survey
Established in Cycle: 2012-2013
We will conduct the COACHE survey in 2014.

M 6: Program Accreditation
CTL assistance provided to departments through sponsoring of PD activities directly related to accreditation requirements.

Source of Evidence: Activity volume

Details of Action Plans for This Cycle (by Established cycle, then alpha)

CTL Sponsored Travel
The CTL has not been able to increase the number of faculty attending teaching conferences by 5% over the baseline established in 2007-08.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: CTL sponsored workshops | Outcome/Objective: Increase Professional Development Activities Sponsored by CTL

Increase budget for travel
When the goal to increase the travel awards by 5% in 2007-08, the proposal called for an increase to the CTL's budget for the purpose of increasing professional development activities for faculty. This increase in budget was denied by the Title III Office and consequently we have not been able to meet our goal of increasing the PD activities by 5%

What the CTL has done to try and meet the goal is to limited the amount of each travel award. The maximum amount of each travel award has been $1,000.00 for the years
2009-10 and 2010-11. We will continue this into the 2011-12 year with the hope of reaching our target over a 5 year timeline.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Increase faculty support for travel to professional conferences.  
- **Outcome/Objective:** Increase Knowledge of Best Teaching Practices.

**Projected Completion Date:** 06/29/2012

**Classroom Technology**  
We may be acquiring an ECHO 360 platform through collaboration with the Biology Department. This along with increasing the number of workshops for Smart Boards by just one or two will help us meet our target of 20 workshop offerings.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** CTL sponsored workshops  
- **Outcome/Objective:** Increase Professional Development Activities Sponsored by CTL

**Projected Completion Date:** 10/01/2013

**COACHE Survey**  
We will conduct the COACHE survey in 2014.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Faculty Recruitment and Retention  
- **Outcome/Objective:** Recruitment and Retention of Quality Faculty

**Projected Completion Date:** 10/01/2014  
**Responsible Person/Group:** CTL Director and Staff

Teaching and learning mini-grants.
In the past, we only provided mini-grants for faculty research and not for research in teaching and learning. Because we have changed the criteria for the mini-grant proposals we think that a better marketing campaign needs to take place and make faculty aware of what they might be able to submit especially requesting classroom equipment or supplies. We have planned to make the 2013-14 mini-grant advertisement much clearer on what we mean by proposals for classroom innovation.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: Increase the number of mini-grant proposals submitted by faculty. |  
Outcome/Objective: Scholarship of Teaching and Learning (SOTL)

**Implementation Description:** Advertise new mini-grant criteria on Blackboard site for the CTL.  
**Projected Completion Date:** 10/01/2013  
**Responsible Person/Group:** CTL Director and staff.

**2018 Mini Grant Plan**  
Starting in 2018, a Committee will be created to determine the mini-grant criteria and to determine awardees. Funding limitations hinder faculty from applying, however we currently have $6000.00 budgeted this fiscal year for mini-grant awards.

**Established in Cycle:** 2016-2017  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: Increase the number of mini-grant proposals submitted by faculty. |  
Outcome/Objective: Scholarship of Teaching and Learning (SOTL)

**Projected Completion Date:** 09/28/2018
Mission / Purpose

The primary mission of the Department of Chemistry is to provide a fundamentally sound education to both our undergraduate majors and our graduate students. We seek to prepare qualified majors for a successful career in the scientific discipline of chemistry. These careers can take several paths: (1) entrance into the profession as a chemist at the bachelors, masters, or Ph.D. level; (2) matriculation toward a professional degree in the dental, medical or health-related fields; (3) preparation for an educational track, providing excellent chemistry teachers in secondary schools. Most importantly, we must produce excellent, credible and well trained students who will fulfill any of these career aspirations with a high degree of integrity.

The Department's Mission Statement (adopted in 2011) supports the University's Mission Statement to provide for the people of Delaware and others who are admitted, a meaningful and relevant education.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Students will be independent learners

All students will be independent learners who are proficient in chemistry and able to integrate knowledge and technology to achieve personal and professional success

SLO 1: Effective integration of knowledge and technology to improve success

Continue to improve the quality of teaching and learning in chemistry while maintaining a minimum 2.5 GPA in chemistry

Relevant Associations:

DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Student academic performance will be assessed through standardized exams
Academic performance will be assessed via teacher and peer evaluations as well as ACS standardized exams

Source of Evidence: Standardized test of subject matter knowledge

Target:
Students completing the main sequence general chemistry CHEM101/102/301/302 will be able to demonstrate a thorough knowledge of general chemistry/organic chemistry as evidenced by an average score of 35 on the national ACS General Chemistry/Organic Exam

Findings (2016-2017) - Target: Met
2016-2017 data shows achievement of 75% and 60% of General Chemistry and Organic Chemistry respectively with a score of 30 or higher

Findings (2012-2013) - Target: Met
In the fall 2012 semester, in Chem 101, 17 out of 89 students had a score of 35 or higher. In Chem 102, 3 out of 23 students had a score of 35 or higher. In the spring 2013 semester, in Chem 101, 2 out of 44 students had a score of 35 or higher. In Chem 102, 13 out of 62 students had a score of 35 or higher. In Chem 301/2, 1 out of 27 students had a score of 35 or higher.

Findings (2010-2011) - Target: Not Met
The data indicated that no students performed above a score of 30 in organic chemistry during spring and summer semesters.

G 2: Students will possess effective inquiry and critical thinking skills
Students will be effective inquirers and critical thinkers who are able to use appropriate quantitative and qualitative information to solve problems in chemistry

SLO 2: Appropriate use of quantitative and qualitative information
Students will analyze problems in chemistry and write critically on the subject matter

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 2: Senior Capstone
Students will complete a senior capstone course that will integrate general education and course work in chemistry

Source of Evidence: Capstone course assignments measuring mastery
**Target:**
Senior chemistry majors will be able to demonstrate a high level of critical thinking and reasoning ability which they will demonstrate during their capstone experience. A rubric will be used for evaluation with possible scores of unsatisfactory, satisfactory, proficient, and advanced. The number of top scores will be evaluated yearly to track undergraduate performance in regards to quantitative and qualitative information.

**Findings (2016-2017) - Target: Met**
An updated rubric was developed with assistance of the Curriculum Committee and Assessment Chair to evaluate student performance in the areas of critical thinking and reasoning.

**Findings (2012-2013) - Target: Partially Met**
Fifty percent (1 out of 2) met the critical thinking and quantitative reasoning rating at the advanced level.

**Findings (2010-2011) - Target: Not Reported This Cycle**
We are not receiving the results of the rubrics filled out by faculty members for the senior capstone.

**G 3:** Students will be competent communicators

Students will be competent communicators with good oral and written communication skills.

**SLO 3:** Improve communication skills

Students will develop proficient oral and written communication skills.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators

**Related Measures:**

**M 3:** Student Performance through oral and written communication

Students will write essays, laboratory reports, and a research project report in a clear and concise manner. Students will participate in chemistry seminar and chemical literature coursework and display proficiency in the areas of oral and written communication.

Source of Evidence: Presentation, either individual or group

**Target:**
Student performance in the areas of oral/written communication skills will be evaluated. A rubric will be used for evaluation with possible scores of unsatisfactory, satisfactory, proficient, and advanced. The number of top scores will be evaluated yearly to track undergraduate performance in regards to quantitative and qualitative information.
scores will be evaluated yearly to track undergraduate performance in regards to communication skills.

**Findings (2016-2017) - Target: Met**
Student performance in Chemical Literature in the areas of written/oral communication was assessed and >75% of students met proficiency

**Findings (2012-2013) - Target: Met**
Two students were assessed; 100% (2) got advanced level for speaking, 50% (1) got advanced for writing, and 50% (1) got satisfactory for writing.

**Findings (2010-2011) - Target: Not Reported This Cycle**
We are not receiving the results of the rubrics filled out by faculty members for the senior capstone.

G 4: Students will be productive professionals

Students will be ethical, collaborative, and productive citizens of a complex, diverse world

SLO 4: Proficient users of instrumentation and software

Students will become proficient in the operation of and interpretation of results from the use of instrumentation and computer software

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 4: Experimental application of learned concepts**

Students will complete 3** level coursework that requires them to master the use of modern instrumentation and experiential learning. Students will use aforementioned techniques in research projects.

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
Successful knowledge and application of chemical techniques and methods in advanced coursework

**Findings (2016-2017) - Target: Met**
Over 90% of students enrolled in 3** level courses achieved proficiency in knowledge of chemical techniques and methods
Findings (2012-2013) - Target: Met
Three students received certification this year: Sabine Neal, Rebecca Weideman-Mera, and Lewis Lott.

Findings (2010-2011) - Target: Met
Five students received certification for successful use of instruments.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Reporting Template

The undergraduate curriculum is being reformulated and a reporting template is incorporated now into the course design that offer the standard ACS exam.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Mission / Purpose

The Department of Chemistry strives to provide a sound foundation in chemistry for students wishing to concentrate in chemistry and/or chemical engineering; to prepare students for professional careers and for graduate study; to provide a proper sequence of courses for those students preparing to teach chemistry in secondary school or preparing to enter medical, dental, or other health professional schools; and to meet the needs of students wishing to secure a knowledge of the fundamental principles of chemistry.

The Department's Mission Statement (adopted in 2002) supports the University's Mission Statement to provide for the people of Delaware and others who are admitted, a meaningful and relevant education.

Goals without Outcome/Objective Relationships Specified

G 3: The development of laboratory skills
The development of laboratory skills leading to practical proficiency in chemical synthesis, instrumental methods, quantitative measurement, and statistical data analysis.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: The attainment of chemical knowledge and laboratory skills
The attainment of chemical knowledge and laboratory skills required of a professional chemist.

SLO 2: Gain research skills
Students will gain in-depth knowledge of chemistry and research skills to be proficient in the field.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:
M 3: ACS Standardized Testing
Achieve satisfactory performance on ACS standardized tests

Source of Evidence: Standardized test of subject matter knowledge

**Target:**
Increase undergraduate research participation, both inside and outside of the university.

**Findings (2016-2017) - Target: Partially Met**
Undergraduate research opportunities were increased 25% through advertisement, marketing of local INBRE, DE NASA Space Grant, and COBRE sponsored programs

**Findings (2012-2013) - Target: Met**
Eighty percent of pre-professional students have participated/are participating in undergraduate research.

G 2: An understanding of chemical principles
An understanding of the principles of analytical, inorganic, organic, and physical chemistry.

SLO 1: Gain Fundamental Knowledge
Students will gain fundamental knowledge in the core areas of chemistry.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 1: Overall GPA**
Overall major GPA

Source of Evidence: Academic direct measure of learning - other

**Target:**
Overall student academic performance of our graduates will be improved. Increase the number of students who graduate with GPAs above 3.0. Achievement will be followed by a thorough evaluation of student performance resulting in increased performance

**Findings (2016-2017) - Target: Met**
Over 75% of chemistry pre-professional majors graduate with a 3.0 GPA or above
Findings (2012-2013) - Target: Met
Two out of three pre-professional graduates earned a GPA above 3.0.

Findings (2010-2011) - Target: Not Reported This Cycle
New leadership in the department has not been able to acquire information regarding academic achievement for the 2010-2011 reporting cycle.

M 3: ACS Standardized Testing
Achieve satisfactory performance on ACS standardized tests

Source of Evidence: Standardized test of subject matter knowledge

Target:
Students completing the main sequence general chemistry CHEM101/102/301/302 will be able to demonstrate a thorough knowledge of general chemistry/organic chemistry as evidenced by an average score of 35 on the national ACS General Chemistry Exam.

Findings (2016-2017) - Target: Met
General Chemistry courses showed 75% achievement of students able to achieve a score of 30 or higher on the ACS examination.

Findings (2012-2013) - Target: Met
In the fall 2012 semester, in Chem 101, 17 out of 89 students had a score of 35 or higher. In Chem 102, 3 out of 23 students had a score of 35 or higher. In the spring 2013 semester, in Chem 101, 2 out of 44 students had a score of 35 or higher. In Chem 102, 13 out of 62 students had a score of 35 or higher. In Chem 301/2, 1 out of 27 students had a score of 35 or higher.

Findings (2010-2011) - Target: Not Met
No students obtained a score of 30 or higher on the ACS organic chemistry class for spring and summer semesters.

G 4: Development of Critical Thinking and Problem Solving Skills
Students will develop proficient levels of critical thinking and problem solving skills pertaining to the ability to apply such skills to the solution of chemical problems.

SLO 3: Gain Knowledge of Math and Physics:
Students will gain fundamental knowledge of mathematics and physics in preparation for the discipline.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information.

Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans
G 5: Competence in technical writing

Competence in technical writing and in the communication of scientific information. Proficiency in the use of computer technology (word processing, spreadsheet, and chemical structure drawing software and in chemical information retrieval).

O/O 4: Develop Oral and Written Communication Skills
Students will be proficient in both oral and written communication skills.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators

Related Measures:

M 2: Capstone
Satisfactory Completion of Capstone Project

Source of Evidence: Capstone course assignments measuring mastery

Target:
Senior chemistry majors will be able to demonstrate a high level of critical thinking and reasoning ability which they will demonstrate during their capstone experience. A rubric will be used for evaluation with possible scores of unsatisfactory, satisfactory, proficient, and advanced. The number of undergraduates with a score of advanced will be evaluated yearly with an anticipated increase of 10%.

Findings (2016-2017) - Target: Met
Through ACDS data we were able to determine the achievement of proficient/satisfactory oral and communication of our freshman majors to be ~75%

Findings (2012-2013) - Target: Met
Measures for this target are included in the chemistry BS results. We are unable to isolate individual students based upon the reports we receive.

Findings (2010-2011) - Target: Not Reported This Cycle
We are not receiving the results of the rubrics filled out by faculty members for the senior capstone.

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 5: Job Placement/Graduate School
Graduates will be successfully placed in a chemical profession, graduate school, or relevant occupation

Relevant Associations:
DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 4: Senior Exit Surveys

Senior Exit Surveys, Interviews, Focus Groups

Source of Evidence: Exit interviews with grads/program completers

Target:
Graduates of the BS Chem in the ACS concentration will be successful in gaining entrance into high quality graduate schools in chemistry, admission to professional schools, and securing quality careers in the chemical sciences. The departmental chair and chemistry major advisor will maintain contacts with alumni to track where our majors have ended up. These results will be monitored to achieve a target of 75% placement of our students in graduate/professional schools or securing quality careers in the chemical sciences.

Findings (2016-2017) - Target: Partially Met
The department conducted exit interviews of our (5) 2017 graduates and reports 75% job placement and 25% undecided.

Findings (2012-2013) - Target: Not Reported This Cycle
The department is in the process of developing our exit survey (see draft in uploaded documents section), and will report on this finding next year.

Findings (2010-2011) - Target: Not Met
This measure was not successfully implemented and we are unable to report on our graduate placement.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Implement team-taught courses
Incorporate team taught courses (i.e. physics, biology, and chemistry)

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Projected Completion Date: 08/31/2012

Update laboratory experiments
Update laboratory experiments (modernize using computer interfaced instrumentation)

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Projected Completion Date: 04/30/2012

Use of technology
Use of technology (i.e. Blackboard, textbook CDs)

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Projected Completion Date: 08/31/2011

Years to Completion
At least 70% of students complete in 4 years

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Faculty Template
Revision of current curriculum will include a template for faculty reporting of ACS standardized results.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Implement Tracking of Graduates
To follow our graduates and have email contact with them after graduation.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Mission / Purpose

The primary mission of the Department of Chemistry is to provide a fundamentally sound education to both our undergraduate majors and our graduate students. We seek to prepare qualified majors for a successful career in the scientific discipline of chemistry. These careers can take several paths: (1) entrance into the profession as a chemist at the bachelors, masters, or Ph.D. level; (2) matriculation toward a professional degree in the dental, medical or health-related fields; (3) preparation for an educational track, providing excellent chemistry teachers in secondary schools. Most importantly, we must produce excellent, credible and well-trained students who will fulfill any of these career aspirations with a high degree of integrity.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Attract and retain students
Attract and retain large numbers of well-prepared students

O/O 1: The Department will recruit more students.
The Department will recruit more academically talented students through open houses, school visits, and summer programming

Related Measures:

M 1: Increase the number of students graduating from the Department
Increase the number of students graduating from the Department with bachelors, masters and PhD degrees by an average of 5% in four years, while increasing the percentage graduating with honors

Source of Evidence: Standardized test of subject matter knowledge

Target:
Continue to participate in college and university recruitment activities.

Findings (2016-2017) - Target: Met
Continued participation in NSO and College recruitment activities

Findings (2012-2013) - Target: Met
The majority of chemistry faculty members participated in open house events this academic year.

**Findings (2010-2011) - Target: Not Reported This Cycle**

Currently we have 55 undergraduate majors and 9 graduate students. This is the first time that a target has been set and thus we have no data to assess our current status. We will monitor this carefully over the course of the four years and report our findings next year.

**O/O 2: The Department will improve the retention rates of students**

The Department will improve the retention rates of currently enrolled students through recitation, tutoring, and faculty advisement.

**G 2: Provide a quality instructional program**

Provide a well respected and quality instructional program.

**O/O 3: Strengthen undergraduate and graduate programs**

Strengthen undergraduate and graduate programs through periodic curriculum reviews, standardization exams, and integration of technology.

**Related Measures:**

**M 2: Testing analytical thinking**

Perform periodic curriculum reviews and administer common final exams in all courses where appropriate.

Source of Evidence: Standardized test of subject matter knowledge

**Target:**

To perform an overall curriculum review for both undergraduate and graduate level courses based on student surveys and student performance. In addition, we wanted to match the most effective instructors with the most critical courses in the chemistry curriculum. We also want to increase scholarship money by 10%.

**Findings (2016-2017) - Target: Met**

Lecturers were assigned to General Chemistry courses to provide uniform delivery of fundamentals and assist in assessment.

**Findings (2012-2013) - Target: Met**

The chemistry and chemistry pre-professional curricula changes were passed by the Faculty Senate in October 2012. The chemistry curriculum was revised to meet the 2008 ACS accreditation standards and strengthened by adding in one advanced chemistry course requirement. The chemistry pre-professional curriculum was modified to include more biology and social science courses to provide a better background for the MCAT and the predominant required courses for professional/medical school admissions. Work continues on the masters and the PhD requirements and was passed by the department in April 2013. A general chemistry coordinator was elected in order to standardize the learning experience for all general chemistry courses.
The scholarship money was increased by $22,000 through INBRE 2 Year 5 funds.

Findings (2010-2011) - Target: Met
The overall curriculum review indicated that the chemistry curricula was out of alignment with ACS updated criteria for accreditation and general education requirements. Standardized testing was administered in more courses during this time period. No scholarships were awarded due to lack of applicants.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Administer standardized exams in more courses
Established in Cycle: 2008-2009

A greater percentage of the faculty will participate in giving standardized exams. More new courses must be developed to support...

G 3: Enhance research activities
Enhance research infrastructure and resources

O/O 4: Enhance research activities

Faculty will obtain increased external funding for their research, additional resources for research activities and acquire more start-up funding for new hires.

Related Measures:

M 3: Increase number of disseminations by 5%
Increase the number of conference presentations and publications by faculty and students.

Source of Evidence: Presentation, either individual or group

Target:
Increase publication and conference presentations by 5%.

Findings (2016-2017) - Target: Met
Dissemination of findings was increased by 10%.

Findings (2012-2013) - Target: Met
For academic year 2013, there were 24 presentations and 28 publications.

Findings (2010-2011) - Target: Met
This standard of publications and conference attendance was met.

G 4: Improve and strengthen outreach efforts
The department will improve and strengthen its outreach efforts to underserved populations both on the campus and within the neighboring community.

O/O 5: The Department will extend its outreach activities to the neighboring communities

The department will improve and strengthen its outreach efforts to underserved populations by establishing more of a presence in the community and developing a strong sense of pride in the department, as well as increasing research collaborations with regional industrial partners, DAFB, Explorers Club, and A.I. duPont Hospital.

**Related Measures:**

**M 4: Increase number of outreach activities**

Feature seminar series that features external speakers that is open to the public. Participation in summer academic programs designed to prepare minority students for success in college.

Source of Evidence: Service Quality

**Target:**

Conduct seminar series to provide lectures that are open to the public. Participate in summer academic programs designed to prepare minority students for successful transition and matriculation in college.

**Findings (2016-2017) - Target: Met**

Invited seminar speakers from renowned institutions to expose students to tier 1 institutions and inform the public of advances in research.

**Findings (2012-2013) - Target: Met**

The department sponsored a Sustainable Chemistry Seminar Series, which featured five speakers (please see uploaded flyer). Dr. Cherese Winstead participated in summer programs designed to reach out to minority students. Additionally, Drs. Man, Lai, and Radu (new tenure-track faculty members) have taken on new SMILE and RISE students.

**Findings (2010-2011) - Target: Met**

Five external speakers offered lectures open to the public in organic chemistry or forensic chemistry. Dr. Winstead participated in multiple summer activities related to the recruitment of minority students.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the **Details of Action Plans** section of this report.

**Increase outreach activities**

*Established in Cycle: 2008-2009*

Offer more outreach programs such as summer workshops for high school teachers; Involve high school students in summer research...
Obtain additional external funding  
*Established in Cycle: 2008-2009* 
Develop a plan for funding teaching assistantships for additional graduate opportunities

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Administer standardized exams in more courses**  
A greater percentage of the faculty will participate in giving standardized exams

More new courses must be developed to support the graduate and undergraduate programs

  Established in Cycle: 2008-2009  
  Implementation Status: Planned  
  Priority: High

**Relationships (Measure | Outcome/Objective):**
  Measure: Testing analytical thinking  | Outcome/Objective: Strengthen undergraduate and graduate programs

**Projected Completion Date:** 08/31/2011

**Increase outreach activities**  
Offer more outreach programs such as summer workshops for high school teachers;
Involv high school students in summer research;  
Sponsor a seminar series that features external speakers that is open to the public;  
Participate in academic programming to prepare minority students for college.

  Established in Cycle: 2008-2009  
  Implementation Status: Planned  
  Priority: High

**Relationships (Measure | Outcome/Objective):**
  Measure: Increase number of outreach activities  | Outcome/Objective: The Department will extend it outreach activities to the neighboring communities

**Obtain additional external funding**  
Develop a plan for funding teaching assistantships for additional graduate opportunities

  Established in Cycle: 2008-2009  
  Implementation Status: Planned  
  Priority: High
Relationships (Measure | Outcome/Objective):

**Measure:** Increase number of outreach activities  
**Outcome/Objective:** The Department will extend its outreach activities to the neighboring communities

**Recruitment and retention**

The department members will visit local high schools for recruitment purposes and they will become more involved in admissions department open houses

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**No Target Set in Previous Years**

This is the first time that a target has been set and thus we have no data to assess our current status. We will monitor this carefully over the course of the four years and report our findings next year.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** The department is becoming much more active in developing plans for recruitment and monitoring of undergraduate students. We are also in the process of updating/changing our curricula at both the undergraduate and graduate level to attract a larger number of students and to meet ACS accreditation standards.
- **Projected Completion Date:** 03/20/2014
- **Responsible Person/Group:** Chairman, faculty, and staff.
- **Additional Resources Requested:** An additional staff person to monitor student performance and to assist in recruitment process.
- **Budget Amount Requested:** $50,000.00 (recurring)

**Industrial Advisory Board**

Global companies located in the region have begun coming to the department to present a seminar on sustainable chemistry and are engaging in our undergraduate and graduate students in discussions about career paths. We intend to formalize these relationships by creating an Industrial Advisory Board to monitor the changing profile of an employable undergraduate and graduate student.

- **Established in Cycle:** 2012-2013
Implementation Status: Planned
Priority: High
Projected Completion Date: 05/30/2014
Responsible Person/Group: 1. Dr. Eric Kmiec/Dr. Daniela Radu. 2. Dr. Eric Kmiec/Dr. Daniela Radu and Department of Chemistry staff. 3. Dr. Eric Kmiec/Dr. Daniela Radu and Department of Chemistry staff. 4. Dr. Eric Kmiec/Dr. Daniela Radu and Department of Chemistry staff.
Additional Resources Requested: We are expecting support to be generated through our relationship with Ashland Chemicals.

Annual Report Section Responses

Executive Summary (1-2 pages)

Unit(s) Profile

Unit(s) Initiatives accomplished in this cycle

Unit(s) Honors/Awards and Achievements

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

Goal 1

Implement a new rubric system for General Chemistry laboratory instructors, using a clearly defined grading system so that they can more competently evaluate student performance by August 20, 2018.

Goal 2

Seventy percent of students in General Chemistry will demonstrate proficient knowledge of chemistry at the end of the 2018-2019 academic year by obtaining a score of 35pts or higher on the ACS Standardized exam.

Goal 3

Implement an active learning (flipped classroom) environment for General Chemistry lectures by August 27, 2018, that will include the use of VR technology, and improve student outcomes on the ACS Standardized exam at the end of the 2018-2019 academic year. Drs. Kimberly A. Milligan and Weiping Song are currently developing an immersive active learning curricula that will "go live" August 27, 2018.
Closing the Assessment Loop: Please share one or two prime examples of your unit's assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. 

a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? 

b) Have these changes been implemented? If not, when will they be implemented? 

c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Drs. Milligan and Song assess student learning by collecting and evaluating data from the ACS standardized exams given at the end of each term. The result of the findings have lead to a push to for a more active learning environment. Both instructors have attended a 4-week training provided by the Howard Hughes Medical Institute (HHMI) grant. (PI-Vincent Fondong) Changes in the General Chemistry course curriculum will begin August 27, 2018. The unit will ascertain whether this initiative has made a difference in student performance by May 31, 2019.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.
Mission / Purpose

The mission of the College of Mathematics, Natural Sciences, and Technology is to provide a high quality higher education in mathematics, natural sciences, and technology that prepares graduates to achieve leadership status in their communities and careers.

Vision

The vision of College of Mathematics, Natural Sciences, and Technology is to be the first choice for Delaware students interested in mathematics, natural sciences, and technology, and to be widely recognized and acclaimed for excellence in teaching, research, outreach and service. Our graduates will be competitive and successful in their future endeavors, which can include careers in science, engineering, or mathematics, other professional areas, or preparation for post-graduate education (medicine, dentistry, pharmacy, law, education, business, or graduate school, etc.).

In support of the University's vision, the College will:

- Excel in the education of undergraduate and graduate students in the professional, technical, and scientific arenas;
- Provide an important engine for science and technology research and economic development in Delaware, especially in Kent and Sussex counties;
- Offer an array of high quality degree programs culminating in a bachelor of science (B.S.), masters (M.S. or M.A.), or doctoral (Ph.D.) degree. While strengthening existing degree programs and ensuring the courses and curricula are fully aligned with 21st century global needs and accreditation standards, the College places a high priority on developing and implementing additional high quality Ph.D. programs;
- Develop a community of scholars with talent and expertise earning regional, national, and international recognition;
- Build a culture of global awareness through internationally focused teaching and learning, collaboration, and agreements that bring foreign faculty and students to the College and entice our faculty and students to study or do research abroad.

Detailed Assessment Report
As of: 9/27/2018 12:25 PM EST
2017-2018 COB Administration
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

Mission

Our mission is to provide a student-centered learning environment to develop successful business professionals with a global perspective. We emphasize academic excellence through innovation and integrity in teaching, professional development, research, and outreach.

Goals without Outcome/Objective Relationships Specified

G 2: Recruit, Retain and Graduate
Recruit, retain and graduate students prepared for the global workplace

G 3: Promote Research
Increase and promote sustained research that promotes innovation and provides impact for the discipline and COB stakeholders.

G 4: Outreach programs
Improve, expand and strengthen outreach programs that impact local, regional and global communities

G 5: Environmental Stewardship
Enhance Environmental Stewardship to improve support for teaching and scholarly endeavors that impact environmental sustainability

G 6: Enhance and leverage external relationships
Enhance, leverage and diversify resources to fulfill the COB mission

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Exceptional Learning environment
COB will maintain an exceptional learning and supportive environment that provides high quality programs and engaged student learning

O/O 1: Curriculum relevance
Maintain Curriculum relevance

Relevant Associations:

Strategic Plan Associations:
College of Business
1 Develop programs(undergraduate and graduate) and processes to enhance student learning, professional development and success.
8 Improve the process of program review to ensure compliance with requirements for certification and accreditation.

Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

Related Measures:

M 1: Curriculum comparison
Compare curriculum of peer and aspirant universities with COB every three years that provide innovative ideas and trends adaptable to COB curricula.

Documented review process of each program curriculum, answering the following questions: Identify new and innovative trends occurring in each program.

Source of Evidence: Curriculum/syllabus analysis of course to program

Target:
The assessment is documented and reported at the end of each school year.

Findings (2015-2016) - Target: Met

• Curricula Review Taskforce formed
• Review process being finalized
• BA (MIS Curriculum revised)
• BA (New concentration in Business Analytics proposed)
• BA (HTM concentration added)
• BA (New course Social Entrepreneurship added)
• Accounting (Operations Management added)
• Finance (Fixed Income Markets added)
• Finance (Certified Financial Planning Minor added)
• MBA reengineering with addition of concentrations and strengthening the core

O/O 2: Student support
Provide students support and resources to ensure engaged and enhance learning

Relevant Associations:

Strategic Plan Associations:
College of Business
1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.

**Delaware State University**

1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 2: Tutoring center**
Establishment of tutoring center in COB. Documentation of tutoring center operation: number of students served weekly.

Source of Evidence: Academic direct measure of learning - other

**Target:**
Number of students served weekly.

**Findings (2015-2016) - Target: Partially Met**

- Accounting (high failure rate class) and Finance have had Supplemental Instructors and tutors for their classes.
- Accounting will be piloting a lab attached to the Principles 1 and 2 classes in the Spring 2017

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Tracking student use of SI**

*Established in Cycle: 2015-2016*

Improve tracking of students attending Supplemental Instructors sessions

**M 3: Student Funding**
Scholarship funds and other resources provided to students (textbooks, lab supplies, etc.) for enhancing learning.
Documentation of number of students and the amount of funds provided.

Source of Evidence: Academic direct measure of learning - other

**Target:**
Provide assistance to at least 5 students per semester.

**Findings (2015-2016) - Target: Met**

- $10,010.75 in funds were given to 18 students for scholarships and textbook for the 2015-2016 school year.

**O/O 3: Faculty professional development support**
Provide faculty with support and resources for professional development

**Relevant Associations:**

**Strategic Plan Associations:**
- College of Business
  - 7 Cultivate a positive, collegial, supportive environment, and build a structure to reward faculty and staff who are committed to improving student learning.
- Delaware State University
  - 1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement

**Related Measures:**

**M 4: Faculty support provided**
Faculty support for opportunities to attend conferences, online classes and internships that promote engaged learning and other curricula relevant topics:

- # conferences attended or online courses taken
- documentation of benefits and use of information obtained for teaching enhancement.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
Support at least 30 opportunities for faculty to participate in professional development activities

**Findings (2015-2016) - Target: Met**

- 5 faculty received TERP10 Certification, now able to train our students.
- 51 faculty opportunities to presented at or participated in conferences
  - 20 using Title 3 funds
  - 31 using COB Department funds

**O/O 4: Student internships**
Provide internship opportunities for students. Work with local and regional businesses to maintain existing and create new internships both during the school year and during summer breaks.

**Relevant Associations:**

**Strategic Plan Associations:**
- College of Business
  - 1 Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
  - 9 Develop and implement plans and programs to increase placement of COB graduates and encourage businesses to recruit COB graduates.
- Delaware State University
  - 1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
O/O 5: Student case competitions and conferences
Provide students with opportunities to participate in case competitions and professional and academic conferences

Relevant Associations:

Strategic Plan Associations:
College of Business
1. Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
Delaware State University
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Tracking student use of SI
Improve tracking of students attending Supplemental Instructors sessions

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Tutoring center | Outcome/Objective: Student support

Projected Completion Date: 05/05/2017
Responsible Person/Group: Chair
Mission / Purpose

The purpose of the comprehensive music education program is to: 1. Prepare students for elementary and secondary music teaching positions; 2. Prepare students for graduate study in music.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning Goals
Student Learning Goals

SLO 1: Analysis
Analyze music on a harmonic and formal basis.

Relevant Associations:

Standard Associations:
NCATE
1.1 Content Knowledge for Teacher Candidates
1.4 Element 4. Professional and Pedagogical Knowledge and Skills for Teacher Candidates

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
5 To implement effective assessment criteria in each of the content areas within the College of Arts, Humanities and Social Science
Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

Related Measures:

M 6: Formal analysis
A formal analysis of a Sonata by Beethoven to identify formal divisions such as exposition, development, recapitulation, as well as themes, transitions, and sequences is assessed on the final exam. This will typically be assessed in Music Theory IV.

Source of Evidence: Writing exam to assure certain proficiency level
Target:
100% of the students to score 70% or better in this area.

Findings (2016-2017) - Target: Met

On the final for Music Theory IV, Spring of 2017, one major portion of the exam tested the students in the area of Formal Analysis.

The goal is for 100% of the students to score 70% or better in this area.

This measure was a formal analysis of a Sonata by Beethoven to identify formal divisions such as exposition, development, recapitulation, as well as themes, transitions, and sequences.

71% of students met this goal.

SLO 2: Historical Perspectives
Students will classify music by era aurally and by written analysis.

Relevant Associations:

Standard Associations:
NCATE
1.1 Content Knowledge for Teacher Candidates

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 4: Aural Music Identification Quiz
In MUSC 324 (Music History II), there are approximately six questions on the final exam where students will listen to musical examples and by aural clues identify the era when each work was written. Development of this skill is in preparation for the Praxis II exam.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target:
A. 100% of the students will show improvement from the pre test to the post test.
B. All students will pass at least 75% of the questions on the post test.

Findings (2016-2017) - Target: Not Met
A. Currently this assessment is a post test only. Beginning in fall 2018 data will be collected and reported as a pre and post test.
B. 75% of students passed at least 75% of the questions on the post test.
**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Changes to frequency of assessment**  
*Established in Cycle: 2016-2017*  
Based on feedback from Praxis coordinator, the following changes will be implemented. 1. Increase frequency of listening quizzes...

**SLO 4: Pedagogy**  
Discuss, model, plan lessons and teach according to "best practices" and CAEP standards.

**Relevant Associations:**

**DSU Learning Goal Associations:**  
1. UG Student Learning Goal: Competent Communicators  
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information  
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 3: PRAXIS II examination**  
Students will pass the PRAXIS II examination.

Source of Evidence: Certification or licensure exam, national or state

**Target:**  
70% of students taking PRAXIS II will pass on the first attempt.

**Findings (2016-2017) - Target: Not Met**  
1 out of 6 students passed the PRAXIS II on the first attempt.

**Findings (2013-2014) - Target: Met**  
Two students took PRAXIS II. Both passed.

**Findings (2012-2013) - Target: Met**  
One student took PRAXIS II for the first time, and one student took it for the second time. Both passed.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Curriculum Modification**  
*Established in Cycle: 2016-2017*
PRAXIS II Coordinator met with Music Education Faculty to identify weaknesses on the PRAXIS II Exam. Three areas of concern were...

**M 7: Lesson Plan**
The common lesson plan rubric developed by the Education Department is aligned with CAEP standards. This rubric is scored by faculty on a 0-4 scale on each criteria, as outlined per the rubric.

Source of Evidence: Presentation, either individual or group

**Target:**
100% of students will receive a score of "satisfactory" or "3" or above on a final rubric (0, 1, 2, 3 - satisfactory, 4) that includes both the completion of the lesson plan and teaching.

**Findings (2016-2017) - Target: Partially Met**
90% of students received a score of "satisfactory" or above.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Modified Lesson Plan Evaluation**
*Established in Cycle: 2016-2017*
Upon review of students' initial lesson plan, faculty decided it is necessary to add a second review of their rough draft before...

**SLO 5: Jury Performance**

Students will perform a jury at the end of each semester in relation to their applied lessons. Each student is required to take applied lessons each semester. The jury is a final performance in front of three faculty members who adjudicate their performance in relation to tone quality, rhythmic accuracy, stage presence, and other musical content.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators

**Related Measures:**

**M 5: Jury Rubric Score**

Source of Evidence: Performance (recital, exhibit, science project)

**Target:**
100% of students to fall in the acceptable or target range according to the rubric.
Findings (2016-2017) - Target: Met
100% of students scored in the acceptable or target range.

SLO 6: Technology
Use notation, recording and aural skills software.

Relevant Associations:

DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 8: Garage Band
Students will create a musical composition in Garage Band. Students will be scored on a rubric that is currently being developed/modified. Assessment will hopefully begin in 2017-2018 cycle.

Source of Evidence: Project, either individual or group

Target:
Target TBD.

Findings (2016-2017) - Target: Not Reported This Cycle
The scoring rubric is currently being developed/modified. We hope to implement this in the 2017-2018 cycle.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Music Technology
   Reassign music technology course, and insure content included on PRAXIS II is incorporated into the course.

   Established in Cycle: 2012-2013
   Implementation Status: Finished
   Priority: High

   Projected Completion Date: 05/16/2014
   Responsible Person/Group: Chairman of the department

Performance Opportunities
Students will be required to perform as a soloist at least once per semester. Additionally, they will have several opportunities to perform in studio classes.

   Established in Cycle: 2012-2013
   Implementation Status: In-Progress
   Priority: High
   Implementation Description: Have all faculty that teach applied music ensure their students perform in studio class and on performance seminar.
reassignmnet of faculty

The music history courses will be assigned to another faculty member.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: High

Projected Completion Date: 05/16/2014
Responsible Person/Group: Chairman of Department

Changes to frequency of assessment

Based on feedback from Praxis coordinator, the following changes will be implemented.
1. Increase frequency of listening quizzes.
2. Upon completion of the quiz, real time feedback will be provided for every question on the quiz.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Aural Music Identification Quiz | Outcome/Objective: Historical Perspectives

Curriculum Modification

PRAXIS II Coordinator met with Music Education Faculty to identify weaknesses on the PRAXIS II Exam. Three areas of concern were: Music History knowledge, Listening, and World Music. Curriculum committee modified the music education curriculum to address these areas of weakness for the 2017-2018 academic year.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: PRAXIS II examination | Outcome/Objective: Pedagogy

Responsible Person/Group: Music Education Faculty
Modified Lesson Plan Evaluation

Upon review of students' initial lesson plan, faculty decided it is necessary to add a second review of their rough draft before they implement the plan. Additionally, students' will receive a separate rubric for the lesson plan and for the teaching of the lesson.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Lesson Plan | Outcome/Objective: Pedagogy

Responsible Person/Group: Music Education Faculty
Mission / Purpose

The mission of the Department of Computer and Information Sciences, consistent with nationally and internationally accepted standards for rigorous computing programs, is to

1. Provide graduate and undergraduate students with high quality instruction in the fundamentals and recent advances in computer science and information technology.
2. Cultivate student's abilities to formulate and solve problems, manage complexity, and provide a solid foundation for a lifetime of learning.
3. Conduct cutting-edge research and foster graduate and undergraduate research mentoring and training.
4. Expand scientific knowledge and contribute to scientific fields through innovative and supportive domestic and international partnerships within academia, industry, government, and nonprofit organizations.
5. Improve computer science education by engaging in K-12 and community outreach.

Vision

The vision of the Department of Computer and Information Sciences is to become highly recognized throughout Delaware, the nation, and the world for its excellence in education, mentoring, and research. The Department will strive to create a synergistic learning and research environment that produces independent thinkers and life-long learners who will contribute effectively to the solution of pressing scientific problems that drive the development and sustainability of the local and global economies.

Values

The Department believes that certain core values are fundamentally essential to embrace in order for the department's community to be successful. The department is committed to the pursuit of excellence and expects the same from faculty, staff, and students. The Department strives to promote an environment that encourages innovation, creativity, and leadership among faculty, staff and students and expects they operate with mutual respect and integrity. Every member of the department is expected to operate at the highest ethical and professional standards. The Department prides itself in its diverse student body, faculty, and staff. The Department ensures that they have access to the facilities, journals, and tools necessary to conduct research, research-based training, and other opportunities leading to success. The Department observes and preserves the right of all members to practice their academic and intellectual freedom and maintains a caring, nurturing, and respectful environment in which such freedoms may be exercised. The Department encourages its members to become active volunteers in the community, providing service, outreach, and leadership where possible.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans
G 1: Continue to provide high quality research opportunities in support of student success and professionalism

Continue to provide high quality research opportunities in support of student success and professionalism

SLO 1: By their junior year, all undergraduate CIS majors will be involved in at least three group-based research project modules embedded

By their junior year, all undergraduate CIS majors will be involved in at least three group-based research project modules embedded in the classrooms across the CIS curricula

Relevant Associations:

**Relevant Associations:**

**DSU Learning Goal Associations:**

2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success
Strategic Plan Associations:

Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement
4.1 Strengthen and expand DSU’s outreach, Extension, engagement, entrepreneurship and economic development programs to benefit the people of Delaware, the nation and the world.
4.2 Collaboratively develop and enhance programs for underrepresented groups and undeserved communities

Related Measures:

M 12: Number of hosted events or events in which department participated
Number of hosted events or events in which department participated

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Focus group**

Focus group was formed consisting of students and faculty to address lack of student engagement in planning and activities.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Finished  
**Priority:** High
Increase number of seminars

Increase number of planned research and professional seminars to at least two per semester.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Implementation Description: Faculty will be encouraged to invite collaborators and colleagues at other institutions. Faculty are also encouraged to invite former students or alumni.
Projected Completion Date: 05/05/2011
Responsible Person/Group: Faculty
Additional Resources Requested: Honorariums for speakers.
Budget Amount Requested: $800.00 (recurring)

Weekly out-of-class activities

- Weekly out-of-class enrichment activities of the students' choosing - can even include video game competitions.
- Building computer activities or mobile/iPhone activities.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Implementation Description: Faculty will lead out-of-class activities of interest to students.
Projected Completion Date: 05/06/2010
Responsible Person/Group: Computer Science Club and Faculty
Additional Resources Requested: Activities may require hardware or technology gadgets to implement.
Budget Amount Requested: $500.00 (recurring)

Implement a robust cloud system

Implement a robust cloud system that is capable of syncing to any machine from anywhere and is accessible from the web.

Established in Cycle: 2013-2014
Implementation Status: Planned
Priority: High
Implementation Description: Currently the storage is accessible from Linux computers on the university campus. The implementation for the coming year will
include a syncing system (similar to Dropbox) along with a web based access of the same data. In addition, availability via machines from within the Department will be possible.

**Responsible Person/Group:** Department system administrator  
**Additional Resources Requested:** Networking controllers and cards.  
**Budget Amount Requested:** $0.00 (no request)

**Increase graduate teaching assistants**  
Increase the number of graduate teaching assistant.

- **Established in Cycle:** 2013-2014  
- **Implementation Status:** Planned  
- **Priority:** High  
- **Implementation Description:** This requires action on the part of the Graduate School.  
- **Projected Completion Date:** 08/01/2014  
- **Responsible Person/Group:** Graduate School Dean and Department Graduate Director  
- **Budget Amount Requested:** $72,000.00 (recurring)

**Work on strategies to improve tutoring participation.**  
Work on strategies to improve tutoring participation.

- **Established in Cycle:** 2013-2014  
- **Implementation Status:** Planned  
- **Priority:** High  
- **Implementation Description:** Work with tutors and faculty to provide incentives for participation in tutoring.  
- **Projected Completion Date:** 09/12/2014  
- **Responsible Person/Group:** Chair and faculty members

**Annual Report Section Responses**

**Executive Summary (1-2 pages)**

**Unit(s) Initiatives accomplished in this cycle**
A. The following are initiatives either in-progress or completed.

· Building a cyber warfare range that will train IT students in cyber security defense and teach them about offensive techniques

· Twenty students competed and placed in the online Cyber Quests Competition. The placement qualifies them for an invite at the US Cyber Challenge summer camp this summer, held at Wilmington University.

· Twelve CIS students competed in the CyberSEED competition at the University of Connecticut, Storrs, CT, October 2017.

· Four students competed in the Black Enterprise Smart Hackathon, California, October 2017.

· Two students attended AnacondaCon: Harness the Power of Data Science, Austin, TX, April 8 - 11, 2018.

· DSU CIS is working on new articulation agreement with DTCC’s Terry Campus computing programs. The meeting is scheduled for June 4, 2018.

· Fourteen students volunteered to teach computational thinking to sixth graders in the Caesar Rodney School District. The District has asked us to expand the program to both sixth and seventh graders next year.

· The CIS Department has established a partnership with the Navy SeaPerch program to host the SeaPerch competition at DSU. This year’s program took place on April 14th. The Navy has asked the Department to host the competition again next year.

B. The following are modifications to pre-existing courses in the CS and IT curricula.

C.

   o No modification was necessary this past academic year.

D. List Professional Development Efforts and/or Activities organized by the unit.
   List Professional Development Activities not organized by the unit but attended by or pursued by unit member(s), list names of members involved.

Professional Development Activities organized by the unit

Attendance at the seminars and workshops listed below reached an average of forty one percent this year. This is the largest attendance the Department has experienced since we began various incentive initiatives to increase student participations in seminars and activities across campus.

1. Seminars:
Robert Morris (DSU CS 2017), Software Developer, JP Morgan Chase & Co, Using IoT to Eliminate Uncertainty without breaking the bank, September 12, 2017

Karla Miletti, DSU Senior CS Major, NASA Intern, Git Gud, September 21, 2017

Tuba Abassi, DSU Senior CS Major, NASA Intern and Apple Scholar, Developing a Great Resume, September 26, 2017

Jaron Foster, (DSU CS 2013), Software Engineer, JP Morgan Chase U Co., 4 years of college. 4 years in industry. What I’ve learned so far, November 2017.

Jayvaun Young (DSU IT 2017), Operating System Engineer at Freddie Mac, OSD: Using Automation and Microsoft SCCM to deploy and manage operating systems, April 5, 2018.

Jagannadh Vempati, University of North Texas, Firewalls, April 10, 2018

Gokhan Kul, University of Buffalo, Database Management Systems, April 12, 2018.

Aesia Cohen, DSU Senior, The Advantages of Volunteering for Google Ignite CS, April 19, 2018

2. Workshops:

Karla Miletti, DSU Senior CS Major, NASA Intern, Git Workshop, September 22, 2017

Robert Morris (DSU CS 2017), Software Developer, JP Morgan Chase & Co, Writing Progressive Web Apps, February 1, 2018

Professional Development Activities not organized by the unit

1. Gary Holness

Summer Research Fellow, Visiting Scientist at US Army Research Lab, May 2017 - Aug 2017

Completed Term 1: Computer Vision and Deep learning, Dec 2017-April 2018, Udacity, Self-Driving Car Engineer Nano Degree Program

2. Fatima Boukari

“Research and Development of Biomedical Devices” By Dr. Rahman Tariq, Director of the Center for Orthopedics Research and Development Nemours, OSCAR Seminar Series, Delaware State University, OSCAR Building, January 25, 2018.

"Illuminating Dark Energy by Improving Photometric Calibration", by Dr. Joseph P. Rice, National Institute of Standards and Technology, Gaithersburg, MD, OSCAR Seminar Series, Delaware State University, OSCAR Building, February 15, 2018.

“Analysis of EHR data: Examples from a Kidney Disease Project and an Opioid Screening Tool Validation Study”, Dr. Claudine Jurkovitz, Physician Scientist at the Value Institute at Christiana Care and lead of the Epidemiology/Biostatistics core of the Delaware ACCEL-Center for Translational Research, OSCAR Seminar Series, Delaware State University,

¨ “Oncomodulin, the Little Protein With a Big Role”, by Dr Dwayne D. Simmons, Cornelia Marschall Smith Endowed Professor and Chair of the Department of Biology at Baylor University, OSCAR Seminar Series, Delaware State University, OSCAR Building, March 15, 2018.

¨ Delaware STEM Council Symposium, STEM Food & Agriculture, The Future of STEM & Healthcare and STEM and Information Technology (IT) in Delaware, Delaware State University's MLK Room at 1200 N Dupont Hwy Dover, Delaware 19901, May 2nd 2018.

D. Community, public, and business outreach programs, activities and events occurring during this past year

· Volunteer computer science teaching with the Caesar Rodney school district, January - February 2018.
  o Fourteen students (supervised by Dr. Marwan Rasamny) volunteered to teach from January to end of February computational thinking to sixth graders at two middle schools in the Caesar Rodney district.
  o The effort resulted in an invite back with an expansion to teach seventh graders as well.

· FIRST Lego League Kent County Delaware Regional Qualifier, DSU, Dover, DE, February 2018.
  o Dr. Fatima Boukari - Programming judge
  o Three (3) undergraduate CIS majors volunteered in various capacities at the FIRST Lego League qualifying and State championship competitions.

· Navy SeaPerch Program Competition, April 14, 2018.
  o Dr. Gary Holness - Co-Organizer and volunteer judge
  o Dr. Fatima Boukari - volunteer judge.
  o Dr. Kam Kong - volunteer judge.
  o Dr. Marwan Rasamny - Organizer.
  o Sixteen CS and IT students volunteered to serve on the triage, registration, and compliance tables as well as to serve as tour ambassadors. Tour ambassadors took high school students competing in the program on tours of our laboratory facilities in Physics/Engineering and Computer and Information Sciences.

E. Technology Integration

· Every member of the Department is on Slack, a collaborative platform for organizations and groups. Students and faculty create channels for communicating and exchanging of
documents in real time. Over 27K messages have been sent since the beginning of the fall 2017 semester and 7.5 GB of files have been shared by Department members on the platform.

· Incorporated Design Thinking projects into the freshmen level courses and incorporated robots and microcontrollers into the projects.

· Continue to incorporate various microcontroller boards and other IoT devices, such as the Arduino and the Raspberry Pi, in sophomore, junior, and senior courses.

· Used new Raspberry Pi-based robots for the first year programming courses.

· In the process of purchasing and implementing a Maker Space that will complement student projects and allow students to apply their creativity in building and designing various technology components.

F. Facility and/or infrastructure improvements.

· None.

G. Terminated Programs

· Terminated the Pre-CS major designation.

H. Enter any other comments important to the continued improvement of the Unit.

· Need to implement an institution wide laptop program so that the Department can convert its labs into design classrooms complete with whiteboard walls, collaborative tables, and multiple screens for 360 degrees viewing.

· Need to replace the antiquated audio visual systems in the classrooms our classrooms.

Unit(s) Honors/Awards and Achievements

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

Strategic Objective: Write at least two large grants by the end of the 2018 - 2019 AY.

Strategy: Identify grants for which members of the Department can collaborate on writing or grants in which members can collaborate with faculty from other Departments.

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report. Please see attached document.

**Connected Document**
- 2018 KPI 1 and 10 Computer and Information Sciences

**Closing the Assessment Loop:** Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.

- a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?
- b) Have these changes been implemented? If not, when will they be implemented?
- c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?
1. **How has the unit used assessment results/findings to plan changes designed for improvements?**

1. Faculty members assess each course's learning outcomes, which is mapped to the program learning outcomes. A course assessment form is submitted to the chairperson at the end of the semester with the attainment levels for each course and program learning outcome. Outcomes with levels below 3 (out of a 5 point scale) are required to provide a description of the possible reasons and a recommended course of action for improving the outcome.

2. Student evaluations are used as part of the findings to drive pedagogy in the classroom. In addition, the Department is working on a plan to implement targeted formative assessment to help drive curricular changes and improve student-learning outcomes.

3. The CIS Department has developed a new set of objectives, outcomes, and measures to assess, understand, and improve the overall services that the Department offers its student majors.

2. **Have these initiatives been implemented? If not, when will they be implemented?**

1. The course assessment form has been in effect since spring 2011. The results are provided as an attachment to this section and can also be seen in the measurements section of both the Computer Science and Information Technology program.

2. The targeted formative assessment was planned to start in fall 2017, but due to the loss of several faculty members the initiative is delayed until the department is back to capacity.

3. The measurement of the new set of Department objectives has partially begun; however, due to the fact that the Department faculty had to carry overload this year, the measurement was suspended this year.

3. **When does the unit plan to conduct the assessments again to ascertain whether or not these initiatives have made a difference?**

1. Course assessments are conducted on a semester by semester base.

2. Some of the objectives are measured on an annual cycle, some will be measured every three years, and some every five years. Most will use the the baseline year at first measure (including data measured in this past year).

Findings (2017-2018) - Target: Met
100 percent (9 out of 9) of the assessed courses achieved an attainment level of 3 or better on this program level outcome.

Findings (2016-2017) - Target: Met
100 percent of the assessed courses achieved an attainment level of 3 or better on this program level outcome.

G 2: CSLG 2 - Think critically and computing-based problem-solving skills
Graduates will be able to think critically and have well developed computing-based problem-solving skills.

SLO 1: Apply knowledge of computing and mathematics

An ability to apply knowledge of computing and mathematics appropriate to the discipline

Relevant Associations:

DSU Learning Goal Associations:
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Attainment levels on program level outcome.
Attainment levels on program level outcome.

**Target:**
All assessed courses shall achieve an attainment level of 3 or better in each program level outcome.

**Findings (2017-2018) - Target: Met**
100 percent (8 out of 8) of the assessed courses achieved an attainment level of 3 or better on this program level outcome.
Findings (2016-2017) - Target: Met
100 percent of the assessed courses achieved an attainment level of 3 or better on this program level outcome.

M 3: Conference attendance
Conference attendance

Source of Evidence: Administrative measure - other

Target:
Students should attend at least 2 conferences a year.

Findings (2017-2018) - Target: Met
Students attended three conferences, AnacondaCon, Tapia, and NSBE.

G 4: CSLG 4 - Social Implications of Computing
Graduates will develop an understanding of the social implications of computing.

SLO 5: Understands professional, ethical, legal, security and social issues and responsibilities

Understands professional, ethical, legal, security and social issues and responsibilities.

Relevant Associations:

DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:

M 1: Attainment levels on program level outcome.
Attainment levels on program level outcome.

Target:
All assessed courses shall achieve an attainment level of 3 or better in each program level outcome.

Findings (2017-2018) - Target: Met
100 percent (4 out of 4) of the assessed courses achieved an attainment level of 3 or better on this program level outcome.
Findings (2016-2017) - Target: Met
100 percent of the assessed courses achieved an attainment level of 3 or better on this program level outcome.

M 4: Attendance at competitions
Attendance at competitions such as hackathons and cyber security CTFs.

Source of Evidence: Administrative measure - other

Target:
Students shall attend at least 1 hackathon or competition (could be online as well) during the academic year.

Findings (2017-2018) - Target: Met
Sixteen students attended the CyberSEED competition at the University of Connecticut, 20 students competed on the Cyber Quest online competition, and one student participated in the US Cyber Challenge Summer Camp last July.

SLO 7: Analyze the local and global impact of computing

An ability to analyze the local and global impact of computing on individuals, organizations, and society.

Relevant Associations:

DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:

M 1: Attainment levels on program level outcome.
Attainment levels on program level outcome.

All assessed courses shall achieve an attainment level of 3 or better in each program level outcome.

Findings (2017-2018) - Target: Met
100 percent of the assessed courses achieved an attainment level of 3 or better on this program level outcome. Only one course was assessed that assessed this outcome.
Findings (2016-2017) - Target: Met
100 percent of the assessed courses achieved an attainment level of 3 or better on this program level outcome.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Extracredit applied to any CS/IT course for which the student is enrolled.

After attending and satisfactorily participating in the workshop, students may use this to obtain extracredit in any course they wish of their choosing.

**Established in Cycle:** 2010-2011
**Implementation Status:** Planned
**Priority:** High
**Implementation Description:** Student attends workshop. Workshop owner/presenter provides documentation that student satisfactorily completed workshop. Student submits evidence to main office along with a form to receive credit.
**Projected Completion Date:** 12/08/2011
**Responsible Person/Group:** Workshop presenter, Chair
**Additional Resources Requested:** None

Extracredit paper used for any CS/IT course
Include extra credit paper that can be used in any CS/IT course the student wishes. These papers will be short and addresses the outcome to be measured.

**Established in Cycle:** 2010-2011
**Implementation Status:** Planned
**Priority:** High
**Implementation Description:** Each faculty will required to allocate 5% extra credit in syllabus. Student may submit paper with the appropriate form (possibly online) to the main office. Form indicates course for which extra credit is to be applied. Paper submitted to instructor.
**Responsible Person/Group:** Instructors, Chair
**Additional Resources Requested:** None

Implement Recommendations (Course Assessment Form)
Each faculty has submitted a course assessment form that outlines improvements for course and program outcomes that resulted in attainment levels less than 3. The faculty members teaching the courses in the future will need to understand the issues and adopt measures that will work toward improving the attainment levels.

**Established in Cycle:** 2012-2013
**Implementation Status:** Planned
**Priority:** High
Responsible Person/Group: Faculty member teaching a course

**Work with student focus groups to come up with greater incentives**

Work with student focus groups to come up with greater incentives

Established in Cycle: 2017-2018
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Workshop and seminar attendance by students. | Outcome/Objective:
  Recognizes the need for and able to engage in continuing professional development | Use current techniques, skills, and tools necessary for computing practice

Implementation Description: The Department has adopted a Culture Credit program whereby every faculty member provides 3-4% extra credit for attending a certain number of seminars and workshops a year. This program has become quite popular and has significantly improved attendance at seminar and workshops. To improve the attendance, we will need to work with several student focus groups to understand and design an incentive program that would increase the attendance to these events.

Responsible Person/Group: Chairperson
Additional Resources Requested: None to implement focus group.
Mission / Purpose

The Department of Computer and Information Sciences prepares students for career opportunities in research, technology development, professional studies, and further graduate studies in areas related to computer sciences and informatics. Graduates pursue careers in state and federal agencies, private industry, research, teaching, and entrepreneurial opportunities. The program provides rigorous training in computer science with a focus on inquiry, critical thinking, and experimentation.

The MS program in computer science contributes to the university's mission in a number of ways. Specifically, the program contributes to intellectual climate and culture as graduate students participate in research. Graduate students gain exposure to new methods both at DSU as well as from the broader scientific community through reading and critical analysis of the research literature, attending and presenting research at conferences and professional meetings, and giving talks and seminars in the department. Moreover graduate students also impact the intellectual climate of the undergraduate population through their interactions in the department as well as service as teaching assistants. As graduate students learn how to pose scientific questions, design experiments, conduct experiments, and analyze and interpret results, and present in conferences, they increase and sustain excellence in scholarly and creative research. This brings visibility to DSU in the state, region, nation, and internationally. The MS program directly and significantly impacts and contributes to DSU's strategic goals, namely DSU PRIDE 2020.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: rigorous training
Provide rigorous training beyond what is typical in an undergraduate program

SLO 1: rigorous training
The Master of Science degree in Computer Science trains students in breadth and depth in advanced Computer Science. To accomplish breadth across the discipline, students take a series of core courses in each of the three broad areas of computer science, namely Theory, Systems, and Computational Intelligence and Informatics. These courses survey key topics in each area at a level of rigor that builds beyond a typical undergraduate Computer Science curriculum. To accomplish depth within the discipline, students select and take a number of elective courses in their area of interest.

Students will develop a rigorous understanding and mastery of key advanced computer science topics across the three areas of the discipline- Theory, Systems, Computational Intelligence and Informatics.

Relevant Associations:
DSU Learning Goal Associations:
5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

Strategic Plan Associations:
College of Mathematics, Natural Sciences, & Technology
1.6 Evaluate and improve current graduate programs so that they effectively prepare students for employment or to transfer smoothly into top Ph.D. programs.
1.10 Improve the marketing and communication of our degree programs, including an attractive and informative web page.
2.1 Increase the annual funding available through active research grants by 50% over three years when compared to the 2005-06 budget, and increase the success rate of proposals.
2.2 Increase the number and percentage of faculty with active research programs involving students and the publication and presentation of research results with student co-authors.
5.1 Implement the College's strategic plan through clear departmental plans and goals, individual performance objectives, high expectations, and progress reviews.
6.1 Develop, implement, and utilize objective and credible processes to (a) assess student learning outcomes; (b) review and improve the quality and performance of programs, departments, and the College; (c) monitor progress on the goals in this strategic plan; and (d) report the results.

Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement
3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.
3.4 Maintain the highest standards of ethics and integrity in research and management of the research enterprise

Related Measures:

M 1:Placement in PhD program
Member of cohort from 1st year of program admitted in Fall 2011 was accepted to the PhD program in BioInformatics at University of Delaware. The student has passed his qualifying exams and is now
a PhD candidate. Anecdotally, the student has given feedback that for a number of his PhD level courses for subject material at DSU's MS in CS, he "learned more in the MS program at DSU."

Source of Evidence: Graduate/professional school acceptance rate

**Target:**
Graduate students are regular participants in weekly research lab meetings. This typically involves rotating responsibility for presenting a research publication or your latest research project results. The level of rigor expected of and reinforced in the coursework is further exercised in the research lab meeting. The meetings are scheduled and coordinated by the individual research lab directors.

The graduate students' ability to tackle the research literature in a laboratory setting provides evidence that the coursework is successful in exposing students to rigorous methods. These same methods are needed in order to understand and present on the modern research literature.

**M 2: increase in graduate applications**
The MS program has seen an average 50%+ increase year over year in applications to the MS program. In addition, the program has seen a 100% increase in average monthly web-site traffic. This correlates with the increase in graduate program applications.

Source of Evidence: Academic direct measure of learning - other

**SLO 2: critical thinking**

Students will develop and practice scientific skills in critical analysis of the research literature, scientific inquiry, the design and execution of experiments, and interpretation and articulation of results.

The elective courses address critical thinking through depth within the discipline. Students select and take a number of elective courses in their area of interest. Elective courses address advanced topics as well as current topics from the recent research literature. The elective courses also engage student in critical thinking and excursive experimental skills through substantial semester projects. This gives students the opportunity to reproduce, analyze and or improve results from the published research literature. Students gain both experience in research but exercise critical thinking required to fill in gaps typically not articulated in research publications.

**Relevant Associations:**

**DSU Learning Goal Associations:**
6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.

7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

**Strategic Plan Associations:**

**College of Mathematics, Natural Sciences, & Technology**

1.3 Improve courses and curricula to maximize student learning, using proven research-based pedagogy and incorporating inquiry-based active-learning strategies.

1.7 Develop and implement at least five additional competitive PhD Programs within the next five years.

1.8 Maintain accreditations and seek nationally recognized accreditations or certifications wherever they would be advantageous.

2.1 Increase the annual funding available through active research grants by 50% over three years when compared to the 2005-06 budget, and increase the success rate of proposals.

2.2 Increase the number and percentage of faculty with active research programs involving students and the publication and presentation of research results with student co-authors.

2.4 Identify and develop about four ‘flagship’ interdisciplinary and multi-departmental research areas in the College in which DSU becomes a recognized leader within five years.

5.2 Recruit and develop faculty to be effective and inspiring teachers and mentors, highly productive researchers, and sought-after colleagues and collaborators while contributing to their departments, the College, the University, the state, and their professional disciplines.

**Delaware State University**

1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally.

1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics.

1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice.

2.1 Increase retention and graduation rates by at least two percent annually for the next five years.

3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.

3.2 Increase, strengthen, and sustain the support systems and infrastructure to assist faculty, staff and students in all aspects of their research endeavors.

**Related Measures:**

**M 3: student publishing**

The number of graduate students publishing research with faculty has increased.

Mr. Abdullah Zubaer Imran: 2nd year MS student has 3 conference publications and 3 poster publications.
Mr. Piyush Sharma: PhD candidate in Applied Math, Dr. Holness (CIS) is his advisor.
Piyush has 2 conference and 1 poster publication

Mr. Kenneth Shim:

Source of Evidence: Academic direct measure of learning - other

Target:
Every elective course and core course in the curriculum has had semester project work requiring oral presentation and written report.

**SLO 4: experimentation**

Students will demonstrate competency in significant scholarly activity through participation in research activity, development of an M.S. Thesis or Project, and written and oral presentation of the Thesis or Project to a committee of faculty experts in their field and the general scientific community.

In addition to dissecting selections from the research literature, students gain experience in applying learned techniques in a semester project. The semester projects typically include posing of a research question, investigation of related material, the definition of an experiment, and development of a research prototype or implementation of experiment. The semester project includes both a defended oral presentation as well as a written report. For core courses, a key computer science topic is selected and reinforced. For elective courses, a modern topic from the research literature is selected. By the time students begin their MS thesis or project, he or she has gained substantial experience in the key skills for success. The culmination of the student's training in research and experimentation is the Thesis or Project itself. This is performed under the mentorship of the thesis advisor and thesis committee.

**Relevant Associations:**

**DSU Learning Goal Associations:**
5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.
6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

**Strategic Plan Associations:**
College of Mathematics, Natural Sciences, & Technology
4.1 Establish robust, diverse, lively, and effective communication methods to maximize information flow among College participants (students, staff, and faculty) and stakeholders on and beyond the campus.

4.5 Utilize and further develop Internet 2, videoconferencing, and other capabilities to benefit learning, research, and partnerships.

**Delaware State University**

1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally

1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice

1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement

1.5 Recruit and retain outstanding and engaged faculty

2.1 Increase retention and graduation rates by at least two percent annually for the next five years

3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.

5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.

**Related Measures:**

**M 1: Placement in PhD program**

Member of cohort from 1st year of program admitted in Fall 2011 was accepted to the PhD program in BioInformatics at University of Delaware. Thesis or Project, and written and oral presentation of the Thesis or Project to a committee of faculty experts in their field and the general scientific community.

In addition to dissecting selections from the research literature, students gain experience in applying learned techniques in a semester project. The semester projects typically include posing of a research question, investigation of related material, the definition of an experiment, and development of a research prototype or implementation of experiment. The semester project includes both a defended oral presentation as well as a written report. For core courses, a key computer science topic is selected and reinforced. For elective courses, a modern topic from the research literature is selected. By the time students begin their MS thesis or project, he or she has gained substantial experience in the key skills for success. The culmination of the student's training in research and experimentation is the Thesis or Project itself. This is performed under the mentorship of the thesis advisor and thesis committee.

Relevant Associations:

DSU Learning Goal Associations:
5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.
6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

Strategic Plan Associations:
College of Mathematics, Natural Sciences, & Technology
4.1 Establish robust, diverse, lively, and effective communication methods to maximize information flow among College participants (students, staff, and faculty) and stakeholders on and beyond the campus.
4.5 Utilize and further develop Internet 2, videoconferencing, and other capabilities to benefit learning, research, and partnerships.
Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement
1.5 Recruit and retain outstanding and engaged faculty

2.1 Increase retention and graduation rates by at least two percent annually for the next five years

3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.

5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.

Related Measures:

**M 1: Placement in PhD program**
Member of cohort from 1st year of program admitted in Fall 2011 was accepted to the PhD program in BioInformatics at University of Delaware. The student has passed his qualifying exams and is now a PhD candidate. Anecdotally, the student has given feedback that for a number of his PhD level courses for subject material at DSU's MS in CS, he "learned more in the MS program at DSU."

Source of Evidence: Graduate/professional school acceptance rate

**M 3: Student publishing**
The number of graduate students publishing research with faculty has increased.

- Mr. Abdullah Zubaer Imran: 2nd year MS student has 3 conference publications and 3 poster publications
- Mr. Piyush Sharma: PhD candidate in Applied Math, Dr. Holness (CIS) is his advisor. Piyush has 2 conference and 1 poster publication
- Mr. Kenneth Shim:

Source of Evidence: Academic direct measure of learning - other

**Target:**
Students are involved early in their graduate career in research activities.

- Jon Liddell: Working on GPU Acceleration for Computational Intelligence Algorithms in Dr. Tomasz Smolinski’s lab
- Redford Aboagye: Working on Manifold Methods accelerated through GPU
architectures in Dr. Gary Holness's Lab

Abdullah Zubaer Imran: Working on Breast Phantom Simulation (for improved mammography) in Dr. David Pokrajac's lab

Kenneth Shim: Working on Hybridized Ant Optimization Algorithms for Bio-Sequence Alignment in Dr. Tomasz Smolinski's Lab

Vijaya Maringanti: Working on Database for Green Bean Genome in Dr. Tomasz Smolinski's Lab

Piyush Sharma: Working on Manifold Methods and Information Theoretic Kernels in Dr. Gary Holness's Lab

G 3: gain mastery for inquiry
Students will learn modern methods and mathematical tools in order to support the identification of and posing of research questions.

SLO 3: mastery for inquiry
Students will demonstrate mastery of material articulated through written work, oral presentation, and reduction to practice

Development of student skill set in inquiry in the curriculum consists of a two-semester sequence of Graduate Seminar. During the first semester, in Graduate Seminar Survey, students read selections from the research literature, make presentations on studied topics, discuss professionalism, practice professionalism skills, and engage in discussion. Graduate Seminar-Survey gives students exposure to the research literature as they begin to develop their area of research interest. During the second semester, Graduate Seminar- Critical Thinking covers experimental design. In Graduate Seminar- Critical Thinking, students examine considerations and methods for posing research questions, designing experiments, analyzing data, and discussing results.

5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.
6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Strategic Plan Associations:
College of Mathematics, Natural Sciences, & Technology
1.3 Improve courses and curricula to maximize student learning, using proven research-based pedagogy and incorporating inquiry-based active-learning strategies.

1.5 Thoroughly evaluate the desirability and practicality of offering a bachelor's degree in engineering and a master's degree in computer science, in preparation for a decision and implementation, as appropriate.

1.6 Evaluate and improve current graduate programs so that they effectively prepare students for employment or to transfer smoothly into top Ph.D. programs.

2.2 Increase the number and percentage of faculty with active research programs involving students and the publication and presentation of research results with student co-authors.

5.1 Implement the College's strategic plan through clear departmental plans and goals, individual performance objectives, high expectations, and progress reviews.

5.2 Recruit and develop faculty to be effective and inspiring teachers and mentors, highly productive researchers, and sought-after colleagues and collaborators while contributing to their departments, the College, the University, the state, and their professional disciplines.

6.1 Utilize results of assessment with specific measurable targets to guide and drive the continuous improvement of programs and processes, to understand trends, and to inform decisions.

Delaware State University

1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally.

1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics.

1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement.

3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.

3.4 Maintain the highest standards of ethics and integrity in research and management of the research enterprise.

Related Measures:

**M 3: student publishing**
The number of graduate students publishing research with faculty has increased.

Mr. Abdullah Zubaer Imran: 2nd year MS student has 3 conference publications and 3 poster publications

Mr. Piyush Sharma: PhD candidate in Applied Math, Dr. Holness (CIS) is his advisor. Piyush has 2 conference and 1 poster publication

Mr. Kenneth Shim:

Source of Evidence: Academic direct measure of learning - other
Target:
Students currently working on a Thesis

Mr. Kenneth Shim
Mr. Rexford Aboagye

Once a topic is selected, they generally do not have issues in developing a research question, designing experiments, and executing the experiments. By the time they are working on their thesis or project they are practiced enough in the requisite skills to be successful. This is evidence that their training (Core courses, elective courses, seminars) is effective.

G 4: gain mastery for experimentation
Students will learn strategies, approaches, varying viewpoints, and tools for design of experiments, execution of experiments, data collection, and data visualization. Students will also reinforce learned methodologies through rapid prototyping and scoped semester projects.

SLO 2: critical thinking
Students will develop and practice scientific skills in critical analysis of the research literature, scientific inquiry, the design and execution of experiments, and interpretation and articulation of results.

The elective courses address critical thinking through depth within the discipline. Students select and take a number of elective courses in their area of interest. Elective courses address advanced topics as well as current topics from the recent research literature. The elective courses also engage students in critical thinking and excursive experimental skills through substantial semester projects. This gives students the opportunity to reproduce, analyze and or improve results from the published research literature. Students gain both experience in research but exercise critical thinking required to fill in gaps typically not articulated in research publications.

**SLO 5: Outside speakers**
The department has hosted a number of guest speakers who have given technical and tutorial talks.
These include engineers, scientists, and programmers from Microsoft, Bureau of Labor and Statistics, University of Pennsylvania, and other corporate concerns.

**Relevant Associations:**

**DSU Learning Goal Associations:**
5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.

**Strategic Plan Associations:**
College of Mathematics, Natural Sciences, & Technology
7.1 Increase the percentage of freshmen declared majors in the College who enroll as sophomores to a total of 90% in four years by focusing on retaining declared majors and by attracting undeclared majors.

Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community
3.4 Maintain the highest standards of ethics and integrity in research and management of the research enterprise
6.6 Create a culture of accountability, high performance and service excellence.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Automate Recruitment Effort**
Investigate a more automated method for handling applications and recruitment. As applications increase, this will allow the department to scale its recruitment efforts. This will require collaboration with school of graduate studies.

**Established in Cycle:** 2014-2015
**Implementation Status:** Planned
**Priority:** High
**Projected Completion Date:** 01/30/2017

**Fundraising for Department-Wide Grants**
Engage faculty for department-wide research traineeship type grants to fund graduate program
activities including stipends, conference travel, minor equipment, supplies, etc.

**Established in Cycle:** 2014-2015  
**Implementation Status:** In-Progress  
**Priority:** High

**Research Advisor Training**  
Develop training materials or seminar on how to be an effective research advisor

**Established in Cycle:** 2014-2015  
**Implementation Status:** In-Progress  
**Priority:** High

**Sync meeting with each graduate student**  
Meet with every graduate student near beginning of semester and after end of semester

Beginning of semester meeting purposed with discussion of goals, concerns, etc.  
End of semester meeting purposed with post-analysis of how they did, areas for improvement, etc.

**Established in Cycle:** 2014-2015  
**Implementation Status:** In-Progress  
**Priority:** High

**Update and Execution of Marketing Plan**  
Create content
- photos  
- articles  
- video vignettes  
- training videos  
- personal accounts and interviews  
- explore press release with Associated Press and Local News

Engage public with Edutainment style videos.

Employ viral type marketing to drive additional applications  
Revamp YouTube channel

**Established in Cycle:** 2014-2015
Implementation Status: In-Progress
Priority: High
Mission / Purpose

The mission of the Campus Events Office is to complement the academic mission of the University by providing an experienced, reliable, and professional staff of event planners to assist faculty, staff, students and the local community with the planning and implementation of their special events. Excellence will be achieved through proactive customer service, consistent policies, focus on student development and revenue generation within an atmosphere of open communication, accountability, and fiscal responsibility.

Goals without Outcome/Objective Relationships Specified

G 1: To improve and enhance web event request

Streamline external clients request for use of DSU facilities. Improve reporting procedures on room use, availability, and class room occupancy rates.
Mission / Purpose

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Research-based outreach education
To deliver unbiased, research-based programs to youths and adults through a network of educators at the universities, county and city offices, research and extension centers, and facilities located throughout the state.

O/O 1: Agriculture and Natural Resources programs

Agriculture and Natural Resources

Cooperative Extension provides minority and limited resource farmers with research-based education on production, marketing, management and finance. As the median age of farmers continue to increase, outreach programs that expose youths to opportunities in agriculture and encouraged them to pursue education at DSU are needed. Active agriculture extension programs and new initiatives include:

- The Outreach and Technical Assistance for the Socially Disadvantaged Farmers and Ranchers Program (2501), which assists socially disadvantaged farmers and ranchers with information and technical assistance in production, marketing, management, business planning and USDA programs. Demonstrations and applied research conducted at the Outreach and Research Center in Smyrna included pole lima bean trials, season extension trials using high tunnels, and growing a variety of ethnic vegetables. Through workshops, one-on-one assistance and field days, the small farms program reached 918 people directly this year. Another 2250 people were reached indirectly through newsletters, factsheets and mailings.

- The Risk Management and Community Outreach Program for Limited Resource and Underserved Producers in Delaware provides hands-on training in on-farm risk management tools for small, minority, and female farmers. More than 200 small farm owners attended Cooperative Extension's first "Profiting from a Few Acres" Risk Management
conference February 20 - 21, 2009, in Dover. Conference attendees learned how to effectively manage the financial, production, marketing and legal risks associated with an agribusiness. The conference provided risk management solutions and strategies from the five USDA defined areas of risk. The conference evaluations suggested 86 percent of participants increased their knowledge of agriculture risk management strategies. Additionally, 97 percent of participants rated the conference as excellent or very good. At least 100 small ag producers, DSU and USDA personnel are expected to attend the 2010 conference that is scheduled for November 10 - 11.

- **Soils Tests Program** - Extension Educators conducted soil tests for 42 small and limited resource to help farmers identify the appropriate soil amendments needed for maximum yield and minimal inputs and environmental impacts.

- The Small Ruminant Extension program provides research-based education to small ruminant producers in the sheep and goat industry, including small and beginning farmers. Workshops covered out of season breeding, FAMACHA, and fecal egg counting. More than 25 small ruminant producers in the Mid-Atlantic Region are participating in a SARE funded research project entitled, "Characterization of Anthelmintic Resistance in Small Ruminant Gastrointestinal Nematodes (GIN) in the Mid-Atlantic State".

- The Aquaculture Technical Assistance and Outreach Program seeks to foster the creation of a viable aquaculture industry in Delaware by identifying suitable aquaculture species for Delaware and the mid-Atlantic region, and exploring low input methods to raise them economically and environmentally. Methods used include applied research, information dissemination and demonstrations. Information was provided to 148 pond owners through tours and meetings on economic opportunities including fee fishing or developing niche markets an added income sources.

- The Master Gardener Program applies the train-the-trainer educational model to teach Delaware residents how to plan, plant and care for gardens and landscaping on their property. Delaware State University and the University of Delaware collaborate to address home, lawn and garden concerns through the Master Gardener volunteer program. Additionally, Extension's Backyard Gardening program helped interested Delawareans establish produce gardens to supplement their family meals and income.
• The Delaware Backyard Garden Program of Delaware State University Cooperative Extension helped establish a backyard garden for residents that have limited resources or reduced income due to current economical times. We also had two local Elementary schools establish a garden for their summer program. To get maximum production from the garden, it is important to have a soil test done and amend the soil according to the analysis, and to grow varieties that are adapted to Delaware's growing conditions. By providing opportunities for hands-on planting, growing and harvesting experiences anyone can be successful growing vegetable, herb and flowering plants. Thirty families and/or summer school programs contacted Delaware State University Cooperative Extension requesting help to establish a backyard garden, to supplement their families' meals and provide snacks with fresh, picked vegetables and herbs.

Relevant Associations:

Strategic Plan Associations:
College of Agriculture & Related Sciences
2.1 Increase small-scale agriculture sustainability.
2.2 Promote the use of alternative crops and products to limited resource, small farm owners.
Implementation Strategies
3.1 Expand research teaching and outreach activities of CARS in ecosystem management including soil, watershed and habitat restoration.
3.2 Increase programmable activities in sustainable agriculture production practices.
Implementation Strategies
3.3 Enhance CARS partnership with agencies working on environmental protection issues (DOGA, USDA, NRCS, EPA and DNREC).

O/O 2:Family and Consumer Sciences programs

Family and Consumer Sciences

Obesity and weight related medical conditions have become epidemic health issues in the United States leading to chronic health problems including diabetes, hypertension and heart disease. Cooperative Extension programs target people in all age ranges to teach them more effective ways to control their diets and to improve their overall health conditions. Education initiatives address nutrition and food safety, and the importance of daily exercise. Active Programs include:
· **Brown Bag Parenting program** The Brown Bag Parenting Education Program is an eight week correspondence program that provides research-based knowledge on topics aimed to improve the confidence and skill level of care providers. The program, whose targeted audience includes parents, grandparents and guardians of children under age 18, receives statewide referrals from social service agencies and family courts. It is offered as an alternative to on-site parenting programs where participants are able to complete parenting education requirements at times that are most convenient for them. At the completion of the program, participants receive a Certificate of Completion which is then presented to their respective case worker and thereby allows them to secure monthly subsidies for their children. To date the program has reached over 1,200 Delaware care providers.

· **EFNEP** - or Expanded Food and Nutrition Education Program - Extension paraprofessionals work with limited resource mothers of young children to promote healthful food choices, and to teach food safety and budgeting. One very popular summer EFNEP program involves teaching youths to cook healthy foods in the Foods Lab on the DSU campus.

· **SNAP-Ed** - or Supplemental Nutrition Education Program - offers a series of five lessons about healthful eating, food safety and physical activity to third and fourth grade elementary students in the New Castle, Kent and Sussex counties in which at least 50 percent of the student population is receiving free or reduced lunches. This year, the program reached 329 youths and was limited only by the availability of matching funds, and limited this year by the extended illness of the Nutrition Educator.

· **Thriving in Tough Times** - a series of 8 sessions offered monthly to a faith-based community in Dover, DE. It offered suggestions for saving money in a variety of activities of daily life - buying food; preventing serious illnesses; practicing food safety techniques; gardening; saving energy costs; gardening, etc.

**Relevant Associations:**

**Strategic Plan Associations:**

- College of Agriculture & Related Sciences
  - 4.1 Enhance the research, teaching and outreach efforts in food safety and security.
  - Implementation Strategies
  - 4.2 Expand education, research and outreach programs in nutrition and health.
  - 4.3 Enhance the economic viability of communities throughout Delaware and improve the quality of life of Delawareans by promoting healthy lifestyles and healthy eating habits.

**O/O 3:4-H Youth Development programs**
4-H Youth Development

The 4-H Youth Development Program at Delaware State University creates supportive environments to help culturally diverse, underserved youths (nine to 19 years of age) reach their fullest developmental potential. The program operates mainly in Kent and Sussex counties. 4-H is a national initiative operated through Cooperative Extension programs at land-grant colleges and universities throughout the country and rests on three national mandates: namely, Science, Engineering and Technology; Citizenship; and Healthy Living. DSU’s 4-H and Youth Development Programs reach more than 6,000 young people annually and include:

- 4-H Afterschool, which combines 4-H programming with academic tutoring for 9 - 19 year-old youths, in partnership with the Delaware Housing Authority.

- Ladies and Gentlemen's Clubs, which are hosted by schools in Sussex County to help students improve academically and develop better life-coping skills.

- Annual Farm Tour, which is held at DSU's Hickory Hill Farm and draws more than 2,000 youth and adults to learn about agriculture.
Goals without Outcome/Objective Relationships Specified

G 1: Sustainability of apparel disposal and consumption
Sustainability of apparel disposal and consumption

G 2: Small ruminant reproductive efficiency
Small ruminant reproductive efficiency

G 3: Integrated approaches to parasite control
Integrated approaches to parasite control

G 4: Characterization of dewormer resistance in the northeastern U.S.
Characterization of dewormer resistance in the northeastern U.S.

G 5: Sustainable pasture grazing management of multiple species
Sustainable pasture grazing management of multiple species

G 6: Transformation process of biochar following soil application
Transformation process of biochar following soil application

G 7: Biochar application for soil quality and carbon sequestration
Biochar application for soil quality and carbon sequestration

Evaluation of commercial mycorrhizal products for increased growth of herbs

G 11: Development of intervention strategies to combat adult and childhood obesity in the State of Delaware.
Development of intervention strategies to combat adult and childhood obesity in the State of Delaware.
Mission / Purpose

Under the auspices of the Vice President for Student Affairs, Counseling Services unit is designed to help students to meet their personal, social, and academic needs. Counselors help students to explore their needs, feelings, interpersonal relationships and life goals. Student personal development workshops, individual, and group counseling sessions are provided for all categories of our student population.

The strategies employed by counselors are used to maximize students' growth and successful completion of the University experience. Our mission is consistent with the mission of the student affairs division and university as a whole in that it supports the empowerment of students to establish and maintain a collegiate atmosphere conducive to the highest level of academic and personal success.

Confidentiality: Counseling sessions take place in private, and the relationship between counselors and students are held in strictest confidence.

Our service approach is ecological: We recognize that our students come from diverse backgrounds and that their health and educational needs transcend individual factors and are impacted by surrounding cultural, institutional, socioeconomic, and political influences. We are committed to reaching students, including those from traditionally-underserved groups, and providing programming to help the DSU community realize its full potential to be psychologically healthy and socially just.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Provide outreach and counseling services to students
Outreach to student body via individual, group, workshops and mental health events.

SLO 3: Offer student personal development workshops as requested
Workshops will provide psychoeducational information to student body.

Relevant Associations:
DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Strategic Plan Associations:
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

Related Measures:

M 1: Student Participation
activities/events/workshops and individual counselings will be offered each semester as needed.

Source of Evidence: Activity volume

Target:
Workshops will be provided to students at various forums as requested.

Findings (2016-2017) - Target: Met
Personal development workshops were facilitated with students in residence halls, university seminar classes, counseling resource center and MLK student center.

M 8: Education and Awareness of Counseling Resources/Services
Students will be made aware of counseling resources/services. Pre/Post Tests will be administered during personal development workshops.

Source of Evidence: Evaluations

Target:
Workshops will be provided as requested on a first come, first served basis.

Findings (2016-2017) - Target: Met
Workshops were provided as requested and as determined by prevalence of negative student behaviors.

Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Provide outreach and counseling services to students
Outreach to student body via individual, group, workshops and mental health events.

O/O 1: Conduct Counseling Sessions
Invite new and returning students for initial and subsequent sessions at beginning of each semester.

Related Measures:

M 1: Student Participation
activities/events/workshops and individual counselings will be offered each semester as needed.

Source of Evidence: Activity volume

**Target:**
All new students will be invited to initial counseling session no later than end of each semester.

**Findings (2016-2017) - Target: Met**
All new students were contacted via email, telephone, and hard copy invites.

**M 8: Education and Awareness of Counseling Resources/Services**
Students will be made aware of counseling resources/services. Pre/Post Tests will be administered during personal development workshops.

Source of Evidence: Evaluations

**Target:**
Contact will be made requesting individual sessions with all new and returning students by mid-semester (Fall & Spring)

**Findings (2016-2017) - Target: Met**
Individual counseling sessions were provided for 100 percent of students who were referred by self, or others.

**O/O 2: Provide crisis intervention services as needed 24/7**
Be available for students who experience psychological crisis.

**Related Measures:**

**M 8: Education and Awareness of Counseling Resources/Services**
Students will be made aware of counseling resources/services. Pre/Post Tests will be administered during personal development workshops.

Source of Evidence: Evaluations

**Target:**
Psychological emergency/crisis intervention services will be provided for all student's identified and/or referred.

**Findings (2016-2017) - Target: Met**
Crisis intervention for students experiencing psychological emergencies was provided 100 percent.

**M 9: Crisis Intervention Reports**
Crisis Intervention Reports will be completed in a timely manner.

Source of Evidence: External report

**Target:**
Crisis Intervention Reports will be completed within 24-hours of incident involving intervention by Counselors.
**Findings (2016-2017) - Target: Partially Met**

- 3 reports were completed same day as incident
- 5 reports were completed within 24-hrs
- 2 reports were completed on Monday following weekend
- 2 reports were one-day late.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Late Crisis Intervention Reports**

*Established in Cycle: 2016-2017*

Counselors will be reminded at the beginning of each semester of the 24-hour commitment. Additionally, they will be required to exp...

**G 3: Collaborate with community partners (Violence Against Women Act grant)**

Implement sexual assault prevention activities as required by the Violence Against Women Act (VAWA) Grant. Victims will learn about support services provided on and off campus.

Students will receive educational information related to sexual assault.

**O/O 6: Continue implementing VAWA grant**

Title of Grant Awarded: Innovative Partnerships to Reduce Gender-Based Violence on Delaware Campuses. This is a collaborative grant between DSU and UD. Grant funding will provide Counseling with opportunities for more outreach, information, education, prevention and awareness to students on the issues of sexual assault, partner violence and stalking in accordance with Title #9, Cleary Act, and Campus SaVE Act.

**Tasks:**

1. Implement programming throughout school year.
2. Request Grant Extension
3. Request Grant Renewal

**Relevant Associations:**

**Strategic Plan Associations:**

Delaware State University
2.1 Increase retention and graduation rates by at least two percent annually for the next five years
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 10:Grant Requirements**
Grant requirements are indicated and reported on bi-annually by Co-PI, Dr. Pauline Meek.

Source of Evidence: Government standards

**Target:**
Activities/Events/Workshops and individual counseling related to sexual assault, partner violence and stalking will be conducted each semester.

**Findings (2016-2017) - Target: Met**
Counseling professional staff and SARA students have completed various education, prevention and awareness activities during the entire school year.

**G 4:Conduct a self-assessment of Counselor’s skills**

Counselors conduct self-assessment utilizing Counseling Skills Inventories

**O/O 7:Conduct Counseling Self-Assessments**

The counseling skills inventory is a self-inspection tool used by counselors to assess their proficiency as it relates to utilizing various, evidence-based techniques. The Council on Higher Education CAS Standards are utilized to perform self-studies in an effort to identify strengths and needs of the overall counseling program. Data from the aforementioned assessments will enable Counseling to develop strategic plan to address deficiencies.

**Tasks:**

1. Conduct Counseling Skills Inventories - Annually
2. Conduct CAS Self-Study - Annually
3. Plan Strategy to Address DeficienciesCounselors conduct their individual Skills Inventory and CAS Self-Study no later than 30 June, 2017
4. Plan strategy to address items that are identified as deficient no later than 15 July, 2017
Relevant Associations:

Strategic Plan Associations:
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

Related Measures:

**M 5: Conduct Counseling Self-Assessments**

The counseling skills inventory is a self-inspection tool used by counselors to assess their proficiency as it relates to utilizing various, evidence-based techniques. The Council on Higher Education CAS Standards are utilized to perform self-studies in an effort to identify strengths and needs of the overall counseling program. Data from the aforementioned assessments will enable Counseling to develop strategic plan to address deficiencies.

**TASKS:**
1. Skills Inventory results
2. CAS Self-Study results
3. Review of Strategic Plan to address deficiencies.

Source of Evidence: Existing data

**Target:**
Target Date: 30 June, 2017 & 15 July, 2017

**Findings (2016-2017) - Target: Met**
Counseling Self Assessments were conducted in June 2017. All deficiencies were identified and will be addressed going forward.

**Findings (2014-2015) - Target: Not Reported This Cycle**
Completed...minimal discrepancies noted.

**Findings (2010-2011) - Target: Partially Met**
CAS Standards Review Completed. No major Descripancies.

**M 11: CAS Self-Study and Skills Inventory**
Conduct CAS Self-Study and Skills Inventory Annually.

Source of Evidence: Professional standards

**Target:**
Counselors conduct their individual Skills Inventory and CAS Self-Study no later than 30 June, 2017
Plan strategy to address items that are identified as deficient no later than 15 July, 2017

**Findings (2016-2017) - Target: Met**
Self-Assessments completed. No significant discrepancies reported.

**G 5: Revise Student Satisfaction Survey**
1. Some items are non-applicable and need to be revised.

**O/O 8: Revise Student Survey**

Current Satisfaction survey needs revision on question #4.

Tasks:

1. Revise survey and send out during spring semester 2018

**Relevant Associations:**

**Strategic Plan Associations:**
Delaware State University
2.1 Increase retention and graduation rates by at least two percent annually for the next five years
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

**Related Measures:**

**M 4: Revised Student Survey Utilizing Survey Monkey**
Revision of student satisfaction survey questions utilizing an online instrument

Source of Evidence: Service Quality

**Target:**
Completed.

**Findings (2016-2017) - Target: Partially Met**
Question #4 of Survey under revision.

**M 12: Satisfaction Survey**
Student satisfaction with overall services will be assessed via revised Survey.

Source of Evidence: Client satisfaction survey (student, faculty)

**Target:**
Survey will be revised to address discrepancy on item #4 no later than Spring semester 2018.

**Findings (2016-2017) - Target: Partially Met**
Survey Monkey will continue to be used for the upcoming semester.

**Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**SLO 4: Recruit, train and supervise Peer Counselors**

Train Peer Counselors to be an extension of Counseling Services.
Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Strategic Plan Associations:
Delaware State University
2.1 Increase retention and graduation rates by at least two percent annually for the next five years
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

Related Measures:

M 1: Student Participation
activities/events/workshops and individual counselings will be offered each semester as needed.

Source of Evidence: Activity volume

Target:
All new Peer Counselors will be trained during their first semester of their hiring.

Findings (2016-2017) - Target: Met
Peer Counselors were trained by Activity Director.

M 2: Documentation will be recorded by Activity Director
Activity Director will document hiring, training and outreach activities of Peer Counselors for each school year.

Source of Evidence: External report

Target:
Hire or rehire at least 13 students as peer counselors per academic year. Peer counselors will receive weekly supervision/training as a prevention/intervention method to educate all students on positive mental health.

Findings (2016-2017) - Target: Met
13 Peer Counselors were hired and trained during 2016-17 School Year.

Findings (2016-2017) - Target: Met
13 Peer Counselors were hired and trained during 2016-17 School Year.

Findings (2016-2017) - Target: Met
13 Peer Counselors were hired and trained during 2016-17 School Year.

SLO 5: Facilitate Peer Counselor anti-stigma activities and workshops
Peer Counselors will provide educational information to student body concerning good mental health and prevention of negative stigma.
Relevant Associations:

DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Strategic Plan Associations:
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

Related Measures:

**M 1: Student Participation**
activities/events/workshops and individual counselings will be offered each semester as needed.

Source of Evidence: Activity volume

**Target:**
Students will be provided with anti-stigma campaigns and workshops throughout campus community by Peer Counselors at least twice per semester.

**Findings (2016-2017) - Target: Met**
Peer Counselors (under Staff Counselor supervision) facilitated mental health anti-stigma campaign in accordance with requirements of Title III grant objectives.

**M 7: Mental Health Anti-Stigma Survey Administered**
Mental Health Anti-Stigma survey administered during tabling events (Health Fairs, etc.). Students' awareness of social stigmas that adversely affect individuals with acute and chronic mental illness is increased. Quantitative data is collected regarding general student body perceptions of individuals with and chronic mental illness.

Source of Evidence: Evaluations

**Target:**
Student Body at workshops, tabling events and health fairs.

**Findings (2016-2017) - Target: Met**
Workshops and campaigns centered on anti-stigma have been accomplished by Peer Counselors.

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

**O/O 9: Develop Pol & Procedures Manual for Vets**

**Veterans Affairs is no longer within this department.** Need to develop formal, streamlined (written) university policy in order to help veterans, pursue
personal, financial and academic needs without undue confusion and/or hardship. Need to obtain feedback from veterans about service delivery.

Tasks:

1. Analyze results of Student Feedback Survey NLT beginning of Fall Semester 2014

**Relevant Associations:**

**DSU Learning Goal Associations:**
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 6: Develop Pol & Procd Manual for Vets**

THIS DEPT. WAS MOVED TO FINANCIAL AID

Need to develop formal, streamlined (written) university policy in order to help veterans, pursue personal, financial and academic needs without undue confusion and/or hardship. Need to obtain feedback from veterans about service delivery.

1. Follow up with Veterans Affairs Coordinator et al, weekly
2. Feedback from US Department of Defense
3. Feedback from US Department of Veterans Administration
4. Feedback from DE Department of Education
5. Feedback from veteran students' survey

Source of Evidence: Existing data

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Theoretical Perspective
Students will develop a theoretical perspective using criminological and sociological theories.

SLO 1: Define Sociological and Criminological Theories
Students will be able to identify and define the primary sociological and criminological theories.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 1: Sociological Theories Assignment Grade
Grade in Sociological Theories assignment.
Source of Evidence: Academic indirect indicator of learning - other

Target:
At least 90% of students will make a C or better on assignment defining theories.

Findings (2016-2017) - Target: Partially Met
86% of students received a C or better on assignment defining sociological theories.

Findings (2015-2016) - Target: Partially Met
88% of students received a C or better on assignment defining sociological theories.

Findings (2014-2015) - Target: Met
95% of students received a C or better in the Sociological Theories course.

Findings (2013-2014) - Target: Met
92% of students received a C or better in the Sociological Theories course.
Findings (2012-2013) - Target: Not Met
87% of students made a C or better in the Sociological Theories course.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Sociological Theories
Established in Cycle: 2015-2016
Only 88% of students made C or better on the assignment assessing understanding and application of sociological theories.

M 2: Criminology Theories Assignment Grade
Grade on criminology theories assignment.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
At least 90% of the students will make a C or better on assignment defining criminological theories.

Findings (2016-2017) - Target: Partially Met
82% of students received a C or better on the criminological theory assignment. This is an 8% increase from the previous year.

Findings (2015-2016) - Target: Not Met
74% of students received a C or better on the criminological theory assignment.

Findings (2014-2015) - Target: Met
92% of students received a C or better in the Criminology course.

Findings (2013-2014) - Target: Met
91% of students received a C or better in the Criminology course. Note: Only one section of the Criminology course included in this assessment due to grading issues in the other two courses.

Findings (2012-2013) - Target: Not Met
Only 71% of the students made a C or better in the Criminology course.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Criminology Theory
Established in Cycle: 2015-2016
Only 74% of students made a C or better on assignment assessing understanding and application of criminological theories.

SLO 2: Use Theories
Students will be able to use criminological and sociological theories to explain issues related to the criminal justice discipline.
Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 3: Capstone Theoretical Perspective
Ratings on Theoretical Perspective element of the Capstone Research Paper Grading Rubric. Capstone assignment is to write a critical argument explaining a criminal justice issue using a sociological theoretical perspective.

Source of Evidence: Capstone course assignments measuring mastery

Target:
At least 90% of students will receive an adequate or better rating on the Theoretical Perspective element of the Capstone Research Paper Grading Rubric.

Findings (2016-2017) - Target: Partially Met
85% of students received an adequate or better rating.

Findings (2015-2016) - Target: Met
90% of students received an adequate or better rating.

Findings (2014-2015) - Target: Partially Met
87% of students received an adequate or better rating on the Theoretical Perspective element of the Capstone Research Paper Grading Rubric. Although this is below the 90% target, it is a 5% increase from the previous academic year.

Findings (2013-2014) - Target: Not Met
82% of students received an adequate or better rating on the Theoretical Perspective element of the Capstone Research Paper Grading Rubric.

Findings (2012-2013) - Target: Not Met
Only 80% of students received an adequate or better rating on the Theoretical Perspective element of the Capstone Research Paper Grading Rubric.

SLO 3: Develop a Critical Argument
Students will be able to develop a sound, credible argument assessing a criminal justice issue using a sociological perspective.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 4: Capstone Research Paper Grade**

Grade on the capstone research paper. Capstone assignment is to write a critical argument explaining a criminal justice issue and its impact.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
At least 90% of students will receive a C or better on their final capstone research paper.

**Findings (2016-2017) - Target: Partially Met**
85% received a C or better on capstone research paper.

**Findings (2015-2016) - Target: Met**
92% received a C or better on capstone research paper.

**Findings (2014-2015) - Target: Not Met**
82% of students received a C or better on their final capstone research paper.

**Findings (2013-2014) - Target: Met**
90% of students received a C or better on their final capstone research paper.

**Findings (2012-2013) - Target: Not Met**
Only 81% received a C or better on their final capstone research paper.

G 2: Scientific Nature of Criminal Justice

Students will understand the scientific nature of the criminal justice discipline.

**SLO 4: Define the Scientific Process Used in the Criminal Justice Discipline**

Students will be able to identify and define the components of the scientific process used to examine criminal justice issues.

**Relevant Associations:**

**DSU Learning Goal Associations:**
- 1 UG Student Learning Goal: Competent Communicators
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 5: Scientific Method**

Grade on assessment of understanding scientific method in Research Methods course.

Source of Evidence: Academic indirect indicator of learning - other
Target: At least 90% of students will receive a C or better on the scientific process assignment/test in the Research Methods course.

Findings (2016-2017) - Target: Partially Met
89% of students received a C or better on the assignment defining the scientific process. This is a 19% increase from the previous year.

Findings (2015-2016) - Target: Not Met
Only 70% of students received a C or better on the assignment defining the scientific process.

Findings (2014-2015) - Target: Not Met
83% of students received a C or better in the Research Methods course.

Findings (2013-2014) - Target: Not Met
79% of students received a C or better in the Research Methods course.

Findings (2012-2013) - Target: Met
90% of students received a C or better in the Research Methods course.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Improve understanding of scientific process
Established in Cycle: 2015-2016
Only 70% of students adequately identified and defined the elements of the scientific process. Need to further examine grades a...

SLO 5: Explain Primary Methodologies Used to Examine Criminal Justice Issues
Students will be able to identify and explain the primary methodologies used in the criminal justice discipline.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 5: Scientific Method
Grade on assessment of understanding scientific method in Research Methods course.

Source of Evidence: Academic indirect indicator of learning - other

Target:
At least 90% of students will receive a C or better on the assignment/test explaining research methodologies in the Research Methods course.
Findings (2016-2017) - Target: Partially Met
80% of students received a C or better on the assignment/test explaining research methodologies. This is a 12% increase from the previous year.

Findings (2015-2016) - Target: Not Met
68% of students made a C or better on the assignment/test explaining research methodologies.

Findings (2013-2014) - Target: Not Met
79% of students received a C or better in the Research Methods course.

Findings (2012-2013) - Target: Met
90% of students received a C or better in the Research Methods course.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Improve understanding of research methods
Established in Cycle: 2015-2016
Only 68% of students adequately identified and explained various sociological research methods. Need to further examine grades....

Strengthen understanding of research methodologies
Established in Cycle: 2015-2016
88% of students made a C or better on research methodologies assignment.

SLO 6: Interpret Criminal Justice Research Findings
Students will be able to interpret qualitative and quantitative research findings in the criminal justice discipline.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 6: Rating on Capstone Rubric QR element
Rating on Quantitative Reasoning element of the Capstone Rubric. Senior Seminar (Capstone Course) includes several assignments in which students interpret research findings. The capstone assignment also requires the use of statistical information to demonstrate understanding and use of quantitative information.

Source of Evidence: Academic indirect indicator of learning - other
Target:
At least 90% of students will receive a satisfactory or better rating on the Capstone Rubric Quantitative Reasoning element.

Findings (2016-2017) - Target: Met
95% of students received a satisfactory or better rating. This is a 2% increase from the previous year.

Findings (2015-2016) - Target: Met
93% of students received a satisfactory or better rating.

Findings (2014-2015) - Target: Met
97% of students received a satisfactory or better rating on the Capstone Rubric Quantitative Reasoning element.

Findings (2013-2014) - Target: Not Met
88% of students received a satisfactory or better rating on the Capstone Rubric Quantitative Reasoning element.

Findings (2012-2013) - Target: Not Met
Only 77% of students received a satisfactory or better rating on the Capstone Rubric QR element.

SLO 7: Critique Criminal Justice Research
Students will be able to assess and critique the validity and utility of criminal justice research.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 7: Grade on Assignments Assessing Published Research
Students will be able to critique published research, assessing method and findings.

Source of Evidence: Academic direct measure of learning - other

Target:
At least 90% of students will receive a C or better on written assignments critiquing published research.

Findings (2016-2017) - Target: Partially Met
84% of students received a C or better on written assignments critiquing published research. This is a 4% increase from the previous year.
Findings (2015-2016) - Target: Partially Met
80% of students received a C or better on written assignments critiquing published research.

Findings (2014-2015) - Target: Not Met
76% of students received a C or better on written assignments critiquing published research.

Findings (2013-2014) - Target: Not Met
87% of students received a C or better on written assignments critiquing published research.

Findings (2012-2013) - Target: Met
93% of students received a C or better on written assignments critiquing published research.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Improve student ability to critique published research
Work with all instructors to increase assignments related to critiquing published research.

SLO 8: Develop a Research Proposal
Students will develop a sound, ethical, feasible research proposal to examine a criminal justice issue.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 8: Grade on Research Proposal
Students will be able to design a research proposal.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
At least 90% of students will receive a C or better on the written research proposal assignment.

Findings (2016-2017) - Target: Partially Met
87% of students received a C or better on the research proposal.
Findings (2015-2016) - Target: Met
90% of students received a C or better on the research proposal.

Findings (2014-2015) - Target: Not Met
76% of students received a C or better on written research proposal assignment.

Findings (2013-2014) - Target: Not Met
70% of students received a C or better on the written research proposal assignment.

Findings (2012-2013) - Target: Not Met
Only 74% of students made a C or better on the written research proposal assignment.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Improve student ability to design research proposal
Established in Cycle: 2012-2013
Curriculum Committee to identify ways to improve student ability to design research proposals.

SLO 9: Understand and apply statistical principles
Students will be able to apply standard statistical practices to examine criminal justice issues.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 9: Rating on Quantitative Reasoning Rubric Application Element
Students will be able to apply basic statistical principles used in criminal justice research.

Source of Evidence: Academic direct measure of learning - other

Target:
At least 90% of students will be able to apply basic statistical principles used in criminal justice research.

Findings (2016-2017) - Target: Met
91% of students were able to apply basic statistical principles.

Findings (2015-2016) - Target: Met
92% of students were able to apply basic statistical principles.
Findings (2014-2015) - Target: Partially Met
89% of students received a satisfactory or better rating on the Quantitative Reasoning Rubric Application Element. Although this is slightly below the 90% target, it is a 10% increase from the previous academic year.

Findings (2013-2014) - Target: Not Met
79% of students received a satisfactory or better rating on the Quantitative Reasoning Rubric Application Element.

Findings (2012-2013) - Target: Met
92% of students received a satisfactory or better rating on the Application element of the Quantitative Reasoning Rubric.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Improve ability to apply statistical concepts

Increase assignments related to applying statistical concepts.

SLO 10: Use findings to support a criminal justice argument
Students will be able to use research findings to support a criminal justice argument.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 10: Rating on Capstone Evidence
Rating on Evidence Element of the Capstone Research Paper Grading Rubric. Capstone assignment is to write a critical argument assessing a criminal justice issue and requires the use of credible research findings to support the argument.

Source of Evidence: Capstone course assignments measuring mastery

Target:
At least 90% of students will receive an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric.

Findings (2016-2017) - Target: Partially Met
88% of students received an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric.
Findings (2015-2016) - Target: Met
94% of students received an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric.

Findings (2014-2015) - Target: Met
94% of students received an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric.

Findings (2013-2014) - Target: Not Met
74% of students received an adequate or better rating on the Evidence element of the Capstone Research Paper Grading Rubric.

Findings (2012-2013) - Target: Not Met
Only 69% of students adequately used scientific findings to support a critical argument.

G 3: Centrality of Inequality
Students will understand inequality as it relates to the criminal justice system.

SLO 11: Define and explain inequality
Students will be able to define and explain inequality as it relates to the criminal justice discipline.

Related Measures:

M 11: Grade on assignment explaining inequality
Grade on assignment explaining inequality in Social Stratification course.

Source of Evidence: Academic indirect indicator of learning - other

Target:
At least 90% of students will receive a C or better on the assignment/test defining and explaining inequality in the Social Stratification course.

Findings (2016-2017) - Target: Met
90% of students received a C or better on the inequality assignment. This is a 2% increase from the previous year.

Findings (2015-2016) - Target: Partially Met
88% of students received a C or better on the inequality assignment.

Findings (2014-2015) - Target: Not Met
82% of students received a C or better in the Social Stratification course.

Findings (2013-2014) - Target: Not Met
74% of students received a C or better in the Social Stratification course.

Findings (2012-2013) - Target: Met
93% of students made a C or better in the Social Stratification course.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.
Improve student learning related to understanding inequality
*Established in Cycle: 2013-2014*
Improve student learning related to understanding inequality.

**SLO 12:** Examine the intersection of race, class and gender
Students will be able to assess criminal justice issues in regards to race, class and gender differences.

**Relevant Associations:**

**DSU Learning Goal Associations:**
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 11:** Grade on assignment explaining inequality
Grade on assignment explaining inequality in Social Stratification course.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
At least 90% of students will receive a C or better on the intersection assignment/test in the Social Stratification course.

**Findings (2016-2017) - Target: Met**
90% of students received a C or better on the intersection assignment. This is a 2% increase from the previous year.

**Findings (2015-2016) - Target: Partially Met**
88% of students received a C or better on the intersection assignment.

**Findings (2013-2014) - Target: Not Met**
74% of students received a C or better in the Social Stratification course.

**Findings (2012-2013) - Target: Met**
93% of students received a C or better in the Social Stratification course.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Improve student learning related to understanding intersection**
*Established in Cycle: 2015-2016*
Only 88% of students demonstrated understanding intersection of race, class, and gender.

**SLO 13:** Critique inequality as it relates to the criminal justice system
Students will be able to critique inequality in the criminal justice system.
Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 12: Rating on Capstone Impact

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
At least 90% of students will receive an adequate or better rating on the Capstone Research Paper Grading Rubric Impact element.

**Findings (2016-2017) - Target: Met**
93% of students received an adequate or better rating on the Capstone Research paper Grading Rubric Impact element. This is a 5% increase from the previous year.

**Findings (2015-2016) - Target: Partially Met**
88% of students adequately assessed impact on their capstone research paper.

**Findings (2014-2015) - Target: Met**
92% of students received an adequate or better rating on the Capstone Research paper Grading Rubric Impact element.

**Findings (2013-2014) - Target: Not Met**
74% of students received an adequate or better rating on the Casponte Research Paper Grading Rubric Impact element.

**Findings (2012-2013) - Target: Not Met**
Only 71% of students adequately examined inequality in the capstone research paper.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Improve student ability to assess impact.**
*Established in Cycle: 2015-2016*
Only 88% of students adequately assessed criminal justice policy impact on their capstone paper.

**G 4: Global Perspective**
Students will develop a global perspective on issues related to criminal justice.

**SLO 14: Define and explain a global perspective**
Students will be able to define and explain a global perspective on criminal justice issues.

**Relevant Associations:**

**DSU Learning Goal Associations:**
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 13: Rating on Global Learning View Systemic Issues Element**

Source of Evidence: Academic direct measure of learning - other

**Target:**
At least 90% of students will receive a satisfactory or better rating on the View Systemic Issues element of the Global Learning Rubric.

**Findings (2016-2017) - Target: Partially Met**
86% of students received a satisfactory or better rating on the View Systemic Issues element of the Global Learning Rubric.

**Findings (2015-2016) - Target: Met**
93% of students received a satisfactory or better rating on systemic issues element.

**Findings (2014-2015) - Target: Met**
96% of students received a satisfactory or better rating on the View Systemic Issues element of the Global Learning Rubric.

**Findings (2013-2014) - Target: Not Met**
78% of students will receive a satisfactory or better rating on the View Systemic Issues element of the Global Learning Rubric.

**Findings (2012-2013) - Target: Not Met**
Only 85% of students received a satisfactory or better rating on the View Systemic Issues element of the Global Learning Rubric.

**SLO 15: Define and explain multiculturalism**
Students will be able to define and explain multiculturalism as it relates to the criminal justice discipline.

**Relevant Associations:**

**DSU Learning Goal Associations:**
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 13: Rating on Global Learning View Systemic Issues Element**

Source of Evidence: Academic direct measure of learning - other

**Target:**
At least 90% of students will receive a satisfactory or better rating on View Systemic Issues element of Global Learning rubric.

**Findings (2016-2017) - Target: Met**
90% of students received a satisfactory or better rating on View Systemic Issues element of Global Learning Rubric.

**Findings (2015-2016) - Target: Met**
93% of students received a satisfactory or better rating on the systemic issues element.

**Findings (2014-2015) - Target: Met**
96% of students received a satisfactory or better rating on View Systemic Issues element of Global Learning Rubric.

**Findings (2013-2014) - Target: Not Met**
74% of students will receive a satisfactory or better rating on View Systemic Issues element of Global Learning rubric.

**Findings (2012-2013) - Target: Not Met**
Only 85% of students received a satisfactory or better rating on the View Systemic Issues element of the Global Learning rubric.

**SLO 16: Examine global issues related to the criminal justice discipline**
Students will be able to examine global issues related to the criminal justice discipline.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 14: Rating on Global Learning Rubric Able to Apply Global Perspective Element**
Target:
At least 90% of students will receive a satisfactory or better rating on the Able to Apply Global Concepts element of the Global Learning Rubric.

Findings (2016-2017) - Target: Met
90% of students received a satisfactory or better rating on the Able to Apply Global Concepts element of the Global Learning Rubric.

Findings (2015-2016) - Target: Met
93% of students received a satisfactory or better rating.

Findings (2014-2015) - Target: Met
96% of students received a satisfactory or better rating on the Able to Apply Global Concepts element of the Global Learning Rubric.

Findings (2013-2014) - Target: Not Met
78% of students received a satisfactory or better rating on the Able to Apply Global Concepts element of the Global Learning Rubric.

Findings (2012-2013) - Target: Not Met
Only 85% of students received a satisfactory or better rating on the Global Learning Rubric Able to Apply Global Perspective element.

G 5:Criminal Justice System
Students will understand how the criminal justice system functions.

SLO 17:Identify and define components of the criminal justice system
Students will be able to identify and define the components of the criminal justice system.

Relevant Associations:
DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:
M 15:Grade on assignments related to cjs components.
Grade on assignments related to cjs components in Introduction to Criminal Justice course.

Source of Evidence: Academic indirect indicator of learning - other

Target:
At least 90% of students will make a C or better on assignments/tests related to identifying and defining components of the criminal justice system.

Findings (2016-2017) - Target: Met
94% of students made a C or better on assignments related to identifying
and defining components of the criminal justice system. This is a 2% increase from the previous year.

**Findings (2015-2016) - Target: Met**
92% of students made a C or better on assignments related to identifying and defining components of the criminal justice system.

**Findings (2014-2015) - Target: Not Met**
84% of students will make a C or better in the Introduction to Criminal Justice course.

**Findings (2013-2014) - Target: Not Met**
86% of students received a C or better in the Introduction to Criminal Justice course.

**Findings (2012-2013) - Target: Met**
94% of students made a C or better in the Introduction to Criminal Justice course.

**SLO 18: Examine and critique criminal justice system functions**
Students will be able to examine and critique criminal justice system functions.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 15: Grade on assignments related to cjs components.**
Grade on assignments related to cjs components in Introduction to Criminal Justice course.

Source of Evidence: Academic indirect indicator of learning - other

**Target:**
At least 90% of students will make a C or better on assignment/test critiquing functions of the criminal justice system.

**Findings (2016-2017) - Target: Met**
94% of students made a C or better on assignments related to critiquing the criminal justice system. This is a 4% increase from the previous year.

**Findings (2015-2016) - Target: Met**
90% of students made a C or better on assignments related to critiquing the criminal justice system.

**Findings (2014-2015) - Target: Not Met**
84% of students made a C or better in the Introduction to Criminal Justice course.
Findings (2013-2014) - Target: Not Met
86% of students received a C or better in the Introduction to Criminal Justice System course.

Findings (2012-2013) - Target: Met
94% of students made a C or better in the Introduction to Criminal Justice course.

SLO 19: Identify and Assess Ethical Issues
Students will be able to identify and assess ethical issues in the criminal justice system.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:

M 16: Rating on Ethical Issues element of the Contemporary Issues in CJ exam
Rating on the Ethical Issues in Contemporary Issues in CJ course exam.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
At least 90% of students will receive a rating of satisfactory or better on the Ethical Issues element of the Contemporary Issues in CJ course exam.

Findings (2016-2017) - Target: Partially Met
88% of students received satisfactory or better rating on Ethical Issues in criminal justice. This is a 6% increase from the previous year.

Findings (2015-2016) - Target: Partially Met
82% of students received satisfactory or better rating on Ethical Issues in criminal justice.

Findings (2014-2015) - Target: Met
95% of students satisfactorily identified and assessed ethical issues in the criminal justice system.

Findings (2013-2014) - Target: Not Reported This Cycle
Measure not assessed this cycle due to lack of data specific to measure.

Findings (2012-2013) - Target: Met
93% of students received a satisfactory or better rating on the Ethical Issues element of the Contemporary Issues in CJ course exam.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

**Improve student understanding of ethical issues**  
*Established in Cycle*: 2015-2016  
Only 82% of students adequately assessed ethical issues in the criminal justice system.

**SLO 20: Evaluate critical issues in the criminal justice system**  
Students will be able to evaluate critical issues in the criminal justice system.

**Relevant Associations:**

**DSU Learning Goal Associations:**
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 17: Grade on assignment assessing critical issues in Contemporary Issues in CJ course**  
Assignment grade assessing critical issues in Contemporary Issues in CJ course.

Source of Evidence: Writing exam to assure certain proficiency level

**Target:**
At least 90% of students will make a C or better on the Contemporary Issues in CJ course exam.

**Findings (2016-2017) - Target: Partially Met**  
86% of students made a C or better on assignment/test evaluating critical issues in the criminal justice system. This is a 4% increase from the previous year.

**Findings (2015-2016) - Target: Partially Met**  
82% of students made a C or better on assignment/test evaluating critical issues in the criminal justice system.

**Findings (2014-2015) - Target: Not Met**  
84% of students satisfactorily evaluated critical issues in the criminal justice system.

**Findings (2013-2014) - Target: Not Met**  
86% of students received a C or better on the Contemporary Issues in CJ course exam.

**Findings (2012-2013) - Target: Met**  
93% of students will make a C or better on the final written exam of the Contemporary Issues in CJ course.
Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Improve student learning related to evaluating critical issues in CJ
Established in Cycle: 2013-2014
Improve student learning related to evaluating critical issues in CJ.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Develop Relationship with IR to Analyze Major Course Grades
Work with IR to obtain and analyze course grades for majors only.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Working Relation with IR on Global Societies Course Grades
Work with IR to obtain Global Societies and Race and Ethnic and Cultural Anthropology course grades for Sociology majors.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Determine if new Writing Course improves critical thinking and writing skills
The Department developed a new writing course to begin in Fall 2012. The course is designed to improve critical thinking and analysis and improve writing skills. This course should have a direct impact on assessing understanding of inequality since that is demonstrated through critical writing exercises.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Continue assessment as designed. Track if assessment findings improve as students complete the new Writing course.
Responsible Person/Group: Department Assessment Chair
Additional Resources Requested: None

Identify direct assessment measure.
Identify direct assessment measure to assess objective.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Faculty to identify direct assessment measure to assess objective.  
**Responsible Person/Group:** Faculty  
**Additional Resources Requested:** None

**Identify new data source to assess multi-culturalism.**  
The current data source to assess student learning related to the multi-culturalism objective is the course grade for Global Societies. This measure is an indirect measure and the course is not in the Department, making the current data source weak and unreliable. A stronger (direct measure) data source that can be retrieved reliably will be identified.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Faculty to identify direct measure data source.  
**Responsible Person/Group:** Faculty in coordination with Department Assessment Committee Chair.  
**Additional Resources Requested:** None.

**Identify ways to Assess Data To Separate Majors and Non-Majors**  
Identify ways to better assess data to separate majors and non-majors. Work with adjuncts to ensure assessment and grading are consistent with Department standards.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Increase theory application in Criminology courses.**  
Continue to improve student ability to apply theories of crime and crime causation by increasing assignments requiring theory application.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High
Implementation Description:  Ensure that instructors teaching Criminology courses instruct students on theory application.
Responsible Person/Group:  Individual instructors.

Continue to increase emphasis on computer skill
Continue to increase skill building related to appropriate use of internet and other computer-based information sources.

Established in Cycle:  2011-2012
Implementation Status:  In-Progress
Priority:  High
Implementation Description:  Revise course learning objectives to ensure that computer skills are addressed. Increase course assignments related to identifying, accessing and using computer-based information sources.
Projected Completion Date:  05/25/2013
Responsible Person/Group:  Department Assessment Committee Chair to revise course learning objectives. Faculty responsible for increasing course assignments related to identifying, accessing and using computer-based information sources.
Additional Resources Requested:  None

Increase emphasis on critical thinking and writing
Continue to increase critical thinking and writing assignments and assessments in all curriculum courses.

Established in Cycle:  2011-2012
Implementation Status:  In-Progress
Priority:  High
Implementation Description:  Revise course learning objectives to strengthen emphasis on critical thinking and writing. Work with faculty to increase critical thinking and writing assignments and assessments.
Projected Completion Date:  05/25/2013
Responsible Person/Group:  Department Assessment Committee Chair to revise course objectives. Faculty responsible for increasing and improving critical writing and thinking assignments and assessments.
Additional Resources Requested:  None

Increase emphasis on multiculturalism
Revise course learning objectives in relevant courses to emphasize multiculturalism.

Established in Cycle:  2011-2012
Implementation Status:  In-Progress
Priority:  High
Implementation Description:  Department Assessment Committee Chair to revise course learning objectives. Faculty responsible for developing assignments emphasizing multiculturalism.
Responsible Person/Group:  Department Assessment Committee Chair to revise
course learning objectives. Faculty responsible for developing assignments emphasizing multiculturalism.

**Additional Resources Requested:** None

---

**Improve student ability to design research proposal**

Curriculum Committee to identify ways to improve student ability to design research proposals.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** In-Progress
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Grade on Research Proposal
- **Outcome/Objective:** Develop a Research Proposal

**Implementation Description:** Research methods instructor will improve teaching strategies.

- **Projected Completion Date:** 05/31/2017
- **Responsible Person/Group:** Research methods course instructor
- **Additional Resources Requested:** None

---

**Improve student learning related to evaluating critical issues in CJ**

Improve student learning related to evaluating critical issues in CJ.

- **Established in Cycle:** 2013-2014
- **Implementation Status:** In-Progress
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Grade on assignment assessing critical issues in Contemporary Issues in CJ course
- **Outcome/Objective:** Evaluate critical issues in the criminal justice system

**Implementation Description:** Increase assignments related to evaluating critical issues in CJ.

- **Projected Completion Date:** 05/31/2017
- **Responsible Person/Group:** Curriculum Committee

---

**Improve student learning related to understanding inequality**

Improve student learning related to understanding inequality.

- **Established in Cycle:** 2013-2014
- **Implementation Status:** In-Progress
- **Priority:** Medium
Relationships (Measure | Outcome/Objective):
   Measure: Grade on assignment explaining inequality | Outcome/Objective: Define and explain inequality

Implementation Description: Increase assignments and activities related to understanding inequality.
Projected Completion Date: 05/31/2017
Responsible Person/Group: Faculty and instructors

**Improve ability to apply statistical concepts**

Increase assignments related to applying statistical concepts.

Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
   Measure: Rating on Quantitative Reasoning Rubric Application Element | Outcome/Objective: Understand and apply statistical principles

Implementation Description: Identify ways to increase assignments to apply statistical concepts across the curriculum.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Curriculum Committee

**Improve student ability to critique published research**

Work with all instructors to increase assignments related to critiquing published research.

Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
   Measure: Grade on Assignments Assessing Published Research | Outcome/Objective: Critique Criminal Justice Research

Implementation Description: Work with all instructors to increase assignments related to critiquing published research.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Curriculum Committee

**Criminology Theory**
Only 74% of students made a C or better on assignment assessing understanding and application of criminological theories.

**Established in Cycle:** 2015-2016  
**Implementation Status:** In-Progress  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**  
Measure: Criminology Theories Assignment Grade  |  Outcome/Objective: Define Sociological and Criminological Theories

**Implementation Description:** Faculty teaching criminological theories will strengthen teaching strategies.  
**Projected Completion Date:** 05/31/2017  
**Responsible Person/Group:** Faculty and Instructors

**Improve student ability to assess impact.**  
Only 88% of students adequately assessed criminal justice policy impact on their capstone paper.

**Established in Cycle:** 2015-2016  
**Implementation Status:** In-Progress  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**  
Measure: Rating on Capstone Impact  |  Outcome/Objective: Critique inequality as it relates to the criminal justice system

**Implementation Description:** Faculty and instructors will continue to strengthen teaching strategies related to assessing impact.  
**Projected Completion Date:** 05/31/2017  
**Responsible Person/Group:** Faculty and instructors

**Improve student learning related to understanding intersection**  
Only 88% of students demonstrated understanding intersection of race, class, and gender.

**Established in Cycle:** 2015-2016  
**Implementation Status:** In-Progress  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**  
Measure: Grade on assignment explaining inequality  |  Outcome/Objective: Examine the intersection of race, class and gender

**Implementation Description:** Faculty and instructors will strengthen teaching strategies.  
**Projected Completion Date:** 05/31/2017
Responsible Person/Group: Faculty and Instructors.

Improve student understanding of ethical issues
Only 82% of students adequately assessed ethical issues in the criminal justice system.

Established in Cycle: 2015-2016
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Rating on Ethical Issues element of the Contemporary Issues in CJ exam
Outcome/Objective: Identify and Assess Ethical Issues

Implementation Description: Faculty and instructors will strengthen teaching strategies addressing ethical issues in the CJ system.
Projected Completion Date: 05/31/2017
Responsible Person/Group: Faculty and instructors

Improve understanding of research methods
Only 68% of students adequately identified and explained various sociological research methods. Need to further examine grades, identify areas of weakness/lack of understanding, and improve teaching strategies.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Scientific Method
Outcome/Objective: Explain Primary Methodologies Used to Examine Criminal Justice Issues

Implementation Description: Examine grades, identify areas of weakness/lack of understanding, and improve teaching strategies.
Projected Completion Date: 08/25/2017
Responsible Person/Group: Assessment Committee and Methods course instructors.
Additional Resources Requested: NONE

Improve understanding of scientific process
Only 70% of students adequately identified and defined the elements of the scientific process. Need to further examine grades and improve teaching strategies.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
    Measure: Scientific Method | Outcome/Objective: Define the Scientific Process Used in the Criminal Justice Discipline

Implementation Description: Examine grades and identify areas of lack of understanding. Work with instructors to improve teaching strategy.
Projected Completion Date: 08/25/2014
Responsible Person/Group: Assessment Committee and Methods course instructors.
Additional Resources Requested: NONE

Sociological Theories
Only 88% of students made C or better on the assignment assessing understanding and application of sociological theories.

Established in Cycle: 2015-2016
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
    Measure: Sociological Theories Assignment Grade | Outcome/Objective: Define Sociological and Criminological Theories

Implementation Description: Faculty and instructors addressing sociological theories will strengthen teaching strategies.
Projected Completion Date: 05/31/2017
Responsible Person/Group: Faculty and instructors

Strengthen understanding of research methodologies
88% of students made a C or better on research methodologies assignment.

Established in Cycle: 2015-2016
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
    Measure: Scientific Method | Outcome/Objective: Explain Primary Methodologies Used to Examine Criminal Justice Issues

Implementation Description: Faculty and instructors will strengthening teaching strategies related to understanding research methodologies.
Projected Completion Date: 05/31/2016
Responsible Person/Group: Faculty and Instructors.
Mission / Purpose

To develop students' abilities to think critically and systematically about philosophical problems, both abstract and practical; to develop students' understanding of the history and current state of philosophy; and to develop students' appreciation of a diversity of viewpoints, cultural, political and religious as well as purely philosophical.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Ability to work within today’s philosophical methods and perspectives

Use current perspectives and methods to approach philosophical issues.

SLO 1: Apply methods of modern philosophy

Students demonstrate facility with the methods of modern, analytic philosophy.

Related Measures:

M 1: Portfolio

Portfolio of Work

Source of Evidence: Portfolio, showing skill development or best work

Target:
90% of portfolios chosen at random will achieve a satisfactory or better rating for this objective, as defined by established criteria and evaluated by a panel of faculty.

Findings (2009-2010) - Target: Not Met
83% achieved a satisfactory or better rating; 40% were excellent. Different faculty members completed evaluations. There was a curriculum change. A follow-up focus group will be conducted to find out more about these results.
Findings (2008-2009) - Target: Met
92% achieved a satisfactory or better rating; 50% were excellent.

M 2: Capstone papers
Papers in capstone course, scored by a standard rubric for the department

Source of Evidence: Capstone course assignments measuring mastery

Target:
85% of papers will meet or exceed these target levels on a 5-point scale on a departmental rubric, with 5 being high: 4 on methodology, 3 on current discussions, 4 on historical understanding, and 4 on construction of arguments.

Findings (2008-2009) - Target: Met
90% of papers received at least a 4 on methodology

SLO 2: Discuss current academic perspectives

Students will be able to discuss current academic perspectives on central philosophical topics.

Related Measures:

M 1: Portfolio
Portfolio of Work

Source of Evidence: Portfolio, showing skill development or best work

Target:
90% of portfolios chosen at random will achieve a satisfactory or better rating for this objective, as defined by established criteria and evaluated by a panel of faculty.

Findings (2008-2009) - Target: Met
90% achieved a satisfactory or better rating; 51% were excellent.

M 2: Capstone papers
Papers in capstone course, scored by a standard rubric for the department

Source of Evidence: Capstone course assignments measuring mastery

Target:
85% of papers will meet or exceed these target levels on a 5-point scale on a departmental rubric, with 5 being high: 4 on methodology, 3 on current
discussions, 4 on historical understanding, and 4 on construction of arguments.

Findings (2008-2009) - Target: Met
90% of papers received at least a 4 on current discussions

G 2: Working knowledge of philosophy’s past

Exhibit awareness of and facility with earlier themes and movements in philosophy.

SLO 3: Discuss historical themes and movements

Students will be able to discuss major themes and movements in the history of philosophy.

Related Measures:

M 2: Capstone papers
Papers in capstone course, scored by a standard rubric for the department

Source of Evidence: Capstone course assignments measuring mastery

Mission / Purpose

The mission of Facilities Management is to provide essential services in the most efficient and economical manner and provide a safe, clean and attractive campus environment for students, faculty, staff, and visitors. This includes overseeing the planning/ construction of new facilities, while meeting environmental, health, and safety requirements.

Vision: The DSU Facilities Management will be the premier college Facilities Department in the state of Delaware. We will be a department characterized by excellent customer service, communication, teamwork, careful planning and innovation.

Motto: Always there, always the best

Goals without Outcome/Objective Relationships Specified

G 3: Enhance beautification
Enhance beautification of all campus buildings, landscaping, etc.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Attractive Campus
Develop and maintain facilities that contribute to achievement of the institutional mission.

O/O 1: Provide clean and efficient University facilities
Provide attractive campuses with clean and efficient facilities.

Related Measures:

M 1: Building Administrator Customer Satisfaction Survey

User satisfaction with facilities as indicated by the Building Administrator Customer Satisfaction Survey. This survey is administered to students, staff, and faculty members via online Survey Monkey email annually (tentatively April - May). Survey monkey data analysis reports are compiled, shared, and discussed at Annual Supervisors’ Retreat. Key findings are communicated to all staff in the unit during the monthly staff meeting in August.

Source of Evidence: Client satisfaction survey (student, faculty)

Target:
At least 85% good or excellent ratings on all items of the Building Administrator Customer Satisfaction Survey.
Findings (2013-2014) - Target: Not Met

Survey was not conducted annually due to budget and staff restraints. However, the survey was administered in March 2014 to faculty and staff only. The response rate was 40%. Only five items out of the total 15 items on the survey yielded 85% or more good or excellent ratings. Forty-five percent of all items were either average, good or excellent. Seventy-five percent of the respondents rated 2 items as poor or very poor. These items were: timely response on work orders and snow removal. Summary of survey results are attached.

Findings (2008-2009) - Target: Partially Met

54% of respondents rated overall satisfaction as "good" or "excellent." 90% of respondents rated overall satisfaction as "average," "good," or "excellent." Survey response rate was approximately 120 respondents out of approximately 500 possible respondents (24%).

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Adjust desired target
Established in Cycle: 2008-2009
With budget reductions and the resulting impact on the Physical Plant unit, the target will be revised next year to "at least 85..."

O/O 3: Design and construct new facilities on schedule
Meet delivery time lines for designing and constructing new facilities.

Related Measures:

M 3: Progress report on new construction

Progress Report on actual versus scheduled completed timelines for new building construction.

Source of Evidence: Existing data

Target:
No owner-caused delays in completion of capital projects.

Findings (2013-2014) - Target: Met
New Library construction was completed in March 2014. This was 25% behind schedule due to severe winter storms. However, timelines are ahead schedule for renovation of the Science Center (East Wing).

Findings (2008-2009) - Target: Met
All current capital projects are on schedule. One project may possibly finish behind its original schedule, but this is due to weather-related factors.
G 2: Safe, Healthy Environment
Work within regulatory structures and other guidelines to achieve a safe, healthy environment.

O/O 2: Ensure compliance with laws and regulations
Ensure compliance with environmental, health and safety laws, regulations and directives.

Related Measures:

M 2: Number of violation notices
Number of violation notices received.

Source of Evidence: Existing data

Target:
No final violation notices should be received.

Findings (2013-2014) - Target: Partially Met
A warning violation was received for electrical wiring in Building C45 during annual inspection. Electrical team completed all requested changes by January 15, 2014. Follow-up inspection resulted in satisfactory report.

Findings (2008-2009) - Target: Met
No violation notices received.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Adjust desired target
With budget reductions and the resulting impact on the Physical Plant unit, the target will be revised next year to “at least 85% average, good, or excellent ratings.” This will more accurately reflect the budget constraints that have occurred over the last two years.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Building Administrator Customer Satisfaction Survey | Outcome/Objective: Provide clean and efficient University facilities
Implementation Description: Fall 2010
Mission / Purpose

The mission of the Office of Distance Education & Learning Technologies is to assist the University in the development, administration and expansion of online undergraduate and graduate degree programs and courses. We provide instructional and technical guidance and training for faculty to design, develop and deliver online and web enabled distance education courses and programs that serve non-traditional learners as well as online, hybrid and web-enhanced (technology-enabled) courses for traditional on-campus learners.

Our vision is for Delaware State University to become the premier online HBCU, ensuring excellence in both academic programs and support services for online learners. Delaware State University online doctoral, master’s and undergraduate degree programs will be known and sought after by students throughout the US and internationally for their reputation of both world-class quality and practical affordability. In connection with the promotion, facilitation and coordination of distance education and technology-enabled courses, the Office of Distance Education & Learning Technologies will be recognized regionally and nationally as a training and technical and instructional support center of excellence for colleges, departments and individual faculty members.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Increase distance education enrollments

Promote growth in numbers of technology-supported courses in order to increase the number of students enrolled in (distance education) technology-supported courses.

O/O 1: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

- Encourage colleges, departments and individual faculty members to increase the numbers of web-enhanced courses, hybrid and completely online courses.
• Communicate willingness of ODELT to assist selected departments to develop distance education courses that fall within their learning goals and assessment parameters.
• Work with receptive faculty and academic departments to establish online academic programs.

**Related Measures:**

**M 1: Number of departments that offer one or more online courses**

Of all academic departments, the number that offer one or more courses during the fall and spring semesters for years 2010-2011 and 2011-2012 were 18 and 10, respectively. This 44% decline in the number of departments suggests a growing disinterest of departments in sponsoring online courses. In May 2011, the Quality Assurance Checklist introduced a quality control that previously had not existed, requiring faculty to expend more effort to produce online instruction. Once college deans and department chairs are reminded that online courses and programs is a high enough institutional priority to warrant Central Administration financial support, the number of departments that sponsor online instruction may be expected to increase.

Source of Evidence: Activity volume

**Target:**

Compared with the number of departments that offered online courses in 2010-2011, increase by 10% the number of departments that offer online courses in 2011-2012.

**Findings (2011-2012) - Target: Not Met**

Comparing the Fall 10-Spring 11 data with the Fall 11-Spring 12 data, instead of increasing 10%, the number of departments offering one or more online courses declined 44% from 28 to 18.

**Related Action Plans (by Established cycle, then alpha):**

**M 2: Number of online courses offered**
The total number of online courses offered during the fall, spring and summer semesters 2010-2011.

Source of Evidence: Activity volume

**Target:**
The number of courses offered in 2011-2012 will increase by 10% over the previous academic year.

**Findings (2011-2012) - Target: Not Met**

In the absence of comparable 2012 summer session statistics, a comparison was made between the Fall and Spring Semesters for 2010-2011 and 2011-2012. Last year a total of 24 courses were offered. This year the number rose by 17% to a total of 28 online courses.
Findings (2010-2011) - Target: Partially Met
In 2010-2011, three of the colleges offered one or more online courses.

M 3: Number of online academic programs offered
The number of academic programs that were offered online.

Source of Evidence: Activity volume

Target:
The target has been to establish the two online master's degree programs: the M.A. in Curriculum & Instruction and the M.Sc. in Sport Administration. Attainment of this target is dependent upon the University's submission of the request to the Middle States Commission on Higher Education and successful approval.
Findings (2011-2012) - Target: Not Reported This Cycle

The University is preparing a request to Middle States Commission on Higher Education to approve a substantive change that will allow delivery of online academic programs. The change will affect the M.A. in Education with a concentration in Curriculum & Instruction and the M.S. in Sport Administration. Other online programs are anticipated to follow.

Findings (2010-2011) - Target: Partially Met

The number (40) of online courses taught in 2010-2011 grew by 21% over the number (33) taught in 2009-2010.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Promote creation of faculty incentives to develop online courses. Established in Cycle: 2011-2012
Besides encouragement and training, DSU faculty members need incentives if they are to become involved with the creation of onli...

M 4: Enrollments in technology-supported distance education courses

Number of residential (oncampus face-to-face) courses utilizing educational technology, categorized as web-enhanced courses.

Source of Evidence: Activity volume

Target:
At least a 10% total increase (over the previous year) in enrollment in all categories (web-enhanced, hybrid and online courses).

Findings (2011-2012) - Target: Not Met

Comparing only the fall and spring semesters for the two years, there was a 1% increase during the 2011-2012 academic year in the total number of technology-enabled (online, hybrid and web-enhanced) courses.

Findings (2010-2011) - Target: Not Met

In 2010-2011 the request to the Middle States Commission on Higher Education was not submitted. Hence the two target programs have yet to be established.

Related Action Plans (by Established cycle, then alpha):

O/O 4:Contribute to institutional conditions propitious for distance education growth

- Advise the Office of the Provost, colleges, and academic departments to articulate establishment of the vital components of an effective and fully functioning distance education system as an institution-wide priority of paramount importance. For faculty to become engaged in online design, development and delivery, such components comprise enabling policies, adequate financial incentives to permit University-commissioning of selected online academic programs and selected high demand single courses, quality standards, faculty recognition and reward, essential technological applications, competence-building experiences, and technical assistance.
• Provide essential institutional supports to encourage and enable student engagement in online learning. Such supports comprise dissemination of information about online learning opportunities, orientation, training, and technical assistance.

**Relevant Associations:**

**DSU Learning Goal Associations:**
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 7: A comprehensive infrastructure for distance learning.**

Source of Evidence: Administrative measure - other

A comprehensive infrastructure consists of the following five subsystems that collectively comprise a complete distance education system:
Teaching subsystem: creation, production, distribution and evaluation of instruction.
Student subsystem: management and control of student progress, collection of tuition and fees, assessment of learning outcomes.
Regulatory subsystem: personnel, academic and administrative practices and policies with respect to governance and management, allocation of rewards and responsibilities within the institution.
Logistical subsystem: procurement and supply of required resources (personnel, finances, purchases and maintenance of equipment, purchase, maintenance).
Technological subsystem: information communications technology infrastructure; and procedures and processes required to orient, train and assist users of technology.
Target:
Before the close of the current academic year, our target will be to conduct a rigorous self-evaluation to determine the degree of alignment of the institution-wide policies, procedures and culture with the requirements of a highly effective distance education system as demonstrated by each of the five subsystems as they function here at Delaware State University.

- **Findings (2010-2011) - Target: Partially Met**
  We were able to install the enterprise version (9.1) of the Blackboard learning management system.

- The submission of the request for Middle States Commission of Higher Education approval of DSU's two initial online programs (the M.A. in Curriculum & Instruction and the M.Sc. in Sport Administration) was delayed.

- Multimedia resources that had the capacity for insertion in any and all web-enhanced and online courses were made available to all faculty teaching web-enhanced and online courses. In fact, of all the higher education institutions in the US, DSU had the highest frequency of use of the video resources of NBCLearn.

- We did not establish a system of recognition and reward for faculty members who engage in online teaching.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.
Promote creation of faculty incentives to develop online courses.

G 2: Offer comprehensive training and support

Offer comprehensive faculty training and support needed to produce and deliver quality distance education and online courses.

O/O 2: Provide opportunities for DSU faculty to gain competence and confidence to design, develop, and deliver distance education

Enable faculty members who are willing to utilize information communications technologies to integrate distance pedagogical methods and techniques and educational applications of information communication technologies in their instruction of web-enhanced, hybrid and/or online courses.

Related Measures:

M 5: Training for faculty to utilize distance education technologies in their teaching.

Tabulation of all ODELT staff-faculty member training/consultation/coaching contacts maintained during the academic year.

Source of Evidence: Activity volume

- Target:
  Develop mentoring relationships between faculty teaching online courses and those who are new to online teaching.
  Create a discussion forum for faculty to share ideas, concerns and successes in online teaching experiences

Findings (2011-2012) - Target: Met

Mentoring and consulting relationships in connection with the implementation of web-enhanced and online courses have been maintained on a continuing basis. As revisions have been made to the Blackboard learning management system, new rounds of contacts and training have been implemented, resulting in a 24% increase in the number of web-enhanced courses over the previous year.

Findings (2010-2011) - Target: Met

Faculty members participated in training activities in the following areas:
• Systematic Online Course Design and Development: 17 faculty members
• The Quality Assurance Checklist. 9 faculty members
• Basic Blackboard 9.1 workshop: 42 faculty members
• Advanced Blackboard workshop: 38 faculty members
• NBC Learn (to add multimedia to their technology-supported courses): 9 faculty members

O/O 4:Contribute to institutional conditions propitious for distance education growth

• Advise the Office of the Provost, colleges, and academic departments to articulate establishment of the vital components of an effective and fully functioning distance education system as an institution-wide priority of paramount importance. For faculty to become engaged in online design, development and delivery, such components comprise enabling policies, adequate financial incentives to permit University-commissioning of selected online academic programs and selected high demand single courses, quality standards, faculty recognition and reward, essential technological applications, competence-building experiences, and technical assistance.

• Provide essential institutional supports to encourage and enable student engagement in online learning. Such supports comprise dissemination of information about online learning opportunities, orientation, training, and technical assistance.
Relevant Associations:

DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 7: A comprehensive infrastructure for distance learning.

Source of Evidence: Administrative measure - other

A comprehensive infrastructure consists of the following five subsystems that collectively comprise a complete distance education system:
Teaching subsystem: creation, production, distribution and evaluation of instruction.
Student subsystem: management and control of student progress, collection of tuition and fees, assessment of learning outcomes.
Regulatory subsystem: personnel, academic and administrative practices and policies with respect to governance and management, allocation of rewards and responsibilities within the institution.
Logistical subsystem: procurement and supply of required resources (personnel, finances, purchases and maintenance of equipment, purchase, maintenance).
Technological subsystem: information communications technology infrastructure; and procedures and processes required to orient, train and assist users of technology.
Before the close of the current academic year, our target will be to conduct a rigorous self-evaluation to determine the degree of alignment of the institution-wide policies, procedures and culture with the requirements of a highly effective distance education system as demonstrated by each of the five subsystems as they function here at Delaware State University.

**Findings (2010-2011) - Target: Partially Met**

- We were able to install the enterprise version (9.1) of the Blackboard learning management system.
- The submission of the request for Middle States Commission of Higher Education approval of DSU’s two initial online programs (the M.A. in Curriculum & Instruction and the M.Sc. in Sport Administration) was delayed.
- Multimedia resources that had the capacity for insertion in any and all web-enhanced and online courses were made available to all faculty teaching web-enhanced and online courses. In fact, of all the higher education institutios in the US, DSU had the highest frequency of use of the video resources of NBCLearn.
- We did not establish a system of recognition and reward for faculty members who engage in online teaching.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Promote creation of faculty incentives to develop online courses.**

*Established in Cycle: 2011-2012*

Besides encouragement and training, DSU faculty members need incentives if they are to become involved with the creation of online courses.
G 3: Provide comprehensive student support services equivalent to all on-campus services

Work with DSU student and administrative service departments to ensure distance education students have the same access to student services as on-campus students.

O/O 3: Increase the effectiveness and efficiency of online student services required to recruit and retain online students

- Work with DSU student and administrative service departments to verify that distance education students will have the same access to student services as on-campus students, i.e., financial aid, advising, career services, admissions, registration, disability support, bookstore services, and drop-add procedures, etc.

Related Measures:

M 6: Comprehensive student support services equivalent to on-campus services.

Administrative Working Group-identified services for students to access via the Internet.

Online orientation for students intending to participate in an online academic program.

A collection of policies that address online teaching and learning.

Helpdesk technical assistance 24/7.

Source of Evidence: Administrative measure - other
• **Target:**
  See that 100% of all student services may be delivered to remote students without their ever having to visit the DSU campus.

• Arrange for the Office of Distance Education and Learning Technologies (ODELT) uploads to the ODELT web pages an online orientation program to distance learning, complete with initial training on the Blackboard learning management system.

• Arrange with DSU faculty who teach online/hybrid courses during the coming academic year to submit their syllabi to the Registrar in time for placement on the web prior to the pre-registration period.

• Collaborate with the Registrar in order to notify students about access to course syllabi before they pre-register for the next semester.

• Arrange with college deans and department chairs to provide one-on-one student advising for remote students who will be seek admission and registering for online courses, once the MSCHE approves our graduate programs and courses for students who are not already on campus.

• Ensure that all courses include notification of accommodation for students with disabilities.

---

**Findings (2011-2012) - Target: Met**

100% of student services are now available to remove students who may never need to visit the DSU campus. Our activities to verify their completeness will be reported closer to the end of the current academic year.

**Related Action Plans (by Established cycle, then alpha):**

**G 5: Market increased offerings**

Once Middle States Commission on Higher Education approves Delaware State University's plan to offer its first online academic programs to mature and working adult students beyond the campus, a comprehensive marketing plan will need to be devised.

**O/O 5: Identify different types of target students and their respective needs**

Once Middle States Commission on Higher Education authorizes Delaware State University's request to initiate DSU *Online*, assist the Departments of Education and Sport Science with the MA in Curriculum & Instruction and the MSc in Sport Administration to market their respective curricula to mature and working adult students beyond the campus.

  **Related Measures:**

  **M 8: Marketing analyses**

  ODELT will assist specific academic departments to conduct analyses of the markets that correspond to their respective disciplines and fields of study.
With respect to their interests in participating in online studies, ODELT will conduct a survey of current students and former students (both alumni and students who did not complete their studies at DSU).

Source of Evidence: Administrative measure - other

**Target:**
To determine the predisposition to participate in projected online degrees to be offered, survey students who comprise the following seven specific market segments for DSU Online:

- **Former DSU students** willing to return to DSU virtually to seek advanced degrees
- **Former DSU students** who formerly withdrew but who now are emotionally prepared to complete the degree they began in years past
- **Transfer students** from community colleges with associate degrees or who have accumulated credits at other institutions who now wish to complete a Bachelor of Integrated Studies
- **Active and former military personnel and other occupational groups** (e.g., police officers, non-degreed IT professionals, human service workers) who wish to convert demonstrable occupational competencies resulting from extensive occupational training into credits toward a Bachelor of Integrated Studies
- **New students** - mature women and men - already in the workforce who seek a higher education credential (Bachelor of Integrated Studies or a master's degree) required for career advancement
- **International students** - both those who come for residential learning (before and after they spend time in residence here in Dover) and those who study entirely from their home countries
- **Advanced secondary school students** who wish to accelerate their completion of higher education

**Findings (2011-2012) - Target: Not Met**
ODELT has been in discussion with a potential provider of marketing and recruitment services for distance education programs to be established once we have the approval of the Middle States Commission on Higher Education approval for the University's first two online academic programs. Rather than conduct marketing analyses prior to recruitment strategies for specific academic programs that ready to offer, we will wait until such programs are approved and in process of construction.

**G 6:Raise revenue and funding**
Establish policies and procedures to enable distance education courses to generate revenue and thus provide funding for development of online courses and programs.

O/O 6: Transform the Distance Learning Center from a cost center into a revenue-generating center.

Win Central Administration support to commit to communicate expansion of distance education as completely online programs (rather than a mere assortment of single courses) as a genuine operational institution-wide priority.

**Related Measures:**

**M 9: Revenue and Funding.**

Establish procedures for funding and revenue generation in connection with development and delivery of online distance education courses.

Source of Evidence: Administrative measure - other

- **Target:**
  Establish policies and procedures to enable distance education courses to generate revenue and thus provide a sufficient return on the investment (ROI) to cover all expenses, support continuing development of online courses and programs, and strengthen sponsoring departments.
  
  Propose implementation of the "effectual scheme" proposed in February 2011 to finance development of single online courses and online academic degree programs.
  
  Propose a distance education tuition rate. Confer with Sponsored Programs to identify sources of support for online course/program offerings.
  
  Encourage academic departments to consider grant opportunities to support online courses/programs in their respective fields of study/practice.

**Findings (2011-2012) - Target: Not Met**

Deans, chairs and faculty members are expected to respond to ODELT invitations to create online programs and courses once they are confident that they will obtain support to engage in the online program and course creation processes.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

An incentive scheme for faculty production and delivery of online courses
Delaware State University faculty members must receive some form of recognition and reward for their involvement in the online course design, development and delivery. During 2010-2011, 20 master's level courses will be created by faculty who will be given course release or faculty overload pay to develop the courses and a modest stipend when they teach the course for the first time. This incentive scheme is expected to result in increased numbers of faculty and department willing to dedicate their time to the creation of specific graduate and undergraduate level degree programs. It is anticipated that most of these students will be part-time, off campus, mature working women and men.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** The proposed rate of compensation was calibrated to the credit hour rate for overload teaching.  
**Responsible Person/Group:** Distance Education and Learning Technologies is responsible for proposing the scheme to the Office of the Provost and the Vice President of Finance and Administration. The expectation is that those Central Administration officers will take charge of implementation of the scheme.  
**Additional Resources Requested:** Peter S. Cookson, in collaboration with the University Provost and President. Additional Resources: Prior to the semester in which new, not-previously taught online courses are offered online, professors will be given course release for one course of their normal teaching load. Adjunct professors may need to be hired to teach the courses the online faculty will not be available to teach. No more than two course releases will be needed in any given semester.

**Blackboard Workshops**  
In 2010-2011 we will offer Blackboard workshops at both basic and advanced levels. Our aim is to provide such training for all new faculty appointments in September 2010. In addition we will announce the availability of such workshops at both basic and advanced levels for all faculty every month during the 2010-2011 academic year.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** We will announced in the E-News, on posters distributed throughout the campus, our own e-learning newsletter, and e-mail the availability of these workshops.  
**Responsible Person/Group:** Marlene Cox and Andrea Pettyjohn  
**Budget Amount Requested:** $0.00 (no request)

**Continue to promote adoption of the 13-step Course Transformation Model**
Continue to encourage faculty members to adopt the CTM as a template to follow in the design and development of their online courses. We will invite faculty members to adopt the CTM to adopt the 13 steps of the Course Transformation Model (CTM) to apply to the design and development of online courses. Through a combination of individual and group face-to-face meetings and online tutorial assistance, we will assist faculty to develop their respective courses for delivery as part of DSU Online. We will extend the invitation to deans, chairs, and faculty members in college, department and other kinds of faculty meetings. To be sure all faculty are aware of the opportunity to participate, we will utilize posters, brochures, and email.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Promotion will be in the form of frequent announcements of open enrollment in the online training course for faculty subject matter experts and both one-on-one and face-to-face and virtual meetings.  
**Responsible Person/Group:** Peter S. Cookson  
**Additional Resources Requested:** There is an acute need for a viable incentive system of faculty recognition and reward. Otherwise, it will be difficult to involve more than a small number of faculty enthusiasts in online distance education course design, development and delivery.  
**Budget Amount Requested:** $0.00 (no request)

**Connected Documents**
- A Proposed Shell for a Blackboard Course
- Boilerplate information for all online courses

### Distance Education Teaching Forum

This series of bi-weekly forums will provide opportunities for DSU faculty to learn specific distance education teaching strategies they can deploy in both web-enhanced and online distance education courses. To expand DSU faculty members’ awareness and competencies they can apply to their teaching, different on-campus and off-campus speakers will be invited to lead practice-oriented sessions.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** The schedule for these forums will be arranged so as to complement the Center for Teaching and Learning-sponsored forum activities. Some speakers may need to make virtual presentations via the utilization of technology, e.g., videoconferencing rather than in-person visits to the campus.  
**Projected Completion Date:** 05/30/2011  
**Responsible Person/Group:** Peter S. Cookson  
**Additional Resources Requested:** Small and token honoraria may be needed to reward some of the speakers who will come from off campus.  
**Budget Amount Requested:** $0.00 (no request)

**Second Annual Survey of Faculty Blackboard Users**
In October 2009 Distance Education and Learning Technologies conducted the First Annual Survey of Faculty Users of Blackboard. The data are still in process of being analyzed. A report of the findings of the first annual survey will be released in time for release at the beginning of the 2010 Fall Semester. Capitalizing on these results, the Second Annual Survey of Faculty Users of Blackboard will be conducted in October 2010.

Established in Cycle: 2009-2010  
Implementation Status: Planned  
Priority: High  
Implementation Description: The survey will be conducted via either the Blackboard survey option or repeated using the Google Docs feature. Since the content and structure of much of the data will be similar to the First Annual Survey, the results will be analyzed using the Statistical Package for the Social Sciences in a much more timely manner.  
Projected Completion Date: 12/16/2010  
Responsible Person/Group: Peter S. Cookson  
Additional Resources Requested: Unless there is a need to obtain a separate user licence for SPSS, no additional resources will be required.  
Budget Amount Requested: $0.00 (no request)

Advertise internal grant opportunities  
In process.

Established in Cycle: 2010-2011  
Implementation Status: In-Progress  
Priority: High

Relationships (Measure | Outcome/Objective):  
Measure: Enrollments in technology-supported distance education courses |  
Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Projected Completion Date: 05/30/2012

Conduct information sessions with deans, department chairs, and faculty.  
During the academic year, the Director will request opportunities to meet with deans, selected department heads and individual faculty members to promote adoption of distance education technologies for their instruction.

Established in Cycle: 2010-2011  
Implementation Status: In-Progress  
Priority: High  
Implementation Description: The Director initiated appointments with deans and department heads to schedule presentations and organized a workshop for science instructors to a session presented by a visiting professor on the topic of online laboratory courses.
Increase number of online courses taught.
During the academic year, the Director will encourage individual faculty members to offer online courses that meet the essential standards that comprise the Quality Assurance Checklist.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: The Director provided feedback to professors with respect to their online courses. Courses that complied with the Quality Assurance Checklist were then referred to the Office of the Provost so that the Registrar could add them to the next semester schedule.
Responsible Person/Group: Director, Office of Distance Education and Learning Technology. Faculty members of courses selected for conversion to online delivery.
Additional Resources Requested: Funds to provide incentives for faculty members to engage in increased online course and program conversions.

Initiate academic program specific marketing plans.
An action plan will be devised once Middle States Commission on Higher Education approves DSU’s request to establish our first two online academic programs.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: A specific marketing plan to survey the specific market segments most likely to participate in DSU Online programs will be conducted as soon as Middle States Commission on Higher Education approval is given to launch our first two online academic programs.
Responsible Person/Group: Director, Office of Distance Education and Learning Technology, together with selected program chairs and individual faculty members.
Additional Resources Requested: ODEL T staff will consult with marketing faculty specialists in the DSU College of Business to devise a marketing plan for one or more specific distance education programs. Resources will be requested to cover the costs of recruiting program participants from each of the different market segments.

Number of colleges that offer one or more online courses.
During the academic year, the Director will request opportunities to meet with deans, selected department heads and individual faculty members to promote adoption of distance education technologies for their instruction.
Established in Cycle: 2010-2011  
Implementation Status: In-Progress  
Priority: High  
Implementation Description: The Director initiated appointments with deans and department heads to schedule presentations and organized a workshop for science instructors to a session presented by a visiting professor on the topic of online laboratory courses.  
Responsible Person/Group: Director, Office of Distance Education and Learning Technology.  
Additional Resources Requested: Besides Central Administration-provided funding for deans and department chairs to commission design and development of online courses,

**Number of online academic programs offered.**  
Once Middle States Commission on Higher Education approval is given to our request to establish the first two online degree programs, the University will be able to create additional online academic programs.

Established in Cycle: 2010-2011  
Implementation Status: In-Progress  
Priority: High  
Implementation Description: The Director provided feedback to professors with respect to their online courses. Courses that complied with the Quality Assurance Checklist were then referred to the Office of the Provost so that the Registrar could add them to the next semester schedule.  
Responsible Person/Group: Director, Office of Distance Education and Learning Technology. Faculty members of courses selected for conversion to online delivery.  
Additional Resources Requested: Funds to provide incentives for faculty members to engage in increased online course and program conversions.  
Budget Amount Requested: $185,000.00 (recurring)

**Produce net revenue in excess of distance education expenses.**  
Revenue that comprises tuition and fees paid by working adults who enroll in online academic programs, less all program expenses will constitute net revenue.

Established in Cycle: 2010-2011  
Implementation Status: Planned  
Priority: High  
Implementation Description: To generate net revenue, DSU must offer completely online academic programs that award either an undergraduate or graduate degree to students drawn from a population different from the fulltime student population. Such students will constitute working adults whose social roles and geographical residence preclude their participation in face-to-face courses on campus. Excepting systematic analyses of specific market segments, marketing campaigns would be premature in the absence of MCHE approval.  
Responsible Person/Group: Staff members of the Office of Distance Education and Learning Technologies, in consultation with marketing specialists. With a marketing budget, drawn from a portion of the tuition and fees raised in the online
programs, will need to be applied to defray marketing costs.  
**Additional Resources Requested:** Advice from DSU marketing specialists (faculty), funds to advertise via the Internet and selected professional conferences/conventions.

**All student services available via digital technology.**
All student services provided by unit chairs who belonged to the Administrative Working Group made changes to their respective operations to enable the delivery of student services to all students without the need to actually visit the campus. All such services are now available through digital technology.

**Established in Cycle:** 2011-2012  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Comprehensive student support services equivalent to on-campus services.  
- **Outcome/Objective:** Increase the effectiveness and efficiency of online student services required to recruit and retain online students

**Implementation Description:** To resolve the last remaining issues concerning student services for distance education students, coordination will be needed to enable students to receive and use book vouchers in the DSU bookstore.  
**Responsible Person/Group:** Besides all other student service providers refining their policies to serve distance students, the Executive Director of Admissions and the Manager of the DSU Bookstore will need to synchronize policies and procedures in order to enable remote students to order their course materials via the Internet.  
**Additional Resources Requested:** None at present. In the future, resources will be needed to cover the costs of additional student advising for distance education students.

**Articulate online distance education as a viable institutional high priority.**
Since May of 2010, distance education has not been mentioned as a viable University priority. The action plan for 2012-2013 will include renewal of institutional priority, as described in reference to the previous target of raising the number of departments actively engaged in the sponsorship of online undergraduate and graduate courses.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Number of online courses offered  
- **Outcome/Objective:** Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

**Implementation Description:** ODELT will communicate a technology strategic plan to the Office of the Provost that clearly articulates the need to announce online distance education as a high priority for the University.
Responsible Person/Group: ODELT in coordination with the Office of the Provost in communicating the high priority to college deans and department chairs.

Additional Resources Requested: As indicated in connection with the previous target, the following funds are necessary to advance the online distance education agenda: (1) $35,000 to convert the remaining 10 yet-to-be converted online courses for the University’s two initial online master’s, (2) $35,000 to convert 10 courses for a third online master’s, (3) $70,000 for 28 undergraduate courses for four focus areas of the Bachelor of Integrated Studies and (4) $12,500 for five undergraduate courses.

Budget Amount Requested: $0.00 (no request)

Articulation of online distance education and technology-enabled instruction as institutional priorities.

As was indicated for the first three goals and targets, establishment of online distance education and technology-enabled instruction will dramatically effect the planned outcomes with respect to number of departments engaged, number of online and technology-enabled courses offered and numbers of students enrolled.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Enrollments in technology-supported distance education courses |
Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Implementation Description: Similar to the previous targets.
Responsible Person/Group: ODELT in coordination with the Office of the Provost, in communication with deans, chairs and the faculty members.
Additional Resources Requested: These have been enumerated above.

Central Administration encouragement of distance education as an institutional priority.

To reverse this decline and to increase the number of academic departments engaged in online instruction by 44% this coming year, allocation of institutional resources, flowing from a renewed institutional emphasis on distance education as a high institutional priority, is essential support "work for hire" arrangements for departmental faculty to create and offer online courses.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Number of departments that offer one or more online courses |
Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus
**Responsible Person/Group:** ODELT in coordination with the Office of the Provost, Deans of the Colleges, Department Chairs.

**Additional Resources Requested:** Funds are needed for (1) convert the yet-to-be converted courses for the M.A. in Curriculum & Instruction and the M.Sc. in Sport Administration (10 courses @ $3,500), (2) convert the courses for a third online master's degree, (10 courses @ $3,500), (3) convert four focus area courses for the Bachelor of Integrated Studies (28 @ $2,500), and (4) convert at least five General Education courses (@ $2,500).

**Budget Amount Requested:** $0.00 (no request)

---

**Encourage departments to expand their involvement with technology-enhanced instruction.**

- Consult with college deans and department chairs about expansion of distance education and web-enhanced instruction.
- Publish a newsletter to keep everyone up-to-date on the merits of adoption of information communications technologies to produce more effective teaching and learning.
- Create an tri-fold brochure to publicize the mission of the Office of Distance Education and Learning Technologies.

**Established in Cycle:** 2011-2012
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Number of departments that offer one or more online courses |
- **Outcome/Objective:** Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

**Responsible Person/Group:** Office of Distance Education & Learning Technologies

---

**Encourage departments to increase involvement in technology-assisted instruction for web-enhanced and online/hybrid courses.**

Provide technical assistance to faculty and departments to incorporate sound principles of distance education instructional design and to apply information communications technologies in their web-enhanced and online/hybrid instruction.

**Established in Cycle:** 2011-2012
**Implementation Status:** Planned
**Priority:** High
Relationships (Measure | Outcome/Objective):
  Measure: Number of departments that offer one or more online courses | Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Responsible Person/Group: Office of Distance Education & Learning Technologies
Additional Resources Requested: Additional software/hardware are needed to carry out the instructional innovations now being requested by individual faculty members.
Budget Amount Requested: $30,000.00 (recurring)

Establishment of online distance education as an institutional priority
To reverse this 44% decline, allocation of institutional resources, flowing from a renewed institutional emphasis on distance education as a high institutional priority, is essential support "work for hire" arrangements for departmental faculty to create and offer online courses.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Number of departments that offer one or more online courses | Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Implementation Description: Establishment of distance education as a high priority.
Projected Completion Date: 05/31/2013
Responsible Person/Group: Central Administration (Office of the Provost, Deans of the five colleges, chairs of the 22 departments), in coordination with the Office of Distance Education and Learning Technologies.
Additional Resources Requested: Funding to finance "work for hire" arrangements for 10 yet-to-be converted master's courses for the M.A. in Curriculum and Instruction and the M.Sc. in Sport Administration ($70,000), in addition to the 28 undergraduate Bachelor of Integrated Studies courses ($70,000) and five undergraduate General Education courses ($12,500).
Budget Amount Requested: $0.00 (no request)

Faculty incentives for online course creation.
Although faculty incentives exist for faculty members to deliver online courses the first time they are offered, there are currently no systematically awarded incentives for online course creation. Central Administration interest in providing such incentives has yet to be announced to the faculty. In connection with MSCHE authorization to offer completely online degree programs, an incentive system will be essential if additional online degree programs are to be established.
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
   Measure: Enrollments in technology-supported distance education courses | Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Implementation Description: One benchmark institution, Bowie State, reported creation of 80 courses after the Maryland State Higher Education Authority awarded a grant that enabled the University to pay $1800 to each faculty member to create an online course.

Responsible Person/Group: ODEL to assist faculty to understand and attain the essential high standards of quality online courses. Central Administration once it announces distance education as a central priority.

Additional Resources Requested: Funding to incentivise faculty to create online courses.

How we aim to increase the number of departments offering online/hybrid courses.

- We will produce a brochure that informs department chairs and faculty the benefits of offering online courses to working adults (as well as to on campus students).
- We will consult with the five deans about the desirability of engaging their respective departments and faculty in different aspects of distance education.
- We will make presentations to individual department chairs, following up with presentations to departmental faculty, regarding the merits and benefits of their involvement with online program (as well as selected individual course) offerings.
- Assuming we have a budget to provide financial incentives to individual faculty, we will encourage deans and department chairs to commission the design and development of selected high demand online programs and courses.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
   Measure: Number of departments that offer one or more online courses | Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Responsible Person/Group: Office of Distance Education and Learning Technologies

Additional Resources Requested: Funding for the "Effectual Scheme" presented to the Office of the Provost in February 2011.
Increase online enrollments.

Increased enrollments will be realized once the University is authorized to offer online programs to mature and working adults who cannot presently participate in DSU academic programs.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Enrollments in technology-supported distance education courses | 
  Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Implementation Description: Implementation will be possible once MSCHE approves our first two academic programs, paving the way for additional programs to subsequently be established.

Responsible Person/Group: ODELT and academic departments committed to quality online instruction for student populations currently not associated with the University.

Additional Resources Requested: The additional resources needed will have to be proposed in consideration of the faculty compensation for creation of courses that will constitute intellectual property of the University and the necessity to mount professional quality and effective marketing efforts.

Increase the number of online courses.

The Office of Distance Education and Learning Technologies will continue to offer orientation, training and consultation to faculty who need to learn how to use the University learning management system (currently Blackboard). These services assist faculty to achieve the technical competence required to implement the Central Administration goal of converting all face-to-face courses to web-enhanced courses. Approximately half of all courses now taught at the University fit the description of web-enhanced courses.

Although only 10 courses were taught completely online during the Spring Semester of 2012, the fact that more than 600 courses were web-enhanced constitutes a vast reservoir of courses that could, with increased LMS applications, become either hybrid or online courses in the future.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Number of online courses offered | Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Implementation Description: Implementation is ongoing.
Responsible Person/Group: Office of Distance Education and Learning Technologies (ODELT)
Additional Resources Requested: The University has agreed to supplement ODELT staff with a fulltime Instructional Designer. The University has also indicated willingness to upgrade the LMS functionality to replace the currently laborious manual tasks now required to process the currently overwhelming workload each semester.

Increased enrollments.
As is the experience at numerous other universities, when online courses are multiplied that make possible student achievement of certificates and degrees, student enrollments increase.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Number of online courses offered | Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Implementation Description: Increased student enrollments.
Responsible Person/Group: ODELT and interested faculty members.
Additional Resources Requested: The most important additional resources are required to support faculty members who are enthusiastic about creating online courses and to support effective marketing efforts. Once the courses are created to support completion of academic degrees online, mature and working adults will be attracted to the online HBCU of DSU.

Inservice training for faculty to teach web-enhanced, hybrid and online courses.
Conduct training for faculty to gain confidence and competence in using BlackBoard for web-enhanced courses and distance education pedagogy and technology for online courses.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Training for faculty to utilize distance education technologies in their teaching. | Outcome/Objective: Provide opportunities for DSU faculty to gain competence and confidence to design, develop, and deliver distance education

Implementation Description: We make presentations in departments and provide training workshops as needed to enable faculty members to gain confidence and competence in applications of distance education technologies.

Responsible Person/Group: Staff members of the Office of Distance Education and Learning Technologies, responsible for faculty training on basic and advanced Blackboard utilization. That faculty implement BlackBoard for web-enhanced courses is the responsibility of deans, chairs, and individual faculty members.

Number of web-enhanced courses.
Promote increased numbers of web-enhanced courses.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Enrollments in technology-supported distance education courses | Outcome/Objective: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus

Implementation Description: Our ultimate aim is have all of the approximate total number of 1200 courses to be offered each semester using the learning management system of BlackBoard. As a move in that direction we project a 10% increase this academic year.

Responsible Person/Group: Staff members of the Office of Distance Education and Learning Technologies, responsible for faculty training on basic and advanced Blackboard utilization. That faculty adopt BlackBoard for web-enhanced courses is responsibility of deans, chairs, and individual faculty members.

Additional Resources Requested: In addition to the funds the University has invested in the learning management system and staff salaries to complement available Title III funds, there is a need for funds to provide digital technology tools faculty members can use to enrich their web-enhanced courses.

Promote creation of faculty incentives to develop online courses.
Besides encouragement and training, DSU faculty members need incentives if they are to become involved with the creation of online courses. When funds are made available at other similar (HBCU) institutions to reward faculty for online course development, the number of online courses have increased dramatically. While it is the intent of Central Administration to provide such funds, it has not yet been possible to announce the availability of such funds that would represent a major improvement in the institutional climate for distance education activities. Middle States Commission on Higher Education approval of DSU's first two completely online academic programs will provide a major stimulus to the creation of financial incentives for increased faculty involvement.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- **Measure**: A comprehensive infrastructure for distance learning. | **Outcome/Objective**: Contribute to institutional conditions propitious for distance education growth
- **Measure**: Comprehensive student support services equivalent to on-campus services. | **Outcome/Objective**: Increase the effectiveness and efficiency of online student services required to recruit and retain online students
- **Measure**: Enrollments in technology-supported distance education courses | **Outcome/Objective**: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus
- **Measure**: Number of departments that offer one or more online courses | **Outcome/Objective**: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus
- **Measure**: Number of online academic programs offered | **Outcome/Objective**: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus
- **Measure**: Number of online courses offered | **Outcome/Objective**: Grow the number of distance education activities (web-enhanced and online courses) on the DSU campus
- **Measure**: Training for faculty to utilize distance education technologies in their teaching. | **Outcome/Objective**: Provide opportunities for DSU faculty to gain competence and confidence to design, develop, and deliver distance education

Implementation Description: Implementation hinges on MSCHE approval of our first two academic programs to be offered online.
Responsible Person/Group: Peter S. Cookson
Additional Resources Requested: Additional resources will need to be generated to support major course revisions and to finance significant marketing efforts. A budget amount was proposed in drafts of the MSCHE proposal.

Support departmental and faculty members’ to expand the opportunities for their students to participate in online learning.

- We will prepare a trifold brochure describing the benefits (to students, faculty, and departments) of increased opportunities to participate in distance learning.
- We will schedule meetings to consult with college deans, department chairs and individual faculty to discuss how we might raise the priority given to engagement in distance teaching.
- We will set up and man a table at the August faculty institute to promote greater awareness and interest in teaching both web-enhanced and disted courses.
- We plan to convert our modus operandi to include a more active teamwork approach to online course design and development.

Established in Cycle: 2011-2012
Implementation Status: Planned
Systematic training for would-be faculty subject matter experts to develop online courses.

To support faculty members in their efforts to create high quality online academic courses that comprise quality online degree programs, ODELT needs to develop exemplary courses that can serve as models of quality online teaching and learning. ODELT also needs to develop systematic training courses and workshops to enable faculty members committed to create online courses to develop the prerequisite competencies. Two developments will

College of Education, Health & Public Policy

1.1 Obtain and/or maintain accreditation of programs
values and ethical standards identified by their professional organizations and accrediting bodies
1.3 All curricula include service learning activities
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies
2.2 Cultivate an environment of academic and professional excellence
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy
2.4 Student academic support and career planning services are provided within the department
2.5 Develop and/or expand student recruitment and retention strategies
3.2 Support an environment of high quality teaching
3.3 Faculty are engaged in scholarship and/or research
3.4 Promote faculty service in the community
3.5 Faculty provide high quality advising and mentoring

Delaware State University

1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
1.5 Recruit and retain outstanding and engaged faculty
2.1 Increase retention and graduation rates by at least two percent annually for the next five years
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community
4.1 Strengthen and expand DSU’s outreach, Extension, engagement, entrepreneurship and economic development programs to benefit the people of Delaware, the nation and the world.
4.2 Collaboratively develop and enhance programs for underrepresented groups and undeserved communities

Related Measures:

**M 5: Partnership Binder**

The School, Family and Community Partnership Binder is constructed from the six major assignments in the 12-315 Family, School and Community Partnerships course. Pre-Education candidates take this course in their sophomore year, prior to entering the Teacher Education Program (TEP).

- National Standards for Family Involvement - Using the appropriate national standards for family involvement as a resource, candidates reflect on their own skills in this area and create goals for improvement.

- Families in the Media Journal Assignment - In this assessment, candidates watch five television programs in which family members are the main characters. Candidates keep a journal of their television viewing and analyze what they observe about the media's depiction of families, family life and parent and children roles. Candidates then compare these observations with the reality of family life and the roles of family members.

- Parent Newsletter - Candidates critique the content and format of a school or center newsletter according to readability, participation of students, teachers, administrators, parents; two way communication strategies and other qualities. Then give suggestions for improvement and draw a diagram or layout to show what an excellent newsletter might look like.

- Parent Involvement Plan - Candidates write an essay on the ways schools, parents, and communities should connect in the future. They also address their vision of the ideal family involvement, including a mission statement, goals, timeline for implementation, materials, provisions and cost.

- Early Field Experience Packet - Candidates spend ten hours in a school setting where they interview parents, teachers, and administrations regarding parent/teacher conferences, parent involvement, and school committee structures.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**

On a rubric scale of 1-3, a 2 or better with no scores in the unacceptable range.

**Findings (2016-2017) - Target: Met**

100% pass rate with a mean score of 2.5. Met

**Findings (2015-2016) - Target: Met**

There were 4/5 completers in the Early Childhood Education program for this assessment. Pass rate for completers was 100% with a mean score of 96% (2.89/3.0), indicating that the objective was met well above the 85% minimum score.
Findings (2014-2015) - Target: Met
There were 13/16 completers for this course. Mean score for the assessment was 2.58/3.0, (86%) which is just above the cut score.

Findings (2013-2014) - Target: Not Reported This Cycle
There is no data for this assessment for AY 2013-14.

Findings (2012-2013) - Target: Met
There were 5/5 completers in the Early Childhood Education program for this assessment. Pass rate was 100% with a mean score of 95% (4.75/5), indicating that the objective was met well above the 85% minimum score.

Findings (2011-2012) - Target: Partially Met
There were 5/5 completers in the Early Childhood Education program for this assessment. Pass rate was 100% with a mean score of 78%. However, three out of the five students received "unacceptable" scores in the Oral Presentation category, indicating that the students may have some difficulty in presenting information to a group, expressing ideas, and making themselves understood.

Findings (2010-2011) - Target: Met
There were 39/43 completers. Pass rate was 91% Mean score was 4.55./5.

**Findings (2015-2016) - Target: Partially Met**
Scores for 3 completers is 20, 30, 50. Mean score is 33. Partially met. Plans already in place for improvement.

**Findings (2014-2015) - Target: Not Reported This Cycle**
The Education Department has a new capstone assessment that
replaces the Teacher Work Sample. The Praxis Performance Assessment for Teachers (PPAT) is administered and scored by Educational Testing Service. As of May 21, 2015 we have not received the scores for Spring 2015.

**Findings (2013-2014) - Target: Met**
There were 5/5 completers for the 2013-14 academic year. Mean score is 86% (2.6/3.0) which is above the 85% target score. A weakness identified last year (planning for student initiated inquiry and exploration) continues. This concept is being emphasized in earlier courses in order to strengthen students' understanding.

**Findings (2012-2013) - Target: Met**
There were 3/3 completers for the 2012-13 academic year. Mean score is 90% (2.70/3.0) which is above the 85% target score. Areas of weakness have emerged through data analysis. These included, establishing goals and objectives and aligning them with contextual factors, assessment, and student initiated inquiry and exploration.

**Findings (2011-2012) - Target: Met**
There were 3/3 completers for this assessment. Mean score is 2.8 which is within the desirable range.

**Findings (2010-2011) - Target: Met**
There was 1/1 completer.
Mean score from two assessors was 3, which the target score.

**G 5: Becoming a Professional**

Candidates prepared in early childhood degree programs a) identify and conduct themselves as members of the early childhood profession. They b) know and use ethical guidelines and other professional standards related to early childhood practice. They c) are continuous, collaborative learners who demonstrate knowledgeable, reflective and critical perspectives on their work, making informed decisions that d) integrate knowledge from a variety of sources. They are e) informed advocates for sound educational practices and policies.

**SLO 6: Ethical Standards**
Candidates will demonstrate knowledge about and uphold ethical standards and other professional guidelines

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
Related Measures:

**M 4: Philosophical Statement**

The Personal Philosophy of Early Childhood Education assessment is completed in the 12-206 Introduction to Early Childhood Education course. In this assessment, candidates begin to develop an ongoing personal philosophy statement which includes their beliefs about how children learn, the necessary qualities and characteristics of an effective teacher, environments most conducive for teaching young children, a reflection of their role as a professional and advocate in the field of early care and education and the role theories play in setting the stage for current beliefs about best practice.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**

A mean score on the rubric of 85% is acceptable.

**Findings (2016-2017) - Target: Met**

100% pass rate with a mean score of 88%.

**Findings (2015-2016) - Target: Met**

There were 10/10 completers for this assessment. Mean score was 90%. Met

**Findings (2014-2015) - Target: Met**

There were 10/10 completers for this assessment. Mean score was 2.7 out of 3. No action needed.

**Findings (2013-2014) - Target: Met**

In 2013-14 there were 9/9 completers in Education. Mean score was 90% (2.7/3) which is above the minimum score of 85%. Areas identified as weaknesses in previous years have been strengthened.

**Findings (2012-2013) - Target: Partially Met**

In 2012-13 there were 21/21 completers. Mean score was 83% (2.5/3) which falls slightly below the minimum score of 85%. Areas of weakness appear to be in the areas of theory and advocacy. As this assessment is course specific, steps will be taken to strengthen this content in the course to increase scores.

**Findings (2011-2012) - Target: Met**

There were 11/11 completers. Pass rate was 100%. Mean score for the entire assessment was 96%, which is an 8 percentage point increase over 2010-11. NAEYC Standard 1 includes objectives 1-2. Mean score for this set of objectives was 3 which is the target score.

**Findings (2010-2011) - Target: Met**

There were 19/20 completers. Pass rate was 96%. Mean score for the entire assessment
NAEYC Standard 5 includes objectives 15-19. Mean score for this set of objectives was 3 which is the target score.

Findings (2009-2010) - Target: Met
There were 13 completers. The pass rate for the total assignment was 92% and the mean score was 80.35. This assessment appears to be on target. For this objective, mean score was 2.54. No action needed.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Philosophy of ECE theory and advocacy
Established in Cycle: 2012-2013
Action needs to be taken to strengthen students' understanding of basic ECE theory and advocacy. Plans will be made in EDUC 206 ...

G 6: Using Content Knowledge to Build Meaningful Curriculum
Planning based on knowledge of academic disciplines.

SLO 4: Using developmentally Effective Approaches
Candidates will use developmentally effective approaches

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:

M 3: Teacher Work Sample
Source of Evidence: Project, either individual or group

Target:
On a rubric scale of 1-3, a 2 or better with no scores in the unacceptable range.

Findings (2015-2016) - Target: Partially Met
Scores for 3 completers is 20, 30, 50. Mean score is 33. Partially met. Plans already in place for improvement.

Findings (2014-2015) - Target: Not Reported This Cycle
The Education Department has a new capstone assessment that replaces the Teacher Work Sample. The Praxis Performance
Assessment for Teachers (PPAT) is administered and scored by Educational Testing Service. As of May 21, 2015 we have not received the scores for Spring 2015.

**Findings (2013-2014) - Target: Met**
There were 5/5 completers for the 2013-14 academic year. Mean score is 86% (2.6/3.0) which is above the 85% target score. A weakness identified last year (planning for student initiated inquiry and exploration) continues. This concept is being emphasized in earlier courses in order to strengthen students' understanding.

**Findings (2012-2013) - Target: Met**
There were 3/3 completers for the 2012-13 academic year. Mean score is 90% (2.70/3.0) which is above the 85% target score. Areas of weakness have emerged through data analysis. These included, establishing goals and objectives and aligning them with contextual factors, assessment, and student initiated inquiry and exploration.

**Findings (2011-2012) - Target: Met**
There were 3/3 completers for this assessment. Mean score is 2.5 which is within the desirable range.

**Findings (2010-2011) - Target: Met**
There was 1/1 completer.
Mean score from two assessors was 3, which the target score.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Evaluate reasons for low scores, address issues of non-completion of assignments and field work.**
Action plan: Evaluate the reasons for low scores and respond the the reasons. Address issues of students completing assignments and completing field hours. Clarify scores for individual objectives

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Focus on these issues will continue throughout the fall 2010 semester.
- **Projected Completion Date:** 12/09/2010
- **Responsible Person/Group:** Early childhood faculty

**Action plan for oral presentation.**
Work to help students develop skill in confidence in delivering information to a group, possibly by adding some activities that will help the students develop their skills in speaking in front of a group.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Partnership Binder | Outcome/Objective: Involving Families and Communities in Children's Learning

Implementation Description: Conduct informal preassessments to determine if students are prepared for group speaking. Look for a pattern in future years.

Responsible Person/Group: Course instructor

Evaluate causes of low scores relating to parent involvement in TWS
It is difficult for student teachers to become involved in empowering families through "respectful and reciprocal relationships". Efforts need to be made to provide avenues for early childhood student teachers to involve families during their student teaching semester.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: Medium
Implementation Description: Students are made aware of this section of the TWS rubric and given more instruction as to how to emphasize parent involvement in their report. Drafts of the TWS are reviewed and returned, if needed.

Responsible Person/Group: Director of Clinical and Field Experiences; Early Childhood Program Coordinator

Additional Resources Requested: Discussions with mentor teachers in the schools.

Assessment
Data from several assessments (Teacher Work Sample, Student Teaching Observations, and Preschool Unit Plan), indicate low scores in candidates' understanding and abilities to use assessments to their best advantage. Plans are in place in several courses to strengthen students' background knowledge of assessment and to use more case study data to practice data analysis. Also exercises in assessment involving comparisons of typical and atypical children will be created.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Student Teaching Observation | Outcome/Objective: Benefits and Uses of Assessment

Implementation Description: Course adjustments

Responsible Person/Group: Hill, Kim, Williams

Child Development and Learning Binder
Continue to monitor the mean score for this assessment to determine if the increased emphasis on turning in work on time and produce better quality work is effective over time.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High

**Child Growth and Development Binder**  
Continue to monitor the mean score for this assessment to determine if the increased emphasis on turning in work on time and produce better quality work is effective over time.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High

**Family Theory**  
Data from several assessments (Teacher Work Sample, Student Teaching Observations, and Preschool Unit Plan), indicate low scores in candidates' ability to plan for parent involvement, which is a critical component of early childhood practice. Plans are in place to send a clear and consistent message throughout our curriculum about ways to involve families in planning.

**Established in Cycle:** 2012-2013  
**Implementation Status:** In-Progress  
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Student Teaching Observation  
**Outcome/Objective:** Involving Families and Communities in Children's Learning

**Implementation Description:** Create a general sheet of "Talking Points" that will serve as a consistent thread throughout the ECE program.  
**Responsible Person/Group:** Hill, Kim, Williams  
**Additional Resources Requested:** none

**Inquiry, problem solving, critical thinking.**  
Data from several assessments (Teacher Work Sample, Student Teaching Observations, and Preschool Unit Plan), indicate low scores in student directed/initiated inquiry, problem solving, and critical thinking. Plans are in place to emphasize in several classes, the importance for children to develop in these areas. Plans include purchasing a video to model best practice in this area and to offer more opportunities to
plan lessons involving constructivist learning.

Established in Cycle: 2012-2013  
Implementation Status: Planned  
Priority: High

Responsible Person/Group: Hill, Kim Williams  
Additional Resources Requested: Funds to purchase videos that model best practice.  
Budget Amount Requested: $0.00 (no request)

**Philosophy of ECE theory and advocacy**
Action needs to be taken to strengthen students' understanding of basic ECE theory and advocacy. Plans will be made in EDUC 206 to emphasize and conduct formative assessments in these areas prior to the Philosophy assessment.

Established in Cycle: 2012-2013  
Implementation Status: In-Progress  
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Philosophical Statement  |  Outcome/Objective: Ethical Standards  
  Understanding Content Knowledge and Early Education

Projected Completion Date: 05/25/2014  
Responsible Person/Group: Hill

**Adjust scoring for all assessment in this binder**
Scoring for all Education Unit rubrics are to be 1- unacceptable, 2- acceptable, 3- target. Although "unacceptable, acceptable, and target" are followed, the rubrics in this binder score from 30-50 and 60-100.

Implementation Status: Planned  
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Partnership Binder  |  Outcome/Objective: Children's Characteristics and Needs

Implementation Description: Changes should be made before the rubrics are uploaded/transferred to Taskstream.

Work with students to improve scores.
This is a new instrument for the state, that requires more complex thinking and extended content than the earlier ETS tests. Two of the six completers took the test as many as three times. Plans are in place to adjust course instruction to help the students pass the test. For example, course tests are being designed that follow the same structure as Praxis and course activities are being designed to encourage critical thinking.

**Established in Cycle:** 2014-2015  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Praxis | **Outcome/Objective:** Children's Characteristics and Needs

**Implementation Description:** These actions will be ongoing as we redesign our NAEYC SPA assessments this year.  
**Responsible Person/Group:** Hill, Kim, Pogue, Marker
Mission / Purpose

As a University laboratory school, we aim to lead through excellence and innovation as we train undergraduate and graduate students in child development theory, research and its applications, while implementing national and state standards for quality toddler, preschool and full day kindergarten programs. We provide resources to parents and community members in child development and strategies to meet the needs of special populations. We welcome all majors to observe and learn in a nurturing, diverse educational environment.

Goals without Outcome/Objective Relationships Specified

G 6: Student Goals
   a) Prepare graduates to be competent communicators
   b) Prepare graduates to be effective inquirers, critical thinkers, and problem solvers to use appropriate quantitative and qualitative information
   c) Prepare graduates to be ethical, collaborative and productive citizens in a complex diverse world
   d) Prepare graduates to be independent learners able to integrate knowledge and technology to achieve personal and professional success

G 8: Administrative and Program Goals
   Institutional Goal 5.2 To improve and upgrade the physical environment for instruction

G 9: Physical Environment
   a) To update outdoor playground with safe, child-friendly equipment
   b) To phase out the Kindergarten program
   c) Phase in a Toddler 2 (24-35 months) classroom

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 7: Child and Family Goals
   Institutional Goal 8.1 To continue to develop, implement and utilize a comprehensive and integrated assessment process for institutional effectiveness and student learning outcomes
   Institutional Goal 6.5 To develop an integrated marketing strategy that strengthens the institution's image and identity

SLO 5: Improve Services to Children, Families & Community

   NAEYC 4d. Using own knowledge and other resources to design, implement and evaluate meaningful, challenging curriculum to promote positive outcomes

Relevant Associations:
Standard Associations:
   NCATE
   1.1 Content Knowledge for Teacher Candidates
   2.2 Element 2. Data Collection, Analysis, and Evaluation
   4.1 Element 1. Design, Implementation, and Evaluation of Curriculum and Experiences

Strategic Plan Associations:
   College of Education, Health & Public Policy
   2.2 Cultivate an environment of academic and professional excellence
   3.2 Support an environment of high quality teaching

SLO 6: Marketing
   a) To obtain STAR level 5 through the Delaware Institute for Excellence in Early Childhood
   b) To develop a link on the DSU website
   c) To develop a mentoring program for local child care providers in Kent & Sussex Counties

Relevant Associations:

Standard Associations:
   NCATE
   5.2 Element 2. Modeling Best Professional Practices in Teaching

Strategic Plan Associations:
   College of Education, Health & Public Policy
   3.5 Faculty provide high quality advising and mentoring
   4.1 Enhance community engaged partnerships and outreach
   8.1 Increase the income from grants and service contracts each year
   8.3 Enhance relationships with agencies, community based organizations and industry stakeholders
   8.7 Develop and implement a marketing plan for College

Delaware State University
   2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1: Connect with children and families
   NAEYC 4a. To understand and use positive relationships and supportive interactions as the foundation for their preservice teaching

Relevant Associations:

DSU Learning Goal Associations:
   1 UG Student Learning Goal: Competent Communicators

Related Measures:

M 1: Self reflection of early field experience
   Self reflection of knowledge gained on how to develop an understanding of positive relationships and supportive interactions with parents, staff and children.
Source of Evidence: Field work, internship, or teaching evaluation

**Target:**
95% of participants strongly agree that they gained an understanding of how to connect with children and families through their field experience at the Lab School each semester.

**Findings (2013-2014) - Target: Partially Met**
2012-2013 67% of students AGREE that they gained an understanding of how to connect with children and families through their field experience. 33% STRONGLY AGREE

2013-2014 75% of students STRONGLY AGREE that they gained an understanding of how to connect with children and families through their field experience. 25% AGREE

**Findings (2010-2011) - Target: Partially Met**
Fall 2011 23% of students strongly agree that they gained an understanding of how to connect with children and families through this field experience. 59% agreed. 18% undecided
Spring 2011 14% of the students strongly agree. 86% agree.
Fall 2010 66% of the students strongly agree. 33% agree.

**Findings (2009-2010) - Target: Not Met**
Findings from Spring 2010 EFE Rating Scales:
38% of participants strongly agree that they gained an understanding of how to connect with children and families through their field experience. 56% agree
.06% undecided

**Findings (2008-2009) - Target: Partially Met**
Spring 2009 Findings: 84% of participants strongly agreed that they gained an understanding of how to connect with children and families from this field experience.
Fall 2009 Findings: 50% of participants strongly agreed that they gained an understanding of how to connect with children and families from this field experience.

**M 2: Early Field Experience Rating Scale**
Rating Scale for DSU Lab School Participants
(Completed each semester since Spring 2009)

1) During my field experience observation/participation, I gained an understanding of how to connect with children and families.
2) During my early field experience observation/participation, I gained an understanding of developmentally effective strategies, tools and approaches to influence children's development.

Strongly Agree, Agree, Undecided, Disagree, Strongly Disagree

3) During my early field experience observation/participation, I gained an understanding of the community and how it impacts a child's development.

Strongly Agree, Agree, Undecided, Disagree, Strongly Disagree

4) During my early field experience observation/participation, I became more interested in researching a particular aspect in my field of study.

Strongly Agree, Agree, Undecided, Disagree, Strongly Disagree

Source of Evidence: Student course evaluations on learning gains made

**Target:**
Maintain 95% of participants strongly agree that they gained an understanding of how to connect with children and families through their field experience in the Lab School each semester.

**Findings (2009-2010) - Target: Not Met**
Findings from the Spring 2010 EFE Rating Scales:
38% strongly agree
56% agree
6% undecided

**Findings (2008-2009) - Target: Partially Met**
83% of participants strongly agreed that they gained an understanding of how to connect with children and families through this field experience.
16% agreed. (Spring 2009)

50% strongly agreed. 50% agreed. (Fall 2009)

**SLO 2: Use developmentally effective approaches**

NAEYC 4b. To understand and use a wide array of effective strategies and tools to influence children's development.

**Relevant Associations:**

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Budgeting
Ensure all Lab School participants are paying tuition on time and decrease delinquent accounts

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium
Implementation Description: Meet with parent committee to discuss eliminating the "under $900 waiver" permitting children to remain in the program with an outstanding balance. Monitor child development lab accounts bi-monthly. Follow policies and procedures for delinquent accounts as stated in the Parent Handbook.
Projected Completion Date: 04/01/2012
Responsible Person/Group: Director, with assistance from student accounts and student services

Early Field Experience Self Reflection

Students respond to a rating scale about their experience in the Lab School
1. Did they gain an understanding of how to connect with children and families?
2. Did they gain an understanding of developmentally effective teaching strategies?
3. Did they gain an understanding of how to build relationships with the community and the impact of this relationship on a child's development
4. Did they become more interested in researching a particular aspect in their field of study?

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium
Implementation Description: A certified administrator will assist early field experience students in gaining the knowledge expected during their 10 hours of observation. Create poster describing purpose and expectations during EFE, require students to complete the rating scale prior to getting verification form signed. In the Fall of 2012, the rating scale will be distributed upon initial visit.
Projected Completion Date: 12/14/2012
Responsible Person/Group: All certified administrators and teaching staff
Marketing Strategies
To link the Department of Education homepage to the Lab School webpage.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: A one-page overview of the Lab School mission, purpose and curriculum including mini-biography of all staff will be submitted for approval by the Chair of the Department. Once approved, the webpage will be linked to the DOE homepage by Lynn McGinnis
Projected Completion Date: 07/01/2012
Responsible Person/Group: Director, Chair, Dean’s Administrative Assistant

Meaningful Curriculum
The Delaware Institute for Excellence in Early Childhood STARS program TA needs assessment will be conducted this spring. The results of the environmental rating scale will determine our star rating in the state.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: Internal assessment using the environmental rating scale will be completed by one teacher and one education faculty member prior to the official STARS visit.
Projected Completion Date: 06/15/2012
Responsible Person/Group: Director, Teachers
Additional Resources Requested: Gazebo shade structures over picnic tables and sandbox on playground. Mr. Flowers (contractor) is working with Mr. Anderson to develop plans for installation
Budget Amount Requested: $8,000.00 (recurring)
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Economic Student Learning Goals

Our graduates will be able to explain economic events at both a micro and macro level of analysis.

SLO 1: Economic Models of Closed and Open Economies

Graduates will be able to explain classical, neoclassical, Keynesian, new classical, monetarist, and rational expectations models of closed and open economies.

SLO 2: Monetary and Fiscal Policies

Graduates will be able to discuss and explain the implementation and effectiveness of monetary and fiscal policies.

SLO 3: Theory of Product Demand

· Graduate will be able to describe, recognize, and apply the theory of product demand.

SLO 4: Price, Income and Cross Elasticity
· Graduates will be able to calculate and evaluate price, income, and cross elasticity coefficients.
Mission / Purpose

The Mission of the Education Unit is to prepare capable, caring, and culturally competent educators and to be a leading force in teaching, research, and service at the state, regional, national and international levels. This is consistent with the Mission of the University in providing meaningful and relevant education that emphasizes both the liberal and professional aspects of higher education. The Mission Statement was adopted in Spring 2008.

The Education Unit aspires to becoming relevant in the areas of teaching, research, and service in the region. Consistent with the University’s Vision statement, the Department will:

- Strengthen the undergraduate as well as graduate programs to provide quality instruction to all students that enroll in our programs
- Excel in the preparation of highly qualified teachers that will serve the state, the nation and the world.
- Engage in quality research that will focus on Achievement Gap in Education.
- Develop outstanding outreach programs that will connect the Education Unit with the three Counties in the State, Region, the nation and the world.
- Meet the needs of underserved populations through educational programs.

Goals without Outcome/Objective Relationships Specified

G 2: Increase Grant Applications for Funding
To increase the number of grant applications by Education faculty.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans
G 3: Curriculum Development
To effectively align Program goals and outcomes with the Praxis II content area exam content.

SLO 3: Course alignment with Praxis II Content
To effectively evaluate course content with Praxis II content area outcomes to ensure students are receiving and learning the content included in Praxis II.

Relevant Associations:

Standard Associations:
NCATE
1.3 Element 3. Pedagogical Content Knowledge for Teacher Candidates
1.4 Element 4. Professional and Pedagogical Knowledge and Skills for Teacher Candidates

Strategic Plan Associations:
Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

Related Measures:

M 3: Curriculum Modifications
The Education Department Program Coordinators will align program/course outcomes with Praxis II content area outcomes to determine if there are any gaps in content that students may not be getting.

Source of Evidence: Government standards

Target:
Completion of the grid alignment to identify content area gaps.

Findings (2017-2018) - Target: Partially Met
Each Program Coordinator found particular gaps in their alignment and will take the next steps in the Fall, 2018 to correct this finding. Next steps will include the following:

1. Identify the Praxis II content that is not included in the program.
2. Determine which course the content will be included and implement the outcome(s) into the syllabus in that course.
3. Include how that content will be assessed (rubric) to ensure student learning occurs.

Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans
O/O 1: Self-study requirements
Prior to the CAEP accreditation visit scheduled for April, 2018, the Education Department is preparing to submit a self-study report to CAEP for their review and feedback. The resulting feedback from this report will guide the department towards preparing for the CAEP visit.

Relevant Associations:

Strategic Plan Associations:
College of Education, Health & Public Policy
1.1 Obtain and/or maintain accreditation of programs
values and ethical standards identified by their professional organizations and
accrediting bodies

Related Measures:

M 1: Self-study Standards Report
The Self-study report is an opportunity for the EPP to submit a self evaluation of the Unit and its' Programs to CAEP. CAEP will provide qualitative and quantitative feedback prior to our accreditation visit in April, 2018. The due date for the self-study report is August 24, 2017.

Source of Evidence: Professional standards

Target:
Submission of all Standards' sections of the self-study by August 24, 2017.

Findings (2017-2018) - Target: Partially Met
Preliminary work has been completed on each of the CAEP Standards for the self-study. Faculty will continue to analyze the data collected and make changes/corrections/modifications to the self-study report over the summer in preparation for the August 24, 2018 submission.

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 2: Grant Writing

Write and submit Education grants to support the CAEP and DOE changes in Teacher Education.

Related Measures:

M 2: Grant Production by Education Faculty
The Education landscape is changing and the Education Department needs to stay current with these changes. Consequently, CAEP and DDOE has increased Institutions of Higher Education accountability. Associated with these changes
comes the increased needs for external funding. In an effort to fund the Clinical experience changes faculty need to write grants to support this purpose. Partnerships with schools is also a priority to effectively better prepare our teacher education students.

Source of Evidence: Administrative measure - other

**Target:**
To submit at least one Federal Education grant this year and to increase the writing of grants by one each consecutive year for the next 3 years.

**Findings (2017-2018) - Target: Met**
Dr. Martin, department Chair, submitted an extension to the Title III grant, Enhancing Teacher Education, in the amount of $200,000.00. This grant was approved by USDOE.

**Findings (2015-2016) - Target: Met**
Dr. Elaine Marker and Dr. Yvette Pierre submitted an Education grant proposal to the Federal Government. The grant was not funded. However, the Education department met their goal of writing one grant for this year. The expectation is to write at least 2 grants in the 2016-2017 academic year.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

Further investigation needed
Such fluctuation needs further examination in regard to retention of education students through their Teacher Education Program candidacy.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** The chair and the Director of Student Services will monitor enrollment and students need for support in their academic program areas. Advisement will be closely monitored for effectiveness.  
**Responsible Person/Group:** Academic Advisors and Director of Student Services

**NCATE Institutional Report Submission in progress**
Complete and submit report to NCATE in Fall 2010. Host Site Visit in March 2011.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Complete and submit report to NCATE in Fall 2010. Host Site Visit in March 2011.  
**Projected Completion Date:** 03/30/2011  
**Responsible Person/Group:** Billie L. Friedland, NCATE Coordinator  
**Additional Resources Requested:** Professional Education Unit NCATE Standards Committees are in process of writing their responses to the questions posed by
**Recruitment and Retention Committees**

At both undergraduate and advance levels, Education faculty have formed recruitment and retention committees. These committees monitor retention issues and efforts to recruit and retain students. They make recommendations to the Department and Professional Education Unit regarding recruiting and supporting our education candidates through their programs. In addition, the Unit has upgraded support for candidates to pass PRAXIS I and II exams.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Formation of Committees to monitor Recruitment and Retention efforts; Hire a full-time PRAXIS Activities Coordinator.
- **Projected Completion Date:** 10/29/2012
- **Responsible Person/Group:** Chair of the Professional Education Unit
- **Additional Resources Requested:** Funds
- **Budget Amount Requested:** $225,000.00 (recurring)

**Annual Report Section Responses**

**Executive Summary (1-2 pages)**

The Education Department participated in many activities in 2017-2018. The following activities represent a collective summary of the undertakings of the department.

**Activity 1:**
All Education programs submitted Program Reports and received National Recognition Report responses from the Council for the Accreditation of Educator Preparation (CAEP). Elementary Education, Physical Education, Middle Level Education and Educational Leadership (M. Ed. & Ed. D.) received National Recognition with Conditions. Early Childhood Education did not receive National Recognition but received Further Development Required. These programs will continue preparing their response to the Conditions and will resubmit their reports in September, 2018.

**Activity 2:**
Title II SAFRA grant titled, "Teacher Education Program Enhancement" through 2015-2020. This grant was approved for the 2015-2020, 5-year cycle with an award of $180,000.00 per year totaling $900,000.00 for the 5 years. This grant will allow the Education Department to address the major issue of our students having tremendous difficulty passing the Praxis II. The Department Chair, Dr. Bob Martin, wrote a supplementary proposal for this grant for $200,000.00 and it was approved by the USDOE. These funds were acquired to support a Summer Institute in which 4 partnerships were initiated with local schools. Principals, mentor teachers, and site supervisors were invited to attend and there were over 50 participants for the 2-day Summer Institute. The focus for the 2 days was to collaborate and to participate in co-
construction with our external partners.

Activity 3:
Recently, with the changes in Test Preparation at the Educational Testing Service, the bar has been raised and all teacher candidates are required to take and pass the PPAT. This is a state requirement for certification and all students must complete this assignment during student teaching. Their work is then reviewed by independent, trained personnel with ETS and teacher candidate scores are sent to the university and the students. 95% of our students that took the PPAT passed in the fall. We are still waiting for responses for 4 students that resubmitted sections of their PPAT for evaluation during the May/June window.

Activity 4:
With the hiring of our CAEP Coordinator, he has assembled groups that are collaborating and working on the CAEP Self-study that is due on August 24, 2018. Each group is addressing an individual CAEP Standard. The self-study will be evaluated by CAEP and they will render feedback on the report. This feedback will guide us in making any substantive changes/modifications prior to the CAEP visit scheduled in April, 2019.

Activity 5:
Title III has allowed us to test our students on the Praxis II exams. It was determined that many of our students were also struggling with the Praxis II exams. Consequently, we are offering a plethora of content area workshops to provide additional assistance to our students to prepare them for these exams.

To summarize briefly, the Education Department is undergoing significant landscape, program, and curricular changes. It is a department in transition as we continue our efforts to improve and provide the best prepared teachers in the state of Delaware.

Additional results show that we had thirty-three (10 in the Fall, 2017 & 23 in the Spring, 2018) student teachers complete their internships this academic year. Combine that with the 14 Doctoral students and 3 Masters students that graduated this past academic year and it is clear that the faculty in the Education department is working extremely hard to make us better every day.

Innovative teaching strategies and/or student services strategies initiated

I am a serious scholar whose education reflects an atypical sensitivity to students. My teaching methodology is one that sets achievable realistic goals and objectives with practice of the learning materials, designed to master the desired skill sets. I possess excellent teaching skills and methods due to effective planning and preparation of my instruction and lecture. Mainly, I employ tiers in my presentations/lectures and layer my differentiated instruction to reach all the learning styles of the students. I engage in differential assessment to accommodate those that just don't tests well. With these techniques students are helped to extend and refine their acquisition of declarative and procedural knowledge through direct and indirect instruction which involved decision making, problem solving and inquiry. I also integrate technology into my instruction with demonstration and collaboration among students working on individual projects and group activities. This allows for rubric scored presentations and portfolios which have proven to be keys to success outcomes in adult learning theory. Additionally, I facilitate the transfer of learning for adults with learning activities, which are related and relevant to real world problems.

Spring 2018: WMGS 240 - Women in Physical Education and Sports
Graduate Courses

Summer 2017: EDUC 829 - Sustaining Dissertation Research

Fall 2017: EDUC 829 - Sustaining Dissertation Research

Spring 2018: EDUC 829 - Sustaining Dissertation Research

2. Participation in professional meetings, seminars, etc. (include date)

· Mar. 2018: Advancing Women in Leadership Conference, Azusa Pacific University, CA
· Sept. 2017: 8th International Scientific Forum, Pembroke, NC
· July 2017: NOYCE Submit for NOYCE delegates' presentation of research, Washington, DC
· May 2017: 8th IJAS International Conference for Academic Disciplines, Harvard University, Cambridge, MA.

3. Research and publications (list the names of students involved)

Submit a manuscript

Research presented:

· Sept. 2017: 8th International Scientific Forum, Pembroke, NC
· July 2017: NOYCE Submit, Washington, DC - Poster presentation on Problem-Based Learning for Future Teachers.
· May 2017: 8th IJAS International Conference for Academic Disciplines, Harvard University, Cambridge, MA.

Advisor to the following Students at DSU Research Day 2018:

· Kyle Shephard
· Sabina M Szmajduch

Publications:

· Rathee, N. K. (2017). Relooking at the Common Core Standards through the lens of Equity

**Book Published:**

- Contemporary Yoga Education: Transforming the Body, Mind & Soul

4. Proposals submitted but not yet funded (include funding agency)

- Grant Submitted (Not funded): Explorers' Club, $75,000 grant proposal submitted to American Honda Foundation

5. Funded grants/funding source/amount/time period

NOYCE Scholarship Grant

6. Outreach Programs/Activities and dates

- Campus Compact Mid-Atlantic meeting at UD, Newark
- Superstars in Education, Wilmington University, New Castle
- Attended Graduate Open Houses many times
- Attended Undergraduate Chat & Chew

7. Service to department, college and/or University

- DSU Presidential Search Committee
- DSU Diversity & Inclusion Task Force
- Member of University Academic Committee
- Member of DSU WMGS Work-group Advisory Committee
- Peer evaluation, Department of Nursing, College of Education, Health and Public Policy
- Member, Council for Professional Education
- Dean's Leadership Committee
- Battle of Colleges Committee
- Member, College Curriculum Committee
- Member, College Diversity Committee
• Member: (i) Personnel Committee; (ii) Assessment Committee; (iii) Curriculum Committee, and (iv) Bylaws Committee

• Chair, Education Graduate Committee

• Provided supporting data for Grad Programs for SPA & CAEP Self-Study from time to time

• Contributed in Data Days

• Participated in Summer Institute 2017

8. Innovative teaching strategies and/or student services strategies initiated

• Comprehensive revision of the Ed. D. in Educational Leadership (K-12) curriculum. Revised and approved curriculum will be offered from Fall 2018.

9. Assessment related activities

• Participation in Data Days 2017

• Revision of Ed. D. and M. Ed. Internship Assessments

10. Advanced study or other professional development

11. Special honors and awards received

• Best Educational Research Presentation Award during International Journal of Arts & Science Conference, 2017

• Keynote Speaker, 8th International Scientific Forum, Pembroke, NC 2017

• Received the Global Teacher Role Model Award, 2017.

• Chair, Technical Session. 8th International Conference for Academic Disciplines, Harvard University, Cambridge, MA. May 2017

12. Other significant accomplishments

• Member of International Advisory Scientific Board. International Journal of Arts & Sciences, USA.

• Member of International Advisory Board of Reviewers. Journal of Physical Education and Sport, Romania.

Unit(s) Initiatives accomplished in this cycle

Unit Initiatives Accomplished in this Cycle:

1. The Education faculty, as well as many other DSU and external committee members, worked extremely hard and the Education department graduated 14 Doctoral students and 3 Masters students this year.

2. This past academic year all of the Education department teacher education programs were responsible for submitting their Specialized Professional Associations program reports. As always, this is a huge undertaking and the program coordinators continue to work countless hours to ensure the revised reports are submitted on time with the appropriate data collection and analyses due in September, 2018.

Unit(s) Honors/Awards and Achievements

Unit Honors/Awards and Achievements:

Dr. Rathee:
- Best Educational Research Presentation Award during International Journal of Arts & Science Conference, 2017
- Keynote Speaker, 8th International Scientific Forum, Pembroke, NC 2017
- Received the Global Teacher Role Model Award, 2017.
- Chair, Technical Session. 8th International Conference for Academic Disciplines, Harvard University, Cambridge, MA. May 2017

Dr. Guatam:
- Awarded Research Travel Grant by Center For teaching and Learning at DSU.
- Awarded Professional Development Fund by Provost Office as recommended by Professional Development Committee DSU.
- Awarded Professional Conference Travel fund by the Education Department DSU

Dr. Phillips:
- Second time Nomination for Teaching of Excellence Award

Dr. Martin:
Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

Student learning outcomes include:

1. Demonstrated lesson planning skills (undergraduate)/collected through rubrics scored in multiple courses

2. Demonstrated assessment skills (undergraduate)/data collected in Task 2 of the PPAT

3. Demonstrated professional dispositions/Collected in multiple courses

Graduate: learning goals:

4. Professional performance in the Internship /collected in new assignments

5. Professional dispositions performance/collection in field experiences

Closing the Assessment Loop: Please share one or two prime examples of your unit's assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.  a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  b) Have these changes been implemented? If not, when will they be implemented?  c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Closing the Assessment Loop: Please share one or two prime examples of your program's assessment activities.

a. Validation of common rubrics for lesson planning and disposition (undergraduate and graduate) with both faculty and field partners

b. Reliability testing for lesson planning (undergraduate)

A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.
a) **List one or two examples** of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?

The validation process led to changes in the rubrics, instruction planning for the new rubric terms and examples for each rubric item.

b) **Have these changes been implemented?** If not, when will they be implemented?

Changes have been made for the lesson plan and undergraduate disposition. The graduate disposition rubric is still being field tested.

c) **When does the unit plan to conduct the assessments again** to ascertain whether or not these changes (initiatives) have made a difference?

The unit meets at the end of each semester (fall & spring) to analyze data and make conclusions.

**Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.**

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Success
Provide learning experiences that promote achievement, academic excellence and prepare the students as transformational and impactful leaders to contribute to a dynamic diverse society.

SLO 1: Demonstrate the ability to develop, articulate, and implement a vision of learning
Candidates will be able to demonstrate the ability to develop, articulate, implement and promote a vision of learning for educational institutions at district, state and national levels.

Relevant Associations:

DSU Learning Goal Associations:
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Strategic Plan Associations:
College of Education, Health & Public Policy
2.1 Students are provided with leadership opportunities through course work and academic governance
Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally

Related Measures:

M 1: Applied Administrative Experience (Activities/Project work)
Applied administrative experience in Ed. D. in educational leadership at DSU is grounded in strong research and is focussed on activities designed to solve high leverage problems of practice. This experience is intended to evaluate the candidates in the areas of leadership application, general operations, involvement with other team members & community, and resource management to determine the development of the candidate's professional growth. The students are required to complete their concentration specific activities/project(s) for this experience.

Source of Evidence: Field work, internship, or teaching evaluation
Target:
90% of the students who will enroll in applied administrative experience will successfully complete the required hours and earn a grade of B or higher to reflect their professional outlook and competence.

Findings (2017-2018) - Target: Partially Met
As per their cohort plan and the curriculum sequence sheet, all the Ed. D. students of 2016 cohort are working on their internship during Summer 2018. They will complete their internship by the end of summer semester. The findings of this measure will be updated accordingly.

Findings (2016-2017) - Target: Met
100% students enrolled in applied administrative experience course had completed all the required activities/project(s) and achieved a grade of B or higher demonstrating their competence in the areas of leadership application, general operations, involvement with other team members & community, and resource management to develop, articulate, and implement a vision of learning.

Findings (2015-2016) - Target: Partially Met
In the AY 2015-2016, the students of 2014 cohort were required to complete their internship hours. Out of 8 students, 7 have completed the internship hours and 1 student is working to complete the internship hours. Therefore, 87.5% students have successfully completed their internship experience and have achieved a Target or Acceptable category.

Findings (2014-2015) - Target: Met
All students completed the internship experience (EDUC 812 & EDUC 813).

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Internship Experience
Established in Cycle: 2017-2018
As per the current cohort plan and the curriculum sequence sheet, the internship courses, i.e. EDUC 812 and 813 are offered in t...

M 2: Internship/Field Experience Portfolio
A standard-based portfolio will be a product of course specified activities and will include artifacts showing the understanding and use of relevant professional standards and a reflection document outlining the completed internship/field experience. The portfolio contains a candidate's reflective narratives, different plans and tools that the candidate developed in the field, and other creative reports that may include audio, visuals, candidate-developed web-based
materials etc. The portfolio also includes internship/clinical site supervisor's and/or site mentor's evaluations of the candidate's performance and responsible conduct, internship logs and reflections.

Source of Evidence: Portfolio, showing skill development or best work

**Target:**
90% of the students enrolled for internship/field experience will prepare their portfolio and will achieve a grade of B or higher for their applied work and professional conduct.

**Findings (2017-2018) - Target: Partially Met**
As per their cohort plan and the curriculum sequence sheet, all the Ed. D. students of 2016 cohort are working on their internship during Summer 2018. They will complete their internship by the end of summer semester. The findings on this measure will be updated accordingly.

**Findings (2016-2017) - Target: Met**
100% students who had enrolled for internship/field experience had developed their portfolio and had achieved a grade of B or higher in Summer 2017 for their clinical work and professional conduct demonstrating their ability to develop, articulate, and implement a vision of learning.

**Findings (2015-2016) - Target: Partially Met**
In the AY 2015-2016, the students of 2014 cohort were required to prepare their internship activities portfolio. Out of 8 students, 7 have completed their internship activities portfolio and 1 student is working on it. Therefore, 87.5% students have successfully completed their internship activities portfolio and have achieved a Target or Acceptable category.

**Related Action Plans (by Established cycle, then alpha):**

*Established in Cycle: 2017-2018*
As per the current cohort plan and the curriculum sequence sheet, the internship courses, i.e. EDUC 812 and 813 are offered in t...

**SLO 3: Ability to integrate knowledge, communication skills and technology applications**
The students will be able to develop high order analytical thinking abilities and demonstrate the ability to effectively integrate technology applications for planning, enhancing communication skills, and managing information to report research and collect data from a practitioner’s point of view.

**Relevant Associations:**

**DSU Learning Goal Associations:**
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.
Strategic Plan Associations:
College of Education, Health & Public Policy
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy
Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

Related Measures:

M 4: Performance in Technology Applications course
As per the curricular requirements of EDUC 809 (Technology Applications), the students will demonstrate the knowledge of emerging technologies and their applications from the viewpoint of planning, enhancing communications, and managing information.

Source of Evidence: Writing exam to assure certain proficiency level

Target:
90% of the students will be able to obtain a grade of B or above in their course EDUC 809: Technology Applications demonstrating their ability to effectively integrate emerging technologies and their applications in educational and professional settings.

Findings (2017-2018) - Target: Not Reported This Cycle
As per the approved new curricular changes in the program, the sequence of the course had undergone a change. Now EDUC 809 will be offered to the students of 2016 cohort in Fall 2018. The data will be then reported accordingly.

Findings (2016-2017) - Target: Met
91% of the students enrolled in this technologically enhanced course in Fall 2016 had obtained a grade of B or higher demonstrating their competency in integrating technologies and their applications from a practitioner's point of view to enhance efficiency and impact student learning.

Findings (2015-2016) - Target: Met
In AY 2015-2016, 91% students of 2015 cohort successfully complete project of technology applications as a part of course requirements of EDUC 809.

Findings (2014-2015) - Target: Met
All the graduating students were able to successfully defended their research dissertation.

SLO 4: Ability to think critically to solve problems by using information effectively
The students will be able to think critically and solve problems through knowledge comprehension and analytical inquiry to demonstrate their intellectual creativity and research based decision making.

**Relevant Associations:**

**DSU Learning Goal Associations:**
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

**Strategic Plan Associations:**
- College of Education, Health & Public Policy
  - 2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy
- Delaware State University
  - 1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

**Related Measures:**

**M 5: Qualifying Examination**

The Qualifying Examination is a measure of a student's ability to think critically and analytically. It is an exhaustive exam designed to provide students an opportunity to demonstrate their ability to conceptualize, critically analyze, and present knowledge in an organized and cogent manner. It is administered to the students to gauge their readiness for future doctoral study. The responses of the students on the Qualifying Exam will be evaluated with the help of the Core Question Rubric, and the Research Question Evaluation Rubric.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target:**
90% of the students will obtain a score of 10 or above on the Core Question Rubric and a score of 28 or above on the Research Question Evaluation Rubric to pass the exam to demonstrate their ability to comprehend knowledge and conduct analytical inquiry.

**Findings (2017-2018) - Target: Met**
100% of the students who had taken the Qualifying Exam in AY 2017-2018 have passed the exam by obtaining a score of 10 or above in the core question and 28 or above on the research question.

**Findings (2016-2017) - Target: Met**
100% students of 2016 cohort who had appeared in the Qualifying Exam in August 2017 had passed the exam by obtaining a score of 10 or above on the Core Question Rubric, and a score of 28 or above on the Research Question Evaluation Rubric demonstrating their ability to
conceptualize, critically analyze, and present knowledge in an organized and cogent manner to emerge as highly informed 21st century skillful leaders.

**Findings (2015-2016) - Target: Met**
100% students of 2015 cohort have passed the Qualifying Exam, 2016.

**G 2: Student Competence**

Ensure quality learning environment that encourages the students to connect the concepts with practice and to use differing perspectives by engaging themselves in critical thinking, creative pursuits and collaborative problem solving relating to local and global contemporary issues.

**SLO 2: Understanding the major ethical issues and apply fair and equitable professional practices**

The students will be able to understand and exhibit the professional standards for responsible conduct of research in the discipline and comprehend the values and ethics for practicing the profession in society.

**Relevant Associations:**

**DSU Learning Goal Associations:**

5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.

**Strategic Plan Associations:**

- **College of Education, Health & Public Policy**
  1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies

- **Delaware State University**
  1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice

**Related Measures:**

**M 3: Preparation and submission of the IRB application**

After the completion of the research proposal, the students will prepare and submit an application to seek the IRB approval/exemption for responsible conduct of their research work to be eligible to achieve candidacy.

Source of Evidence: Academic direct measure of learning - other

**Target:**

After the successful proposal defense, 90% of the students will receive the IRB approval/exemption for their responsible conduct of research aligned with professional standards.

**Findings (2017-2018) - Target: Met**
100% students who had successfully defended their research proposal in AY 2017 - 2018 had submitted the IRB applications and have received approval/exemption as per their capstone options.
Findings (2016-2017) - Target: Met
100% students who had successfully defended their research proposal in AY 2016 - 2017 had submitted the IRB applications and had received approval/exemption for the responsible conduct of their research work by adopting fair and equitable professional practices.

Findings (2015-2016) - Target: Met
All the students who had successfully defended their research proposal in Fall 2015 - Spring 2016, and Fall 2016 - Spring 2017 had prepared and submitted their IRB applications and had received the IRB approval/exemption.

Findings (2014-2015) - Target: Met
All the students who had submitted IRB applications in 2014-2015 had received IRB approval for their research work.

SLO 5: Strategic inquiry and research based practices
The graduate students will be able to demonstrate their competence to conduct strategic inquiry and the application of data driven decision making through analytical review and scholarly writings.

Relevant Associations:

DSU Learning Goal Associations:
6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.

Strategic Plan Associations:
College of Education, Health & Public Policy
2.2 Cultivate an environment of academic and professional excellence
Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

Related Measures:

M 6: Final Capstone Defense
Doctoral students will demonstrate their written and oral communication skills, analytic inquiry, and information processing skills at the time of their final capstone defense as evaluated on the Graduate School's Report of Doctoral Capstone Outcomes.

Source of Evidence: Capstone course assignments measuring mastery

Target:
90% of the students who schedule their final capstone defense will receive an alternative of (a) or (b) by the Advisory Committee on the Graduate School's Report of Doctoral Capstone Outcomes to demonstrate their research competence.

Findings (2017-2018) - Target: Met
100% of the doctoral students who had scheduled their final capstone defense in AY 2017-2018 and successfully completed their defense and
had received an alternative of (a) or (b) by the Advisory Committee on the Graduate School's Report of Doctoral Capstone Outcomes.

**Findings (2016-2017) - Target: Met**
100% students who had scheduled their final capstone defense in AY 2016 - 2017 had successfully presented, defended and submitted their final capstone manuscript by receiving an alternative of (a) or (b) by the Advisory Committee on the Graduate School's Report of Doctoral Capstone Outcomes demonstrating their written and oral communication skills, analytic inquiry, and information processing skills to reflect their evidence-based research competence and professional practices.

**Findings (2015-2016) - Target: Met**
100% students who had scheduled their final capstone defense in Fall 2015, Spring 2016, Fall 2016 and Spring 2017 successfully presented and defended their research capstone.

**Findings (2014-2015) - Target: Met**
All the students of 2014 cohort were able to meet the Target set for this measure.

**G 3: High Quality Education Program**
Offer enriched curriculum and field experience that provide advanced knowledge and professional skills to prepare leaders for the 21st century who can solve life problems by connecting theory to practice through innovations.

**SLO 6: Offer enriched curriculum for successful outcomes**
To offer quality coursework, effective advisement and enriched field experience to the students to cultivate in a positive learning environment and to set-up high standard practices.

**Relevant Associations:**

**DSU Learning Goal Associations:**
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

**Strategic Plan Associations:**
Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

**Related Measures:**

**M 7: Education Graduate Programs Exit Survey**
Curricular changes are being constantly planned to enrich program curriculum. Since the students' input is a vital part of our program's evaluation process, their feedback is utilized to assess and improve the quality of the program. Program's effectiveness will be evaluated by the Education Graduate Programs Exit Survey and the results of this survey contribute to the overall program assessment to maintain the quality of our program.
Source of Evidence: Exit interviews with grads/program completers

**Target:**
80% of the students completing the exit survey at the time of their graduation will perceive (i.e. Strongly Agree or Agree) that they were offered enriched curriculum and were advised effectively through their coursework and field experience.

***Findings (2017-2018) - Target: Met***
100% of the students who have completed the Education Graduate Programs Exit Survey after their graduation in the reporting cycle 2017-2018 have perceive (i.e. Strongly Agree or Agree) that they were offered enriched curriculum and were advised effectively through their coursework and field experience.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Internship Experience**
As per the current cohort plan and the curriculum sequence sheet, the internship courses, i.e. EDUC 812 and 813 are offered in the Summer semester. Since the Reporting Cycle usually closes in the first week of June, it is not possible to report the data derived from the student’s internship experience. Keeping in view this factor and some other curricular considerations, it is being planned to make changes in the curricular sequence and to shift the internship courses to Spring semester. However, for the current cycle, the findings on this measure will be updated at the culmination of the internship experience by the end of the Summer semester.

**Established in Cycle:** 2017-2018  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Applied Administrative Experience (Activities/Project work)  
- **Outcome/Objective:** Demonstrate the ability to develop, articulate, and implement a vision of learning

**Implementation Description:** Working with the graduate faculty, the Director, Education Graduate Programs will plan and implement the curricular changes.  
**Responsible Person/Group:** The Director, Education Graduate Programs and the Graduate Faculty.

**Internship Experience**
As per the current cohort plan and the curriculum sequence sheet, the internship courses, i.e. EDUC 812 and 813 are offered in the Summer semester. Since the Reporting Cycle usually closes in the first week of June, the students are not able to prepare their internship portfolios and therefore, it is not possible to report the data.
derived from the student's rich internship experience.

Keeping in view this factor and some other curricular considerations, it is being planned to make changes in the curricular sequence and to shift the internship courses to Spring semester. However, for the current cycle, the findings on this measure will be updated at the culmination of the internship experience by the end of the Summer semester.

Established in Cycle: 2017-2018  
Implementation Status: Planned  
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Internship/Field Experience Portfolio | Outcome/Objective: Demonstrate the ability to develop, articulate, and implement a vision of learning

Implementation Description: The Education Graduate Programs will seek the active involvement of the Graduate Faculty
Responsibility Person/Group: The Director, Education Graduate Programs and the Graduate Education Faculty

Annual Report Section Responses

Executive Summary (1-2 pages)
For the cycle 2017 - 2018, four of the six objectives set for the program were Met. While one objective was reported as Partially Met, the remaining one was reported as Not Reported This Cycle (because as per the curriculum sequence, the required activities were not offered in AY 2017-2018 and will be offered to the students in Fall 2018).

Objectives Met:

Objective # 2: As reported in the findings for Measure - 3, 100% of the students who had successfully defended their research proposal in 2017-2018 had submitted the IRB applications and have received approval/exemption as per their capstone options, demonstrating their understanding of the values and ethics of practicing the profession in society.

Objective # 4: 100% of the students who had taken the Qualifying Exam in AY 2017-2018 have successfully completed the exam demonstrating their ability to conceptualize, critically analyze, and present knowledge in an organized and cogent manner.

Objective # 5: 100% of the students who had scheduled their final capstone defense in AY 2017-2018 successfully presented and defended their final capstone manuscript, thereby demonstrated their efficient oral and written communication skills.

Objective # 6: 100% of the students who have completed the Education Graduate Programs Exit Survey after their graduation in the reporting cycle 2017-2018 have perceive (i.e. Strongly Agree or Agree) that they were offered enriched curriculum and were advised effectively through their coursework and field experience.
Partially Met

Objective # 1:
Measure-1: As per their cohort plan and the curriculum sequence sheet, all the Ed. D. students of 2016 cohort are working on their internship during Summer 2018. They will complete their internship by the end of summer semester. The findings of this measure will be updated accordingly.

Measure-2: As per their cohort plan and the curriculum sequence sheet, all the Ed. D. students of 2016 cohort are working on their internship during Summer 2018. They will complete their internship portfolio by the end of summer semester. The findings of this measure will be updated accordingly.

Not Reported This Cycle

Objective # 3: As per the approved new curricular changes in the program, the sequence of the course had undergone a change. Now EDUC 809 will be offered to the students of 2016 cohort in Fall 2018. The data will be then reported accordingly.

Unit(s) Profile

Unit(s) Initiatives accomplished in this cycle
Initiatives accomplished in this cycle:

- Ed. D. in K-12 Program curriculum revised;
- CAEP approved assessments were aligned with the relevant professional standards, and the endeavor was also made to establish their interrater reliability.
- Internship assessments and rubrics for Ed. D. in Higher Ed. have been introduced.
- SPA report was completed
- Worked on the Self-study report

Unit(s) Honors/Awards and Achievements

Program Achievements:
(i) 15 doctoral students received their doctoral degrees in AY 2017-2018.
(ii) 77.78% of the students from 2015 Ed. D. cohort graduated on time as per their curriculum plan and received their degrees.
(iii) One of the doctoral students, Mr. Abdullah Muhammad, had presented his research on the Annual Research Day 2018.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.
Strategic Goal. Student Success: The Graduate Program will produce graduates who are critical thinkers with an ability to conceptualize, analyze and present research in a
cogent manner that prepares them as transformative leaders. Data will be collected on
the following:

(i) Students' comprehensive knowledge and analytical writing skills will be assessed
through their performance in the Qualifying Exam, as evaluated by using the Qualifying
Exam Rubrics.

(ii) The students' research abilities and interpretative skills will be assessed through
their final capstone presentation by utilizing the capstone outcomes measuring rubrics.

(iii) Student success will also be measured through the student retention and the
program completion rate.

"KPI # 1 and #10". Note: This section refers to undergraduates and their
participation in undergraduate research, study abroad, service learning,
internships, experiential learning and sustainability activities and courses. You
must upload IRPA spreadsheet in the Document Management section and connect
to this section of the Program Annual Report.

Not Applicable.

Closing the Assessment Loop: Please share one or two prime examples of your
unit's assessment activities. A complete assessment report is due October 30th
and should be reported for each measure in WEAVE under Findings and Action
Plans.  a) List one or two examples of how the unit used assessment
results/findings to plan changes (initiatives) designed for improvements?  b) Have
these changes been implemented? If not, when will they be implemented?  c) When
does the unit plan to conduct the assessments again to ascertain whether or
not these changes (initiatives) have made a difference?

Assessment Activity: Final Capstone Presentation & its Defense

(a) To diversify the research options for the students of the two concentrations, new
capstone alternatives i.e. the Case Study Analysis and the Project Study were
introduced in 2016 to effectively evaluate the students' research competence to connect
theory with practice.

(b) The rubrics were developed and utilized in 2017 to assess the students' final
capstone performance. It was observed that the Case Study Analysis rubric was not
meeting the CAEP's rubric sufficiency requirements.

(c) The rubric is being revised to increase and sustain excellence in scholarly and
creative research. Its interrater reliability will be established on the Data Days in Fall
2018 to meet the CAEP sufficiency level. The revised rubric is expected to be ready to
be utilized to evaluate the final capstone presentations in Spring 2019.

Bibliography of Scholarly Products published in 2017-2018 by unit members.
Colleges should just list the number of publication listed by the departments.

Undergraduate Program Information: Please use the Excel template (sent by email)
for reporting details about each undergraduate program in your department. Submit
data for each program as separate rows in the spreadsheet and include the
Department Name in the top section. You must upload the spreadsheet in the
Document Management section, connect to this section, and state “see attached”
below.

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Success
Offer such learning opportunities that support students' progress and promote achievement, academic excellence and prepare the students as transformational and impactful leaders at building level to contribute to a dynamic diverse society.

SLO 1: Demonstrate the ability to develop, articulate, and implement a vision of learning
Candidates will be able to demonstrate the ability to develop, articulate, implement and promote a vision of learning for educational institutions at building level.

Relevant Associations:

DSU Learning Goal Associations:
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Strategic Plan Associations:
College of Education, Health & Public Policy
2.1 Students are provided with leadership opportunities through course work and academic governance
Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally

Related Measures:

M 1: Comprehensive Examination
The Comprehensive Exam is a capstone requirement designed to provide the students an opportunity to demonstrate their ability to conceptualize, critically analyze and present knowledge in an organized and cogent manner. It is a measure of a student's ability to think theoretically and analytically to articulate and implement a vision of learning. The responses of the students will be evaluated by the Comprehensive Exam Rubric.

Source of Evidence: Comprehensive/end-of-program subject matter exam

Target:
90% of the students taking this exam will score 8 or above on the Comprehensive Examination Rubric in each of the 6 questions to pass the Exam to demonstrate their ability to think critically and analytically.
Findings (2017-2018) - Target: Met
100% of the students of M. Ed. 2016 cohort who had taken the Comprehensive Exam had successfully passed the exam by obtaining a score of 8 or above on all the six sections of the exam demonstrating their ability to think critically and analytically.

Findings (2016-2017) - Target: Met
100% of students of 2015 cohort who had taken the Comprehensive Exam in Spring 2017 had passed the exam by scoring 8 or above on the Comprehensive Exam evaluation rubric in each of the 6 questions of the exam demonstrating their ability to conceptualize, critically analyze and present knowledge in an organized and cogent manner to articulate, and implement a vision of learning.

Findings (2015-2016) - Target: Met
100% students have passed the Comprehensive Exam in Spring 2016.

Findings (2014-2015) - Target: Met
All the students had successfully met the target set for this measure.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Comprehensive Exam
Established in Cycle: 2015-2016
One student, though he passes in sections D, E, and F, but couldn't pass the exam in sections A, B, and C. He has been afforded ...

SLO 2: Ability to integrate knowledge and technology to enhance student learning
The students will be able to develop high order analytical thinking abilities and demonstrate ability to effectively integrate emerging technology applications for planning and managing information from a practitioner's point of view.

Relevant Associations:

DSU Learning Goal Associations:
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

Strategic Plan Associations:
College of Education, Health & Public Policy
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy
Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
Related Measures:

M 2: Successful performance in the course: Using technology to enhance student learning
As a part of their program requirement, the students will successfully complete EDUC 683 (Using Technology to Enhance Student Learning) to demonstrate their ability to integrate knowledge and technology to ensure their professional and academic success. The students will be assessed as per the grading policy specified in the course syllabus.

Source of Evidence: Writing exam to assure certain proficiency level

Target:
80% of the students will complete the course and attain a grade of B or above as per the grading policy specified in the syllabus to demonstrate their ability to integrate knowledge and technology to ensure their academic and professional growth.

Findings (2017-2018) - Target: Met
100% students who had completed the course EDUC 683 in Fall 2017 had obtained a grade of B or above as per the grading policy specified in the syllabus thereby demonstrating their ability to integrate knowledge and technology to ensure their academic and professional growth.

Findings (2016-2017) - Target: Met
100% students who completed the course EDUC 683 in 2016-2017 had attained a grade of B or above as per the grading policy specified in the syllabus demonstrating their ability to integrate knowledge and technology to ensure their professional and academic success.

Findings (2015-2016) - Target: Met
100% students of 2014 cohort completed the PowerPoint Project in EDUC 683 in Fall 2015 and attained a Target or Acceptable level on the project rubric.

100% students of 2015 cohort completed the PowerPoint Project in EDUC 683 in Fall 2016 and attained a Target or Acceptable level on the project rubric.

G 2: Student Competence
Provide quality learning experiences that equip the students with the skills to connect the concepts with practice and to use differing perspectives by engaging themselves in critical thinking, creative ideas and collaborative problem solving related to local and national contemporary issues.

SLO 3: Ability to think critically to solve problems by using information effectively
Demonstrating intellectual curiosity and evidence based decision making, the students will be able to think critically and solve problems in field-setting and execute an action-research project to support data-based decision making.

Relevant Associations:
DSU Learning Goal Associations:
7 GR Student Learning Goal: All graduate students will be effective problem-solvers; demonstrating the ability to think critically, use information effectively and work collaboratively.

Strategic Plan Associations:
College of Education, Health & Public Policy
2.3 Students are provided with the opportunity to obtain professional experience in research, policy and advocacy
Delaware State University
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

Related Measures:

**M 3: Portfolio Development and Presentation**
The overall internship experience represents a synthesis of key content and high impact field-based experiences extended over time that result in the intern's demonstration of professional knowledge, skills, and dispositions articulated in the ELCC Building Level Standards 2011, and, most importantly, intern's success in improving student achievement within a school. Designed as a Professional Growth Plan and Clinical Internship, this experience is intended to evaluate the candidates in the areas of leadership application, general operations and resource management to determine the development of the candidate's professional growth. The candidates are required to complete field-based activities and document their internship experiences in the shape of an internship portfolio and present it before a committee of selected faculty members. The portfolio contains candidates' reflective narratives, different plans and tools candidates developed in the field, and other creative reports that may include audio, visuals, candidate developed web based materials etc. The Internship Presentation Rubric will be utilized to evaluate the portfolio presentations on Audience Engagement, Poise, Enthusiasm, Articulation, Subject Knowledge, Organization, Mechanics, Technology, and Integration.

Source of Evidence: Presentation, either individual or group

**Target:**
75% of the students will prepare and present the portfolio and attain Target or Acceptable scores on the Portfolio Presentation Rubric to demonstrate their ability to synthesize the key content and high impact field-based experiences extended over time.

**Findings (2017-2018) - Target: Partially Met**
As per the curriculum sequence, the students are currently completing their internship activities in Summer 2018 and will be preparing and presenting their internship portfolio on the completion of the course by the end of the Summer semester. These findings will be updated later on accordingly. That's why the Target has been reported as Partially Met at this stage.

**Findings (2016-2017) - Target: Met**
Out of the 4 students enrolled for internship, 3 students i.e. 75% of the students successfully prepared and presented the portfolio and attain Target or Acceptable scores on the Portfolio Presentation Rubric.
demonstrating their ability to think critically to solve the problems to improve student achievement within a school.

**Findings (2015-2016) - Target: Met**
100% students of 2014 cohort successfully completed their internship during Summer-I and II, 2016 and Fall 2016.

**Findings (2014-2015) - Target: Met**
All the students had successfully met the target set for this measure.

**Related Action Plans (by Established cycle, then alpha):**

**SLO 4: Understanding the major ethical issues and apply fair and equitable professional practices**
The students will be able to understand and exhibit professional attitudes, values, commitments and professional ethics for practicing the profession in society.

**Relevant Associations:**

**DSU Learning Goal Associations:**
5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.

**Strategic Plan Associations:**
*College of Education, Health & Public Policy*
1.5 Educational programs provide training on the professional values and ethical standards identified by their professional organizations and accrediting bodies

*Delaware State University*
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice

**Related Measures:**

**M 4: Professional dispositions and successful completion of internship**
Successful completion of 240 hours of internship will help the students to develop as leaders who demonstrate ethical practices, professional dispositions and skills by undertaking collaborative activities and projects to shape the
educational environment in K-12 and higher education settings. The students will be administered Graduate Professional Disposition Rubric to assess their professional dispositions on the rubric elements: Professionalism; Vision; Decision-making; Adaptability; Considerations; and Attitude.

Source of Evidence: Field work, internship, or teaching evaluation

**Target:**
90% of the students who will successfully complete the internship experience will obtain Target or Acceptable scores on the Graduate Professional Disposition Rubric to demonstrate ethical practices, professional dispositions and skills.

**Findings (2017-2018) - Target: Partially Met**
As per the curriculum sequence, the students are currently completing their internship experience in Summer 2018 and will be completing their internship hours and activities by the end of the Summer semester. They will be evaluated by the site and university supervisors for their professional dispositions. The findings of this measure will be reported later on accordingly. That's why the Target has been reported as Partially Met at this stage.

**Findings (2016-2017) - Target: Met**
100% students who had successfully completed the internship experience in Summer 2017 had obtained Target or Acceptable scores on the Graduate Professional Disposition Rubric. While undertaking collaborative activities and projects, the students demonstrated their understanding of the major ethical issues, and fair & equitable professional practices.

**Findings (2015-2016) - Target: Met**
100% students of 2014 cohort successfully completed their internship during Summer I and II, 2016, and Fall 2016.

**Findings (2014-2015) - Target: Met**
100% students successfully completed the internship experience and obtained Target or acceptable scores on the Graduate Professional Disposition Rubric.

Delaware State University
1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics

**Related Measures:**

**M 5: Education Graduate Programs Exit Survey**
Curricular changes are being constantly planned to enrich program curriculum. Since the students’ input is a vital part of our program's evaluation process, their feedback is utilized to assess and improve the quality of the program. Program's effectiveness will be evaluated by the Education Graduate Programs Exit Survey and the results of this survey contribute to the overall program assessment to maintain the quality of our program.

Source of Evidence: Exit interviews with grads/program completers

**Target:**
80% of the students completing the exit survey at the time of their graduation will perceive (i.e. Strongly Agree or Agree) that they were offered enriched curriculum and were advised effectively through their coursework and field experience.

**Findings (2017-2018) - Target: Met**
100% of the students who completed the exit survey after their graduation had marked the options of Strongly Agree or Agree in the survey indicating that they were offered enriched curriculum and were advised effectively through their coursework and field experience.
Findings (2016-2017) - Target: Met
100% students who completed this survey perceived (Strongly Agree or Agree) that they were offered enriched curriculum, prepared and advised effectively through their coursework and field experience.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Comprehensive Exam
One student, though he passes in sections D, E, and F, but couldn't pass the exam in sections A, B, and C. He has been afforded an opportunity to reappear.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Comprehensive Examination | Outcome/Objective: Demonstrate the ability to develop, articulate, and implement a vision of learning

Implementation Description: Reappear in the Comprehensive Exam.
Projected Completion Date: 06/21/2016
Responsible Person/Group: Director, Education Graduate Programs and the examiners.
Additional Resources Requested: No additional resources are required.

Incomplete Contract
Under the supervision of the course professor, one student is working on the portfolio and will be completing and presenting it in Fall 2017.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Portfolio Development and Presentation | Outcome/Objective: Ability to think critically to solve problems by using information effectively

Implementation Description: Working toward completing the Incomplete contract.
Projected Completion Date: 12/01/2017
Responsible Person/Group: The course professor and the concerned student.
Additional Resources Requested: None.

Internship Experience and Professional Dispositions
As per the current cohort plan and the curriculum sequence sheet, the internship course EDUC 690 is offered in the Summer semester. Since the Reporting Cycle usually closes in the first week of June, the students are not able to derive the full benefit of this experience to emerge as transformational leaders who demonstrate ethical practices, professional dispositions and skills by undertaking collaborative
activities and projects to shape the educational environment in K-12 and higher education settings. Apart from this, it is not possible to report the data derived from the student's rich internship experience.

Keeping in view this factor and some other curricular considerations, it is being planned to make changes in the curricular sequence and to shift the internship courses to Spring semester. However, for the current cycle, the findings on this measure will be updated at the culmination of the internship experience by the end of the Summer semester.

Established in Cycle: 2017-2018
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- **Measure:** Professional dispositions and successful completion of internship
- **Outcome/Objective:** Understanding the major ethical issues and apply fair and equitable professional practices

Implementation Description: The curricular sequence change will be made in consultation with the Graduate Faculty.

Responsible Person/Group: Director, Education Graduate Programs and the Graduate Faculty.

**Internship Portfolio & its presentation**
As per the current cohort plan and the curriculum sequence sheet, the internship course EDUC 690 is offered in the Summer semester. Since the Reporting Cycle usually closes in the first week of June, the students are not able to prepare and present their internship portfolios and therefore, it is not possible to report the data derived from the student's rich internship experience.

Keeping in view this factor and some other curricular considerations, it is being planned to make changes in the curricular sequence and to shift the internship courses to Spring semester. However, for the current cycle, the findings on this measure will be updated at the culmination of the internship experience by the end of the Summer semester.

Established in Cycle: 2017-2018
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- **Measure:** Portfolio Development and Presentation
- **Outcome/Objective:** Ability to think critically to solve problems by using information effectively

Implementation Description: The curricular sequence of EDUC 690 will be changed in consultation with the graduate faculty.
Responsible Person/Group: Director, Education Graduate Programs and the Graduate Faculty

Annual Report Section Responses

Executive Summary (1-2 pages)
For the cycle 2017 - 2018, three of the five objectives set for the program were Met while two objectives were reported as Partially Met because as per the curriculum sequence, the required activities have not taken place so far.

Objectives Met:
Outcome/Objective 1: 100% of the students of M. Ed. 2016 cohort who had taken the Comprehensive Exam had successfully passed the exam by obtaining a score of 8 or above on all the six sections of the exam demonstrating their ability to think critically and analytically.

Outcome/Objective 2: 100% students who had completed the course EDUC 683 in Fall 2017 had obtained a grade of B or above as per the grading policy specified in the syllabus thereby demonstrating their ability to integrate knowledge and technology to ensure their academic and professional growth.

Outcome/Objective 5: 100% of the students who completed the exit survey after their graduation had marked the options of Strongly Agree or Agree in the survey indicating that they were offered enriched curriculum and were advised effectively through their coursework and field experience.

Partially Met
Outcome/Objective 3: As per the curriculum sequence, the students are currently completing their internship activities in Summer 2018 and will be preparing and presenting their internship portfolio on the completion of the course by the end of the Summer semester. These findings will be updated later on accordingly. That's why the Target has been reported as Partially Met at this stage.

Outcome/Objective 4: The students of 2016 cohort are currently completing their internship experience in Summer 2018 and will be completing their internship hours and activities by the end of the current Summer semester. At the culminating phase of their internship experience, they will be evaluated by the site and university supervisors for their professional dispositions. The findings of this measure will be reported later on accordingly. That's why the Target has been reported as Partially Met at this stage.

Unit(s) Profile
PROGRAM FACULTY PROFILE
Program's distinguished faculty members include nationally and internationally known authors, researchers, and academicians. The faculty members have achieved notable distinction in their respective fields. The faculty combines academic expertise with direct experiences in the field of education. Their knowledge, skills, and experience enable them to offer practical guidance and mentorship, helping students adapt to the professional world and make wise career choices.
Program Faculty:
Dr. Joseph Falodun, Associate Professor
Dr. Chandra Aleong, Associate Professor
Dr. Elaine Marker, Associate Professor
Dr. Nirmaljit K. Rathee, Professor
Dr. Richard Phillips, Associate Professor
Dr. Chetanath Gautam, Assistant Professor
Dr. Kim K Keun, Associate Professor
Dr. Sae Yeol Yoon, Assistant Professor

Name: Dr. Joseph O. Falodun, M.S., Ph.D.
Rank: Associate Professor

- National Association for the Education of Young Children (NAEYC)
- Association for Childhood Education International (ACEI), Chair-
- Korean SIF, Board member - Research Committee
- Organisation Mondiale pour l’Education Prescolaire (OMEP-USA)
- Korean-American Early Childhood Educational Researchers Association (KECERA), President
- Pacific Early Childhood Education Research Association (PECERA)
- Korean Association of Child Studies (KACS)
- The Korea Society for Early Childhood Education (KSECE).

Unit(s) Initiatives accomplished in this cycle

- Comprehensive revision of Comp Exam rubric and the alignment of the other rubrics with professional standards
- Revision of course syllabi and alignment with professional standards
- Completion of the SPA report
- Completion of the Self-study

Unit(s) Honors/Awards and Achievements

Students' Achievements:

- 100% of the students from 2016 M. Ed. cohort graduated on time as per their curriculum plan and received their degrees.
One of our M. Ed. students Kyle Sheppard honored with Biden Courage Award.

Kyle Sheppard had presented research at the DSU Annual Research Day

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

Not Applicable

Closing the Assessment Loop: Please share one or two prime examples of your unit's assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.  

a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  
b) Have these changes been implemented? If not, when will they be implemented?  
c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Assessment Activity: Comprehensive Exam

(a) Our comprehensive exam is an evaluation that measures the student's competency and acts as a verification that students are well prepared and thoroughly grounded in their field of study. The responses of the students were being evaluated by using the Comprehensive Exam Rubric.

(b) While examining this rubric through CAEP friendly lens, it was noticed that it requires comprehensive revision to meet the rigors of CAEP requirement. Consequently, it is being comprehensively revised.

(c) It will be ready to be used by the time next Comprehensive Exam is to be conducted in Spring 2019 and at that stage, it will be evaluated if the revision of the rubric has achieved the desired results by establishing its validity and reliability.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

Not Applicable

For graduate program annual reports TABLE 1: Admissions Data: Please upload complete Table 1 for Academic Years 2015-2018 in the Document Management section and connect to this section of the Annual Report.

Please find Table - I pertaining to M. Ed. Admission Data uploaded with the report.
For graduate program annual reports TABLE 2: Graduate Student Enrollment by Program. Please upload Table 2 for Academic Years 2015-2018 in the Document Management section and connect to this section of the Annual Report (see template from SGS&R) and provide a narrative here regarding your student admission profile (Table I) and student performance over the last 3 years (AY 2015-AY2018)

Table -II has been uploaded.

For graduate program annual reports: TABLE 3: Graduate Student Engagement/Productivity: Please report the number of graduate students engaged in each activity in 2015-2018 in the Document Management Section and connect to this section of the Annual Report. (See template from SGS&R)

Table -III has been uploaded.

For graduate program annual reports TABLE 4: Graduate Student Information. For each activity indicated in TABLE 3, please provide student contact information along with faculty advisor/supervisor (See template from SGS&R). Upload in the Document Management section and connect to this section of the Annual Report. If the student has received gainful employment or a promotion during their graduate enrollment at DSU, please indicate this information in the space provided. If the student is matriculating into another graduate or professional program, please indicate the program, institution and enrollment term. If your activity required a field supervisor (rather than a faculty advisor), please note this in the comment section.

Table -IV has been uploaded.
Goals without Outcome/Objective Relationships Specified

G 8: Learning Differences
The student will understand, recognize, and plan for learning differences and diverse needs.

Education Department Goal 7: Acknowledge the value of diversity and diverse cultures in Education
Education Department Outcome 6: Acknowledge the value of diversity and diverse cultures in Education

Associated Goals

InTASC Standard #2: Learning Differences. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Content area knowledge
Students will develop comprehensive knowledge in the four major content areas required of elementary education teachers. using connections such as digital learning opportunities and other content areas such as the fine and performing arts.
Related to Education Department Goal 1: To design recognized, comprehensive, innovative programs

SLO 1: Reading / Language Arts Content Knowledge
The elementary education candidate will demonstrate a high level of competence in use of English language arts and they know, understand, and use concepts from reading, language and child development, to teach reading, writing, speaking, viewing, listening, and thinking

CAEP K-6 Elementary Teacher Standards

2. a - Candidates demonstrate and apply the elements of literacy (phonological awareness; phonics; comprehension; fluency; vocabulary; critical thinking; and writing) critical for
purposeful print or digital communication, as presented in the rationale for the CAEP Literacy Content for Elementary (K-6) Teachers.

InTASC Standard #4: Content Knowledge. The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

InTASCStandard #5: Application of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Relevant Associations:

**Common Core State Standards**

The Common Core State Standards were created to ensure that all students graduate from high school with the skills and knowledge necessary to succeed in college, career, and life, regardless of where they live. Forty-three states, the District of Columbia, four territories, and the Department of Defense Education Activity (DoDEA) have voluntarily adopted and are moving forward with the Common Core (CCSS, 2010). All educators must have a deep understanding of these standards. Preparation of teachers in any area must include developing a working knowledge of the CCSS.

English Language Arts Standards: The Common Core State Standards for English Language Arts & Literacy in History/Social Studies, Science, and Technical Subjects (“the standards”) represent the next generation of K-12 standards designed to prepare all students for success in college, career, and life by the time they graduate from high school.
The Common Core asks students to read stories and literature, as well as more complex texts that provide facts and background knowledge in areas such as science and social studies. Students will be challenged and asked questions that push them to refer back to what they've read. This stresses critical-thinking, problem-solving, and analytical skills that are required for success in college, career, and life.

The standards establish guidelines for English language arts (ELA) as well as for literacy in history/social studies, science, and technical subjects. Because students must learn to read, write, speak, listen, and use language effectively in a variety of content areas, the standards promote the literacy skills and concepts required for college and career readiness in multiple disciplines.

The College and Career Readiness Anchor Standards form the backbone of the ELA/literacy standards by articulating core knowledge and skills, while grade-specific standards provide additional specificity. Beginning in grade 6, the literacy standards allow teachers of ELA, history/social studies, science, and technical subjects to use their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields.

It is important to note that the grade 6-12 literacy standards in history/social studies, science, and technical subjects are meant to supplement content standards in those areas, not replace them. States determine how to incorporate these standards into their existing standards for those subjects or adopt them as content area literacy standards.

The skills and knowledge captured in the ELA/literacy standards are designed to prepare students for life outside the classroom. They include critical-thinking skills and the ability to closely and attentively read texts in a way that will help them understand and enjoy complex works of literature. Students will learn to use cogent reasoning and evidence collection skills that are essential for success in college, career, and life. The standards also lay out a vision of what it means to be a literate person who is prepared for success in the 21st century.

Mathematics Standards: For more than a decade, research studies of mathematics education in high-performing countries have concluded that mathematics education in the United States must become substantially more focused and coherent in order to improve mathematics achievement in this country. To deliver on this promise, the mathematics
standards are designed to address the problem of a curriculum that is "a mile wide and an inch deep."

These new standards build on the best of high-quality math standards from states across the country. They also draw on the most important international models for mathematical practice, as well as research and input from numerous sources, including state departments of education, scholars, assessment developers, professional organizations, educators, parents and students, and members of the public.

The math standards provide clarity and specificity rather than broad general statements. They endeavor to follow the design envisioned by William Schmidt and Richard Houang (2002), by not only stressing conceptual understanding of key ideas, but also by continually returning to organizing principles such as place value and the laws of arithmetic to structure those ideas.

In addition, the "sequence of topics and performances" that is outlined in a body of math standards must respect what is already known about how students learn. As Confrey (2007) points out, developing "sequenced obstacles and challenges for students…absent the insights about meaning that derive from careful study of learning, would be unfortunate and unwise." Therefore, the development of the standards began with research-based learning progressions detailing what is known today about how students' mathematical knowledge, skill, and understanding develop over time. The knowledge and skills students need to be prepared for mathematics in college, career, and life are woven throughout the mathematics standards. They do not include separate Anchor Standards like those used in the ELA/literacy standards.

The Common Core concentrates on a clear set of math skills and concepts. Students will learn concepts in a more organized way both during the school year and across grades. The standards encourage students to solve real-world problems.

Understanding Mathematics

These standards define what students should understand and be able to do in their study of mathematics. But asking a student to understand something also means asking a teacher to assess whether the student has understood it. But what does mathematical understanding look like? One way for teachers to do that is to ask the student to justify, in a way that is appropriate to the student's mathematical maturity, why a particular mathematical statement is true or where a mathematical rule comes from. Mathematical understanding and
procedural skill are equally important, and both are assessable using mathematical tasks of sufficient richness.

The InTASC standards stress that teachers build literacy and thinking skills across the curriculum [and] help learners address multiple perspectives in exploring ideas and solving problems.

2.2 Cultivate an environment of academic and professional excellence
2.5 Develop and/or expand student recruitment and retention strategies
3.3 Faculty are engaged in scholarship and/or research
3.5 Faculty provide high quality advising and mentoring

**Related Measures:**

**M 1:Praxis II: Elementary Education Content Knowledge**
Delaware has changed the required Praxis II for Elementary Education candidates although the subject matter remains the same. The new Praxis II exam, Elementary Education: Multiple Subjects (5031), is a more rigorous exam that is structured to have four subtests instead of four sections of the same test. In the past candidates only had to earn an overall passing of 151. Currently, candidates must pass each of the four subtests by meeting the cut score for each subject. The Multiple Subject Praxis has not been administered long enough to know how well students are doing on the test. Many students still do not report scores to DSU until they pass. However, our Praxis assistance program, funded by Title III, has been able to fund exam fees for a greater number of students, so the data we receive is more likely to reflect a more accurate picture of how students fare. This information will be invaluable in revealing patterns of errors that could uncover areas of program weakness. We anticipate that the Elementary Education Program will be able to learn from analysis of unsuccessful attempts on Praxis II to improve the program.

Additionally, a curriculum change has been approved that requires Elementary Education majors to take both American History to 1865 and from 1865. Students have traditionally had the most difficulty with the Social Studies subtest. Since American History comprises 30% of the Praxis II Social Studies subtest, this curriculum change should result in better success on the Social Studies subtest.

We are now providing Plato Web, a revised and retooled web based Praxis preparation program that makes use of updated technology to deliver an engaging product that provides users with feedback in real time that allows students to receive feedback and work on correcting their mistakes. Plato Web provides practice for elementary majors in the four major content areas.

Mr. Ricky Hardy, our Praxis Coordinator, has been instrumental in strategizing for improvement in Praxis scores. Through analysis he saw a connection between Core Praxis Math and Praxis II Math for Elementary (5003). He has encouraged elementary students to take 5003 right after passing Core Praxis with promising results. Because all the elementary Praxis II tests are content-based rather than pedagogy-based, three of the tests do not require students to take the methods classes before taking the elementary content tests. The only elementary Praxis II test that requires a methods course to gain the appropriate content knowledge is the Reading/ Language Arts Praxis (5002). This subject matter test has some specialized knowledge related to teaching pedagogy that is taught in EDUC 335 Developing Reading in Elementary School. The course also provides content needed for the Early Childhood Praxis II.

Presently, I have no access to Praxis II data.

Source of Evidence: Certification or licensure exam, national or state

Connected Document
Praxis II Elementary Education Data

**Target:**
All Elementary candidates (100%) will achieve a passing score on the Reading/Language Arts Subtest (165) of the Elementary Education: Multiple Subjects (5031).

**Findings (2015-2016) - Target: Not Met**
There has been no improvement in the pass rate for the Reading / ELA Praxis II subtest (5002). In fact, the pass rate has decreased slightly. However, the test has also changed. I took the 5002 test. The major difference is that the test longer 80 questions in a 90 minute time frame, increased from 50 questions in a 60 minute time frame. Although the topics have not changed, the distribution of questions from 50% reading /50% writing, speaking, and listening to a 47%/53% split. I have not had access to the subtest data yet to determine if the distribution change explains the decrease in pass rate.

**Findings (2011-2012) - Target: Met**
For the current academic year, 2011-2012, sixteen students passed Praxis II, Elementary Content Areas. All 16 of these students showed mastery of the Reading/Language Arts content. Eight of these students taught in either spring or fall of the 2011-2012 academic school year. Seven of the sixteen are scheduled to student teach in Fall 2012. The remaining student will student teach in Spring 2013 in order to complete courses outside the Elementary Education major. Only one student scheduled to student in Fall 2012 has not taken the Praxis II; the student must take and pass the exam in order to student teach.

**Findings (2010-2011) - Target: Met**

Reading / Language Arts Content Knowledge
Means Scores /Year
2008 22.5/30
2009 18.5/30
Total Mean Score: 21.17

Add Program Assessment

Established in Cycle: 2015-2016

My plan is to add a Program Assessment to EDUC 335 to better track acquisition of this content knowledge. I have primarily focus...

M 2: Grade Point Averages for Content Knowledge

Evidence of content knowledge in each of the seven areas required for Elementary Education majors consists of sets of grades that apply to each of the seven content areas. Grades from courses required of every elementary education major are the only grades reported in this assessment. All data is drawn from the most recent of available sources and includes only program completers.

1. Reading, Writing and Oral Language, is clearly the most expansive content area because Language Arts requires that the processes of reading, writing, speaking, listening, and viewing all be addressed. Thus, courses were selected that expressly address each of these components. Composition I and II (ENGL 101, ENGL 102) were necessary to include because these courses are designed to develop skills and competence in writing prose compositions, reading, and listening. Problems in logical thought, organization of ideas, and comprehension in reading also receive special attention. Speech (ENGL 200) is included because it provides the fundamentals of effective oral expression. Developing Reading in Elementary School (EDUC 335) and Integrating Children's Literature through Language Arts (EDUC 340) are the first two courses required in the Elementary Education literacy block.

2. Science has several contributing to content knowledge. Our elementary education candidates have a sound general education background in science with the required courses, BIOL-110 Essential Topics in Biology (4 credit hours), PSED 201 Physical Science Survey, and PSED 207 Earth/Space Science. Their experience is rounded out with EDUC 331a Elementary Science Methods.

3. Elementary Education majors will begin the mathematics sequence with MTSC 100 starting in Fall 2017 to assist them in passing Core Praxis Mathematics and Praxis II Mathematics subtest. If they pass the Core Praxis test they may take a mathematics elective in spring of the freshman year. If the Praxis test has not been passed, they may choose from MTSC 107, 108, or 109 for mathematics. In the Fall Sophomore semester, students will take MTSC 205 Math for Teachers I.

4. Social Studies, is another expansive standard because so many disciplines are integrated into the teaching of Social Studies. Our candidates are required to take the following general education courses contributing to their content knowledge: HIST 201 American History to 1865 or HIST 203 African American Experience to 1865, and GEOG 201 World Geography. Beginning in the 2009-10 academic year, students will no longer be able to substitute African American Experience for American History in the pursuit of an education degree. Additionally, our candidates are required to take EDUC 318 Multicultural Education, which also satisfies the University's requirement for Global Societies. Elementary Education candidates also take EDUC 303 Methods of Teaching Social Studies in Elementary and Middle Schools.

5. Candidates must take Introduction of Art (ART 101) or Music (MUSC 101) to gain an appreciation of those disciplines and understand the nature of the content in each discipline. The choice of Integrating the Visual Arts into
Elementary Education (ART 201) or Integrating Music into Elementary Education (MUSC 201) offer the basic methodologies of art and music that are appropriate for integrating art and music in elementary school. Although candidates are required to construct a unit of instruction in these courses, there is no field experience attached to either course.

6. One of the first courses all University students are required to take is Lifetime Fitness and Wellness (MVSC100), which teaches the concepts of wellness, including good nutrition and concepts for maintaining fitness. The course also includes HIV/AIDS awareness as well as drug abuse prevention.

7. In addition to Lifetime Fitness and Wellness, elementary education candidates are required to have Motor Development/Movement Education for Children 0-8 (EDUC 257), which focuses on understanding motor development and fine and gross body movement, as well as adaptations for children who are developmentally delayed.

**M 5: Integrated Literacy Lesson Set**

The Integrated Literacy Lesson Set is an assignment specifically for the Elementary Education Program. This assignment, completed in Integrating Reading Methods Through Elementary Curriculum, draws upon the candidate’s ability to use one text upon which to base plans for four literacy lessons, a word study lesson, a fluency lesson, a comprehension lesson, and a writing lesson. Candidates write these lessons using the Professional Education Unit (PEU) lesson plan format. The purpose of this assessment is to provide evidence of the candidate’s ability to motivate students to engage in reading, writing, and oral language for personal growth, knowledge development, and enjoyment through thoughtful and well-constructed literacy planning that integrates the language arts in a meaningful way. For this assignment, students are required to use authentic text. Typically, Integrating Reading Methods Through Elementary Curriculum is taken in the last semester before Elementary Education candidates student teach. Thus, the expectation is that candidates will display a high level of proficiency in lesson planning. Although these lessons are taught in class microteaching sessions, they are not taught in the early field placement. However, candidates are required to plan parallel lessons using the curricular materials supplied by the school. At least one of these lessons will be observed and evaluated by the course instructor. This adjustment was necessary due to
the number of schools in the area implementing Reading First curriculum, specifically scripted lessons and phonetically based guided reading materials in the primary grades.

As of Fall 2011, we are trying to have students teach as many of these lessons as possible in a classroom instead of planning parallel lessons. This limits the students' flexibility and variety in reading material because they are required to teach only district curriculum. The lesson plan rubrics may require revision to account for this change in planning expectations. While this limits students in planning, it allows the students to engage in more classroom instruction.

Integrated Literacy Lesson Set (ILLS):

After studying the data for the ILLS, I have several observations.

1. The assignment is no longer integrated. In order to make it possible to teach the lessons in a classroom during practicum. It has become quite difficult to find teachers that will allow students to teach these lessons. Literacy lessons are predominantly taught directly from the manual. In Capital School District, most reading lessons are semi-scripted. It seems that the best opportunity to plan integrated lessons would be combine literacy and a content area, such as social studies or science. I plan to talk to some of the teachers I have worked with to figure out what would fly in most districts. I have to add that the type of planning and teaching I am talking about is absolutely congruent with the intent and instructional shifts of the Common Core.

2. Students omitted several parts of the instructional sequence of the Literacy Lesson Plan. The Unit Lesson Plan I used to create the LLP is quite cumbersome. I think we need to revisit adopting a new, more streamlined PEU Lesson Plan. Often the lesson plan my students submitted were 10 or more pages. That is excessive.

3. The instructional sequence also had the lowest class mean (2.13) suggesting that I need to revisit how I teach developing an instructional sequence in literacy and that we need to do more in class lesson development.

4. My students did surprisingly well at citing CCSS - ELA Literacy, considering the struggles they had in class.

5. Students that begin TEP in the fall are not ready to complete the ILLS assignment. I will need to:
a. revisit EDUC 335 and 418 to redistribute some of the content without cutting any content I have to teach in EDUC 335 ECE and Spec Ed.

b. redesign the ILLS assignment. I would love to be able to integrate this assignment with an EDUC 331A assignment. Dr. Yoon and I have discussed incorporating this type of assignment into the Climate Change section of the course. I hope he will teach the course in the fall so we can implement these plans.

- Performance Mean Scores on Integrated Literacy Lesson Set
- Performance Means Scores on Integrated Literacy Lesson Set 2008-2010

**Target:**
85% of students should achieve rating of 2 or better. Sections 3.0 a & b and 6.2 a of the Integrated Literacy Lesson Set are indicators of the application of reading/language arts content knowledge in the planning and implementation of literacy instruction. The aggregated mean score for this group on these sections was 2.54, indicating that all students performed at acceptable or target level. The highest mean for the group was 2.65 for teaching comprehension.

**Findings (2012-2013) - Target: Met**

For the 2012 - 2013 assessment cycle, students are performing equally as well as in past cycles. There are no statistically significant differences in student achievement in students gaining competency in planning for writing instruction. The course content has been adjusted in each of the three literacy courses in the Elementary Education to address writing in a different way in each course. EDUC 335 focuses on the developmental stages of writing. EDUC 340 focuses on writing in response to literature. EDUC 418 focuses on writing instruction and integration as well as writing assessment.

SLO 2: Content Knowledge in Science

The elementary education candidate will know, understand, and use fundamental concepts of physical, life, and earth/space sciences to implement age-appropriate inquiry-based science instruction.

Relevant Associations:
The Praxis II Science subtest (5005) assesses science content knowledge for Elementary Education majors. This test has proven to be more challenging than the former test (included in 5031). Dr. Yoon, who teaches the methods course for elementary students, has agreed to take 5005 in order to ascertain what elements of the test are more difficult.

Students should have acquired the content knowledge to be successful on this test by taking BIOL 110 Essential Topics in Biology, PSED 201 Physical Science Survey (physics and chemistry content), and EDUC 207 Earth/Space Science according to the topic guide provided by ETS yet the pass rate for this subtest is below 50% on the administration.

Standard Associations:

NCATE
1.1 Content Knowledge for Teacher Candidates
1.3 Element 3. Pedagogical Content Knowledge for Teacher Candidates
1.4 Element 4. Professional and Pedagogical Knowledge and Skills for Teacher Candidates

Elementary Education Standards - ACEIS
2.2 Science

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:

M 1: Praxis II: Elementary Education Content Knowledge

Delaware has changed the required Praxis II for Elementary Education candidates although the subject matter remains the same. The new Praxis II exam, Elementary Education: Multiple Subjects (5031), is a more rigorous
exam. that is structured to have four subtests instead of four sections of the same test. In the past candidates only had to earn an overall passing of 151. Currently, candidates must pass each of the four subtests by meeting the cut score for each subject. The Multiple Subject Praxis has not been administered long enough to know how well students are doing on the test. Many students still do not report scores to DSU until they pass. However, our Praxis assistance program, funded by Title III, has been able to fund exam fees for a greater number of students, so the data we receive is more likely to reflect a more accurate picture of how students fare. This information will be invaluable in revealing patterns of errors that could uncover areas of program weakness. We anticipate that the Elementary Education Program will be able to learn from analysis of unsuccessful attempts on Praxis II to improve the program.

Additionally, a curriculum change has been approved that requires Elementary Education majors to take both American History to 1865 and from 1865. Students have traditionally had the most difficulty with the Social Studies subtest. Since American History comprises 30% of the Praxis II Social Studies subtest, this curriculum change should result in better success on the Social Studies subtest.

We are now providing Plato Web, a revised and retooled web based Praxis preparation program that makes use of updated technology to deliver an engaging product that provides users with feedback in real time that allows students to receive feedback and work on correcting their mistakes. Plato Web provides practice for elementary majors in the four major content areas.

Mr. Ricky Hardy, our Praxis Coordinator, has been instrumental in strategizing for improvement in Praxis scores. Through analysis he saw a connection between Core Praxis Math and Praxis II Math for Elementary (5003). He has encouraged elementary students to take 5003 right after passing Core Praxis with promising results. Because all the elementary Praxis II tests are content-based rather than pedagogy-based, three of the tests do not require students to take the methods classes before taking the elementary content tests. The only elementary Praxis II test that requires a methods course to gain the appropriate content knowledge is the Reading/ Language Arts Praxis (5002). This subject matter test has some specialized knowledge related to teaching pedagogy that is taught in EDUC 335 Developing Reading in Elementary School. The course also provides content needed for the Early Childhood Praxis II.

Presently, I have no access to Praxis II data.

Source of Evidence: Certification or licensure exam, national or state

**Connected Document**
- *Praxis II Elementary Education Data*
Target:
All Elementary candidates (100%) will achieve a passing score on the Science Subtest (159) of the Elementary Education: Multiple Subjects (5031).

Findings (2011-2012) - Target: Met
For the current academic year, 2011-2012, sixteen student passed Praxis II, Elementary Content Areas. All 16 of these student showed mastery of the Science content knowledge. Eight of these students student taught in either spring or fall of the 2011-2012 academic school year. Seven of the sixteen are scheduled to student teach in Fall 2012. The remaining student will student teach in Spring 2013 in order to complete courses outside the Elementary Education major.
Only one student scheduled to student in Fall 2012 has not taken the Praxis II, the student must take and pass the exam in order to student teach.

M 2: Grade Point Averages for Content Knowledge
Evidence of content knowledge in each of the seven areas required for Elementary Education majors consists of sets of grades that apply to each of the seven content areas. Grades from courses required of every elementary education major are the only grades reported in this assessment. All data is drawn from the most recent of available sources and includes only program completers.

1. Reading, Writing and Oral Language, is clearly the most expansive content area because Language Arts requires that the processes of reading, writing, speaking, listening, and viewing all be addressed. Thus, courses were selected that expressly address each of these components. Composition I and II (ENGL 101, ENGL 102) were necessary to include because these courses are designed to develop skills and competence in writing prose compositions, reading, and listening. Problems in logical thought, organization of ideas, and comprehension in reading also receive special attention. Speech (ENGL 200) is included because it provides the fundamentals of effective oral expression. Developing Reading in Elementary School (EDUC 335) and Integrating Children's Literature through Language Arts (EDUC 340) are the first two courses required in the Elementary Education literacy block.

2. Science has several contributing to content knowledge. Our elementary education candidates have a sound general education background in science with the required courses, BIOL-110 Essential Topics in Biology (4 credit hours), PSED 201 Physical Science Survey, and PSED 207 Earth/Space Science. Their experience in rounded out with EDUC 331a Elementary Science Methods.

3. Elementary Education majors will begin the mathematics sequence with MTSC 100 starting in Fall 2017 to assist them in passing Core Praxis Mathematics and Praxis II Mathematics subtest. If they pass the Core Praxis test they will may take a mathematics elective in spring of the freshman year. If the Praxis test has not been passed, they may choose from MTSC 107, 108, or 109 for mathematics. In the Fall Sophomore semester, students will take MTSC 205 Math for Teachers I.

4. Social Studies, is another expansive standard because so many disciplines
are integrated into the teaching of Social Studies. Our candidates are required
to take the following general education courses contributing to their content
knowledge: HIST 201 American History to 1865 or HIST 203 African American
Experience to 1865, and GEG 201 World Geography. Beginning in the 2009-
10 academic year, students will no longer be able to substitute African American
Experience for American History in the pursuit of an education degree.
Additionally, our candidates are required to take EDUC 318 Multicultural
Education, which also satisfies the University's requirement for Global Societies.
Elementary Education candidates also take EDUC 303 Methods of Teaching
Social Studies in Elementary and Middle Schools.

5. Candidates must take Introduction of Art (ART 101) or Music (MUSC 101) to
gain an appreciation of those disciplines and understand the nature of the
content in each discipline. The choice of Integrating the Visual Arts into
Elementary Education (ART 201) or Integrating Music into Elementary
Education (MUSC 201) offer the basic methodologies of art and music that are
appropriate for integrating art and music in elementary school. Although
candidates are required to construct a unit of instruction in these courses, there
is no field experience attached to either course.

6. One of the first courses all University students are required to take is Lifetime
Fitness and Wellness (MVSC100), which teaches the concepts of wellness,
including good nutrition and concepts for maintaining fitness. The course also
includes HIV/AIDS awareness as well as drug abuse prevention.

7. In addition to Lifetime Fitness and Wellness, elementary education
candidates are required to have Motor Development/Movement Education
for Children 0-8 (EDUC 257), which focuses on understanding motor
development and fine and gross body movement, as well as adaptations
for children who are developmentally delayed.

**M 6: Math Methods Planning Binder**

Connected Document
- *Math Planning Binder Data 2010 - 2011*

Target:
In the Math Methods Planning Binder, candidates systematically learn to develop math activities into a well-crafted math lessons. Thus, Assignment 3 requires the candidate to adapt an existing algebra lesson to be appropriate for given age and ability ranges. The lesson must also conform to the Math Lesson Plan format. Assignments 4 and 5 require candidates to plan and micro-teach lessons in data analysis and integrated geometry/measurement lessons, respectively as well as reflect on the lessons. This binder also addresses the Delaware Teaching Standards for Mathematics (DTSM) and the DSU Professional Education Unit Standards (DIRECT) as well as ACEI Standards.

Planning effective math instruction requires that students master math content and developmental learning expectations for grades K - 5. Although
students have already demonstrated content knowledge in math by meeting or surpassing Delaware State criterion score for Praxis I Mathematics and by successfully completing Math for Teachers I, II, & III with a grade of C or better, they still must demonstrate content knowledge in lesson planning by creating developmentally appropriate lesson plans that demonstrate use of best practice math instruction.

The activities categories listed below refer to application of content knowledge to develop a sound learning activity. Both the manipulative and web activities address number sense and operations. Note that means scores have remained relatively stable in each of these math content areas. Through the completion and demonstration of activities in each of the areas listed students, in most cases, displayed proficiency in planning across the math content standards.

</tbody>
</table>

At this point I have tracked student performance on the Math Methods Planning Binder for four semesters. I comparatively analyzed student performance on each section of the binder and in lesson planning for math. The first observation to be made is that class size has increased each year, suggesting that a greater number of Elementary Education majors are successfully completing the Praxis I requirement and maintaining a GPA of 2.5 or better across all courses. Performances means suggest that the Fall 2010 was exceptionally proficient in instructional planning for math. Across the board, the most significant improvement has been noted in overall lesson planning for math. The mean score for lesson planning in Spring 2010 was 2.13 / 3. By Fall 2012 the mean score for planning had increased to 2.64. Areas in which students excelled were identifying pre-requisite skills for the lesson (2.92), developing a logical teaching sequence (2.93), and organization and accuracy of the content included in the lesson plan (2.93). Three areas that still need improvement are lesson and assessment accommodation planning for students with diverse needs (2.2), developing effective summative assessments (2.13), and planning closure activities (2.21).

_SLO 4: Social Studies Content Knowledge_
The elementary education candidate will know, understand, and use the major concepts and modes of inquiry from the social studies-the integrated study of the
social sciences -- to promote elementary students' abilities to make informed decisions as citizens of a culturally diverse, democratic society and interdependent world

**Relevant Associations:**
Elementary Education students are required to demonstrate content knowledge in Social Studies through the Social Studies content area subtest 5004. Even in the former Praxis II content test (5031), the students were the least successful on this subtest with a pass rate of 38% on first administration. Currently, the pass rate lingers close to the 20% mark although it has cone as low as 12%.

Although ETS reported that this subtest would not be changed in the 5004 rendition, it was changed, beginning with the number of questions (30 to 55). The distribution of test questions according to topic changed slightly. Questions related to American History and Government increased to 45% of the test. I took the new Social Studies test (5004) to figure out what made the test different. Geography questions were more difficult but the test form that I took only included 4 geography questions. World History and Economics asked questions that required much more specific knowledge (dates and geographic locations). This was also true of the American History and Government section.

  2.4 Social studies

**DSU Learning Goal Associations:**

1. **UG Student Learning Goal:** Competent Communicators
2. **UG Student Learning Goal:** Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 1: Praxis II: Elementary Education Content Knowledge**

Delaware has changed the required Praxis II for Elementary Education candidates although the subject matter remains the same. The new Praxis II exam, Elementary Education: Multiple Subjects (5031), is a more rigorous exam. that is structured to have four subtests instead of four sections of the same test. In the past candidates only had to earn an overall passing of 151. Currently, candidates must pass each of the four subtests by meeting the cut score for each subject. The Multiple Subject Praxis has not been administered long enough to know how well students are doing on the test. Many students still do not report scores to DSU until they pass. However, our Praxis assistance program, funded by Title III, has been able to fund exam fees for a greater number of students, so the data we receive is more likely to reflect a more accurate picture of how students fare. This information will be invaluable in revealing patterns of errors that could uncover areas of program weakness. We anticipate that the Elementary Education Program will be able to learn from
analysis of unsuccessful attempts on Praxis II to improve the program.

Additionally, a curriculum change has been approved that requires Elementary Education majors to take both American History to 1865 and from 1865. Students have traditionally had the most difficulty with the Social Studies subtest. Since American History comprises 30% of the Praxis II Social Studies subtest, this curriculum change should result in better success on the Social Studies subtest.

We are now providing Plato Web, a revised and retooled web based Praxis preparation program that makes use of updated technology to deliver an engaging product that provides users with feedback in real time that allows students to receive feedback and work on correcting their mistakes. Plato Web provides practice for elementary majors in the four major content areas.

Mr. Ricky Hardy, our Praxis Coordinator, has been instrumental in strategizing for improvement in Praxis scores. Through analysis he saw a connection between Core Praxis Math and Praxis II Math for Elementary (5003). He has encouraged elementary students to take 5003 right after passing Core Praxis with promising results. Because all the elementary Praxis II tests are content-based rather than pedagogy-based, three of the tests do not require students to take the methods classes before taking the elementary content tests. The only elementary Praxis II test that requires a methods course to gain the appropriate content knowledge is the Reading/ Language Arts Praxis (5002). This subject matter test has some specialized knowledge related to teaching pedagogy that is taught in EDUC 335 Developing Reading in Elementary School. The course also provides content needed for the Early Childhood Praxis II.

Presently, I have no access to Praxis II data.

Source of Evidence: Certification or licensure exam, national or state

**Connected Document**

- Praxis II Elementary Education Data

**Target:**
All Elementary candidates (100%) will achieve a passing score on the Social Studies Subtest (155) of the Elementary Education: Multiple Subjects (5031).

**Findings (2011-2012) - Target: Met**
For the current academic year, 2011 -2012, sixteen student passed Praxis II, Elementary Content Areas. All 16 of these student showed mastery of the Social Studies content knowledge. Eight of these students student taught in either spring or fall of the 2011-2012 academic school year. Seven of the sixteen are scheduled to student teach in Fall 2012. The
remaining student will student teach in Spring 2013 in order to complete courses outside the Elementary Education major.

Only one student scheduled to student in Fall 2012 has not taken the Praxis II, she must take and pass the exam in order to student teach.

**M 2: Grade Point Averages for Content Knowledge**

Evidence of content knowledge in each of the seven areas required for Elementary Education majors consists of sets of grades that apply to each of the seven content areas. Grades from courses required of every elementary education major are the only grades reported in this assessment. All data is drawn from the most recent of available sources and includes only program completers.

1. Reading, Writing and Oral Language, is clearly the most expansive content area because Language Arts requires that the processes of reading, writing, speaking, listening, and viewing all be addressed. Thus, courses were selected that expressly address each of these components. Composition I and II (ENGL 101, ENGL 102) were necessary to include because these courses are designed to develop skills and competence in writing prose compositions, reading, and listening. Problems in logical thought, organization of ideas, and comprehension in reading also receive special attention. Speech (ENGL 200) is included because it provides the fundamentals of effective oral expression. Developing Reading in Elementary School (EDUC 335) and Integrating Children's Literature through Language Arts (EDUC 340) are the first two courses required in the Elementary Education literacy block.

2. Science has several contributing to content knowledge. Our elementary education candidates have a sound general education background in science with the required courses, BIOL-110 Essential Topics in Biology (4 credit hours), PSED 201 Physical Science Survey, and PSED 207 Earth/Space Science. Their experience is rounded out with EDUC 331a Elementary Science Methods.

3. Elementary Education majors will begin the mathematics sequence with MTSC 100 starting in Fall 2017 to assist them in passing Core Praxis Mathematics and Praxis II Mathematics subtest. If they pass the Core Praxis test they will may take a mathematics elective in spring of the freshman year. If the Praxis test has not been passed, they may choose from MTSC 107, 108, or 109 for mathematics. In the Fall Sophomore semester, students will take MTSC 205 Math for Teachers I.

4. Social Studies, is another expansive standard because so many disciplines are integrated into the teaching of Social Studies. Our candidates are required to take the following general education courses contributing to their content knowledge: HIST 201 American History to 1865 or HIST 203 African American Experience to 1865, and GEOG 201 World Geography. Beginning in the 2009-10 academic year, students will no longer be able to substitute African American Experience for American History in the pursuit of an education degree. Additionally, our candidates are required to take EDUC 318 Multicultural Education, which also satisfies the University's requirement for Global Societies. Elementary Education candidates also take EDUC 303 Methods of Teaching Social Studies in Elementary and Middle Schools.

5. Candidates must take Introduction of Art (ART 101) or Music (MUSC 101) to
gain an appreciation of those disciplines and understand the nature of the content in each discipline. The choice of Integrating the Visual Arts into Elementary Education (ART 201) or Integrating Music into Elementary Education (MUSC 201) offer the basic methodologies of art and music that are appropriate for integrating art and music in elementary school. Although candidates are required to construct a unit of instruction in these courses, there is no field experience attached to either course.

6. One of the first courses all University students are required to take is Lifetime Fitness and Wellness (MVSC100), which teaches the concepts of wellness, including good nutrition and concepts for maintaining fitness. The course also includes HIV/AIDS awareness as well as drug abuse prevention.

7. In addition to Lifetime Fitness and Wellness, elementary education candidates are required to have Motor Development/Movement Education for Children 0-8 (EDUC 257), which focuses on understanding motor development and fine and gross body movement, as well as adaptations for children who are developmentally delayed.

- Course Grade Data

Target:
Teacher candidates must earn a composite GPA of 2.5 for all general education courses within the Social Sciences.

- 2008-9 Composite Social Studies GPA 4.0
- 2009-10 Composite Social Studies GPA 3.67

Teacher candidates must earn a GPA of 2.5 for EDUC 303 Teaching Social Studies.

- 2008-9 Mean grade for EDUC 303 3.17 (N=5)
- 2009-10 Mean grade for EDUC 303 3.33 (N=8)

- 2010-2011 Mean Grade for EDUC 303 4.0 (N=5)

Connected Document
- Elementary Student GPA's in the Major Content Areas

Findings (2011-2012) - Target: Met

Finally, as the GPA chart indicates, Elementary TEP students
demonstrate competencies necessary for success in teaching Social Studies. They are required to take American History, World Geography, Multicultural Education as well as a social studies course in teaching methods. Thus, they have met University Learning Goal three: ethical, collaborative, and productive citizens of a complex, diverse world. However, based on my observations in teaching Social Studies Teaching Methods, the baseline prior knowledge of American History and Civics that my students possess is not adequate to teach Social Studies in elementary school. I am currently investigating how I can add the American History course that covers events from 1865 without increasing program total credits.

Related Measures:

M 3: Student Teacher Assessment
Beginning in Fall 2016, all education majors will be evaluated using a new instrument that will be a version of the DPAS II, adapted for use with preservice teachers. This assessment will not require an addendum because it is aligned to the InTASC standards.

All education majors will also be required to complete the Praxis Performance Assessment for Teachers (PPAT). The PPAT assessment evaluates test takers on their abilities to impact student learning as it relates to the InTASC Model Core Teaching Standards, demonstrating that they have the basic pedagogical content knowledge and application for the classroom to begin teaching as an entry-level teacher (ETS.org, accessed May 20, 2016). This assessment contains four tasks requiring written commentary and submission of artifacts. A video submission also is required for one of the tasks.

The Professional Education Unit (PEU) at Delaware State University uses a unit-wide student teaching assessment rubric to evaluate teacher candidates in all K-12 programs. Each candidate is assessed at least four times per semester by a University Supervisor and twice during the semester by the mentor teacher. An addendum has been developed to supplement the Unit-wide assessment instrument and to better align the instrument with ACEI standards.

Student Teaching Assessment:

In the 2013-14 academic year, Supervisor and Mentor evaluations were quite similar in point values, particularly on the final evaluations. Although no evaluation had more than five point spread on total scores, in four of five
evaluations the mentor teacher gave the higher score. In the fifth case, supervisor and mentor had the same total. Although I was not able to calculate inter-rater reliability, I believe it would be strong.

There is evidence to demonstrate that although the Student Teaching Assessment needs to be updated, it appears to be doing its job. Included within the five elementary student teachers, was an intern that struggled in student teaching. This student's evaluations were significantly lower than the other four, with totals of 39 and 40, respectively from the supervisor and mentor.

The patterns of scores did not reveal program weaknesses in any area on the assessment. Previous data sets (2010-13) suggested deficits in planning accommodations and modifications and differentiating instruction. I placed more emphasis on planning instruction for diverse students and worked with mentor teachers to give our students more opportunity to work with students with diverse needs. It seems that we have made strides toward improvement.

- Student Teaching Assessment 2010-2011

Target:
Elements of A Planning, Section B Implementation of Instruction, and Section D Evaluation represent scores that speak to teacher candidate’s teaching effectiveness. The mean score for Section A for the 2011-12 teacher candidates was 2.92, indicating that this group as a whole showed proficiency in planning for effective instruction. For Section B the mean score was 2.9, indicating that effective teaching was observed in all candidates. The mean score of 3.0 for Section D was 3.0, indicating that all candidates were proficient in assessing student learning. These mean scores indicate that teacher candidates have demonstrated effectiveness as teachers.

M 5: Integrated Literacy Lesson Set

The Integrated Literacy Lesson Set is an assignment specifically for the Elementary Education Program. This assignment, completed in Integrating Reading Methods Through Elementary Curriculum draws upon the candidate’s ability to use one text upon which to base plans for four literacy lessons, a word
study lesson, a fluency lesson, a comprehension lesson, and a writing lesson. Candidates write these lessons using the Professional Education Unit (PEU) lesson plan format. The purpose of this assessment is to provide evidence of the candidate’s ability to motivate students to engage in reading, writing, and oral language for personal growth, knowledge development, and enjoyment through thoughtful and well-constructed literacy planning that integrates the language arts in a meaningful way. For this assignment students are required to use authentic text. Typically Integrating Reading Methods Through Elementary Curriculum is taken in the last semester before Elementary Education candidates student teach. Thus, the expectation is that candidates will display a high level of proficiency in lesson planning. Although these lessons are taught in class microteaching sessions, they are not taught in the early field placement. However, candidates are required to plan parallel lessons using the curricular materials supplied by the school. At least one of these lessons will be observed and evaluated by the course instructor. This adjustment was necessary due to the number of schools in the area implementing Reading First curriculum, specifically scripted lessons and phonetically based guided reading materials in the primary grades.

As of Fall 2011, we are trying to have students teach as many of these lessons as possible in a classroom instead of planning parallel lessons. This limits the students’ flexibility and variety in reading material because they are required to teach only district curriculum. The lesson plan rubrics may require revision to account for this change in planning expectations. While this limits students in planning, it allows the students to engage in more classroom instruction.

Integrated Literacy Lesson Set (ILLS):

After studying the data for the ILLS, I have several observations.

1. The assignment is no longer integrated. In order to make it possible to teach the lessons in a classroom during practicum. It has become quite difficult to find teachers that will allow students to teach these lessons. Literacy lessons are predominantly taught directly from the manual. In Capital School District, most reading lessons are semi-scripted. It seems that the best opportunity to plan integrated lessons would be combine literacy and a content area, such as social studies or science. I plan to talk to some of the teachers I have worked with to figure out what would fly in most districts. I have to add that the type of planning and teaching I am talking about is absolutely congruent with the intent and instructional shifts of the Common Core.

2. Students omitted several parts of the instructional sequence of the Literacy Lesson Plan. The Unit Lesson Plan I used to create the LLP is quite cumbersome. I think we need to revisit adopting a new, more streamlined PEU Lesson Plan. Often the lesson plan my students submitted were 10 or more pages. That is excessive.
3. The instructional sequence also had the lowest class mean (2.13) suggesting that I need to revisit how I teach developing an instructional sequence in literacy and that we need to do more in class lesson development.

4. My students did surprisingly well at citing CCSS - ELA Literacy, considering the struggles they had in class.

5. Students that begin TEP in the fall are not ready to complete the ILLS assignment. I will need to:

   a. revisit EDUC 335 and 418 to redistribute some of the content without cutting any content I have to teach in EDUC 335 ECE and Spec Ed.

   b. redesign the ILLS assignment. I would love to be able to integrate this assignment with an EDUC 331A assignment. Dr. Yoon and I have discussed incorporating this type of assignment into the Climate Change section of the course. I hope he will teach the course in the fall so we can implement these plans.

- Student Teaching Assessment
- Student Teaching Assessment 2010-2011

Target:
Elements of A Planning, Section B Implementation of Instruction, and Section D Evaluation represent scores that speak to teacher candidate's teaching effectiveness. The mean score for Section A for the 2011-12 teacher candidates was 2.92, indicating that this group as a whole showed proficiency in planning for effective instruction. For Section B the mean score was 2.9, indicating that effective teaching was observed in all candidates. The mean score of 3.0 for Section D was 3.0, indicating that all candidates were proficient in assessing student learning. These mean scores indicate that teacher candidates have demonstrated effectiveness as teachers.

M 5: Integrated Literacy Lesson Set

The Integrated Literacy Lesson Set is an assignment specifically for the Elementary Education Program. This assignment, completed in Integrating Reading Methods Through Elementary Curriculum draws upon the candidate's ability to use one text upon which to base plans for four literacy lessons, a word study lesson, a fluency lesson, a comprehension lesson, and a writing lesson. Candidates write these lessons using the Professional Education Unit (PEU) lesson plan format. The purpose of this assessment is to provide evidence of the candidate's ability to motivate students to engage in reading, writing, and oral language for personal growth, knowledge development, and enjoyment through thoughtful and well-constructed literacy planning that integrates the language arts in a meaningful way. For this assignment students are required to use authentic text. Typically Integrating Reading Methods Through Elementary Curriculum is taken in the last semester before Elementary Education candidates student teach. Thus, the expectation is that candidates will display a high level of proficiency in lesson planning. Although these lessons are taught in class microteaching sessions, they are not taught in the early field placement. However, candidates are required to plan parallel lessons using the curricular materials supplied by the school. At least one of these lessons will be observed and evaluated by the course instructor. This adjustment was necessary due to the number of schools in the area implementing Reading First curriculum, specifically scripted lessons and phonetically based guided reading materials in the primary grades.

As of Fall 2011, we are trying to have students teach as many of these lessons as possible in a classroom instead of planning parallel lessons. This limits the students' flexibility and variety in reading material because they are required to teach only district curriculum. The lesson plan rubrics may require revision to account for this change in planning expectations. While this limits students in planning, it allows the students to engage in more classroom instruction.

Integrated Literacy Lesson Set (ILLS):
After studying the data for the ILLS, I have several observations.

1. The assignment is no longer integrated. In order to make it possible to teach the lessons in a classroom during practicum. It has become quite difficult to find teachers that will allow students to teach these lessons. Literacy lessons are predominantly taught directly from the manual. In Capital School District, most reading lessons are semi-scripted. It seems that the best opportunity to plan integrated lessons would be combine literacy and a content area, such as social studies or science. I plan to talk to some of the teachers I have worked with to figure out what would fly in most districts. I have to add that the type of planning and teaching I am talking about is absolutely congruent with the intent and instructional shifts of the Common Core.

2. Students omitted several parts of the instructional sequence of the Literacy Lesson Plan. The Unit Lesson Plan I used to create the LLP is quite cumbersome. I think we need to revisit adopting a new, more streamlined PEU Lesson Plan. Often the lesson plan my students submitted were 10 or more pages. That is excessive.

3. The instructional sequence also had the lowest class mean (2.13) suggesting that I need to revisit how I teach developing an instructional sequence in literacy and that we need to do more in class lesson development.

4. My students did surprisingly well at citing CCSS - ELA Literacy, considering the struggles they had in class.

5. Students that begin TEP in the fall are not ready to complete the ILLS assignment. I will need to:

a. revisit EDUC 335 and 418 to redistribute some of the content without cutting any content I have to teach in EDUC 335 ECE and Spec Ed.

b. redesign the ILLS assignment. I would love to be able to integrate this assignment with an EDUC 331A assignment. Dr. Yoon and I have discussed incorporating this type of assignment into the Climate Change section of the course. I hope he will teach the course in the fall so we can implement these plans.

Related Measures:

M 3: Student Teacher Assessment
Beginning in Fall 2016, all education majors will be evaluated using a new instrument that will be a version of the DPAS II, adapted for use with preservice teachers. This assessment will not require an addendum because it is aligned to the InTASC standards.

All education majors will also be required to complete the Praxis Performance Assessment for Teachers (PPAT). The PPAT assessment evaluates test takers on their abilities to impact student learning as it relates to the InTASC Model Core Teaching Standards, demonstrating that they have the basic pedagogical content knowledge and application for the classroom to begin teaching as an entry-level teacher (ETS.org, accessed May 20, 2016). This assessment contains four tasks requiring written commentary and submission of artifacts. A video submission also is required for one of the tasks.

The Professional Education Unit (PEU) at Delaware State University uses a unit-wide student teaching assessment rubric to evaluate teacher candidates in all K-12 programs. Each candidate is assessed at least four times per semester by a University Supervisor and twice during the semester by the mentor teacher. An addendum has been developed to supplement the Unit-wide assessment instrument and to better align the instrument with ACEI standards.

Student Teaching Assessment:
In the 2013-14 academic year, Supervisor and Mentor evaluations were quite similar in point values, particularly on the final evaluations. Although no evaluation had more than five point spread on total scores, in four of five evaluations the mentor teacher gave the higher score. In the fifth case, supervisor and mentor had the same total. Although I was not able to calculate inter-rater reliability, I believe it would be strong.

There is evidence to demonstrate that although the Student Teaching Assessment needs to be updated, it appears to be doing its job. Included within the five elementary student teachers, was an intern that struggled in student teaching. This student's evaluations were significantly lower than the other four, with totals of 39 and 40, respectively from the supervisor and mentor.

The patterns of scores did not reveal program weaknesses in any area on the assessment. Previous data sets (2010-13) suggested deficits in planning accommodations and modifications and differentiating instruction. I placed more emphasis on planning instruction for diverse students and worked with mentor teachers to give our students more opportunity to work with students with diverse needs. It seems that we have made strides toward improvement.

**Target:**

Elements of A Planning and Section B Implementation of Instruction speak to teacher candidate's effectiveness in applying theories of learning and development to the teaching process. The mean score for Section A for the 2011-12 teacher candidates was 2.92 and for Section B the mean score was 2.9, indicating that this group as a whole applied learning and developmental theory to their planning and teaching.

**M 5: Integrated Literacy Lesson Set**

The Integrated Literacy Lesson Set is an assignment specifically for the Elementary Education Program. This assignment, completed in Integrating Reading Methods Through Elementary Curriculum draws upon the candidate's ability to use one text upon which to base plans for four literacy lessons, a word study lesson, a fluency lesson, a comprehension lesson, and a writing lesson. Candidates write these lessons using the Professional Education Unit (PEU) lesson plan format. The purpose of this assessment is to provide evidence of the candidate's ability to motivate students to engage in reading, writing, and oral language for personal growth, knowledge development, and enjoyment through thoughtful and well-constructed literacy planning that integrates the language arts in a meaningful way. For this assignment students are required to use authentic text. Typically Integrating Reading Methods Through Elementary Curriculum is taken in the last semester before Elementary Education candidates student teach. Thus, the expectation is that candidates will display a high level of proficiency in lesson planning. Although these lessons are taught in class microteaching sessions, they are not taught in the early field placement. However, candidates are required to plan parallel lessons using the curricular materials supplied by the school. At least one of these lessons will be observed and evaluated by the course instructor. This adjustment was necessary due to the number of schools in the area implementing Reading First curriculum, specifically scripted lessons and phonetically based guided reading materials in the primary grades.

As of Fall 2011, we are trying to have students teach as many of these lessons as possible in a classroom instead of planning parallel lessons. This limits the students' flexibility and variety in reading material because they are required to
teach only district curriculum. The lesson plan rubrics may require revision to account for this change in planning expectations. While this limits students in planning, it allows the students to engage in more classroom instruction.

Integrated Literacy Lesson Set (ILLS):

After studying the data for the ILLS, I have several observations.

1. The assignment is no longer integrated. In order to make it possible to teach the lessons in a classroom during practicum. It has become quite difficult to find teachers that will allow students to teach these lessons. Literacy lessons are predominantly taught directly from the manual. In Capital School District, most reading lessons are semi-scripted. It seems that the best opportunity to plan integrated lessons would be combine literacy and a content area, such as social studies or science. I plan to talk to some of the teachers I have worked with to figure out what would fly in most districts. I have to add that the type of planning and teaching I am talking about is absolutely congruent with the intent and instructional shifts of the Common Core.

2. Students omitted several parts of the instructional sequence of the Literacy Lesson Plan. The Unit Lesson Plan I used to create the LLP is quite cumbersome. I think we need to revisit adopting a new, more streamlined PEU Lesson Plan. Often the lesson plan my students submitted were 10 or more pages. That is excessive.

3. The instructional sequence also had the lowest class mean (2.13) suggesting that I need to revisit how I teach developing an instructional sequence in literacy and that we need to do more in class lesson development.

4. My students did surprisingly well at citing CCSS - ELA Literacy, considering the struggles they had in class.

5. Students that begin TEP in the fall are not ready to complete the ILLS assignment. I will need to:

   a. revisit EDUC 335 and 418 to redistribute some of the content without cutting any content I have to teach in EDUC 335 ECE and Spec Ed.
b. redesign the ILLS assignment. I would love to be able to integrate this assignment with an EDUC 331A assignment. Dr. Yoon and I have discussed incorporating this type of assignment into the Climate Change section of the course. I hope he will teach the course in the fall so we can implement these plans.

M 3: Student Teacher Assessment
Beginning in Fall 2016, all education majors will be evaluated using a new instrument that will be a version of the DPAS II, adapted for use with preservice teachers. This assessment will not require an addendum because it is aligned to the InTASC standards.

All education majors will also be required to complete the Praxis Performance Assessment for Teachers (PPAT). The PPAT assessment evaluates test takers on their abilities to impact student learning as it relates to the InTASC Model Core Teaching Standards, demonstrating that they have the basic pedagogical content knowledge and application for the classroom to begin teaching as an entry-level teacher (ETS.org, accessed May 20, 2016). This assessment contains four tasks requiring written commentary and submission of artifacts. A video submission also is required for one of the tasks.

The Professional Education Unit (PEU) at Delaware State University uses a unit-wide student teaching assessment rubric to evaluate teacher candidates in all K-12 programs. Each candidate is assessed at least four times per semester by a University Supervisor and twice during the semester by the mentor teacher. An addendum has been developed to supplement the Unit-wide assessment instrument and to better align the instrument with ACEI standards.

Student Teaching Assessment:

In the 2013-14 academic year, Supervisor and Mentor evaluations were quite similar in point values, particularly on the final evaluations. Although no evaluation had more than five point spread on total scores, in four of five evaluations the mentor teacher gave the higher score. In the fifth case, supervisor and mentor had the same total. Although I was not able to calculate inter-rater reliability, I believe it would be strong.

There is evidence to demonstrate that although the Student Teaching Assessment needs to be updated, it appears to be doing its job. Included within the five elementary student teachers, was an intern that struggled in student teaching. This student's evaluations were significantly lower than the other four,
with totals of 39 and 40, respectively from the supervisor and mentor.

The patterns of scores did not reveal program weaknesses in any area on the assessment. Previous data sets (2010-13) suggested deficits in planning accommodations and modifications and differentiating instruction. I placed more emphasis on planning instruction for diverse students and worked with mentor teachers to give our students more opportunity to work with students with diverse needs. It seems that we have made strides toward improvement.

Target:
Elements of Section B Implementation of Instruction and Section D Evaluation represent scores that speak to teacher candidate’s knowledge about the learner. The student teaching rubric is a three point scale with 3 representing a target performance, 2 representing an acceptable performance, and 1 representing unacceptable performance. Mean scores on Sections B&C

- 2008-9 2.58
- 2009-10 2.82

These mean scores indicate that teacher candidates have achieved either an acceptable or target rating foreknowledge about the learner.

Findings (2011-2012) - Target: Met
Elements of Section B Implementation of Instruction and Section C Evaluation represent scores that speak to teacher candidate's knowledge about the learner. The student teaching rubric is a three point scale with 3 representing a target performance, 2 representing an acceptable performance, and 1 representing unacceptable performance. Mean score on Sections B for 2011-2012 was 2.9, indicating a high degree of proficiency for the group. Mean score for Section C was 3.0, meaning that all students received a target rating for this
These mean scores indicate that teacher candidates have achieved either an acceptable or target rating for knowledge about the learner.

Established in Cycle: 2010-2011

**M 5: Integrated Literacy Lesson Set**

The Integrated Literacy Lesson Set is an assignment specifically for the Elementary Education Program. This assignment, completed in Integrating Reading Methods Through Elementary Curriculum draws upon the candidate's ability to use one text upon which to base plans for four literacy lessons, a word study lesson, a fluency lesson, a comprehension lesson, and a writing lesson. Candidates write these lessons using the Professional Education Unit (PEU) lesson plan format. The purpose of this assessment is to provide evidence of the candidate's ability to motivate students to engage in reading, writing, and oral language for personal growth, knowledge development, and enjoyment through thoughtful and well-constructed literacy planning that integrates the language arts in a meaningful way. For this assignment students are required to use authentic text. Typically Integrating Reading Methods Through Elementary Curriculum is taken in the last semester before Elementary Education candidates student teach. Thus, the expectation is that candidates will display a high level of proficiency in lesson planning. Although these lessons are taught in class microteaching sessions, they are not taught in the early field placement. However, candidates are required to plan parallel lessons using the curricular materials supplied by the school. At least one of these lessons will be observed and evaluated by the course instructor. This adjustment was necessary due to the number of schools in the area implementing Reading First curriculum, specifically scripted lessons and phonetically based guided reading materials in the primary grades.

As of Fall 2011, we are trying to have students teach as many of these lessons as possible in a classroom instead of planning parallel lessons. This limits the students' flexibility and variety in reading material because they are required to teach only district curriculum. The lesson plan rubrics may require revision to account for this change in planning expectations. While this limits students in planning, it allows the students to engage in more classroom instruction.

**Integrated Literacy Lesson Set (ILLS):**

After studying the data for the ILLS, I have several observations.

1. The assignment is no longer integrated. In order to make it possible to teach the lessons in a classroom during practicum. It has become quite difficult to find teachers that will allow students to teach these lessons. Literacy lessons are predominantly taught directly from the manual. In Capital School District, most reading lessons are semi-scripted. It seems that the best opportunity to plan integrated lessons would be combine literacy and a content area, such as social studies or science. I plan to talk to some of the teachers I have worked with to
figure out what would fly in most districts. I have to add that the type of planning and teaching I am talking about is absolutely congruent with the intent and instructional shifts of the Common Core.

2. Students omitted several parts of the instructional sequence of the Literacy Lesson Plan. The Unit Lesson Plan I used to create the LLP is quite cumbersome. I think we need to revisit adopting a new, more streamlined PEU Lesson Plan. Often the lesson plan my students submitted were 10 or more pages. That is excessive.

3. The instructional sequence also had the lowest class mean (2.13) suggesting that I need to revisit how I teach developing an instructional sequence in literacy and that we need to do more in class lesson development.

4. My students did surprisingly well at citing CCSS - ELA Literacy, considering the struggles they had in class.

5. Students that begin TEP in the fall are not ready to complete the ILLS assignment. I will need to:

a. revisit EDUC 335 and 418 to redistribute some of the content without cutting any content I have to teach in EDUC 335 ECE and Spec Ed.

b. redesign the ILLS assignment. I would love to be able to integrate this assignment with an EDUC 331A assignment. Dr. Yoon and I have discussed incorporating this type of assignment into the Climate Change section of the course. I hope he will teach the course in the fall so we can implement these plans.

Target:
85% of the students should achieve rating of 2 or better. Section D of the Student Teaching Assessment addresses reflective teaching practice. The student teaching rubric is a three point scale with 3 representing a target performance, 2 representing an acceptable performance, and 1 representing unacceptable performance.

Mean scores on Section D
2008-9 2.73
2009-10 2.95

These mean scores indicate that teacher candidates have achieved either an acceptable or target rating for reflection.

Findings (2011-2012) - Target: Met
Section D of the Student Teaching Assessment addresses reflective teaching practice. The student teaching rubric is a three point scale with 3 representing a target performance, 2 representing an acceptable performance, and 1 representing unacceptable performance. Mean score on Section D for 2011-12 is 2.85 /3.0. This mean score indicates that teacher candidates have achieved either an acceptable or target rating for reflection. A majority of the candidates (5/7) received a target score of 3.

M 5: Integrated Literacy Lesson Set

The Integrated Literacy Lesson Set is an assignment specifically for the Elementary Education Program. This assignment, completed in Integrating Reading Methods Through Elementary Curriculum draws upon the candidate's ability to use one text upon which to base plans for four literacy lessons, a word study lesson, a fluency lesson, a comprehension lesson, and a writing lesson. Candidates write these lessons using the Professional Education Unit (PEU) lesson plan format. The purpose of this assessment is to provide evidence of the candidate's ability to motivate students to engage in reading, writing, and oral language for personal growth, knowledge development, and enjoyment.
through thoughtful and well-constructed literacy planning that integrates the language arts in a meaningful way. For this assignment students are required to use authentic text. Typically Integrating Reading Methods Through Elementary Curriculum is taken in the last semester before Elementary Education candidates student teach. Thus, the expectation is that candidates will display a high level of proficiency in lesson planning. Although these lessons are taught in class microteaching sessions, they are not taught in the early field placement. However, candidates are required to plan parallel lessons using the curricular materials supplied by the school. At least one of these lessons will be observed and evaluated by the course instructor. This adjustment was necessary due to the number of schools in the area implementing Reading First curriculum, specifically scripted lessons and phonetically based guided reading materials in the primary grades.

As of Fall 2011, we are trying to have students teach as many of these lessons as possible in a classroom instead of planning parallel lessons. This limits the students’ flexibility and variety in reading material because they are required to teach only district curriculum. The lesson plan rubrics may require revision to account for this change in planning expectations. While this limits students in planning, it allows the students to engage in more classroom instruction.

Integrated Literacy Lesson Set (ILLS):

After studying the data for the ILLS, I have several observations.

1. The assignment is no longer integrated. In order to make it possible to teach the lessons in a classroom during practicum. It has become quite difficult to find teachers that will allow students to teach these lessons. Literacy lessons are predominantly taught directly from the manual. In Capital School District, most reading lessons are semi-scripted. It seems that the best opportunity to plan integrated lessons would be combine literacy and a content area, such as social studies or science. I plan to talk to some of the teachers I have worked with to figure out what would fly in most districts. I have to add that the type of planning and teaching I am talking about is absolutely congruent with the intent and instructional shifts of the Common Core.

2. Students omitted several parts of the instructional sequence of the Literacy Lesson Plan. The Unit Lesson Plan I used to create the LLP is quite cumbersome. I think we need to revisit adopting a new, more streamlined PEU Lesson Plan. Often the lesson plan my students submitted were 10 or more pages. That is excessive.

3. The instructional sequence also had the lowest class mean (2.13) suggesting that I need to revisit how I teach developing an instructional sequence in literacy and that we need to do more in class lesson development.
4. My students did surprisingly well at citing CCSS - ELA Literacy, considering the struggles they had in class.

5. Students that begin TEP in the fall are not ready to complete the ILLS assignment. I will need to:

a. revisit EDUC 335 and 418 to redistribute some of the content without cutting any content I have to teach in EDUC 335 ECE and Spec Ed.

b. redesign the ILLS assignment. I would love to be able to integrate this assignment with an EDUC 331A assignment. Dr. Yoon and I have discussed incorporating this type of assignment into the Climate Change section of the course. I hope he will teach the course in the fall so we can implement these plans.

MEAN  

Connected Documents  
- Performance Mean Scores on Integrated Literacy Lesson Set  
- Performance Means Scores on Integrated Literacy Lesson Set 2008-2010  

**Target:**  
Sections 2.0 and 7.0 of the Integrated Literacy Lesson Set address the how well the students take into consideration the effects on the learning community in the professional planning and teaching decisions. The findings are unusual. The mean score for section 2.0, which addresses planning instruction to meet the diverse needs of the classroom, was 1.9, indicating that this group needs intensive work in this area. However, Section 7.0 examines how well the student delivers the instruction to the same diverse that was planned for. The mean score for this section was 2.59, suggesting that this group of students were much better at observing needs and adjusting teaching to meet those needs than they were at planning for those needs.  

**Findings (2012-2013) - Target: Met**  
With instructional adjustments made for the 2012 elementary education cohort, the students were more effective at planning (2.58) and implementing instruction (2.86) to meet the diverse needs of the students in the classroom. Students consulted and collaborated with mentor teachers more often to become better at planning and adjusting instruction to meet diverse needs. This group of students committed to better communication with their mentor teachers at my suggestion in introducing this assessment. I was pleased that they made this effort through a suggestion rather than a directive. This group of students demonstrated a real commitment to improving their teaching craft, showing maturity and dedication to the field of education.

- 2.5 The arts

DSU Learning Goal Associations:
- 1 UG Student Learning Goal: Competent Communicators
- 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
- 3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 2: Grade Point Averages for Content Knowledge

Evidence of content knowledge in each of the seven areas required for Elementary Education majors consists of sets of grades that apply to each of the seven content areas. Grades from courses required of every elementary education major are the only grades reported in this assessment. All data is drawn from the most recent of available sources and includes only program completers.

1. Reading, Writing and Oral Language, is clearly the most expansive content area because Language Arts requires that the processes of reading, writing, speaking, listening, and viewing all be addressed. Thus, courses were selected that expressly address each of these components. Composition I and II (ENGL 101, ENGL 102) were necessary to include because these courses are designed to develop skills and competence in writing prose compositions, reading, and listening. Problems in logical thought, organization of ideas, and comprehension in reading also receive special attention. Speech (ENGL 200) is
included because it provides the fundamentals of effective oral expression. Developing Reading in Elementary School (EDUC 335) and Integrating Children’s Literature through Language Arts (EDUC 340) are the first two courses required in the Elementary Education literacy block.

2. Science has several contributing to content knowledge. Our elementary education candidates have a sound general education background in science with the required courses, BIOL-110 Essential Topics in Biology (4 credit hours), PSED 201 Physical Science Survey, and PSED 207 Earth/Space Science. Their experience in rounded out with EDUC 331a Elementary Science Methods.

3. Elementary Education majors will begin the mathematics sequence with MTSC 100 starting in Fall 2017 to assist them in passing Core Praxis Mathematics and Praxis II Mathematics subtest. If they pass the Core Praxis test they will may take a mathematics elective in spring of the freshman year. If the Praxis test has not been passed, they may choose from MTSC 107, 108, or 109 for mathematics. In the Fall Sophomore semester, students will take MTSC 205 Math for Teachers I.

4. Social Studies, is another expansive standard because so many disciplines are integrated into the teaching of Social Studies. Our candidates are required to take the following general education courses contributing to their content knowledge: HIST 201 American History to 1865 or HIST 203 African American Experience to 1865, and GEOG 201 World Geography. Beginning in the 2009-10 academic year, students will no longer be able to substitute African American Experience for American History in the pursuit of an education degree. Additionally, our candidates are required to take EDUC 318 Multicultural Education, which also satisfies the University's requirement for Global Societies. Elementary Education candidates also take EDUC 303 Methods of Teaching Social Studies in Elementary and Middle Schools.

5. Candidates must take Introduction of Art (ART 101) or Music (MUSC 101) to gain an appreciation of those disciplines and understand the nature of the content in each discipline. The choice of Integrating the Visual Arts into Elementary Education (ART 201) or Integrating Music into Elementary Education (MUSC 201) offer the basic methodologies of art and music that are appropriate for integrating art and music in elementary school. Although candidates are required to construct a unit of instruction in these courses, there is no field experience attached to either course.

6. One of the first courses all University students are required to take is Lifetime Fitness and Wellness (MVSC100), which teaches the concepts of wellness, including good nutrition and concepts for maintaining fitness. The course also includes HIV/AIDS awareness as well as drug abuse prevention.

7. In addition to Lifetime Fitness and Wellness, elementary education candidates are required to have Motor Development/Movement Education for Children 0-8 (EDUC 257), which focuses on understanding motor development and fine and gross body movement, as well as adaptations for children who are developmentally delayed.

Source of Evidence: Academic direct measure of learning - other

Target:
Teacher candidates must have a composite GPA of 2.5 or higher for all music and/or art classes.

- Art courses GPA 2.67
- Music courses GPA 3.33

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Development of Elementary Education/Special Education Dual Certification
We are in the process of developing a dual certification program for Elementary Education majors to earn certification in Special Education as well. The certification will only require three additional courses for elementary majors. The benefit of the dual certification to the Elementary Education Program is the increased content knowledge and instructional strategies applying to the instruction of students with diverse needs. Although elementary majors have demonstrated acceptable skill in accommodating diverse learners, this has been an area of relative weakness for the program. Additionally, a dual certification program has the potential to increase enrollment. The program will not draw any more resources from the department to operate because it requires the addition of no new coursework.
We also plan to implement this dual certification program in the middle level program after the programmatic changes it is currently undergoing are complete.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: A curriculum proposal will be submitted to the Education Department Curriculum Committee in March. Conservatively, the proposal should make its way through the curriculum process by January, 2013.
Projected Completion Date: 01/07/2013
Responsible Person/Group: Dr. Elaine Marker, Dr. Billie Friedland, Dr. Gholam Kabria
Budget Amount Requested: $0.00 (no request)

In recent curriculum changes Elementary Education students will take MTSC 100, a new math course that will be offered for the first time in Fall 2017. This course is designed to aid Education majors in passing Core Praxis Mathematics. This course will also aid Elementary Education students to improve their performances on Praxis II Elementary Education Mathematics (5003).

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High
Add Program Assessment

My plan is to add a Program Assessment to EDUC 335 to better track acquisition of this content knowledge. I have primarily focused on lesson planning and teaching strategies predominantly for this course. I need to increase the amount of assessment I do for content knowledge.

**Established in Cycle:** 2015-2016  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Praxis II: Elementary Education Content Knowledge |  
- **Outcome/Objective:** Reading / Language Arts Content Knowledge

**Implementation Description:** Increased Assessment of Content Knowledge  
**Projected Completion Date:** 05/20/2017  
**Responsible Person/Group:** Dr. Elaine Marker
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Prepare majors for success in graduate study, professional school, and careers in industry, research, government, or academia

Graduates of Engineering Physics Program will be prepared majors for success in different places, for example in graduate study, professional school, and careers in industry, research, government, or academia in the 21st century global society.

SLO 1: Students will be able to apply knowledge of mathematics, science, and engineering

Students will be able to apply knowledge of mathematics, science, and engineering

Relevant Associations:

DSU Learning Goal Associations:
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Midterms, quizzes, and final exams
Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program.
Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

Findings (2010-2011) - Target: Not Reported This Cycle

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

M 2: Student course evaluation
Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 5 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment.

Source of Evidence: Student course evaluations on learning gains made

Connected Documents
- Student Survey of Outcomes -BS ENG PHYSICS FALL 2017
- Student Survey of Outcomes -BS ENG PHYSICS Spring 2018

Target:
The student response of survey relating to the student learning outcomes should be > 3.00 in a scale of 5.00.

Findings (2017-2018) - Target: Met

The average of the student response relating to the understanding of the subject matters from the course offered in Fall 2017 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. ENGR 210- Digital Logic, 2. ENGR 309 - Electronic Circuit Analysis 3. ENRG 312 - Signals and Systems 4. PHYS 191 - University Seminar I 5. PHYS 201 - General Physics I, 6. PHYS 202 - General Physics II 7. PHYS 305 Thermal Physics, 8. PHYS 313 - Analytic Mechanics, 9. PHYS 331 - Mathematical Methods I 10. PHYS 341 - Theory of Electricity & Magnetism 11. PHYS 361 - Modern Physics, 12. PHYS 451 - Introduction to Research.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the
subject matters from the course offered in Spring 2018 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

Findings (2016-2017) - Target: Met

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

15. ENGR 309 - Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5.

Please look at the attached documents for details.
Findings (2010-2011) - Target: Not Reported This Cycle

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

SLO 2: Students will be able to design and conduct experiments, as well as to analyze and interpret data

Students will be able to design and conduct experiments, as well as to analyze and interpret data

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Midterms, quizzes, and final exams
Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program.
Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose. 1. ENGR 205 - Analog Circuit I 2. ENGR 210- Intro to Combinational Logic 3. ENRG 220 - Microprocessor Based Systems 4. ENGR 340 - Solid States Electronics 5. PHYS 191 - University Seminar I 6. PHYS 201 - General Physics I 7. PHYS 202 - General Physics II 8. PHYS 305 Thermal Physics 9. PHYS 310 Optical Electronics 10. PHYS 313 - Analytic Mechanics 11. PHYS 316 Intro to Optics 12. PHYS 361 - Modern Physics 13. PHYS 411 - Theory of Electricity & Magnetism 14. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

**Spring 2013**

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:
1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212 - Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circuit Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I
8. PHYS 202 - General Physics II
9. PHYS 314 Analytic Mechanics II
10. PHYS 318 Foundations of BioEngineering
11. PHYS 332 - Mathematical Methods II
12. PHYS 362 - Quantum Mechanics
13. PHYS 412 - Theory of Electricity & Magnetism II
14. PHYS 418 - Theoretical & Experimental Research
15. PHYS 441 Selected Topics (Power Systems)

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. ENGR 205 - Analog Circuit I
2. ENGR 210 - Intro to Combinational Logice
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
6. PHYS 201 - General Physics I
7. PHYS 202 - General Physics II
8. PHYS 313 - Analytic Mechanics
9. PHYS 331 - Mathemetical Methods I
10. PHYS 361 - Modern Physics
11. PHYS 411 - Theory of Electricity & Magnetism
12. PHYS 451 - Introduction to Research
The class average of this student learning outcome was found to be 4 in a scale of 5.
Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212- Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II

The class average of this student learning outcome was found to be 4 in a scale of 5.
Please look at the attached documents for details.
Findings (2010-2011) - Target: Not Reported This Cycle

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

G 2: Ensure every graduate is skilled in physics, mathematics and technology and can apply the related skills and knowledge

The graduates of Engineering Physics Program will gain skills in the area of physics, mathematics and technology and can apply the related skills and knowledge to benefit his/her career, community, and personal life.

SLO 3: Students will be able to design a system, component, or process to meet desired needs within realistic constraints

Students will be able to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability

Relevant Associations:

DSU Learning Goal Associations:

2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 1: Midterms, quizzes, and final exams

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**M 2: Student course evaluation**

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 5 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment.

Source of Evidence: Student course evaluations on learning gains made

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The class average from the courses offered in Spring 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. ENGR 205 Electrical Circuits Analysis, 2. ENGR 302 Material Science for Eng, 3. ENGR 403 Intro to MEMS, 4. PHYS 192 - University Seminar II, 5. PHYS 201 - General Physics I, 6. PHYS 202 - General Physics II,

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

Findings (2015-2016) - Target: Met

The class average from the courses offered in Fall 2015 semester (one which has this outcome fulfilled)

has been taken into account. Below are the courses which have been used for this purpose:

The class average from the courses offered in Spring 2016 semester (one which has this outcome fulfilled)

has been taken into account. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2014-2015) - Target: Met

The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled)
has been taken into account. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

Findings (2013-2014) - Target: Met

Fall 2013: The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Spring 2014: The class average from the courses offered in spring 2014 semester (one which has this outcome fulfilled) has been taken into
account. Below are the courses which have been used for this purpose:
1. ENGR 211 - Intro to sequential circuits
2. ENGR 212- Signals and Systems
3. ENRG 221 - Microprocessor Based Systems
4. ENGR 302 - Material for Engineers
5. ENGR 309 - Electronic Circuit Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics
8. PHYS 202 - General Physics II
9. PHYS 220 Scientific Programming
10. PHYS 311 Fiber Optics Communications
11. PHYS 314 - Analytic Mechanics
12. PHYS 319 Quant Optics Methods & Microscopy
13. PHYS 362 - Quantum Mechanics
14. PHYS 409 Biosensors & Bioinstrumentation
15. PHYS 412 - Theory of Electricity & Magnetism II
16. Theoretical & Experimental Research
17. PHYS 442 - Selected Topics
The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

Findings (2012-2013) - Target: Met

Fall 2012
The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:
1. ENGR 205 - Analog Circuit I
2. ENGR 210- Intro to Combinational Logice
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
6. PHYS 201 - General Physics I
7. PHYS 202 - General Physics II
8. PHYS 305 Thermal Physics
9. PHYS 310 Optical Electronics
10. PHYS 313 - Analytic Mechanics
11. PHYS 316 Intro to Optics
12. PHYS 361 - Modern Physics
13. PHYS 411 - Theory of Electricity & Magnetism
14. PHYS 451 - Introduction to Research
The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Spring 2013
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212- Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circuit Analysis
6. PHYS 192 - University Seminar II
Phys 201 - General Physics I  
Phys 202 - General Physics II  
Phys 314 Analytic Mechanics II  
Phys 318 Foundations of BioEngineering 
Phys 332 - Mathematical Methods II  
Phys 362 - Quantum Mechanics  
Phys 412 - Theory of Electricity & Magnetism II  
Phys 418 - Theoretical & Experimental Research  
Phys 441 Selected Topics (Power Systems) 

The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details. 

Findings (2011-2012) - Target: Met  

The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.  

1. ENGR 205 - Analog Circuit I  
2. ENGR 210- Intro to Combinational Logic  
3. ENRG 220 - Microprocessor Based Systems  
4. ENGR 340 - Solid States Electronics  
5. PHYS 191 - University Seminar I  
6. PHYS 201 - General Physics I  
7. PHYS 202 - General Physics II  
8. PHYS 313 - Analytic Mechanics

15. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5.
Please look at the attached documents for details.

**Findings (2010-2011) - Target: Not Reported This Cycle**

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).
M 2: Student course evaluation

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 5 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment.

Source of Evidence: Student course evaluations on learning gains made

Findings (2010-2011) - Target: Not Reported This Cycle

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

G 3: Ensure that every graduate has strong critical thinking skills.
The graduates of Engineering Physics Program will have strong critical thinking skills to solve or analyze problems in his/her subject area.

SLO 5: The Students will be able to identify, formulate, and solve engineering problems
The Students will be able to identify, formulate, and solve engineering problems
Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 1: Midterms, quizzes, and final exams
Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

12. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the subject matters from the course offered in Spring 2018 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. ENGR 205 - Electrical Circuit Analysis
2. ENGR 302 - Material Science for Engineers
3. ENGR 460 - Power Systems
4. PHYS 192 - University Seminar II
5. PHYS 201 - General Physics I
6. PHYS 202 - General Physics II
7. PHYS 220 - Scientific Programming
8. PHYS 314 - Analytic Mechanics-Dynamics
9. PHYS 332 - Mathematical Methods II
10. PHYS 342 - Theory of Electricity & Magnetism II
11. PHYS 362 - Quantum Mechanics
12. PHYS 413 - Intro to Lasers
13. PHYS 418 - Theoretical & Experimental Research
The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

**Findings (2016-2017) - Target: Met**
The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. ENGR 210 Digital Logic Design
2. ENGR 310 Optical Electronics
3. ENGR 312 Signals & Systems
4. ENGR 340 Solid States Electronics
5.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2017 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

**Findings (2015-2016) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2015 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

was found to be 4 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2016 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2014-2015) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2014 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2015 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. ENGR 211 - Intro to Sequential Circuits, 2. ENGR 212 - Signals & Systems, 3. ENGR 302 - Material Science for Engineers, 4. ENGR 309 -

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

**Findings (2013-2014) - Target: Met**

**Fall 2013:** The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose. 1. ENGR 205 - Analog Circuit I 2. ENGR 210 - Intro to Combinational Logic 3. ENRG 220 - Microprocessor Based Systems 4. ENGR 340 - Solid States Electronics 5. PHYS 191 - University Seminar I 6. PHYS 201 - General Physics I 7. PHYS 202 - General Physics II 8. PHYS 305 Thermal Physics 9. PHYS 310 Optical Electronics 10. PHYS 313 - Analytic Mechanics 11. PHYS 316 Intro to Optics 12. PHYS 361 - Modern Physics 13. PHYS 411 - Theory of Electricity & Magnetism 14. PHYS 441 - Selected Topics, 15. PHYS 451 - Introduction to Research. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2014:** The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2014 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. ENGR 211 - Intro to sequential circuits, 2. ENGR 212 - Signals and Systems, 3. ENRG 221 - Microprocessor Based Systems, 4. ENGR 302 - Material for Engineers, 5. ENGR 309 - Electronic Circuit Analysis, 6. PHYS 192 - University Seminar II, 7. PHYS 201 - General Physics, 8. PHYS 202 - General Physics II, 9. PHYS 220 Scientific Programming, 10. PHYS 311 Fiber Optics Communications, 11. PHYS 314 - Analytic Mechanics, 12. PHYS 319 Quant Optics Methods & Microscopy, 13. PHYS 362 - Quantum Mechanics, 14. PHYS 409 Biosensors & Bioinstrumentation, 15. PHYS 412 - Theory of Electricity & Magnetism II, 16. Theoretical & Experimental Research, 17. PHYS 442 - Selected Topics. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2012-2013) - Target: Met**

**Fall 2012:** The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose. 1. ENGR 205 - Analog Circuit I
2. ENGR 210 - Intro to Combinational Logic
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
6. PHYS 201 - General Physics I
7. PHYS 202 - General Physics II
8. PHYS 305 - Thermal Physics
9. PHYS 310 - Optical Electronics
10. PHYS 313 - Analytic Mechanics
11. PHYS 316 - Intro to Optics
12. PHYS 361 - Modern Physics
13. PHYS 411 - Theory of Electricity & Magnetism
14. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Spring 2013:**
The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:
1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212 - Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 - Electronic Circuit Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I
8. PHYS 202 - General Physics II
9. PHYS 314 - Analytic Mechanics II
10. PHYS 318 - Foundations of BioEngineering
11. PHYS 332 - Mathematical Methods II
12. PHYS 362 - Quantum Mechanics
13. PHYS 412 - Theory of Electricity & Magnetism II
14. PHYS 418 - Theoretical & Experimental Research
15. PHYS 441 - Selected Topics (Power Systems)
The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. ENGR 205 - Analog Circuit I
2. ENGR 210 - Intro to Combinational Logice
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
6. PHYS 201 - General Physics I
7. PHYS 202 - General Physics II
8. PHYS 313 - Analytic Mechanics
9. PHYS 331 - Mathematical Methods I
10. PHYS 361 - Modern Physics
11. PHYS 411 - Theory of Electricity & Magnetism
12. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212 - Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circui Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I
8. PHYS 202 - General Physics II
9. PHYS 311 - Fiber Optics Communications
10. PHYS 318 Foundations of BioEngineering
11. PHYS 332 - Mathematical Methods II
12. PHYS 362 - Quantum Mechanics
13. PHYS 412 - Theory of Electricity & Magnetism II
14. PHYS 418 - Theoretical & Experimental Research
15. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5.

Please look at the attached documents for details.

**Findings (2010-2011) - Target: Not Reported This Cycle**

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**G 4:** Produce graduates that have the broad-based knowledge and communication skills needed for success in the global society.

The graduates of Engineering Physics Program will have the broad-based knowledge and communication skills needed for success in the global society.

**SLO 6:** Students will be able to understand professional and ethical responsibility

Students will be able to understand professional and ethical responsibility

**Relevant Associations:**

**DSU Learning Goal Associations:**

3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

M 1: Midterms, quizzes, and final exams
Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

Findings (2010-2011) - Target: Not Reported This Cycle

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).
**M 2: Student course evaluation**

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranging from 1 to 5 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment.

Source of Evidence: Student course evaluations on learning gains made

This was done as part of indirect measurement. Below are the courses which have been used for this purpose:
1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212- Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circuit Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I
8. PHYS 202 - General Physics II
9. PHYS 314 Analytic Mechanics II
10. PHYS 318 Foundations of BioEngineering
11. PHYS 332 - Mathematical Methods II
12. PHYS 362 - Quantum Mechanics
13. PHYS 412 - Theory of Electricity & Magnetism II
14. PHYS 418 - Theoretical & Experimental Research
15. PHYS 441 Selected Topics (Power Systems)

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. ENGR 205 - Analog Circuit I
2. ENGR 210 - Intro to Combinational Logic
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
6. PHYS 201 - General Physics I
7. PHYS 202 - General Physics II
8. PHYS 313 - Analytic Mechanics
9. PHYS 331 - Mathematical Methods I
10. PHYS 361 - Modern Physics
11. PHYS 411 - Theory of Electricity & Magnetism
12. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212 - Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circui Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I
8. PHYS 202 - General Physics II
9. PHYS 311 - Fiber Optics Communications
10. PHYS 318 Foundations of BioEngineering
11. PHYS 332 - Mathematical Methods II
12. PHYS 362 - Quantum Mechanics
13. PHYS 412 - Theory of Electricity & Magnetism II
14. PHYS 418 - Theoretical & Experimental Research
15. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5.

Please look at the attached documents for details.

**Findings (2010-2011) - Target: Not Reported This Cycle**

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**SLO 7: Students will be able to communicate effectively**

Students will be able to communicate effectively

**Relevant Associations:**

**DSU Learning Goal Associations:**

1 UG Student Learning Goal: Competent Communicators

**Related Measures:**

M 1: Midterms, quizzes, and final exams
Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

**Findings (2010-2011) - Target: Not Reported This Cycle**

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**M 2: Student course evaluation**

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 5 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment.

Source of Evidence: Student course evaluations on learning gains made

**Connected Documents**

**Fall 2013:** The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

**Spring 2014**: The class average from the courses offered in spring 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

**Findings (2012-2013)** - Target: *Met*

**Fall 2012**
The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

**Spring 2013**
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account.
Below are the courses which have been used for this purpose.

1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212 - Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circuit Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I
8. PHYS 202 - General Physics II
9. PHYS 314 Analytic Mechanics II
10. PHYS 318 Foundations of BioEngineering
11. PHYS 332 - Mathematical Methods II
12. PHYS 362 - Quantum Mechanics
13. PHYS 412 - Theory of Electricity & Magnetism II
14. PHYS 418 - Theoretical & Experimental Research
15. PHYS 441 Selected Topics (Power Systems)

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. ENGR 205 - Analog Circuit I
2. ENGR 210 - Intro to Combinational Logic
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

The class average from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212 - Signals & Systems
3. ENGR 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circuit Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I
8. PHYS 202 - General Physics II
9. PHYS 311 - Fiber Optics Communications
10. PHYS 318 Foundations of BioEngineering
11. PHYS 332 - Mathemtical Methods II
12. PHYS 362 - Quantum Mechanics
13. PHYS 412 - Theory of Electricity & Magnetism II
14. PHYS 418 - Theoretical & Experimental Research
15. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in
a scale of 5.

Please look at the attached documents for details.

---

**Findings (2010-2011) - Target: Not Reported This Cycle**

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**M 2: Student course evaluation**

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 5 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measurement of assessment.

Source of Evidence: Student course evaluations on learning gains made

**Connected Documents**

- Student Survey of Outcomes - BS ENG PHYSICS FALL 2017
- Student Survey of Outcomes - BS ENG PHYSICS Spring 2018

**Target:**

The student response of survey relating to the student learning outcomes should be > 3.00 in a scale of 5.00.

**Findings (2017-2018) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the course offered in Fall 2017 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose: 1. ENGR 210 - Digital Logic, 2. ENGR 309 - Electronic Circuit Analysis 3. ENRG 312 - Signals and Systems 4. PHYS 191 - University Seminar I 5. PHYS 201 - General Physics I, 6. PHYS 202 - General Physics II 7. PHYS 305 Thermal Physics, 8. PHYS 313 - Analytic Mechanics, 9. PHYS 331 - Mathematical Methods I 10. PHYS 341 - Theory of Electricity & Magnetism 11. PHYS 361 - Modern Physics, 12. PHYS 451 - Introduction to Research.

The class average of this student learning outcome was found to be 5 in a scale of 5. Please see attached documents for details.

The average of the student response relating to the understanding of the
subject matters from the course offered in Spring 2018 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 5 in a scale of 5. Please see attached documents for details.

Findings (2016-2017) - Target: Met

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2016 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 5 in a scale of 5. Please see attached documents for details.

Findings (2010-2011) - Target: Not Reported This Cycle
Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

SLO 9: The students will gain a recognition of the need for, and an ability to engage in life-long learning

The students will gain a recognition of the need for, and an ability to engage in life-long learning

**Relevant Associations:**

**DSU Learning Goal Associations:**
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 1: Midterms, quizzes, and final exams**
Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

**Findings (2013-2014) - Target: Met**

**Fall 2013:** The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

**Spring 2014:** The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2014 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:

Findings (2012-2013) - Target: Met

Fall 2012:
The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.
1. ENGR 205 - Analog Circuit I
2. ENGR 210 - Intro to Combinational Logic
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
6. PHYS 201 - General Physics I
7. PHYS 202 - General Physics II
8. PHYS 305 Thermal Physics
9. PHYS 310 Optical Electronics
10. PHYS 313 - Analytic Mechanics
11. PHYS 316 Intro to Optics
12. PHYS 361 - Modern Physics
13. PHYS 411 - Theory of Electricity & Magnetism
14. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 5 in a scale of 5. Please look at the attached documents for details.

Spring 2013:
The average of the student response relating to the understanding of the subject matters from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose:
1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212 - Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circuit Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I
8. PHYS 202 - General Physics II
9. PHYS 314 Analytic Mechanics II
10. PHYS 318 Foundations of BioEngineering
11. PHYS 332 - Mathematical Methods II
12. PHYS 362 - Quantum Mechanics
13. PHYS 412 - Theory of Electricity & Magnetism II
14. PHYS 418 - Theoretical & Experimental Research
15. PHYS 441 Selected Topics (Power Systems)

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The average of the student response relating to the understanding of the subject matters from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) have been taken into account. This was done as part of indirect measurement. Below are the courses which have been used for this purpose.

1. ENGR 205 - Analog Circuit I
2. ENGR 210 - Intro to Combinational Logic
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
6. PHYS 201 - General Physics I
7. PHYS 202 - General Physics II
8. PHYS 313 - Analytic Mechanics

15. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 5 in a scale of 5.

Please look at the attached documents for details.

**Findings (2010-2011) - Target: Not Reported This Cycle**

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**SLO 10:** The students will articulate a knowledge of contemporary issues

The students will articulate a knowledge of contemporary issues

**Relevant Associations:**

**DSU Learning Goal Associations:**

1. UG Student Learning Goal: Competent Communicators

**Related Measures:**

**M 1:** Midterms, quizzes, and final exams

Midterms, quizzes, final exams are used to indicate academic direct measure of student learning. The average grade (a numerical number rather than whole course letter grade of A, B, C etc.) for each of the questions of the written exams was converted to a scale of 5 and that was accepted as the direct
measure of assessment of the students. Each question was tied with the course learning goal as well as with the student learning outcomes of the program. Only core courses of this program have been used as a measure.

Source of Evidence: Writing exam to assure certain proficiency level

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**M 2: Student course evaluation**

Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 5 with 1 being the lowest. The feedback from the students was entered in the spreadsheet and the average of the feedback was accepted as the indirect measure of assessment.

Source of Evidence: Student course evaluations on learning gains made

The class average from the courses offered in Spring 2017 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

**Findings (2015-2016) - Target: Met**

The class average from the courses offered in Fall 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

The class average from the courses offered in Spring 2016 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2014-2015) - Target: Met**

The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled)

has been taken into account. Below are the courses which have been used for this purpose:

The class average from the courses offered in Spring 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

**Findings (2014-2015) - Target: Met**

The class average from the courses offered in Fall 2014 semester (one which has this outcome fulfilled)

has been taken into account. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

The class average from the courses offered in Spring 2015 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 4 in a scale of 5. Please see attached documents for details.

Findings (2013-2014) - Target: Met

**Fall 2013:** The class average from the courses offered in Fall 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:

The class average of this student learning outcome was found to be 3 in a scale of 5. Please look at the attached documents for details.

**Spring 2014:** The class average from the courses offered in spring 2014 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:
PHYS 192 - University Seminar II, 7. PHYS 201 - General Physics, 8.
PHYS 202 - General Physics II, 9. PHYS 220 Scientific Programming,
10. PHYS 311 Fiber Optics Communications, 11. PHYS 314 - Analytic
PHYS 362 - Quantum Mechanics, 14. PHYS 409 Biosensors &
Bioinstrumentation, 15. PHYS 412 - Theory of Electricity & Magnetism II,
16. Theoretical & Experimental Research, 17. PHYS 442 - Selected
Topics. The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Findings (2012-2013) - Target: Met
Fall 2012
The class average from the courses offered in Fall 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose:
1. ENGR 205 - Analog Circuit I
2. ENGR 210 - Intro to Combinational Logic
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
6. PHYS 201 - General Physics I
7. PHYS 202 - General Physics II
8. PHYS 305 Thermal Physics
9. PHYS 310 Optical Electronics
10. PHYS 313 - Analytic Mechanics
11. PHYS 316 Intro to Optics
12. PHYS 361 - Modern Physics
13. PHYS 411 - Theory of Electricity & Magnetism
14. PHYS 451 - Introduction to Research
The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

Spring 2013
The class average from the courses offered in Spring 2013 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.
1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212 - Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circuit Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I
8. PHYS 202 - General Physics II
9. PHYS 314 Analytic Mechanics II
10. PHYS 318 Foundations of BioEngineering

11. PHYS 332 - Mathematical Methods II

12. PHYS 362 - Quantum Mechanics

13. PHYS 412 - Theory of Electricity & Magnetism II

14. PHYS 418 - Theoretical & Experimental Research

15. PHYS 441 Selected Topics (Power Systems)

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.

**Findings (2011-2012) - Target: Met**

The class average from the courses offered in Fall 2011 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. ENGR 205 - Analog Circuit I
2. ENGR 210 - Intro to Combinational Logic
3. ENRG 220 - Microprocessor Based Systems
4. ENGR 340 - Solid States Electronics
5. PHYS 191 - University Seminar I
6. PHYS 201 - General Physics I
7. PHYS 202 - General Physics II
8. PHYS 313 - Analytic Mechanics
9. PHYS 331 - Mathematical Methods I
10. PHYS 361 - Modern Physics
11. PHYS 411 - Theory of Electricity & Magnetism
12. PHYS 451 - Introduction to Research

The class average of this student learning outcome was found to be 4 in a scale of 5. Please look at the attached documents for details.
The class average from the courses offered in Spring 2012 semester (one which has this outcome fulfilled) has been taken into account. Below are the courses which have been used for this purpose.

1. ENGR 211 - Intro to Sequential Circuits
2. ENGR 212 - Signals & Systems
3. ENRG 221 - Microprocessor Based Systems II
4. ENGR 302 - Material Science for Engineers
5. ENGR 309 Electronic Circui Analysis
6. PHYS 192 - University Seminar II
7. PHYS 201 - General Physics I

13. PHYS 412 - Theory of Electricity & Magnetism II
14. PHYS 418 - Theoretical & Experimental Research
15. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5.

Please look at the attached documents for details.

Findings (2010-2011) - Target: Not Reported This Cycle

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

M 2:Student course evaluation
Indirect measurement consists of survey conducted by the students on the course learning goals at the end of the semester. The students circle their understanding on the course learning goals in a scale ranges from 1 to 5 with 1 being the lowest. The feedback from the students was entered in the spread
sheet and the average of the feedback was accepted as the indirect measurement of assessment.

Source of Evidence: Student course evaluations on learning gains made

**Connected Documents**

15. ENGR 309 Electronic Circuit Analysis

The class average of this student learning outcome was found to be 4 in a scale of 5.

Please look at the attached documents for details.

**Findings (2010-2011) - Target: Not Reported This Cycle**

Has not been reported for this cycle because of the lack of data tracking. Will be reported in next cycle (2011-12).

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Assessment Committee formed**

1. An Assessment committee has been formed (a total of six faculty members and Department Assistant Ms. Amal Juracka) to coordinate the assessment process of the Department. The committee is chaired by Dr. Mukti M Rana, an Assistant Professor in the Department of Physics and Pre-Engineering. 2. In the Fall of 2011, the committee prepared the syllabi of all the courses for various degree programs of the department. The syllabi were based on a uniform format which has the catalog description of the course, learning outcomes of the course and relationship of the learning outcomes of the course with the student learning outcomes (SLO) of the program which it belongs to, among others. The instructor of the course makes sure that the prepared course syllabus complies with his view. 3. A survey questionnaire has been prepared for each of the courses. These questions are same as learning outcomes of the course. 4. At the end of the semester, the students are asked to fill out their response relating to the understanding of the subject matter covered. They response should be in the scale of
1-10 with 1 being the lowest and 10 being the lowest. 5. The average of the response was determined and linked with the SLO's of the program and that number gives the final indirect measurement of student assessment. 6. Sample feedback form is attached here.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Finished  
**Priority:** High  
**Responsible Person/Group:** 1. Teaching faculty members 2. Assessment committee

---

Mission / Purpose

The Department of English and Foreign Languages at Delaware State University is committed to:

· Contributing meaningfully to the realization of the mission of Delaware state university;

· Continuing its tradition of service in the area of General Education requirements and excellence in teacher education;

· Recruiting more English and Foreign Language majors and minors by instilling in students the notion that a major in English and/or Foreign Languages could be the most effective basis for career preparation;

· Developing students' critical thinking and research skills;

· Increasing students' knowledge, awareness of and appreciation for writing, literature and foreign languages, in undergraduate as well as graduate settings.

Vision

By engaging students in writing that is meaningfully transformative, in literary works that are both reflective and reflexive, in proficiency-driven and culturally stimulating study of Foreign Languages, the Department of English and Foreign Languages will:

· Graduate globally conscious, productive and intellectually sound citizens; and
· Be the nexus of intellectual debate.
Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Recruit more faculty
Recruit qualified full time instructors to help with the teaching of General Education courses, Writing, and Graduate Programs in the Department of English and Foreign Languages.

O/O 1: Recruit more qualified instructors
Recruit more qualified full-time (at least 6) English and (at least 3) Foreign Language instructors to help with our Gen Ed courses, Writing and Graduate Programs. Recruit more qualified full time instructors to help with the teaching of General Education courses, Writing, and Graduate Programs in the Department of English and Foreign Languages. There should be, at least, 5 new full time instructors for English and 2 for Foreign Languages.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
Delaware State University
1.5 Recruit and retain outstanding and engaged faculty

Related Measures:

M 1: Number of new hires for English Program
Number of faculty members hired during the academic year.

Source of Evidence: Administrative measure - other

Target:
5 new full time qualified instructors should be recruited for the English Program by the beginning of 2018-2019 Academic Year.

Findings (2016-2017) - Target: Not Met
No new full time instructors were hired for the Department of English and Foreign Languages for the 2016-2017 Academic Year. Two new teachers were hired for the 2014-2015 Academic Year.

Findings (2010-2011) - Target: Met
Three new faculty members were hired in 2010 through 2011. One of them has specialized in English as a Second Language (ESL), one has speciality in English Composition, and the third has speciality in Literature.

Findings (2009-2010) - Target: Partially Met
2 faculty members were hired for the English Program. The department is expecting to hire an additional faculty member by January 2011 for said program.
Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Recruitment of English instructors
Established in Cycle: 2009-2010

Hiring of Lecturers
Established in Cycle: 2016-2017
The department, in consultation with the AAUP, is going to request the university to turn some of the adjunct instructors into f...

G 2:Service the University
Service the University in the area of General Education course offerings.

O/O 2:Service the University
Improve service to the University by continuing to provide quality instruction in the area of General Education courses.

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors

Related Measures:

M 2:Number Increase of General Education sections
Number of General Education sections should be increased to help many students fulfill the General Education requirements.

Source of Evidence: Service Quality

Target:
Offer more than a total of 150 General Education sections in the department each semester.

Findings (2016-2017) - Target: Met

In Fall 2016 Semester, 81 classes (English 58 and Foreign Languages 23) were taught by full time faculty, and 73 (English 56 and Foreign Languages 17) classes were taught by full time faculty. In Spring 2017 Semester, 84 classes (English 59 and Foreign Languages 25) were taught by full time faculty, and 61 classes (English 46 and Foreign Languages 15) were taught by adjunct faculty.
Findings (2010-2011) - Target: Not Met
Offered 132 Gen Ed sections total in the Department for Fall 2010 and 130 sections in Spring, 2011. The target was not met because the class sizes were increased, for example, English Composition classes caps were increased from 20 to 25, and Literature classes caps were increased from 30 to 35.

Findings (2009-2010) - Target: Not Met
Offered 145 Gen Ed sections in the Department for Fall 2009 and 115 for Spring 2010. The target was not met because the sizes of the classes were made bigger, for example, the caps for English Composition classes were increased from 20 to 25, those of Literature classes were increased from 30 to 35, and those of Speech classes were increased from 25 to 30.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Target for Gen Ed classes to be offered
Established in Cycle: 2010-2011
Revise the achievement target from 150 to 130 because the class sizes have been increased.

G 3: Develop programs
Develop Graduate Programs through strengthening existing undergraduate and graduate programs.

O/O 3: Develop Graduate Programs
Strengthen existing undergraduate programs in order to develop graduate programs in English and Foreign Languages that will help enhance the economy of the state and the region.

Relevant Associations:

DSU Learning Goal Associations:
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors

Related Measures:
M 3: Reinforcement of existing curricula and improvement of new programs
Revision of current undergraduate curricula and improvement of English Language Institute (ELI) and M.A. in Teaching English as a Second Language (TESOL).

Source of Evidence: Curriculum/syllabus analysis of course to program

Target:
The chair, in consultation with the Curriculum Committee, will review the current curricula and recommend improvements by the end of every academic year.

Findings (2016-2017) - Target: Met
The curriculum of the English Program was revised. The new curriculum is effective from Fall 2017.

The changes in General Education courses are as follows:

- Reduction of Natural Science from two (2) required courses to one (1) required course.
- MTSC 107, Math & Data Analysis, replaces MTSC 101, Survey of Math I. This change has been done by the Math Department.
- The option of MTSC 108, Math & the Environment, or FIN 102, Money Matters. Either of these choices fulfills the quantitative reasoning requirement.
- Addition of PHL 101: Critical Thinking as a required course; this serves as one of the Arts and Humanities requirement, it fulfills the Critical Thinking or Problem Solving requirement, and it better prepares students considering graduate school in the Humanities or Law School.

The changes in the major include the following:

- Both ENGL 201: World Literature I and ENGL 202: World Literature II will be required; previously, only one section was required. This better prepares students for graduate school and or employment.
- Both ENGL 205, African American Literature I, and ENGL 206, African American Literature II, will be required; previously, only one section was required. This better prepares students for graduate school and or employment. This new requirement also guarantees students will fulfill the African American Experience requirement.
- ENGL 410, Structure of Modern English, is a required course; previously, it was only required for English Education students. This course will better prepare students for graduate school and or employment because it deals with the in-depth analysis of descriptive and prescriptive grammar at a very high level.
- The reduction of five (5) English electives to four (4) English Electives,
but there is no reduction in number of English courses required. Rather, there is an increase in the number of English courses required by two (2). The addition of credits was taken from the deletion of the second Natural Science course and the use of the PSYC 201 as the required Social Science course.

English Language Institute (ELI) Program is up and running. Other new programs that will begin in Spring 2018 Semester are MA TESOL/Bilingual Ed., TEL/Bilingual Ed. (minor), and TELL online Graduate Certificate.

**Findings (2009-2010) - Target: Met**
The curriculum committee of the department reviewed all the curriculum of the department. The Teaching English as a Second Language (TESL) program was implemented, and three graduate students enrolled in the program.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Recruitment of English instructors**

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Number of new hires for English Program
- **Outcome/Objective:** Recruit more qualified instructors

**Target for Gen Ed classes to be offered**
Revise the achievement target from 150 to 130 because the class sizes have been increased.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Number Increase of General Education sections
- **Outcome/Objective:** Service the University

**Projected Completion Date:** 05/31/2012
**Responsible Person/Group:** Chair of the department.
Hiring of Lecturers
The department, in consultation with the AAUP, is going to request the university to turn some of the adjunct instructors into full time lecturers. Each lecturer will be required to teach fifteen credit hours a semester without other departmental duties.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Number of new hires for English Program | Outcome/Objective: Recruit more qualified instructors

Implementation Description: The chair, in consultation with the personnel committee of the department, will recommend to the Dean of the College of Arts Humanities ans Social Sciences the names of some adjuncts who will be hired as full time lecturers.
Projected Completion Date: 03/30/2018
Responsible Person/Group: Chair of Department of English and Foreign Languages (DEFL), Personnel Committee of the DEFL, and Dean of the College of Arts Humanities and Social Sciences.

Annual Report Section Responses

Executive Summary (1-2 pages)

Executive Summary
The Department of English and Foreign Languages (DEFL) continues to serve as the department that provides a majority of General Education/CORE classes to the entire student body. The classes are Composition I and II, Speech, Foreign Languages, World Literature I and II, and African American Literature I and II. With only 18 full time faculty, the department continues to rely heavily on adjuncts to teach 100 and 200 level classes. In Fall 2017 Semester, 87 classes (English 60 and Foreign Languages 27) were taught by full time faculty, and 75 classes (English 61 and Foreign Languages 14) classes were taught by adjunct faculty. In Spring 2018 Semester, 84 classes (English 59 and Foreign Languages 25) were taught by full time faculty, and 66 classes (English 52 and Foreign Languages 14) were taught by adjunct faculty.

According to the data of the DSU Institutional Research, Planning, and Analytics (IRPA), the Department of English and Foreign Languages (DEFL) has the highest Annual Student Credit Hours, 19,392 in 2017, and 19,623 in 2018. This means the DEFL brings in the highest tuition revenue to DSU.

English is the only major program in the DEFL. The minor programs are English, French, Spanish, and Theater. The English Language Institute (ELI) program started in the Fall Semester of 2017.

Fall 2017
Session A
Students:
6 Students Enrolled

Courses:
14 credit hours total during Session A (weeks 1-8)
4 - 3 credit hour classes
2 courses (6 credit hours) taught by Schalea Sanders - Adjunct Instructor
2 courses (6 credit hours) taught by Sarah Baird - Adjunct Instructor
2 - 1 credit hour classes
2 courses (2 credit hours) taught by Dr. Bluemel

Session B

Students:
7 Students Enrolled

Courses:
14 credit hours total during Session B (weeks 9-16)
4 - 3 credit hour classes
1 course (3 credit hours) taught by Dr. Bluemel
1 course (3 credit hours) taught by Schalea Sanders - Adjunct Instructor
2 courses (6 credit hours) taught by Sarah Baird - Adjunct Instructor
2 - 1 credit hour classes
1 course (1 credit hour) taught by Dr. Bluemel
1 course (1 credit hour) taught by Tina Petrovic (overload)

ELI Certificates Awarded: 3

Fall 2017 Totals:
- 7 students total served (over both sessions)
- 3 students earned ELI Certificate
- 28 credit hours of courses
- 6 credit hours taught by full time faculty as part of teaching load
o 1 credit hour taught by full time faculty as overload
o 21 credit hours taught by adjunct instructors.

**Spring 2018**

Session A

Students:
8 Students Enrolled

Courses:
14 credit hours total during Session A (weeks 1-8)

4 - 3 credit hour classes
1 course (3 credit hours) taught by Dr. Donna Butler - Adjunct Instructor
1 course (3 credit hours) taught by Schalea Sanders - Adjunct Instructor
2 courses (6 credit hours) taught by Sarah Baird - Adjunct Instructor

2 - 1 credit hour classes
2 courses (2 credit hours) taught by Tina Petrovic

Session B

Students:
7 enrolled

Courses:
14 credit hours total during Session B (weeks 9-16)

4 - 3 credit hour classes
1 course (3 credit hours) taught by Dr. Donna Butler - Adjunct Instructor
1 course (3 credit hours) taught by Schalea Sanders - Adjunct Instructor
2 courses (6 credit hours) taught by Sarah Baird - Adjunct Instructor

2 - 1 credit hour classes
2 courses (2 credit hours) taught by Tina Petrovic

• • 1 of these courses (1 credit hour) was overload

**ELI Certificates Awarded: 3**

Spring 2018 totals:
- 8 students total served (over both sessions)
- 3 students earned ELI Certificate
- 28 credit hours of courses o 3 credit hours taught by full time faculty as part of teaching load
  o 1 credit hour taught by full time faculty as overload
  o 24 credit hours taught by adjunct instructors.
Two students enrolled in the MA TESOL/Bilingual Education Program in the Spring Semester of 2018, and three enrolled in the Summer Semester of 2018.
The SAT and ACT scores are used to place students in English Composition classes, and the cut scores are the following:

**Writing SAT Scores**

- 420 and Below - English Composition 101-IRWI (Intensive Reading and Writing Instruction)
- 421-599 - English Composition 101
- 600 and above - English Composition Honors-101H

**Writing ACT Scores**

- 17 and Below - English Composition 101-IRWI (Intensive Reading and Writing Instruction)
- 18-24 - English Composition 101
- 25 and Above - English Composition Honors-101H

Five sections of World Literature I and II and one section of African American Literature I were taught online during the 2017-2018 Academic Year. One section of World Literature II was taught online during the Summer Semester of 2018. The online classes have high enrollments.
The revised English Curriculum took effect in the Fall Semester of 2017. The following are the changes:
The changes in General Education courses are as follows:
- Reduction of Natural Science from two (2) required courses to one (1) required course.
- MTSC 107, Math & Data Analysis, replaces MTSC 101, Survey of Math I. This change has been done by the Math Department.
· The option of MTSC 108, Math & the Environment, or FIN 102, Money Matters. Either of these choices fulfills the quantitative reasoning requirement.

· Addition of PHL 101: Critical Thinking as a required course; this serves as one of the Arts and Humanities requirement, it fulfills the Critical Thinking or Problem Solving requirement, and it better prepares students considering graduate school in the Humanities or Law School.

· Addition of INFO 101: Applying Computers fulfills the computer competency requirement.

· The current required course of PSYC 201: Intro to Psychology will fulfill the Social Science requirement, and no second social science course will be required. It will also fulfill the Wellness and the Self-Evaluation requirements.

The changes in the major include the following:

· Both ENGL 201: World Literature I and ENGL 202: World Literature II will be required; previously, only one section was required. This better prepares students for graduate school and or employment.

· Both ENGL 205, African American Literature I, and ENGL 206, African American Literature II, will be required; previously, only one section was required. This better prepares students for graduate school and or employment. This new requirement also guarantees students will fulfill the African American Experience requirement.

· ENGL 410, Structure of Modern English, is a required course; previously, it was only required for English Education students. This course will better prepare students for graduate school and or employment because it deals with the in-depth analysis of descriptive and prescriptive grammar at a very high level.

· The reduction of five (5) English electives to four (4) English Electives, but there is no reduction in number of English courses required. Rather, there is an increase in the number of English courses required by two (2). The addition of credits was taken from the deletion of the second Natural Science course and the use of the PSYC 201 as the required Social Science course.

Dr. Edward Dawley was granted tenure, and Dr. Amanda Anderson was promoted to Associate Professor.

Dr. Fidelis Odun Balogun retired from the university at the end of the academic year, May 25, 2018.

Laboratory Technician: Ezra Nwoke

Administrative Secretary: Dawn Bordley

**Unit(s) Initiatives accomplished in this cycle**

**Unit Initiatives Accomplished in 2017-2018**

**Goals**

1. Increase the percentage of declared majors and minors by 10% by 2020:

   · Movement toward this goal is very encouraging. English is the only major in the department. In Fall 2017, there were 22 English majors, and the number increased to
30 in Spring 2018 which is 36%.

- There were 5 students in English minor in Fall 2017, and the number increased to 6 in Spring 2018 which is 20%.

- English Education has been deactivated as a major and as a minor. The two remaining students have graduated in Fall 2017 and Spring 2018.

- Spanish has been deactivated as a major. One student has graduated in Spanish in Spring 2018.

- The deactivation of Spanish as a major has increased the enrollment of Spanish Minor. In Fall 2017, there were 12 Spanish minors, and the number increased to 15 in Spring 2018 which is 25%.

- The enrollment for French Minor was 3 in Fall 2017 and 2 in Spring 2018.

- The enrollment for Theater Minor is encouraging. There were 13 Theater Minors in Fall 2017 and 13 Minors in Spring 2018.

2. Increase the number of DSU students who study abroad and serve as ambassadors at a rate of 10% by 2020 through both existing and new study abroad programs and MOUs to advance the University's and Department's missions and prepare graduates to compete effectively in the global marketplace.

- French and Spanish have been deactivated as majors hence there are no more students to go abroad to fulfill the Study Abroad requirement.

- One student, Sydney Green, came with her mother to appeal to the chair to let her do something else in place of the Study Abroad requirement because she was afraid of going outside the U.S.A.

- New initiative must focus on increasing the number of short term study abroad opportunities for students who are not interested in spending a semester or summer abroad.

3. Increase the use of technology in the classroom through faculty workshops and existing resources (e.g. SmartBoards, BlackBoard, i-Clickers).

- The Technology Committee of the department is assisting the faculty to use the available technology resources.

- English Composition I and II, World Literature I and II, and Speech are offered online.

- New initiative must include offering online option for at least one section of all General Education classes provided by the department.

4. Create a series of faculty professional development workshops related to pedagogy and curricula development.

- Some faculty members attended workshops related to pedagogy and curricula development which were organized by Center for Teaching and Learning (CTL)

- New initiative must include offering more workshops regarding pedagogy and curricula development.
5. Increase the number of faculty submissions for publications through a voluntary department writing workshop.
   · Through the encouragement of the chair and promotion incentives, many faculty presented at conferences, and some got their papers published.
   · The number of publication submissions has increased.

6. Increase the number of faculty applications in state and national grants and fellowships by a rate of 10% by 2020.
   · One faculty member submitted a joint grant application with Caesar Rodney School District connected to TESOL. The application was successful.
   · Awarded Grants

   § Project Title: Instructional practices, proficiency assessment and language development in dual-language immersion classrooms: A longitudinal study.

   · Educator Preparation Partnership Grant, Teacher & Leader Effectiveness Branch of the State of Delaware Department of Education. August 2017 - July 2020. Partnered with Caesar Rodney School District. $176,945 research and professional development grant.

7. Increase the number of students accepted to graduate programs by a rate of 10% by 2020.
   · Out of the 5 students who graduated in Spring, 2018, only one is going to graduate school.
   · New initiative must consider action items which will better prepare students for graduate studies. Since the languages have been deactivated as majors, very little is being done to prepare students interested in languages for graduate studies. The State of Delaware has made it a requirement that every high school student should know two foreign languages before graduating from high school hence there is the need in the state for language teachers. This is why the foreign languages that have been deactivated should be reactivated.

   Faculty Lines

The department needs more full time faculty, perhaps at the instructor level, with advance degrees especially for Composition and Speech. Since Dr. Balogun has retired, his replacement should be a Writing Coordinator who will be in charge of English Composition and Speech. This will allow tenure track and tenured faculty to concentrate on the majors. The MA TESOL and the new ELI programs need full time faculty as well.

Unit(s) Honors/Awards and Achievements
Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

**Future Strategic Goals**

1. Increase the percentage of declared majors and minors by 10% by 2020. High schools will be visited by a team from the department to convince students to major in English because of the opportunities available to English graduates.

2. Increase the use of technology in the classroom through faculty workshops and existing resources such as SmartBoards, Blackboard, and i-Clickers.

3. Create a series of faculty professional development workshops related to pedagogy and curricula development. The Center for Teaching and Learning (CTL) will be utilized.

4. Increase the number of faculty applications in state and national grants and fellowships by a rate of 10% by 2020. Faculty will be encouraged to attend grant writing workshops.

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

**KPIs #1 and #10**

a) Number of undergraduates participating in undergraduate research outside the Capstone: Three

b) Number of undergraduates participating in Study Abroad: Two

c) Number of undergraduates participating in Service Learning: One

d) Number of undergraduates participating in other Experiential Learning: Two

e) Number of undergraduates participating in Sustainability Courses and Activities: One

Please, see the attached spread sheet for more information on KPIs #1 and #10. There are two students whose names do not appear on the English spread sheet because they were English Education majors. They participated in research. The presented papers at the Eighth Annual Undergraduate Student Research Conference at Arcadia University. Their names and topics are:

*Just a Girl with a Scarf on Her Head: A call for Accurate Representation of Muslims in Young Adult Literature*

Noelle Mouhtarim, Delaware State University

"And the Gates of Heaven Stand Open": The Significance of the Supernatural in August Wilson and Tony Kushner
Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. 

a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  

b) Have these changes been implemented? If not, when will they be implemented?  

c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

Closing the Assessment Loop

- The department has adjusted the SAT and ACT placement scores based on the data of the pass and failure rates of ENGL 101I and ENGL 101.

Changes have been made to the English Curriculum to improve student performance on standardized tests and better prepare the students for graduate school and employment. The new curriculum took effect from Fall 2017.

- An assessment alignment grid for the English Language Institute (ELI) has been developed to map all learning outcomes and objectives directly to courses, syllabi, and rubrics.

- An assessment alignment grid for the MA TESOL / Bilingual Education program (and associated tracks) has been developed to map all learning outcomes and objectives directly to courses, syllabi, and rubrics.

- New final assessment courses have been developed for the MA TESOL / Bilingual Education program that offer two tracks: 1 - Action based research and 2 - publishable thesis.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

- *Annual Report Spread Sheet English and Foreign Languages 2017-2018*
Mission / Purpose

The Department of English and Foreign Languages at Delaware State University is committed to: · Contributing meaningfully to the realization of the mission of Delaware state university; · Continuing its tradition of service in the area of General Education requirements and excellence in teacher education; · Recruiting more English and Foreign Language majors and minors by instilling in students the notion that a major in English and/or Foreign Languages could be the most effective basis for career preparation; · Developing students’ critical thinking and research skills; · Increasing students' knowledge, awareness of and appreciation for writing, literature and foreign languages, in undergraduate as well as graduate settings.

Vision: By engaging students in writing that is meaningfully transformative, in literary works that are both reflective and reflexive, in proficiency-driven and culturally stimulating study of Foreign Languages, the Department of English and Foreign Languages will: graduate globally conscious, productive and intellectually sound citizens; and be the nexus of intellectual debate.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning Goals

English majors will be (1) competent communicators; (2) effective inquirers; (3) critical thinkers; (4) ethical, collaborative and productive citizens; and (5) independent learners.

SLO 1: Students will apply effective writing skills.

English majors will apply effective writing skills: knowledge of the writing process, correct use of grammar and mechanics, ability to create a clear, coherent, well-supported document. If the document is research based, the student must also
demonstrate an understanding of correct paraphrasing and documentation of sources using either MLA or APA styles.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators

Related Measures:

M 1: Senior Seminar - writing component

All writing courses (Comp I, Comp II, Advanced Composition, Creative Writing, Literature courses) prepare the English major for the writing component of the Senior Seminar project. While enrolled in Senior Seminar, the student will identify a paper topic and will select a thesis committee that includes the primary English adviser, the capstone professor and a third professor from any other appropriate academic discipline. The student then submits the thesis plan, in writing, to the capstone professor. The end product is a well-researched, well documented 15 page paper, with minor grammatical and/or mechanical errors. The paper must be coherent and well supported. The student must earn a C or higher to pass the course and receive the BA in English.

Source of Evidence: Senior thesis or culminating major project

Target:
Graduating seniors will successfully complete the Senior Seminar.

SLO 2: Students will acquire effective oral communication skills.

English majors will acquire the ability to effectively communicate orally, organize thoughts and articulate them clearly, as well as use Standard English effectively.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators

Related Measures:

M 2: Senior Seminar - Oral presentation component

Oral Presentation of the Senior Seminar Paper must be done by the English major before an audience which consists of a committee of professors, or, if the adviser chooses, a literature class. During this presentation, the student must demonstrate the ability to clearly deliver a detailed and organized presentation in Standard English. If a visual aid is used, it must reflect the student's awareness of the needs of the audience. The oral presentation is graded using a modified version of the university's standard rubric.
Source of Evidence: Senior thesis or culminating major project

**Target:**
A grade of "C" or higher must be obtained by a student to pass the Senior Seminar and receive a BA in English.

**SLO 3: Students will continue to become effective analytical readers.**

English majors will continue to become effective readers who are able to read all genres of literature analytically.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 3: Senior Seminar - Analytical Reading Component**

During Senior Seminar, the English major must demonstrate his or her ability to read analytically. Each student will be responsible for researching a theory and or context of a specific time period of a literature as well as explore writings of that time. Formal examinations and the formal 15 page research paper will determine whether the student was able to do this successfully.

Source of Evidence: Capstone course assignments measuring mastery

**Target:**
The student must earn a C or higher to pass Senior Seminar and earn the BA in English.
90% of the students will pass Senior Seminar.

**SLO 4: Students will understand the content and context of literature.**

English majors will understand the content and context of World Literature, English Literature, African American Literature, and American Literature.

**Relevant Associations:**

**DSU Learning Goal Associations:**
1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

**Related Measures:**

**M 4: Senior Seminar - Content**

The English major will demonstrate an understanding of the content and context of English and American literature through formal examinations and a 15 page research paper.
Source of Evidence: Senior thesis or culminating major project

**Target:**
The average of the examinations and research paper must total a grade of "C" or higher for the student to pass Senior Seminar and earn a BA in English. 90% of the students will obtain a grade of "C" or higher.

**SLO 5: Students will demonstrate the ability to work independently and collaboratively.**
English majors will demonstrate the ability to work independently and collaboratively to do research and analyse data.

**Relevant Associations:**

**DSU Learning Goal Associations:**
- 3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
- 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Related Measures:**

**M 5: Senior Seminar: Independent and Collaborative Work**

During the Senior Seminar, the English major must demonstrate that he or she can work productively in a group or independently; after all, both skills are necessary for success in the professional world. The capstone professor can, through observation, determine if the student demonstrates the ability to collaborate in small groups. The ability to work independently can be assessed through the student effectively completing the steps of the research paper on time.

Source of Evidence: Portfolio, showing skill development or best work

**Target:**
85% of the students will be successful in demonstrating the important dispositions of independent and collaborative work.
Executive Summary (1-2 pages)

The English Language Institute was a new program that first began enrolling students in Fall 2017. Detailed below are the 1) Mission Statement 2) Goals, 3) Objectives, and 4) an Overview of the 2017-18 program implementation:

Mission Statement -

Fall 2017 Session A
Students: 6 Students Enrolled
Courses:

14 credit hours total during Session A (weeks 1-8)
4 - 3 credit hour classes
2 courses (6 credit hours) taught by Schalea Sanders - Adjunct Instructor
2 courses (6 credit hours) taught by Sarah Baird - Adjunct Instructor
2 - 1 credit hour classes
2 courses (2 credit hours) taught by Dr. Bluemel

Session B

Students: 7 Students Enrolled

Courses:

14 credit hours total during Session B (weeks 9-16)
4 - 3 credit hour classes
1 course (3 credit hours) taught by Dr. Bluemel
1 course (3 credit hours) taught by Schalea Sanders - Adjunct Instructor
2 courses (6 credit hours) taught by Sarah Baird - Adjunct Instructor
2 - 1 credit hour classes
1 course (1 credit hour) taught by Dr. Bluemel
1 course (1 credit hour) taught by Tina Petrovic (overload)

Fall 2017 Totals:

ELI Certificates Awarded: 3

7 students total served (over both sessions)
3 students earned ELI Certificate
28 credit hours of courses

- 6 credit hours taught by full time faculty as part of teaching load
• 1 credit hour taught by full time faculty as overload
• 21 credit hours taught by adjunct instructors.

Spring 2018 Session A

Students: 8 Students Enrolled

Courses:

14 credit hours total during Session A (weeks 1-8)
4 - 3 credit hour classes
1 course (3 credit hours) taught by Dr. Donna Butler - Adjunct Instructor
1 course (3 credit hours) taught by Schalea Sanders - Adjunct Instructor
2 courses (6 credit hours) taught by Sarah Baird - Adjunct Instructor
2 - 1 credit hour classes
2 courses (2 credit hours) taught by Tina Petrovic

Session B

Students: 7 enrolled

Courses:

14 credit hours total during Session B (weeks 9-16)
4 - 3 credit hour classes
1 course (3 credit hours) taught by Dr. Donna Butler - Adjunct Instructor
1 course (3 credit hours) taught by Schalea Sanders - Adjunct Instructor
2 courses (6 credit hours) taught by Sarah Baird - Adjunct Instructor
2 - 1 credit hour classes
2 courses (2 credit hours) taught by Tina Petrovic

1 of these courses (1 credit hour) was overload

Spring 2018 totals:

ELI Certificates Awarded: 3

8 students total served (over both sessions)
3 students earned ELI Certificate
28 credit hours of courses

• 3 credit hours taught by full time faculty as part of teaching load
• 1 credit hour taught by full time faculty as overload
• 24 credit hours taught by adjunct instructors.
Unit(s) Profile

Unit(s) Initiatives accomplished in this cycle

Goals:

- Launch the new English Language Institute (ELI)
  - The new ELI was successfully launched in Fall 2018 and enrolled 7 students in the fall term and 8 students in the spring term.

- Fully implement the online ELI pre-assessment
  - The ELI pre-assessment was fully created and successfully implemented prior to the Fall 2017 term. The main challenge faced with this assessment was the creation of the ELI budget (to be created by July 1, 2017, was not created until September 2017), and the coding of the approved ELI assessment fee to cover the cost of the assessment. As of June 14th, 2018 the fee has not yet been implemented by finance or admissions. As such, the assessment has been successfully been implemented by the program, but the program is still awaiting the coding and creation of the fee.

- Create all new program documents and resources including: Creation of website, marketing materials, student handbook, instructor handbook, revised rubrics, and review current curriculum and CEA (ELI accrediting body) standards.
  - The website was successfully launched and contains all program information and resources.
  - Marketing materials were designed, printed, and distributed for advertising and enrollment.
  - The Student handbook is currently in development and anticipated prior to Fall 2018
  - The Instructor handbook is going through final revisions and is anticipated prior to Fall 2018.
  - Rubrics were developed prior to Fall 2017 and are being fully revised and aligned in Linguafolio prior to Fall 2018.
  - The complete ELI curriculum is being reviewed by measure of the CEA accrediting body standards prior to Fall 2018.

Unit(s) Honors/Awards and Achievements
Program Director, Dr. Brody Bluemel received the following grants/awards:

  - $246,600 research grant over three years
- Educator Preparation Partnership Grant, Teacher & Leader Effectiveness Branch of the State of Delaware Department of Education. Partnered with Caesar Rodney School District.
- Advanced Academic Literacy Modules. Project funded for the 13th cycles of the Delaware State University Teaching Innovation and Enrichment Mini-Grant.
  - $2,000 grant

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

Goals:

1 - Hiring of full-time faculty. This is a strategic goal for the program as we have already exceed capacity and are struggling to meet demands of enrollment for this coming year. There are currently no full time faculty employed in the ELI. There are English & Foreign Language faculty teaching 1-2 courses in the ELI, but full time ELI faculty are requisite to program success.
   Data will be collected by reporting the number of individuals hired in the coming year.

2 - Marketing and Advertisement - Current enrollment is compose primarily of students from China. We seek to expand our current enrollment to include a more diverse population.
   Data will be reported by collecting data (through the applications) of student nationality.

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning, internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.
   N/A - Students in this program are pre-matriculated students.

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. 
   a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  
   b) Have these changes been implemented? If not, when will they be implemented?  
   c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?
a) After completing the first ELI session A in Fall 2017, it became apparent that while we had measures of student performance in classes, we did not have an instrument to measure and account for student performance on specific skills and in achieving specific SLOs. To address this need, the digital portfolio "Linguafolio" (linguafolio.uoregon.edu) was adopted beginning Fall 2017 Session B. This portfolio requires students to document and upload evidence of each individual course and program SLO and then rate themselves as to their level of mastery of that objective. The program instructors then evaluate the students evidence and self-report and provide feedback and evaluation.

b) As noted, these changes were implemented immediately during Session B of Fall 2017, and are currently being further revised prior to the Fall 2018 year to ensure that all rubrics and objectives align with the curriculum and associated measures.

c) Assessments are ongoing, and with the implementation of this new instrument data can easily be accessed and evaluated at the end of each term. This data informs areas of weakness and strength in student achievement and understanding and directs us to changes needed to address any gaps or areas of underperformance.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.
N/A

For graduate program annual reports TABLE 1: Admissions Data: Please upload complete Table 1 for Academic Years 2015-2018 in the Document Management section and connect to this section of the Annual Report.
N/A

For graduate program annual reports TABLE 2: Graduate Student Enrollment by Program. Please upload Table 2 for Academic Years 2015-2018 in the Document Management section and connect to this section of the Annual Report (see template from SGS&R) and provide a narrative here regarding your student admission profile (Table I) and student performance over the last 3 years (AY 2015-AY2018)
N/A

For graduate program annual reports: TABLE 3: Graduate Student Engagement/Productivity: Please report the number of graduate students engaged in each activity in 2015-2018 in the Document Management Section and connect to this section of the Annual Report. (See template from SGS&R)
N/A

For graduate program annual reports TABLE 4: Graduate Student Information. For each activity indicated in TABLE 3, please provide student contact information along with faculty advisor/supervisor (See template from SGS&R). Upload in the
Document Management section and connect to this section of the Annual Report. If the student has received gainful employment or a promotion during their graduate enrollment at DSU, please indicate this information in the space provided. If the student is matriculating into another graduate or professional program, please indicate the program, institution and enrollment term. If your activity required a field supervisor (rather than a faculty advisor), please note this in the comment section.

N/A
Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning Outcome

Our graduates will be able to evaluate different financial assets both as an individual asset and from a portfolio perspective.

SLO 1: Stock, Bonds and Options

Graduates will be able to calculate the intrinsic value of stocks, bonds and options.

SLO 2: Risk of Individual Asset and Portfolios

Graduates will be able to calculate different measures of risk for an individual asset and a portfolio.

SLO 3: Financial Markets & Securities

Graduates will be able to explain how the financial markets operate, and how the major securities are traded.

SLO 4: Saving and Investment Process

Graduates will be able to define the roles of the commercial banks, mutual funds, insurance companies, and pension funds in the savings & investment process.
Mission / Purpose

Fleet Services mission is to provide transportation and maintain DSU vehicles. In addition, this unit strives to meet various departments’ needs.

Goals without Outcome/Objective Relationships Specified

G 2: Maintain vehicles and buses for transportation.
Maintain vehicles and buses for transportation of students and staff.

Goals and Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Provide transportation services to students.
Transport students to designated drop-off and pick-up locations in a safe and timely manner.

O/O 1: Transport students to designated drop-off and pick-up locations.
Transport students to designated drop-off and pick-up locations in a safe and timely manner.

Relevant Associations:

Strategic Plan Associations:
Delaware State University
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
6.6 Create a culture of accountability, high performance and service excellence.

Related Measures:

M 1: Number of students transported per week and shuttles services
Number of students transported per week and shuttles services.

Source of Evidence: Activity volume

Target:
All students at pick-up and drop-off locations are provided services and at least 3 shuttles are run each year.

Findings (2016-2017) - Target: Met
All student passengers were provided services. Number of passenger per week are 3500 - 4000 that use three shuttle during the week.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

**Shuttle Services**  
*Established in Cycle: 2016-2017*  
Providing shuttle services for 3500 - 4000 per week has its challenges. At time staffing could be an issue which cause for me to...

**Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**O/O 2: Vehicle Maintenance**

Maintenance program alerts when vehicles need to be serviced. Depending on the vehicle routine maintenance are scheduled every 3 - 5 months or 5000 miles. Some vehicle servicing is completed once a year. Work orders are generated for servicing at local contract vendors.

**Related Measures:**

**M 2: Vehicle Maintenance**

Maintenance computer program alerts when vehicles need to be serviced/checkered. Routine maintenance are scheduled every 3 - 5 months or 5000 miles. Work orders are generated for servicing at local contract vendors.

Source of Evidence: Activity volume

**Target:**

Vehicles will be monitored monthly in computer program and scheduled for maintenance every 3 - 5 months or every 5000 miles.

**Findings (2016-2017) - Target: Met**

There are over 60 vehicles that's monitor every month. On average each vehicle is schedule for two or three oil change an year. As the years go by vehicles do get older where maintenance become an issue and some of the vehicles will not pass DMV inspection. If repairs are denied vehicles will be removed from maintenance system.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Vehicle Replacement**  
*Established in Cycle*: 2016-2017

Vehicle should be replaced every 6 years or 80,000 miles. Until the University gets to the replacement system, continue to keep vehicles on its routine maintenance schedule. This will help with the lifetime of the vehicle.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Shuttle Services**

Providing shuttle services for 3500 - 4000 per week has its challenges. At times, staffing could be an issue, which causes delays or staff shortages. To address these challenges, we plan to implement part-time staff training or utilize myself to support the shuttle service operations. Having a call list would be beneficial, but even having a call list can be challenging.

- **Established in Cycle**: 2016-2017  
- **Implementation Status**: Planned  
- **Priority**: High  

**Relationships (Measure | Outcome/Objective):**

- **Measure**: Number of students transported per week and shuttle services
- **Outcome/Objective**: Transport students to designated drop-off and pick-up locations.

**Vehicle Replacement**

Vehicle should be replaced every 6 years or 80,000 miles. Until the University gets to the replacement system, continue to keep vehicles on its routine maintenance schedule. This will help with the lifetime of the vehicle.

- **Established in Cycle**: 2016-2017  
- **Implementation Status**: Planned  
- **Priority**: High  

**Relationships (Measure | Outcome/Objective):**

- **Measure**: Vehicle Maintenance  
- **Outcome/Objective**: Vehicle Maintenance
Goals without Outcome/Objective Relationships Specified

G 1: Scientific and Evidence Base of Practice

Scientific and Evidence Base of Practice: integration of scientific information and research into practice

G 2: Professional Practice Expectations

Professional Practice Expectations: beliefs, values, attitudes and behaviors for the professional dietitian level of practice.

G 3: Clinical and Customer Services

Clinical and Customer Services: development and delivery of information, products and services to individuals, groups and populations

G 4: Practice Management and Use of Resources

Practice Management and Use of Resources: strategic application of principles of management and systems in the provision of services to individuals and organizations.

G 5: Culturally Competent Food and Nutrition Services

Program Concentration: Culturally Competent Food and Nutrition Services

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1: Use scientific literature

Students are able to locate, interpret, evaluate and use current scientific literature to make ethical evidence-based practice decisions.

Relevant Associations:
DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 1: Research paper/Project

HMEC 425: Research Method: Students develop a nutrition research topic of interest, write a purpose statement, objectives, and a literature review of a minimum of 10 peer-reviewed publications. Based on this information they develop a research hypothesis and develop the methodology for a research study.

Source of Evidence: Project, either individual or group

Target:
HMEC 425: 75% of students achieve 80% (B) or higher on assignment

Findings (2016-2017) - Target: Met

Target: Met
HMEC 425: 75% of students achieved 80% or higher on assignment

Findings are used to continually improve student’s ability to evaluate research and incorporate it into clinical practice. Nutrition is a constantly changing field that requires them to be able to differentiate between peer-reviewed research findings and anecdotal evidence while not discounting progress in integrative medicine.

M 3: Report of research relevant for implementation into clinical practice

HMEC 492/494: Clinical Rotation: Students evaluate emerging research in dietetics practice through identification of current research relevant to clinical practice. Research on the topic is summarized with documentation of how this research can be implemented into clinical practice.

Source of Evidence: Project, either individual or group

Target:
HMEC 491/494: 100% of students achieve 80% or higher on assignment

Findings (2016-2017) - Target: Not Reported This Cycle
HMEC 491/494: N/A - 2017 is the first year for this class

SLO 2: Communication skills for entry-level practice

Students demonstrate oral and written communication skills including use of current information technologies when communicating with individuals, groups, or government agencies.

Relevant Associations:
DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 2: Personnel Management Assignment

HMEC 492: Students demonstrate professional writing skills in completing a personnel management assignment including a job description, work contract, and employee orientation plan

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
100% of students will score 80% or higher on the assignment.

Findings (2016-2017) - Target: Not Reported This Cycle
HMEC 492: N/A - 2017 is the first year for this class.

M 4: Oral presentation

HMEC 490: Students design, implement, and evaluate a nutrition education class during their community supervised practice. The oral presentation will be evaluation using the Nutrition Class Evaluation form. The evaluation tool will be graded separately.

Source of Evidence: Presentation, either individual or group

Target:
100% of students will score 80% or higher on the assignment

Findings (2016-2017) - Target: Met
Target: Met
100% of students scored 80% of above on this assignment.

SLO 3: Enhance professional development

Students perform the nutrition care process, providing medical nutrition therapy, and deliver information, products and services for disease prevention and health promotion to customers.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

Related Measures:
M 5: Case studies

HMEC 426: Medical Nutrition Therapy Case Studies. In the case study assignment, students demonstrate ability to provide medical nutrition therapy for different disease conditions. Students are evaluated based on correct, incorrect, or incomplete responses.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
80% of students will score 80% or higher on the assignment

Findings (2016-2017) - Target: Not Reported This Cycle
Target: Not reported this cycle. Students are currently in this course

M 6: Nutrition education article

HMEC 490: Students write a nutrition education article concerning emerging trends for publication in the Modern Maturity Center Bulletin (MMC). The article is first submitted to the preceptor who provides feedback that is incorporated into the final product. The final version is graded by the program director.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target:
100% of students will score 80% or higher on the assignment

Findings (2016-2017) - Target: Met
Target: Met
100% of students scored an 80% or above on the assignment.

SLO 4: Participate in management of human resources

Students manages human, financial, and facility resources to provide services to individuals and organizations

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Related Measures:

M 7: Theme Day Project Report

HMEC 491: Students plan a theme day for the supervised practice food service facility including recipes, decorations, budgeting (pre- and post-costing the menu),
marketing, production scheduling, and evaluation.

Source of Evidence: Project, either individual or group

**Target:**
100% of students will score 80% or higher on the assignment

**Findings (2016-2017) - Target: Met**
Target: Met
100% of students scored 80% or above on the assignment

**M 8: Food Safety and Sanitation Audit**
HMEC 491: Students perform a safety and sanitation audit using facility and OSHA criteria.

Source of Evidence: Academic direct measure of learning - other

**Target:**
100% of students will score 80% or higher on the assignment

**Findings (2016-2017) - Target: Not Reported This Cycle**
Target: Not reported this cycle

**SLO 5: Provide culturally competent food and nutrition services**

Students demonstrate culturally competent food and nutrition services

**Relevant Associations:**

**DSU Learning Goal Associations:**
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 9: Nutrition Education Brochure**
HMEC 310: Students interview a client from an assigned foreign culture and develop a nutrition education brochure that is culturally appropriate.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target:**
80% of students will score 80% or higher on the assignment

**Findings (2016-2017) - Target: Met**
Target: Met
80% of students scored 80% or higher on the assignment

**M 10: Preceptor Exit Evaluation**
**Supervised Practice:** Students interact with patients, clients, and employees of other cultures

Source of Evidence: Exit interviews with grads/program completers

**Target:**
100% of students will score 'usually' or 'always' on exit evaluation statement: Student demonstrated cultural competence in interactions/assignments

**Findings (2016-2017) - Target: Not Reported This Cycle**
Target: Not reported this cycle
This evaluation category was added to evaluation forms in September, 2017, because we recognized that it was important to evaluate cultural competency in every aspect of the students' supervised practice.
Mission / Purpose

The goal of the Food Science program is to educate, train, and prepare the next generation of food scientists for career opportunities in the food and allied industries, or for further studies in graduate or professional schools.

Goals without Outcome/Objective Relationships Specified

G 1: Program goal

The goal of the Food Science program is to educate, train, and prepare the next generation of food scientists for career opportunities in the food and allied industries, or for further studies in graduate or professional schools.

Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

SLO 1: Exhibit competency in scholarly writing and oral communication

Students should be able to exhibit excellent organizational, writing and communication skills in reporting their research findings and theses.

Relevant Associations:

DSU Learning Goal Associations:

6 GR Student Learning Goal: All graduate students will demonstrate clear and concise written and oral communication.

Related Measures:

M 1: Thesis writing and defense

Method of Assessment: All students in the MS degree program are required to write a thesis, present the thesis in an open seminar and defend the thesis to their committee. In addition, all M.S. students within the Food Science and Biotechnology program are required to take a graduate seminar course. The organizational, writing and communication skills for all students are evaluated by the thesis committee throughout the two-year program. Assessment Instruments shown in table below.

**SLO 2: Demonstrate knowledge in food policies, production, safety and distribution**

Students will be able to demonstrate knowledge in government regulatory policies, food production, foodborne bacteria species, food safety, food distribution and storage

**Relevant Associations:**

**DSU Learning Goal Associations:**

5 GR Student Learning Goal: All graduate students will demonstrate an understanding of the major ethical issues associated with their discipline and how these issues impact society at large.
8 GR Student Learning Goal: All graduate students as independent learners will demonstrate the ability to integrate knowledge and technology to ensure their professional and personal success.

Related Measures:

M 2: Successful completion of graduate coursework
Method of Assessment: All students in the MS degree program are required to successfully complete graduate level courses in food chemistry, food microbiology and food policies. All students are required to pass all graduate level courses with a minimum grade of "B" or better and maintain a cumulative GPA of 3.0 or better. Graduate faculty evaluate student performance on course work base on test, writing assignments, presentation and final exam. At the end of each academic year the graduate faculty evaluates data on students' performance and decide whether changes are needed on course syllabus or curriculum.

Source of Evidence: Academic indirect indicator of learning - other

Target:
Graduate students are required to maintain a "B" or better in all their course work.

Findings (2016-2017) - Target: Met
All graduate students scored a "B" or better in all graduate level course work.

Related Action Plans (by Established cycle, then alpha):

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Core Knowledge

Students in forensic (B.S.) program must demonstrate learning objectives of the core program by demonstrating ability to:

SLO 1: Evolution

a) Demonstrate knowledge of the role of evolution in biology

Related Measures:

M 1: Cumulative Exam on Core Courses Knowledge
During spring semester of Junior year, in addition to passing all 5 core courses with grade of "C" or better, must pass exam on core knowledge or take addition course (BIOL 498 - Review of Biological Principles)

Source of Evidence: Standardized test of subject matter knowledge

Target:
All students will score 60% or higher on the Biology Cumulative Exam on initial try or on retest

Findings (2016-2017) - Target: Not Met
The Cumulative Exam has been phased out and was not given in this academic year so there are no results from it to report. The department is in the process of transitioning to a course-centered, rubric-based assessment of student work. Some preliminary results from the new assessments are available and are reported below. These results are combined for both Biology program students and Forensic Biology students as both take this course.

Findings (2015-2016) - Target: Not Met
In the spring 2015 administration of the Biology Cumulative Exam, 13 of 29 students (44.8%) did not reach the target score. In the fall of 2015, 4 of these students retook the exam and all passed. Additionally, 6 students took the exam for the first time in the fall of 2015. Of these, 5 (83.3%) passed the exam.

Related Action Plans (by Established cycle, then alpha):
Assessment development
Established in Cycle: 2016-2017
The basic outline of what courses will be assessed and for which outcomes has been developed but the actual course measures using...

Revised measurements
Established in Cycle: 2016-2017
All measures will be revised as they do not adequately measure student progress through the program.

SLO 2: Bio-energy flow
Demonstrate knowledge of energy flow and use by living organisms

Related Measures:

M 1: Cumulative Exam on Core Courses Knowledge
During spring semester of Junior year, in addition to passing all 5 core courses with grade of "C" or better, must pass exam on core knowledge or take addition course (BIOL 498 - Review of Biological Principles)

Source of Evidence: Standardized test of subject matter knowledge

Target:
All students will score 60% or higher on the Biology Cumulative Exam on initial try or on retest

Findings (2016-2017) - Target: Not Met
The Cumulative Exam has been phased out and was not given in this academic year so there are no results from it to report. The department is in the process of transitioning to a course-centered, rubric-based assessment of student work. Some preliminary results from the new assessments are available and are reported below. These results are combined for both Biology program students and Forensic Biology students as both take this course. In an assignment in BIOL 215 assessed using the departmental rubric, the following outcomes were reported - novice - 6.3% satisfactory - 50.0% proficient - 43.8% advanced - 0%

Findings (2015-2016) - Target: Not Met
In the spring 2015 administration of the Biology Cumulative Exam, 13 of 29 students (44.8%) did not reach the target score. In the fall of 2015, 4 of these students retook the exam and all passed. Additionally, 6 students took the exam for the first time in the fall of 2015. Of these, 5 (83.3%) passed the exam.

**SLO 5: Systems Biology**
Demonstrate knowledge of the role of systems, including ecosystems, in biology

**Related Measures:**

**M 1: Cumulative Exam on Core Courses Knowledge**
During spring semester of Junior year, in addition to passing all 5 core courses with grade of "C" or better, must pass exam on core knowledge or take addition course (BIOL 498 - Review of Biological Principles)

Source of Evidence: Standardized test of subject matter knowledge

**Target:**
All students will score 60% or higher on the Biology Cumulative Exam on initial try or on retest

**Findings (2016-2017) - Target: Not Met**
The Cumulative Exam has been phased out and was not given in this academic year so there are no results from it to report. The department is in the process of transitioning to a course-centered, rubric-based assessment of student work. Some preliminary results from the new assessments are available and are reported below. These results are combined for both Biology program students and Forensic Biology students as both take this course. Assessment of this outcome was carried out in BIOL 202 using the departmental rubric and the following findings were reported - an in-class assessment showed 50.0% scored at the novice level, 36.4% scored as satisfactory, 13.6% were proficient and 0% were advanced. In addition, assessment was carried out in BIOL 215 and showed the following outcomes; 8.9% scored as novice, 35.6% scored as proficient and 53.3% scored as proficient and 2.2% as advanced. These results indicate that there is progress in students’ level of understanding of the role of systems in biology from the first year (BIOL202) to the second year (BIOL215).

**Findings (2015-2016) - Target: Not Met**
In the spring 2015 administration of the Biology Cumulative Exam, 13 of 29 students (44.8%) did not reach the target score. In the fall of 2015, 4 of these students retook the exam and all passed. Additionally, 6 students took the exam for the first time in the fall of 2015. Of these, 5 (83.3%) passed the exam.

This measure will be removed and replaced by a course-centered rubric-based assessment

G 2: Application Skills

Students must forensic science skills by successfully completing a research project and an internship experience that are relevant to a career in forensic sciences.

SLO 6: Mock crime scene

Students must participate in mock crime scene activity and demonstrate knowledge of events as relate to forensic biology

**Related Measures:**

M 3: Presentation and Evaluation

Review by Forensic Committee of collective programmatic skills

Source of Evidence: Presentation, either individual or group

**Target:**  
Eighty percent of the students participating in the mock crime scene assignment will achieve no lower than a satisfactory assessment according to the assessment rubric for the assignment.

**Findings (2016-2017) - Target: Not Reported This Cycle**  
The assessment was not carried out in the past year.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the Details of Action Plans section of this report.

**Measurement revision**  
*Established in Cycle*: 2016-2017  
The measure will be revised in the coming year as part of a revision of the Forensic Biology program

SLO 7: Problem solving
Demonstrate knowledge of evidence, especially DNA, and how it is used to solve a forensic problem

**Related Measures:**

**M 2: Internship - Research project**
Must demonstrate expanded application skills through reports on experiences with research and internship

Source of Evidence: Field work, internship, or teaching evaluation

**Target:**
Student will achieve a satisfactory assessment on their post-internship evaluation

**Findings (2016-2017) - Target: Not Reported This Cycle**
Was not assessed in the current year

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Revised measurement**
*Established in Cycle: 2016-2017*
This measure will be removed and replaced by a new measurement to be developed in the coming year

**M 3: Presentation and Evaluation**
Review by Forensic Committee of collective programmatic skills

Source of Evidence: Presentation, either individual or group

**Target:**
All students taking the senior capstone course will achieve a minimum of a satisfactory rating in the ADCS assessment of problem-solving.

**Findings (2016-2017) - Target: Met**
Of the four students who took the Senior Capstone course in this year, all achieved an assessment of proficient or advances (three and one, respectively) in their assessment of problem-solving according to the Senior Capstone rubric.

**SLO 8: Communication**
Communication - Communicates a variety of information in oral and written formats

**Related Measures:**

**M 2: Internship - Research project**
Must demonstrate expanded application skills through reports on experiences with research and internship
Source of Evidence: Field work, internship, or teaching evaluation

Target:
All students will achieve no less than a satisfactory assessment in the ADCS evaluation of speaking in the Biology Senior capstone.

Findings (2016-2017) - Target: Met
This target was met. There were four students who completed the senior capstone and presented their research at Honors Day. Two of them were assessed at the advanced level and two were assessed at the proficient level.

SLO 9: Quantitative Reasoning
Quantitative Reasoning - Analyzes and interprets quantitative data

SLO 10: Scientific Literature
Scientific Literature - Uses scientific literature to support and illuminate written and oral work

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Assessment during the program
Assessing students only at the end of their time in the program does not allow us to track student improvement as they progress through the program.

Established in Cycle: 2015-2016
Implementation Status: Planned
Priority: High

Develop rubric
A rubric to assess student performance for each objective will be developed and student performance will be assessed in multiple courses at different points in the program using assignments that are organic to the courses. This will provide a more complete picture of student performance at various points in the program.

Established in Cycle: 2015-2016
Implementation Status: Finished
Priority: High

Replace exam
The Biology Cumulative Exam does not have a practical way for us to evaluate student success in each of the objectives separately, thus it is an inadequate measure of program student learning outcomes and must be replaced.
Assessment development
The basic outline of what courses will be assessed and for which outcomes has been developed but the actual course measures using the program rubric need to be developed by the relevant faculty and the results reported.

Established in Cycle: 2016-2017
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Cumulative Exam on Core Courses Knowledge | Outcome/Objective: Evolution

Projected Completion Date: 05/12/2018
Responsible Person/Group: Individual faculty

Goals without Outcome/Objective Relationships Specified

G 1: Attitudes

1. General education should focus on the essential attitudes and behaviors that promote reflection and encourage life-long learning, wellness, and engagement with ideas, issues, and new experiences.

G 2: Learning

1. General education should foster the development of critical thinking; curiosity about the social and natural worlds in which we live; appreciation for the complexities of knowledge and tolerance for ambiguity; and a capacity for attaining perspective on one's own life through self-examination and the study of others.

G 3: Communication

1. General education should engage students in activities that strengthen their ability to read, write, speak, listen, and think effectively.

G 4: Moral and Ethical

1. General education should provide students with opportunities to examine and reflect upon moral and ethical problems and issues.

G 5: Information Technology

1. General education should enable students to use technology in order to access and manipulate information competently.

G 6: Breadth

1. General education should enable students to understand and appreciate the ways social and cultural differences and similarities structure human experiences and knowledge -- in the arts, the humanities, mathematics, the natural sciences, and the
social sciences. As an important aspect of general education, students should understand multicultural dimensions of the world in which we live, especially the experiences of people of African descent.

G 7:Breadth and Service

1. General education should emphasize study in breadth and encourage students to explore the ways disciplined inquiry in the major can shed light on broader issues in their own lives and to render service to humanity.

- **SLO 10:** Computer Competency  
  Computer Competency

- **SLO 11:** Multiculturalism

College graduates must understand how to develop and manage human relationships by being able to identify and adapt to the needs, values, expectations, and sensibilities of others. Students must be able to do the following: (a) understand and consider diverse points of view; (b) determine what is appropriate in a given situation given the norms of
groups and cultures which provide guidance for acceptable language and behavior; (c) be open-minded about and inclusive of other cultures; and (d) understand different points of view based on gender, ethnicity, race, or national origin.
Mission / Purpose

The Department of History, Political Science and Philosophy seeks to provide a thorough and dynamic liberal arts education with a multicultural perspective. It does this throughout its curriculum by achieving the broad learning goals outlined by the University and the College of Arts, Humanities and Social Sciences by creating the space for students and faculty to engage in intellectual discovery and independent thinking while preparing students for post baccalaureate schools and careers in relevant fields locally and globally. (Adopted 2011)

This mission fits squarely within the larger DSU mission of:

Delaware State University is a public, comprehensive, 1890 land-grant institution that offers access and opportunity to diverse populations from Delaware, the nation, and the world. Building on its heritage as a historically black college, the University purposefully integrates the highest standards of excellence in teaching, research, and service in its baccalaureate, master's and doctoral programs. Its commitment to advance science, technology, liberal arts, and the professions produces capable and productive leaders who contribute to the sustainability and economic development of the global community. (Adopted by the Board of Trustees, December, 2011)

Details of Action Plans for This Cycle (by Established cycle, then alpha)

increase faculty oversight
Have faculty meet more often with students

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: Faculty will schedule more capstone meetings with students to ensure that the latter stay focused
Projected Completion Date: 05/01/2013
Responsible Person/Group: Dr. Osei
Mission / Purpose

The Department of History, Political Science and Philosophy seeks to provide a thorough and dynamic liberal arts education with a multicultural perspective. It does this throughout its curriculum by achieving the broad learning goals outlined by the University and the College of Arts, Humanities and Social Sciences by creating the space for students and faculty to engage in intellectual discovery and independent thinking while preparing students for post baccalaureate schools and careers in relevant fields locally and globally. (Adopted 2011)

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Increase number of students in majors

To double the number of majors in the two majors, History and Political Science.

Connected Document
- External Review Report History

SLO 4: Increase retention

To achieve 100% retention rate of majors from freshman to sophomore.

Connected Document
- External Review Report History

Relevant Associations:

DSU Learning Goal Associations:
1. 1 UG Student Learning Goal: Competent Communicators
2. 2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. 3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. 4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
9 Increase Enrollment through active recruitment efforts by admissions and faculty

Related Measures:

M 5: Recruitment and retention
Promote the university in the community high schools. Provide a hands on environment in learning to keep the students attention and retain them within the department. Attend presentations at the satellite campuses and offer more courses at these sites. Offer more opportunities to graduate students.

Source of Evidence: Activity volume

Target:
Increase students in department and retain them once they come in.

Findings (2008-2009) - Target: Partially Met
Participate in recruitment efforts such as Open House and New Student Orientation. Also go to high schools and recruit students to come to the department. Maintain the student enrollment in the department

SLO 9: Developing trends and new courses
Develop new courses to reflect developing trends in humanities and social sciences

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status

Related Measures:

M 4: Learning environment
Look at the environment to establish if it is conducive to learning. Need better classrooms that are technologically advanced. Look at the current course offerings to establish if the information relayed to the students are up to date. Increase resources in order to get up to date technology.

Source of Evidence: Climate / Environment

Target:
Developing new courses
Findings (2008-2009) - Target: Partially Met
Working on developing new courses. Waiting for approval from Faculty Senate

G 2: Provide high quality instruction

Provide high quality instruction which meets the needs of all majors within the Department and the General Education Requirements for all non-majors

Connected Document
- External Review Report History

SLO 5: Ensure compliance of accreditation agencies
To review existing programs to ensure that it complies with demands from accreditation agencies

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status

Related Measures:

M 6: Accreditation

Ensure compliance with accreditation agencies. Promote research among faculty and students.

Source of Evidence: External report

SLO 6: Create Philosophy major
To create a Major in Philosophy

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region

Related Measures:

M 3: Quality of curricula
Look at the current curricula and the quality of instruction provided. Create new courses to offer as well as a new major in Philosophy in order to expand the department.

Source of Evidence: Service Quality

**Target:**
In the future to create a major in Philosophy.

**Findings (2009-2010) - Target: Partially Met**
Faculty recruitment of minors in Philosophy has gone up, therefore, making it possible to create a major in the future.

**Findings (2008-2009) - Target: Not Met**
Have not started working on a major in Philosophy

**SLO 7: Better classrooms**
To seek decent and equipped classrooms for department courses.

**Relevant Associations:**

**Strategic Plan Associations:**
- College of Arts, Humanities, & Social Sciences
  2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
  4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
  6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.

**Related Measures:**

**M 4: Learning environment**
Look at the environment to establish if it is conducive to learning. Need better classrooms that are technologically advanced. Look at the current course offerings to establish if the information relayed to the students are up to date. Increase resources in order to get up to date technology.

Source of Evidence: Climate / Environment

**Target:**
Look for more technologically advance classrooms

**Findings (2009-2010) - Target: Not Met**
Lack of resources hinders this

**Findings (2008-2009) - Target: Partially Met**
Requested classrooms in the BOA building where the technology is more up-to-date
SLO 9: Developing trends and new courses
Develop new courses to reflect developing trends in humanities and social sciences

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status

Related Measures:

M 4: Learning environment
Look at the environment to establish if it is conducive to learning. Need better classrooms that are technologically advanced. Look at the current course offerings to establish if the information relayed to the students are up to date. Increase resources in order to get up to date technology.

Source of Evidence: Climate / Environment

Target:
Developing new courses

Findings (2008-2009) - Target: Partially Met
Working on developing new courses. Waiting for approval from Faculty Senate

SLO 10: Expand graduate programs
To expand graduate programs within the department

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status
9 Increase Enrollment through active recruitment efforts by admissions and faculty

Related Measures:

M 3: Quality of curricula
Look at the current curricula and the quality of instruction provided. Create new courses to offer as well as a new major in Philosophy in order to expand the department.

Source of Evidence: Service Quality
Target:
Working on a graduate program in History

Findings (2008-2009) - Target: Partially Met
Courses have been established, curricula has been determined,

SLO 14: Improve classes
Provide faculty development to improve existing classes

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
5 To implement effective assessment criteria in each of the content areas within the College of Arts, Humanities and Social Science
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
8 Develop and infuse cross-cultural/multicultural subject matter into all course materials

Related Measures:

M 3: Quality of curricula
Look at the current curricula and the quality of instruction provided. Create new courses to offer as well as a new major in Philosophy in order to expand the department.

Source of Evidence: Service Quality

Target:
Present pertinent information to today's world in the classroom.

Findings (2008-2009) - Target: Met
Most instructors have made changes to present pertinent information to today's world

M 4: Learning environment
Look at the environment to establish if it is conducive to learning. Need better classrooms that are technologically advanced. Look at the current course offerings to establish if the information relayed to the students are up to date. Increase resources in order to get up to date technology.

Source of Evidence: Climate / Environment
Target:
Make classroom instruction pertinent to what is happening in the world today

Findings (2008-2009) - Target: Partially Met
Most faculty have incorporated current events into classroom instruction

SLO 15: Examine existing programs
Examine existing programs to make them more efficient and effective

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
5 To implement effective assessment criteria in each of the content areas within the College of Arts, Humanities and Social Science
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

Related Measures:

M 3: Quality of curricula
Look at the current curricula and the quality of instruction provided. Create new courses to offer as well as a new major in Philosophy in order to expand the department.

Source of Evidence: Service Quality

Target:
Look at existing programs to see relevance to what is happening in the world today.

Findings (2008-2009) - Target: Partially Met
Made changes to existing programs to ensure relevance to today’s world

M 4: Learning environment
Look at the environment to establish if it is conducive to learning. Need better classrooms that are technologically advanced. Look at the current course offerings to establish if the information relayed to the students are up to date. Increase resources in order to get up to date technology.

Source of Evidence: Climate / Environment

Target:
Look at existing programs to see if the information taught is relevant to today
Findings (2008-2009) - Target: Met
Professors incorporate current events into the courses taught in order to make them relevant to today

SLO 19: Scholarly Presentations
Develop student opportunities for scholarly presentations at all levels

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
3 Create a model of scholarly research for all full time faculty.
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

Related Measures:

M 7: Assessment
Senior Capstones are measures to evaluate the information that students learned throughout the program. It is a way to measure research techniques, how well the student learned to write, and present their research. University Seminar helps the students to learn how to be good students.

Source of Evidence: Evaluations

Target:
students and faculty members to present scholarly presentations

Findings (2008-2009) - Target: Met
some of our students have presented papers at conferences they have attended or even at honor's day on campus. Faculty members have attended conferences where they have presented papers.

M 9: Capstone product and presentation
The capstone process includes faculty student tutorials; written feedback from both primary (1) and secondary (2) advisers; presentation of capstone in front of these three.

Source of Evidence: Capstone course assignments measuring mastery

G 3: Model research and scholarship
To be the model of research and scholarship for the College of Arts, Humanities and Social Sciences
SLO 10: Expand graduate programs
To expand graduate programs within the department

Relevant Associations:

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status
9 Increase Enrollment through active recruitment efforts by admissions and faculty

Related Measures:

M 3: Quality of curricula
Look at the current curricula and the quality of instruction provided. Create new courses to offer as well as a new major in Philosophy in order to expand the department.

Source of Evidence: Service Quality

Target:
Working on a graduate program in History

Findings (2008-2009) - Target: Partially Met
Courses have been established, curricula has been determined,

G 4: Implement effective assessment
To implement effective assessment criteria for the department

SLO 13: Effective Assessment

We will seek more and better assessment of our courses.

Related Measures:

M 7: Assessment
Senior Capstones are measures to evaluate the information that students learned throughout the program. It is a way to measure research techniques, how well the student learned to write, and present their research. University Seminar helps the students to learn how to be good students.
Source of Evidence: Evaluations

**Target:**
Find a way to assess the effectiveness of the curricula

**Findings (2008-2009) - Target: Met**
Senior capstone is a way to test the effectiveness of our curricula.

**SLO 14: Improve classes**
Provide faculty development to improve existing classes

**Relevant Associations:**

**Strategic Plan Associations:**
College of Arts, Humanities, & Social Sciences

2. Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors.
5. To implement effective assessment criteria in each of the content areas within the College of Arts, Humanities and Social Science.
6. Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.

3 Create a model of scholarly research for all full time faculty.
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

Related Measures:

M 7: Assessment
Senior Capstones are measures to evaluate the information that students learned throughout the program. It is a way to measure research techniques, how well the student learned to write, and present their research. University Seminar helps the students to learn how to be good students.

Source of Evidence: Evaluations

Target:
students and faculty members to present scholarly presentations

Findings (2008-2009) - Target: Met
some of our students have presented papers at conferences they have attended or even at honor’s day on campus. Faculty members have attended conferences where they have presented papers.

M 9: Capstone product and presentation
The capstone process includes faculty student tutorials;
written feedback from both primary (1) and secondary (2) advisers;
presentation of capstone in front of these three.

Source of Evidence: Capstone course assignments measuring mastery
**SLO 23: cultural subject matter**

Teach students to understand the differences among various societies across all content areas.

**Relevant Associations:**

**Strategic Plan Associations:**
- College of Arts, Humanities, & Social Sciences
  1. Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
  4. To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
  8. Develop and infuse cross-cultural/multi cultural subject matter into all course materials

**Related Measures:**

**M 7: Assessment**
Senior Capstones are measures to evaluate the information that students learned throughout the program. It is a way to measure research techniques, how well the student learned to write, and present their research. University Seminar helps the students to learn how to be good students.

Source of Evidence: Evaluations

**Target:**
Faculty to include cultural subject matter into their curricula.

**Findings (2008-2009) - Target: Met**
Most faculty members have included some type of cultural subject matter into their course outline. With the Global Societies course offered by this department, all students in the university are required to take this course to give them an idea about the global world we live in.

**G 6: Community**
To promote intellectual vitality of content area by faculty to the community.

**SLO 23: cultural subject matter**

Teach students to understand the differences among various societies across all content areas.

**Relevant Associations:**
Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences

1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

Related Measures:

Most faculty members have included some type of cultural subject matter into their course outline. With the Global Societies course offered by this department, all students in the university are required to take this course to give them an idea about the global world we live in.

Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Increase number of students in majors
To double the number of majors in the two majors, History and Political Science.

Connected Document
• External Review Report History

O/O 1: Review existing programs
To review existing programs to ensure that they comply standards in the discipline and with demands from appropriate accreditation agencies.

Connected Document
• External Review Report History

Relevant Associations:
DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
3 Create a model of scholarly research for all full time faculty.
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
5 To implement effective assessment criteria in each of the content areas within the College of Arts, Humanities and Social Science
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials
9 Increase Enrollment through active recruitment efforts by admissions and faculty

Related Measures:
M 1: Program review report
Internal and external program review.

Source of Evidence: External report

Connected Documents
- ExternalReview Political Science
- External Review Report History

Target:
Complete a program review every 5 years.

Findings (2008-2009) - Target: Met
Program review completed in spring 09

O/O 2: Faculty recruitment
To locate additional qualified faculty to teach content specific courses.

Connected Document
• *External Review Report History*

**Relevant Associations:**

**Strategic Plan Associations:**

*College of Arts, Humanities, & Social Sciences*

1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University

**Related Measures:**

**M 2: Qualified Faculty**

Evaluations by peers, department heads and students are used to evaluate the qualifications of the faculty.

Source of Evidence: Evaluations

**Target:**
Seek faculty that are experts in content area and have the ability to make information relevant to what is happening today.

**Findings (2009-2010) - Target: Met**

Hired several faculty who are experts in their fields.

**Findings (2008-2009) - Target: Met**

Hired several new faculty members that are experts in content area. Dr. West, Dr. Issa, Dr. Robinson, and Dr. Toure

**O/O 3: Create new courses**

Develop new courses to reflect developing trends in humanities and social sciences

**Relevant Associations:**

**Strategic Plan Associations:**

*College of Arts, Humanities, & Social Sciences*

1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University

2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors

4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region

6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.

7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status

8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

**Related Measures:**

**M 3: Quality of curricula**
Look at the current curricula and the quality of instruction provided. Create new courses to offer as well as a new major in Philosophy in order to expand the department.

Source of Evidence: Service Quality

**Target:**
Create new courses in the majors. Also create a curricula for a major in Philosophy.

**Findings (2009-2010) - Target: Partially Met**
Have come up with a draft proposal to enhance our existing Masters program in Historic Preservation. This proposal includes a straight MA in History and an MA targeted to teachers in Delaware.

**Findings (2008-2009) - Target: Partially Met**
Dr. Cawley is working on a masters program in History, which would include new courses

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Curricula for MA in History**
*Established in Cycle: 2009-2010*
Working on curricula for straight MA in History and a MA for teachers in Delaware

**O/O 22:High school**
Visit high schools and functions for higher exposure

**Relevant Associations:**

**Strategic Plan Associations:**
*College of Arts, Humanities, & Social Sciences*
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status
9 Increase Enrollment through active recruitment efforts by admissions and faculty

**Related Measures:**

**M 5:Recruitment and retention**
Promote the university in the community high schools. Provide a hands on environment in learning to keep the students attention and retain them within the department. Attend presentations at the satellite campuses and offer more
courses at these sites. Offer more opportunities to graduate students.

Source of Evidence: Activity volume

**Target:**
Visit area high schools in order to recruit students.

**Findings (2008-2009) - Target: Partially Met**
Dr. Robinson has visited some of the area high schools in order to recruit students

**O/O 24: Increase resources**
Increase resources to accommodate active exposure to community and recruitment events

**Relevant Associations:**

**Strategic Plan Associations:**
College of Arts, Humanities, & Social Sciences

4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
9 Increase Enrollment through active recruitment efforts by admissions and faculty

**Related Measures:**

**M 4: Learning environment**
Look at the environment to establish if it is conducive to learning. Need better classrooms that are technologically advanced. Look at the current course offerings to establish if the information relayed to the students are up to date. Increase resources in order to get up to date technology.

Source of Evidence: Climate / Environment

**Target:**
Increase funding in order to have better classroom and instruction materials

**Findings (2008-2009) - Target: Not Met**
Need more funding to have more technology and instruction materials

**M 8: Alumni contact**
Staying in contact with graduates and alumni will help to increase the resources for the department. Especially if the student had a good experience at the university, they will contribute to help build scholarships.

Source of Evidence: Administrative measure - other

**Target:**
Try to increase giving by alumni
Findings (2008-2009) - Target: Not Met
Contact has been made with alumni

G 2: Provide high quality instruction

Provide high quality instruction which meets the needs of all majors within the Department and the General Education Requirements for all non-majors

Connected Document
- External Review Report History

O/O 1: Review existing programs
To review existing programs to ensure that they comply standards in the discipline and with demands from appropriate accreditation agencies.

College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
3 Create a model of scholarly research for all full time faculty.
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
5 To implement effective assessment criteria in each of the content areas within the College of Arts, Humanities and Social Science
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials
9 Increase Enrollment through active recruitment efforts by admissions and faculty

**Related Measures:**

**M 1: Program review report**
Internal and external program review.

Source of Evidence: External report

**Connected Documents**
- *External Review Political Science*
- *External Review Report History*

**Target:**
Complete a program review every 5 years.

**Findings (2008-2009) - Target: Met**
Program review completed in spring 09

**O/O 3: Create new courses**
Develop new courses to reflect developing trends in humanities and social sciences

**Relevant Associations:**

**Strategic Plan Associations:**
- College of Arts, Humanities, & Social Sciences
  1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
  2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
  4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
  6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status.
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials.

**Related Measures:**

**M 3: Quality of curricula**

Look at the current curricula and the quality of instruction provided. Create new courses to offer as well as a new major in Philosophy in order to expand the department.

*Source of Evidence: Service Quality*

**Target:**
Create new courses in the majors. Also create a curricula for a major in Philosophy.

**Findings (2009-2010) - Target: Partially Met**
Have come up with a draft proposal to enhance our existing Masters program in Historic Preservation. This proposal includes a straight MA in History and an MA targeted to teachers in Delaware.

**Findings (2008-2009) - Target: Partially Met**
Dr. Cawley is working on a masters program in History, which would include new courses.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Curricula for MA in History**

*Established in Cycle: 2009-2010*

Working on curricula for straight MA in History and a MA for teachers in Delaware.

**O/O 8: Qualified faculty members**
To locate additional qualified faculty to teach content specific courses.

**Relevant Associations:**

**Strategic Plan Associations:**

*College of Arts, Humanities, & Social Sciences*

3 Create a model of scholarly research for all full time faculty.
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region.
6 Provide all students with a broad understanding of their respective disciplines in preparation for careers and graduate studies.
7 To promote intellectual vitality of content area faculty thru visibility within the community by promoting position and status.
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials.
9 Increase Enrollment through active recruitment efforts by admissions and faculty

**Related Measures:**

**M 2: Qualified Faculty**
Evaluations by peers, department heads and students are used to evaluate the qualifications of the faculty.

Source of Evidence: Evaluations

**M 6: Accreditation**

Ensure compliance with accreditation agencies. Promote research among faculty and students.

Source of Evidence: External report

**Target:**
Hired new faculty with expertise in content area

**Findings (2008-2009) - Target: Met**
Hired new faculty with expertise in content area

**O/O 12: Promote research**
Promote a culture of research in the Social Sciences and exhibition of works in the humanities.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Arts, Humanities, & Social Sciences
1 Support and Strengthen all academic departments within the College of Arts, Humanities and Social Science Programs, as well as the activities and services provided by Delaware State University
2 Provide high quality instruction which meets the needs of all majors within the College of Arts, Humanities and Social Sciences and the General Education Requirements for all non-majors
3 Create a model of scholarly research for all full time faculty.
4 To promote the Arts as academic, cultural and creative opportunities throughout the University, the local community and the region
8 Develop and infuse cross-cultural/multi cultural subject matter into all course materials

**Related Measures:**

Implementation Description: Departmental Curriculum Committee will meet to finalize draft curricula in Masters
Projected Completion Date: 12/16/2010
Responsible Person/Group: Department curricula committee

Annual Report Section Responses

Executive Summary (1-2 pages)

For years, I have called attention to the fact that the Department of History, Political Science and Philosophy at Delaware State University has provided invaluable leadership to several parts of the institution; this has been no different in AY 2017-2018. In the myriad of changes that DSU has undergone since last summer, we have contributed much; not only that, we have continued to "maintain high standards, deliver solid teaching and instruction, provide leadership in research and scholarship, and offer superior service to Delaware State University."

Dr. Stephen Newton was appointed the Special Assistant to new Provost Tony Allen; Dr. Allen himself officially became a full member of the department. Dr. Alexa Silver was reelected as the Chair of the Faculty Senate, a position that effectively makes her the spokesperson for the entire faculty. Her expertise was also tapped for her new position as a Faculty Fellow.

Dr. Susan West ascended to the presidency of the DSU chapter of the American Association of University Professors (AAUP) for the second time; she was serving at the time as the AAUP Grievance Officer.

Dr. Samuel Hoff promoted a special program “What is your favorite part of the Constitution and what part do you oppose most?” which involved our majors commenting on the US Constitution. The Delaware State News partnered the students in publishing the comments. Dr. Hoff also again secured a $5950 grant from the Law School Admission Council to send 27 students to go to the New York Law School Forum in October 2017. He also led the review of DSU's MPA program.

Dr. Donna Patterson spent a busy year as a sought after expert on African Health and Security issues, producing several media pieces on global health, African politics, immigration, French politics, and pop culture for the Washington Post, Huffington Post, New America Weekly, Pacific Standard, and Policies for Equitable Access to Health. She was Chair of the Health and Healing Section at the 2017 African Studies Association. She continues her fellowship at New America, a Washington, DC Think Tank.

Dr. Kami Fletcher has led the effort to raise the profile of the DSU Department of History, Political Science and Philosophy this year on various social media platforms. We have many followers, which may be responsible for the spike in our upper-level courses. In addition, she presented multiple papers at conferences around the country, squarely putting her on the cutting edge of Death Studies.

Prof. Robin Krawitz became the department's Assessment point person. Dr. Stephen C. Taylor is still DSU's resident Ethicist. Dr. Yinghong Cheng continued his
Dr. Akwasi Osei and Prof. Ezrah Aharone initiated a major effort to create a tripartite partnership between DSU, the African Union (through the APRM) and KOL-Baker Global, an energy firm. This will go far in enhancing DSU’s global academic and cultural footprint. Dr Niklas Robinson continues his efforts at demonstrating that the study of history need not be dry and irrelevant by leading a group of students on an eco-tourism research trip to Belize in Central America! He has also become the staunchest advocate for the Dreamers on campus!

On a sad but upbeat note, the department announces the resignation of Dr. Marshall Stevenson; he takes over as the New Dean of the School of Education, Social Sciences and the Arts at the University of Maryland, Eastern Shore.

Unit(s) Profile

A. PERSONNEL (Faculty/Professional and/or Classified Staff)

1. List by rank or title and in alphabetical order all full or part-time employees, including adjuncts.

Full time faculty:
Dr. Yinhong Cheng, Professor
Dr. Samuel B. Hoff, Professor
Dr. Akwasi P. Osei, Professor
Dr. Alexa Silver, Professor
Dr. Donna Patterson, Associate Professor
Dr. Niklas Robinson, Associate Professor
Dr. Stephen C. Taylor, Associate Professor
Dr. Ifeyinwa Udezulu, Associate Professor
Dr. Susan West, Associate Professor
Dr. Kami Fletcher, Assistant Professor
Ms. Robin Krawitz, Assistant Professor

Part-time Faculty/Adjuncts:
Mr. Ezrah Aharone
Unit(s) Initiatives accomplished in this cycle

3 UNIT INITIATIVES Accomplished

a). We are in year two of HIST 300 History of Delaware redesigned to introduce our majors-and other students who sign up-to public history by having them study and visit state archives, museums, and other such places to see how historical stories are developed from primary sources and presented to the public, illustrating the field of history as a profession outside of academia.

b). The department continued its increased presence on social media as a way to increase its visibility and letting the larger world know what we are doing on campus. It is working well; it appears that we have more students signing up for our upper-level HIST courses.

c). The department has made changes to the HIST curriculum: we have added two new survey courses: HIST 206 Introduction to the History of Science; and HIST 207 Continuity and Change in American History. Further, the HIST minor now requires eighteen credit hours (18) instead of twenty-one credit hours (21).

d.) As part of the department's efforts to improve and enhance its visibility, we have initiated yearly visits to major history sites, including the majestic and breath-taking National Museum of African American History and Culture (NMAAHC).

Unit(s) Honors/Awards and Achievements

o We graduated 18 students in December 2017/May, 2018.
Two seniors, Jalyn Powell and Kayla Edwards-Scott were awarded the annual George Washington Leadership Award for service.

Gabrielle Davis, 2018 Legislative Fellow, Delaware General Assembly

Juaquetta McCall, the last student in the Graduate Program in Historic Preservation, graduated in December 2017.

Internships:

- Jakera Washington, DSU Law Studies Office
- Jalyn Powell, U.S. Representative Lisa Blunt Rochester
- Bria Nix, U.S. Senator Chris Coons
- R.M. Conteh, Law Office of Michael Lambert
- Nateyah McLeod, T.A. to Dr. Ifeyinwa Udezulu
- Janade Amos, T.A. with Dept. of Physics and Engineering
- Lateesha Bailey, DSU Law Office
- Chamyra Upshur, Law Office of Victoria Hoffman
- Nikela Rodrique, Law Office in New York City.
- Tyler Richardson

**Connected Document**
- Annual Report HPSPH 2017-2018

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

1. Reassert and revise the assessment plan for the department and focus on data collection. The department rubric will be reviewed and revised as necessary and utilized to assess all capstone projects in the department.

2. Continue to utilize social media and develop other strategies to welcome more majors in History, including the involvement of former graduates who now make a living from the major.

3. Enhance community contacts to provide more internship and community service opportunities for history majors.

Connected Document
• Annual Report HPSPH 2017-2018 KPI Data

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. 
  a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  
  b) Have these changes been implemented? If not, when will they be implemented?  
  c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

In 2014 the Department of HPSPh set an aggressive assessment regimen. Frustration with student learning deficiencies lead to the production of a detailed assessment plan for improvement that would have measuring points in the junior and senior years. Over the last four years, that rigorous schedule was found to be not easily implemented. Measures were devised and implemented but data collection of the results was not consistently maintained over time.

In 2018-19 the department will focus on the assessment of capstone projects using the existing rubric. The assessment rubric will be an element of the review of all capstone projects and all reviewers will complete rubrics which will compiled into a final assessment for the project. Data from the two semesters will be brought to a faculty meeting after graduation the end of the Spring 2019 semester for a review of the data and discussion of the path forward.

Mission / Purpose

The Mission: The mission of the Honors Program at Delaware State University is to provide students with exceptional intellectual ability, motivation and commitment, with superior learning opportunities that challenge them to reach new levels of academic excellence in scholarship and creativity.

The Vision: As graduates of the DSU Honors Program, our students will become the first choice of employers and graduate and professional schools because of their recognized achievements and their commitment to and potential for success.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Performance

Students in the Honors Program Living-Learning Community will succeed in earning a minimum 3.25 cumulative grade point average each semester and participate in annual research related activities. Honors students will garner the skills necessary for graduate or professional school matriculation. The Honors Program Living-Learning Community will provide sufficient course and colloquium offerings, supportive opportunities for student learning and an enriched living environment.

SLO 1: Student Performance I: Course Assessment

To prepare honors students through experience with department-based honors courses and interdisciplinary colloquia and seminars to ensure its students academic success.

Academic achievement is indicated by student performance in courses, colloquia and senior capstones.

Relevant Associations:
DSU Learning Goal Associations:

1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:

Delaware State University

1.1 Ensure all students are provided high-quality programs that are recognized nationally and internationally
1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement
2.1 Increase retention and graduation rates by at least two percent annually for the next five years
2.3 Expand and enhance quality programs, services, and activities to enrich the student experience.
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community
5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.

Related Measures:

M 1: Academic Success

Honors students must earn a grade of ‘B’ or better in an honors course or colloquium in order for it to count as part of the individual students' honors curriculum.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target:

90% of the grades earned by honors students in an honors course or colloquium will be the grade `A.’ 100% of the minimum grades earned by honors students in an honors course or colloquium will be the grade `B’.

Findings (2017-2018) - Target: Not Reported This Cycle
Data not available at time of this report.

Findings (2014-2015) - Target: Partially Met

1. Table 14 is a list of the Fall 2014 and Spring 2015 courses and colloquia with corresponding grades assigned that was reported by departments.
2. Out of a total of 86 grades assigned to honors students, the distribution is as follows:

- 67 grades were 'A';
- 12 grades were 'B';
- 3 grades were 'C';
- No grades of 'D, F or I' were given (I = incomplete);
- 2 grades were 'W' (W = withdrawal);
- 2 grades were 'WF' (W = withdrawal fail).

3. The percentage of 'A' grades earned is 67/86 = 77.91%.

4. The percentage of 'A' and 'B' grades earned is 79/86 = 91.86%.

**Findings (2014-2015) - Target: Partially Met**

**FALL 2014 Semester GPAs**

1. Chart 12 shows the Fall 2014 Semester GPAs and the number of students that fall into each divided category.

   (a) Thirty-four (34) honors students earned 4.0 GPAs.

   (b) Twenty-six (26) honors students earned GPAs greater than or equal to 3.75 but less than 4.0.

   (c) Twenty-seven (27) honors students earned GPAs greater than or equal to 3.50 but less than 3.75.
(d) Eighteen (18) honors students earned GPAs greater than or equal to 3.25 but less than 3.50.

(e) Forty (40) honors students earned GPAs less than 3.25.

2. Figure 13 shows the Fall 2014 Semester GPAs of the honors students in percentages.

(a) Twenty-three percent (23.45%) of honors students earned a 4.0.

(b) Eighteen percent (17.93%) of honors students earned GPAs greater than or equal to 3.75 but less than 4.0.

(c) Nineteen percent (18.62%) of honors students earned GPAs greater than or equal to 3.50 but less than 3.75.

(d) Twelve percent (12.41%) of honors students earned GPAs greater than or equal to 3.25 but less than 3.50.

(e) Twenty-eight percent (27.59%) of honors students earned GPAs less than 3.25; eight percent (8.28%) of the honors students earned GPAs greater than or equal to 3.00 but less than 3.25, seventeen percent (16.55%) earned GPAs greater than or equal to 2.0 but less than 3.0, and three percent (2.76%) earned GPAs less than 2.0.

(f) In summary, 104/145 = 72.41% of the honors students earned at least 3.25 semester GPAs for Fall 2014.

SPRING 2015 Semester GPAs

1. Chart 32 shows the Spring 2015 Semester GPAs and the number of students that fall into each divided category.

(a) Thirty (30) honors students earned 4.0 GPAs.

(b) Twenty-seven (27) honors students earned GPAs greater than or equal to 3.75 but less than 4.0.

(c) Seventeen (17) honors students earned GPAs greater than or equal to 3.50 but less than 3.75.

(d) Thirteen (13) honors students earned GPAs greater than or equal to 3.25 but less than 3.50.

(e) Forty-three (43) honors students earned GPAs less than 3.25.

2. Figure 33 shows the Spring 2015 Semester GPAs of the honors students in percentages.

(a) Twenty-three percent (23.08%) of honors students earned a 4.0.

(b) Twenty-one percent (20.77%) of honors students earned GPAs greater than or equal to 3.75 but less than 4.0.
(c) Thirteen percent (13.08%) of honors students earned GPAs greater than or equal to 3.50 but less than 3.75.

(d) Ten percent (10%) of honors students earned GPAs greater than or equal to 3.25 but less than 3.50.

(e) (Thirty-three percent (33.08%) of honors students earned GPAs less than a 3.25; fifteen (14.62%) percent of the honors students earned GPAs greater than or equal to 3.00 but less than 3.25, fifteen percent (15.38%) earned GPAs greater than or equal to 2.0 but less than 3.0, and three (3.08%) percent earned GPAs less than 2.0.

(f) In summary, $87/130 = 66.92\%$ of the honors students earned at least 3.25 semester GPAs for Spring 2015.

The Office of Institutional Advancement provided a report containing the number of DSU students (1400 in total) who earned at least 3.25 GPAs for the 2014-2015 academic year. There were 495 freshmen, 214 sophomores, 342 juniors and 349 seniors. See Table.

FALL 2014 Cumulative GPAs

1. Chart 22 shows the Fall 2014 cumulative GPAs and the number of students that fall into each divided category.

(a) Twelve (12) honors students maintained 4.0 GPAs.

(b) Twenty-nine (29) honors students maintained GPAs greater than or equal to 3.75 but less than 4.0.

(c) Thirty-six (36) honors students maintained GPAs greater than or equal to 3.50 but less than 3.75.

(d) Thirty-six (36) honors students maintained GPAs greater than or equal to 3.25 but less than 3.50.

(e) Thirty-two (32) honors students maintained GPAs less than 3.25.

2. Figure 23 shows the Fall 2014 cumulative GPAs of the honors students in percentages.

(a) Eight percent (8.28%) of honors students maintained 4.0 CGPAs.

(b) Twenty percent (20%) of honors students maintained CGPAs greater than or equal to 3.75 but less than 4.0.

(c) Twenty-five percent (24.83%) of honors students maintained CGPAs greater than or equal to 3.50 but less than 3.75.

(d) Twenty-five percent (24.83%) of honors students maintained CGPAs greater than or equal to 3.25 but less than 3.50.
(e) Twenty-two percent (22.07%) of honors students maintained CGPAs less than a 3.25; twelve percent (11.72%) of the honors students maintained CGPAs greater than or equal to 3.00 but less than 3.25, nine percent (8.97%) maintained CGPAs greater than or equal to 2.0 but less than 3.0, and one percent (1.38%) maintained CGPAs less than 2.0.

(f) In summary, 113/145 = 77.93% of the honors students maintained CGPAs of 3.25 or greater in Fall 2014. (See Figure 23).

SPRING 2015 Cumulative GPAs

1. Chart 42 shows the Spring 2015 cumulative GPAs and the number of students that fall into each divided category.

(a) Six (6) honors students maintained 4.0 CGPAs.

(b) Twenty-nine (29) honors students earned CGPAs greater than or equal to 3.75 but less than 4.0.

(c) Twenty-seven (37) honors students earned CGPAs greater than or equal to 3.50 but less than 3.75.

(d) Thirty (30) honors students earned CGPAs greater than or equal to 3.25 but less than 3.50.

(e) Twenty-eight (28) honors students earned CGPAs less than 3.25.

2. Figure 43 shows the Spring 2015 cumulative CGPAs of the honors students in percentages.

(a) Five percent (4.61%) of honors students maintained 4.0 CGPAs.

(b) Twenty-two percent (22.30%) of honors students earned CGPAs greater than or equal to 3.75 but less than 4.0.

(c) Twenty-eight percent (28.46%) of honors students earned CGPAs greater than or equal to 3.50 but less than 3.75.

(d) Twenty-three percent (23.08%) of honors students earned CGPAs greater than or equal to 3.25 but less than 3.50.

(e) Twenty-two percent (21.53%) of honors students earned CGPAs less than a 3.25; eight percent (8.28%) of the honors students earned CGPAs greater than or equal to 3.00 but less than 3.25, eleven percent (10.77%) earned CGPAs greater than or equal to 2.0 but less than 3.0, and two percent (1.54%) earned CGPAs less than 2.0. In summary, 89/137 = 64.96% of the honors students earned cumulative GPAs of 3.25 or greater in Spring 2015.

**M 7: Graduation & Completion**
Senior honors students complete the Honors Program curriculum and graduate with a minimum of 3.25 cumulative grade point average.

Source of Evidence: Academic direct measure of learning - other

**Target:**
50% of all honor students are completing individual components of the program and successfully matriculating toward earning Honors Program Graduate designation. Students must maintain the minimum 3.25 cumulative GPA requirement. Students must complete at least one honors course by the end of their freshman year; 2 courses and one colloquium by the end of their sophomore year; 3 courses and one colloquium by the end of their junior year; and four courses and 2 colloquia prior to graduation.

**Findings (2017-2018) - Target: Partially Met**
The number graduated seniors that completed 6 courses and colloquia is 5/27 = 18.52%.
The number of rising seniors (juniors) that have completed 4 or more courses and/or colloquia is 17/33 = 51.52%.
The number of rising juniors (sophomores) that have completed 4 or more courses and/or colloquia is 6/38 = 15.79%.

**Connected Document**
- *Course and Colloquium Completion*

**Findings (2014-2015) - Target: Partially Met**
Several of the honors students are on target for completion of the Honors Program Curriculum. In this report, we have included the progress of the senior honors students (projected graduation date May 2016) and one junior honors student (see Table 54). Majority of the students (sophomore to senior) need faculty research mentors and are not engaged in research. Also see Chart: Senior Requirement Completion Table in Appendix VIII.

**SLO 2: Student Performance II: Research**

To engage students in the creative process of formulating a hypothesis, researching those problems and drawing conclusions that lead to either original classroom assignments or larger faculty-mentored research projects resulting in contributions of scholarly work to each student's chosen field of study.

Honors students will engage in faculty-mentored research projects. Each student will perform a methodical study in order to prove a hypothesis or answer a specific question. Each student's research must be organized and undergo planning, including performing literature reviews of past research and evaluating what questions need to be answered.

Honors students, with the assistance of the Honors Program director, will choose a research mentor with whom he/she will conduct formal research in his/her field of study. Students will present research results each April on DSU Research Day and be encouraged to present research at a conference held by his/her academic field. Senior students are required to write an honors senior research thesis documenting all research activities, including methods, procedures and results. The honors senior research thesis must satisfy the thesis guidelines outlined by the Honors Program.

**Relevant Associations:**
DSU Learning Goal Associations:

1. UG Student Learning Goal: Competent Communicators
2. UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3. UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4. UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:

Delaware State University

1.2 Facilitate student learning as evidenced by increasing 21st Century skills and habits of mind that enable students to become productive citizens and life-long learners as measured by well-defined rubrics
1.3 Build opportunities for students to gain global perspectives, participate in experiential learning, and further social justice
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement
3.1 Increase research productivity in grants, scholarly publications, creative activities, innovation, and patents by 50% in five years.
3.2 Increase, strengthen, and sustain the support systems and infrastructure to assist faculty, staff and students in all aspects of their research endeavors.
3.3 Provide opportunities for undergraduate students to participate in research.
3.4 Maintain the highest standards of ethics and integrity in research and management of the research enterprise
5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.
5.2 Expand interdisciplinary research and scholarship in advancing knowledge and innovations for sustainable energy, materials, and technology.

Related Measures:

M 6: Faculty Research Mentors

DSU faculty will participate in and contribute to the Honors Program via faculty-mentored research projects, creation/instruction of honors courses and colloquia, and service in honors-administrative positions.

Source of Evidence: Activity volume

Target:

Faculty members from all disciplines (100%) represented by the Honors students majors shall direct faculty-mentored research.

Findings (2017-2018) - Target: Partially Met

Faculty members from 16 discipline served at research mentors for 39 honors students.
1. **Findings (2014-2015) - Target: Partially Met**

   There were 17 faculty research mentors, which represent 14 out of 21 departments (66.67%). The departments represented are Agriculture & Related Sciences, Art, Aviation, Biological Sciences, Business Administration, Chemistry, English & Foreign Languages, Public & Allied Health, History, Mass Communications, Mathematical Sciences, Physics & Engineering, Social Work, and Sociology and Criminal Justice.

2. For faculty-mentee details, see Tables 9 - 12.

2. **Findings (2012-2013) - Target: Partially Met**

   1. There were 17 faculty research mentors, which represent 11 out of 21 departments (52.38%). The departments represented are Agriculture & Natural Resources, Aviation, Biological Sciences, Chemistry, English & Foreign Languages, Mass Communications, Mathematical Sciences, Nursing, Physics & Engineering, Public & Allied Health Sciences, and Social Work.

   2. For faculty-mentee details, see Tables 11 - 13.

3. **Findings (2011-2012) - Target: Not Met**

   1. Nine faculty research mentors represent 5 out of 21 departments (23.81%). The departments represented are Agriculture, Biological Sciences, Mathematical Sciences, Physics and Psychology.

   2. For faculty-mentee details, see Table 10: Faculty Research Representation and Mentorship.
Findings (2010-2011) - Target: Not Met
In Spring 2011, the Honors Program had 78 students enrolled. One out of two seniors was engaged in faculty-mentored research (50%); Five out of eleven juniors were engaged in faculty-mentored research (45%); Three out of twenty-one sophomores were engaged in faculty-mentored research (14.3%).

M 12: Student Research Activity

All upper-class honors students will participate in faculty-mentored research projects.

Source of Evidence: Senior thesis or culminating major project

Target:
90% of senior honors students complete and defend their senior thesis.

Findings (2017-2018) - Target: Not Met
In Spring 2018, the Honors Program had 25 senior students enrolled. No seniors composed and defended honors senior research theses.

Findings (2014-2015) - Target: Not Met
At the end of Spring 2015, there were 25 senior and 4 super-senior honors students. Six students completed honors senior research theses and five students defended honors senior research theses (See Table 13). Thus, 6/30 (20%) of senior honors students completed and defended their senior thesis.

Findings (2012-2013) - Target: Not Reported This Cycle
Senior thesis not required for graduating seniors until the 2013-2014 academic school year.

Findings (2011-2012) - Target: Not Reported This Cycle
Senior thesis not required for graduating seniors until the 2013-2014 academic school year.

Findings (2010-2011) - Target: Not Reported This Cycle
Senior thesis not required for graduating seniors this cycle.
Findings (2009-2010) - Target: Not Met
1 sophomore honors student and 1 senior honors student presented research on Honors Day 2010.

SLO 3: Student Performance III: Program Completion

To prepare honors students through experience with department-based honors courses, interdisciplinary colloquia and seminars, and independent study and research to ensure its students earn Honors Program Graduate designation.

The Honors Program will provide the necessary education, instruction and advisement to ensure its students earn Honors Program Graduate designation.

Relevant Associations:

DSU Learning Goal Associations:
1 UG Student Learning Goal: Competent Communicators
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

Strategic Plan Associations:
Delaware State University
2.1 Increase retention and graduation rates by at least two percent annually for the next five years
2.4 Produce and place graduates in the workplace and/or graduate and professional programs to enable them to become productive leaders in an increasingly global community
5.1 Develop transformational learning opportunities that prepare faculty, staff and students to live, contribute, and work in a sustainable society.
5.2 Expand interdisciplinary research and scholarship in advancing knowledge and innovations for sustainable energy, materials, and technology.

Related Measures:

M 7: Graduation & Completion
Senior honors students complete the Honors Program curriculum and graduate with a minimum of 3.25 cumulative grade point average.

Source of Evidence: Academic direct measure of learning - other

**Target:**
90% of graduating honors students earn Honors Program Graduate designation;
90% graduate with a minimum GPA of 3.25 (Cum Laude),
70% graduate with a minimum GPA of 3.5 (Magna Cum Laude);
50% graduate with a minimum GPA of 3.75 (Summa Cum Laude);

**Findings (2017-2018) - Target: Partially Met**
During the 2017-2018 academic school year, 27 honors students graduated from DSU.

0 seniors earned Honors Program Graduate designation.
7 seniors graduated with Summa Cum Laude latin honors: 7/27 = 25.93%
17 seniors graduated with Magna Cum Laude latin honors: 17/25 = 62.96%
2 seniors graduated with Magna Cum Laude latin honors: 2/27 = 2.41%
1 senior graduated without latin honors.

96.3% of the graduating seniors graduated with a GPA of 3.25 or greater.
88.89% of the graduating seniors graduated with a GPA of 3.50 or greater.
25.93% of the graduating seniors graduated with a GPA of 3.75 or greater.

Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 2: Enrollment Management

The Honors Program Living-Learning Community will achieve and maintain an Honors Program enrollment representative of the number of high-achieving, talented students in the DSU undergraduate population.

O/O 4: Enrollment Management I: Admissions

The number of DSU undergraduate student applicants who apply and are accepted into the Honors Program will increase commensurate with the university enrollment rates.

Related Measures:

M 10: Quality Enrollment
Honors Program, in conjunction with Office of Admissions and Office of Institutional Advancement will market the Honors Program on a regional and national level to gain a larger application pool and a larger number of qualified
participants. Measures are based on the number of new applicants and the number of DSU applicants which qualify for the Honors Program;

Source of Evidence: Job placement data, esp. for career/tech areas

Target:
Recruit a minimum of 20 qualified, current DSU students into the Honors Program each year;
Recruit a minimum of 5 students from the Summer Programs each year;
Increase enrollment of Honors Program by 25% yearly;
90% of the students who apply are qualified and accepted into the program;
80% of those students who are accepted matriculate into the DSU honors program.

Findings (2017-2018) - Target: Not Met
Three DSU students joined the program during the 2017-2018 academic year.
No students were recruited from Jumpstart, Summer Bridge, etc.

During the 2017-2018 academic school year, the Honors Program received a total of 132 applications.
Total number of incomplete applications received is 86 out of 132: 65%
Total number of applications approved for acceptance is 37 out of 132: 28%
Total number of applications not approved for acceptance is 4.5%.
The program accepted 34 new applications (high school applicants) and 26 will matriculate as freshmen (26/34 = 76.47 %)

O/O 5: Enrollment Management II: Retention
Honors students will matriculate to the next academic level and experience a retention rate higher than the general student body.

Related Measures:

M 11: Retention
The Honors Program will measure the percentage of students who enroll in the program and the percentage of current students who matriculate to the next academic level in their program. This measure can be determined by the number of honors students who enter/remain in the program each year.

Source of Evidence: Activity volume
Target:
80% of all freshman honors students remain in the honors program for their sophomore year;
90% of all sophomore honors students remain in the honors program for their junior year;
95% of all junior honors students remain in the honors program for their senior year;

Findings (2017-2018) - Target: Partially Met
34 out of 34 freshmen will matriculate in the Honors Program as sophomores (100%).
36 out of 38 sophomores will matriculate in the Honors Program as juniors (94.74%).
29 out of 33 juniors will matriculate in the Honors Program as seniors (87.88%).

Findings (2014-2015) - Target: Partially Met
1. In Fall 2014, there were a total of 43 freshmen honors students. 41 out of 43 freshmen will matriculate in the Honors Program as sophomores (95.39%).
2. 24 out of 33 sophomores will matriculate in the Honors Program as juniors (72.73%).
3. 29 out of 36 juniors will matriculate in the Honors Program as seniors (80.56%).

Findings (2012-2013) - Target: Met
1. 100 out of 100 freshmen will matriculate in the Honors Program as sophomores (100%).
2. 37 out of 40 sophomores will matriculate in the Honors Program as juniors (92.50%).
3. 20 out of 20 juniors will matriculate in the Honors Program as seniors (100%).

Findings (2011-2012) - Target: Partially Met
1. 100 out of 100 freshmen will matriculate in the Honors Program as sophomores (100%).
2. 28 out of 32 sophomores will matriculate in the Honors Program as juniors (87.5%).
3. 17 out of 18 juniors will matriculate in the Honors Program as seniors (94.44%).

**Findings (2010-2011) - Target: Met**

100% of the freshmen honors students will matriculate in the Honors Program as sophomores; 19 out of 21 (90.47%) of the sophomore honors students will matriculate in the Honors Program as juniors; 100% of the junior honors students will matriculate in the Honors Program as seniors.

**G 3: Program Management**

The Honors Program Living-Learning Community will increase its visibility on the campus of Delaware State University and it will strive to garner regional and national recognition as a premier academic program in Delaware.

**O/O 7: Program Management II: Recruitment**

The Honors Program will develop and implement an integrated marketing plan that will garner the program and its students regional and national recognition.

**Related Measures:**

**M 9: Publicity & Marketing**

Honors Program, in conjunction with Office of Admissions and Office of Institutional Advancement will market the Honors Program on a regional and national level to gain a larger application pool and a larger number of qualified participants. Measures are based on the number of new applicants and the number of DSU applicants which qualify for the Honors Program.

Source of Evidence: External report

**Target:**

Send information regarding the Honors Program to qualifying university
applicants; Publicize the Honors Program during Orientation, Hornet Days, Open house and other activities which reach incoming or current DSU students; Update the Honors Program brochure (as needed); Publicize the Honors Program in local high schools;

**Findings (2017-2018) - Target: Met**
The Honors Program was publicized at the following venues: All Hornet Days (Office of Admission), Fall and Spring Open House (Office of Admissions) and the Organization Fair (OSLA).

**Findings (2014-2015) - Target: Partially Met**

1. NEW STUDENT ORIENTATION

(a) Director Lott and Secretary Adams participated in the following New Student Orientations: (June 17-18, 2014; June 24-25, 2014; July 8-9, 2014; July 22-23, 2014)

2. WELCOME WEEK

(a) Director Lott and Secretary Adams greeted students during Move-in-Day.

(b) Director Lott participated in the Women's panel.

3. DSU OPEN HOUSES Director Lott made two presentations each Open House.

(a) DSU Fall Open House, October 25, 2014.

(b) DSU Spring Open House, April 11, 2015.

4. HORNET DAY'S PARTICIPATION

Director Lott presented at DSU's Hornet's Day on the following days: (November 14, 2014; February 6, 2015; February 13, 2015, February 20, 2015; February 27, 2015)

5. HONORS DAY and HONORS INDUCTION/GRADUATION ceremonies

Director Lott planned, organized and presided over the following ceremonies (with the assistance of the Honors Council and Ms. Heather Adams).

(a) The Honors Program sponsored the Honors Program Induction/Graduation Ceremony on April 7, 2015, where 9 graduating seniors were honored and 39 students were inducted.

(b) The Honors Program sponsored Honors Day on April 16, 2015.

6. OPPORTUNITIES FOR MARKETING
(a) Director Lott is a member of the DSU - Learning Communities committee as a representative of the Honors Program.

7. MARKETING AND RECRUITING

(a) Director Lott with the Admissions department updated the Honors Program brochure.

(b) Director Lott revised the Honors Day abstract submission forms for electronic submission.

(c) Director Lott modified and improved the Honors Program web site to include links to more pertinent information about the Honors Program. Director Lott submitted a complete Honors Program budget to the Vice President of Finance.

**Findings (2012-2013) - Target: Partially Met**

1. NEW STUDENT ORIENTATION

(a) Director Lott participated in the following New Student Orientations: (June 26-27, 2012; July 9-10, 2012; July 12-13, 2012; July 24-25, 2012)

(b) Director Lott made two presentations each orientation: The announcement of the Honors Program on the first day and the information session on the second day.

2. WELCOME WEEK

(a) Director Lott made three presentations during Welcome Week.

3. DSU OPEN HOUSES Director Lott made two presentations each Open House.

(a) DSU Fall Open House, October 27, 2012.

(b) DSU Spring Open House, April 13, 2013.

4. HORNET DAY’S PARTICIPATION

(a) Director Lott presented at DSU's Hornet's Day on the following days: (November 16, 2012; February 1, 2013; February 22, 2013)

5. HONORS DAY and HONORS INDUCTION/GRADUATION ceremonies

Director Lott planned, organized and presided over the following ceremonies (with the assistance of the Honors Council and Ms. Heather Adams).
(a) The Honors Program sponsored Honors Day on April 4, 2013.

(b) The Honors Program sponsored the Honors Program Induction/Graduation Ceremony on April 11, 2013, where 3 graduating seniors were honored and 52 students were inducted.

6. OPPORTUNITIES FOR MARKETING

(a) Director Lott is a member of the DSU - Learning Communities committee as a representative of the Honors Program.

(b) Vanderbilt Graduate School Recruitment seminar on September 27, 2012 by Dr. Donald Brunson (sponsored by the DSU Honors Program).

(c) Six honors students participated in the American Heart Walk on October 27, 2012.

(d) Game Night: October 12, 2012; March 1, 2013; April 19, 2013; May 3, 2013.

(e) Movie Night: November 18, 2012; March 22, 2013.

(f) Director Lott attended the Fairy GodSister’s event on February 16, 2013.

(g) Director Lott was the guest speaker for Scholars Day on April 12, 2013.

(h) Director Lott attended the National Regional Honors Council Conference, April 5-7, 2013.

(i) Director Lott attended the DSU Graduate Symposium on April 26, 2013.

7. MARKETING, RECRUITING WITH ADMISSIONS

(a) Director Lott with the Admissions department updated the Honors Program brochure.

(b) Director Lott revised the Honors Day abstract submission forms for electronic submission.

(c) Director Lott modified and improved the Honors Program web site to include links to more pertinent information about the Honors Program.

(d) Director Lott published the 2012-2013 Honors Program Policies & Procedures Handbook (with the assistance of Ms. Heather Adams).

(e) Director Lott submitted a complete Honors Program budget to the Vice President of Finance.

(f) Director Lott proposed Propositions 13.1 - 13.4 (see O/O 11:Program Outcome II, Measure 15).
**Findings (2011-2012) - Target: Partially Met**

1. NEW STUDENT ORIENTATION

(b) The Honors Program made two presentations each orientation: The announcement of the Honors Program on the first day and the information session on the second day. On August 11, 2011 instead of a presentation, the Honors Program set up an information table in the administration building and provided information to the transfer students interested in the honors program.

2. OPEN HOUSES DSU

(a) Fall Open House, October 6, 2011

(b) Delaware State University Open House, October 22, 2011

3. HORNET DAY'S PARTICIPATION

Dr. Dawn Lott, Director of the Honors Program Participated in DSU's Hornet's Day on the following days: (February 3, 2012, February 17, 2012, February 24, 2012)

4. OTHER OPPORTUNITIES FOR MARKETING

(a) Honors Showcase - August 26, 2011

(b) Love DSU Fair - Honors Program - September 18, 2011

(c) Game Night, November 11, 2011

(d) Dr. Dawn Lott was a guest speaker at the English Honor Society Induction, November 17, 2011

(e) Dr. Dawn Lott participated in the Fairy God Mother of Delaware, January 28, 2012

5. MARKETING, RECRUITING WITH ADMISSIONS

(a) October 18, 2011. A table was set up in the memorial hall Gym. Twenty students stopped by the table and left their names and e-mails. The Honors Program replied to their emails, and one student (Caprice Green) applied and got accepted into the Honors Program.

(b) Director Lott with the Admissions department updated the Honors Program brochure.
(c) The program did not send applications to the current qualifying university applicants and the program was not publicized in local high schools this year.

Findings (2010-2011) - Target: Partially Met
Director Lott publicized the program at the following events.

3. DSU Scholars Day: Apr 15, 2011
4. DSU Open House: Apr 16, 2011
5. "Become an Honors Student," Project Success, DSU, Mar 15, 2011

Director Lott updated the Honors Program brochure.

The program did not send applications to the current qualifying university applicants and the program was not publicized in local high schools this year.

Findings (2009-2010) - Target: Not Met
DSU received 958 applicants with a 3.25 GPA or higher (filtered out those rejected for other reasons). 767 applicants have been accepted with a 3.25 GPA or higher.

220 of the accepted applicants with a 3.25 GPA or higher have confirmed they will attend. Of the 220 newly admitted freshman, 23 will be honors students = 10% of the available pool of students.

Related Action Plans (by Established cycle, then alpha):

For full information, see the Details of Action Plans section of this report.

Community Service Project
Established in Cycle: 2009-2010
Plan/execute a community service project, preferably in October each year.

Publicity & Marketing
Established in Cycle: 2009-2010
Publicize the Honors Program in public venues on- and off-campus, at local high schools, etc.; widely publicize honors courses a...

O/O 8: Program Management III: Outreach
Through activities and programs on campus, the Honors program will be both visible and highly reputed throughout the institution so that it is perceived as providing standards and models of excellence for students and faculty across the campus.

**Related Measures:**

**M 3:Co-Curricular Learning**

Honors students fulfill other social and academic responsibilities and/or participate in activities which provide co-curricular, service learning and leadership opportunities, while maintaining good academic standing.

Source of Evidence: Activity volume

**Target:**
- 50% of the honors students will participate in other organizations on campus; 25% of the honors students will hold offices in other organizations.

**Findings (2017-2018) - Target: Not Reported This Cycle**

Data not available at the time of this report.

**M 5:DSU Research Day**

Honors Program will Co-Host Delaware State University Research Day

Source of Evidence: Presentation, either individual or group

**Target:**
- DSU Research Day will host a minimum of
  - 10 faculty research presenters;
  - 150 student research presentations (undergraduate & graduate combined);
  - 15 student research posters (graduate students only).

**Findings (2017-2018) - Target: Partially Met**

DSU Research Day was held on Friday, April 20, 2018. There were 184 student research presentations of which 31 were by graduate students and 153 were by undergraduate students. There were 8 faculty research presentations and 10 graduate poster presenters.

**M 8:Outreach programs**

Honors Program will create, offer and/or participate in activities that involve the DSU student body and the surrounding community, at large.

Source of Evidence: Activity volume

**Target:**
- Honors students will participate in at least one community project per year.
Findings (2017-2018) - Target: Met
In October 2017, ten honors students participated in Habitat for Humanity. Several honors students participated in individual community service projects.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Publicity & Marketing
Established in Cycle: 2009-2010
Publicize the Honors Program in public venues on- and off-campus, at local high schools, etc.; widely publicize honors courses a...

M 12: Student Research Activity
All upper-class honors students will participate in faculty-mentored research projects.

Source of Evidence: Senior thesis or culminating major project

Target:
90% of senior, junior and sophomore honors students present their research on DSU Research Day and/or other venues.

Findings (2017-2018) - Target: Not Met
In Spring 2018, the Honors Program had 128 students enrolled. On DSU Research Day,

- 39 Total Honors students presented research: 39/128 = 30.47%
- 6 Honors seniors: 6/25 = 24%
- 14 Honors juniors: 14/33 = 42.43%
- 18 Honors sophomores: 18/37 = 48.65%
- 1 Honors freshman: 1/33 = 3.03%

Connected Document
- 2018 DSU Research Day Presenters

   In Spring 2015, the Honors Program had 131 students enrolled.
2. Eleven out of 33 seniors and super-seniors presented research on Honors Day (33.33%).
3. Four out of 32 juniors presented research on Honors Day (12.5%).
4. Three out of 28 sophomores presented research on Honors Day (10.71%).
5. See Tables 9 - 11: 2015 Honors Day Honors Student Presentations.

Findings (2012-2013) - Target: Partially Met

1. In Spring 2013, the Honors Program had 137 students enrolled. All three senior students presented research on Honors Day (100%).

2. Seven out of 20 juniors presented research on Honors Day (35.00%).

3. Seven out of 40 sophomores presented research on Honors Day (17.50%).

Findings (2011-2012) - Target: Not Met

1. In Spring 2012, the Honors Program had 160 students enrolled. Three out of 11 seniors presented research on Honors Day (27.27%).

2. Five out of 18 juniors presented research on Honors Day (27.78%).

3. Zero out of 32 sophomores presented research on Honors Day (0%).

4. One out of 100 freshmen presented research on Honors Day (1%).

5. See Table 24: 2012 Honors Day Honors Student Presentations.

Findings (2010-2011) - Target: Partially Met

In Spring 2011, the Honors Program had 78 students enrolled. One out of two seniors presented her research on Honors Day (50%); Two out of eleven juniors presented their research on Honors Day (18%); Two out of twenty-one sophomores presented their research on Honors Day (10%).

Courses & Colloquia

Established in Cycle: 2009-2010
Offer sufficient honors courses each semester to enable honors students to satisfy yearly requirements and complete the program.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Advisement

Develop/implement form versions of all major academic schedules that include various options for placement of honors courses. Identify honors students in Banner by the attribute HONR.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Graduation & Completion | Outcome/Objective: Student Performance
- I: Course Assessment
- Measure: Student Research Activity | Outcome/Objective: Program Management
- III: Outreach

Implementation Description: Ongoing activity as departments change curricula
Projected Completion Date: 06/30/2014
Responsible Person/Group: Honors director, Honors secretary

Budget

Annually submit the Honors Program budget.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Publicity & Marketing | Outcome/Objective: Program Management III: Outreach

Implementation Description: Annually
Projected Completion Date: 03/01/2014
Responsible Person/Group: Honors director, Provost and Vice Provost
Budget Amount Requested: $35,000.00 (recurring)
Community Service Project
Plan/execute a community service project, preferably in October each year.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Publicity & Marketing | Outcome/Objective: Enrollment Management I: Admissions | Program Management II: Recruitment | Program Management III: Outreach
  Measure: Retention | Outcome/Objective: Enrollment Management I: Admissions

Implementation Description: One community service project per semester
Projected Completion Date: 04/30/2014
Responsible Person/Group: Honors director, Honors secretary, and Honors Student Association.

Courses & Colloquia
Offer sufficient honors courses each semester to enable honors students to satisfy yearly requirements and complete the program. Administer honors course/colloquium evaluations each semester.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Courses and Colloquia | Outcome/Objective: Program Management I: Pedagogy
  Measure: Graduation & Completion | Outcome/Objective: Student Performance I: Course Assessment

Implementation Description: Semi-annually
Projected Completion Date: 05/11/2014
Responsible Person/Group: Honors director, Honors secretary, Departments and Department Chairs

Gift Account
Monitor Honors Program Gift Account so that individuals can personally donate to the Honors Program.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Projected Completion Date: 07/23/2010
Liaisons

Establish 2 "College Honors Liaisons" for each college for college and/or department representation.

Established in Cycle: 2009-2010
Implementation Status: On-Hold
Priority: Medium
Implementation Description: Annually
Projected Completion Date: 05/11/2014
Responsible Person/Group: Honors director, Honors secretary, Institutional Advancement Liaisons

Policies & Procedure Handbook

Update/maintain/disseminate (online) the Honors Program Policies & Procedure Book documenting all policies, procedures, activities, and vital information necessary to the academic development of the honors students and honors faculty.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Implementation Description: Update annually and make available in print and on the web
Projected Completion Date: 08/25/2013
Responsible Person/Group: Honors director, Honors secretary, Honors Council, Academic Affairs committee, Faculty Senate
Additional Resources Requested: Reprographics

Publicity & Marketing

Publicize the Honors Program in public venues on- and off-campus, at local high schools, etc.; widely publicize honors courses and colloquia early and encourage honors students to enroll. Develop/implement a formal marketing strategy that includes brochures and on-campus presentations. Send an accompanying letter from the Director of the Honors Program to qualified accepted incoming students (via the Office of Admissions) as part of their letter of acceptance encouraging such students to apply for honors.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  - **Measure**: Outreach programs  |  **Outcome/Objective**: Program Management III: Outreach
  - **Measure**: Publicity & Marketing  |  **Outcome/Objective**: Enrollment Management I: Admissions  |  Program Management II: Recruitment  |  Program Management III: Outreach
  - **Measure**: Retention  |  **Outcome/Objective**: Enrollment Management I: Admissions

Implementation Description: Bi-annually
Projected Completion Date: 06/30/2014
Responsible Person/Group: Honors director, Honors secretary, Honors Council, Office of Institutional Advancement
Additional Resources Requested: Reprographics

Repository
Establish/maintain the Honors Program repository to maintain contact with graduating honors students post-graduation.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Implementation Description: Annually
Projected Completion Date: 05/15/2019
Responsible Person/Group: Honors secretary

Research
Each honors student will identify his/her faculty research advisor by the second semester his/her freshman year. Management student research hours and outcomes. Help foster research relationships between honors students and research faculty.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  - **Measure**: Faculty Research Mentors  |  **Outcome/Objective**: Student Performance II: Research
  - **Measure**: Student Research Activity  |  **Outcome/Objective**: Program Management III: Outreach  |  Student Performance II: Research

Implementation Description: Provide students with Mentor form to initiate the search for a mentor.
Projected Completion Date: 11/30/2013
Responsible Person/Group: Honors director, Honors secretary
Additional Resources Requested:
Admissions
Periodically review admission requirements to ensure the GPA and the SAT scores accurately reflect the quality of students desired for the program; review requirements for other programs in relationship to the DSU Honors Program.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Finished  
**Priority:** High  
**Implementation Description:** Review annually  
**Projected Completion Date:** 02/20/2013  
**Responsible Person/Group:** Honors Council, Academic Affairs Committee, Admissions and Faculty Senate

Calendar
Plan all Honors Program events at least 6 months in advance to ensure dates and completion of projects/activities.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** Monthly  
**Responsible Person/Group:** Honors director, Honors secretary

DSU Research Day
Co-Host the annual DSU Research Day.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High  

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Publicity & Marketing | **Outcome/Objective:** Program Management III: Outreach

**Implementation Description:** Annually. Activities according to Honors Program "To-do" list.  
**Projected Completion Date:** 03/15/2013  
**Responsible Person/Group:** Honors director, Honors secretary, Honors Council, Honors Council  
**Additional Resources Requested:** Reprographics

Graduation Audit
Perform an audit to determine if the student is on track for satisfying the requirements for Honors Program Graduate designation. Administer exit interview to all graduating seniors every year in March to determine student's planned activities post graduation.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Graduation & Completion | **Outcome/Objective:** Student Performance I: Course Assessment | Student Performance III: Program Completion

**Implementation Description:** Conduct audit prior to the Pre-advising period each semester.  
**Projected Completion Date:** 10/01/2013  
**Responsible Person/Group:** Honors director, Honors secretary

**Student Demographics**

Assess the following information: number of students in program; number of students who receive Honors Certification; number of students inducted; number of students graduated; number of students on probation I; number of students on probation II; number of ineligible students; number of Jumpstart students; ratio of males to females; number of student research presentations at Honors Day; etc.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Academic Success | **Outcome/Objective:** Student Performance I: Course Assessment  
**Measure:** Cumulative Grade Point Averages | **Outcome/Objective:** Student Performance I: Course Assessment  
**Measure:** Graduation & Completion | **Outcome/Objective:** Student Performance I: Course Assessment | Student Performance III: Program Completion  
**Measure:** Publicity & Marketing | **Outcome/Objective:** Program Management III: Outreach  
**Measure:** Retention | **Outcome/Objective:** Enrollment Management II: Retention  
**Measure:** Student Research Activity | **Outcome/Objective:** Program Management III: Outreach

**Implementation Description:** Complete student statistics semi-annually  
**Projected Completion Date:** 05/11/2014
Responsible Person/Group: Honors director, Honors secretary, Office of Institutional Research

Annual Report Section Responses

Executive Summary (1-2 pages)

Executive Summary
The Honors Program at Delaware State University creates and nurtures a community of academically bright and talented students who value and are committed to intellectual pursuit. The program's main goal is to provide those students opportunities to

- engage in classroom processes that de-emphasize formal, impersonal lecturing methods and passive note taking, but rather utilize methods of colloquia and symposia that encourage active intellectual participation, discussion and involvement in the search for knowledge
- develop analytical/critical thinking and logical reasoning skills
- become proficient in problem solving and decision making; and
- develop clear, precise, coherent and persuasive oral and written communications skills.

The Honors Living-Learning Community integrates curricular and co-curricular experiences that supplement classroom learning and academic curricula. Within the honors community, honors students interact with faculty, residential staff, and student and adult leaders in the DSU community. Honors students participate in service to Delaware State University and the local Dover community. Honors students are given the privilege of honors residential housing. Additionally, honors students have membership in the Honors Students Association, where they are given the opportunity to participate in social and extracurricular events.

Admission Criteria

Applicants must have a cumulative GPA of 3.25 or higher (on a 4.0 scale) and earn either

- a minimum combined SAT score of 1050 (Mathematics and Critical Reading) with at least 450 in each section;
- an ACT composite score of at least 22, in the Critical Reading and Mathematics sections;

The application must meet admission criteria. Application materials include:
• Freshmen: Copies of the high school transcript;
• Transfer students: Copies of college transcript(s) from every institution attended;
• Continuing DSU students: Unofficial DSU transcript.
• Freshmen: Letters of recommendation from two high school instructors;
• Transfer and continuing DSU students: Letters of recommendation from two college instructors.
• A typed 400-600 word essay explaining the desire to be admitted into the Honors Program; A list of academic and extracurricular achievements/awards.

Honors Program Goals

1. To provide talented and motivated students opportunities for intellectual growth and achievement, in small, challenging classes that encourage active intellectual participation, discussion and collaboration in the search for knowledge (SLO I);
2. To enhance student skills for analytical/critical thinking, logical examination and appraisal of ideas (SLO II);
3. To enhance student skills for problem solving and decision making (SLO III);
4. To enhance student skills for clear, precise, coherent and persuasive oral communication (SLO IV) and written communication (SLO V);
5. To engage students in the creative process of formulating a hypothesis, researching those problems and drawing conclusions that lead to either original classroom assignments or larger faculty-mentored research projects resulting in contributions of scholarly work to each student’s chosen field of study (SLO VI);
6. To prepare honors students through experience with department-based honors courses, interdisciplinary colloquia and seminars, and independent study and research
   a. to ensure its students' academic success (SPO I),
   b. to ensure its students earn Honors Program Graduate Certification (SPO II), and
   c. to prepare its students for graduate and professional schools (SPO III).

The Honors Curriculum

The Honors curriculum consists of the following category of courses and activities:

• Interdisciplinary/multidisciplinary colloquia/seminars.
• Departmental Honors Courses including sections of General Education courses.
An honors student will earn Honors Program Graduate designation if he/she

1. completes a minimum of TWELVE (12) hours of honors departmental courses with a minimum of "B" in each course,
2. completes a minimum of SIX (6) hours of honors colloquia with a minimum of "B" in each course,
3. maintains an overall cumulative GPA of 3.25 each semester until graduated, presents his/her research on Honors Day each year beyond the freshman year, and
4. completes an honors senior thesis.

Oversight and Facilities

The Honors Program is part of the Division of Academic Affairs and reports to the Office of the Provost. The office is housed in Suite 310 of the Martin Luther King, Jr. Student Center and is staffed by the Director and the Secretary. The Honors Study Lounge is located in Tubman Hall, first floor.

The Honor Program serves approximately 120 students per year in their academic pursuit of Honors Program Graduate designation. It is supported by the university Honors Council that oversees the program.

Unit(s) Profile

A. PERSONNEL (Faculty/Professional and/or Classified Staff).

1. Full or part-time employees.

a. Dr. Dawn A. Lott, Honors Program Director, Department of Mathematical Sciences
b. Ms. Terry Pauls-Smith, Honors Program Secretary
c. Dr. Andrew Blake, Department of English & Foreign Languages
d. Dr. Myna German, Honors Council Chairperson, Department of Mass Communications
e. Dr. Samuel Hoff, Department of History, Political Science & Philosophy
f. Dr. Karl Miletti, Department of Biological Sciences
g. Dr. Gulnihal Ozbay, Department of Agriculture & Natural Resources
h. Dr. Renu Tripathi, Department of Physics & Engineering
i. Dr. Jesse Zuba, Honors Council Secretary, Department of English & Foreign Languages

2. Personnel changes. None.
B. CENTERS None.

C. EDUCATIONAL PROGRAMS

1. Degree(s) and degree options available within Department:

The Honors Program is not a degree-offering department.

2. Graduating honors students can earn the Honors Program Graduate designation. The requirements are

a. Completes a minimum of SIX credit hours of Interdisciplinary Honors Colloquia or Honors Independent Study Research with a minimum of "B" in each course;

b. Completes a minimum of TWELVE credit hours of department-based Honors courses with no more than SIX (6) coming from a single department with a minimum of "B" in each course;

c. Maintains an overall cumulative GPA of 3.25 each semester until graduated;

d. Presents a paper or poster project on Honors Day each year after the freshman year;

e. Successfully completes and defends an honors senior research thesis;

f. Completes an Honors Inventory Form by the end of the semester before the semester he/she graduates, and

g. Petitions the Honors Council for Honors Program Graduate designation.

3. Honors students approved for Honors Program Graduate designation will receive a certificate at Commencement. Their Honors status will be acknowledged in the Commencement book and designated in the official grade transcript and as part of their permanent academic record.

4. Enrollment by College

a. College of Agriculture and Related Sciences - CARS (9.38%)

b. College of Arts, Humanities and Social Science - CAHSS (35.16%)

c. College of Business - COB (15.63 %)

d. College of Education, Health and Public Policy - CEHPP (14.84 %)

e. College of Mathematics, Natural Sciences and Technology - CMNST (25.78 %)

5. Enrollment by Major: The following majors are represented by at least 4% of the Honors students

a. Aviation 3.13 %

b. Computer Science 3.13 %

c. Physics and Engineering 3.13 %
d. Education 3.91 %
e. Kinesiology 3.91 %
f. Agriculture 4.69 %
g. Business 4.69 %
h. Nursing 4.69 %
i. Accounting 5.47 %
j. Criminal Justice 5.47 %
k. Political Science 5.47 %
l. Mass Communications 6.25 %
m. Psychology 10.94 %
n. Other 16.41 %
o. Biological Sciences 17.19 %

6. Enrollment by Gender (consistent over the past 5 years)
   a. 108 women (84.38 %)
   b. 20 men (18.52%)

Unit(s) Initiatives accomplished in this cycle
   A. List and describe any new programs and/or initiatives.

   1. Margaret Oliver First Lady's Hats and Gloves Tea for March 2016.

   B. List and describe any significant modifications in the past 12 months to pre-existing programs or curricula.

   1. Two new honors colloquia were piloted this year: HONR 309: The Concept of Risk Across Disciplines; HONR 310: The Concept of Network Across Disciplines (both taught by Dr. Myna German)

   C. List Professional Development Efforts and/or Activities organized by the unit. None.

   D. List Professional Development Activities not organized by the unit but attended by or pursued by unit member (s), list names of members involved: See Departmental Reports.
E. List all community, public, and business outreach programs, activities and events occurring during the reporting year. Asterisk any that involved individuals from other DSU Units. Where appropriate, indicate the number of persons served by the outreach effort.

1. DSU Organization Fairs (*Office of Student Leadership and Activities)
2. New Student Orientations *(Office of Admissions)
3. DSU Open Houses *(Office of Admissions)
4. Hornet Days *(Office of Admissions)
5. DSU Research Day (*School of Graduate Studies and Research)
6. Habitat for Humanity

F. Technology Integration: Include a discussion of continuing effort or need for technology. Academic Departments are to include efforts in incorporating technology use in classroom instruction.

1. DSU Events App(lication) utilized for DSU Research Day
2. HP seeks to offer at least two more online courses.
3. HP seeks to encourage faculty who teach honors courses or colloquia to utilize technology in the classroom.

G. List any facility and/or infrastructure improvements.

1. Establishment of the Honors Program working group by the Provost's Office.

H. Terminated Programs: None

I. Enter any other comments that you feel are important to the continued improvement of the Unit.

1. Director Lott submitted a formal budget to the Provost's office in order to obtain funds for the administration of the program. This program needs the established budget secured in order for the program to the honors students effectively and efficiently serve. For the past two years, most of the items required by or for the Honors Program have been funded by the Provost's budget. Hence, the Honors Program budget still does not include sufficient funding for university-wide honors activities.
2. Due to the growth of the program, the Honors Program is in need of a larger facility that can service the students and the staff effectively.
3. The Honors Program is in need of new colloquia (interdisciplinary courses). Students continue to complain that there is little variety in topics and in instructors for these specialized courses.

**Unit(s) Honors/Awards and Achievements**

A. Report any special honors and/or awards for the year. Academic departments are to include key statistics, such as number of degrees awarded, average time-to-degree, graduation rate, retention rate (year-to-year and to graduation) as compared to university totals.

1. Degrees

Four honors students earned Bachelor of Science/Art degrees on December 15, 2017. Twenty-three honors students earned awarded Bachelor of Science/Art degrees on May 15, 2018.

2. SAT scores

The SAT scores for entering freshmen honors based on honors students admitted to the Honors Program for 201501 are as follows:

- Critical Reading range = [500-730]; Critical Reading average = 573
- Mathematics range = [490-650]; Mathematics average = 546
- Total range (CR and M) = [910-1380]; Total average = 1119

3. Average time-to-degree for graduating honors students who have completed the curriculum is 4 years: Approximately 4 years.

4. Graduation rate for students who remain in the Honors Program: 25/29 = 86.21%

5. Retention rate

(a) 34 out of 34 freshmen will matriculate in the Honors Program as sophomores (100%).

(b) 36 out of 38 sophomores will matriculate in the Honors Program as juniors (94.74%).

(c) 29 out of 33 juniors will matriculate in the Honors Program as seniors (87.88%).

6. Fall 2017 President's and Dean's List

(a) President's List: 43 out of 132 students (32.58%)

(b) Dean's List: 109 out of 132 students (82.58%)

7. Spring 2018 President's and Dean's List
(a) President's List: 42 out of 128 students (32.81 %)

(b) Dean's List: 102 out of 128 students (79.69 %)

B. Major Achievements of Students.

1. National Presentations

Ten honors students presented their research at the 2017 Annual Conference of the National Association of African American Honors Programs (NAAAHP) in November 2017.

2. Activities of Student Groups (including civic and social activities)

(a) Honors Program Orientation

(b) Honors Induction/Graduation Ceremony (April 3, 2018)

(c) DSU Research Day (April 20, 2018).

(d) Brain Games Night (October 2017)

3. Job Placement and/or Accomplishments of Seniors: Not known at the time of this report.

C. Job Placement and/or Accomplishments of Graduate Degree Recipients: Not known at the time of this report.

D. Follow-up of Graduates (All Degree Levels; since 2009)

1. Number and Percentage of Honors Graduates: Not known at the time of this report.

2. Number and Percentage of Graduates Enrolled in full-time higher-level education within one year of graduation:

   Not known at the time of this report.

3. Number and Percentage of Graduates employed in the major field within one year of graduation.

   Not known at the time of this report.

4. Number and Percentage of Graduates in Delaware 5 years after graduation: Not known at the time of this report.

   E. Employer satisfaction: Not known at the time of this report.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

"KPI # 1 and #10". Note: This section refers to undergraduates and their participation in undergraduate research, study abroad, service learning,
internships, experiential learning and sustainability activities and courses. You must upload IRPA spreadsheet in the Document Management section and connect to this section of the Program Annual Report.

See 2018 DSU Research Day Presenters.

Data regarding study abroad, service learning, internships, and experiential learning is not available at the time of this report.

Connected Document

- 2018 DSU Research Day Presenters

Closing the Assessment Loop: Please share one or two prime examples of your unit’s assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans. a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements? b) Have these changes been implemented? If not, when will they be implemented? c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

(a) The program will administer course and student evaluations so that the program can assess its strengths and weaknesses and then conduct modifications for positive change. The Director will meet with the Deans to determine a general schedule for course offerings and departments that are open to the creation of more honors courses.

(b) Some of these initiatives were implemented in the past but not aggressively. Forms which will allow honors students to evaluate the honors courses will be reinstated in the 2018-2019 academic school year. Additionally, exit interviews for seniors will be reinstated.

(c) The Honors Program will assess the courses/colloquia semi-annually in the 12th week of each semester in order to guarantee these initiatives are growing and improving the program and guarantee acquisition of necessary data for program review.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.

Employees’ Profile/Recent Achievements are documents in individual host departments as follows:

- Dr. Myna German, Department of Mass Communications
- Dr. Andrew Blake, Department of English & Foreign Languages
- Dr. Samuel Hoff, Department of History, Political Science & Philosophy
- Dr. Dawn A. Lott, Department of Mathematical Sciences
- Dr. Karl Miletti, Department of Biological Sciences
- Dr. Gulnihal Ozbay, Department of Agriculture & Natural Resources
- Dr. Renu Tripathi, Department of Physics & Engineering
- Dr. Jesse Zuba, Department of English & Foreign Languages
Undergraduate Program Information: Please use the Excel template (sent by email) for reporting details about each undergraduate program in your department. Submit data for each program as separate rows in the spreadsheet and include the Department Name in the top section. You must upload the spreadsheet in the Document Management section, connect to this section, and state “see attached” below.

See attached.

Detailed Assessment Report
As of: 9/27/2018 12:26 PM EST
2017-2018 Hospitality & Tourism Management (B.S.)
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The mission of the Hospitality and Tourism Management Program is to prepare students to become leaders and management professionals, who possess the hospitality, entrepreneurial and managerial skills and competencies necessary to make positive contributions to the hospitality industry, in a global society.

This includes enhancing operational efficiency and effectiveness and the financial viability of organizations in the industry. Students must: (1) demonstrate knowledge and application, as well as oral and written communications of specific functional areas of specialization with management; (2) demonstrate requisite skills of a common body of knowledge in Hospitality and Tourism Management; (3) demonstrate Knowledge and applications to solve managerial and business problems, quantitative reasoning related to all sectors of the industry, in a global, cultural and diverse society; (4) Develop management, leadership and decision-making skills; and (5) assess data gathering, problem solving and information literacy related to HTM.

The Hospitality and Tourism Management (HTM) mission is congruent with the mission of the University, in that it prepares students for a meaningful and relevant education that emphasizes both the liberal and professional aspects of higher education. The Hospitality and Tourism Management Program embraces diversity and provides a broad range of interactive instruction, service, and research, so that graduates will become competent, productive and contributing citizens in a global, diverse society.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 1: Student Learning Goals
Hospitality & Tourism Student learning goals.

SLO 1: SLG - Demonstrate HTM knowledge and skills to the application of decisions

Demonstrate knowledge and application, as well as oral and written communications of specific functional areas of specialization within Hospitality and Tourism Management.

Relevant Associations:

DSU Learning Goal Associations:
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information
4 UG Student Learning Goal: Independent learners able to integrate knowledge and technology to achieve personal and professional success

**Strategic Plan Associations:**
College of Business
1. Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.

**Related Measures:**

**M 1: Senior Assessment Test**
1. HTM students are assessed using several methods. During the junior year and the beginning of the senior year, all HTM students are required to complete a 120-item exam that encompasses all aspects of Hospitality and tourism Management.
2. HTM students are assessed on the core subjects in the COB through a Senior Assessment Test that includes questions related to the 12 subjects included in the core areas.
3. Students are assessed using the "Across the Curriculum" rubrics required by the university.
4. Management and leadership skills are assessed through course activities and participation in professional and honors organizations.

The results of each assessment is evaluated and adjustments are made through course activities to improve the competencies noted below the standard.

Source of Evidence: Writing exam to assure certain proficiency level

**Target:**
Students are required to score a minimum score of 80 in the senior Assessment test.

**Findings (2015-2016) - Target: Met**
The assessment test included the basic level of KSAs needed as a hospitality graduate. The target of 80 is being evaluated to determine if the target number should be raised. In previous years, students who did not score 80 or above were given additional questions to complete and an additional writing assignment as given if the writing was the problem.

Results indicate that the students met the minimum level of knowledge required. The test included two essay questions. Each student completed the essay questions that indicated that they were proficient in writing a response to issues and questions posed.

Revisions to questions where most students answered improperly will be evaluated and changed.

**SLO 2: SLG Requisite skills of Hospitality and Tourism Management**
Demonstrate requisite skills through the use of technology and other venues of the common body of knowledge related to Hospitality and Tourism Management.

**Relevant Associations:**

**Strategic Plan Associations:**

- College of Business
  1. Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
  5. Ensure use of technology resources in all aspects of student learning, including curriculum development, pedagogy and student advising.

**Related Measures:**

**M 1: Senior Assessment Test**

1. HTM students are assessed using several methods. During the junior year and the beginning of the senior year, all HTM students are required to complete a 120-item exam that encompasses all aspects of Hospitality and tourism Management.
2. HTM students are assessed on the core subjects in the COB through a Senior Assessment Test that includes questions related to the 12 subjects included in the core areas.
3. Students are assessed using the "Across the Curriculum" rubrics required by the university.
4. Management and leadership skills are assessed through course activities and participation in professional and honors organizations.

The results of each assessment is evaluated and adjustments are made through course activities to improve the competencies noted below the standard.

Source of Evidence: Writing exam to assure certain proficiency level

**Target:**

The target of 80

**Findings (2015-2016) - Target: Met**

Results indicate that the students met the minimum level of knowledge required. The test included two essay questions. Each student completed the essay questions that indicated that they were proficient in writing a response to issues and questions posed.

1. Seniors Assessment of Communication skills is conducted during the fall semester of the senior year, through HTM 449-Event Planning. The assessment includes: Writing, Speaking, Listening, Decision-making, completed through a special development project that is provided as the tool to assess. Students must assess,
plan, develop and present in written and oral format.

2.

Ninety-seven percent of the students met the minimum requirement of S, based on the rubric. The students who did not meet the minimum target were given additional assignments to complete. Additional time and resources were provided.

**M 2: Internship Portfolio**

A detailed portfolio of three activities related to internship and serving in supervisory roles. This is started with HTM 214 and expanded in HTM 314. This information is assessed using a rubric and given back to students for personal marketing, displaying HTM competencies.

. The three activities for Internship HTM 214:

1. Write a job description for one of the positions at the site.

2. Interview a manager/supervisor/director and ask specific questions included in the guide.

3. Assess and write the solution for one critical incident while working as an intern.

The maximum total points = 100 and included as a rubric at the end of the guide book.

Three activities are required for HTM 314, Internship II. They include

1. A detailed portfolio of each day’s activities.

2. Complete an assessment of an issue that may be occurring at the site, a process that needs improvement or an identified need that the supervisor directs the intern to complete and write a plan for improvement

3. Self-evaluation, pictures, plan developed placed into a portfolio.

Source of Evidence: Portfolio, showing skill development or best work
Target:
All students must score 90%. If there is missing information, time is provided for students to complete the assignment to meet 90%.

Findings (2015-2016) - Target: Met

Students completing internships scored 90 or above on the required assignments. The problem seems to be the time it takes them to complete the written component of the assignment. Most students (95%) have above the required hours needed for each internship. Many of the students continue to work after completing the internship hours.

No changes are needed with the requirements. The timing to submit the portfolio needs to be extended to six weeks after the end of the internship.

SLO 3:SLG - Hospitality and Tourism Problem Solving

Apply knowledge and applications of Hospitality and Tourism Management to apply and solve managerial and business problems, quantitative reasoning related to all sectors of the hospitality industry, in a global, cultural and diverse society.

Related Measures:

M 1: Senior Assessment Test
1. HTM students are assessed using several methods. During the junior year and the beginning of the senior year, all HTM students are required to complete a 120-item exam that encompasses all aspects of Hospitality and tourism Management.
2. HTM students are assessed on the core subjects in the COB through a Senior Assessment Test that includes questions related to the 12 subjects included in the core areas.
3. Students are assessed using the "Across the Curriculum" rubrics required by the university.
4. Management and leadership skills are assessed through course activities and participation in professional and honors organizations.

The results of each assessment is evaluated and adjustments are made through course activities to improve the competencies noted below the standard.

Source of Evidence: Writing exam to assure certain proficiency level

Target:
Assess data gathering, problem solving and information literacy related to HTM
This measure consists of an assigned research topic completed through the Hospitality Law class. Students are assigned to research laws related to the operation of hotels, and other lodging facilities, food services to find out the following:

a. Laws of operation for a specific state (Qualitative)

b. Code and regulations to own or rent properties (research and data gathering)

c. Recent legislation and the changes made that impact operation

d. Assessment of how the student would change laws to make the operations more profitable (quantitative data).

e. Recommendation to lawmakers and rationale for each recommendation (critical thinking).

Minimum requirement of "S" based on the rubric.

1. **Findings (2015-2016) - Target: Met**

   All of the students were able to research the specific codes for their state and each was able to identify legislation and the impact of the changes. Each student was able to assess the pitfalls, but many had shallow recommendations for lawmakers and the concrete rationale for their recommendations. More resources will be added so that students will have examples of making recommendations with the rationale that is workable and sustainable.

**SLO 4: SLG - Management, leadership and decision-making skills**

Develop management, leadership and decision-making skills.

**Relevant Associations:**

**Strategic Plan Associations:**

- **College of Business**
  1. Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.

**Related Measures:**

**M 1:Senior Assessment Test**

1. HTM students are assessed using several methods. During the junior year and the beginning of the senior year, all HTM students are required to complete
a 120-item exam that encompasses all aspects of Hospitality and tourism Management.
2. HTM students are assessed on the core subjects in the COB through a Senior Assessment Test that includes questions related to the 12 subjects included in the core areas.
3. Students are assessed using the "Across the Curriculum" rubrics required by the university.
4. Management and leadership skills are assessed through course activities and participation in professional and honors organizations.

The results of each assessment is evaluated and adjustments are made through course activities to improve the competencies noted below the standard.

Source of Evidence: Writing exam to assure certain proficiency level

**Target:**
Assessment of management and leadership include the following:
1. Through HTM 311 and HTM 345-Food Production and Restaurant Management, students plan, develop, cost, produce and evaluate a meal that is marketed and served at the University club.
   Evaluation is completed by the instructor and class members weekly.
   Students must score a satisfactory rating by customers and classmates.
   Failure to score a satisfactory rating (75) means the student must complete an additional assignment in the area where the weaknesses occurred: costing, meal preparation and service.
2. Leadership development occurs through designing group projects, joining and participating in NSMH organization.

**Findings (2015-2016) - Target: Met**
2014-2015 Finding- Five HTM seniors completed the HTM assessment test. The average score was 82 %. All students scored at least 80 %. The test is given through Blackboard to seniors. If any student fails to meet the 80 % standard, they are provided with the missed questions to complete.
2015-2016 Finding- Two of the three graduating seniors completed the assessment test. Both students scored 85 % or higher on the test.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the Details of Action Plans section of this report.

**Senior Assessment**
*Established in Cycle: 2015-2016*
Seniors must complete the Senior Assessment test with a minimum score of 80 %.

**SLO 5:SLG Assess data gathering, problem solving and information literacy related to HTM**
Assess data gathering, problem solving and information literacy related to HTM.

**Relevant Associations:**

**DSU Learning Goal Associations:**
2 UG Student Learning Goal: Effective inquirers, critical thinkers, and problem-solvers able to use appropriate quantitative and qualitative information

Related Measures:

M 3: Information Literacy Rubric
Information literacy rubric will be used in the safety and sanitation class (HTM 270) to assess students' competency in data gathering, problem solving and information literacy related to HTM.

Source of Evidence: Written assignment(s), usually scored by a rubric

Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 2: Strategic Goals
Program Strategic Goals for Hospitality & Tourism
HTM Strategic Goals:
1. Conduct yearly recruitment of students, by providing information to the undecided students and participating in recruitment fairs—Open House (fall and spring) and recruitment fairs.

O/O 6: Improve and strengthen outreach efforts to underserved populations in the state.

Improve and strengthen efforts by maintaining a positive relationship with students, parents, alumni, members of the Delaware community, and the general population.

- Develop and offer more Distance Learning Courses to increase participation and population.
- Encourage and identify collaborative Study-Abroad Opportunities for students.
- Increase the number of Industry professionals who spend a day with HTM students from 5 each semester to 8 each semester.
- Maintain affiliations with professional Organizations, such as ICHRIE, American Hotel and Lodging Association (AH&LA), National Restaurant Association, Delaware Economic Development Office, Delaware Tourism Office, Delaware Hotel and Lodging Association, (DH&LA), Eta Sigma Delta, HBCU-HM Consortium, NSMH, National Coalition of Black Meeting Planners (NCBP)

Relevant Associations:

Strategic Plan Associations:
College of Business
6 Increase external support for COB by nurturing collaborative research projects with public and private organizations.

**O/O 7:** Strengthen and support academic programs to enable students to reach their career goals.

Develop programs and processes to enhance student learning, professional development and success.

- Describe and give examples of how external forces impact HTM rational decision-making in a global society.

1.3 Infuse global awareness through Internationalizing the HTM curriculum and international relationships.

1.4 Conduct annual surveys of graduates to receive feedback about program.

1.3 Monitor all environments impacting HTM to infuse, adapt and adjust program goals and activities to meet industry needs.

1.4 Evaluate, maintain and improve program assessment strategies.

1.5 Provide support for student participation in professional activities and organizations, through industry collaborations.

Obtain feedback for continuous improvement from graduates, employees, alumni and advisory boards yearly.

This is evaluated by summarizing survey results of graduates: current positions, graduate school, future career goals.

**Relevant Associations:**

**Strategic Plan Associations:**

- College of Business
  3 Improve and strengthen outreach efforts by maintaining a positive relationship with students, parents, and alumni and by developing certificate and executive educational programs to serve the community.
  8 Improve the process of program review to ensure compliance with requirements for certification and accreditation.
O/O 8: Improve and upgrade technology to support the living-learning environment.

Ensure use of technology resources in all aspects of student learning, including curriculum development, pedagogy and student advising.

- Use industry software and hardware.
- Demonstrate the use of various IT solutions and demonstrate how to apply them in specific business contexts.
- Infuse the use of technology in each HTM class.

Relevant Associations:

Strategic Plan Associations:
College of Business
5: Ensure use of technology resources in all aspects of student learning, including curriculum development, pedagogy and student advising.

O/O 9: Improve the quality of life for residential and commuting students through a comprehensive enrichment program.

Improve the quality of student life within HTM program

- Provide professional documented advisement to all HTM students yearly.
- Provide mentors for each freshmen HTM Major

Relevant Associations:

Strategic Plan Associations:
College of Business
1: Develop programs (undergraduate and graduate) and processes to enhance student learning, professional development and success.
O/O 10: Improve external support for the University through enhanced development and marketing efforts.

Increase external support for HTM by nurturing collaborative research projects with public and private organizations.

- Assess the Hospitality Industry research needs each year and seek funding for the desired research.
- Work collaboratively with faculty at DSU and other institutions to design and conduct research projects
- Continue collaborative research with Penn State University
- Assess marketing strategies currently used.

**Relevant Associations:**

**Strategic Plan Associations:**
College of Business

6 Increase external support for COB by nurturing collaborative research projects with public and private organizations.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Senior Assessment**
Seniors must complete the Senior Assessment test with a minimum score of 80%.

- **Measure:** Senior Assessment Test | **Outcome/Objective:** SLG - Management, leadership and decision-making skills
Annual Report Section Responses

Executive Summary (1-2 pages)

1. Executive summary

The Hospitality and tourism Management Program faculty and staff conduct yearly assessments of the program through different courses during each semester. Several courses were assessed using the WEAVE templates. The courses assessed during the fall semester included Hospitality and Tourism Management (HTM 100).

The courses assessed during the spring semester were the Hospitality Law and Legal Environment (HTM 417) for Information Literacy, and Managerial Finance/Accounting (HTM 449) for Analytical Analysis. Based on last year’s assessment, the results are improving and more student had obtained the Proficient level of assessment.

In order to meet and combat the challenges of students performing at the proficient level, additional information and activities in the form of case studies and research have been developed to create, build and develop critical thinking and data gathering skills. These activities are structured to assist in the improvement of students' performance of the essential objectives that they must meet as aspiring students pursuing undergraduate degrees.

Unit(s) Profile

1. Unit's Profile

The Hospitality and Tourism Management Unit's profile to date, consists of one full time tenured faculty member and three adjunct faculty members who work cooperatively to assess and develop program curriculum to meet the program needs as well as other objectives so that the students can become and stay competent in their hospitality career.

Unit(s) Honors/Awards and Achievements

1. Initiatives accomplished

The focus for the 2017-2018 academic school year was on the recruitment of students. In June of 2017, a Bridge Program was held for one week to expose middle and high school students to the exciting career of hospitality and tourism management. Nine students participated in this initiative.
Based on several initiatives during the year, visits were made to local schools in Delaware to talk with juniors and seniors about the Hospitality program at Delaware State University and career opportunities in the hospitality and tourism industry.

- A meeting with the Hospitality & Tourism Management program and representatives from the Delaware Restaurant Association (DRA) resulted in recruitment activities on October 5, 2017 at the inaugural Steps to Success ProStart Student Leadership Conference.
- As a member of the Delaware Restaurant Association, the program was invited to recruit at the Delaware ProStart student invitational culinary and management competitions. This took place on March 2, 2018.
- During the Month of May (15, 23), visits were made to the Dover High and Polytech High Schools to introduce and recruit students to the hospitality and tourism program.
- Online recruitment has been ongoing with the College Connection initiative, North Carolina. The program has attracted more than 5 students in the past 5 years for the program.

2. Unit Honors and Awards and Achievements:

The hospitality and tourism management program retained its accreditation through the Accreditation Commission for Programs in Hospitality Administration (ACPHA). The program was also re-accredited through the Association to Advance Collegiate Schools of Business (AACSB) under the College of Business (COB).

The full-time Faculty Member was appointed and joined the Delaware Restaurant Association (DRA) Board as an educational representative.

Served as panelist for the implementation of a statewide program of study that more closely aligned to the hospitality industry.

Served as management Judge for the Delaware Pro-Start student invitational culinary and management competitions.

Continue to serve as:

Member of the Board of Trustee for Western Hospitality Institute (WHI), Jamaica. Member of the Board of Trustee - Oversee Organization Business

Member Capital School District Career and Technical Education Advisory Board. Attend meeting, make suggestions, recommendations and decision on behalf of the school district.

Culinary/Nutrition and wellness judge for the Family, Career and Community Leaders of America (FCCLA) Delaware leadership Conference - March 28, 2018

Assistant treasurer and co-editor for the HBCU Consortium and the Consortium Journal of Hospitality and Tourism.
Editorial Review Board member for the Journal of Hospitality & Tourism Cases

Fall Semester, 2017

Fall 2017, seven (7) students took the ServSafe Manager Certification and were successfully certified.

During the fall graduation, one student applied for and graduated, completing all graduation requirements.

Spring Semester, 2018

Graduation

- During the spring semester of 2018, ten (10) students applied for graduation. Four students completed all requirements while the other students are completing outstanding course requirement during the summer semester.

Conference

- Eight Students including myself attended the National society for Minority in Hospitality (NSMH) Conference in February of 2018. From this conference, students received internships and jobs.

Certifications

- Five students took the Contemporary Club Management Certification and were successful
- Three (3) students took the Bar and Beverage management and were ________ while five (5) students completed the Delaware Alcohol and Tobacco Enforcement Alcoholic Beverage Server training Certification and were also successful.
- One (1) student took the ServSafe Manager Certification while two (2) students retook the exam and were successfully certified.
- Four (4) students took the Hospitality and Restaurant Management Certification

One (1) student took the Certification in Hotel Industry Analytics and was successful.

Awards

- Four Students were awarded honors by DSU for outstanding academic achievement based on their Grade Point Average (GPA).
- Certificate of appreciation awarded on behalf of the Capital School District to faculty member for serving as a community partner.
Certificate of appreciation awarded on behalf of the Capital School District Career and Technical Education Advisory Board (CTE) to faculty member for serving as advisory board member.

Students Initiative

The students in the National Society for Minority in Hospitality (NSMH) conducted a semester-long fundraising initiative to raise funds for their trip to the NSMH Conference which was held in Chicago on February 15-18 of 2018.

Provide 1-3 unit strategic goals and/or student learning outcomes (if applicable) that will be assessed next year and how data will be collected.

1. Strategic Goals for 2017-18 that will be assessed:

   a. Goal 1: To graduate students who are excellent in communication and presentation competencies, so that recruiters will note during an annual survey.

   o Assessment of Courses: HTM 100, HTM 108, HTM 305, HTM 355, HTM 417, and HTM 449.

   b. Goal 2: To graduate students who are proficient in financial, research methods and costing/pricing for predictable profits.

   o Assessment: Assessment of financial, research methods and costing/pricing will be evaluated through daily and monthly case studies and activities and assessed via faculty, recruiters and peer reviews. This is to improve analytical and critical thinking skills.

Closing the Assessment Loop: Please share one or two prime examples of your unit's assessment activities. A complete assessment report is due October 30th and should be reported for each measure in WEAVE under Findings and Action Plans.  

   a) List one or two examples of how the unit used assessment results/findings to plan changes (initiatives) designed for improvements?  

   b) Have these changes been implemented? If not, when will they be implemented?  

   c) When does the unit plan to conduct the assessments again to ascertain whether or not these changes (initiatives) have made a difference?

1. Closing the loop

The HTM program faculty assesses yearly results and have designed new activities that require students to enhance and improve skills in communications, research, and costing. The activities re as a result of assessment, interviews with industry recruiters and yearly updates of industry supporters.

Bibliography of Scholarly Products published in 2017-2018 by unit members. Colleges should just list the number of publication listed by the departments.
1. Scholarly Products

Research/Publications

Mission / Purpose

The Office of Housing and Residential Education is committed to creating a safe and inclusive living-learning community that assists in fostering the intellectual and social development of Delaware State University's diverse residential student population, through programs and services that are aligned with the University's Mission and Core Values.

Goals and Student Learning Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans

G 2: Recruitment and Training

To recruit and train quality residential personnel.

SLO 3: Recruitment and Training
Administer a training session and distribute handbook for all RAs and SRAs.

Related Measures:

M 5: Administer Training and Recruitment Tools
Administer training and recruitment materials for all student workers.

Source of Evidence: Service Quality

Target:
New RA Application in March, 2011.

Findings (2016-2017) - Target: Met
Updated RA manual and training session materials. SRAs and RAs attended Fire School Training and the "Escape Room" to enhance team-building skills.

Findings (2010-2011) - Target: Met
Achieved new application in March 2011.

SLO 4: Recruitment and Training
Provide staff cross-training with other Student Affairs areas for critical dialogue, proper use of on-campus expertise and ability to develop crucial collaborations.

SLO 6: Recruitment and Training
Develop marketing and recruitment methods that emphasize the benefits and responsibilities of Residential Assistants.

**Relevant Associations:**

**Related Measures:**

**M 6:RA Recruitment & Training**
Continue to update SRA and RA application packets, plan RA Recruitment Week which occurs in February of each year.

Source of Evidence: Administrative measure - other

**Target:**
Design application packet, set up Twitter, give sweatshirts and shirts to RA staff.

**Findings (2016-2017) - Target: Met**
Updated RA application packet, and held successful "RA Interest Week" in February. Utilized Facebook and Twitter to advertise, and made short clip of "Why be an RA."

**Findings (2010-2011) - Target: Partially Met**

**Goals and Other Outcomes/Objectives, with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**G 2:Recruitment and Training**
To recruit and train quality residential personnel.

**O/O 5:Recruitment and Training**
Develop cross-training opportunities for resident directors

**Related Measures:**

**M 4:Offer Professional Development Opportunities**
Offer development opportunities to staff through conferences, classes, etc.

Source of Evidence: Evaluations

**Target:**
Number of conferences and classes attended

**Findings (2016-2017) - Target: Met**
Conferences attended by staff include MACUHO and NASPA. Housing Dept./DSU hosted TedTalks, where RD Mrs. Jones was guest speaker.

**Findings (2010-2011) - Target: Met**
Achieved. 4 pro staff attended ACUHO-I National Conference and MACUHO Housing Conference.

**G 5: Professional Development**
Offer professional development opportunities to all members of DHRE professional and paraprofessional.

**O/O 11: Training and Professional Development**
Offer training and other professional development opportunities within the National and Regional Housing and Residential Education Organization (ACUHO-I and MACUHO).

**Relevant Associations:**
MACUHO and ACUHO-I

**DSU Learning Goal Associations:**
3 UG Student Learning Goal: Ethical, collaborative, and productive citizens of a complex, diverse world.

**Related Measures:**

**M 4: Offer Professional Development Opportunities**
Offer development opportunities to staff through conferences, classes, etc.

Source of Evidence: Evaluations

**M 7: Staff Development**
Continue to offer classes/presentation opportunities to resident assistants and professional staff.

Source of Evidence: Evaluations

**Target:**
Four staff members to attend at least one conference a year.

**Findings (2016-2017) - Target: Met**
Hosted TedTalks, where RD Mrs. Jones was speaker. Sponsored SRA
and RD to NASPA Conference in Austin, Texas. All RD staff and director of Housing attended MACUHO conferences.

**Findings (2010-2011) - Target: Met**
Completed 2011

**G 6: Improve Online Housing Application Process**
Invested in housing software to allow for easier housing application process for students and assignment coordinators

**O/O 12: Streamlined Application Process**
Eliminated paper applications, faster and easier process for students, timestamp applications submitted for ease of assigning spaces for "first come, first serve"

**Related Measures:**

**M 9: Volume of Applications Increased**
Volume increased on opening day of application process due to ease of applying by computer or cellphone.

Source of Evidence: Activity volume

**Student Learning Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans**

**SLO 7: Freshmen Mentoring**
Establish new mentoring programs in the residence halls while utilizing the Resident Assistants (RAs) as mentors.

**SLO 8: Mentoring**
Freshmen student mentees will write at least one individual personal, educational or career-related goal; three personal strengths and one weakness; one instance in which they have exhibited self-reliant behavior; and one situation in which they exhibited enhanced self-esteem.

**SLO 9: Communication and Collaboration**
Maintain and consistently update website for housing information to better inform students and parents about policies, procedures and important notifications.

**Related Measures:**

**M 3: Update Housing and Residential Education Website**
Update Housing and Residential Education website to be more user friendly, and provide thorough information to students and staff.

Source of Evidence: Efficiency
Target:
Was it completed on time?

Findings (2016-2017) - Target: Met
Housing web pages are updated as information changes within the department. Developed short video clips of each residence hall, which was added to campus map.

Findings (2010-2011) - Target: Not Met
Website in progress

SLO 10: Communication and Collaboration

Maintain Facebook page and Twitter account for Housing and Residential Education that informs students of important information and dates regarding housing processes and dates.

Related Measures:

M 2: Establish Communication Methods

Establish communication methods for students to utilize Facebook and Twitter to receive information from Housing and Residential Education.

Source of Evidence: Efficiency

Target:
Established communication with parents and students regarding housing information through social media.

Findings (2016-2017) - Target: Met
Students and parents became more knowledgeable of Housing information and important dates by watching DHRE Facebook and Twitter posts

Findings (2010-2011) - Target: Partially Met
Twitter Completed, Facebook In Progress

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Collaboration with Nursing Department
Continue collaboration with Nursing Department so that a nurse-based themed housing is created.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Meetings over Fall semester with Nursing Department and Provost Office.
Establish Facebook Page
Establish Facebook page.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Establish Facebook page prior to 2012 Fall Semester.
Responsible Person/Group: Phillip Holmes, Lisa Alexander
Additional Resources Requested: None
Budget Amount Requested: $0.00 (no request)

Finalize Update of Housing Website
Update of website to be complete prior to Fall Semester 2012

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Update and finalize website prior to Fall semester.
Responsible Person/Group: Matthew Fortune, Lisa Alexander
Additional Resources Requested: None
Budget Amount Requested: $0.00 (no request)

Finalize Updated Housing Website
Finalize update to website prior to Fall Semester 2012

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Will finish and complete before Fall semester.
Responsible Person/Group: Matthew Fortune, Lisa Alexander
Additional Resources Requested: None
Budget Amount Requested: $0.00 (no request)

Goal Writing

Facilitate writing of goals during initial floor meetings at beginning of Fall Semester, 2012.
Student/RA Mentoring Program  
Incorporate RA Mentoring Program into the departments programming model based on the University's Core values.

Established in Cycle: 2010-2011  
Implementation Status: Planned  
Priority: High  
Implementation Description: Will implement in Fall 2012, beginning first month students return to campus during wing and hall meetings.  
Responsible Person/Group: Phillip Holmes  
Additional Resources Requested: None  
Budget Amount Requested: $0.00 (no request)

---

**Student/RA Mentoring Program**  
Incorporate RA Mentoring Program into the departments programming model based on the University's Core values.

Established in Cycle: 2010-2011  
Implementation Status: Planned  
Priority: High  
Implementation Description: Will begin implementation in the Fall 2012 semester, with each student being assigned an RA as a mentor.  
Responsible Person/Group: Phillip Holmes  
Additional Resources Requested: Paper, Files  
Budget Amount Requested: $100.00 (recurring)
Mission / Purpose

The mission of the Department of Human Ecology is to provide students high quality undergraduate education through integration of teaching, research and outreach with emerging technology the prepares them for career in food and nutrition, textiles and apparel studies field and the global economy. The department's mission is consistent with that of the College and the University.

Goals without Outcome/Objective Relationships Specified

G 1: Strengthen teaching, research and service learning
Strengthen and support teaching, research and service learning to enable students to reach their career goals in the food and nutrition or textiles and apparel studies field.

G 2: Strong research activities
Maintain, support and encourage dynamic research activities that will foster and increase faculty and student participation.

G 3: Strengthen experiential learning and outreach activities
Strengthen experiential learning and outreach efforts for students and underserved populations in the state.

Other Outcomes/Objectives, without Goals, along with Any Associations and Related Measures, Targets, Findings, and Action Plans

O/O 1: Enhance quality of teaching, research and service learning
Enhance the quality of teaching and learning in all programs.

Relevant Associations:

Strategic Plan Associations:
Delaware State University
1.4 Improve faculty and student scholarship through integration of teaching, research, creative activity, and engagement

Related Measures:

M 1: Faculty professional development
Method of assessment are based on: Number of professional development seminars and workshops attended by faculty and staff.
Source of Evidence: Service Quality
Source of Evidence: Service Quality

**Target:**
Faculty and staff should attend at least one professional development seminar or workshop per year. Funds available for professional development (there should be at least $10,000 per year to finance travel expenses to profession meeting for all faculty members in the department).

**Findings (2016-2017) - Target: Met**
Drs. Taylor, Oh, Lee and Aryee have attended one professional development workshops organized by the Center for teaching and learning. Drs. Aryee, Besong and Lee attended the 18th Biennial Research Symposium organized by 1890 Research Directors in Atlanta, Georgia on April 1-4, 2017, and Taylor attended the annual Food and Nutrition Conference and Exposition for dietitians. Drs. Aryee, Besong and Taylor have also attended at least one professional conference in their field. Staff member also attended the 18th Biennial Research Symposium organized by 1890 Research Directors in Atlanta, Georgia on April 1-4, 2017. All 6 faculty and one staff member participated in at least one seminar/workshop. At least $10,000 travel funds from grant awards and college were used to support travel expenses for professional conferences.

**Related Action Plans (by Established cycle, then alpha):**
For full information, see the *Details of Action Plans* section of this report.

**Faculty professional development**
*Established in Cycle: 2016-2017*
Continue to encourage faculty to participate in professional development workshops organized by the center for teaching and learn...

**O/O 2: Improve enrollment**
Number of undergraduate students enrolled per academic year; % change from previous years

**Relevant Associations:**

**Strategic Plan Associations:**
- Delaware State University
  - 2.2 Use enrollment management best practices to increase overall enrollment to 5,000 students

**Related Measures:**

**M 2: Percentage of enrollment increase**
Number of undergraduate students enrolled per academic year; % change from previous years

Source of Evidence: Activity volume

**Target:**
Student enrollment will increase by 5% each year.
Findings (2016-2017) - Target: **Met**

Target: MET

Compared to 2013-2014 undergraduate enrollment (51) with current enrollment (63) for 2016-2017 academic year, undergraduate enrollment in the department increased by 24%.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

### Increase enrollment

*Established in Cycle:* 2016-2017

To increase enrollment, faculty plan to participate in career days in high schools, organize events in the department that can b...

M 3: **Submit accreditation documents in a timely manner**

*Method of Assessment:* Preparation and submission of accreditation documents in a timely manner. Data collection for accreditation needs.

*Source of Evidence:* Administrative measure - other

**Target:**

Accreditation documents will be submitted to accrediting agency (ACEND) at least annually or when requested.

Findings (2016-2017) - Target: **Not Reported This Cycle**

**Target:** Not reported this cycle

We phased out the Didactic Program in Dietetics program in December 2016 and started implementation of the CPD program in the Fall 2016 semester. Progress report will be submitted in 2017-2018 cycle. Based on 2014-2015 academic year data of CPD program success, was 100% pass rate.

**Related Action Plans (by Established cycle, then alpha):**

For full information, see the *Details of Action Plans* section of this report.

**Plan to develop rubric to collect data in the 2017-2018 cycle.**

*Established in Cycle:* 2016-2017

Plan to develop rubric to collect data in the 2017-2018 cycle.

O/O 3: **Encourage faculty/student research opportunities**

Encourage faculty participation and provide research opportunities for students.

**Related Measures:**

M 4: **Gauge research productivity**

*Method of Assessment:* Number of faculty, staff, students conducting research; Number of research opportunities for students; number of students presenting research to peers; Number of grant applications submitted; number of grants awarded to faculty and staff in the department; Number of faculty and staff
participating in collaborative projects; number of opportunities for faculty and staff to interact with faculty at other institutions.

Source of Evidence: Administrative measure - other

**Target:**
At least 4 Faculty members will conduct research. At least 5 students will participate in research. At least 4 Faculty members will submit grant proposals. At least 2 grant proposals will be awarded. At least 1 interdisciplinary collaboration will be performed.

**Findings (2016-2017) - Target: Met**
Target: Met
Four faculty participated in collaborative research projects and about Ten students participated in research with a faculty mentor. Five faculty members participated in research activities with 13 students. Research topics that were assigned to students are shown in the table below. Drs. Besong, Lee, Oh, Lumor submitted grant proposal to USDA-NIFA. Dr. Oh’s proposal was awarded in the amount of $249,000 in October 2016. Food Chemists in Human Ecology collaborated with faculty in Biology Dept. to write grants together and mentor students.

Increase funding to increase students participating in research
Established in Cycle: 2016-2017
Additional funds are needed to increase the number of students participating in research activities. Continue to encourage faculty...

O/O 4: Strong outreach efforts
Strengthen the experiential learning and outreach activities by providing instruction and hands-on activities in food production, food safety, textiles and apparel construction.

Related Measures:

M 5: Number of integrated projects/outreach efforts
Number of academic projects that have an outreach component for students; number of internship activities, number of internship sites developed, number of opportunities to provide research-based information both to the students and to underserved population in Delaware.
Source of Evidence: Administrative measure - other

Target:
At least 3 academic projects that have an outreach component for students were offered. The Department will offer at least five internship opportunities in retailing for Textiles and Apparel students. Four internship opportunities in food service, community nutrition and clinical nutrition for Food and Nutritional Science Students.

Findings (2016-2017) - Target: Met
Target: Met

Six students in the Textiles and Apparel Studies program did internship at Nordstrom, TJ Max and Macys retail stores. Three students in the Food and Nutritional Sciences program did internship in nursing homes and cooperative extension with an extension specialist throughout the academic year.

Related Action Plans (by Established cycle, then alpha):
For full information, see the Details of Action Plans section of this report.

Collaborate with retailers for internships
Established in Cycle: 2016-2017
Plan to build collaboration with more retail stores in Delaware to provide more internship opportunities for Textiles and Apparel...

M 6: Summer outreach activities
Human Ecology programming activities that are provided to high school students in the summer; Human Ecology facilities are being used by DSU and other outreach programs to provide instruction to under-served youths and adults; Human Ecology students are gaining experience in the community by providing research-based information to underserved youths and adults.

Source of Evidence: Climate / Environment

Target:
At least 2 summer activities will be offered for high school students on Human Ecology departmental facilities.

Findings (2016-2017) - Target: Met
Target: met

Dr. Lee provided summer apprenticeship activities on Food microbiology for high school students on campus. Dr. Lumor provided summer research activities on Food Chemistry for High School students. Ms. Donna Brown provided cooking class for middle school students. Three graduate students (Vanessa Richards, Gina Accumanno, Michael Hickey) assisted Dr. Lee, 3 graduate students (Duchard Louis, Prince G. Boakye, Jadhav, Pratik) assisted Dr. Lumor and on undergraduate assisted Ms. Brown with summer activities. Therefore, three summer outreach activities were offered for high school students.

*Outcome/Objective:* Strong outreach efforts

**Faculty professional development**

Continue to encourage faculty to participate in professional development workshops organized by the center for teaching and learning. Continue to attract extramural funds to support professional development activities.

*Established in Cycle:* 2016-2017  
*Implementation Status:* Planned  
*Priority:* High  

**Relationships (Measure | Outcome/Objective):**  
*Measure:* Faculty professional development  
*Outcome/Objective:* Enhance quality of teaching, research and service leaning

**Increase enrollment**

To increase enrollment, faculty plan to participate in career days in high schools, organize events in the department that can bring teachers, counsellors and student/parents to visit our department, organize summer experiential learning activities
for high school students and provide stipends to academically talented students. Textiles and Apparel Studies faculty plan to organize Summer Apprenticeship activities to expose students to career in Textiles and Apparel industry and to provide students hands-on experience in Fashion and Textile Design. Food and Nutrition faculty plan to organize Summer research activities to expose students to career in food and nutrition industry and to provide students hands-on experience in recipe modification, food chemistry and food microbiology. CARS recruiter, Alex D. Meredith plans to attend career day events organized in all high schools in the state of Delaware.

**Established in Cycle:** 2016-2017  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Percentage of enrollment increase  | **Outcome/Objective:** Improve enrollment

---

**Increase funding to increase students participating in research**

Additional funds are needed to increase the number of students participating in research activities. Continue to encourage faculty to write grant proposal to attract funds to increase student participation in research. Plan to work on factors that prevent faculty from writing grant proposal.

**Established in Cycle:** 2016-2017  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Gauge research productivity  | **Outcome/Objective:** Encourage faculty/student research opportunities

---

**Plan to develop rubric to collect data in the 2017-2018 cycle.**

Plan to develop rubric to collect data in the 2017-2018 cycle.

**Established in Cycle:** 2016-2017  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
**Measure:** Submit accreditation documents in a timely manner | **Outcome/Objective:** Improve enrollment

**Seek funding for outreach to middle and high school students**

Additional funds are needed to provide organized outreach activities on campus for middle and high school students. Continue to encourage faculty to write grant proposal to attract funds to increase student participation in outreach. Plan to work on factors that prevent faculty from writing grant proposal.

**Established in Cycle:** 2016-2017  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
**Measure:** Summer outreach activities | **Outcome/Objective:** Strong outreach efforts

**Annual Report Section Responses**

**Executive Summary (1-2 pages)**

I. EXECUTIVE SUMMARY

Summarize significant accomplishments for the year, including status report on success in achieving 2016-2017 annual goals and objectives. [One Page]

- Faculty and staff have successfully attracted additional external funds over $200,000 during the 2017-2018 academic year. These funds are being used to strengthen teaching and research activities in the Food and Nutritional Sciences programs. The funds are also used to enhance students experiential learning activities and enhance department's recruitment efforts

Funded grants/funding source/amount/time period
• Faculty and staff have successfully attracted external funds during the 2017-2018 academic year. These funds are being used to strengthen teaching and research activities in the Textiles and Apparel Studies, Food and Nutritional Sciences, Food Chemistry, Food Microbiology and Biotechnology programs.

• Ten students graduated with a baccalaureate degree this academic year, 2017-2018 (2 earned a degree in Food and Nutritional Sciences, and 8 earned a degree in Textiles & Apparel Studies)

• Three students graduated with a Master of Science degree in Food Science and Biotechnology

• Two students in the Coordinated Program in Dietetics successfully completed the didactic portion (course work) and the supervised practice (clinical, community, and management) and passed the registration examination for dietitians for the first attempt.

• The Department partnered with USDA-NIFA and organized a successful Grant Writing Conference in Dover on May 10-11, 2018 that attracted more than 100 participants

Unit(s) Profile

EMPLOYEE (faculty, professional/classified staff)

PROFILE AND ACCOMPLISHMENTS

May 2017- April 2018

Name  Samuel Besong

Rank/Title  Professor and Chairperson

Year Hired  July 2005  Years of Service  12 Years and 11 Months

X Tenured  Non-Tenured on tenure track  Not tenure-track  N/A

1. Courses taught

Fall-2017

a. Introduction to Nutrition (HMEC-215)

b. Etiology of Obesity and Prevention Approaches (HMEC-430)

Spring 2018

a. Advanced Nutrition (HMEC-308)

b. Senior Seminar (HMEC-450)

c. Nutritional Biochemistry (HMEC-455)
2. Participation in professional meetings, seminars, etc. Include date.

a. Project Directors’ meeting on Food Safety Sponsored by USDA-NIFA, June 2017

3. Research and publications (Students in bold font)

1) Bougouneau, B.M., Moore, M., Besong, S.A. and Aryee, A.N.A. Structural analysis of njangsa and other edible seeds using confocal imaging. 2nd Conference on Preparing Winning Grants. Dover Downs Hotel and casino, May 10-11, 2018, Dover, DE.

5) Besong, M.A., Nguyen, A., Besong, S.A. and Aryee, A.N.A. A comparison of commercial enzymes used singly or combined in aqueous enzymatic extraction of oil from njangsa seed. 109th AOCS Annual Meeting and Industry Showcase, May 6-9, 2018, Minneapolis, MN.

6) Bougouneau, B.M., Moore, M., Besong, S.A. and Aryee, A.N.A. A Microscopy study of the structure of njangsa and other selected seeds: Method development. 109th AOCS Annual Meeting and Industry Showcase, May 6-9, 2018, Minneapolis, MN.

10) Bougouneau, B.M., Moore, M., Besong, S.A. and Aryee, A.N.A. Analysis of the microstructure of selected edible seeds using confocal imaging. Research Day, April 20, 2018, Delaware State University Dover, DE.

11) Asuzu, P.C., Besong, S.A. and Aryee, A.N.A. Effect of solvent systems on the extraction and physicochemical properties of palm kernel oil to be used for food product development. Research Day, April 20, 2018, Delaware State University Dover, DE.

13) Smith, J.C., Asuzu, P.C., Besong, S.A. and Aryee, A.N.A. In vitro screening of phenolic compounds and antioxidant capacity of selected plants and plant parts. Research Day, April 20, 2018, Delaware State University Dover, DE.

4. Proposals submitted but not yet funded. Include funding agency.

a. Project Title: Establishing research on Phytochemistry at DSU (submitted to USDA-Evans Allen)

5. Funded grants/funding source/amount/time period

Project Title: Provide Experiential Learning Opportunities and Financial Support to facilitate transfer from Community College to DSU’s Coordinated Program in Dietetics." Funded by USDA-NIFA ($149,878)

6. Outreach Programs/Activities and dates

· Hosted His Excellency Governor Cornel Rasanga of Siaya County (State), Kenya to strengthen collaboration with institutions within the state.

7. Innovative teaching strategies and/or student services strategies initiated

· Integrated review of published articles, assignments and class lecture

8. Assessment related activities

· Developed a rubric to assess student writing, communication and oral presentation skills in the Senior Seminar course (HMEC-450)

· Developed a rubric to assess students' competencies in DPD core courses (HMEC-215, HMEC-317, HMEC-334)

9. Advanced study or other professional development

None

10. Special honors and awards received

None

11. Other significant accomplishments
EMPLOYEE (faculty, professional/classified staff)

1. Courses taught

Fall 2014

HMEC-207 Introduction to the Fashion Industry
HMEC-307 Quantitative Merchandising
HMEC-523 Theory/Practice for Web-Based Instruction
HMEC-607 STATS/Research Method in FCS

Spring 2015

HMEC-202 Historic Costume & Design
HMEC-423 Merchandising Assortment Planning & Buying
HMEC-561 CURR DEV/EVAL in FCS
HMEC-565 Experimental Design & Data Analysis

2. Participation in professional meetings, seminars, etc. Include date.
Delaware Family Consumer Science Teachers Meetings (Fall & Spring)

3. Research and publications. List the names of students involved.

4. Proposals submitted but not yet funded. Include funding agency.

5. Funded grants/funding source/amount/time period

6. Outreach Programs/Activities and dates

Spring 2013 ~ present Editorial Committee for the Korean Society of Knit Design

Spring 2015 Delaware 21st Century Program, William Henry Middle School, Dover DE

Spring 2015 FCCLA Annual Spring Conference

7. Innovative teaching strategies and/or student services strategies initiated

Developed a community engage program for FCS MS graduate students.

Developed a Teaching Portfolio Template (HMEC-561)

Developed Templates for Educational Technology Tools (HMEC-523)

· Distance Education: Blackboard

· Timeline Technology: Timetoast

· Online Themed Activities: Pinterest

· Virtual Story Board: Glogster

· Video Production Technology: Animoto

8. Assessment related activities

9. Advanced study or other professional development

March 30~31 LEAD2015 Global Leadership Forum

10. Special honors and awards received

11. Other significant accomplishments

Danielle Dawkins "School Uniform and The Effects of Child
EMPLOYEE (faculty, professional/classified staff)

PROFILE AND ACCOMPLISHMENTS

May 2017 - April 2018

Name: Jung-lim Lee

Rank/Title: Associate Professor

Year Hired: 2010

Years of Service: 8 years

X Tenured Non-Tenured on tenure track Not tenure-track

1. Courses taught

Fall-2015

• Food Microbiology: HMEC 260-01

• Advanced Food Microbiology: HMEC 520-01

• Advanced Food Safety: HMEC 610-60

Spring-2016

• Food Biotech and Genomics: HMEC 474-01

• Food Safety: HMEC 476-01

• Research Problems in Food Science: HMEC 625-60

2. Participation in professional meetings, seminars, etc. Include date.

• Delaware BioAssociation meeting, Delaware Biotechnology Institute, Newark, Feb, 2018.

• 1890 ARD Food Safety meeting, Beltsville, MD, April 2018.

3. Research and publications. List the names of students involved.

• Correlation of Total Bacterial and Vibriospp. Populations between Fish and
https://doi.org/10.3389/fmars.2017.00147

4. Proposals submitted but not yet funded. Include funding agency.

- Establish a PHAGE and new omics capacity for the mitigation of AMR bacteria. PD, CBG grants, USDA-NIFA.

- Development of Nutritionally Enhanced Corn Dried Distillers Grains with Solubles as a Phytogenic Alternative to Antibiotic Growth Promoters in Broiler Production. Co-PD, USDA-NIFA.

- Advanced Biomanufacturing: Bridging the gap between genomics and phenomics using the *Caulobacter* system, Co-PD, NSF.

5. Funded grants/funding source/amount/time period

6. Outreach Programs/Activities and dates

- Open "DSU Summer Food Biotechnology Camp for High School Students" 2015- Present.
• Committee activities of the MOT Charter CTE/ Perkins advisory committee 2016-Present.

• Serve as our higher education liaison and resident expert for the development of the Biotechnology Program at the MOT Science & Arts charter high school. 2015- Present.

• Committee activities of the DHSS food safety, 2017-Present.

7. Assessment related activities

• Review panel activity in the peer-reviewed journal "Food Biotechnology".

• Review panel activity in the peer-reviewed journal "Foodborne Pathogens and Disease".

• Review panel activity in the peer-reviewed journal "Journal of Food Safety".

• Review panel activity in the peer-reviewed journal "Food Research".

• Editorial board activity in the peer-reviewed journal "International Journal of Food Science, Nutrition and Dietetics".

• Review panel activity in Small Business Innovation Research (SBIR) program, USDA-NIFA.

8. Advanced study or other professional development

• Commitment to developing in metagenomics and AMR studies.

• Commitment to developing the pipelines for bioinformatics/biostatistics analysis.

9. Special honors and awards received

• None.

10. Other significant accomplishments

Graduate Committee Chair

• Gina Accumanno. The Study of Bacterial Communities on Catfish (*Ictalurus*

• Cassandra Eyong. The Effects of Natural Preservatives on the sensory Properties and Shelf Life of Channel Catfish (Ictalurus punctatus). April 2018.

• Raphael Eyum. Quantification of Viable Pseudomonas species based on DNA Amplification. April 2018.

Search Committees

• Search Committee Member for Food and Nutritional Science faculty. Winter, 2018.

EMPLOYEE (faculty, professional/classified staff)

PROFILE AND ACCOMPLISHMENTS

May 2017 - April 2018

Name__ Bettina C. Taylor ________________________________

Rank/Title Assistant Professor _________________________

Year Hired ___12/2014____ Years of Service _____3 year and 5 months________

_____Tenured ___x__ Non-Tenured on tenure track ___ Not tenure-track ___ N/A

1. Courses taught

Fall 2017

• Nutrition During the Lifecycle (HMEC 335)
• Introduction to Dietetic Practice (HMEC 310)
• Human Nutrition Assessment (HMEC 325)
• Medical Nutrition Therapy II (HMEC 426)
• Community Practicum (HMEC 490)
• Clinical Practicum II (HMEC 492)
• Enrichment Practicum (HMEC 494)

Spring 2018
· Principles of Analysis of Food Preparation (HMEC 105)
· Human Nutrition Assessment (HMEC 325)
· Medical Nutrition Therapy II (HMEC 426)
· Clinical Practicum I (HMEC 493)
· Community Nutrition Practicum (HMEC 490)
· Food Service Management Practicum (HMEC 491)
· Enrichment Practicum (HMEC 494)

2. Participation in professional meetings, seminars, etc. Include date.
· ACEND Program Reviewer Workshop. 6/22-23/2018.
· Food and Nutrition Conference & Expo. 10/22/2017.
· Delaware Academy of Nutrition and Dietetics 2018 Annual Conference. 4/27/2018.

3. Research and publications (Students in bold font)
Bhagya Sri Kaja, Stephen Lumor, Samuel Besong, Bettina Taylor and GULNIHAL OZBAY. Investigating Enzyme Activity of Immobilized Candida rugosa Lipase. Journal of Food Quality. [Accepted for publication]

4. Proposals submitted but not yet funded. Include funding agency.
· Jung-lim Lee, Derrick Scott, Bettina Taylor, Fran Franklin, Amrita Madabushi. Establish a PHAGE and new omics capacity for the mitigation of AMR bacteria. USDA-NIFA-CBG.
· Shobha Sriharan Christopher Catanzaro, Crystal Wynn Debbie Jones, Asmare Atalay Reza Rafie, Gabriel K Harris, Stacey Nelson. Collaborative Approach for Underrepresented Student Experiential Learning in Agricultural and Food Sciences. Subaward Grant. USDA-NIFA-CBG.

5. Funded grants/funding source/amount/time period
· Samuel Besong, Bettina Taylor, Donna Brown. Collaborative Initiative to Assess and Develop Intervention programs to Combat Obesity among Low-income Families. $249,993. 10/2015-09/2018. USDA-NIFA-CBG.
· Bettina Taylor, Samuel Besong, Donna Brown. Provide Experiential Learning and Financial
Support to Facilitate transfer from Community College to DSU's CPD program. $149,878. 02/2018-02/2020.

6. Outreach Programs/Activities and dates
   · Student Outreach Committee Member. CARS. January 11, 2018 - Present.
   · Poster Presentation: Coordinated Program in Dietetics presented at the Delaware Academy of Nutrition and Dietetics Conference. 4/27/2018.

7. Innovative teaching strategies and/or student services strategies initiated

8. Assessment related activities
   Redesigned Goals and SLOs with Associations and Related Measures, Targets, Findings, and Action Plans for Food and Nutrition Sciences (B.S.). Fall 2017.
   Updated and Submitted to ACEND: Coordinated Program in Dietetics Curriculum Map, RDN Curriculum Map Required Components Checklist, and CRDN Student Learning Outcomes (SLO) Assessment Plan (Required Elements 6.1 and 6.2) On-going Assessment of Core Competencies for the RDN. December 2017.
   General Education Committee Member. 2017/18 Academic Year.
   Faculty Senator, Delaware State University. 2017/18 Academic Year.

9. Advanced study or other professional development
   Webinars for Continuing Professional Education Attended:

· Patient Simulation: Putting Malnutrition Screening, Assessment, Diagnosis, and Intervention into Practice. October 2017.

· Botanical for a Healthy Inflammatory Response; Cooling the Fire Dragon. October 2017.

· Exploring the Evidence on Dietary Patterns. The Interplay of What We Eat and Health. January 2018.

· Engage Students by Adding ANDHII to the Classroom. January 2018.

· IPE 101 for the Dietetic Educator. April 2018.

· Nutrition Care Process from and Integrative and Functional Perspective. May 2018.

· Medical Cannabis: Considerations for Dietitians Working in Oncology. May 2018

10. Special honors and awards received

None

11. Other significant accomplishments

Graduate Committees

· Graduate Committee Member: Gina Accumanno. The Study of Bacterial Communities on Catfish (Ictalurus Punctatus) during Storage. April 2018.

· Graduate Committee Member: Cassandra Eyong. The Effects of Natural Preservatives on the sensory Properties and Shelf Life of Channel Catfish (Ictalurus punctatus). April 2018.

Search Committees
· Search Committee Member for position in Textiles and Apparel Studies. Summer, 2017.

· Search Committee Chair for Food and Nutritional Science faculty. Winter, 2018.

· Search Committee Chair for Early Childhood Lab Director position. Spring, 2018.

23) Besong, M., Arrey, I.T., Nguyen, A. and Aryee, A.N.A. (2017). Influence of various enzyme combinations on njangsa (Ricinodendron heudelotti) seed oil extraction, recovery and quality. 8th Annual Undergraduate Research and Service Celebratory Symposium, August 10, 2017, University of Delaware, Newark, DE.

4. Proposals submitted but not yet funded. Include funding agency.

a) **Building Students' Capacity in Food Science Research using Experiential Learning, Concepts of Food Analysis, Product Development and Sensory Evaluation.** PI, 2018, Funding Organization: USDA-NIFA-CBG.

b) **Acquisition of an AFM-Raman Microscope.** Collaborator, 2018, Funding Organization: NSF.

c) **Acquisition of a Multiphoton Confocal Microscope for research and Education at Delaware State University.** Co-PI, Funding Organization: NSF.

d) **Waste Valorization and Food for Health: An Integrated Approach to Train Food Scientists to Meet National Need.** PI, 2017, Funding Organization: USDA-NIFA-HEP.

e) **Demonstration of Edible Oil Production from Algal Biomass.** Co-PI, 2017, Funding Organization: SDA-NIFA-AFRI.
5. Funded grants/funding source/amount/time period

a) Digestive aid delivery, Delaware INBRE Core Center Access Award (awarded/active)

b) Delaware INBRE Summer Research Program (Support for supplies and 2 summer students - Summer 2018).

   i. Encapsulation of astaxanthin and its characterization, Delaware INBRE Summer Research Program (Feb. 2, 2018) (awarded)

   ii. Food safety and human health; bacterial detection in food and safety of product shelf life for consumption Delaware INBRE Summer Research Program, co-mentoring with Dr. Gulnihal Ozbay (awarded/active)

6. Outreach Programs/Activities and dates

a) **Speaking Events**

Routinely invited to speak to students from the Early College High School about Food Science, and Research opportunities in my Food Chemistry Lab (April 2018 and October 2017).

b) **Laboratory Visit**

Routinely invite students from the Early College High School to visit my Lab and to participate in experiments (April 2018 and October 2017).

c) **Research Experiences**

I regularly host 1 to 2 in my laboratory during the semester. Between Fall 2017 and Spring 2018, I have hosted 2 undergrads.

d) **Summer Research Experiences**

My summers are dedicated to research and increasing participation of underrepresented groups in Science and Technology. Since, 2017 I have hosted 2 or more students in my laboratory. This year (2018), I have two high school students and two undergrad interning in my lab.

e) **Analytical Service Lab**

Routinely analyze (GC-MS) flavor and fragrance oils for perfumery and flavoring for Champon Vanilla Inc, Palm Beach Gardens, Florida.

Developed nutrition fact label for 32 flavors for Vanderwende Farm Creamery, Bridgeville, DE. (Completed: April 2018).

f) **Reviewer**

1. Natural Sciences and Engineering Research Council of Canada (NSERC)

2. Food Chemistry

3. Journal of Food Biochemistry
4. Journal of Food Engineering

5. American Oil Chemists' Society

7. Innovative teaching strategies and/or student services strategies initiated
   a) Development of research projects for Food Product Development (HMEC 600)
   b) Development of sensory evaluation protocols for Food Product Development (HMEC 600)
   c) Mini-research projects; Introduction to Food Science (HMEC 250)
   d) Site visit to USDA Research Center, Wyndmoor, PA

8. Assessment related activities
   a) AOCS/PCP Division's ADM Best Paper Award Judge (Feb. 2018).
   b) Faculty Senator, Delaware State University, 2017/18 Academic Year.
   c) College of Ag. & Related Science Seminar Committee Seminar Committee Co-Chair (Fall 2017 - present)
   d) Chemical & Biosafety committee member, Delaware State University (Summer 2017 - present)
   e) National Organization for the Professional Advancement of Black Chemists and Chemical Engineers (NOBCCHE2017); Review Committee Member (Sept. 2017)
   f) AOCS/PCP Division's ADM Best Paper Award Judge (March 2, 2017)
   g) 6th Annual Kent County Science Fair - Chemistry, Delaware State University; Judge (March 2, 2017)

9. Advanced study or other professional development
   a) R01 GRANT: How to write a persuasive proposal (May 24, 2018) - Webinar.
   b) Inspiring Women in STEM conference (October 18, 2017, Wilmington, DE).
   d) Climate Change Education Symposium, Delaware State University (March, 28 2017)

10. Special honors and awards received
    a) 13th Center for Teaching and Learning Teaching Innovation and Enrichment Mini-Grant Award, Delaware State University (May 22, 2018).
    b) Travel Award, Center for Teaching & Learning, Delaware State University (May 21, 2018).
    c) Hornets Awards, Early College High at Delaware State University (May 7, 2018).
11. Other significant accomplishments (Supervision of students' M.S. thesis)

a) Undergraduate Mentoring:

i. Adebola Gbadebo, Summer Research Intern, 2018

ii. David Adejoro, Summer Research Intern, 2018

iii. Damyen Ingram, INBRE Summer 2018 Intern

iv. Kristabel J. Madera, Student Research Assistant - Completed

v. Sydney Jones, Capstone project: Determination of acetaminophen and ibuprofen in the larvae of *Calliphora vicina* using High Performance Liquid Chromatography), Co-mentored with Dr. Krystal Hans (Forensic Biology, DSU) - Completed/Graduated

vi. Chigozie Louis Okolie (Topic: The structure-function relationship between *Ascophyllum nodosum*poly saccharides and in vitro prebiotic activity: An assessment of the impact of extraction technologies). Dalhousie University, Truro, Canada & Verschuren Center for Sustainability in Energy and the Environment, Cape Breton University, Sydney, Canada - Completed/Graduated - Feb 2018
