

Agile Certified Practitioner Project Management Professional (ACP Exam)

The Agile Practitioner Profession

As an Agile Practitioner, you are responsible for the planning, execution, and delivery of projects by using industry standard agile methods. Project managers are responsible for planning and overseeing projects to ensure they are completed in a timely fashion and within budget. Project managers plan and designate project resources, prepare budgets, monitor progress, and keep stakeholders informed the entire way. Project managers are needed on a wide variety of projects, including construction, IT, HR, and marketing.

Education & Certification

- 2,000 hours of general project experience working on teams. A current PMP® or PgMP® will satisfy this requirement but is not required to apply for the PMI-ACP.
- 1,500 hours working on agile project teams or with agile methodologies. This requirement is in addition to the 2,000 hours of general project experience.
- Students who complete this comprehensive course would be prepared to sit for the **Project Management Institute (PMI) Agile Certified Practitioner (ACP) Exam**.

The Agile Certified Practitioner Program

This intermediate-level course is designed to prepare learners for the Project Management Institute®'s Agile Certified Practitioner (PMI-ACP)® exam. As such, learners should have some experience in Agile project management prior to enrolling. The course begins with the Agile Basics and Agile Applications modules from our Introduction to Agile course, before continuing on to cover the key tools, techniques, and strategies that PMI® has listed as important for Agile practitioners to understand to achieve their certification.

Detailed Course Topics Covered

- Define Agile development and differentiate it from traditional Waterfall practices
- Identify the similarities and differences among Agile methodologies
- Describe the stages of the Agile development cycle and identify the factors that promote project success
- Understand how to apply specific tools and techniques to successfully complete Agile projects
- Understand the interrelationships of tasks, activities, and practices in Agile projects
- Understand the specific roles and responsibilities of team members and enhance interaction on Agile teams
- Successfully complete the PMI-ACP® certification exam
- Effectively lead and work with Agile teams
- Understand the nuances of leading and working with Agile teams & underlying issues that lead to common problems
- Apply best practices from organizations that have successfully incorporated Agile methodologies into their business activities
- Describe ways to keep an Agile team focused on delivering value and help members recognize when their behaviors are inhibiting team development
- Uncover additional stakeholders and project participants to enhance project feedback
- Give examples of the "must have" skills that product owners should possess
