CompTIA Project+ Professional

The IT Project Management Profession

CompTIA Project+ is ideal for professionals who need to manage smaller, less complex projects as part of their other job duties but still have foundational project management skills. Project+ is more versatile than other certifications because it covers essential project management concepts beyond the scope of just one methodology or framework.

The CompTIA Project+ examination is designed for business professionals who coordinate or manage small-to-medium-sized projects. The successful candidate will have the knowledge and skills required to:

- Manage the project life cycle
- Ensure appropriate communication
- Manage resources and stakeholders
- Maintain project documentation

The CompTIA Project+ Professional Program

The CompTIA Project+® Exam Prep course prepares learners for passing the Project+® exam and earning the credential. It is intended to inform learners on the basics of project management, including project overview, project constraints, communication and change management, and project tools and documentation. This certification is great for someone just starting out or looking to break into the project management.

Education & Certification

➢ Clinical Medical Assistants should have or be pursuing a high school diploma or GED.

➢ Students who complete this comprehensive course would be prepared to sit for the **CompTIA Project+** national certification examination.
