

## LEED Green Associate Professional

### The LEED Green Associate Profession

The LEED Green Associate credential designates individuals who have a documented, up-to-date understanding of the most current green building principles and practices. The LEED Green Associate is a foundational credential and for many it is the first step before earning advanced credentials such as the LEED AP with specialty.

### The LEED Green Associate Professional Program

This self-paced course introduces key concepts and terms to prepare learners to earn their LEED® Green Associate v4™ accreditation. The course is divided into modules that explain LEED® process, LEED® certification, and the knowledge domains associated with the seven LEED® rating systems, in a simple and straightforward way that can be quickly and easily understood.

Throughout the course, comprehension and understanding of important topics will be tested through challenging exercises and interactive games. Quizzes and tests will also be employed to ensure that learners have a clear grasp of the critical details they'll need to know as LEED Green Associates™.

### Education & Certification

- Clinical Medical Assistants should have or be pursuing a high school diploma or GED.
- Students who complete this comprehensive course would be prepared to sit for the **Leadership in Energy and Environmental Design (LEED) Green Associate** national credentialing examination.

### Detailed Course Topics Covered

- Understand the structure and requirements of the LEED Green Associate™ Exam
- Explain and apply the key concepts found in the LEED® rating systems
- Differentiate green building practices and their associated environmental, economic, and social benefits.
- Begin your preparation to earn your LEED Green Associate™ accreditation with confidence
